VHF: A control tower for the Industrial Port is under construction and will be in use late 1983. In the interim period all VHF traffic will be handled by the Commercial Port Control Tower. Continuous watch is kept on Channel 16, Working Channels 12 and 9. It is recommended that the vessels also maintain contact with the Port Management.

TUGS: See "Commercial Port".

Tug VHF Working Channels are 9 – 12. Ship's line will be used, tugs will join vessel in the area of No. 19 Buoy.

BERTHING: This industrial port serves the import and export needs of a vast complex of industry directly adjacent to it. This complex, now nearing accomplishment of the planned construction, finally, will be one of the Kingdom's largest works concentrations, comprising refineries, related petrochemical plants, and a steel mill.

The ship movement inside the boundaries of this harbour and all clearance procedures concerned with vessel entry and sailing will be almost same to that followed in Jubail Commercial Port. This harbour is laid out in 4 distinctive sections, namely:

1. The service facility, with a 6 m. depth quay for port craft and others: 2 ramps module input facility – with an 8 m. depth, capacity 2,000 tonnes; with a 1,000 tonnes slipway and marine yard.

2. The dry bulk terminal, 14 m. depth alongside, with 9 berths totalling 2,300 m. quay wall and a Ro/Ro stern ramp comprising 500,000 sq.m. of workable space.

Intended Berth Allocation:

Berth No.	*Allocation*
21	Sulphur
22	Sulphur
23	Sponge Iron
24	Iron Ore
25	Iron Ore
26	—
27	Fertiliser
28	Fertiliser
29	Alumina

3. The liquid bulk terminal, 16 m. depth, with 7 T-head jetties, for the export of refined products, is under construction.

Intended Berth Allocation:

Berth No.	*Allocation*	
41	Methanol	Saudi Methanol, National Methanol Co., Al Jubail Petrochemical Co. (Petchem III)
42	Chemicals	Saudi Petrochemical Co. (Petchem I)
43	Chemicals	Easter Petrochemical Co. (Petchem IV), Saudi Petrochemical Co. (Petchem I). Arabian Petrochemical Co. (Petchem II)
44	Chemicals	Not given yet.
51	Products	
52	Lube	
53	Lube & Petmark bulk	
54	Future	

Berth No. 41: 3×12 in. Chiksans with QCDC to take ASA 150 8 in. – 10 in. – 12 in. Two meters between the arms. Pump rate max. 2,500 MT/h. using 3 arms. Vapour return by 12 in., ASA 150 hose.

Storage at berth 2×16,500 MT.

Storage at factory 2×25,000 MT.

Loading temperature just below air temperature.

4. The open sea tanker terminal (OSTT), depths alongside between 28 m. to 30 m., is completed and can accommodate 4 tankers of up to 300,000 d.w.t.; initially built for the export of crude oil, the terminal presently is being converted to serve for the export of refined products only.

Intended Berth Allocation:

Berth No.	*Allocation*
61	Products
62	Lube
63	Not allocated
64	Not allocated

CARGO HANDLING EQUIPMENT:

Forklifts:	1×6 tonnes
Mobile Cranes:	1×90 tonnes (Not yet commissioned) 4×40 tonnes 4×15 tonnes
Floating Crane:	200 tonnes at 4.5 m. 100 tonnes at 24 m.
Flatbeds:	3
Mafi:	12

STEVEDORES: 1st shift: 0700–1900 hrs., 2nd shift: 1900–0700 hrs., 7 days a week. Sufficient gangs available to work 4 hatches on every vessel.

MEDICAL: There is a hospital in Jubail. Doctors, Dentist and Ophthalmologist are available, all arrangements to be made by ship's Agent.

TANKERS: See "Berthing".

DENSITY: 1034.

FRESH WATER: Fresh water available at all berths on 14 m. quay and will be at other berths in future.

FUEL: Available ex-barge or road tanker.

CONSULS: The American Consul-General is at Dhahran. A British Consular Official visits Dammam weekly.

REPAIRS: A slipway for the repair of vessels up to 1,000 tonnes d.w.t. and 50 m. length.

SURVEYORS: International Marine Surveyors and Classification Society Surveyors are on call from Dammam.

AIRPORTS: The nearest passenger airport is Dhahran, 120 km. by road, there is a freight airport at Jubail.

TELEPHONES: Connections are being developed.

SHORE LEAVE: Ship's personnel are allowed ashore with special passes issued by the Coastguard, at the request of the ship's Agent. The Coastguard will station an armed guard at the gangway to prevent unauthorised boarding and landing.

BANKS: All major Middle East Banks have branches at Jubail.

GENERAL:

Jubail: A developing town with first class hotel facilities. Dammam is the nearest city, some 100 km. by road.

Emergency Procedures: In the event of any emergency involving human life, fire, chemical or oil spillage the Port Control Tower must be advised immediately on Channel 16 VHF. The Port Control Tower will coordinate all emergency procedures. Masters are reminded that they must notify the Port Management immediately of any accidental discharge of oil or chemicals. Skimming and dispersant craft will be available to deal with any pollution emergency.

Port Regulations: Every vessel which arrives in a port of the Kingdom of Saudi Arabia must have a copy immediately on first arrival.

AUTHORITY: King Fahd Industrial Port in Jubail, P.O.Box 547, Jubail – 31951, Saudi Arabia. *Tel:* (03) 341-6515. *Telex:* 632031 – JUPIPT SJ and 632106 GDHFNM SJ. *Contact:* H.E. Dr. Mohiddeen D. Kayal, Director General.

AGENT: Gulf Agency Company Saudi Arabia, P.O.Box 12, Jubail, Saudi Arabia. Cables: "Confidence", Jubail. Telex: 631030 ("GAC SJ"). Tel: 3611064, 3611052, 3613072. After office hours: 3611455, 3613458.

RABIGH (Sherm Rabegh): 22.48 N. 39.01 E.

The Petromin refinery port of Rabigh, located 160 km. North of Jeddah, is presently under construction and expected to be ready for operations in 1984-85. Facilities planned include:

A liquid cargo basin dredged to 26 m. and fitted with pontoons for the berthing of VLCCs.

A bunkering basin dredged to 9 m.

A facility for handling commercial cargoes dredged to a depth of 11 m.

A complete range of support services and facilities will be provided.

RAS AL-KHAFJI: 28.25 N. 48.32 E. (See Plan Book)

The port is located in the offshore area of the Divided Zone of the Kingdom of Saudi Arabia and the State of Kuwait.

The onshore base lies in position approximately Lat. 28° 25′ N., Long. 48° 31′ E., and within a distance of 7 miles (13 km.) offshore the Company has two four-buoy system berths and two single-buoy-mooring system berths for loading tankers, and also an anchorage area for dry-cargo ships. Outside of this distance there is an anchorage area for tankers. These berths and anchorage areas are situated in the territorial waters of the Kingdom of Saudi Arabia.

In addition to exporting crude oil, fuel oil and naphtha are also exported.

APPROACHES: The approaches to Ras Al-Khafji are marked on the appropriate U.S.N.O. and British Admiralty Charts, and deep enough for the majority of vessels visiting the Port to proceed with normal caution using the buoys (Buoys No. 1 and No. 2) as centre line and both side markers (Buoys No. 3 – No. 8). A single patch with a depth of 56 ft. (17.07 m.) marked by Buoy No. 4 exists close to the passage. A patch of minimum depth of water 70 ft. (21.34 m.) exists in the passage 0.6 miles S.S.E. of Buoy No. 7.

All the geographical positions shown are intended for reference purpose only. Users are reminded that certain differences are known to exist between the positions herein and those on the U.S.N.O. and British Admiralty Charts of the area.

The U.S.N.O. Chart Nos. 62422 and 62430 are recommended for navigational use in this area.

For oil tankers arriving at Ras Al-Khafji without the necessary charts, the full information will be given by telegram upon request to "ARABIAOIL KUWAIT" (via "9KK Kuwait Radio Station") a few days before arrival. The same information will be given by telex upon request to the Company's Field Office. Alternatively, if the vessel has VHF, the buoy positions will be given to them upon request to "Ras Al-Khafji" as the vessel approaches, but prior notice of requiring this service should be given in the vessel's arrival message. The navigation message used reads as follows:

"FROM JEZIREH YE FARSI LIGHT 5 MILES OFF ABEAM STEER COURSE 300 DEGREES TRUE FOR 64 MILES TO REACH NUMBER ONE LIGHT BUOY LATITUDE 28° 36.0′ NORTH LONGITUDE 49° 10.0′ EAST RWVS ISOPHASE WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 270 DEGREES TRUE FOR 9 MILES TO NUMBER TWO LIGHT BUOY LATITUDE 28° 36.0′ NORTH LONGITUDE 49° 00.0′ EAST RWVS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 254 DEGREES TRUE FOR 9.5 MILES TO POINT 0.8 MILE NORTHWARD OF NUMBER FOUR LIGHT BUOY LATITUDE 28° 32.6′ NORTH LONGITUDE 48° 49.0′ EAST RED GPFL FIVE RED TEN SECONDS 6 MILES RAREFL – THENCE STEER 270 DEGREES TRUE ABOUT 2 MILES TOWARD NUMBER SEVEN LIGHT BUOY LATITUDE 28° 33.4′ NORTH LONGITUDE 48° 45.7′ EAST GREEN FLASHING GREEN THREE SECONDS 4 MILES RAREFL – THENCE STEER 243 DEGREES TRUE TOWARD FOR 8 MILES NUMBER NINE LIGHT BUOY LATITUDE 28° 29.5′ NORTH LONGITUDE 48° 37.8′ EAST YELLOW GPFL FOUR YELLOW TEN SECONDS 7 MILES RAREFL MARKS TANKER ANCHORAGE WEST CORNER STOP NUMBER ONE AND TWO LIGHT BUOYS MARK CENTRE LINE OF APPROACH WHICH IS WIDE AND DEEP STOP TWO SHOAL PATCHES NORTHWARD OF APPROACH ARE MARKED BY NUMBER THREE LIGHT BUOY LATITUDE 28° 34.9′ NORTH LONGITUDE 48° 51.5′ EAST YELLOW ABOVE BLACK QUICK FLASHING SIX PLUS LONG FLASHING WHITE FIFTEEN SECONDS 10 MILES RAREFL AND NUMBER FIVE LIGHT BUOY LATITUDE 28° 33.8′ NORTH LONGITUDE 48° 48.0′ EAST YELLOW ABOVE BLACK VERY QUICK FLASHING SIX PLUS LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL STOP TANKER ANCHORAGE AND PILOT GROUND IS WITHIN 1 MILE RADIUS OF LATITUDE 28° 29.5′ NORTH LONGITUDE 48° 39.0 STOP"

NAVIGATIONAL AIDS: All geographical positions given although approximately correct, are intended for reference purposes only as certain differences are known to exist between these positions and those shown on the U.S.H.O. and British Admiralty Charts of the area.

Conspicuous Marks: The flare stacks in the offshore field and onshore are normally visible at a far distance, but may occasionally be extinguished, and a well structure located 4.5 miles Northward from Light Buoy No. 2 also conspicuous.

No. 1 Flare	Lat. 28° 28.3′ N.,	Long. 48° 57.0′ E.
No. 2 Flare	Lat. 28° 27.0′ N.,	Long. 48° 54.8′ E.
No. 3 Flare	Lat. 28° 29.8′ N.,	Long. 48° 56.0′ E.
No. 4 Flare	Lat. 28° 30.3′ N.,	Long. 48° 58.0′ E.
No. 5 Flare	Lat. 28° 28.5′ N.,	Long. 48° 55.9′ E.
Onshore Flare 1	Lat. 28° 24.5′ N.,	Long. 48° 32.4′ E.
Onshore Flare 2	Lat. 28° 23.7′ N.,	Long. 48° 32.1′ E.
Well Structure	Lat. 28° 40.4′ N.,	Long. 48° 57.8′ E.

Aids to Navigation: See M.E.N.A.S. Notice No. 08/81 after "Services".

DOCUMENTS: *(A) Clearance.* Master should submit following documents to Saudi Arabian Government through Agent (2 copies each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note: Forms 1–3 are supplied by the Agent.

(B) Cargo: All the documents listed below except the Ship's Statement of Cargo (Ullage Report) are prepared onshore, and this takes about 1.5 hours after loading completion. The tanker is requested to designate the type of documentation, either early departure or ordinary documentation. The Company usually recommends early departure documentation, either Case I or II. But ordinary documentation can also be requested. In this case, however, it takes a further 30 – 60 minutes before the documents arrive at the tanker. Whenever necessary, the Mooring Master will sign the documents on behalf of the Company.

The following cargo documents are usually to be prepared onshore except (4):

(1) Notice of Readiness
(2) Bill of Lading
(3) Tanker Time Sheet
(4) Ship's Statement of Cargo (Ullage Report)*
(5) Certificate of Discharge**
(6) Master's Receipt of Documents

Note: *Ship's Statement of Cargo includes the items for "Clean Ballast Declaration" and "Dry Inspection" both together in one form, and is to be completed always on board the tanker regardless of Early Departure Documentation.

**Certificate of Discharge should be handed to the tanker's Agent at the port of discharge for certification by the Customs Authorities there. The Agent should then return the Certificates to the Company as soon as possible. Non compliance with this requirement could involve the tanker in serious difficulty as all the member states of the Arab League prohibit the export of any materials through their ports to Israel, and the purpose of the Certificates is to prove that the cargo was not discharged in Israel.

Masters are therefore advised to ensure that their Agents at each discharging port understand this and return the Certificates at the earliest possible moment.

The following is a copy of a letter to a ship's Agent from the Chief of Ras Al Khafji Port. Dated September 1980.

We would like to advise you that effective 1st of Dhul-qadah, 1400 (September 10, 1980) in case you need a port clearance for any vessel under your agency please ensure that ship's crew list consists of name, nationality, date of birth, place of birth, passport/seaman book number and rank. In the absence of this information we are unable to provide you with departure port clearance and you will be held responsible for ship departure delays.

EARLY DEPARTURE DOCUMENTATION: This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio or Marine Communication Band 2150 MHz to receive shore figures and time after departure.

READINESS: The Master of each arriving tanker should present a Notice of Readiness to the Company's Mooring Master who will sign it on behalf of the Company. The Notice of Readiness should be tendered at the time of the tanker's arrival at the anchorage area, which is understood to be either the time of dropping the anchor in the anchorage, or if the tanker does not anchor, the time when the Mooring Master boards the vessel.

PILOTAGE: Pilotage is compulsory for arriving tanker's berthing and unberthing at Ras Al-Khafji and a Company's Mooring Master will board the tanker at the anchorage area to take her to her assigned berth. The Company's Mooring Master shall advise the tanker's Master on the manoeuvre and operations relating to berthing, bunkering, connecting and disconnecting the loading hoses. After berthing, the Mooring Master will remain onboard the tanker until she is unberthed and the cargo documents are completed.

Notwithstanding the presence of the Company's Mooring Master onboard, the Master of the tanker remains responsible for his tanker at all times and in all respects.

In the event of any emergency, however, the necessary steps should be taken with the assistance of the Mooring Master.

The Master of each tanker shall give the Mooring Master all information necessary for the safe handling and the safe operation of the tanker while in the berth.

BALLAST: *Prevention of Sea Pollution by Oil:* THE DISCHARGE OF DIRTY BALLAST and/or OIL RESIDUE, BILGE and WASTE OIL by any vessel in the GULF area is STRICTLY PROHIBITED. The Company strongly requests all vessels to observe this rule of sea pollution prevention by oil in conformity with the Saudi Arabian Government's policy objectives as well as their Ports, Harbours and Lighthouses Regulations along with the relevant rules, which are substantially as follows:

In the event of oil pollution of the sea by any vessel, Masters are liable to possible imprisonment and fine, in addition to the refundment of all clean-up costs and damages sustained by any party. Should Masters fail to comply, they may be detained by the Authorities. Shipping Agents will be required to warrant Master's compliance.

Since the terminal has no facilities to receive dirty ballast, oil tankers arriving with dirty ballast will be requested to collect dirty ballast into one tank of the tanker, otherwise load crude oil on top of oil residue.

Recommended Ballast Condition on Arrival: All tankers arriving at this port are required to have sufficient ballast to give a safe draft for manoeuvring in the port. Tankers arriving with insufficient ballast may be required to increase it if the Mooring Master considers it necessary to do so. In good weather conditions, the Mooring Master will permit arriving tankers to start deballasting as they approach the berth in order to save time.

BOARDING: For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

All vessels are required to provide a safe means of access for personnel boarding and leaving the vessel, and should have their accommodation ladder rigged on the port side. In the case of tankers assigned to Berth No. 3 or No. 4 an accommodation ladder which leads down forwards is liable to be blocked by the floating hoses, and in such a case the ladder should be rigged on the starboard side. A ladder aft is always suitable on the port side.

ANCHORAGE: *Ocean Tankers Anchorage Area:* The oil tankers anchorage area is designated within 1 mile radius from:

Lat. 28° 29.5′ N., Long. 48° 39.0′ E.

Two Light Buoys (No. 9 and No. 10) mark the Western limit and Southern limit of this area respectively. The depth of water varies from 70 ft. (21.34 m.) to 77 ft. (23.47 m.) with a good holding ground of clayey mud. Oil tankers awaiting berthing should anchor as close as possible to these buoys.

Dry-Cargo Ships Anchorage Area: The anchorage area for dry-cargo ships is located about 5.5 miles to the S.W. of the oil tanker anchorage area, and is centred in position: Lat. 28° 26.8′ N., Long. 48° 33.4′ E. at which position a yellow Light Buoy (No. 14) showing a flashing yellow light every 3 seconds has been laid. Dry cargo ships should anchor within 0.5 mile radius of this buoy, where the depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in a good holding ground of clayey mud.

Prohibited Area from Navigation, Anchoring and Fishing: An area bounded by straight lines joining the following points is prohibited from anchoring and fishing due to the presence of Wellheads, Flow Stations, Gathering Station, etc. and the numerous pipe-lines and power transmission cables on the sea bed.

Additionally, the area bounded by the following 6 points (f) – (j) and (m) is prohibited from navigation of any oil tankers and vessels or craft except those operating on direct instructions from the Company.

(a)	Lat. 28° 24′ 48″ N.,	Long. 48° 31′ 57″ E.
(b)	Lat. 28° 25′ 33″ N.,	Long. 48° 32′ 55″ E.
(c)	Lat. 28° 26′ 45″ N.,	Long. 48° 35′ 16″ E.
(d)	Lat. 28° 25′ 50″ N.,	Long. 48° 35′ 40″ E.
(e)	Lat. 28° 29′ 04″ N.,	Long. 48° 52′ 34″ E.
(f)	Lat. 28° 32′ 00″ N.,	Long. 48° 54′ 00″ E.
(g)	Lat. 28° 35′ 00″ N.,	Long. 49° 00′ 00″ E.
(h)	Lat. 28° 32′ 00″ N.,	Long. 49° 04′ 00″ E.
(i)	Lat. 28° 28′ 00″ N.,	Long. 49° 04′ 00″ E.
(j)	Lat. 28° 24′ 00″ N.,	Long. 48° 52′ 00″ E.
(k)	Lat. 28° 26′ 53″ N.,	Long. 48° 52′ 00″ E.
(l)	Lat. 28° 23′ 13″ N.,	Long. 48° 31′ 48″ E.
(m)	Lat. 28° 28′ 06″ N.,	Long. 48° 52′ 00″ E.

RESTRICTIONS: *Port Closure:* When the weather and sea conditions develop worse than the below mentioned permissible criteria at the port, mooring operations normally become extremely difficult and unsafe. Therefore, in such circumstances, the Company advises that the port is closed to approaching tankers by VHF and requests the tankers to wait at the Tanker Anchorage Area until the port is reopened.

The Company, however, reserves the right of selective berthing of some vessels with better manoeuvrability even during such period.

Permissible Criteria for all Berths:

Wind Velocity: Up to 20-25 knots depending on direction.
Sea Conditions: Up to 5 ft.

MAX. SIZE:

Berth	*Depth of water at ISLW* (ft.)	*Max. Permitted draft* (ft.)	*Designed tanker size* (d.w.t.)
No. 1	53	47	100,000
No. 2	56	50	100,000
No. 3	62–64	54*	300,000
No. 4	70–73	64‡	300,000

*56 ft. permissible using rise of tide.
‡66 ft. permissible using rise of tide.

HEALTH: *Quarantine and Pratique:* Quarantine Office of the Saudi Arabian Government is maintained at the port, and a Quarantine Doctor or a Quarantine Officer may board the vessel, if he considers it necessary.

The Master is requested to submit the following documents for the Government filing through his Agent:

(a) Crew List
(b) Vaccination List } 3 copies each
(c) Passenger List (if any)

All arriving vessels should despatch the following cable to Quarantine Office at the port 48 hours before their arrival at Ras Al-Khafji Port:

"QUARANTINE KHAFJI (ship's Agent cable address)
vessel's name ETA RAS AL-KHAFJI time and date FLAG __ LAST PORT ______ DESTINATION ______ NO. OF CREW ______ NO. OF PASSENGERS ______ ALL HEALTHY NO SICKNESS NO DEATH VALID CERTIFICATE REQUEST FREE PRATIQUE.
MASTER __________________."

Quarantine fee is collected from any vessel according to her Net Registered Tonnage other than tankers lifting hydrocarbon cargoes.

RADIO: *Notice of Arrival:* Arriving vessels should advise their ETA Khafji at least 72 hours before their arrival through normal radio services. As an alternative to the route through Kuwait Radio Station (call sign: 9KK), these vessels may send their first message through Singapore, Bombay or Bahrain Radio. Confirmation of ETA should be made well in advance before arrival by calling "Ras Al-Khafji" on Channel 16 VHF. Shorter notices may result in delays and failure to give at least 24 hours will result in an addition to allowable laytime in the event a demurrage claim is filed against the Company. After anchoring, these vessels should advise their time of anchoring through VHF, and thereafter maintain a continuous watch on Channel 16 until the Company's Mooring Master boards. "Ras Al-Khafji" VHF station normally works 24 hours every day.

Radio Communications: All radio communications between the Company at Ras Al-Khafji and the vessel are made through the Kuwait Government Radio Station (9KK) in Kuwait, or directly to the Company's Field Office by telex.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station as it is sometimes difficult to contact Kuwait Radio Station from a long distance.

All cables should be addressed to "ARABIAOIL KUWAIT". The first message should be sent according to the following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras Al-Khafji
(2) Last port
(3) Deballasting time
(4) Quantity and type of cargo and bunker required
(5) Maximum loading rate
(6) Diameter of cargo and bunker connections
(7) Distance from manifold to ship's side
(8) Derrick capacity
(9) Estimated sailing drafts – fore and aft
(10) Whether Ras Al-Khafji is first or second port (when taking part cargo).

Note: Item (10) should only be answered in cases where tankers are taking part cargo at Ras Al-Khafji. If coming second port, the first loading port should be mentioned.

Short-range radio communication can be made with the Terminal Office by calling "Ras Al-Khafji" on VHF Channel 16.

VHF: Short-range communication can be made with Terminal Office by calling "Ras-al-Khafji" on VHF Channel 16. Working Channels are 9, 11, 12, 13 and 14. Vessels should call Ras-al-Khafji several hours before arrival to confirm ETA and receive berthing instructions. After anchoring they should advise their anchoring time and then maintain watch on Channel 16 until the Mooring Master boards. Terminal VHF normally operative between 0400–1400 hrs. GMT, and is used outside these hours by special arrangements with individual ships.

TUGS: The undermentioned tugboats are available for mooring and unmooring purposes.

	g.r.t.	*b.h.p.*	*Towing Power (tons)*
"Chiyoda Maru No. 4"	236	2,200	28.3
"Shark"	360	4,200	45.0
"Shark II"	478	4,200	60.5

One of these tugs stands by near the berths as long as the tanker remains moored.

The undermentioned two mooring boats are used for handling ropes and hoses.

	g.r.t.	*b.h.p.*	*Towing Power (tons)*
"Sarah 6"	106	800	7.0
"Sarah 7"	106	800	7.0

BERTHING:

Berths No. 1 and No. 2:

(a) Sea-Berth No. 1:

Position of manifold:	Lat. 28° 26′ 10″ N., Long. 48° 34′ 57″ E.
Depth of water:	53 ft. (16.2 m.) at ISLW.
Permitted draft:	47 ft. (14.3 m.) max.
Type of berth:	The berth is a conventional 4-buoy system where the tanker moors with 2 anchors and 1 buoy forward and to 3 buoys aft.
Length of berth:	The berth is designed for tankers of 800 ft. (244 m.) length but can be used by tankers of any size, although tankers of less than 650 ft. (198 m.) overall length sometimes experience difficulty in mooring if their lines are less than a full 720 ft. (220 m.).
Submarine pipelines and hoses:	From the ex-Loading Dock 1×26 in. crude oil line and 1×18 in. fuel oil line have been laid to the underwater manifold position. From there 2×10 in. rubber hoses for crude oil and 1×12 in. rubber hose for fuel oil are connected, approximately 270 ft. (82 m.) long and the maximum lifting weight of the 2 crude oil hoses together is 4.5 tons – 5.0 tons. For bunkering purpose one section of 6 in. hose is attached to the end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2:

Position of manifold:	Lat. 28° 25′ 55″ N., Long. 48° 35′ 28″ E.
Depth of water:	56 ft. (17.1 m.) at ISLW.
Permitted draft:	50 ft. (15.2 m.) max.
Type of berth:	Same as Berth No. 1.
Length of berth:	Same as Berth No. 1.
Submarine pipelines and hoses:	From the ex-Loading Dock 1×26 in. crude oil line and 1×10 in. bunker line have been laid to the manifold position. From there 2×10 in. rubber hoses for crude oil and 1×6 in. rubber hose for bunker are connected to the ship's manifold. All these hoses are approximately 360 ft. (110 m.) in length, and the maximum lifting weight of 2 crude oil hoses together is 4.5 tons – 5.0 tons.

(c) Loading Rates:

Crude oil loading rate at Berths No. 1 and No. 2 is 30,000 bbls./hr. or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 4,000 bbls./hr. or 600 tons/hr., and at Berth No. 2 is 2,700 bbls./hr. or 400 tons/hr.

(d) Preparation on Board before Berthing: Tankers assigned to Berth No. 1 or No. 2 should have the following ready:

(i) Both Anchors.
(ii) Three ropes forward and 9 ropes aft.
Some wires are acceptable in place of the equivalent number of ropes.
Neither ropes nor wires are available from the buoys.
All ropes and wires should be in good condition and preferably without splices.
(iii) Port derrick rigged for a minimum lift of 5 tons, using a wire runner and hook.
(iv) Two 10 in. ANSI 150 hose connections for crude oil, and 1×12 in. ANSI 150 for fuel oil cargo (at Berth No. 1 only), at the ship's port side manifold.
If ANSI 150 is not available, the company should be advised before arrival.

(e) Mooring and Unmooring: On approaching the berth a ship's line is passed to one tugboat from the centre fairlead aft. This line should be of good strength and made well fast on board.

When in position off the berth, the starboard anchor is let go and slacked away easily to about 9 or 10 shackles on deck. The port anchor is then let go and paid out easily as the tanker swings round into the berth using the tugs and engines as required. At the same time, the starboard anchor is hove in to about 6 or 7 shackles on deck and then made ready for slacking away again.

As the tanker backs down the berth the anchors are slacked away as necessary, and the ropes are sent to the forward (No. 4) Buoy. When the stern passes close to the starboard quarter (No. 1) Buoy the ropes are sent away to this buoy, hove in tight and then put on the bitts ready for slacking if necessary.

Ropes are then run to the port quarter (No. 3) Buoy, hove tight, and the lateral position in the berth adjusted between the port and starboard quarter buoys.

Lastly, ropes are run to the stern (No. 2) Buoy and the tug line also passes to this buoy. The fore-and-aft position is then adjusted between the anchors and the sternlines. A second tug is used to assist in the lateral positioning of the tanker, and 2 mooring boats are used for running the lines to the buoys, these normally taking 3 ropes at a time.

In Wintertime 3 ropes are used to each buoy, but in Summer 2 of these may be dispensed with at the Mooring Master's discretion.

When properly positioned in the berth, the distance from the ship's side to the manifold marker buoy should be about 50 ft. – 66 ft. (15 m. – 20 m.).

When hose disconnection is completed, the tanker unmoors usually by letting go all the lines on Buoys No. 3 and No. 4, followed by those on Buoy No. 2 and lastly those on Buoy No. 1. The tanker then heaves both anchors as necessary until they are up and clear, and the tanker can leave the berth. The tugs are used as required to keep the tanker away from the manifold marker and the mooring buoys.

Mooring Masters may vary this procedure according to the prevailing weather.

(f) Hose Connection and Disconnection: After the completion of mooring, the mooring boat will pull the hose marker buoys to the tanker, and connect them to the tanker's cargo hook of port derrick. The 2 crude oil hoses are lifted together from the seabed by the tanker's derrick, and connected directly to the manifold.

The fuel oil hose at Berth No. 1 is lifted separately and connected in similar manner.

The time taken for hose connection is about 1.0 – 1.5 hours depending on the number of hoses to be connected. Hose disconnection takes about 1 hour.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc. will be provided by the Company.

(g) Loading Restriction at Berth Nos. 1 and 2: Due to there being only 1 crude oil pipeline between the ex-Loading Dock and the shore, it is not possible to load tankers in Berth Nos. 1 and 2 simultaneously.

During the night time, berthing operation at Berth Nos. 1 and 2 shall not be carried out to prevent accidents.

Berth Nos. 3 and 4:

(a) Berth No. 3:

Position of buoy:	Lat. 28° 27′ 06″ N., Long. 48° 36′ 28″ E.
Depth of water:	62 ft. – 64 ft. (18.9 m. – 19.5 m.), but 59 ft. (18.0 m.) over the pipelines, at ISLW.
Permitted draft:	Normally 54 ft. (16.5 m.), but 56 ft. (17.1 m.) permissible using rise of tide.
Type of berth:	The berth is a single-buoy-mooring system consisting of a buoy 36 ft. (11.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain 720 ft. (220 m.) long, and having a rotating deck carrying the pipe-line and mooring connections.
Mooring:	Attached to the mooring connections on the buoy are 2 double 15 in. nylon ropes (120 mm. diameter, breaking strain 250 tons/line), these main ropes supported by floats are 160 ft. (49 m.) long, and have at their free end a 35 ft. (10.7 m.) long stud link chain which includes a "Sister-plate" and a "Slender-link" for receiving the shackles used on the deck of the tanker. From the outer end of this chain there is connected a 10 in. (80 mm. dia.), polypropylene "Pick-up" rope about 165 ft. (50 m.) in length. The chain is hung by large iron buoys coloured red and green.

	A 12 in. nylon "Bollard rope" (97 mm. dia., breaking strain 150 tons/line) about 150 ft. (46 m.) in length is connected between each "Sister-plate" and ship's bollard while tankers moor in berth.
Submarine pipe-lines and hoses:	1×36 in. crude oil line and 2×12 in. fuel oil lines are laid approximately 30,000 ft. (9,140 m.) from the shore to a position off the underwater manifold close under the buoy through the Valve Station, which is located at about 4,000 ft. (1,220 m.) Westward of the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. submarine hose; the fuel oil lines are joined at the underwater manifold and the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 20 in. crude oil hose and the 10 in. fuel oil hose, which are floating, have a length of 720 ft. (220 m.) to a hose raft, at which position the crude oil hose is divided into 3 strings of 12 in. floating hoses. These, together with the fuel oil hose, extend for a further 150 ft. (46 m.) making a total length of 870 ft. (265 m.) including the raft. At their free end the hoses are paired and connected to 2 large marker buoys each 5 ft. in diameter.

(b) Berth No. 4:

Position of buoy:	Lat. 28° 27′ 54″ N., Long. 48° 38′ 36″ E.
Depth of water:	70 ft. – 73 ft. (21.3 m. – 22.3 m.), but 69.5 ft. (21.2 m.) above the pipe-lines, at ISLW.
Permitted draft:	Normally 64 ft. (19.5 m.), but 66 ft. (20.1 m.) is permissible using rising of tide.
Type of berth:	The berth is a single-buoy-mooring system consisting of a buoy 35 ft. (10.7 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain of 855 ft. (261 m.) long, and having a rotating deck carrying the pipe-line and mooring connections.
Mooring:	The particulars of mooring are exactly the same as those of Berth No. 3.
Submarine pipe-lines and hoses:	1×36 in. crude oil and 2×12 in. fuel oil lines from onshore are branched at the Valve Station, which is located at about 16,600 ft. (5,060 m.) Westward of the buoy, by 1×48 in. crude line and 1×16 in. fuel line to Berth No. 4. There is also a 30 in. connecting crude line between the ex-Loading Dock and the Valve Station to raise up the loading rate at Berth No. 4. The above 1×48 in. crude line and 1×16 in. fuel line are laid from the Valve Station to a position off the underwater manifold close under the buoy. From there the crude oil goes to the buoy through a 24 in. submarine hose, the fuel oil is led to the buoy through a 10 in. submarine hose. From the deck of the buoy the 24 in. crude oil hose and the 10 in. fuel oil hose, which are floating hoses, have a length of 810 ft. (247 m.) to a hose raft, at which position the 24 in. hose is divided into 3 strings of 14 in. floating hoses. These, together with the 10 in. fuel oil hose, extend for a further 120 ft. (36.6 m.) including the raft. At their free end, these hoses are connected to large marker buoys each 5 ft. in diameter.

(c) Loading Rates at Berth Nos. 3 and 4: The maximum loading rates of crude and fuel oil at Berth No. 3 are 45,000 bbls.p.h. (6,200 t.p.h.) and 2,700 bbls.p.h. (400 t.p.h.) respectively. At Berth No. 4 these are 62,000 bbls.p.h. (8,500 t.p.h.) and 3,400 bbls.p.h. (500 t.p.h.).

(d) Preparation Onboard before Berthing at Berths No. 3 and No. 4: Before arriving at the anchorage, tankers assigned to Berth No. 3 or No. 4 should have ready the following:

(i) Two mooring messenger ropes forward, together with rope stoppers, and also 1 or 2 crow bars.
(ii) Port derrick rigged for 10 tons.
(iii) 3×12 in. ANSI 150 at Berth No. 3 or 3×14 in. ANSI 150 at Berth No. 4 hose connections for crude oil, and 1×10 in. ANSI 150 for fuel oil at the port side manifold. If ANSI 150 is not available, the Company should be advised before arrival.

(e) Mooring at Berths No. 3 and No. 4: The Mooring Master will board from a tugboat which carries the mooring and hose connection materials. Tankers should have their crew stand-by to receive these materials, and should maintain a lee until this is completed.

The Mooring Master will instruct the crew in the setting up of the forward moorings, where 12 in. bollard ropes are made fast round the port and starboard bollard posts with their attached shackles about 12 ft. (3.7 m.) inboard from the panama leads or fairleads as far forward as possible. The size of the fairlead opening should be at least 14 in. to prevent the chain jamming in the fairlead.

On approaching the berth, the tanker should lower a mooring messenger rope from each bow. The mooring boat will take the port rope first, and connect it to the port "Pick-up" rope which should be hove in while the boat returns to take the starboard rope for connection to its "Pick-up" rope. These 2 ropes are then hove in until the chains come into the fairleads, and the shackles can be made fast to the "Sister-plates". The "Pick-up" ropes are then slacked back until the bollard ropes have the weight.

Mooring is then completed, and the usual time from sending away the first line until all fast is about 30 minutes.

Immediately after the tanker moors to SBM, her stern line shall be given to the stand-by tugboat through her middle fairlead to help maintain the tanker in safe position while the tanker is in the berth.

(f) Unmooring from Berths No. 3 and No. 4: After hose disconnection is completed, the weight is taken on the "Pick-up" ropes, the bollard ropes are unshackled, and as the tanker backs off the berth the "Pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after the tanker backs off the berth, whichever is convenient, and the bollard ropes and the two big shackles are passed to the tug. Unmooring time is usually 10 minutes.

(g) Hose Connection and Disconnection at Berths No. 3 and No. 4: After the completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the tanker and connect the hook to the buoy having 1 or 2 hoses, which are usually lifted aboard and connected directly to the tanker's manifold.

The hoses are hung off on 2 in. diameter nylon ropes and lashed to the rail to prevent shock load due to wave action being transmitted to the manifold flanges.

After the first hose has been connected, the second buoy is lifted and the remaining hoses are connected in similar manner. If an arriving tanker requires a loading rate of 5,000 t.p.h. or less at Berth No. 3 and 6,000 t.p.h. or less at Berth No. 4, only 2 crude oil hoses are connected. Hose connection usually takes 2 – 3 hours. Hose disconnection is done in a reverse manner to connection, and takes about 1.5 – 2.0 hours.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc., will be provided by the Company.

(h) Loading Restriction at Berths No. 3 and No. 4: Due to there being only 1 crude pipe-line between the Valve Station and shore, it is not possible to load tankers in Berths No. 3 and No. 4 simultaneously.

Berth Loading Control Platform: An oil-well jacket type Berth Loading Control Platform with a rotating light-beacon, typical of an offshore valve station, is located in a position Lat. 28° 27.0′ N., Long. 48° 35.8′ E. about 3,600 ft. (1,500 m.) Westward of Berth No. 3. The light, Fl. R. ev. 10 sec. 16 M. (Ra. Ref.), is visible at a great distance.

Crude floating hose: From S.B.M. to floating manifold length 810 ft., diameter 24 in., test pressure 200 p.s.i., 1 line weight 3,460 kg.

From floating manifold to hose line close to tanker: Number of hoses 3. Nominal size 14 in., length 150 ft. Test pressure 200 p.s.i., weight 2,080 kg.

Floating Bunker Hose: One line of 10 in. diameter. Length 260 ft., test pressure 200 p.s.i., weight 1,210 kg.

Loading rate: Crude 40,000 – 60,000 b.p.h. Bunker light fuel minimum 1,860 b.p.h., heavy fuel minimum 2,000 b.p.h.

Weight of Hose Lines:

Height of Loading Deck above sea surface	*Hose Length*	*Weight 1×14 in. Hose Line (kg.)*	*1×14 in. + 1×10 in. Hose Lines (kg.)*
30 ft. (9.14 m.)	40 ft. (12.2 m.)	3,600	5,500
40 ft. (12.20 m.)	50 ft. (15.2 m.)	4,600	6,100
50 ft. (15.24 m.)	60 ft. (18.3 m.)	5,600	6,700
60 ft. (18.29 m.)	70 ft. (21.3 m.)	6,600	7,300

Note: The above figures include the weight of crude oil, marker buoy, lifting chains and fittings.

LOADING: *Dry Inspection:* Upon completion of deballasting the Mooring Master will inspect the tanker's tanks. If the tanks are not satisfactory, he may require further pumping until they reach the required standard.

Loading Operations: When the tanker is ready in all respects for loading, the tanker's officer must inform the Mooring Master who will transmit the necessary orders to the Central Control Room onshore.

Loading is started by a booster pump, and after everything has been checked and found satisfactory on board, then the loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that the required loading rate is within the capacity of the pumps.

Loading rates can be varied at any time during loading upon 5 – 10 minutes advance notice to the Mooring Master on board. In case of EMERGENCY, the IMMEDIATE STOPPING of all loading can be accomplished.

During loading, any valve operation on the tanker should be reported to the Mooring Master in advance. Especially at the time of Topping Off, the tanker's officer on duty should request the Mooring Master to reduce loading rate prior to any valve closing, in order to avoid any pressure on rubber loading hoses.

When loading is completing, the rate is gradually reduced by stopping first the main pumps and then the booster pumps, one by one according to the request of the tanker's officer. At the final stage of loading only booster pumps should be on the line, and the tanker's officer should tell the Mooring Master to "Stand-by" at least 5 – 10 minutes before finishing it.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes.

Any stop notice of loading completion must be given by the tanker's officer as "Shore-stop" is NOT practised at this port.

Overflows and Spillage: In the event of an overflow or spillage during loading, loading will be stopped immediately and will remain stopped unless the Mooring Master is satisfied that all the overflowed oil has been cleared off the deck and there is no longer any unusual danger for resuming loading.

Ullaging and Gauging: After loading is completed, the Mooring Master will witness the final ullaging on board so that the tanker's figures can be calculated.

Onshore the Government and the Company gaugers will take manual gauges of the shore tanks before and after loading to calculate the figures of the Bill of Lading.

MEDICAL: The Company has its hospitals at Ras Al-Khafji. Medical and dental treatment can be given in cases of emergency or serious illness or injury. Epidemic diseases or cases of serious injury or disease requiring operations, etc. are normally transferred to the hospitals in Dammam or in Kuwait. The Company's doctor will not normally attend on board unless the patient is incapable of attending the hospital. Requests for medical attention should be given to the ship's Agent as early as possible before arrival.

FRESH WATER: Not available except in cases of extreme emergency.

STEVEDORES: Dry-cargo vessels calling Ras-al-Khafji to give at least 72 hours notice to Agents to arrange labourers. Stevedores will be arranged from Kuwait. Ship's gear used for discharging which takes place at anchorage into barges.

FUEL: *General Information:* Intermediate fuel oil (IFO) and marine diesel oil (MDO) are supplied as bunker fuel oil to tankers calling at Ras Al-Khafji. Each loading berth has a pipe-line which can deliver intermediate fuel oil. Marine diesel oil is supplied from a barge with a capacity of 200 tonnes for which no extra charge is made.

Bunker Nomination: Owners, Operators or Charterers should nominate their tankers' bunker requirements to the Company's Head Office in Tokyo.

Tankers are requested to confirm the grade and quantity of bunkers required to "ARABIAOIL KUWAIT" via "9KK" through normal radio services at least 72 hours before arrival; or in cases where tankers receive their bunker instructions less than 72 hours away, they should advise their bunker requirements as soon as possible.

Bunkering Operation: Bunker supply to tankers in the berths is normally made while the tankers are discharging ballast and/or loading crude oil. MDO-supply from a barge will be done usually before loading cargo.

Tanker engineers are requested to give all necessary information and assistance to the shore staff attending the bunkering and to pay constant attention to the bunker supply.

Responsibility: Notwithstanding the presence of the shore staff attending the bunkering operation on board, the Master of the tanker remains solely responsible for his tanker at all times and in all respects.

Size of Bunker Connections and Bunkering Rates:

Berth	*IFO*	*MDO (supply from a barge)*
No. 1 (6 in.)	600/300 t.p.h.	80 t.p.h. (4 in.)
No. 2 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 3 (10 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 4 (10 in.)	500/300 t.p.h.	80 t.p.h. (4 in.)

Note: In Winter time the rate for IFO decreases due to the low sea-water temperature which increases the viscosity of the oil.

Bunkering for Dry-Cargo Ships: Bunker supply to dry-cargo ships is not available at this port.

CUSTOMS: *Customs Formalities:* Upon arrival, the Master is required to submit to the Customs a manifest of any cargo to be landed at Ras Al-Khafji and to sign a declaration that no intoxicating liquor or drugs will be landed.

A Coastguard accompanied by the ship's Agent boards to seal bonded stores. Dry-cargo ships are boarded by a Customs Officer, a Coastguard and a Quarantine Officer for sealing stores, checking valid certificates and health inspections.

Import of the following articles is strictly forbidden:

(a) Alcoholic beverages, including beer, wine and liquor.
(b) Pornographic literature, photographs, pictures and films.
(c) Explosives.
(d) Firearms or implements of war of any kind.
(e) Religious matters not pertaining to the Moslem faith.
(f) Gambling devices.

The Saudi Arabian Laws and Regulations: The Saudi Arabian Laws and Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their Agent. While in port, whether at anchorage or in the berth, the vessel's personnel are under the jurisdiction of Saudi Arabian laws. Taking of photographs while the ship is in the Port of Ras Al-Khafji is prohibited by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors are to be under lock and key during the vessel's stay in the Port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred by the Government investigations of violations.

WATCHMEN: The tanker always has to post at least 2 watchmen on duty: one on the forecastle head to watch and monitor the condition of the mooring ropes and the behaviour of the tanker by forces of wind and tidal current, and another on deck near or within sight of the manifold. They have to report to the Master and the Mooring Master whenever they observe the tanker drifting too close to the berth, or the loading hoses twisted or whenever they recognise anything unusual, so that the Master may properly manoeuvre the tanker and any mishap may be averted.

WEATHER: The local weather at Ras Al-Khafji is similar to that of Kuwait, being hot and dry with little cloud during the long Summer from May to September and considerably colder in December and January.

The prevailing wind in this area is Northwesterly, however winds of varying strength may come from any direction. In Summer, the diurnal sea breeze is light Easterly at about 5 m. – 7 m. per second (10 – 14 knots), and only rarely it increases to 12 m. per second (23 knots). In Winter South-Southeasterly winds of up to 20 m. per second (39 knots) may last one or two days and then veer suddenly to the N.W., often accompanied by gusts or squalls in excess of 20 m. per second. On occasion a type of line squall passes over and winds up to as much as 30 m. per second (58 knots) may be experienced for a short time before settling down to blow for longer periods at 20 m. per second. Little or no warning of these strong squalls is given; they just appear suddenly, often accompanied by thick sand and dust.

In the area of the Sea Berths the waves are prevented from developing by the short fetch of the Northwesterly wind, but waves up to 5 ft. – 6 ft. do occur from this direction. Southeasterly winds raise a short steep sea which quickly reaches 7 ft. – 8 ft. high. This lengthens and increases as the wind freshens and has been known to reach 14 ft. – 15 ft. in the area of the Sea Berths. When the Southeasterly wind veers the swell rapidly decreases but persists for about 24 hours thereafter.

Visibility in the area is generally good, but Northwesterly winds cause rising dust and sand which may reduce visibility to almost zero at times. Haze is common, and on calm hot days mirages are frequent. "Steam fog" may occur at times in the early morning hours resulting in very poor visibility.

TIDES/CURRENTS: The depths shown on the chart are based on ISLW. The diurnal rise of tide is approximately 6 ft. at the Springs and 5 ft. at Neaps, and the ISLW is 4 ft. below the Mean Sea Level.

The heights of both high and low water are considerably affected by the prevailing weather conditions. Northerly winds tend to reduce the heights of tides and retard them, and Southerly winds increase the heights slightly.

Near the Sea Berths the current flows roughly parallel with the shore, and reverses its direction about 1 hour earlier than the time of high or low water inshore at Ras Al-Khafji. The velocity of the current is approximately 1.5 knots at the maximum.

Both the direction and velocity of the tidal current are much affected by the prevailing weather conditions.

The tidal data for Ras Al-Khafji as compared with that of Mina Al-Ahmadi is given as follows:

Flood tide: Occurs approximately 30 minutes later than Mina Al-Ahmadi.
Height approximately 0.73 times that of Mina Al-Ahmadi.
Ebb Tide: Occurs approximately 20 minutes later than Mina Al-Ahmadi.
Height approximately 1.04 times that of Mina Al-Ahmadi.

"Tide and Current Table" published annually is available from the Company upon request.

REPAIRS: Some minor repairs on board vessels may be made using shore assistance in case of extreme emergency, but such Company's assistance will be provided only on the Master's and the shipping Agent's acceptance for undertaking to pay to the Company all expenses incurred. Preferably all repairs should be carried out at the anchorage area. In all cases when shore assistance is required, the Master should notify the vessel's Agent well in advance.

DRY DOCKS: None.

REPATRIATION: May be accomplished by making special arrangement through the ship's Agent, well in advance of vessel's arrival.

Marine Superintendent of Owners, or Owner's Representatives and businessmen visiting Kuwait must have valid visas. Such visas can be obtained from Kuwait Government's diplomatic missions abroad.

AIRPORT: Crew joining must be routed through Dhahran. Kuwait Airport 110 km. Dammam 325 km.

TIME: GMT plus 3 hours throughout year.

TELEPHONES: No facilities for placing on board.

SERVICES: *Provisions, Deck Stores:* Provisions and deck stores are available from ship chandlers at the Port in limited kinds and quantities. In all cases the ship's Agent should be advised of the requests at the Earliest possible time before arrival.

NOTICE: M.E.N.A.S. Notice No. 08/81 (see Tables on page 1199 and above).

SHORE LEAVE: Not normally permitted by Authorities except by arrangement through the ship's Agent.

AUTHORITY: *Field Office:* Arabian Oil Company Ltd., P.O.Box 256, Ras Al-Khafji, Divided Zone, Saudi Arabia. *Tel:* 03-7660555. *Telex:* 641011-ARBOIL SJ. *Contact:* The Superintendent, Terminal & Shipping Department, Field Office.

Dammam Office: Arabian Oil Company Ltd., Dhahran Street, Social Insurance Building, 6th Floor, Dammam, Saudi Arabia. P.O.Box 154 Dammam, 31411 Saudi Arabia. *Tel:* (03) 8269361, 8264115. *Telex:* 601006-ARBOIL SJ.

AGENT: See "Ras Tanura".

RAS AL MISHAB: 28.13 N. 48.43 E.

PILOTAGE: Pilotage is compulsory and only available in daylight hours (0600 to 1700 hrs.) 7 days a week with short notice prior to vessel's arrival.

Vessels calling at Ras Al Mishab are requested to contact Ras Al Mishab Harbour Office on VHF – Channel 16 prior to arrival at Pilot Buoy, (Buoy No. 5 of Ras Al Mishab Approach Channel) which is located at Lat. 28° 13′ N., Long. 48° 43′ E.; do not proceed beyond this point before consulting with Ras Al Mishab Harbour Office, which is available from 0600 to 1700 hrs. every day except Friday.

APPROACHES: Do not use the old recommended track to Bandar Mishab shown on British Admiralty Chart No. 3774 and U.S. Hydrographic Chart 62422 unless corrected. Ships arriving should follow Ras al Khafji Approach Channel Buoy No. 1 (Lat. 28° 36′ N., Long. 49° 10′ E.) and Buoy No. 2 (Lat. 28° 36′ N., Long. 49° 00′ E.). From Light Buoy No. 2 proceed on a course of 253°(T) for approximately 5 miles and the following is the new approach channel to the anchorage and entrance channel of Ras al Mishab.

The dredged channel of 4 miles is well marked by the buoys and 2 pairs of ranges that lead vessels in and out of the port.

NOTICE: M.E.N.A.S. Notice No. 138/80 (see Tables on page 1201).

ANCHORAGE: Anchorage area is between Buoy Nos. 4 and 5.

RESTRICTIONS: Daylight berthing and unberthing only.

MAX. SIZE: Max. allowed draft at present time is 33 ft. However, after completion of works on expansion of the port, which is under way, port expected to accommodate vessels up to 35 ft. draft regardless of length and/or tonnage.

TUGS: The port has 2 tugboats available to assist vessels in docking and undocking as well as any other service to be rendered in case of need for assistance. Each tugboat is capable of generating 2,000 h.p.

VHF: See "Pilotage".

BERTHING: Ras Al Mishab is a new deep water sea port with 2,400 ft. of berthing space. The turning basin of 1,250 ft. radius provides safe manoeuvring.

The pier is 18 ft. high above the water and accordingly not suitable for Ro/Ro cargo operation, however, the harbour is well equipped for receiving any type and size of cargo including heavy lifts and bulk cement up to 24,000 tons. Silo capacity 25,000 tonnes.

The harbour is fully equipped with forklifts, discharging gear, spreaders for 20 ft. and 40 ft. containers. portable cranes up to 300 tons capacity, all handled by professional stevedores.

NOTICE: M.E.N.A.S. Notice No. 138/80.
The following alterations to I.A.L.A. System "A" buoyage have been carried out in the Ras Al Mishab channel.

RAS AL MISHAB			FORMER CHARACTER		I.A.L.A. CHARACTERISTICS

FRESH WATER: Not available.
FUEL: Not available.
GENERAL: Provision not available at this port, and it is suggested that vessels calling to Ras Al Mishab, secure their needs at other ports. Only emergency medical attention shall be provided if requested by Master.

No shore leave is permitted in this port except for the Master for business purposes, the Port Regulations are to be strictly observed by all vessels.

Any other matters such as crew changes, emergency repairs provisions, etc., shall be handled through local Agent.

SHIPMASTER'S REPORT: September 1980.
Pilotage: Pilot boards 3 miles South of Buoy No. 5G.
Berthing: A new berth built 2 years ago at right angles to land with dimensions about 1,000 m. length and 250 m. wide, accommodating 8 ships, 4 on each side. 1 berth is for cement in bulk, having silo. (Sea Island berth is severely damaged and abandoned).
Stevedores: Working day and night in 3 shifts.
Clearance: Vessels are cleared any time during day whilst alongside. (We arrived alongside Thursday 1600 hrs. and we were cleared).
Tugs: 2 tugboats available.
Port facilities: 1 mobile crane 300 tons and 1 mobile crane 50 tons.
Agent: On VHF Channel 16.
AGENT: See "Dammam".

RAS TANURA: 26.38 N. 50.10 E. (See Plan Book)

ALSO SEE "JU'AYMAH" SECTIONS A and B.

(A) GENERAL INFORMATION
(B) REGULATIONS
(C) RAS TANURA TERMINAL

(A) GENERAL INFORMATION

This section contains important information for all ships proceeding to any Terminal in the Port of Ras Tanura.

NAVIGATION:
NAVIGATIONAL AIDS: In May 1981, the buoyage system in the Port of Ras Tanura was changed to the I.A.L.A. System (Region A).

Notices to Mariners have been promulgated concerning these changes.

INBOUND TRAFFIC PROCEDURES: All inbound vessels shall establish early radio contact with ARAMCO.

(a) A vessel with no special instructions or with instructions to proceed to the Northern Holding Anchorage should make for a position approximately 2 miles North of Ras Tanura Light Float (in position: Lat. 27° 05.6′ N., Long. 50° 57.5′ E.); enter the inward channel of the Separation Scheme and then pass the Approach Buoy and the Entry Buoy. The vessel should then proceed into the Northern Holding Anchorage and anchor. After anchoring, the vessel shall immediately advise ARAMCO by radio and Ras Tanura Pilots on VHF of anchoring time and keep a listening watch on VHF Channel 16 and traffic lists for further instructions.

(b) A vessel with instructions to proceed directly to Ras Tanura Terminal, Ju'aymah Crude Terminal or Ju'aymah L.P.G. Terminal should proceed as above to the Entry Buoy and as described under the individual terminal.

ANCHORAGES: The Port of Ras Tanura is an open roadstead but some protection is afforded by shoals and land to such an extent that vessels do not experience heavy movement.

Holding ground in all of the anchorages is fair and it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

The Northern Holding Anchorage is located on the North side of the Ras Tanura Separation Scheme West of the Entry Buoy and North of No. 3 beacon (Racon). This anchorage covers an area of approximately 30 square miles with depths between 82 ft. and 150 ft. (25 m. and 46 m.).

This anchorage is intended as an initial holding area for incoming vessels which, because of berthing prospects, congestion or other reasons will not be berthed on arrival. Anchorages for the individual terminals are described in Ras Tanura Section (B) and Ju'aymah.

MAXIMUM DRAFT IN ARRIVAL CHANNEL: See Section (B) for maximum arrival draft Ras Tanura Terminal (54 ft. + Height of Tide). See Ju'aymah Section (A) for maximum arrival draft Ju'aymah Crude Terminal (70 ft.). Masters of vessels arriving partly loaded or deeply ballasted should navigate with caution in the vicinity of position: Lat. 26° 50′ 30″ N., Long. 50° 10′ 30″ E.

RADAR SURVEILLANCE ADVISORY SYSTEM:
See "Regulations" – Traffic Regulations.

This system is available to provide information and to continuously monitor the movement of all ships in the Port of Ras Tanura.

In addition to identifying, tracking and monitoring ship movements to and from the Terminal areas by means of computer assisted radar and video tape recording, the following services may be provided to vessel Masters:

(a) Advice on channel and port conditions, congestion, weather, tides, navigational aids, etc.
(b) Advice upon the movement of other vessels, dangerous manoeuvring situations and vessels violating port regulations.
(c) Advice upon port regulations regarding the movement of deep draft vessels and the priorities of vessels movements. (It may be necessary for vessels arriving in ballast to reduce speed to permit safe passage for outgoing deep draft vessels).
(d) Advice on berthing prospects and anchoring conditions.

The service has been established in order to increase the safety of ships navigating in the Port of Ras Tanura. However, it is an information and advisory service only and in no way assumes control of or responsibility for ships navigating in the area.

CHARTS AND PUBLICATIONS: Surveys by American and British Authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches:

U.S.	or	B.A.
U.S. 62414	or	B.A. 3788
U.S. 62415		B.A. 3777
U.S. 62416		B.A. 3776
		B.A. 3813

Vessels proceeding to the Port of Ras Tanura should be in possession of the latest issues of the above charts or their equivalent. "Sailing Directions" and "Lists of Lights" are published by American and British authorities; these publications should also be available on board.

Navigational Warnings and weather forecasts are broadcast by ARAMCO "HZY" Radio and by commercial radio stations in the Arabian Gulf.

These should be copied well in advance of arrival.

METEOROLOGICAL INFORMATION:

Winds in the area are not predictable for more than a very few hours and may come from any quarter at varying strength. The prevailing wind is from the N.N.W.

Winds of any strength tend to create short steep seas coming up quickly and calming down just as rapidly. Easterly winds however cause heavy seas and swells which can last for a considerable period. For a more complete description of the winds of the Arabian Gulf, refer to "Sailing Directions".

Visibility in this area of the Arabian Gulf is generally fair to excellent, but at times fine dust is held in suspension in the atmosphere and visibility is reduced to a very short distance. This phenomenon is more deceptive than fog in that mariners are apt to believe visibility to be greater than it actually is. Dense fog with or without sand or dust may occur in the morning hours.

Climate of Ras Tanura is comparatively favourable for the Arabian Gulf. The exposed position of the port permits the winds to mollify the heat of Summer. Temperatures have been recorded in previous years as follows: Absolute Maximum 45.6°C (114°F) in June, Mean Maximum 38.4°C (101.1°F) in August, Mean Minimum 12.5°C (54.5°F) in January, Absolute Minimum 0.0°C (32°F) in January.

During most of the year, the relative humidity is high and during late Summer and Fall it frequently exceeds 85%.

Proper precautions should be taken to avoid sunstroke and heat exhaustion particularly during the Summer and early Fall months. Air conditioning plants aboard ships should be in good working condition at these times in view of the necessity to close down accommodation whilst loading dangerous cargoes.

TIDES AND CURRENTS: The depths quoted in U.S. "Sailing directions" and charts of the Arabian Gulf and the datum used by ARAMCO are based on Indian Springs Low Water (ISLW).

Locally the diurnal tide rise is approximately 8 ft. (2.44 m.) at Springs and 5 ft. (1.52 m.) at Neaps. More detailed description of tides and currents in the locality can be found in the "Sailing Directions".

Due to the configuration of the coastline, a system of tidal currents prevail with flood tide setting towards South or S.S.E. and ebb setting towards North or N.N.W.

DOCUMENTS:

GENERAL: All contact between ships and the Saudi Arabian Government and Officials is to be made through the ship's Agent who will advise on specific rquirements and documentation.

The following sections are for guidance only.

ARRIVAL DOCUMENTS: The following must be available to the Agent and boarding Government Officials:

(a) Maritime International Declaration of Health.
(b) Valid Deratting or Exemption Certificate.
(c) Crew List (including supernumeraries) up to 6 copies.
(d) Valid Smallpox Vaccination Certificates.
(e) Valid Inoculation Certificates against communicable diseases prevailing at previous ports of call.
(f) A complete set of log books for the period since the vessel's last visit to Ras Tanura OR for the period since new OR since April 25, 1952.

NOTICE OF READINESS: At all terminals in the Port, to be addressed to ARAMCO Ras Tanura.

EARLY DEPARTURE PROCEDURE: Use of this special service is encouraged and should be requested at the earliest opportunity.

Close co-ordination with the Agent is required in order to expedite the delivery of the required documentation to the ship.

It is essential that Radio contact with ARAMCO be maintained after departure until cargo quantities are received and the Agent has been authorised to sign documents.

DEPARTURE DOCUMENTS: The following three documents MUST be on board before the vessel departs even though the ship has been RELEASED to sail by ARAMCO.

(a) Bill of Lading: Completed by ARAMCO except for the cargo quantities. The Agent will deliver a copy to the Master who will enter the quantities as advised by radio after departure. The Master will then authorise his Agent to sign the original on his behalf.

(b) Permit of Departure: Completed by Agents with information supplied in the quarantine radio message and delivered by them to the vessel prior to departure.

(c) Port Clearance (Sailing Report): Completed in Arabic with information gathered by the Agent and delivered by them to the vessel prior to departure.

BERTHING:

FACTORS: Vessels calling at the Port of Ras Tanura are assigned berths based on a variety of factors including but not limited to the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft. If there are no immediate berthing prospects vessels will be directed to anchor in the Northern Holding Anchorage.

DOUBLE BERTHING: ARAMCO reserves the right to advise vessels at which berth or berths and/or Terminals the loading will start and finish.

MOORINGS: All arriving vessels of 75,000 d.w.t. and over shall comply with the wire mooring line requirements detailed in Part "B" – Mooring Regulations.

During periods of unsettled weather, arriving vessels of under 75,000 d.w.t. fitted with wire moorings are preferentially berthed.

BALLAST: Vessels shall complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is permitted provided that the vessel has positive segregation between the two operations. Owners/Operators or Charterers of vessels requiring time to deballast in excess of what ARAMCO considers standard will be so notified by letter with a copy to the Master.

No facilities for the reception of dirty ballast are available in the Port of Ras Tanura.

PILOTAGE:

CHANNELS: The channels of the Ras Tanura Separation Scheme ar marked by lighted radar-reflecting beacons and buoys. Channel Pilot are not provided.

BERTHING: The use of Harbour Pilots is compulsory for all vessel calling at the Port of Ras Tanura to use any of the terminal facilities.

Harbour Pilots moor, unmoor and supervise the movements of a vessels in the vicinity of the berths. ARAMCO Harbour Pilots are on dut continuously and at present their services are provided without charg for normal operations, although ARAMCO reserves the right to charg for these services.

PILOT BOATS: 3 steel-hulled pilot launches named El-Alat 9, 10 and 11 are available. They have 1500 h.p. engines and a cruising speed of 14 knots. They are 87 ft. long and have a freeboard of 6 feet.

These launches carry regulation pilot boat signals, are equipped wit radar, VHF radio and are painted white with green hull. The word PILOT is painted in white on the hull.

Also see "Regulations".

TUGS:

DESCRIPTION OF TUGS: ARAMCO operates the following harbou tugs:

3 single screw conventional tugs of 4,000 h.p. with Bollard Pull of 55 tons.

3 twin screw flanking rudder tugs of 6,000 h.p. with Bollard Pull of 72 tons.

3 Voith Schneider propulsion tugs of 4,000 h.p. with Bollard Pull of 40 tons.

METHOD OF USE: These tugs may be encountered at any of the terminals in the Port of Ras Tanura.

Tug's lines are used but vessels should have good quality ropes available to supplement these in periods of bad weather.

At present no charge is made for the tugs when used in norma mooring and unmooring operations but a charge is made for additiona or unusual services.

HELICOPTER OPERATIONS:

GENERAL: Helicopter operations in the Port of Ras Tanura are carried out according to the "International Chamber of Shipping – Guide to Helicopter/Ship Operations" All ships using the service should have a copy of this information and the safety check list on board.

DESCRIPTION OF HELICOPTERS: The helicopters used to transport ARAMCO personnel and equipment to and from tankers in the Port of Ras Tanura are Bell Model 212 and 214 which are twin-engined, kerosene fuelled, carry 11 to 18 passengers.

They are fully equipped for night operations and operate both day and night, with capability for either landing or winching operations as required and permitted.

In addition to being fitted with radar and radios which operate on aeronautical frequencies, the helicopters are fitted with International Marine VHF Ship/Shore Channels 11, 12, 13, 14 and 16.

SHIP INFORMATION: The following ship information should be available to the pilot of the helicopter:

1. Ship's name and call sign.
2. Owner.
3. Port and Country of Registry.
4. Type and Size.
5. Inert gas system installed.
6. Type of deck operating area provided for helicopters.
7. Type, size, markings and location of "Manoeuvring Zone" and "Clear Zone" provided for helicopters.
8. Obstacle types, sizes, markings and locations within and adjacent to helicopter operating area including antennae, handrails, davits, catwalks, valves, piping, etc,
9. Floodlight locations and wattage.
10. Communication frequencies available and those which are guarded continuously.
11. Special conditions, limitations and precautions applying to the particular vessel.

This information is kept on file in the Helicopter Dispatch Office and will be regularly updated.

If the conditions aboard the ship do not agree with the file, the differences must be resolved before a helicopter is dispatched to a ship.

COMMUNICATIONS:

(a) **The Initial Contact** will be made by the helicopter Pilot with the ship on V.H.F. Channel 16 and the working Channel 12 as soon as practicable to confirm the rendezvous time and location, type of service intended, etc.

(b) In the event of **Radio Communication Failure** the helicopter will circle the ship and the ship should reply by signalling lamp with:

1. Steady white light: Ready to receive helicopter
2. Series of short flashes: Reception of helicopter delayed for a period not greater than 15 minutes.
3. Prolonged series of "N" signals: Reception of helicopter delayed for a period in excess of 15 minutes. In this case the helicopter will return to base.

(c) **Initial Navigation Contact.**

The helicopter Pilot will at the appropriate time use the agreed VHF working frequency to request the ship to transmit its call sign on 410 kHz and then to transmit a continuous signal (locked Key) for a sufficient time to determine the bearing to the ship and identify it on the radar.

SAFETY: The Port of Ras Tanura maintains a vigorous cargo handling safety programme.

ARAMCO is a member of the Oil Companies International Marine Forum (O.C.I.M.F.) and as such follows the procedures and safety practices recommended by this international organisation.

As is the practice in other Arabian Gulf Ports, each ship's Master is presented with a form entitled "Declaration by Master" which lists ARAMCO safety regulations. After a detailed review of each safety item with the ARAMCO Safety Representative, the Master must sign the form. Prior to start of loading and later at several times during the loading, ARAMCO Safety Representative will visit the ship and accompanied by one of the ship's officers will check to ensure that safe loading practices are being observed by both the ship and the shore crews.

In cases of blatant or repeated infringements of the Safety Regulations ships will be removed from the berth and will not be reberthed until a thorough inspection has been satisfactorily carried out by an ARAMCO Safety Representative.

Also see "Safety Regulations".

EMERGENCY PROCEDURES: The course of action to be followed by ARAMCO Personnel in the event of a fire or explosion on board a vessel while berthed in this Port will be dictated by the particular facts and circumstances of the incident. Although it is impossible to indicate exactly what practices will be applied during an emergency before an evaluation of the specific situation can be made by the responsible ARAMCO representative, his decisions will be based on the following principles:

1. An evaluation of the particular emergency will be made by the responsible ARAMCO Representative to determine the course of action to be taken. His decision as to the course of action will take into account the location, type and extent of fire or explosion, the berth location and proximity of other vessels, and the tidal and wind conditions.
2. A burning vessel will not be permitted to remain at the berth. Where possible, the fire will be fought with available berth fire-fighting facilities until the arrival of tugs. After hook-up of the tugs to the vessel's fire wires, if the fire is not controllable or extinguished, the vessel will be released or cut free and removed from berth under controlled conditions.
3. Where communication facilities permit, the Master or responsible ship's officer will be advised prior to releasing or cutting free a vessel from berth. The Master should designate a responsible senior ship's officer with whom the senior ARAMCO Representative present can communicate in case of a fire or explosion aboard the vessel. Where possible, this officer will be advised of the actions to be taken in releasing or cutting the vessel free from the berth.
4. Although a vessel may have no power it may be released or cut free from the berth prior to arrival of the tugs and hook up to the vessel's fire wires, if in the opinion of the senior ARAMCO Representative present it is a greater hazard at the berth than drifting free. Normally, however, a burning vessel will be removed by tug boats under controlled conditions.

NOTE: The above mentioned Principles are intended to provide the guidelines of action to protect terminal personnel and facilities, and other vessels at the ARAMCO loading berths.

POLLUTION: ARAMCO adopts a vigorous policy of pollution prevention, detection, and clean-up which is required and supported by the Saudi Arabian Government.

Vessels using terminals operated by the Company are required to observe the IMO conventions relating to the pollution of the sea by oil and are advised that violations will involve the Master/Owner/Agent/Operator in severe penalties.

ARAMCO does not tolerate pollution and will clean oil spills with whatever men, equipment, and material that are required considering the size of the spill, time of day, sea state and weather conditions. The Master, Owners and Operators shall be liable for all expenditure incurred by ARAMCO.

The equipment and material used in the clean up effort is dictated by on site judgement of qualified professional personnel whose goal is to protect the environment and prevent hazardous conditions.

Masters of vessels involved in a pollution incident shall immediately contact their Agent who will arrange the necessary Government contact.

Also see "Pollution Regulations".

SHIP'S AGENTS: Vessels calling at any terminal in the Port of Ras Tanura should address all messages concerning ship's business to their Agents. Matters concerning provision supply, minor repairs, local medical or hopital services, mail, crew changes, etc., are to be handled by the ship's Agent.

SURVEYORS: Independent oil inspection service is available at the terminals in the Port of Ras Tanura by the following companies:

(a) Redwood Petroleum Division,
1 Place des Alpes,
1201 – Geneve 1, Switzerland.
Telephone: 312250
Telex: 22140 SGS CH
(for local information contact Gulf Agency Company)

(b) Caleb Brett & Son Limited,
International House, Mitre Square, 26-28 Greenchurch Lane,
London EC3A 5ED

(c) E. W. Saybolt and Co. S.A.
400, Swenson Drive,
Kenilworth, New Jersey 07033, U.S.A.

(d) Watson Gray (Saudi Arabia) Limited,
c/o Yusuf Bin Ahmed Kanoo,
Aramco Box 711 or P.O.Box 71,
Ras Tanura, via Dhahran, Saudi Arabia.
Telephone: (03)6670180/6670903
Telex: 651012 KANOO SJ

(e) Services et Transports,
Route du Hoc, Gonfreville L'orcher,
Harfleur 76700, France.
Telephone: (35) 26 40 18
Telex: 190634 F.

(f) SPACO (Saudi Petroleum Analytical Company)
c/o SNAS, P.O.Box 5641, Riyadh, Saudi Arabia.
Telephone: (01)4766589
Telex: 201406 SJ

Marine and Engine Surveyors of various companies are available locally. They may be contacted through the vessel's Agent.

FACILITIES:

BUNKERS: ARAMCO fuel bunkers are available at all berths in the port. Black diesel is not available at the Ju'aymah Crude Terminal. Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading elswhere to avoid delays caused by draft and berthing assignment problems.

Non-ARAMCO bunkering services are available. Vessels employing these services are not permitted to bunker within the operating area of the Port of Ras Tanura.

FRESH WATER: Drinking and boiler water are NOT available in the Port of Ras Tanura. In cases of emergency, ships' Agents may be able to arrange delivery by barge of small quantities.

LUBRICATING OILS: Lubricating oils are available in limited quantities of drums if ordered through ship's Agents well in advance.

PROVISIONS AND CURRENCY: Ship chandlers are available for supply of limited quantities of provisions, and may be contacted through the ship's Agent. The Saudi Arabian unit of currency is the Saudi Riyal (S.R.).

REPAIRS: Repair services are available from local business concerns. ARAMCO will not assist in making emergency repairs on vessels.

It is suggested that Masters discuss repair charges with the ship's Agent prior to requesting or authorising repair work.

DIVERS: Deep sea divers, operating from modern and well-equipped boats are available. Ship's Agents must be contacted for this service.

MEDICAL/HOSPITAL FACILITIES: No medical facilities are available at any of the terminals in the Port of Ras Tanura. Requirements for medical assistance or hospital services must be made through the ship's Agent, who can arrange treatment at one of the government or private clinics or hospitals in Rahima, Al Khobar or Dammam.

The ship's Agent is able to arrange for the Port Doctor to visit vessels to treat minor injuries or illnesses. In serious cases requiring hospitalisation the Port Doctor must attend to certify the necessity. ARAMCO medical facilities are made available in emergencies only when other facilities are not available.

A charge will be made for all such services furnished by ARAMCO. The ARAMCO radio station "HZY" may be used at any time without charge by vessels at sea to obtain medical advice.

REPATRIATION/SHORE LEAVE: All matters relating to crew changes, repatriation of crew personnel or shore leave are to be arranged through the ship's Agent. There is no Seaman's Recreation Centre at any terminal in the Port of Ras Tanura.

DRY CARGO AND FREIGHT: No dry cargo facilities exist in the Port of Ras Tanura and all ARAMCO freight is handled through Saudi Arabian Government Ports in the area.

(B) REGULATIONS

The regulations shall be observed by all vessels proceeding to any terminal in the Port of Ras Tanura.

EXTRACTS FROM SAUDI ARABIAN GOVERNMENT REGULATIONS:

Saudi Arabian Government Regulations are strictly enforced and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. At all times while in the Port of Ras Tanura whether at anchor, at the berth in any teminal or in transit between terminals, the vessel and its personnel are under the jurisdiction of Saudi Arabian laws.

QUARANTINE SIGNALS: Quarantine signals shall be displayed by all vessels approaching the Port of Ras Tanura in accordance with International practice. These signals shall be displayed continuously until Pratique is granted.

Sunrise to Sunset – Quarantine flag (Q)
Sunset to Sunrise – Red over White signal lights.

SAUDI ARABIAN FLAG: The flag of The Kingdom of Saudi Arabia shall be flown from the foremast of the vessel by day and by night while in the Port of Ras Tanura. The flag shall be clean and in good condition. Masters should obtain this flag before arrival but if circumstances render this impossible a flag must be obtained from the ship's Agent. Vessels not correctly flying the flag of Saudi Arabia will not be berthed. The flag is properly displayed when the Arabic writing appears on the top and the sword on the bottom.

PROHIBITED ARTICLES: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The import of certain articles is strictly prohibited and such articles include but are not limited to the following:

Explosives and firearms including air rifles.
Implements of war of any kind including antique weapons.
Religious matter not pertaining to the Moslem faith.
Playing cards and gambling devices.
Narcotics.
Printed, photographic matter or video tapes depicting what could be considered pornographic.
Alcoholic beverages of any description.

Any of the above items on board any vessel calling at the Port of Ras Tanura shall be secured in appropriate locked storerooms which will be sealed by the Authorities who may carry out inspections to ensure that the seals are intact and that none of the above articles are in use. The seals must remain intact during the entire period of the vessel's stay in the Port of Ras Tanura and must not be broken until after the vessel has finally departed for a port in another country.

Trafficking in any of the above articles between vessels or between vessel's crew and shore personnel is strictly prohibited.

The baggage of crews joining and leaving vessels will be inspected to ensure that it contains none of the prohibited articles.

PHOTOGRAPHY: The use of photographic equipment of any kind is strictly prohibited within the Port of Ras Tanura. Cameras are liable to seizure by the Authorities.

SHORE LEAVE: Vessel's personnel are not permitted ashore nor on the wharves for ANY PURPOSE WHATSOEVER (this includes reading the vessel's draft) until pratique is granted and then only if actually engaged in operational duties. No visiting between vessels at berths is permitted. Shore leave is not normally granted and ship's Agents must be consulted for advice.

PENALTIES: Penalties for violations of Saudi Arabian Government Regulations are severe and considerable fines and/or delays to vessels may be incurred.

SAFETY REGULATIONS: RESPONSIBILITY FOR SAFETY: The vessel's Master and crew shall be responsible at all times for the safety of the vessel and shall make provision to exercise all necessary precautions.

Aramco Terminal personnel are authorised to suspend oil handling operations in the event that any of the Safety Regulations are violated or if any other hazardous situation is observed.

SAFETY REQUIREMENTS:

Notes:

(a) All of these requirements shall be complied with at all times that a vessel is berthed at any ARAMCO facility.

(b) Requirement number 14 is to be complied with at other times as stated.

(c) The title of each requirement is numbered to correspond with the questions in the Safety Check List.

(d) Guidance on methods of complying with these requirements is contained in the ICS/OCIMF publication "International Safety Guide for Oil Tankers and Terminals"

1. *Moorings:* Moorings shall be frequently monitored and carefully tended to maintain the vessel in position and alongside at all times. (See "MOORINGS REGULATIONS").

Anchors shall be effectively secured in the hawse pipe to prevent letting go accidentally.

2. *Emergency Towing:* Towing off wires shall be made fast to bitts as far forward and aft as practicable on the side of the vessel opposite to the cargo connections. The wires shall be in good condition of not less than 3.5 in. in circumference (28 mm. diameter) and secured with a minimum of 5 turns on the bitts.

The wire shall lead directly to the chock with no slack on deck and a heaving line made fast to the eye shall be used to maintain the eye of the wire between 3 ft. and 6 ft. (1 m. and 2 m.) above the water at all times.

3. *Ship/Shore Access:* Personnel shall use only the designated access. Gangways shall be carefully tended at all times and safely illuminated at night.

4. *Readiness To Move:* The vessel's boilers, main engines, steering machinery and other equipment essential for manoeuvring shall be maintained so as to enable the vessel to be unberthed under full engine power at short notice.

A suitable trim shall be maintained for the same reason.

5. *Deck Watch:* A responsible Ship's Officer and sufficient crew shall be on watch to attend to the safe operation of the vessel.

A member of the crew shall be continuously on watch on the loading deck in view of the manifold and access to the vessel.

6. *Ship/Shore Communications:*

(a) A reliable communication system shall be established and tested for control of the cargo handling operation. This shall consist of suitable UHF/VHF radios, telephone or direct voice communication.

(b) The responsible Ship's Officer and the shore operator shall confirm with each other that the communications system and signals for controlling the operations are understood by them and by other personnel on duty at the start of operations and at each change of watch or shift.

(c) A responsible member of the vessel's crew with adequate command of the English language shall man the agreed communication medium.

7. *Operating Procedures:* The procedures for cargo, bunker and ballast operations shall be agreed in writing by the responsible Ship's Officer and the Terminal Representative.

8. *Emergency Shutdown:* Whenever an emergency situation develops aboard the vessel which may require that the cargo loading operation be suspended the vessel's tank/manifold valves shall not be closed against the flow rate under any circumstances until the berth operator has been advised. In order to prevent pressure surges in the loading system the period of valve closure shall be not less than 30 seconds and to prevent accidental closure of power operated butterfly valves they shall be locked or otherwise secured in the open position.

9. *Fire Fighting Equipment:* Fire fighting and emergency equipment shall be kept in readiness at all times.

Vessel's fire hoses fitted with combination jet/spray nozzles shall be connected to the fire main and laid out on deck forward and abaft the loading manifold.

If practicable, a pump shall maintain pressure on the fire main otherwise the fire pump shall be on standby ready for immediate use.

Monitors shall be ready for use and portable fire extinguishers preferably of the dry powder type shall be available in the proximity of the manifold area.

10. *Loading Connections:*

(a) The Master shall ensure that cargo and bunker hoses or arms are visually inspected and in good condition.

(b) The Master shall ensure that the loading connection is made to his satisfaction.

(c) Adequate safe fixed lighting arrangements shall be provided at the manifold at night to ensure a safe working area for personnel engaged in making the connection and to detect any leakage or spillage of cargo.

(d) Cargo hoses and arms at Aramco loading facilities are fitted with insulating flanges or joints. Ship/shore bonding cables shall *NOT* be used.

11. *Cargo Spillage and Leakage:*

(a) All deck scuppers shall be effectively plugged and cemented necessary to prevent spilled oil from escaping overside.

(b) Accumulations of water shall be periodically drained and the scuppers secured immediately after the water has been drained. A crew member shall be in attendance during this operation.

(c) All cargo pipe-line and pumproom valves when not in use shall be closed.

(d) Adequate drip trays shall be provided at the loading connections.

(e) Loading rates shall be regulated to avoid oil being drawn into the gas venting system.

(f) If leakage occurs from a pipe-line, valve, hose or arm, or any connection, operations through that system shall be suspended until the cause has been ascertained and the defect remedied. If a pipe-line, hose or arm ruptures or if there is an overflow, all cargo and bunker operations shall be stopped immediately and shall not be restarted until the fault has been rectified and all hazard from the released oil or product eliminated.

(g) In the event of any spillage of cargo on deck or overside, the Representative of the Terminal Superintendent shall be notified immediately.

12. *Unused Cargo and Bunker Connections:*

(a) All unused cargo and bunker connections shall be properly blanked, fitted with a gasket and bolted with one full-size bolt in every hole.

(b) The stern discharge line if fitted shall be isolated forward of the after accommodation by blanking with a spectacle piece or by removal of a spool piece.

(c) Unused inert gas system connections to machinery spaces shall be properly sealed to prevent entry of cargo or vapour.

(d) Any part of a crude oil washing or slop transfer system which extends into machinery spaces shall be securely blanked and isolated on the tank deck.

13. *Sea Valves:*

At the start of and at regular intervals throughout deballasting and loading, a deck watch shall be maintained to ensure that oil is not escaping through sea and overboard discharge valves (Also see "Pollution Regulations").

When not in use, sea and overboard discharge valves connected to the cargo or ballast systems shall be closed and lashed. When lashing is not practicable as with hydraulic valves, a suitable means of locking shall be used to indicate that the valves are to remain closed. (For further guidance refer to the ICS/OCIMF publication "Prevention of Oil Spillage through Cargo Pumproom Sea Valves").

14. *Tank Lids:*

(a) All cargo tank lids ullage and sighting ports shall be securely closed **before berthing or unberthing operations commence.** To maintain watertight integrity **when manoeuvring in the loaded condition** all cargo, ballast and bunker tanks, cofferdams and pumproom entrances shall be securely closed.

(b) During cargo handling operations all cargo, ballast and bunker tank lids and tank washing openings shall be securely closed.

15. *Tank Venting:*

(a) All vessels shall ensure that vapour displaced by cargo shall be vented in accordance with the written agreement with the Terminal Representative.

(b) All vessels fitted with an Inert Gas System shall ensure that the oxygen content throughout the atmosphere of cargo tanks has been reduced to 8 per cent or less by volume.

(c) Flame arrestors will be employed in accordance with the design features of the venting system.

(d) The loading rate shall be controlled to prevent excess pressure in the cargo tanks.

(e) If ullage ports are required to be open for operational purposes the opening shall be protected by efficient flame arrestors. Ullage ports shall not be left partly covered but shall be fully open in such a way that vapour may leave the tank in the form of a vertical unimpeded jet.

(f) In vessels not fitted with automatic ullaging devices ullage ports may be opened intermittently for short periods for the purpose of ullaging or sighting only.

16. *Hand Torches and Battery Powered Equipment:*

(a) Battery operated flashlights shall be in good condition and of a type certified to be safe for use in hazardous locations.

(b) Portable domestic radios, photographic flash equipment (see "Prohibition of Photography"), portable electronic calculators, recorders and other battery-powered equipment of non-approved type shall not be used on deck or in any place where petroleum vapour may be encountered.

17. *Portable Radio Transceivers:* Portable VHF/UHF transceivers shall be of an intrinsically safe type which is approved by a competent authority. When used this equipment shall be in good condition.

18. *Radio and Radar Transmitters:*

(a) Main radio equipment shall not be used and main transmitting aerials shall be disconnected and grounded.

(b) Radar scanners shall be switched off.

(c) The servicing of radio and radar equipment shall not be permitted without written agreement of the Terminal Representative.

19. *Electrical Equipment:*

(a) The use of portable electrical equipment on flexible leads is prohibited on the tank deck. The supply cables for such equipment shall be disconnected and removed from the tank deck.

(b) All electrical installations on board vessels shall be in good condition. Modifications which have not been approved by an appropriate authority shall not be accepted.

20. *Amidships Accommodation:* All doors, ports and windows in amidships accommodation shall be closed and every effort shall be made to prevent entry of petroleum vapour into this accommodation.

21. *Aft Accommodation:*
  - (a) All doors, ports and openings in the after accommodation (other than pumproom) which lead directly to the loading deck or which overlook the loading deck at any level shall be kept tightly closed.
  - (b) Doors that are required to be closed shall be clearly marked but under no circumstances shall they be locked.
  - (c) Machinery space openings by means of which petroleum vapour may enter shall be closed.
  - (d) Consideration shall be given to the suspension of cargo operations when weather conditions support the entry of petroleum vapour into spaces which cannot be closed.

22. *Air Conditioning Intakes:*
  - (a) Central air conditioning or mechanical ventilation systems shall be adjusted to prevent intake of petroleum vapour if possible by recirculation of air within enclosed spaces so that a vacuum is not created.
  - (b) Any intake within the range of possible petroleum vapour release shall be closed.
  - (c) If at any time it is suspected that petroleum vapour is being drawn into the accommodation, central air conditioning and mechanical ventilating systems shall be stopped and intakes closed or covered.

23. *Window Type Air Conditioning Units:*

Window type air conditioning units shall be disconnected fronm the power supply.

24. *Smoking:*

Smoking shall only be allowed in places in the after accommodation which have been jointly approved in writing by the Master and the Terminal Representative and suitable notices shall be posted at the entrance to designated smoking rooms.

No place will be considered suitable for smoking unless:
  - (a) It is in enclosed accommodation abaft the cargo tanks.
  - (b) It has no doors which open directly onto the outside deck.
  - (c) It has no doors or ports which open directly onto or over the cargo deck or onto decks overlooking cargo spaces.
  - (d) All ports are kept closed and doors into passageways are kept closed except when in use.

25. *Galley Stoves and Cooking Appliances:*
  - (a) Galleys which use only steam or immersed electric heaters shall be considered suitable for use.
  - (b) The use of galley stoves and cooking appliances with non-immersed elements such as electric hot plates and toasters may be permitted in galleys and properly designated pantries with the written agreement of the Terminal Representative.
  - (c) Approved galleys and pantries shall be situated in the after accommodation and shall have no doors or ports which open directly onto the cargo deck.
  - (d) All galley and pantry doors and ports shall be kept closed.
  - (e) Ventilator trunkings and filters of extractor fans in galleys shall be kept clean and free from accumulated oil and fat.

26. *Naked Lights:*

Open flames or fires, exposed incandescent material and any other unconfined sources of ignition are prohibited on deck and in other places where there is a risk that petroleum vapour may be present.

27. *Emergency Escape:*

Means for emergency escapes shall be provided on the side of the vessel opposite to the loading connections. For security reasons such means is to be stowed at deck level in such a manner as to be ready for expeditious use in an emergency. Such means shall be of adequate length to reach the water at all times.

VOLATILE AND NON-VOLATILE PETROLEUM:

Due to the variety of petroleum products available for loading at ARAMCO facilities in the Port of Ras Tanura, all vessels arriving to load crude oil or any petroleum product whether volatile or non-volatile at any berth shall be required to observe the Safety Regulations.

PRECAUTIONS AGAINST STATIC IGNITION: Tanks not properly inerted (see "Safety Requirement") prior to loading static accumulator oils (kerosene, kerosene type jet fuel, white diesel and under certain conditions heavy naphtha and gasoline type jet fuels) shall be gas free within 40% of the lower flammable limit. The following restrictions shall also apply to vessels loading static accumulator oils:
  - (a) Tanks and pipe-lines shall be free of water.
  - (b) Loading overall (splash filling) shall not be permitted.
  - (c) No conducting equipment (ullage tapes, sample cans, thermometers) shall be introduced into a cargo tank until 30 minutes have elapsed after loading has been stopped to that tank.
  - (d) No loose floating objects shall be present in tanks to be loaded.
  - (e) Initial loading rates shall not exceed 1,000 bbls.p.h. per tank. Above soundings of 20 ft. loading rates of up to 1,500 bbls.p.h. shall be permitted.
  - (f) Properly bonded and grounded automatic ullaging equipment may be used at any time.

Vessels with tanks which are properly inerted (see "Safety Requirement") shall not be required to comply with the specific requirements for loading static accumulator oils. However, normal safety precautions shall be observed.

HYDROGEN SULPHIDE HAZARDS: ARAMCO crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which may be hazardous. It is recommended that Owner's instructions and the ISGOTT recommendations in respect of H_2S hazards are reviewed.

EMERGENCY SIGNAL: In the event of a fire or other emergency, the vessel shall sound a series of 10 short blasts on the ship's whistle.

GAS FREEING: No gas freeing or tank washing shall be carried out at berth.

BOILER TUBE CLEANING: Funnel uptakes and boiler tubes shall not be cleaned while the vessel is at berth. Every precaution shall be taken to ensure that sparks do not escape from the funnel.

REPAIRS: Repairs or maintenance of any kind which may produce a source of ignition shall not be undertaken without the agreement in writing of the Terminal Representative.

PENALTIES: Disregard of or failure to fully comply with any of the Safety Regulations or any safety regulations generally accepted and practised in the marine transport industry will result in the suspension of all operations and the vessel may be required to leave the berth.

Vessels presented for loading with deficient equipment or machinery whether by design or by lack of maintenance will not be berthed. If such deficiency becomes apparent after berthing the vessel will be removed from the berth.

Safety violations due to negligence on the part of the vessel's personnel will result in the suspension of loading operations for investigation and correction. Repeated violations may result in a vessel being removed from the berth.

Removal from the berth as a result of safety violations or deficiencies will be at vessel's expense and ARAMCO will not accept responsibility for any resulting delay to the vessel.

Vessels with unacceptable safety performances will not be permitted to berth at ARAMCO facilities on future visits.

POLLUTION REGULATIONS: Vessels using the Port of Ras Tanura shall exercise every precaution to prevent the pollution of the sea by oil.

1. A crew member shall be stationed on deck to sight the overboard discharge during deballasting operations to ensure that no oil or oil-based products escape into the sea.
   Particular vigilance shall be exercised at any time that a change of operation takes place, e.g. starting of stripping pumps or eductors, change of tanks, commencement of loading, etc.
2. At sea island type berths, all ballast shall be discharged from the side of the ship nearest the berth.
   At pier berths, all ballast shall be discharged from the offshore side of the ship.
   At night, the discharge and the sea area in its vicinity shall be adequately illuminated.
3. No domestic or other rubbish shall be dumped into the sea.
4. In the event of an oil spill the Master shall notify the Terminal Representative on duty.
5. Excessive smoke from the funnels or exhaust gas lines of vessels is prohibited.

PILOTAGE REGULATIONS:

BOARDING ARRANGEMENTS: In order to permit the harbour Pilot to safely embark and disembark from a vessel a pilot ladder shall be provided in accordance with the following requirements:

1. The ladder shall be kept clean and in good order and shall be of adequate length and strength.
2. The vertical distance between the steps must not exceed 15 in. The outboard edge of the step shall project from 5 to 6 in. from the hull. Ladders shall be so constructed that the steps will remain flat at right angles to the hull while supporting the weight of a person.
3. Spreaders at suitable intervals shall be provided to prevent the ladder from twisting and the ladder shall be properly secured with the steps level.
4. The deck in the vicinity of the ladder shall be clean and free of oil and grease or other slippery substances.
5. When possible, on vessels so equipped, the pilot ladder shall be made fast next to an area where there is a break in the rail or an opening in the bulwark. Otherwise, suitable arrangements for safe access to the deck from the top of the pilot ladder shall be provided.
6. The boarding position should be as near amidships as possible so that the whole length of the ladder rests against the flat ship's side, clear of all possible discharges from the ship.
7. Adequate lighting shall be provided at night so that the pilot ladder and the deck area close by the head of the ladder shall be adequately and properly illuminated.
8. Manropes, a safety line and lifebuoy with self igniting light should be rigged ready for use if required.
9. The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible deck officer of the vessel.
10. The vessel's propeller shall be stopped during the approach of the pilot boat and the embarking of the Pilot.
11. Whenever the distance from the water to the deck of the vessel exceeds 30 ft. (approximately 9 m.) the pilot ladder shall be rigged in combination with the accommodation ladder.
12. In any small vessel in which the bulwark rails are below the level of the deck of the pilot boat (approximately 6 ft. or 2 m.) a safe boarding position on each side of the forward end of the poop shall be provided and equipped with manropes.
13. Pilot hoists of the double drum, double-wire type are permitted after inspection and approval by Ras Tanura Pilots.

Failure to provide a safe method of boarding for the Pilot will result in the vessel being ordered to anchor until the fault is rectified.

CONDITIONS OF USE OF PILOTS:

1. ARAMCO Harbour Pilots will berth and unberth all vessels at all Terminals. The manoeuvring of all vessels in the vicinity of or at the berths will be under the advice of an ARAMCO Harbour Pilot.
2. Vessels will not be berthed if they are not equipped with satisfactory mooring equipment, lines, gear, etc., or if they are not sufficiently ballasted. It is the responsibility of the Master to notify the Harbour Pilot of any special conditions, difficulties or pecularities such as engine or boiler deficiencies, defective navigational equipment, mooring lines, tackle, gear or lack of necessary equipment which may impose hazards in connection with the handling, mooring, unmooring, loading or discharging of the vessel. The Master provides this information to the Harbour Pilot before the Harbour Pilot begins to provide pilotage services.
3. If the Master fails to give full and correct information as required in condition No. 2 the vessel will be removed from the berth and shall be liable for the berthing and unberthing costs.

4. The services of the Harbour Pilots are provided without charge and upon the express understanding that while participating in directing the navigation or movement of the vessel and/or its assisting tugs from on board the vessel or elsewhere, the Harbour Pilots become the agents and servants of the Vessel Owner and Master for all purposes and every respect. ARAMCO and its agents, servants, contractors, employees and representatives shall not be liable or responsible for any loss of or damage to or expense incurred in connection with the vessel, its crew and/or cargo or for any loss, damage or injury to third parties caused by or arising out of or resulting from the performance of pilotage services by the Harbour Pilots. The Vessel Owner and Master agree to indemnify ARAMCO and its agents, servants, contractors, employees and representative and to hold them harmless against all claims for any loss of or damage to or expense incurred in connection with the vessel, its crew and/or its cargo and against all claims for any loss, damage or expense suffered or paid out by or on behalf of third parties howsoever caused, arising out of or resulting from the performance of services by the Harbour Pilots.
5. Damage or injury to or impairment of the use of any ARAMCO facility equipment or personnel by any vessel using any loading terminal of the Port of Ras Tanura shall be the responsibility and liability of the Master, Owners and/or Charterers of the vessel.

TUGS AND HARBOUR CRAFT:

USE BY PILOTS: Under normal operating conditions, no tug or other craft shall be permitted alongside any vessel before the Harbour Pilot boards the vessel. Should the Harbour Pilot deem the assistance of a tug to be necessary, he will then give the proper signal.

Vessel's personnel shall not signal for tugs or harbour craft to come alongside except as directed to do so by the Pilot.

CONDITIONS OF USE: Tugs and towing services for assisting the vessel in arrivng at and departing from in berthing and unberthing at ARAMCO facilities are provided without charge and upon the express understanding that such services are performed at the sole risk of the vessel receiving such services, its Owner/Master and its cargo, if any, including the risk of negligence of the tug or tugs and their Masters, Pilots, officers or crews, and of ARAMCO and its Agents, servants, contractors, employees and representatives, all of whom shall, in the performance of such services as they render to the vessel, become and be the Agents and servants of the vessel receiving such towage services and its Owner/Master. ARAMCO and its Agents, servants, contractors, employees and representatives shall not be liable or responsible for any loss of or damage to or expense incurred in connection with the vessel and/or its cargo caused by, arising out of or resulting from the provision of towage services to the vessel by a tug or tugs owned, chartered or employed by ARAMCO. The vessel receiving such towage services and its Owner agree to indemnify ARAMCO and the tugs and their owners, charterers, operators and/or underwriters and to hold such parties and craft harmless against all claims for any loss of or damage to or expense incurred in connection with the vessel, its crew and/or its cargo, and against all claims for any loss, damage or expense suffered or paid out by or on behalf of third parties as a result of or in connection with ARAMCO's provision of tugs and towing services.

REMOVAL OF WRECKS AND OBSTRUCTIONS: If any vessel founders or otherwise becomes in the opinion of the Company, an obstruction or danger to navigation in the Port of Ras Tanura and its Owner or his Agent fails to remove the obstruction or danger so caused within the period of written notice served by the Port Captain, or immediately in an emergency, the Company may, for the purpose of safeguarding the Port, take action to remove the obstruction or danger.

The Owner of any vessel at the time of its becoming an obstruction or danger to navigation in the Port of Ras Tanura shall be liable for the expense incurred in removing the obstruction or danger to navigation.

TRAFFIC REGULATIONS: The following regulations apply to all vessels entering or leaving the Port of Ras Tanura or Dammam by way of the Ras Tanura Channel.

The separation zones and routes shown on the charts of the Ras Tanura Channel are approved by IMO. Violators of the routeing recommendations will be reported to their Owners/Operators/-Agents/Charterers.

1. All vessels shall monitor VHF radio Channel 10 when under way in the Ras Tanura Channel and its vicinity and in the anchorage areas of Ras Tanura Terminal.
2. All vessels using the inbound or outbound channels shall have an underkeel clearance of at least 5 ft. (1.52 m.).
3. Under no circumstances shall inbound vessels navigate in the departure channel nor shall outbound vessels navigate in the arrival channel.
4. Inbound vessels shall:
   (a) report to Ras Tanura Port Radar on VHF Channel 10 when passing Beacon No. 3 and Buoy No. 7.
   (b) not exceed a speed of 5 knots after passing Buoy No. 9.
   (c) not overtake and shall mantain a distance of one mile from vessels proceeding in the same direction after passing Buoy No. 9.
   (d) navigate with extreme caution and give way to vessels departing from the berths and anchorages.
5. Outbound vessels:
   (a) departing from Ras Tanura Anchorage shall advise Ras Tanura Port Radar on VHF Channel 10 of their intentions 30 minutes before weighing anchor.
   (b) shall not overtake and shall maintain a distance of at least one mile from vessels proceeding in the same direction until both vessels have passed clear of Buoy No. 5.
6. Vessels manoeuvring in the area between the South extremity of the Tanker Anchorage and the entrance to the Departure Channel (Buoys 17 and 18) shall limit speed to a maximum of 5 knots.
7. Vessels bound to and from the Port of Dammam shall keep to the Eastern part of the Tanker Anchorage and avoid the manoeuvring area from the anchorage to the sea islands and piers. Outbound vessels from Dammam shall, when passing Dammam Channel Buoy No. D 37, alert Ras Tanura Port Radar of their ETA at the Southern extremity of the Tanker Anchorage.

MOORING REGULATIONS:

GENERAL: The use of nylon or other highly elastic mooring ropes is discouraged.

If a vessel with synthetic mooring ropes is alongside when squall conditions arise, loading to that vessel shall be stopped and loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation.

Vessels shall be moored to the entire satisfaction of the Harbour Pilot and shall be ready at all times to put out more lines as required by terminal personnel and as may be dictated by weather conditions.

All vessels at berth shall have all deck winches in readiness for immediate use.

All vessels with tension winches shall set the manual brakes on these winches.

MIXED MOORINGS: Vessels equipped with both wire and synthetic lines shall avoid mixing moorings to the same bollard or dolphin.

WIRE MOORINGS: In order to ensure the safety of personnel, vessels and loading facilities and to prevent accidental oil spillages, the following requirements (used as springs and breast lines) are mandatory for all vessels permitted to use the ARAMCO fixed berth loading facilities.

Vessel Size	*Required*	*Recommended*
75–160 m.d.w.t.	8 wires	12 wires
161–250 m.d.w.t.	10 wires	12 wires
251–300 m.d.w.t.	12 wires	14 wires
301–350 m.d.w.t.	12 wires	16 wires
351 m.d.w.t. and above	14 wires	16 wires

The wire size, winch power and winch braking power shall in all cases be adequate for the size of the vessel. All lines shall be properly reeled onto winch drums and the winch brakes shall be set to hold to a minimum load of 60% of the minimum breaking load of the line.

After obtaining the permission of the Port Captain, vessels may use mooring lines other than wire, constructed of a substitute material provided that the elongation of the substitute material does not exceed 3% at 55% breaking load. Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

Additional information is contained in the O.C.I.M.F. publication "Guide Lines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands".

All vessels shall utilise all of the wire mooring lines with which they are equipped unless the number exceeds that recommended above.

APPENDICES:

INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF PORT **RAS TANURA,** SAUDI ARABIA

Date: .... Time .... G.M.T.

THE MASTER S/S — M/V

Please have your vessel ready for berthing by ARAMCO Harbour Pilot at .... hours Greenwich Mean Time ....(Date).

1. Vessel will be moored to Berth No. .... North/South Pier/Sea Island Port/Starboard side to the Wharf as shown on attached diagram.
2. The berth is presently occupied/unoccupied.
3. If a delay occurs, please maintain an alert watch and keep vessel in readiness to move as quickly as Pilot comes aboard.
4. Local Time is GMT plus .... hours.
5. Low Water will be at approximately .... hours GMT and will be approximately .... feet above I.S.L.W. as indicated in U.S. Coast and Geodetic Tide Tables.
6. To avoid delay, please maintain minimum ballast for safe manoeuvring in prevailing weather.
7. Ballast water being discharged while in port MUST BE FREE OF OIL.
8. Immediately following completion of berthing and granting of Pratique, an ARAMCO inspector will board your vessel with Form ARAMCO 3032-1. Declaration by Master and physically inspect the vessel for conformity to safety requirements and check of certain items required.

MOORING AND MANOEUVRING

1. Full Power must be available for manoeuvring to and from wharves.
2. An ARAMCO Pilot will pilot vessel to berth assigned.
3. All manoeuvring in vicinity of, or at piers, will be under supervision of an ARAMCO Pilot.
4. ARAMCO tugs will assist in mooring and unmooring.
5. All tank tops, ullage plugs and sighting ports will be closed before berthing.
6. Vessel's Master must notify the Pilot of any special conditions difficulties or peculiarities such as defective equipment, lines or gear which might impose special hazards in connection with handling mooring or loading of vessels.
7. Steering gear, engine room telegraph, whistle and all navigational equipment must be tested before any manoeuvring to or from piers is started.
8. Pilot will decline to moor vessel with unsatisfactory equipment lines, gear, etc.
9. ARAMCO will loan additional mooring lines if Pilot deems them necessary.
10. Vessels must be moored tc entire satisfaction of Pilot.

11. Vessels must be ready to put out more lines as required by weather changes or at request of Pilot or oil loading personnel.
12. Winches must be ready at all times for immediate use.
13. Except in emergency, no mooring lines will be let go without permission of the Pilot.
14. While alongside wharves, maintain engines and propulsive machinery ready at all times to leave wharf on short notice under full power.
15. No repairs are permitted that will delay or interfere with this manoeuvring.
16. Non-compliance with 13 and 14 constitutes a serious safety hazard. Any towage and delay resulting from non-compliance will be for vessel's account.
17. If fire or other grave emergency occurs or danger appears imminent on either the vessel or pier, do not await arrival of Pilot – immediately let go mooring lines and personally remove vessels from pier in such manner as to best avoid damage to pier or other vessels.
18. Upon completion of loading and/or bunkering and immediately after disconnection of hoses, vessel must leave berth and await clearance in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ras Tanura, in accordance with international practice, and shall be continuously displayed until Pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available for loan and may be obtained from the vessel's Agent.
3. Importation of liquor or contraband items, or trafficking in such items between vessels, is absolutely prohibited.
4. Ship's personnel are *NOT* permitted ashore nor on the wharves *FOR ANY PURPOSE WHATSOEVER* (this includes the reading of the ship's draft) until Pratique is granted and then are allowed on the wharves only if actually engaged in duties in connection with operations of discharging ballast or loading.
5. All shore leave is contingent upon compliance with Saudi Arabian Quarantine and Passport Regulations. For current details concerning these regulations and shore leave restrictions, ship's agents must be consulted. Failure to comply with 4 and 5 may result in severe penalties.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and the proper operation of the vessel at all times. Neither ARAMCO nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect of the vessel.
2. The use of ARAMCO premises, facilities and equipment is subject to the express understanding and condition that ARAMCO and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. All vessels transiting the "DEEP WATER DEPARTURE CHANNEL" must maintain a minimum five (5) feet keel clearance.
4. The Harbour Pilot is supplied upon the condition that when boarding or assisting the vessel he becomes the agent and servant of the owners and/or charterers of the vessel in every respect. ARAMCO shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Harbour Pilot or in respect to his handling of such vessel.
5. When the assistance of tugs is provided, the Master and Crews of the tugs shall, in the performance of such services as they render to the vessel, become and be deemed to be agents and servants of the owners and/or charterers of the vessel assisted, and ARAMCO shall not be responsible and shall be held harmless from all liability for any damage that may be done by the tugs of their crews while assisting the vessel, whether occasioned by any act or mission of the tug Master or Crew or by any defect or inadequacy of the tug, its machinery or gear.
6. Pilots will not moor any vessel to ARAMCO wharves unless they have the Master's signature on acknowledgement below.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instructions and conditions set forth therein.

HOUR VESSEL

SHIP/SHORE SAFETY CHECK LIST

VESSEL:...
BERTH:..
....

Instructions for completion:

The safety of operations requires that all questions should be answered affirmatively after checking by both ship and terminal representatives. If an affirmative answer is not possible, the reason should be given and agreement reached upon appropriate precautions between the ship and the terminal.

Questions	Yes/No	Remarks
1. Is the ship securely moored and anchors secured?		
2. Are emergency towing wires correctly positioned?		
3. Is there safe access between ship and shore?		
4. Is the ship ready to move under its own power?		
5. Is there an effective deck watch in attendance on board?		
6. Is the agreed ship/shore communication system operative?		
7. Have the procedures for cargo, bunker and ballast handling been agreed?		
8. Has the emergency shut down procedure been agreed?		
9. Are fire hoses and fire fighting equipment ready for immediate use?		
10. Are cargo and bunker hoses and/or arms in good condition and properly rigged?		
11. Are scuppers effectively plugged, and drip trays in position?		
12. Are unused cargo and bunker connections, including the stern discharge line, if fitted, blanked?		
13. Are sea and overboard discharge valves, when not in use, closed and lashed?		
14. Are all cargo and bunker tank lids closed?		
15. Is the agreed tank venting system being used?		
16. Are hand torches of an approved type?		
17. Are portable VHF/UHF transceivers of an approved type?		
18. Are the ship's main radio transmitter aerials earthed?		
19. Are electric cables to portable electrical equipment disconnected from power?		
20. Are all external doors and ports in the amidships accommodation closed?		
21. Are all doors and ports in the after accommodation leading onto or overlooking the tank deck closed?		
22. Are air conditioning intakes which may permit the entry of petroleum gas closed?		
23. Are window-type air conditioning units disconnected?		
24. Are smoking requirements being observed?		
25. Are the requirements for the use of galley and other cooking appliances being observed?		
26. Are naked light requirements being observed?		
27. Is there provision for emergency escape?		

Declaration

We have checked with each other the items listed on this check list in the course of a joint inspection, and have satisfied ourselves that the entries we have made are correct to the best of our knowledge.

INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF **JU'AYMAH** LOADING FACILITIES

THE MASTER S/S — M/V

1. Vessel will be moored at Ju'aymah Berth No.
2. Discharge into sea of oil base products in combination with ballast water is not allowed. Ships which release oil or oily ballast water in either the berth or anchorage area will be held responsible for all clean-up costs.
3. Prior to loading, the Pilot/Mooring Master will inspect the vessel for conformity with safety requirements and will review in detail each item on ARAMCO Form 5626 "Declaration by Master". This form will be acknowledged and signed by the Master.

MOORING AND MANOEUVRING

1. Full power must be available for manoeuvring in and out of the berth. Manoeuvers with other than full power available shall be performed only after the consent of both the Port Captain and Pilot/Mooring Master have been obtained.
2. The Pilot/Mooring Master will advise the Master during the mooring and unmooring of the tanker and will supervise the connecting and disconnecting of cargo and bunker hoses by the tanker's crew. The loading operation will be performed to the complete satisfaction of the Pilot/Mooring Master.
3. Mooring will be accomplished with the assistance of marine craft assigned to the vessel by ARAMCO.
4. All tank tops, ullage plugs and sighting ports shall be closed before berthing.

5. The vessel's Master shall notify the Mooring Master of any special conditions, difficulties, defective equipment or gear which could impose special hazards when mooring, unmooring or loading cargo.
6. All navigational equipment such as the engine, telegraph, whistle, steering gear, etc., shall be tested prior to getting underway to moor and unmoor. Testing of the tanker's engine when berthed shall be done only after the Pilot/Master has been duly informed and his consent has been obtained.
7. The Mooring Master may decline to moor a vessel with unsatisfactory mooring equipment.
8. No repairs are permitted while the vessel is berthed. The engine and deck machinery will be kept ready to permit the vessel to get underway on an emergency basis.
9. Any vessel delay resulting from failure to comply with any of the provisions of this document shall be for the vessel's account.
10. Upon completion of loading and the disconnection of hoses, the vessel will be unmoored and, if using Early Departure Procedures, the Master should make ready to depart as soon as possible. Otherwise, vessels are to await cargo and port clearance documents while lying in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ju'aymah in accordance with international practice and shall be continuously displayed until Pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available from the ship's agent. The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.
3. Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation considerable delay to the vessel involved could occur.
4. Ship's personnel are not permitted to leave their vessel.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and proper operation of the vessel at all times. Neither ARAMCO nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect to the vessel.
2. The use of ARAMCO premises, facilities and equipment is subject to the express understanding and condition that ARAMCO and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. The Pilot/Mooring Master is supplied upon the condition that when boarding or assisting the vessel he becomes the agent and the servant of the owners and/or charterers of the vessel in every respect. ARAMCO shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Pilot/Mooring Master or in respect to his handling of the mooring or cargo loading operations.
4. When the assistance of small craft is supplied (mooring launches and/or a utility boat), the craft, Master and Crew thereof shall, in the performance of such services as they render to the vessel, become and be deemed to be the agents and servants of the owners and/or charterers of the vessel assisted. ARAMCO shall not be responsible and shall be held harmless from all liability for any damage that may be done by or to the craft or their crews while assisting the vessel, whether occasioned by any act or omission of the crafts or their crews or by any defect or inadequacy of the craft or the craft's machinery or gear. This shall not give the tanker's Master the right to detain such craft for duties other than mooring, unmooring or hose work nor shall this prevent the craft from being reassigned during mooring, unmooring or hose work.
5. No vessel may berth without an ARAMCO Pilot/Mooring Master on board.
6. Pilots/Mooring Masters will not assist in the mooring of any vessel unless they have the Master's signature on the acknowledgement below.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instruction and conditions set forth therein.

(C) RAS TANURA TERMINAL

This section gives specific information regarding RAS TANURA TERMINAL which includes Sea Island, North and South Piers and is to be read together with **Part (A).**

LOCATION: The Ras Tanura terminal, refinery and tank farms are located on a peninsula, the Southern end of which forms a sand spit, the tip of which is officially known as (RA'S) AT TANNURAH.

At this Southern tip, a survey reference point is located and marked by a beacon, the exact position of which is: Lat. 26° 37′ 25″ N., Long. 50° 09′ 50″ E.

Terminal South Tank Farm, the LPG plant and the piers are located on the sand spit.

Terminal North Tank Farm, which feeds crude to the Northern end of the Sea Island is located approximately 4 miles N.N.W. of Terminal South Tank Farm and the Refinery is a further 2 miles N.W. of Terminal North Tank Farm.

South Pier: The South Pier is connected to the East side of the peninsula by a causeway and trestle 2,300 ft. in length. The "T" Pier has 4 berths (1 to 4) and is 1,200 ft. long and 105 ft. wide.

North Pier: The North Pier is located about 0.75 miles to the North of the South Pier and has a causeway and trestle that extends some 3,600 ft. from the peninsula. The Port Control Centre and Port Radar Station surmounted by a helicopter landing platform are located on the North side of the trestle on the landward side of the berths. This Pier is 2,645 ft. long and 110 ft. wide and comprises 6 berths (6 to 11). Crude oil, products and RLPG are available at North Pier.

Sea Islands: A complex of 4 Sea Islands interconnected by walkways is located approximately 5,600 ft. N.E. of the North Pier. Each of the 4 sea islands consists of 2 berths with a loading station on the platform, 4 to 6 mooring dolphins and 2 to 4 breasting dolphins per berth. The lengths of each pair of berths between outer mooring dolphins are (from South) Sea Island 1, 1,250 ft., Sea Islands 2 and 3, 1,400 ft., Sea Island 4, 1,750 ft.

The berths are numbered from South, on the East side 12, 15, 17, 20, on the West side 14, 16, 18, 19.

The Sea Island loading facilities are serviced by 8 submarine crude loading lines, 1 bunker fuel line with a rated capacity of 12,000 b.p.h. and 1 black diesel bunker oil line with a rated capacity of 900 b.p.h. The loading stations at each of the Sea Island berths are equipped with steel, hydraulically operating loading arms and all berths are equipped with quick release hooks.

Refrigerated Liquefied Petroleum Gases (R.L.P.G.): Facilities for loading refrigerated liquefied Butane and Propane are located at the North Pier berths 6, 8 and 10.

PILOTAGE: *Vessel from Arrival Channel:* Pilot will normally board South of Buoy 17 and 18, as advised by Port Radar.

Vessel at Tanker Anchorage: After heaving anchor, the vessel will be advised by Port Radar towards a position approximately 1.5 miles S.E. of the South end of Sea Island dependent on weather and tidal conditions.

Vessels must not approach any closer than 1.5 miles to the piers or Sea Islands without a Pilot on board due to the tidal streams in the area.

Sea Island Pilots: ARAMCO maintains Pilots on continuous duty on the Sea Islands. They are stationed on the Sea Islands by ARAMCO to provide marine advice to the Loading Masters, to assist in the safe and efficient mooring and loading of vessels berthed at this facility and carry out emergency unmooring. Masters of vessels may contact the Sea Island Pilot through the Pier Operator or by calling the Ras Tanura Pilot Office on VHF Channel 16. Masters of all vessels berthed at the Sea Islands are encouraged to discuss any vessel-related problems with the duty Sea Island Pilot.

Informing Pilots of Finishing Time: As an aid to planning and expediting ships' movements and also to give adequate notice to vessels scheduled to berth, vessels loading at the berths in Ras Tanura shall call the Ras Tanura Pilot Office on VHF Channel 16 one hour before completion of loading.

INBOUND TRAFFIC PROCEDURE: (See Part B) – "Traffic Regulations".

Vessels proceeding direct to Ras Tanura Terminal: As per Inbound Traffic Procedures in Part (A) "Navigation" to the Entry Buoy and following the separation scheme to Buoys 17 and 18 according to advice from Port Radar and Pilots either to anchor in the Ras Tanura Tanker Anchorage or to berth on arrival.

From Northern holding Anchorage to Ras Tanura Terminal enter the separation scheme under the advice of Port Radar and follow the channel as above.

Maximum Draft in Arrival Channel: The maximum draft is 54 ft. + height of tide with an absolute maximum of 59 ft. for vessel proceeding along the inward channel of the Ras Tanura Separation Scheme bound to Ras Tanura Terminal.

See "Berthing – Depths of Water at Berths".

Masters of vessels arriving partly loaded or in deep ballast should navigate with caution in the vicinity of Nos. 5 and 7 channel buoys.

From East Holding Anchorage and East Channel: Follow the buoyed route to RTE 7 and RTE 8. Turn North into the Tanker Anchorage at Port Radar and Pilot's advice.

East Channel Caution: It is recommended that vessels of over 800 ft. (244 m.) length or 35 ft. (10.67 m.) draft do not use the East Channel.

Sea Islands' Submerged Pipe-lines: All traffic must pass East of the Sea Islands due to the existence of numerous submerged oil pipe-lines between all of the Sea Islands and the shore.

Abu Safa Submerged Pipe-line: All vessels are urged to navigate with caution between Channel Buoys 9 and 11 in the arrival channel and are forbidden to drop anchor in their vicinity due to the existence of the submerged oil pipe-line which crosses the channel.

ANCHORAGES: *Tanker Anchorage:* The Tanker Anchorage lies approximately 2 miles East of the Sea Islands and is used as a final holding area for vessels which have immediate berthing prospects or for vessels awaiting cargo clearance, release, sailing documents, etc. and whose draft does not exceed 60 ft. (18.3 m.). Under normal circumstances, no more than 10 vessels are allowed to use this anchorage at one time.

Freighter Anchorage: This anchorage, South East of the "SPIT" buoy is used as holding ground for coastal tankers intended to load at South Pier and miscellaneous small vessels and craft inbound for ARAMCO Marine facilities at the West Pier.

Deep Draft Anchorage: Vessels whose draft is 60 ft. or more and which are required to anchor upon completion of loading must normally do so in the area approximately 0.7 miles North of the Sea Islands. This anchorage has a swept depth of 72 ft. (21.9 m.) and holding ground is only considered fair due to variations in character of the bottom. It is recommended that vessels lie to a long scope of chain in adverse weather. No more than 2 vessels are allowed to use this anchorage at one time.

RADIO: COMMUNICATIONS WITH THE TERMINAL.

Under Way: At all times when under way in the arrival channel and anchorage areas with no Pilot aboard, vessels must watch VHF Channel 10 to keep in contact with Port Radar.

At Anchor: A good listening watch should be maintained on VHF Channel 16. Vessels will be called by Ras Tanura Pilots with berthing and other information and instructions. Port Radar should be called on VHF Channel 10 prior to heaving anchor.

Under Pilotage: Pilots carry portable, intrinsically safe radios which operate on ARAMCO dedicated mooring Channels for contact with tugs and jetty staff. In addition, the vessel's VHF Radio should stand by on Channel 13 for back up communication.

At Berth: An exchange of intrinsically safe portable radios will be made between vessel and jetty personnel in order to assist constant communication whilst loading.

BERTHING:

Mooring Procedures: Mooring boats are not used at Ras Tanura Terminal.

Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the ship's mooring line which is hove ashore by means of a capstan. Heavy wires should be sent one by one and ropes two at a time. Jetty crews are on duty continuously to handle mooring lines. Mooring lines on board vessels will not be handled by ARAMCO Personnel.

BERTHING FACILITIES:

Safe Loading Depths: If at any time a vessel's draft approaches to within about 3 ft. (1 m.) of the depth of water at the berth at North and South Piers, loading will be suspended until a rising tide increases the depth to permit resumption of loading and provide for a safe draft of the fully loaded ship on departure.

At the Sea Island Berths, the maximum sailing draft is 64 ft. plus the height of tide at the time of transiting the Deep Water Channel.

Depths of Water at Berths:

		Max. at ISLW (ft.)	*Max. Arrival Draft* (ft.)
South Pier Berth No.	1	31	29
	2	31	29
	3	30	27
	4	29	27
North Pier Berth No.	6	44	41
	7	37	28
	8	46	43
	9	40	29
	10	46	43
	11	40	29
Sea Islands All Berths		85	

Gangways: At North and South Pier, all vessels are required to provide their own gangways which should be ready prior to berthing.

At the Sea Islands, shore gangways are provided at each berth.

LOADING:

	Berth No.	*Product*	*Manifold Size* (in.)	*Maximum Loading Rate* (bbls.p.h.)
Sea Islands	12 to 18	Crude	16	40,000 to 280,000
	19 and 20	Crude	16 to 24	
	12 to 18	Bunker Fuel Oil	10	12,000
	12 to 18	Bunker Diesel	10	900
	19 and 20	Bunkers	12 to 16	12,000
North Pier	6 to 11	Crude	12	15,000 to 90,000
	6 to 11	Fuel Oil (Cargo)	12	12,000 to 22,000
	8, 9, 10	White Diesel	12	12,000
	8, 9, 10	Kerosene	12	6,500
	6 to 10	Naphtha	12	30,000
	6 to 11	Bunker Fuel Oil	8	5,000
	6 to 11	Bunker Diesel	8	1,200
	6, 8, 10	RLPG	12	30,000
South Pier	1 to 4			
		Fuel Oil (Cargo)	8	12,000 to 15,000
		Black Diesel (Cargo)	8	5,000
		White Diesel	8	8,500 to 15,000
		Gasoline	8	6,000
		Kerosene	8	6,500
		Jet Fuel	8	10,000
		Bunker Fuel Oil	6	5,000
		Bunker Diesel	6	1,200

Notes:

1. All vessels calling at Ras Tanura Terminal should be equipped with reducers to fit these loading connections which all have 150 lb. ASA flanges. These reducers should be fitted before berthing to help expedite ship turnaround time.

2. It is expected that most vessels will be able to accept any cargo as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual vessel hazards.

If loading of crude or products is too slow, ARAMCO will so advise the vessel.

Should a demurrage claim be filed against ARAMCO, the slow loading rate may result in an addition to allowed lay time.

3. Special regulations govern the acceptance and loading of Liquefied Petroleum Gas tankers in the Port of Ras Tanura.

4. The following types of crude oil are available at Ras Tanura Terminal:

ARABIAN BERRI (sometimes incorrectly referred to as Light Extra Light) CRUDE, ARABIAN LIGHT CRUDE, ARABIAN MEDIUM CRUDE, ARABIAN HEAVY CRUDE.

Loading arm connection: Jetty crews are on duty continuously to handle hoses/arms and will make connections and disconnections.

All loading connections are equipped with electrical insulating flanges therefore ship to shore bonding cables are not required.

Loading procedures: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by the ship's officer.

It is the responsibility of the vessel to advise shore personnel to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Upon completion of loading the vessel will normally be required to leave the berth immediately after disconnecting hoses/arms to await clearance in the Tanker Anchorage.

Cargo calculations and release: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM – I.P. is used by ARAMCO and the Saudi Arabian Government for Cargo measurement purposes. Ships cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail by ARAMCO under E.D.P. Unusual differences will be investigated by ARAMCO while the vessel waits in the Tanker Anchorage.

BALLAST: *Arrival Ballast Condition:* Vessels arriving at Ras Tanura Terminal shall retain sufficent clean water ballast on board to permit safe handling of the vessel in the prevailing weather conditions. A maximum stern trim of 15 feet with the propeller just covered is recommended.

Ballast pumping equipment should be ready to commence discharging ballast as soon as the vessel is secured in the berth.

DEPARTURE: See "Inbound Traffic Procedure" – East Channel Caution.

Deep Water Departure Channel: Has a clear swept depth of 69 ft. (21 m.) at I.S.L.W.

A minimum of 5 ft. (1.5 m.) keel clearance is required for all vessels transiting this channel during departure.

Departure Pilotage: On departure from Ras Tanura, Masters of vessels 150,000 DWT and above with draft of 60 ft. (18.28 m.) or more, may request additional pilotage assistance to line up for the Deep Water Departure Channel. Such pilotage assistance is compulsory for vessels with a draft of 68 ft. (20.73 m.) or more. In such instances the Harbour Pilot will remain on board until the vessel is aligned on a safe course for the Departure Channel, provided the Pilot can disembark safely. In certain cases it may be possible to arrange for the Pilot to leave by helicopter (See Part "A" – Helicopter Operation). The additional pilotage is also available when it is necessary for a V.L.C.C. to proceed to anchor to await a favourable tide or other reasons. The Pilot will remain on board until the vessel arrives in the anchorage, however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee must be made so as to allow the Pilot to safely disembark.

Vessel proceeding from Ras Tanura Terminal to Northern Holding Anchorage: The vessel should leave Ras Tanura Terminal and follow the Departure Channel observing the separation scheme to the Northern Holding Anchorage under advice of Port Radar.

SEE Part "B" TRAFFIC REGULATIONS

The vessel should advise Ras Tanura Pilots of its anchoring time.

REPORT: *More stringent safety checks:*

Quote:

Due to recent accidents involving tankers at terminals, ARAMCO have tightened up their safety checks and closely follow the issued safety regulations.

ARAMCO, as terminal operator of Ras Tanura/Ju'aymah, inspect all vessels before loading. Anything found not up to the standard of guidelines and recommendations compiled by Oil Companies International Marine Forum are noted, the Master is given a letter of protest, and the Owner is advised to correct deficiencies. At the same time all remarks and recommendations are computer-stored for easy access in the future.

ARAMCO have found that many recommendations are neglected and some vessels are repeatedly given the same remarks.

To prevent this, new actions are being taken by ARAMCO. Vessels which in the past have received recommendations and not followed the same have recently been refused permission to load at Ras Tanura/Ju'aymah.

That a vessel was allowed to load at her last call is not a guarantee that she will be allowed again.

Unquote.

Further to the above, we have been advised that since these deficiency letters do not allow these vessels to berth at the Ju'aymah Terminal's SBMs, vessels will be diverted to either of the three suitable berths at Sea Island. Time lost from berth available at Ju'aymah to berth available at Sea Island will be on the vessel's account.

This will affect vessels between 200,000 – 275,000 d.w.t.

SHIPMASTER'S REPORT: 1977.

I have just loaded at the above port on a 263,000 d.w.t. vessel to a draft of 67.5 ft. As the vessel was loading to a draft that meant navigating the departure channel on a rising tide, and also my first visit to the port, I requested the assistance of a Pilot for the departure channel.

I made this request 8 hours before departure to the port office and was informed it was not provided.

When the Berthing Master came to sail the ship he told me that ARAMCO did not provide this service irrespective of what was said in any publication and he left the vessel before it entered the departure channel.

ARAMCO's comment, June 1980: The above is an accurate statement!

We do not supply channel pilots. However, we do supply pilot and tug assistance for lining up to enter the departure channel after loading at Ras Tanura. This assistance is for vessels with departure drafts over 60 ft. when requested by the Master. For vessels with draft of 68 ft. and over, the assistance of tugs and pilot is compulsory. There is no charge for this service.

SHIPMASTER'S REPORT: August 1979.

Bunkers: "Saudi Bunkers" have a tanker of about 15,000 d.w.t. moored on the East side of Dammam channel.

VHF: Channel 13 or 16. During office hours and not at meal times otherwise call Agent.

Barges: 3 – "Tarra Tiffany" – Panamanian registered. Purpose built Bunkering tanker, built Singapore in 1978. Capacity 1,700 tons H.O. and 200 tons D.O.

"Min Woo II" a coaster with capacity of about 2,500 tons H.O. and 500 tons D.O.

"Corrondel" capacity not known.

All have "Yokohama" fenders and are well equipped. They are very quick at connecting and give good co-operation.

Area: To South of Ras Tanura Tanker Inner Anchorage. We anchored just South of SE corner of anchorage near outer Dammam channel buoys.

The nearer South pier the better but it depends on number of vessels in anchorage and Ras Tanura Radar requirements. *Vessel must not anchor in tanker anchorage if for bunkers only.*

Connecting: 6 in. hose, no reducer. Barge generally comes on vessel's port side. Derrick required. Gangway to be turned in.

Payment: Vessel pays for amount supplied, not ordered, barge request vessel to check barge ullages.

It is possible that bunker operations may be moved to the "Northern Holding Anchorage".

SHIPMASTER'S REPORT: December 1979

The following is a radio message received by the Master from his Agent.

Important Notice Revised Government and Port Regulations Ras Tanura. Please acknowledge your compliance.

Para One

Port Authorities now insist that all vessels are not to sail from Ras Tanura (Ju'aymah) until a port clearance (titled sailing report) has been delivered on board STOP Therefore vessels must have onboard both Port Clearance and P 2/50 permit of departure before sailing STOP

Para Two

Anti Pollution regulations are now being strictly enforced by Saudi Arabian Government Authorities with heavy fines/delays to vessels/possible arrest for Masters of offending vessels therefore you are strongly advised to AAA Log and report to the Pilot Officer any oil slick P 3/50 sightings BBB Closely monitor deballasting operations CCC Acknowledge receipt only of any protest letter submitted by ARAMCO for any alleged pollution incident DDD Advise us immediately a protest letter for an alleged pollution is received on board and name of your P and I Club EEE Issue P 4/50 Arab with a separate counter protest letter as required copied to us STOP

Para Three

Please ensure all repeat all alcoholic beverages and pornographic material are removed from cabins/lounges and placed in bonded store for sealing STOP Stores and chillrooms must also be sealed if containing alcohol STOP Vessels are P 5/53 subject to search on arrival and penalties are severe for infringement of Saudi Regulations STOP

Para Four

On arrival Ras Tanura ensure you call this Office advising anchor time and most important advise when Pilot boards your vessel to proceed to berth/SBM in order to avoid delay in clearing your vessel STOP+

SHIPMASTER'S REPORT: August 1981.

Ras Tanura approach and North Pier LPG Berths:

Buoyage: From May 1981 all IALA System.

Approach: Initial Contact: Contact HZY – ARAMCO, remember this station will accept messages to local Agents but not send Agents' messages to ship, these have to come through Bahrain. Contact HZY at least 48 hours beforehand to give time of arrival at Entry Buoy (RTE 2 Eastern Channel), either Northern or Eastern Holding Anchorages or as soon as possible if coming from another Gulf port.

1. If vessel has no orders, or a nomination but no firm date vessel will have to wait at Northern or Eastern Holding anchorage.
   The Eastern is for ships below 250 m. in length and draft 10.7 m.
2. If vessel has a nomination and date near at hand you may be allowed to proceed to inner tanker anchorage off Sea Island.

Anchor/Proceed: If vessel has to wait, select whichever holding anchorage is suitable. For gas carriers we preferred the Eastern as the channel is easier and quieter than the Main Channel on entry, plus the distance is less if coming from the East. Larger vessels have no option and have to use the Northern. If you are not sure whether you will have to anchor or not at the Holding Anchorages contact Ras Tanura Pilots on Channel 16, working 14, as soon as possible before arrival for instructions.

Listen: Guard HZY well before arrival for standard messages, nomination and berthing instructions. A useful and most important service is the Berthing Schedule given out twice daily at 0700 hrs. and 1900 hrs. GMT on 430 kHz. after Traffic List.

Proceed: If you have firm instructions to proceed to Inner Tanker Anchorage, cable HZY for permission to use either Eastern or Main Channel at least 12 hours beforehand, if possible, or as soon as leaving port (Kharg or Mina, etc.). You will not receive a reply. Call 'Ras Tanura Pilot' one hour before entry buoy for permission to proceed inwards and give time at Entry Buoys (RTE 2 East Channel) and time off Sea Island.

Proceed Inwards: After contacting Pilot on Channel 14 you will be told to report at Entry Buoy. Then when passing this buoy told to report to 'Ras Tanura Radar' on Channel 10 on which close watch must be kept as well as Channel 16.

Main Channel: Ras Tanura Radar will instruct you when to report, remember they have vessel plotted.

A speed of about 12 knots down the channel is safe at manoeuvring full speed.

At No. 9 Buoy a speed reduction to 5 knots is required, before doing this check with Radar – they may require you to continue at greater speed to clear channel.

East Channel: This channel is not so complicated or congested and vessels keep to the starboard side of buoy line. Radar will require reports at given intervals – usually "RTE 2" and "RTE 7", 12 knots can be maintained most of the way.

Proceeding from Head of Gulf: If coming from Kharg or Mina, etc., extra distance will be entailed by using Eastern Channel so use Main Channel but get permission first from Pilots and inform HZY well beforehand.

Inner Tanker Anchorage: The sailing directions will tell you to haul round to East on leaving main channel to clear tanker anchorage if proceeding to Dammam area. You will have already told Radar Control where you are bound and they will probably let you cross tanker anchorage if reasonably empty and few vessel movements off Sea Island.

Anchored: Ras Tanura Radar will require position at anchoring and then to report before heaving up. The tanker anchorage area is not good holding ground, particularly in Winter when strong winds are frequent, plenty of cable is required. During February at the Southern end of the anchorage 9 shackles of cable have been used.

Pratique: Cable in usual ARAMCO format to HZY for Free Pratique 24 hours beforehand or as early as possible before arrival. Pratique not given until alongside and vessel cleared.

Departure: Again depends on draft and destination. If under 10.7 m. draft and proceeding East use Eastern Channel. Radar will require report at "RTE7" and "RTE3". Main channel reports at Nos. 17 and 18 buoys and "2 Alpha".

Bunkers: Obtainable from ARAMCO by chicksan on the berths at North Pier at the same time as loading. If bunkering by barge vessel can only do it at the Northern Holding Anchorage. Saudi Bunkers have three coasters on charter. Their fendering is very good and seamanship good, although English not so good. You can contact Saudi Bunkers on Channel 16, working 13, during office hours, otherwise to barge direct. Generally starboard side alongside, derrick required. Subject to weather delays.

Berths: There are three berths for gas carriers at Ras Tanura: Nos. 6, 8 and 10 on North Pier, 10 being the most modern and Northerly, and two at Ju'aymah.

Minimum draft on the berths is 46 ft. LW. Always port side alongside.

Maximum air draft at manifold: 20 m.

Chicksans: 2×12 in. loading at each berth.

2×8 in. VRL at each berth.

All berths now have auto-couplers which require 1 m. clearance between manifold valve and outer flange, not all berths have enough spool pieces so best have ship's pieces ready, not required on V.R.L.

Moorings: Minimum always 3, 3, 2 with springs crossed each end. If strong winds expected 4, 4, 2 each end. Mooring up can take time especially if ship's mooring gear is slow – about 1.5 hours. Very keen on moorings being kept tight.

Fire wires must have eye each end with eye being hung off on light rope pennant – wire in a bight 1 m. above water.

Pilots: Board 1 mile East of the Southern end of the North Pier from large fast pilot launch. Depending on weather, Pilot will use straight conventional ladder or gangway/ladder arrangement. No berthing if wind over 25 knots. On unberthing it is a regulation that the Pilot is on board and tugs standing by before Chicksan disconnecting can commence.

Tugs: Usually two tugs used, tugs' lines used. Berthing "American fashion" alongside, unberthing long line from bow to stern. Four new tugs of about 6,500 h.p. are being commissioned. Total number in port, 8, two of which at Ju'aymah at any one time. Tugs join vessel off Sea Island.

Procedure: Shore gang connect and disconnect, generally takes about 1.5 hours.

V.R.L.: Considerable tightening up on use and as a rule only to be used in emergencies except when taking coolant.

Loading rate: Maximum loading rate is about 20,000 bbls./h. which roughly corresponds to 1,500 tonnes to 1,900 tonnes/hr. depending on grade. If more than one gas ship loading on North Pier at one time rate will drop appreciably. Very difficult to get a good rate at Berths No. 6 or 8, maximum obtained 8,000 bbls./h.

Pressures/Temperature: Regulations are 0.7 mbs tank pressure arrival alongside and a difference between top and bottom temperatures of 15°C. Maximum 10 tonnes liquid of incompatible grade per tank on arrival.

Cooling Down: If vessel arrives with warm tanks – after drydock/repairs, Ammonia or in Butane going to Propane she will require coolant. ARAMCO very particular on this subject and require ships to leave the berth and cool down after taking sufficient quantity for this purpose. When cooled down to within ARAMCO pressure and temperature limitations the ship will be accepted back alongside and will be required to load at full rate without the V.R.L.

From experience we have found about 1,500 tonnes per product or about 2,000 tonnes of one grade is beneficial, if this can be obtained without extra charge. ARAMCO regulations do not permit more than 10% of nomination of that grade in coolant.

Taking coolant, V.R.L. allowed. Definitely no venting up riser. Maximum rate obtainable on coolant is usually about 3,000 bbls./h. Make sure you do not ask initially for too low a figure because it is quite a job to get it increased. Only allowed to load coolant in one tank of that grade.

Loading Master: Will give you ARAMCO VHF set for pier communications or take ship's set.

Water: Well (Raw) water with a salt/mineral content is easily obtainable on North Pier. Rate about 30 t.p.h. It's far better than rationing. Add lime with softener. Price about $2.0 per tonne, max. 200 tonnes.

Chits have to be obtained from the Agent before the Supervisor will let you connect hoses. Connections are American type couplings. Distilled water is not obtainable.

Stores: Only at the anchorage, by the Agent's launch. No stores are allowed to be loaded, carried or landed along piers. In Winter and early Spring, fresh provisions are reasonably good and moderately priced.

Air Freight: It takes about 2 days to clear goods through Customs at Dhahran.

Crew: Repatriation and joining is best arranged well beforehand. NO Russian visas in Discharge Books or Seamen's Cards for those joining, they will be refused permission to enter. The Agent will require off-going crews' Discharge Books the day before departure. To UK the best flight is BA. 120 at 0130 from Dhahran arriving London at 0530 hrs., for this you have to be off the ship no later than 1600 hrs. the day before clearing formalities and then wait in an hotel at Dhahran.

Medical: Allow at least 6 hours from the time the Agent says he will meet you at North Pier main gate for getting to hospital. Seamen's Books are essential and will be taken by Agent beforehand. Prescriptions and reports take time to be delivered – allow 12 hours.

For emergency cases at anchorage contact 'Ras Tanura Pilots' as well as Agents and they will arrange a Coastguard helicopter immediately to take casualty off. If alongside, contact Agent or 'Pilot'.

Films/Walport: Exchange not possible. This was stopped in 1979 due to Customs problems over local film shows.

Alcohol/Magazines: Definitely no alcohol – all to be sealed. Random checks by Coastguard, punishment very severe. "Playboy" type calendars and magazines to be put in store.

Mail: Takes about 7 days – 10 days from UK and vice versa.

Surveyor/EDP: With gas carriers Surveyor is allowed to complete his survey and check figures with Chief Officer before Pilot will take ship off berth. Most Pilots know this but sometimes consultation is required otherwise Surveyor will have to go off with Pilot. The two main survey companies in Ras Tanura are Watson Grey and Redwood. ARAMCO will cable through HZY your figures for agreement about 18 hours after departure, for insertion on Bill of Lading and authorisation to Agent. With gas carriers due proper survey on arrival and departure generally figures are correct, however checks should be made.

Gangway: This can be turned out prior to berthing. It cannot be landed on any of the berths and must be slung at all times.

Pollution: Very strict. If any oil comes near vessel report to Pilots otherwise you will be liable.

Saudi Flag: Must be displayed 24 hours and be well visible.

Formalities:/Clearance: Make sure you have correct clearance on departure, it comes in three parts – Sailing Report, Export Manifest, Permit of Departure.

Arrival Form: 5 copies required of the standard Arrival Form – Agent's own forms. Handed in on arrival.

Request for Clearance Form: 5 copies on Agent's own printed forms given in on arrival.

Crew List – 5, Health Declaration – 2, Vaccination List – 2, Store List – 2, Crew Declaration – 2.

The above forms sometimes vary in number. 'Q' flag and lights at night must be displayed until Pratique given – VERY IMPORTANT.

Immigration, Quarantine and Customs generally carried out by Agent with Coastguard Officer in attendance, who seals bond.

REPORT: May 1982.

Acceptance for Loading: ARAMCO have advised that vessel's arrival time if vessel berths on arrival is the time Pilot boards vessel, no matter where. If vessel does not berth on arrival, the arrival time is taken when vessel drops anchor at either the North holding anchorage, or at Ras Tanura inner anchorage, if vessel is called down by Ras Tanura Pilots.

If vessel's ETA is close to 1200 hrs. on the nomination date or acceptance date, please try to make an allowance for vessel to be called from entry buoy to Ras Tanura inner anchorage by the Pilots on the assumption that vessel needs 4 hours (approx.) to come from entry buoy to inner anchorage. If vessel does not make the announcement and arrives entry buoy at 1100 hrs., and is told to proceed to the inner anchorage vessel's arrival time will be taken as the time she drops anchor in the inner anchorage 1500 hrs. (approx.), therefore vessel would be classed as a non-performer.

With regard to Notice of Readiness tendering time, it is taken when vessel anchors in the Northern holding anchorage or inner anchorage if called down on arrival. If vessel is told that she is berthing on arrival when she reaches the entry buoy then tendering time is taken at entry buoy or when Pilot boards on her passage inwards.

AUTHORITIES: The Arabian American Oil Company, Port Control Centre, North Pier, Ras Tanura, Saudi Arabia. *Tel:* 37250. *Cable Address:* ARAMCO, Dammam. *Contact:* S. M. Al Shibar, Port Captain – Terminal Marine Piloting Division.

Port Officials: Saudi Arabian Government Port Authorities located in Customs House, Port Office, and Quarantine Office at Ras Tanura.

AGENT: Gulf Agency Company Saudi Arabia, ARAMCO Mail Box 621, Ras Tanura 31941, via Dhahran, Saudi Arabia. Cables: "Confidence", Ras Tanura, Ship-Shore traffic via Dammam Radio. Telex: 651011, 651059 ("GAC RT SJ") Telephone: 6670632, 6670636, (24 hour service) 6673180. After Office Hours: 6670644, 6670925.

Vessels can communicate with SSB radio station, frequencies 3539 and 6910, call-sign "Confidence Ras Tanura".

For ship to shore communication, Ras Tanura office is also equipped with VHF radio, call-sign "Confidence Ras Tanura", on Channel 16, switching to Channels 13, 6, 9 or 14 for communication.

Tanker Crew Mail: To be directed to: c/o Gulf Agency Co. Saudi Arabia Rahima P.O. Box 72, Ras Tanura, via Dhahran, Saudi Arabia.

YANBU (See Plan Book)

Commercial Port: 24.05 N. 38.03 E.

Industrial Port: 23.57 N. 38.13 E.

(A) COMMERCIAL PORT

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Yanbu Commercial Port is on Red Sea coast, about 168 nautical miles N.N.W. of Jeddah.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Lat. 24° 06′ 00″ N.	Long. 38° 00′ 00″ E.
Lat. 24° 06′ 00″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 38° 05′ 30″ E.

CHANNEL: Ships entering port pass through a channel of the following measurement: Length 1,647 m., width 200 m.

BEACONS:

1. Schermo Beacon: 11 miles West of Yanbu Port. Lat. 24° 03.08′ N., Long. 37° 51.50′ E. Height 10 m. above datum. Range: 11 nautical miles. Light characteristics: White flash every 5 seconds. (Fl.W. 5 sec.).

Note: Newly installed Racon on Schermo reef in position: Lat. 24° 03′ 20″ N., Long. 37° 51′ 60″ E. Code letter: "Y". Cycle: 75 seconds. Range: Approximately 12 nautical miles.

2. Entrance Beacons: Two Beacons, 1 & 2 at entrance of port channel. Height: 15 ft. Range: 5 nautical miles.

Beacon No. 1: Starboard – hand beacon (Green), green flash every second (Q.G.). Position: Lat. 24° 04.91′ N., Long. 38° 02.08′ E.

Beacon No. 2: Port – hand beacon (Red), red flash every second (Q.R.). Position: Lat. 24° 04.91′ N., Long. 38° 01.87′ E.

Beacon No. 6: 795 m. from channel entrance on port side there is another beacon height 15 ft. (Red), red flash every second (Q.R.). Range: 5 nautical miles.

APPROACHING: A cement factory has been established in position: Lat. 24° 16.1′ N., Long. 37° 33.2′ E.

The factory provides a strong radar echo and emits a very bright glow at night.

It has been reported that this has confused seafarers who have taken it for the town of Yanbu.

Seafarers are strongly advised to amend their sea charts accordingly.

Masters proceeding to Yanbu Commercial Port should follow strictly the Channel and traffic separation scheme as clearly as delineated in formal charts in force (e.g., British Admiralty Charts 327 and 328.)

Non-compliance in order to save time will be met with a fine.

BUOYS: Channel is buoyed with red and green port and starboard-hand buoys.

Starboard-hand buoys: 7 buoys, odd number: 1A, 3, 5, 7, 9, 11, & 13. Buoy shape: Cone. Light characteristic: Green flash every 2 seconds (Fl. G. 2 secs.).

Port-hand Buoys: Number of buoys: 2, even numbers: 4, 8. Buoy shape: Can. Light characteristics: Red flash every 2 seconds (Fl. R. 2 secs.).

DOCUMENTS: All ships bound for Yanbu Commercial Port should have the following documents prepared for the relevant authorities and the original certificates as specified ready for inspection by the Port Authority's Boarding Officer.

Crew List, original plus 4 copies.
Passenger List, original plus 4 copies.
Personal Effects, Crew original plus 1 copy.
Vaccination List, original plus 1 copy.
Marine Health Declaration, original plus 1 copy.
Israel Boycott Declaration, original plus 2 copies.
Ship's Stores List, original plus 1 copy.
Logbook.
Certificate of Registry.
Certificate of Classification.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio & Wireless Certificate.
Cargo Gear Certificate.
Derat Certificate.
Port Clearance – Last Port of Call.

PILOTAGE: Pilotage is compulsory. Vessels bound for Yanbu Commercial Port should call Yanbu Port Control on VHF Channel 16 at least 2 hours prior to arrival.

Pilots will normally board in position Lat. 24° 02.6′ N. Long. 37° 45.2′ E. approximately 5 miles West of Schermo Beacon. Pilot boats are painted orange with "Pilot" written in black on white superstructure.

Vessels should exhibit international code flag "G" by day or flash "G" by night. On approaching the Pilot Boarding Area, a pilot ladder should be rigged, reaching approximately 1 m. above sea level. Vessels should ensure a good lee for boarding of the Pilot.

ANCHORAGES: There are no areas suitable for the safe anchorage of vessels in the vicinity of Yanbu Commercial Port.

RESTRICTIONS: The port is open 24 hours per day and vessels may enter and leave port at any time.

MAX. SIZE: There is no restriction as to length or breadth of vessels but a draft restriction of 34 ft. is in force for all vessels to all berths other than those cement vessels nominated specifically for discharge at berth No. 3 or No. 9 where a 36 ft. draft limit is allowed.

HEALTH: Quarantine formalities are effected after vessels are berthed except in the case of passenger/pilgrim vessels which will be anchored inside the harbour for quarantine and immigration clearance.

RADIO: Vessels bound for Yanbu from the North should route their ETA cables through Port Said Radio.

Vessels bound for Yanbu from the South should route their ETA cables through Bahrain Radio.

ETA cables are transmitted to the local Saudi PTT Yanbu Office and thence distributed to concerned parties by telex.

VHF: Yanbu Port Control keeps a radio watch on Channel 16 VHF, 24 hours per day. VHF Channels 14, 12 and 9 are available for standard communications. VHF Channel 14 is normally used by Pilots and tugs for manoeuvring purposes.

RADAR: There is no port radar facility at Yanbu Commercial Port.

TUGS: Tugs normally meet incoming vessels off No. 8 Port Home Channel Buoy abreast of the port Coast Guard station. Ships' lines are used for berthing and unberthing operations.

Tugs range from 800 h.p. – 2,500 h.p.

Yanbu 1 and 2:	800 h.p.
Yanbu 3:	1,310 h.p.
Yanbu 21 and 22:	2,500 h.p.

BERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
1	170	10	General cargo; pilgrims' reception hall.
2	220	10	General cargo, livestock
3	300	11	Bulk cement terminal (discharge) only
4		11	General cargo
5 to 7	800	12	General cargo
8 & 9	440	12	General cargo at No. 8, bulk cement discharge only at No. 9.

Note: Ro-Ro vessels berth stern-to on Berths 5 to 9.

Covered storage area: 62,000 sq.m.

Open storage area: 529,400 sq.m.

CARGO HANDLING EQUIPMENT:

Mobile cranes:	1 × 200 ton
	1 × 36 ton tower crane
	4 × 50 ton
	2 × 40 ton tower cranes
	1 × 40 ton
	1 × 36 ton tower crane
	2 × 35 ton
	5 × 30 ton

One crane is equipped with container tip, lifting capacity 70 tons.

Both 40 ton tower cranes are equipped with container spreaders.

Head trucks:	20
Mafi trailers:	60 × 40 ft.
Fork lifts:	4 × 35 ton container handlers
	1 × 28 ton container handler
	1 × 25 ton container handler
	9 × (10 ton – 25 ton)
	81 × (5 ton – 10 ton)
	23 × (up to 5 ton)

BULK HANDLING FACILITIES: Two terminals (berth 3 and 9) with handling capacity of minimum output 1,150,000 tons a year.

Bulk Cement Terminals:

1. Berth 3
   Silos storage capacity: 40,000 tons.
   Handling capacity: 500 t.p.h. 1,000,000 tons per year.
2. Berth 9
   Floating cement plant.
   Storage capacity: about 41,000 tons.
   Handling capacity: about 1,000,000 tons per year.

Bulk Grain Units:

One unit consists of 2 mobile cranes with 6 ton grabs discharging into 2 hoppers. Each hopper has bagging capability. Handling capacity: About 100 t.p.h./crane. No storage units.

Second unit consists of 3 mobile discharging machines. Each machine has bagging capability. Handlling capacity: About 200 t.p.h/machine. No storage units.

STEVEDORES: Contracted for an integrated cargo handling operation, and work continuously 24 hours per day, 7 days per week. A notice time of 48 hours prior to arrival is required for gang booking.

MEDICAL: Assistance can be given by local general hospital and/or by a small private clinic via the Agents.

No vaccinations are required, but Malaria precautions are recommended.

DENSITY: 1025.

CONSULS: At Jeddah.

REPAIRS: No facilities, however minor repairs are possible in local workshops via the Agents.

FRESH WATER: Available via mains direct to berth at a delivery rate o approximately 25 t.p.h. and a cost of SR15.00 per tonne (1982).

DRY DOCK: Not available.

SURVEYORS: Available via Jeddah.

GANGWAY/DECK WATCHMEN: Service not necessary and no available. Port area is fenced and guarded by Saudi Arabian Coas Guard, and guards are posted on each individual vessel in port.

HATCHES/CARGO GEAR: To vessel's advantage if all hatches an gear are prepared by ship's crew, however stevedores do assist.

CUSTOMS ALLOWANCES: In all Saudi Arabia, possession of an alcoholic beverages is strictly prohibited.

REPATRIATION: Possible.

AIRPORT: Regular flight service on direct flights to Jeddah and Riyad by Saudia. Other Saudi destinations and international destinations vi Jeddah and Riyadh.

Yanbu domestic airport is located approximately 15 km. from the por

TIME: GMT plus 3 hours.

HOLIDAYS: Public holidays do not affect port's activity. But a government offices, banks, etc., are closed to the public durin Ramadan and Haijh holidays which change annually by the Higiria calendar.

TELEPHONE NUMBERS:

Police (Coast Guard):	Port Ext. No. 314
Fire – via Coast Guard	314
Ambulance – via Stevedores	142
or Traffic Department	317

TELEPHONES: Available in near future.

SERVICES: Services like tank cleaning, etc., are not available.

SHORE LEAVE: By Agent's request permitted.

IDENTIFICATION CARDS: Seamen's discharge books are sufficient.

REGULATIONS: Refer to Rules and Regulations for Saudi Arabia Seaports.

DEVELOPMENTS: *Under construction in 1984:* Refrigerated store hazardous cargo store, marine workshop, first aid station and fire station.

Future port developments include an additional 7 berths and a contro tower. No time has yet been fixed for implementation of these projects.

AUTHORITY: Yanbu Port Management, P.O.Box, Yanbu Port, Yanbu Saudi Arabia. *Tel:* 04-3221163, 3222515 (ext. 294). *Telex:* 461005 Ports Sj and 461096 Ypmc Sj. *Cables:* Ports Yanbu. *Contact:* Abdul Rahman Ahmad Al-Khateeb, Port Director-General.

(B) INDUSTRIAL PORT: KING FAHD PORT AT MADINA YANBU AL-SINAIYAH

At present the King Fahd Port at Madinat Yanbu Al-Sinaiyah consist of 7 Terminals listed as follows:

- Construction Support Terminal
- Crude Oil Terminal
- NGL Terminal
- Yanbu Petromin Refinery Terminal
- Export Refinery Terminal
- General Cargo and Container Terminal
- Bulk Terminal

FLAG: Every vessel entering King Fahd Port at Madinat Yanbu Al-Sinaiyah must hoist the Flag of the Kingdom of Saudi Arabia from the foremast and keep it flying at all times throughout the vessel's stay in Port. The Flag of the Kingdom of Saudi Arabia is to be in good condition and is properly displayed when the Arabic writing appears at the top and the sword at the bottom.

DOCUMENTS: Also see "Radio".

Arrival Documentation Requirements: The Rules and Regulations fo Saudi Arabian Seaports specify that Masters must present or make available for inspection the following papers and documents:

- Log Book.
- Registration Certificate.
- Classification Certificate.
- Load-Line Certificate.
- Safety Equipment Certificate.
- Radio and Wireless Certificate.
- Cargo Gear Certificate.
- Maritime Health Declaration.
- Vaccination List.
- Derat Certificate.
- Clearance from last Port of call.
- Israel Boycott Declaration.
- Ship's Stores List.
- Grain Shipping Certificate if the vessel is carrying a grain shipment.
- Mail Transport Documents in accordance with the "International Postal Treaty" if any mail is carried aboard.
- 8 copies of the crew list including name, nationality, date and place of birth, passport number, port of embarkation, port of disembarkation.

2 copies of the list of personal effects of crew and passengers

In addition, the Rules and Regulations for King Fahd Port at Madina Yanbu Al-Sinaiyah require that the Oil Record Book and the Certificat of Fitness (in cases of gas and chemical carriers) are available fo inspection.

CLEARANCE: *Basic Procedure for Clearing a Ship:* On arrival of the ship at anchor or berth, and given that all the pre-entry requirement have been fulfilled, the ship will be boarded by the following fo completion of the required formalities:

- Immigration Authorities.
- Coast Guard.
- Port Health Officer.
- Royal Commission Harbour Master.

In the case of dry cargo vessels, on completion of these formalities the Agent will collect the discharge permit from the Customs Authorities having provided a copy of the manifest well in advance. The Custom

Authorities then issue a Discharge Permit, one copy of which is given to the stevedores while the other is given to Port Management.

Basic procedures for clearing a ship outward: When a vessel completes cargo, the Agent is responsible for issuing a letter of notification to the Customs Authorities. The letter is endorsed by the Customs and copies given to the following:

(i) Immigration Department.
(ii) Criminal Investigation Department.
(iii) Yanbu Port Authorities.
(iv) Intelligence Department.
(v) Coast Guard.

The Coast Guard issues a letter to the Quarantine Department of Yanbu Al Bahr Hospital, in their capacity as Port Health Authority stating:

(i) They have received the clearance letter from Customs.
(ii) The vessel's name.
(iii) The vessel's flag.
(iv) The name of the Agent.

and requesting them to issue the Departure Permit.

The Departure Permit, duly signed and stamped, is taken to the Immigration Department who will dispatch one of their Officers to the vessel. This Officer checks the crew list against the Passports and obtains assurances from the Master that the crew is the same as on arrival, apart from any agreed repatriation, and that no crew member has been involved in any mishap. Once the Immigration Officer is satisfied he gives one copy of the Departure Permit to the Master and one copy to Port Management, concluding the formalities.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is available and should be requested through the ship's Agent.

PILOTAGE: *Instructions to Vessels and Conditions of Use of all Berths within King Fahd Port at Madinat Yanbu Al-Sinaiyah:* When the Pilot boards an inward bound vessel he will present the Master with a letter "Instructions to Vessels and Conditions of Use of all Berths within King Fahd Port at Madinat Yanbu Al-Sinaiyah". The Master is required to sign the letter, acknowledging receipt and agreeing to the Instructions and Conditions contained therein prior to entry into the Port. No vessel will be allowed to proceed into the Port until this letter has been signed.

Pilotage: Pilotage is compulsory for all vessels entering, navigating within, or leaving the port limits of King Fahd Port at Madinat Yanbu Al-Sinaiyah.

Orders for Pilots must be received at least 2 hours before their services are required.

Vessels of less than 300 g.r.t., pleasure craft, vessels operated by the Saudi Arabian Government and the Royal Commission, and any craft employed solely within the port limits are exempt from Pilotage. These vessels must keep clear of the fairway.

The Pilot boarding area for King Fahd Port at Madinat Yanbu Al-Sinaiyah is in a position Lat. 24° 02′ N., Long. 37° 44′ E. Pilots will embark and disembark from twin screw, steel pilot vessels. When approaching the pilot boat the Master of every vessel must reduce speed to a minimum for steerage way, maintain VHF contact with the pilot boat, and provide a good lee.

Every vessel picking up a Pilot must have rigged and ready for use a safe, clean, properly secured pilot ladder or combination of gangway and pilot ladder. The Pilot boarding arrangements must comply with the current IMO codes of practice concerning pilot boarding. A life buoy, with life line attached, and a boat rope must be provided ready for immediate use, and, in addition, between sunset and sunrise the pilot boarding area must be well illuminated. The rigging of pilot ladders and the embarkation and disembarkation of pilots must be supervised by a responsible deck officer.

Any vessel which overcarries a Pilot to another Saudi Arabian Port, must pay all repatriation expenses. Under no circumstances may a Pilot be overcarried to a Port outside the Kingdom of Saudi Arabia, due to visa restrictions. If weather, or other conditions preclude the disembarkation of a Pilot from a vessel, bound to a Port outside the Kingdom of Saudi Arabia, then that vessel will be delayed, at the vessel's expense, until such time as disembarkation is possible. Any such vessel so delayed may arrange, at their own expense, for the Pilot to be disembarked by helicopter.

The length of Pilotage from the Pilot boarding position is approximately 33 miles, with a minimum surveyed depth of 32 m.

Vessels approaching the Port are reminded that the British Admiralty "Red Sea and Gulf of Aden Pilot" states in its supplement that "Ras Baridi has been reported to be 3 miles Northward of its charted position".

APPROACHES: Masters of deep draft vessels will be aware that there are extensive unsurveyed areas between the main shipping lanes and the approaches to Yanbu. Two approach corridors to the present pilot boarding area off Schermo Reef were surveyed early in 1981. The Northern approach corridor, some 48 miles long and 3 miles wide extends in a Westerly direction from just West of Schermo Reef, at approximately Lat. 24° 03′ N., Long. 37° 45.2′ E. to Lat. 24° 04′ N., Long. 36° 53′ E. Depths range in general from 650 m. inshore to 950 m. offshore, but two isolated domes were discovered with least depths of 132 m. and 184 m. at approximately Lat. 24° 04′ N., Long. 37° 36′ E. and Lat. 24° 07′ N., Long. 37° 36′ E. respectively.

The Southern approach corridor some 43 miles long and 3 miles wide extends in a South-Westerly direction from just West of Schermo Reef at approximately Lat. 24° 03′ N., Long. 37° 45.2′ E. to Lat. 23° 22.5′ N., Long. 37° 28.5′ E. No hazards were discovered with depths generally 650 m. inshore to 790 m. offshore.

ANCHORAGES: The bearing and distance shown below is calculated from *Beacon 2C* and indicates position of the anchoage.

Anchoring Points	*Beacon 2C Bearing*	*Distance*
N1	101°	1.06 miles
N2	110°	1.26 miles
N3	098°	1.56 miles
N4	117°	1.80 miles

Anchorage "N4" will be utilised for VLCCs with a light draft as and when required.

Masters of vessels are advised of the following conditions for the use of the anchorage:

1. No repairs of any sort are permitted at the anchorage unless authorised by the Harbour Master.
2. Main engines to be in a state of readiness at all times to leave the anchorage at short notice.
3. A continuous listening watch on VHF Channel 16 should be maintained.
4. Anchor watches to determine vessel's anchor position at reasonable intervals is recommended.

RESTRICTIONS: *Equipment Requirements:* No vessel shall navigate within the Port, unless the vessel complies with the following equipment requirements:

Efficient VHF Radio Telephone capable of working on the Port frequencies.

Efficient steering gear with fully operational rudder and helm indicators.

Efficient working radar.

Efficient propulsion both ahead and astern and fully operational tachometer.

Both anchors capable of being let go and capable of being raised by the vessel.

Efficient winches and adequate mooring gear to secure the vessels safely, and an efficient mooring stations communication system.

Sufficient crew on board at all times to operate the vessel safely and efficiently and all officers properly qualified and certificated as required by the flag nation.

All secondary power or mechanical systems on the vessel to be in operation and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above, Royal Commission Port Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay. Failure to comply or to notify Royal Commission Port Control may result in the vessel being refused entry to the Port.

Permission to Enter the Port: All Masters of sea going vessels must have prior permission of the Royal Commission Port Control to enter the Port. Such permission may be subject to special restrictions or conditions if:

The vessel arrives before or after the given ETA.

The vessel is in danger of sinking.

The vessel or its cargo is on fire or if there is any possibility of a fire or if after a fire it is uncertain whether that fire is completely extinguished.

The vessel is overloaded or, on account of the condition of the cargo, the vessel is dangerous or has deck cargo which extends beyond her sides.

The vessel has been involved in a collision or has grounded.

The vessel is leaking.

The vessel has a list.

The vessel is in an unstable condition.

Draft Requirements: Vessels will not be permitted entry to the Port unless they arrive at a draft consistent with safe manoeuvring and reasonably trimmed, to the satisfaction of the Pilot.

RADIO: *ETA Requirements:* In addition to the "Pre-Arrival Information and Requirements", further notification of ETA is required 5 days, 72 hours, 48 hours and 24 hours prior to arrival at the Port should be sent by telex (No. 462310 YICT SJ) for information of the Harbour Master. Changes in ETA in excess of 1 hour must be notified thereafter. On coming within range of Royal Commission Port Control, the ETA must be confirmed by VHF.

Government Entry Requirements: The Master will be responsible for complying fully with the requirements of Saudi Arabian Government Departments, Ministries, Agencies and Organisations. Particular attention should be paid to the requirements of the Customs, Coast Guard, Immigration and Port Health Authorities. Masters requiring any advice on these requirements should contact their local Agents.

Masters of tankers calling at Petroline's Crude Oil Terminal and NGL Terminal should be instructed to address all messages to "ARAMCO" via ARAMCO's HZY Marine Radio Station. The above does not apply to messages intended for outside shipping and inspection agencies for which commercial Channels should continue to be used.

PRE-ARRIVAL INFORMATION REQUIREMENTS: The Rules and Regulations for Saudi Arabian Seaports and the Rules and Regulations for King Fahd Port at Madinat Yanbu Al-Sinaiyah specify that certain information must be received by the Royal Commission either directly or through the vessel's Agent before that vessel arrives at the port. Vessels which fail to comply with this requirement may be delayed and/or subject to a fine as laid down in the Rules and Regulations.

Dry Cargo Vessels: The following information must be sent to the Director, Ports and the Harbour Master, as soon as that vessel has completed loading cargo at her previous port:

Name of vessel, and former names if any.

Port of registry, flag, and call sign.

Length overall.

G.r.t., n.r.t. and d.w.t.

Expected draft on arrival.

Cargo particulars, nature and quantities to be loaded and/or discharged and any other cargo being carried to other destinations, including quantities and classes of dangerous cargoes covered by the IMDG Code.

Details of cargo handling gear and ramps etc.

Number and nationalities of passengers to be disembarked or in-transit.

Expected requirements for bunkers and fresh water.

Name of vessel's Agent.

Tankers: The following information must be sent to the Director, Ports and the Harbour Master as soon as the vessel receives orders to proceed to the port. It is requested that the information should also be sent to the relevant Terminal Operator.

AA	Name of vessel.
BB	Former names.
CC	Port of registry, flag, call sign.
DD	LOA, G.R.T., N.R.T.
EE	Summer D.W.T., arrival D.W.T.
FF	Draft on arrival forward and aft.
GG	ETA.
HH	Last port.
II	Cargo on board and flash point, destination of cargo.
JJ	Cargo requirements.
KK	Previous cargo and quantity residues on board for load on top.
LL	IMO Class.
MM	Whether gas free or in an inert condition.
NN	Port of loading ballast and amount.
OO	Quantity of ballast loaded on passage.
PP	Quantity of segregated ballast on arrival.
QQ	Quantity of cargo tank ballast on arrival.
RR	Time for deballasting: Can ship load/deballast simultaneously?
SS	Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
TT	Agent's name.
UU	Maximum loading rate.
WW	Bunker requirements.
XX	Cargo manifold connections size.
YY	Bunker connections size.
ZZ	Derricks.

Gas Tankers: The following information must be sent to the Director Ports, the Harbour Master and Terminal Operator as soon as the vessel receives orders to proceed to the port.

AAG	Name of vessel, indicating any former names.
BBG	Port of registry, flag, call sign.
CCG	LOA, G.R.T., N.R.T.
DDG	Summer D.W.T., arrival D.W.T., arrival draft forward and aft.
EEG	Last port, ETA Yanbu.
FFG	Quantity of ballast on arrival: where loaded.
GGG	Quantity of dirty ballast on arrival.
HHG	Total cargo capacity in cubic metres. Cargo required.
IIG	Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
JJG	Are part cargoes to be commingled with Yanbu loadings?
KKG	Gauge pressures; top, bottom and mean temperatures of each cargo tank.
LLG	Quantity of coolant required in addition to cargo requirements.
MMG	Maximum allowable relief valve settings for all cargo tanks.
NNG	Have any cargoes other than LPG been carried during last 3 loaded voyages? Specify.
OOG	Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
PPG	If tank purging required specify whether: (a) Parallel or in series. (b) Liquid from shore direct to cargo tanks. (c) Liquid from shore to vessel's vaporisers. Specify vaporiser throughout in RLPG tonnes/hour.
QQG	If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hours and maximum temperature differential permitted between any two points in cargo tanks.
RRG	Available total capacity of ship's reliquefication plant for each nominated cargo product.
SSG	Type of ship's reliquefication system i.e., direct, cascade or other.
TTG	Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.
UUG	Maximum loading rate and approximate topping off rate.
VVG	Bunker manifold size. Bunker requirements.
WWG	Manifold presentation; function, ASA rating, size, from Forward.
XXG	Agent's name.
YYG	ICO ship type. Does vessel have valid certificates of fitness?
ZZG	Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.

HEALTH: *Quarantine:* In accordance with International practice, quarantine signals must be displayed by all vessels approaching the port. These signals must be displayed continuously until Pratique is granted.

Sunrise to Sunset – Quarantine Flag
Sunset to Sunrise – Signal lights
Red over white

VHF: *Port Control:* All the marine services and shipping movements within King Fahd Port at Madinat Yanbu Al-Sinaiyah Port Limits are monitored and controlled by "King Fahd Port Control", which is situated at Lat. 23° 57.4′ N., Long. 38° 13′ E. The station is manned 24 hours a day and maintains a continuous VHF watch. Information can be provided to Masters and Pilots on all navigational aspects, including wind and visibility, navigational aids and shipping movements within the port area. The station will also provide a liaison with the Terminal Operators and Emergency Services.

The following VHF channels are continuously available for use by Royal Commission Port Control.

Channel Designator	*MHz Frequency*	*Service*
16	156.800	International Calling and Distress
10	156.500	Port Operations – 1
11	156.550	Port Operations – 2
13	156.650	Port Operations – 4
68	156.425	Port Operations – 2
67	156.375	Pilotage/Berthing Operations
69	156.475	Pilotage/Berthing Operations
73	156.675	Pilotage/Berthing Operations
74	156.725	King Fahd Port Operations – Private

In the event of a Port Emergency, King Fahd Port Control will designate a channel for use during the period of the emergency.

RADAR: Harbour Surveillance Radar will be installed in the new Port Control Complex, and should be operational in 1984.

TUGS: There is no requirement for Masters to order tugs in King Fahd Port at Madinat Yanbu Al-Sinaiyah. The number of tugs to be used during berthing and on departure will be specified by the Harbour Master. If the Master wishes to appeal against the number of tugs allocated, he will do so to the Harbour Master, who will make the final decision.

Any tug whether owned, hired or chartered by the Royal Commission, when used for assisting a vessel, shall be deemed to be under the order and control of the Master, Owner or Charterers of the vessel being assisted. The Royal Commission shall not be liable for damage of any description or any consequential loss suffered by, or to, the tugs or their crews while assisting vessels, whether occasioned by any act or omission of Tug Master or crew or by any defect or inadequacy of the tug, machinery or gear.

Towing lines will be provided by the Royal Commission. Tugs will rendezvous with vessels bound for the NGL and crude terminals in the vicinity of No. 14 Buoy.

All tugs are fitted with foam and water monitors for fire fighting and spray booms for pollution dispersal work.

Royal Commission Craft: The following craft are currently available to service vessels using King Fahd Port at Madinat Yanbu Al-Sinaiyah.

No.	*Type*	*Length (m.)*	*B.P.*	*Speed (knots)*	*Names*
2	Tugs 5,600 h.p. Twin Screw Kort Nozzles	42.00	65	12.0	Radhwa 11, 12
3	Tugs 4,000 h.p. Voith Schneider	36.00	40	11.5	Radhwa 14, 15, 16
1	Tug 2,000 h.p. Voith Schneider	30.00	20	12.0	Radhwa 9
4	Pilot Launches	17.20	—	18.0	Ibn Majid 2,3,4,5
4	Mooring Launches	8.10	—	10.0	Ohod 1,2,3,4

Note: There are 3×5,600 h.p., 5×4,000 h.p. and 1×2,000 h.p. tugs in laid-up status which can be activated at short notice as required.

TANKERS:

Crude Oil Terminal:

The Crude Oil Terminal is a Saudi Arabian Government owned facility operated by ARAMCO. It serves as a tanker loading terminal for the 48 in. crude oil pipeline from Abqaiq in the Eastern Province to Madinat Yanbu Al-Sinaiyah. The incoming crude oil is stored in eleven floating roof oil tanks before it is pumped to tankers berthed at the Crude Oil Terminal. Each crude oil storage tank has a nominal capacity of approximately 1,000,000 barrels, with a working capacity of approximately 850,000 barrels.

The Crude Oil Terminal consists of a jetty trestle with 3 loading berths connected to shore by a free-standing trestle and a causeway. All 3 loading berths are fixed structures with fixed loading platforms, breasting dolphins, and mooring dolphins.

Berth Particulars:

Berth No. 61:

Tanker Size (approx.)	80,000-275,000 d.w.t.
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth No. 1	92 ft. ISLW
Maximum Draft	83 ft.
Loading Arms (number and size)	4×20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Fuel Arms (number and size)	2×12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate Per Loading Arm	37,500 b.p.h.
Max. Rate Per Bunker Arm	14,500 b.p.h.
Number of Breasting Dolphins	4
Number of Mooring Dolphins	4
Available Mooring Hooks	24 (SWL @ 70 M/T)
Distance Between Centre of Inner Breasting Dolphins	239 ft. (73 m.)

Berth No. 62:

Tanker Size (approx.)	275,000-500,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	105 ft. ISLW
Maximum Draft	95 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Maximum Rate per Loading Arm	37,500 b.p.h.
Maximum Rate per Bunker Arm	14,500 b.p.h.
Number of Breasting Dolphins	2
Number of Mooring Dolphins	6
Available Mooring Hooks	26 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	449 ft. (137 m.)

Note: Tankers of less than 275,000 d.w.t. may be accepted if the light water line flat size forward and aft of the manifold is at least 75 m. (246 ft.)

Berth No. 63:

Tanker Size (approx.)	120,000-275,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	90 ft. ISLW
Maximum Draft	81 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Maximum Rate per Loading Arm	37,500 b.p.h.
Maximum Rate per Bunker Arm	14,500
Number of Breasting Dolphins	2
Number of Mooring Dolphins	5
Available Mooring Hooks	23 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	420 ft. (128 m.)

Note: Tankers of less than 120,000 d.w.t. may be accepted if the light water line flat size forward and aft of the manifold is at least 70 m. (230 ft.).

Only two berths of the Crude Oil Terminal can be loaded at the same time. Maximum loading rate to two crude berths simultaneously is 300,000 b.p.h. through 8 × 20 in. loading arms.

Environmental Monitoring System: An environmental monitoring system is installed at Berth No. 61 dock control room with repeater units located in dock control rooms at Berths 62 and 63. The system indicates wind velocity and direction, atmospheric pressure and temperature, current velocity and direction, and wave height and period.

Berthing Criteria:

Maximum berthing velocity: 20 cm./sec.
Maximum approach angle: 7°

For berthing and unberthing purposes, wind, sea, and current conditions have to be within acceptable limits, so that during the final docking the maximum berthing velocity and maximum approach angle is not being exceeded.

Mooring Arrangements: Each mooring dolphin, breasting dolphin, and loading platform is equipped with either double or triple quick-release mooring hooks and with a mooring capstan.

The terminal will furnish a required mooring arrangement for the loading berth to which the vessel is nominated. The mooring diagram shows the number of mooring hooks provided for each berth consecutively numbered from North to South. These mooring hooks are designed to service one mooring line per hook.

Port mooring launches will be used to assist during mooring operations.

The terminal will provide suitable messengers for heaving in mooring lines.

In order to ensure the integrity of the offshore terminal facilities, it is recommended that VLCC's provide an all wire mooring arrangement and that tankers in the 50 to 160 MDWT range provide mooring wires at least for their spring mooring lines and breast mooring lines. The recommended minimum number of wire moorings is as follows:

50,000 – 160,000 d.w.t. tankers:	8 mooring wires
160,000 – 250,000 d.w.t. tankers:	10 mooring wires
250,000 – 350,000 d.w.t. tankers:	12 mooring wires
350,000 plus d.w.t. tankers:	14 mooring wires

VLCCs with an all synthetic mooring system will be accepted if the synthetic mooring lines consist of low elasticity material.

All mooring lines should be of similar size and material and must be in good condition. Manual brakes have to be set and to be secured on all tension winches once the tanker is moored. Ship's crew must tend all moorings to keep the ship in position and mooring lines have to be taut at all times.

Each loading berth is equipped with a mooring load monitor/hook release system. The system is designed to monitor the loads on each mooring hook and to provide an alarm should the loads on a mooring hook exceed the system's set points. Berth operating personnel will monitor the mooring loads and, based on the read-outs they will advise the responsible officer who is expected to immediately correct any undesirable mooring situation.

The mooring load monitoring system does not relieve the vessel's Master from his responsibility to ensure adequate and safe mooring at all times when berthed alongside the Crude Oil Terminal.

Gangway: The Crude Oil Terminal will provide a gangway to the ship at each berth.

Each loading platform has a gangway tower equipped with a self-adjusting gangway. The gangway provides access to and from the tanker and is the only permissible means for any personnel to enter or leave the ship.

Loading: *Loading Arms:* There are four 20-inch crude oil loading arms at each of the loading platforms at Berth Nos. 61, 62 and 63. Each crude oil loading arm is capable of handling 37,500 b.p.h. maximum. The maximum flow rate per berth is 150,000 b.p.h., using 4 arms.

The hydraulic controls for the loading arms are located at the control desk on the loading platform adjacent to the loading arms. All loading arms are fully hydraulic powered and counter-balanced when empty. Each loading arm is fitted with a "Quick Disconnect Cargo Coupler" and a minimum distance of 18 in. is required between the lowest point of the ship loading line flanges to the upper level of the working platform of the spill tank.

All loading/bunker connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Loading Plan Agreement: Prior to loading, the Terminal Supervisor will contact the officer in charge for the loading operation on board the tanker and discuss and agree on the loading plan.

The loading plan consists of:

(a) Maximum acceptable loading rates, starting rates, topping off rates, and standby notice requirements. (During loading, all anticipated changes in cargo transfer rates are to be communicated in a timely manner to ship or shore).
(b) Cargo quantities required by tanker's Master and comparison with terminal loading instructions.
(c) Cargo characteristics, required samples and tests.
(d) Assignment of cargo to vessel tanks and preferred order of loading.
(e) Ballast conditions and deballasting time.
(f) Load-on-top procedures.
(g) Quantity of slop oil on board and quantity of free water in slops.
(h) Quantity of bunkers ordered prior to arrival.
(i) Estimated loading time required and estimated departure time.

Crude Oil Characteristics:

Arabian Light

Temperature	120°–150°F
API Gravity	33.2–33.8
Reid Vapour Pressure	3.6–5.0 PSIA
Pour Point	Below 20°F
Viscosity	57 SUS @ 70°F
BS&W	Less than 0.05%
H_2S	Less than 10 PPM

Hydrogen Sulphide Hazards (H_2S): Arabian crude loaded at the Offshore Marine Terminal has been treated for H_2S removal prior to shipping.

However, the crude oil may still contain Hydrogen Sulphide in concentrations which may be harmful to personnel. Personnel on board tankers who may be exposed to concentrations of H_2S gas should observe safety precautions applicable to harmful gases.

Slop Residues: Slop residues cannot be discharged ashore at Petroline's crude oil terminal.

Cargo Tank Inspection: ARAMCO personnel will not inspect cargo tankers or issue dry certificates prior to loading. If Owners/Charterers require tank inspection or dry certificate, arrangements should be made with their Agent for an independent oil inspector.

Tankers which arrive with all tanks inerted must enable ullage inspections of all cargo tanks to be carried out prior to start of cargo transfer operations and after completion of cargo transfer operations.

If the tanker requests load-on-top procedures, measuring of the quantity of oil and water in the slop tank(s) will be witnessed by the Terminal Supervisor.

Loading Signal: During loading the international code flag "B" shall be displayed during daylight hours. During darkness a red loading light shall be displayed.

Watches: During the entire stay of the vessel alongside the Crude Oil Terminal, a deck watch is required.

NGL TERMINAL: The NGL Terminal is a Saudi Arabian Government owned, ARAMCO operated facility designed to load refrigerated liquid petroleum gas (propane and butane) and naphtha product for export. LPG carriers range in size from approximately 25,000 cu.m. to 200,000 cu.m. Naphtha carriers range from 20,000 d.w.t. to 280,000 d.w.t.

The NGL shore complex consists of fractionation, refrigeration and storage facilities. Product storage for LPG consists of seven insulated dome-roof tanks of 600,000 bbls. (95,400 cu.m.) capacity each. Three are dedicated to propane service, three to butane, and one can switch service between either propane or butane. There are three naphtha product floating-roof storage tanks of 600,000 bbls. (95,400 cu.m.) capacity each. In addition to the LPG and naphtha product tanks, there are three ship's fuel cone-roof storage tanks. One 97,000 bbls. (15,400 cu.m.) tank is dedicated to bunker fuel service and a 24,000 bbls. (3,800 cu.m.) tank is dedicated to black diesel service. The third tank has a capacity of 55,000 bbls. (8,700 cu.m.) and can switch service between either bunker fuel or black diesel.

Terminal Facilities: A 1.85 km. long earth-fill causeway and a 1.15 km. pile-supported trestle connect the shore plant to a two berth L-shaped offshore loading facility. The trestle carries a pipeway for the product, bunker and utility lines, and a 1.5 m. wide pedestrian walkway. There is no vehicular access to the piers. Normal personnel and material access to the piers is by boat.

The two loading berths are situated on the offshore side of the base of the "L". Berth 71 is the Southerly berth and Berth 72 is the Northerly berth. Berth alignment is 290° true bearing. A tower crane is located in the middle of each loading platform. Reading from North to South the seven loading arms are designated for the following service; Naphtha, ship's fuel, LPG (four arms), and ship's fuel. All LPG arms are universally manifolded to permit propane or butane liquid loading; or propane, butane or contaminated vapour return. Bunker fuel or black diesel can be loaded through either or both 12 in. ship's fuel arms which flank the LPG loading station. The naphtha arm is capable of delivering naphtha product and receiving small amounts of naphtha slop, which will be disposed of onshore. There are no shore-based ballast handling facilities.

Berth Facilities:

Tanker size (approx.)	16,000 – 200,000 cu.m.
Deck Level of Loading Platform	56 ft. ISLW
Depth Alongside Berths (min.)	60 ft. ISLW
Max. Draft	53 ft. 02 in. (16.2 m.)

Loading Arms

	Number/Size	*Quick Disconnect Couplings:*
(a) Ships' Fuel	2 × 12 in.	8 in. × 10 in. × 12 in.
(b) Naphtha	1 × 16 in.	12 in. × 14 in. × 16 in.
(c) LPG	4 × 16 in.	12 in. × 14 in. × 16 in.

Maximum loading rate:

(a) Ships' Fuel	
1. Diesel	650 bbls.p.h.
2. Bunker Fuel	5,000 bbls.p.h.
(b) Naphtha	30,000 bbls.p.h.
(c) LPG	30,000 bbls.p.h.

Number of Breasting Dolphins	2
Number of Mooring Dolphins	6
Available Mooring Hooks	42
Distance between centre of Breasting Dolphins	300 ft.

Condition of Ship's Products Tanks: The ARAMCO facilities for loading LPG are not designed for loading pressurised cargoes and LPG will not be loaded into a tanker which does not have adequate shipboard refrigeration capacity and chilled tanks.

Mooring Lines and Arrangements: In order to ensure the safety of personnel, tankers and loading facilities, and to prevent accidental oil spillages, ARAMCO strongly recommend that tankers of 75,000 d.w.t. and larger which moor at NGL Terminal berths utilise a minimum of 8 to 12 wire mooring lines (breasts and springs) in accordance with the following:

75,000 to 160,000 d.w.t. : 8 wire lines
161,000 to 250,000 d.w.t. : 10 wire lines
Greater than 250,000 d.w.t. : 12 wire lines

Vessels equipped with both wire and synthetic mooring lines must avoid mixing such lines to the same dolphin. During periods of unsettled weather, arriving vessels fitted with sufficient wires will be preferentially berthed whereas vessels equipped with synthetic lines or too few wire lines will not be berthed until the weather improves. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation. The use of nylon or other highly elastic line is prohibited.

Each mooring dolphin and breasting dolphin is equipped with triple quick-release mooring hooks and with a mooring winch.

Vessels must be moored to the entire satisfaction of the Pilot. Vessels must be ready at all times to put out more lines as required by the Harbour Master or pier personnel, or as dictated by weather changes. All vessels moored to the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches will set the manual brakes on these winches.

Pier crew are on duty continuously to handle loading arms and mooring lines. Mooring lines on board vessels will not be handled by shore personnel.

All loading connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Gangway: The NGL Terminal will provide a gangway to the ship at either berth. Each berth has a gangway tower equipped with a self-adjusting gangway for access to and from the ship, and this is the only permissible means for any personnel to enter or leave the ship.

Loading Plans: After a tanker is secured at the berth and prior to the beginning of any loading operation, the Master (or a ship's officer designated by him) will meet with the NGL Terminal senior shift operations representative in order to discuss and prepare the vessel's loading plan. Items to be discussed will include, but not be limited to, the following:

1. Temperature and pressure of each of the ship's tanks.
2. Product to be loaded in each tank and the sequence of tank loading.
3. Quantity and type of product, if any, in each ship's tank, and whether it is a part cargo or residue required for tank cooling.
4. Loading rates of each product.
5. Safety procedures and safe loading practices.

All clean excess vapours which cannot be handled by the tanker's vapour recovery equipment will be metered to the shore-based vapour recovery system and reprocessed. Contaminated vapours will be metered to the flare.

Refrigerated LPG: Refrigerated LPG is loaded via 16 in. loading arms. The maximum loading rate for each product is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return to a ship's vapour recovery unit, or contaminated vapours to flare. All 8 LPG loading arms are fitted with quick connect/disconnect couplers. Each LPG loading line has an associate circulation return line. Loading lines must be on circulation at least 4 hours prior to commencement of loading. No two ships are loaded from one loading line simultaneously.

The NGL Terminal facilities ARE NOT designed for loading pressurised LPG and NO LPG will be loaded into ship's tanks that are not equipped with refrigeration facilities and are not adequately chilled.

Vapour line MUST be connected prior to loading LPG cargo. This also includes those vessels loading coolant.

Before being transferred from the loading line to the loading barrel and arms, the propane and butane products are metered. The metering system is designed for loading rates between 100 bbls.p.h. and 30,000 bbls.p.h. for each product.

A 3 in. turbine type meter with a capacity of 79 bbls.p.h. – 929 bbls.p.h is provided for low loading rates such as cooldown and topping off.

An 8 in. turbine type meter with a capacity of 679 bbls.h.p. – 7,420 bbls.p.h. is provided for full flow rates.

Every vessel loading LPG at the NGL Terminal will be required to have a copy of ARAMCO GASRUL 9:83 on board. When a copy is not on board prior to arrival ARAMCO and the Agent of the vessel shall be so advised. Extracts of the regulations are included for information as follows:

1. *Propane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of −38°F or −39°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the Maximum Allowable Tank Filling Level (MATFL), and excluding any temperature indicated in the cargo tank dome vapour space, is −13°F or −25°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome vapour space is −8°F or −22°C.
2. *Butane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of +32°F or 0°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the MATFL and excluding and temperature indicated in the cargo tank dome vapour space, is +57°F or +14°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome space is plus 62°F. or plus 17°C.
3. The cargo tank gauge pressure not more than 1.0 p.s.i. or 70 MBS or 0.07 kg./sq.cm. on arrival at berth. During cargo operation the pressure of any cargo tank shall be maintained within the range between zero gauge minimum (atmospheric pressure) and a maximum which shall not exceed 70% of the maximum allowable relief valve setting for that cargo tank or such other lesser maximum percentage as may be determined by ARAMCO for a particular vessel.
4. Butane may be loaded into ship tanks containing residue up to 10% of the cargo to be loaded.
5. Propane may be loaded into ship tanks containing propane residue up to 10% of the cargo to be loaded.
6. Butane or propane may be loaded into ship tanks containing part cargo of the same grade only by authorisation of the offtaker. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.
7. Should the vessel be unable to comply with the provisions of paragraphs 4 and 5, ARAMCO operations management representatives shall confer with the vessel Master and/or Responsible Loading Officer to develop a loading procedure for the safest possible loading for the tank(s) containing dissimilar residue. The procedure shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimising the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on the shore and ship personnel.
8. IN NO CASE WILL LOADING BE PERMITTED INTO SHIP TANKS CONTAINING LIQUID PRODUCT OF A DIFFERENT GRADE IN EXCESS OF TEN TONS.
9. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to Owners and Operators.
10. Refrigerated LPG vessels with warm cargo tanks can be handled at the ARAMCO NGL Terminal. When special circumstances warrant, new ships and other vessels with warm tanks may be accommodated but will be subject to specific conditions.
11. Vessels with part cargo on board of products other than A-140 propane or A-160 butane must be equipped to keep any liquid or vapour completely self-contained from those cargo parcels. There must be no return of non-compatible vapour to atmosphere while at berth. *No mixing of dissimilar refrigerated liquids is allowed at berth.*
12. Vessels loading either propane or butane are expected to use the appropriate vapour return line but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Excessive vapour will be metered to a shoreside ship's vapour recovery system. If the excess vapour cannot be handled by using both systems, the vapour will be sent to flare. If the situation cannot be corrected promptly aboard ship, the loading shall be shut down. Loading shall be resumed only after the loading plan has been reviewed with the Master or Responsible Loading Officer by the senior shift operations representative and corrective action has been agreed upon.
13. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until corrective action to clean up the spill and to avoid future recurrence has been agreed upon by the Master or Responsible Loading Officer, the shift operations staff and the Harbour Master.
14. There are no facilities at the NGL Terminal for the return of either liquid propane or liquid butane cargo. Vessels must pay strict attention not to overload either of these grades.

Emergency Procedures: In the event of a fire or explosion at the pier, or on board a vessel which is berthed alongside at the Terminal, the alarm signal will be a one minute undulating signal on the siren and an Emergency Shutdown System will be activated to shutdown immediately all cargo loading to vessels at the berths. The course of action to be followed by ARAMCO Terminal personnel will be dictated by the particular facts and circumstances of the incident. It is impossible to indicate exactly and completely what practices will be applied during an emergency before an evaluation of the specfic situation can be made. Masters are advised to familiarise themselves with the Port and Terminal Emergency Procedures.

YANBU PETROMIN REFINERY TERMINAL: The Yanbu Petromin Refinery Terminal is currently under construction. The completion date is forecast for August 1985. The Refinery is owned and operated by the General Petroleum and Mineral Organisation (PETROMIN). When completed there will be 4 berths; the 2 outer berths, Nos. 1 and 2 (West to East), will accommodate vessels with 20,000 to 60,000 d.w.t. capacity; and the 2 inner berths, Nos. 3 and 4 (West to East), will accommodate vessels up to 20,000 d.w.t. capacity.

The channel adjacent to the outer berths has been dredged to a depth of 16 m. below LAT. The turning circle and approach area for the inner berthing area has been dredged to 13.5 m. below LAT. Alongside the two inner berths the water has been dredged to 11.5 m. below LAT.

There are 8 loading arms at each berth to accommodate export of product. At Berth No. 4 there will be 4 additional loading arms to accommodate LPG, LPG (recovery), tetra-ethyl lead and caustic.

A temporary offshore floating hose loading facility is being used pending completion of the terminal. 6 mooring buoys have been anchored in the turning basin area and a tanker can be moored within these buoys. Tankers up to 35,000 d.w.t. can be accommodated.

There is no ballast water reception facility available at this Terminal.

EXPORT REFINERY TERMINAL: The Export Refinery Terminal has 2 separate loading facilities.

A tanker loading facility consisting of 3 berths for bulk petroleum liquids is operated under a lease agreement with the Royal Commission by PETROMIN-Mobil Yanbu Refinery Company Limited (PEMREF).

A chemical loading facility with 1 berth is operated under a lease agreement with the Royal Commission by Saudi Yanbu Petrochemical Company (YANPET).

PEMREF Facilities Particulars:

1. The Short Haul Berth numbered Royal Commission Berth No. 42 is located in the inner basin. It consists of a fixed loading platform with semi-flexible mooring and breasting dolphins. The berth will accommodate tankers from 5,000 d.w.t. to 35,000 d.w.t.
2. A ballast water treatment facility is located adjacent to Berth No. 42 and is capable of processing ballast water from tankers loading at the Export Refinery Terminal including the Chemical Berth.
3. The inner basin has been dredged to a depth of 13.5 m. below LAT. A turning basin with a diameter of 400 m. allows for ready access to the basin.
4. There is a jetty trestle with 2 outer loading berths connected to the shore by a free standing trestle and causeway. The 2 loading berths are fixed structures with fixed loading platforms and semi-flexible mooring and breasting dolphins. These berths named Suez Berth West and Suez Berth East are numbered Royal Commission Nos. 54 and 55. They are capable of handling tankers up to 150,000 d.w.t. in size. The water depth alongside these 2 berths has been dredged to 18.5 m. below LAT.

PEMREF Berth Particulars:

1. Short Haul Berth No. 42:

Min. Size Vessel:	5,000 d.w.t.
Max. Size Vessel:	35,000 d.w.t.
Deck Level of Loading Platform:	5.0 m./16.4 ft.
Depth Alongside Berth:	13.50 m./44.28 ft.
Max. Draft:	12.15 m./39.85 ft.
Loading Arms (number and size):	2×10 in. – Black Products/Ballast 4×12 in. – White Products
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in., 16 in.
Bunker Fuel Arms (number and size):	2×6 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in.
Max. Rate per Loading Arm:	10 in. – 1,430 cu.m./hr. 12 in. – 1,590 cu.m./hr.
Max. Rate per Bunker Arm:	Heavy Fuel 480 cu.m./hr. Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins:	4
Number of Mooring Dolphins:	4
Available Mooring Hooks:	20
Distance between Centre of	33.0 m./108.25 ft.
Inner Breasting Dolphins:	Port
Normal Shipside to Berth:	Yes
Shore Gangway Provided:	
Waterline to Manifold:	12.80 m./42 ft.
Max. Height:	2.59 m./8 ft. 6 in.
Min. Height:	0.25 m./sec.
Max. Approach Velocity:	±5 degrees
Max. Approach Angle:	

Suez Berths West and East – Berth Nos. 54 and 55:

Min. Size Vessel: (see Note No. 1)	30,000 d.w.t.
Max. Vessel Size:	150,000 d.w.t.
Deck Level of Loading Platform:	7.0 m./22.96 ft.
Depth Alongside Berth:	18.50 m./60.28 ft.
Max. Draft:	16.65 m./54.60 ft.
Loading Arms (number and size):	7×16 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in., 16 in.
Bunker Fuel Arms (number and size):	2×10 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in.
Max. Rate per Loading Arm:	Heavy Fuel – 4,378 cu.m./hr. White Products – 1,590 cu.m./hr.
Max. Rate per Bunker Arm:	Heavy Fuel 1,590 cu.m./hr. Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins:	4
Number of Mooring Dolphins:	4
Available Mooring Hooks:	20
Distance between Centre of Inner Breasting Dolphins:	56.0 m./183.7 ft.
Normal Shipside to Berth:	Starboard
Shore Gangway Provided:	Yes
Waterline to Manifold:	
Max. Height:	19.00 m./62 ft. 4 in.
Min. Height:	4.50 m./14 ft. 9 in.

Note 1: Tankers of less than 30,000 d.w.t. may be accepted at the Suez Berths if the light water line flat side forward and aft of the manifold is at least 34.0 m./111.5 ft., and subject to weather conditions.

Max. Approach Velocity:	0.18 m./sec.
Max. Approach Angle:	±5 degrees

YANPET Facilities Particulars: There is one chemical berth numbered Royal Commission No. 41 located in the inner basin. It can accommodate tankers from 5,000 to 35,000 d.w.t. The turning circle into the inner basin is 400 m. in diameter and is dredged to 13.5 m. below LAT.

The facilities are designed for the export and import of petrochemical products; these include: mono-ethylene glycol (MEG), di-ethylene glycol (DEG), glycol blackflush, hexene, vapour return, propylene, process water, and caustic soda.

Ballast Water Facility: The Export Refinery Terminal incorporates a ballast water facility which is capable of processing ballast water from vessels loading at the 4 berths at the terminal.

The facility has 3 initial storage tanks of 50,000 cu.m. each, which will receive ballast water direct from the tankers.

Ballast water is passed through the facility's separator system; clean water is then passed to retention ponds prior to being pumped to sea, and recovered oil is passed to the recovered oil system.

All ballast water handled at the facility is monitored to ensure compliance with current environmental standards and requirements.

Bunkers: Bunker fuel is available at each of the Export Refinery Terminal's 4 berths, the bunker fuel being supplied from the Royal Commission central bunkering facility. Heavy fuel oil and diesel fuel oil are available, and should be requested in advance of a tanker's arrival at the port.

Berthing Criteria: Max. Berthing Velocity:

Chemical Berth:	0.25 m./sec.
Short Haul Berth:	0.25 m./sec.
Suez Berth West:	0.18 m./sec.
Suez Berth East:	0.18 m./sec.
Max. approach angle:	±5 degrees

Environmental conditions such as current, wind speed and sea state, should be considered in ensuring the above maximum criteria is not exceeded at final docking stage.

Mooring Arrangements: Each mooring dolphin, outer breasting dolphin and loading platform is equipped with either double or triple quick release mooring hooks, each combination of double or triple hooks having a mooring capstan with safe working load of 3 tons.

The terminal will provide a required mooring arrangement for the loading berths. The mooring arrangement shows the number and position of the mooring hooks provided on each berth. The mooring hooks are designed to handle 1 mooring line per hook.

Mooring boats will be utilised to run mooring lines to the mooring dolphins from the tanker. The terminal will provide suitable messenger lines for heaving the mooring lines to the hooks.

In order to ensure the integrity of the berth facilities it is recommended that tankers in the 50,000 d.w.t. to 150,000 d.w.t. range provides mooring wires at least for their spring and breast mooring lines. The recommended minimum for tankers from 50,000 d.w.t. – 150,000 d.w.t. is 8 mooring wires.

Tankers with the recommended mooring wire systems will be given berthing preference during adverse or unsettled weather conditions.

All mooring lines should be of similar size and material and should be in good condition. Manual brakes must be set on tension winches when mooring is completed. The ship's crew must tend moorings at all times to maintain the ship's position at the berth.

Under no circumstances may the longitudinal or lateral movements of a vessel exceed the limited working envelopes (working areas) of the connected loading arms.

Docking Monitoring System: A system of velocity and distance indicating and recording instruments are provided for the 4 berths. The transducers are positioned on the berth structure with electronic equipment housed in the control room. An illuminated display is located on the berth structures to provide an indication of fore and aft ship distance and approach speed to the ship's Pilot.

Gangway: The Export Refinery Terminal will provide a gangway to the ship at each berth. Each berth is equipped with a hydraulically operated self adjusting gangway. The gangway provides the only permissible means of access to and from the tanker.

Ballast Water: Tankers arriving at the Export Refinery Terminal with clean ballast, which meets the current environmental standards of King Fahd Port, will be allowed to discharge the ballast water direct to the sea.

The discharge of clean ballast water into the sea from cargo tanks will only be permitted with the approval of the Harbour Master or his designated representative.

A monitoring procedure will be employed during the discharge of clean ballast to ensure quality is maintained.

Tankers arriving with "dirty ballast" or ballast which does not meet the port requirements must discharge ballast to the Terminal's ballast facility.

Details of this operation will be agreed with the Terminal operator when 'operation agreement' is made.

Slop Residues: Slop oil may be discharged to the ballast reception facilities consistent with content restrictions. Slop residues containing chemicals or emulsifying agents may not be accepted.

Prior to arrival at the Terminal, vessel's Master must request use of this facility giving following details:

1. Total quantity to be discharged.
2. Quantity of oil.
3. Quantity of water.
4. Type of chemicals contained if any.

Loading Arms – Chemical Berth – Berth No. 41: The Chemical Berth is equipped with 8 loading arms, 2×10 in. diameter, 5×6 in. diameter and 1×4 in. diameter as detailed below:

Arm Size	*Product*
6 in.	Hexene.
6 in.	Propylene.
10 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)/Ballast Water.

Arm Size	*Product*
10 in.	Mono-ethylene Glycol (MEG).
6 in.	Glycol Backflush.
6 in.	Die-ethylene Glycol (DEG).
4 in.	Caustic Soda.
6 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Short Haul Berth No. 42: The Short Haul Berth is equipped with 6 loading arms, 4×12 in. and 2×10 in. as detailed below. 2×6 in diameter bunker loading arms are also provided.

Arm Size:	*Product*
10 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Marine Heavy Fuel Oil/Ballast Water.
6 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
6 in.	Diesel Fuel Bunkers/Heavy Fuel Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Suez Berths West/East – Nos. 54 and 55: The Suez Berths are each provided with 7 loading arms of 16 in. diameter and 2 bunker fuel loading arms of 10 in. diameter, as shown below:

Arm Size	*Product*
16 in.	Marine Heavy Fuel Oil/Ballast Water.
16 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
16 in.	Naphtha/ADO.
16 in.	Leaded Gasoline Unleaded Gasoline.
16 in.	Jet Fuel.
16 in.	ADO/Naphtha.
16 in.	Leaded Gasoline/Unleaded Gasoline.
10 in.	Diesel Fuel Oil Bunker/Heavy Fuel Oil Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically operated from a centrally located operating panel. A wandering control lead is also available for remote use when connecting arms to ship's manifold.

Grounding: All cargo/bunker loading connections are equipped with electrical insulating flanges, and therefore ships to shore bonding is not necessary.

Maximum Loading Rates:

Short Haul Berth No 42		
Heavy Fuel Oil	2,860 cu.m./hr.	18,000 bbls./p.h.**
Leaded Gasoline	3,180 cu.m./hr.	20,000 bbls./p.h.**
Automotive Diesel Oil	3,180 cu.m./hr.	20,000 bbls./p.h.**
Jet Fuel	3,180 cu.m./hr.	20,000 bbls./p.h.**
Heavy Fuel Bunker	480 cu.m./hr.	3,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.
Suez Berth Nos. 54 and 55		
Heavy Fuel Oil	8,756 cu.m./hr.	50,000 bbls./p.h.**
Leaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Unleaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Naphtha	5,170 cu.m./hr.	32,500 bbls./p.h.
Automotive Diesel Oil	5,170 cu.m./hr.	32,500 bbls./p.h.
Jet Fuel	5,170 cu.m./hr.	32,500 bbls./p.h.
Heavy Fuel Bunker	1,590 cu.m./hr.	10,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.

Note: Loading rates for products marked ** are for 2 loading arms availability; rates should be halved to indicate rate per loading arm.

PEMREF Operational Agreement: Prior to any operational activity after a tanker is moored, an "Operational Agreement" will be made between the ship's responsible cargo officer and the terminal representative. The Operational Agreement requires an exchange of information between the ship and terminal covering the following items:

1. Grades and quantities of cargo/bunkers required.
2. Loading rates and quantities per grade for start, maximum and topping off.
3. Standby time required for stopping loading and slow down for each grade.
4. Ballast quantity to be discharged to sea or ballast facility.
5. Slop residues to be discharged to facility.
6. Manifold connections/loading arms to be used for each operation.
7. Sequence of loading different grades/products.
8. Estimated time required to carry out each operation, to give total expected load time.
9. Information regarding (a) Communications, (b) Emergency Shutdown Procedures, (c) Tank Venting System, (d) Maximum pressures allowed, etc.
10. Has ship/shore safety checklist been completed.

Ship/Shore Safety Checklist: Prior to operations on board tankers at the Terminal berths a 'Ship/Shore Safety Checklist' will be completed by both ship and Terminal representatives who will together inspect the necessary items listed. Further checks will be made at intervals throughout the vessels time at the berth.

Safety Requirement Letter: The Master of each tanker will be given letter concerning safety requirements. Receipt of the letter has to b acknowledged by signing and returning a copy of the letter to th Terminal representative.

Sea Valves: All sea-valves and overboard valves connected to th tanker's cargo system have to be closed and lashed prior commencement of cargo transfer operations.

Loading Signal: During loading the international code flag "B" shall b displayed during daylight hours. During darkness a red loading lig shall be displayed.

Shore Emergency Signals: Continuous sounding of vessel's fog signa

Emergency Towing Wires: While at the Terminal, tankers have provide emergency towing wires of adequate strength to move th tanker off the dock. The towing wires are to be positioned on th offshore bow and stern quarter of the tanker and the outboard ey should be maintained approximately 1 m. above water level at all time

Emergency Pilot Boarding: A pilot ladder of sufficient length should b at all times on standby at the offshore side of the tanker's main deck. an emergency the pilot ladder should be lowered to 3 ft. above the wat line to enable boarding of the Pilot if this should become necessary.

GENERAL CARGO AND CONTAINER TERMINAL: This facility situated to the North of the Crude Oil Terminal. It has 7 berths along 1,784 m. wharf. The berths are scheduled to become progressive operational from April 1984 to the end of 1984. These include berths fo Ro-Ro, heavy lift, conventional general cargo and cellular containe vessels. Protected by a natural reef, the berths will becom progressively operational with completion planned by the end of 198 The channel inside the barrier reef has been dredged to 14 m. belo LAT and there are 2 turning basins at either end of the 2 km. ber frontage.

The Ro-Ro facility, adjacent to Berth No. 1, situated at the Norther end of the berth frontage, with a dredged depth of 14 m. below LAT operational. A permanent ramp with a 1:25 gradient and an overal wid of 34 m. is located at right angles to the berth frontage. Horizont "Sumimoto" fendering is fixed to the ramp face at a height of 0.75 above LAT. The deck of the ramp is 2.0 m. above LAT rising to 2.36 m 3.0 m. inshore from the ramp face. Three bollards, each rated 90 tonnes are positioned either side of the ramp deck, providing a cle width of approximately 31 m. Additional bollards, also rated 90 tonnes, are situated on the berth frontage, the first 30 m. South of th ramp face and thereafter at approximately 30 m. intervals. "Sumimot 'pie' type fendering, spaced at 10 m. intervals, is provided on the ber frontage.

The maximum uniform live loads on the Ro-Ro ramp 6.25 tonnes/sq.m. The maximum concentrated load is 1,100 tonne when used on a Scheurle platform trailer, which provides for 28 tonnes maximum axle load with a maximum load on a contact area 200 m. × 455 mm. of 7 tonnes: or 60 tonnes on 0.3 m. × 0.3 m. (as fro 20 ft. containers stacked 3 high): or, 91 tonnes on 0.6 m. × 0.5 m. (from 40 ft. containers stacked 3 high): or, 80 tonnes front axle load of container fork lift truck. 3×40 tonne container cranes will ultimately available to support container operations.

Cargo is being handled by Royal Commission stevedores who a currently working one shift of 12 hours, 7 days per week. There a 3 container gantry cranes which will commence operations Novemb 1984.

Particulars of the container cranes are:

Safe working load	40 tons
Out-reach	34.5 m.
Hoisting height above rail	26.0 m.
Elevation of wharf above MHW	3.17 m.

Cycle time is 90 secs. or 40 containers per hour.

The 3 container cranes are numbered 1, 2 and 3 from the Ro-Ro ram end. The berthing arrangements are:

	Length of Wharf
Berth No. 1 Ro-Ro Terminal	200 m.
Berth No. 2 Container Terminal	300 m.
Berth No. 3 General Cargo	200 m.
Berth No. 4 Heavy Lift	180 m.
Berth No. 5 General Cargo	180 m.
Berth No. 6 General Cargo	180 m.
Berth No. 7 General Cargo	180 m.

A minimum clearance of 15 m. between vessels at adjacent berths required during berthing/unberthing operations.

BULK TERMINAL: The Bulk Terminal consists of a wharf 500 m. length with 2 dry bulk berths, Nos. 21 and 22. The wharf is 33 m. wid and can accommodate bulk carriers up to 60,000 d.w.t. The water off th wharf is dredged to 15.5 m. below LAT.

PETROMIN-Mobil Yanbu Refinery Company Limited (PEMREF) w produce approximately 230 tons of "prilled" sulphur per day, whe operating at full capacity.

The sulphur is to be transported by truck from the refinery storag area to silos located at the Royal Commission's Bulk Termina A 1 m. wide conveyor belt runs from the silos to a slewing arm loader o the dock.

Storage at the Terminal comprises 3 large silos with a combine normal working capacity of 13,200 tons and max. capacity 15,000 tons.

PEMREF's sulphur loading equipment is located at the Bu Terminal's "Sulphur Berth" (Royal Commission Berth No. 21) and capable of loading prilled sulphur at a maximum rate of 420 t.p.h.

A slewing arm loader is designed to operate along the face of th sulphur dock to any hold of vessels up to 30,000 d.w.t., without requirin movement of the ship.

Ships mooring at the Bulk Terminal will be required to provid gangway access to ship.

CONSTRUCTION SUPPORT TERMINAL (No longer active): This was the first terminal constructed at Madinat Yanbu Al-Sinaiyah. It was designed specially for the discharge of construction cargoes for those companies engaged in the construction of Madinat Yanbu Al-Sinaiyah and King Fahd Port. It is no longer active since all cargo operations are now conducted at the General Cargo and Container Terminal. However, in the event of a special need it could be reactivated.

The Construction Support Terminal lies just to the South of the Yanbu Petromin Refinery in position: Lat. 23° 54.5′ N., Long. 38° 17.8′ E. It consists of a trestle and pier lying in a 320° – 140° (T) direction and a beach-head heavy lift facility. Both pier and trestle are pre-engineered steel barges jacked up on pile foundations.

Vessels may berth either side of the Pier, which has a width of 30 m. and is 5 m. above ISLW. The length of the outer side is 270 m. while the inner berth length is 250 m. The water depth off the inner and outer berths is 18 m. below LAT. The water depth off the beach-head is 6 m. below LAT.

Each berth is protected by Bridgestone fendering spaced at 10 m. intervals. 6 single leg straight 75 ton capacity bollards, and 6×20 ton capacity staghorn type bollards are provided on each berth and spaced alternately at 20 m. intervals. Where possible, mooring ropes should only be placed on 75 ton capacity bollards. The berthing energy of the Pier is equivalent to a 72,000 d.w.t. bulk carrier moving at a normal velocity of 0.15 m./sec. at 10°.

Lighting on the Pier consists of Sodium Vapour floodlights, fixed on masts along the centre of the Pier, giving a designed illumination of 200 lumens/sq.m.

There are no cranes available on the Pier and vessels using the facility are required to be self-sustaining and be able to work freely on either of the open berths.

The Pier is subject to load limitations of 1950 kg./sq.m. (400 PSF), and the approach trestle 975 kg./sq.m. (200 PSF).

Cargo operations are normally suspended if the wind speed exceeds 25 knots and vessels must be prepared to vacate the berth if winds exceed 35 knots.

Maximum Allowable Loads:

Pier: The maximum allowable loads on the pier are:
Uniform live load of 1,950 kg./sq.m. (400 PSF)
or
Truck axle loads as follows:
Max. single axle load = 16 tons
Max. load for tandem axle consisting of 2 axles = 16 tons/axle
Max. load for tandem axle consisting of 3 or more axles = 16 tons/axle

Trestle:
The maximum allowable loads on the trestle are:
Uniform live load of 975 kg./sq.m. (200 PSF)
or
Truck axle loads as follows:
Max. single axle load = 15 tons
Max. load for tandem axle consisting of 2 axles = 12 tons/axle
Max. load for tandem axle consisting of 3 or more axles = 9 tons/axle

Beach-Head: The Beach-head is a heavy lift docking facility located South of the Construction Support Terminal. Its primary use is for the discharge of heavy lifts.

The Beach-head is approximately 90 m. × 60 m., with the berth being along the 60 m. dimension. It is capable of accommodating vessels of up to 5 m. draft, subject to the vessel's overall length and its ability to be safely secured alongside.

The berth frontage (60 m.) is divided into two parts. The Southern part has a deck elevation of 3 m. above sea level, along 40 m. of the berth frontage. The Northern part of the berth frontage, along the remaining 20 m. has an elevation of 1.5 m. above sea level and slopes upwards towards the shore at a 5% gradient, thereby providing a ramp facility.

Two mooring dolphins are provided at each end, and inside the line of the frontage, of the Beach-head. The inner dolphins, on either side of the Beach-head, are 20 m. from the berth ends, while the outer dolphins are 70 m. from the berth ends.

The maximum allowable loads on the Beach-head are: Uniform live load of 30 tons/sq.m. over an area of 2.4 m. × 9.1 m. placed anywhere on the deck with the 9.1 m. dimension parallel to the dock face, plus 4,875 kg./sq.m. (1,000 PSF) over the remaining area.

Truck axle loads as follows:
Max. single axle load = 50 tons
Max. load for tandem axle consisting of 2 axles = 50 tons/axle
Max. load for tandem axle consisting of 3 or more axles = 13 tons/axle

BALLAST: The discharge of ballast water containing quantities of oil, or high levels of mineral or chemical pollutant, into the water of the Port is prohibited.

The discharge of ballast water from segregated or permanent ballast tanks into the waters of the Port will be permitted provided that the Master signs a declaration that the permanent ballast is clean and not affected by any pollutants.

The discharge of clean ballast water, from cargo tanks, into the waters of the Port will only be permitted if the oil content of the ballast water does NOT exceed 10 parts per million. Cargo tank ballast water will be sampled on the arrival of the vessel and measurements taken to determine the total oil concentration in the water. Subject to the results of the measurements being within the prescribed limits, the Harbour Master, or his deputy, will approve the start of deballasting. Throughout the cargo tank ballast discharge the oil concentrations in the discharged water will be closely monitored and the results reported to the Harbour Master, or his deputy, who will decide when such discharge shall stop.

MEDICAL: Medical facilities are available for the treatment of emergency cases. Masters should, if possible, provide advance notice, to their Agent, of their requirements, together with name, rank, nationality, passport or seaman's identity book number including date of issue and place of issue.

FRESH WATER: Potable fresh water will be available at the General Cargo and Container Terminal, Bulk Terminal and Export Refinery Terminal by October 1984. These are not presently available at the Crude Oil Terminal, NGL Terminal, Yanbu Petromin Refinery Terminal and Construction Support Terminal.

FUEL: Bunkering fuel is available at all berths at the Crude Oil Terminal, and 2 bunker loading arms are located on each loading platform, size 12 in. Maximum flow rate per bunker loading arm is 14,500 bbls./p.h. To avoid any delays to tankers, bunkering has to be accomplished concurrently with cargo transfer operations.

Facilities will be available at other berths by October 1984.

REPAIRS: While alongside berths, engines and propulsive machinery must be ready at all times to leave the berth at 10 minutes' notice, under full power.

No repairs of any kind are permitted alongside any berth unless mutually agreed by the Master, Harbour Master and Terminal Manager.

Any repairs involving "Hot Work" will be subject to special conditions contained in the "Hot Work Permit" which must be obtained from the Harbour Master or Port Safety Officer for work at the General Cargo and Container Terminal, Bulk Terminal and Construction Support Terminal. Permits for hot work at other Terminals will be issued by the Terminal Operators or their designated representatives.

REPATRIATION: Crew changes can be arranged at King Fahd Port at Madinat Yanbu Al-Sinaiyah subject to the approval of the Government Authorities. Masters should advise their Agent of repatriation requirements as far in advance as possible. Agents require the following information for each crew member who is to be repatriated: name, rank, nationality, passport or seaman's identity book number including date of issue and place of issue, and final destination.

CUSTOMS: *Import/Export Prohibitions:* All goods to be imported into, or exported from, the Kingdom of Saudi Arabia are subject to examination by the Customs Authorities. The importation of certain articles is strictly prohibited, for example:

Explosives and Firearms, including air rifles
Implements of war of any kind, including antiques
Alcoholic beverages of any kind
Religious matter not pertaining to the Moslem faith
Pig meat or pig products
Playing cards and gambling games or devices
Narcotics
Pornographic material.

Trafficking in these items between ships, and between ships' crews and shore personnel, is strictly prohibited.

Also see "General".

TIME: The Time Zone is GMT plus 3 hours.

SHORE LEAVE: Ship's personnel are NOT permitted ashore, nor on the wharves FOR ANY PURPOSE WHATSOEVER (this includes the reading of the ship's draft) until Pratique is granted, and then are allowed on the wharves only if actually engaged in duties in connection with operations of discharging, deballasting or loading.

All shore leave is contingent upon compliance with Saudi Arabian Quarantine and Passport Regulations. For current details concerning these regulations and shore leave restrictions the ship's Agents must be consulted.

SAFETY/POLLUTION: *Safety Requirements:* A letter concerning safety requirements will be given to the Master of each vessel by the Terminal Supervisor.

Receipt of the safety requirement letter has to be acknowledged by countersigning and returning a copy to the Terminal Supervisor.

Ship/Shore Safety Check List and Precautions: Terminals in Port follow the recommended safe practice for loading, discharging and related operations as contained in the International Oil Tanker and Terminal Safety Guide and the International Chamber of Shipping's Tanker Safety Guides for Chemicals and Liquefied Gas, or other comparable Guides.

Prior to commencement of any cargo/bunker transfer operations, a ship/shore check list is to be completed and signed by responsible personnel from ship and shore. Each item should be positively verified before it is ticked and, if necessary, a physical check will be performed.

Regular inspections by the Terminal Staff will be made with the ship's Master, or his deputy, to ensure that the relevant safe practices are strictly adhered to. The Harbour Master or his deputies may also carry out inspections. If any infringement of the recommended safe practices is observed, the attention of the person in charge will be drawn to the fact and, if the situation is not resolved immediately, all operations must cease. In the event of continued and blatant disregard of the regulations, the vessel may be ordered off the berth for appropriate action to be taken by the Charterers and Owners concerned.

Tank cleaning and/or gas freeing is only permitted with the approval of the Terminal Manager and Harbour Master and only if tank washings can be discharged into reception facilities.

Crude Oil Terminal Emergency Procedures: Emergency procedures, both on board and offshore, shall be introduced in the event that normal operational practice has to be interrupted or suspended as a result of an unforeseen incident that would create unsafe conditions while loading crude oil at one of the berths of the Crude Oil Terminal.

Crude Oil Terminal Emergencies which would require immediate action by terminal personnel or shipboard personnel are:

1. Electrical storm.
2. Electrical power failure.
3. Mechanical failure.
4. Leakage, spill.
5. High gas concentration.
6. High winds exceeding 35 knots.
7. Fire.

Actions to be taken shall be determined by the type and severity of the incident and are:

(a) Stop loading.
(b) Comply with emergency reporting procedures.
(c) Disconnect loading/bunker arms.
(d) Fire facilities standby.
(e) Standby for unmooring.
(f) Departure from berth.

Emergency actions should be initiated by offshore personnel when an emergency is detected onshore or on board that tanker. It is important that the first able-bodied person or persons at the scene of the emergency should take whatever action is appropriate and necessary to protect personnel, minimise the hazard and to limit the extent of damage.

All Crude Oil Terminal personnel have to be familiar with the King Fahd Port at Madinat Yanbu Al-Sinaiyah Emergency Plans and, on declaration of an emergency for the Port, follow the procedures as listed in these emergency plans. The King Fahd Port at Madinat Yanbu Al-Sinaiyah Emergency Plans apply to all areas within the port limits as defined by the Rules and Regulations for King Fahd Port at Madinat Yanbu Al-Sinaiyah.

Oil Pollution Prevention: Any oil pollution of the waters of the Port will be treated as a very serious matter. In order to prevent oil pollution, the Royal Commission carries out continuous surveillance of the Port area. If any vessel is seen, or there is evidence to suggest a vessel is polluting the water of the Port, instructions will be given for all loading/discharging/deballasting operations to cease. A detailed investigation will be carried out and any vessel held responsible for pollution, will be required to pay the costs of all clean up operations and any fines that may be levied.

Masters, Owners and Charterers are reminded:

A. That before any vessel enters the Port, the Master is required to notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading/discharge of vessels ("Instruction to vessels and conditions of use of all berths within King Fahd Port at Madinat Yanbu Al-Sinaiyah").

B. In addition to (A) above, tankers and gas carriers are obliged to give a similar undertaking in their pre-arrival information.

C. All tankers, gas carriers and any vessels bunkering are required under the Rules and Regulations for Saudi Arabian Seaports, Part 3, Section 4, to ensure all alarms and safety trips are tested and working, and that all pipes, valves, hoses or other apparatus shall be in good condition and free from leakage. Drip pans and deck scuppers shall be in position and plugged.

D. Suitable sorbent material or other materials or equipment should be readily available on deck in order to clean up any spillage.

GENERAL: *Emergency Plans:* Information will be supplied to each vessel arriving at the various terminals in the port detailing action to be taken in the event of an emergency situation arising. Masters, officers and crew should familiarise themselves with this information.

A Port Emergency may be declared in the event of:

a fire on a terminal or ship;
a pollution incident occurring from a terminal or ship;
a collision, grounding, sinking or other major incident occurring within the Port area.

A Port Emergency can only be declared and terminated by the Harbour Master who will make a broadcast on VHF to this effect. Instructions will also be issued to inform all vessels that a Port Emergency has been declared. It is vital, therefore, that all vessels should have their VHF available for immediate operation and that provision is made for a continuous listening watch to be maintained in the event of a Port Emergency being declared.

The alarm may be raised by:

Contacting Royal Commission Port Control by VHF Channel 16,
or by continuous sounding of fog signalling apparatus, or
by visual means, or
if ashore by whatever means is available.

Initial action should be taken by those persons at the scene until the arrival of assistance.

The control of all operational activities afloat, and the movement of vessels during a declared Emergency will be exercised by the Harbour Master who will undertake the direction of these activities through Royal Commission Port Control and will liaise with the Royal Commission.

All loading or discharging of dangerous and/or flammable goods in the Port must cease immediately a Port Emergency is declared.

Port Regulations: Every vessel which arrives at the port must have a copy of the Rules and Regulations for King Fahd Port at Madinat Yanbu Al-Sinaiyah which are authorised and approved by the Royal Commission for Jubail and Yanbu, and a copy of the Rules and Regulations for Saudi Arabian Seaports which is to be used in conjunction with the above. On first arrival at the Port, these Rules and Regulations must be obtained.

Saudi Arabian Government Regulations: Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. While in Port, whether at anchorage or at a berth, the vessel's personnel are under the jurisdiction of Saudi Arabian Laws.

The taking of photographs while the ship is in port is strictly forbidden by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors, are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred due to Government investigations of violations.

Provisions: Frozen meat (except pig meat), fish and fresh vegetables are available locally, however Masters are advised to contact their Agent well in advance to establish availability and prices.

Stores: Local availability of chandlery items is limited and Masters should contact their Agents well in advance to establish availability.

WEATHER:

Climate: The climatic conditions affecting King Fahd Port at Madinat Yanbu Al-Sinaiyah are seasonal. In Winter onshore, air temperatures range from 25°C during the day to about 12°C at night. In Summer air temperatures range from 35°C during the day to 25°C at night. Extreme air temperatures recorded in recent years in the area have been 49°C in May and 6°C in February. Temperatures offshore are generally several degrees lower. Relative humidity varies throughout the year with average values between 65% and 70% in Winter and 50% to 55% in Summer, however values of 100% may occur for short periods around dawn. The average annual rainfall taken over a 4 year peiod is 3.2 mm.

Winds: A diurnal sea breeze/land breeze cycle occurs almost daily throughout the year and causes wind speeds of 10 knots and above to occur from the North West during the late afternoon. Storms occur as frequently as every 5-10 days and sometimes can last as long as 2 weeks. Although there is little drop in barometric pressure and very rarely any precipitation during these storms, wind speeds of up to 30 knots may occur from the North or North West.

Tides and Currents: The mean tidal range is about 0.34 m., but fluctuations due to non tidal effect, caused by storms, can be up to about 0.50 m. with a drop in mean sea level during the storm and a significant increase after the storm or as it subsides. Generally tides are semi diurnal with a period of 12 hours 25 minutes. Information to date suggests that the following datums be adopted:

Datum	*Elevation above LAT (m.)*
Highest Astronomical tide (HAT)	1.14
Mean High Water Springs (MHWS)	0.80
Mean High Water (MHW)	0.74
Mean High Water Neaps (MHWN)	0.67
Mean Sea Level (MSL)	0.57
Mean Low Water Neaps (MLWN)	0.47
Mean Low Water (MLW)	0.40
Mean Low Water Springs (MLWS)	0.34
Indian Springs Low Water (ISLW)	0.32
Lowest Astronomical Tide (LAT)	0.00

Currents in the area are influenced by local wind conditions, tide, and the general circulatory pattern of the Red Sea. Generally currents within the port have been observed at less than 0.5 knots and run parallel to the coast. However, they are considerably influenced by surface wind activity.

Sea Conditions: Sea conditions can vary considerably within the Port limits. Wave heights in the port area are usually lower than 40 cm. during sea breezes, but during storms, waves in excess of 2 m. are common outside the offshore reefs while waves exceeding 1 m. are common in the inner port area. There is no distinct seasonality in this respect.

Sea Salinity and Sea Water Temperatures: Sea water temperatures are similar to air temperatures and range between 25°C (77°F) and 31°C (88°F). Salinity varies between 37 and 39 parts per thousand.

Visibility: The incidence of fog is rare, but, should it occur, it is more likely during the period November to April. During the summer months from May to September the incidence of poor visibility (less than 5 miles) can be quite high due to mist and haze, or dust particles held in suspension in the atmosphere. However, throughout the year, dust storms may occur obscuring the coastline.

ZULUF TERMINAL: 28.23 N. 49.14 E.

TERMINAL CLOSED APRIL 1976. THE STORE BARGE HAS LEFT. NO FURTHER OPERATIONS WILL TAKE PLACE AT ZULUF.

NOTICES:

MENAS Notice No. 102/82
ZULUF AND MARJAN OILFIELDS

Mariners are advised that there are lighted structures and numerous unmarked well heads with standpipes of 6 ft. to 8 ft. above the sea bed between the pecked areas delineating the Marjan and Zuluf Oilfields.

Oil rigs and platforms also exist in the Southern approaches to the above oilfields.

Caution and a good lookout is requested in the area and anchoring between the two oilfields is not advised.

MENAS Notice No. 05/84
VESSELS TRANSITING WATERS IN VICINITY OF MARJAN AND ZULUF OILFIELDS

Mariners are advised that new platforms are being erected in the Zuluf Field and both rigs and platforms are positioned between the Marjan and Zuluf fields.

Both fields are clearly delineated on nautical charts and shipping should pass between them. A good lookout is requested and reduced speed when in the vicinity of platforms, oil rigs and their supporting craft.

NOTES

Please also advise Shipping Guides Ltd.

Senegal

DAKAR: 14.40 N. 17.26 W. (See Plan Book)

PORT LIMITS: *North:* From the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.

East: By the meridian passing 1 mile East of Goree.

South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.

DOCUMENTS: Vessels carrying hazardous and/or strong smelling cargoes must declare to the Harbour Master, at least 48 hours before ship's arrival, the nature/quantity/packing of these goods, as well as their stowage on board. Same applies for Arms and Ammunitions.

Health:
2 Crew Lists.
1 Sanitary Declaration.
2 Lists of Date of Vaccinations.
(Valid vaccinations for Smallpox and Yellow Fever for all persons)

Customs:
3 Crew Lists.
2 Stores Lists.
2 Personal Effects Declarations.
2 Slop Chest Lists.
1 List Arms and Ammunition.

Immigration:
4 Crew Lists.
2 Lists of Ports of Call with dates of arrival/departure.

Agents:
1 Crew List.
1 Personal Effects Declaration.
1 Slop Chest List.
2 Lists of Arms and Ammunition.

Papers required on arrival: Bills of Lading for cargo to be discharged and Master's copy. 2 copies of Cargo Manifests for cargo to be discharged.

Great care should be taken in completing all Store Lists, Slop Chest Lists and Personal Effects Lists as Customs check all stores, including fridge spaces.

Customs also board vessels at anchor and inside territorial waters, inflicting heavy fines in cases where stores, etc. are not prepared and ready for inspection. Also, heavy fines are imposed for any discrepancies. Even when calling at port for emergencies (e.g. Medivac) a full set of documents must be prepared before entering territorial waters.

No vessel is allowed to leave Dakar without having received on board an outward manifest duly visaed by the local Customs Authorities. Vessels leaving without such a manifest will be heavily fined.

PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area.

RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed, due to the effects of swell, at anchorage in outer roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 hrs. and 0600 hrs. The harbour area is dredged to a depth of 10 m. to 11 m.

Dangerous Cargo: Vessels are allowed to have the following dangerous cargo on board:

For Discharging	*North Area*	*South Area*
I.M.O. 1	20 tons	10 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	25 tons
In Transit	*North Area*	*South Area*
I.M.O. 1	25 tons	20 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	40 tons

TUGS: Operated by a private company, 3 tugs available up to 2,000 h.p. (bollard pull 24 tons). Compulsory for loaded tankers.

BERTHING: 10,000 m. of quay length available of which more than half has depths of 8 m. to 11 m. alongside.

Mole D'Escale: 6 berths, depth alongside 10 m., can be used for vessels refuelling simultaneously with cargo operations.

Pier 718 Phosphate Quay (Pechiny): 215 m. long, max. draft of 25 ft. 7 in., loading average of 200 t.p.h.

Pier 52 Phosphate Quay (TA IBA): 170 m. long, max. draft of 36 ft., loading average of 1,000 t.p.h.

The South area has 3 wharves with a depth of 26 ft. – 33 ft.

Dock I is 460 m. long.

Berth No.	12	Draft	26 ft. 3 in.
„ „	13	„	28 ft. 7 in.
„ „	14	„	28 ft. 7 in.
„ „	15	„	33 ft.
„ „	17	„	33 ft.

Dock II

Berth No.	21	Draft	27 ft. 3 in.
„ „	22	„	26 ft. 11 in.
„ „	24	„	26 ft. 3 in.
„ „	25	„	25 ft. 11 in.

Dock III is 350 m. long. Max. draft of 32 ft. 10 in. Reserved for trade with the Republic of Mali.

Mole de Peche: 1,461 m. of quays, supplied with water and bunkers. Areas for spreading out fishing lines and nets.

MAX. SIZE: Ships of 30 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.

CRANES:
5 semi-jib cranes × 6 tons at 27 m.
1 electric crane × 40 tons at 20 m.
2 floating cranes, 60 tons and 120 tons.
1 mobile crane × 8 tons at 15 m.
1 mobile crane × 28 tons.

CONTAINER FACILITIES: Containers handled at Mole 1.

TANKERS: The Petroleum Basin is dredged to a depth of 10 m. to 11 m. 2 jetty berths can receive tankers up to 200 m. length, max. draft 32 ft. 6 in. Petroleum Wharf which has 4 berths, depth alongside 12 m. (depth in approaches 11 m.) can receive tankers up to 250 m. length with a draft of 36 ft.

Black products handled at all berths (6 in., 8 in. and 10 in. hoses). White products at Berth, 2 only (8 in. hoses). Distance to tank farm about 5 km. Water to be pumped between grades.

Ship to Ship transfer (STS) is carried out across Petroleum Wharf using 2 × 8 in. hoses. Standard practice – discharging tanker starboard side alongside No. 93 Berth and loading tanker port side alongside at No. 92 Berth. Transhipment supervised by Iransen and Shell.

M'bao Refinery sealine buoy berth is situated 3 miles N.E. of Goree Island. Vessel berths using both bow anchors, stern is secured to 4 buoys using 4×5 in. wires from buoys stern. Ship's ropes not used. Hose connection on port side using 12 in. (300 mm.) hoses. Vessel's derrick to have an SWL of at least 5 tonnes.

STEVEDORES: Normal working hours, weekdays from 0800 to 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs. Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs.; from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sundays from 0000 to 0500 hrs.; from 2200 to 2400 hrs.

HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF or telex via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free Pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".

RADIO: ETA advice should be sent 96 hours, 48 hours and 12 hours prior to arrival including cargo to discharge, drums to discharge (if any), draft on arrival, expected draft on departure, last port and next port of call. Agents should be notified of tug requirements, VHF Channel 8.

VHF: The Port Captain's Office, pilot station and tugs are equipped with VHF, with the following Channels: Channel 16 used by vessels approaching to contact pilot station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.

MEDICAL: *Vaccinations:* Possible from 0800 to 1200 hrs. and 1500 to 1700 hrs. Sundays and holidays excluded.

Doctors: All kinds of specialists available.

Hospitals: With qualified doctors and good equipment.

FRESH WATER: All quays are fitted with water hydrants. Water supplied by 3 hoses simultaneously, with a rate from 60 – 100 cu.m.p.h. Can also be supplied by barge up to 400 tons capacity but minimum order 150 tons.

FUEL: All grades can be supplied from the quays up to 1,000 t.p.h. Fuel can also be supplied by barge. Also see "Shipmasters' Report".

REPAIRS: All types of repair can be effected by the Naval Arsenal or by private companies.

DRY DOCKS: At the Naval Arsenal, one dry dock length 189 m., width 23 m., depth up to 9.50 m.

Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock will take vessels up to 60,000 d.w.t. Lifting capacity 28,000 tons. Acceptable dimensions 235 m. × 38 m.

REPATRIATION: Seamen can be repatriated to Europe without delays by air.

AIRPORT: International airport with regular services to Europe.

TELEPHONES: All berths are equipped with telephone apparatus which is placed on board vessels without charge.

HOLIDAYS: New Year (1st January); Tabaski (Variable Date); National Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascension Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date); National Day (14th July); Assumption (15th August); All Saints' Day (1st November); Korite (Variable Date); Christmas (25th December).

GENERAL: Several cases of assault have been reported against crew members returning to their ships during the hours of darkness. For this reason, the delivery of cash from Agents is suspended during the night hours. Although Port Authorities and Security are aware of the situation, it is advisable to acquaint all on board with this.

DEVELOPMENTS: Container and Ro-Ro terminal to be constructed between Mole 6 and Mole 8.

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is not possible to anchor in the inner roads due to the swell. The swell is worse from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Goree but in my opinion it is a little too close. However, the nearer a vessel can anchor N.E. of Goree the better. The holding ground is very good.

It is possible to talk to Mory Fuel Company direct on VHF Channel 2. They have a barge which is able to deliver fuel oil and diesel oil, capacity 500 tons.

Three tugs available, be sure to order one well in advance before completion of bunkering or the vessel may have to wait. Bunkering undertaken day and night.

SHIPMASTER'S REPORT: October 1983.
Documents: Separate Bonded Stores List (4 copies) required by Customs.
Pilotage: Pilots will board 0.2 miles from breakwater entrances.
Health: Advise Port Health Authorities of health state, also vaccinations required. They attend on arrival but do not acknowledge messages.
Fresh Water: Fresh water supply at piers averages 20 t.p.h.
Security: There have been many cases recently of anchored and stationary vessels being boarded by thieves and mooring ropes, etc. purloined. Vessels on regular run to Dakar do *not* stop in port approach areas until daylight. Gangway watchman essential. Shore traders to be confined to one area under supervision if allowed on board.

AUTHORITY: Port Autonome de Dakar, Boulevard de la Liberation, B.P. 3195, Dakar, Senegal. *Tel:* 238-00. *Telex:* 406. *Cables:* Porcomer Dakar. *Contact:* E. Belin, Director General.

AGENT: Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233. Tel: 23.10.01/21.46.31. Telex: 521, 621, 622 and 496. Cables: "Freight Dakar".

Sub-Agency at Kaolak. Tel: 41.19.07. Telex: 7460.

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:
2 Crew Lists.
2 Store Lists.
2 Manifest pacotille (tobacco, wine, etc.). Agents deposit at Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar. No hospital.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

Private Berth: Saltworks Wharf, length 52 m. Owned by S.S.S.I.M. Tel: 411904. Telex: 7472 SG.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: August to December: 1025. January to July: 1055.

FRESH WATER: Available at 10 t.p.h.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, no restrictions; Customs control on board (Declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, not limited, Customs controlled.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None (Dakar only). French Consulate Agent: Leon Masfrand, Tel: 412176.

REPATRIATION: Not possible (Dakar only).

AIRPORT: None.

TIME: GMT throughout year.

HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).

FIRE: Tel: 324.

TELEPHONES: Not possible to place on board.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.

AUTHORITY: Harbour Master.

AGENT: See "Dakar".

NOTES

Please also advise Shipping Guides Ltd.

Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E.

(See Plan Book)

DOCUMENTS:

Maritime Declaration of Health – forms obtainable from Medical Officer.
Derat Certificate.
5 Crew Lists and Passengers' Lists.
Dangerous Cargo List.
Ship's Register.
Crew Declaration Form.
Declaration of Stores.
Parcels List.
Firearms List.
List of Animals remaining on board.
Un-manifested Cargo List.
Cargo Manifests.
Clearance from last Port.

PILOTAGE: Compulsory in Inner and Outer Harbour for any vessel of or exceeding 150 g.r.t.

24 hours' notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kHz and 8714 MHz. Schedule published in Radio list. Harbour control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with white cabin, orange top, flying "H" flag.

Signals for Pilot: "G" by flag and/or whistle.

Pilot Boarding Ground: The Pilot boards vessels about 6 cables Northward of the outermost buoy (Fairway buoy) in position 4° 35.7′ S., 55° 29.6′ E. There is no night pilotage. Pilot can board in almost any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Harbour Control" on VHF, Channel 16, 2 hours before arrival.

ANCHORAGES: Masters of all vessels are requested not to anchor on the leading marks or in any other position so as to block the entrance channel.

The following anchorages are available in the Outer Harbour.

(i) Victoria Lighthouse bearing 238° True. Distance 9.75 cables in depths of 20 m. to 22 m.
(ii) Victoria Lighthouse bearing 232° True. Distance 1 mile in depths of 22 m.
(iii) Victoria Lighthouse bearing 224° True. Distance 1.4 miles in depths of 18 m. to 20 m.
(iv) Victoria Lighthouse bearing 212° True. Distance 1.5 miles in depths of 20 m. to 22 m.

Super tankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master after consultation with Harbour Master. No tide restrictions.

Vessels with draft of more than 31 ft. remain at anchor due to certain draft restrictions in the approach channel.

HEALTH: "Q" Flag or international red over white. Medical Officer boards vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against smallpox, yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only. Hospital facilities available. Vessels proceeding to the Inner Harbour may be disinsectised. Radio Pratique may be granted on request.

No animal/pet of any description is permitted to be landed ashore or on the wharf as per Seychelles Quarantine Regulations. Necessary action will be taken against any Master who disregards these instructions in addition to the possibility of destroying any such animal or pet found ashore.

RADIO/VHF: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. The Harbour Master's Office, call sign, "Harbour Control" keeps a 24 hour watch on VHF Channel 16. Any further information can be obtained by calling up Harbour Control on Channel 16. Other Channels available – 12 and 6.

TUGS: One twin-engine 2,000 b.h.p. tug in full operation. Vessels of up to 650 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay (New deep water port) is now in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Passenger terminal, Port Offices and Customs are situated at the New Port area.

Masters and Officers of vessels moored at the 2 above mentioned places are reminded of the importance of tending moorings at frequent intervals.

Slack lines present a hazard to the safety of vessels moored alongside.

In the case of tankers and bulk carriers discharging or loading, the hourly difference in draft can be considerable. It is therefore recommended that regular routine checks on moorings be carried out by the Duty Officer.

Movement of Vessels Moored at Mahe Quay, Long Pier or at Anchorage. No movement of any vessel moored at the above mentioned places is permitted without authorisation from the Harbour Master. Ship's boats or lifeboats are not to be used as plying boats or on excursions to nearby islands unless agreements have been made through the Harbour Master's Office and Customs.

TANKERS: Max. length 570 ft. Discharge throughout 24 hours. Discharge line 6 in.

DENSITY: Average 1025 at all states of tide.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 8 to 10 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 10 to 15 t.p.h. per gang (subject weather conditions).

FRESH WATER: In good supply. By mains when alongside and steel barges when at anchor. All water supplied is chlorinated. One special steel water barge with capacity of 80 tons with pumping capacity of 40 t.p.h. Vessels should request water at least 72 hours before arrival.

FUEL: Gas oil Kinematic CS at 40°C. = 3.63. Due to limited stock, it is advisable to give one week's notice, preferably through Shell International, London.

Fuel oil now available on North end of berth only. (Fuel oil 180 centistoke). Pour point 70 max. – Kinematic 180 max. – restriction on flow of delivery pending improvement of facilities.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by ship's own crew.

CUSTOMS ALLOWANCES: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gear supplied by ship.

IDENTIFICATION CARDS: See "Shore Leave".

CONSULS: *Embassies:* China, Cuba, France, Libya, U.S.A., U.S.S.R.

High Commissions: Great Britain, India.

Consuls: Belgium, Cyprus, Denmark, Fed. Rep. of Germany, Italy, Malagasy Rep., Norway, Sweden, Switzerland.

REPAIRS: Only minor repairs to deck: gas welding, pipe bending, etc.

DRY DOCKS: None.

REPATRIATION: Crew changes possible. Undertaken by Agents in connection with Immigration Authorities.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd January); Good Friday; Corpus Christi (15th August); Labour Day (May 1st); Liberation Day (June 5th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Emergency: Ring 999 otherwise Police 22011 and Hospital 22031.

A telephone is placed on board ships alongside. Rate Rs 50/- per day.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

SHORE LEAVE: All members of the crew are allowed ashore. No limit to shore leave. Crew to be in possession of identity card or discharge book.

DELAYS: Berthing: limited berth. Loading or discharging: weather conditions. Bunkering: space alongside.

SAFETY: There shall be no smoking on board vessels carrying petroleum products, chemicals or LPG except in such safe places as may be approved jointly by the Master and Harbour Master. Responsibility for ensuring that the crew of the vessel are informed of the safe places so approved, and that the regulations are complied with, rests with the Master. Such vessels when berthed alongside a quay must have the eye of a wire hanging over the outside bow and quarter to enable tugs to connect up readily in an emergency. The said wire must be suitable for such purposes and shall have sufficient scope on deck for free running.

Engines are not to be immobilised whilst the vessel is berthed alongside the wharf without prior authorisation from the Harbour Master.

Any unsafe condition or action observed on board a vessel will result in immediate cessation of cargo or bunkering operations until such condition or action is corrected. Continued or blatant disregard of these requirements by any ship will result in the removal of the ship from berth or quay at the cost of the vessel and the Owners/Operators/Charterers informed of the circumstances.

Use of radar and radio transmitter are forbidden whilst alongside the wharf.

Portable R/T sets or transceivers must be of an approved design and those used on tankers must be intrinsically safe.

POLLUTION: All ballast discharged over the side must be clean and entirely free from petroleum products of any description in accordance with the Marine Pollution Regulations of 1981. No dirty ballast is to be pumped overboard as per Laws of Seychelles Cap. 210 Section 18. This includes brine from fish tanks in which fish have been stored. All Masters are advised to familiarise themselves, through their respective Agent, with the Marine Pollution regulations 1981. The Master of a vessel found guilty under these Regulations is liable to imprisonment for five years and to a fine of two hundred thousand Seychelles Rupees.

Whilst transferring fuel and/or taking bunkers all scuppers must be effectively plugged to prevent accidental discharge of oil into the sea.

SHIP SUPPLY SERVICE: Ship Supply Services can be made by prior arrangements with any shipping Agencies by using fast hire crafts, which are allowed to operate over 60 miles to any given rendezvous.

List of Shipping Agents:

M/S Union Lighterage Co. Ltd., P.O.Box 38, Victoria, Mahe, Seychelles.
Hunt Deltel & Co. Ltd., P.O.Box 14, Victoria, Mahe, Seychelles.
Mahe Shipping Co. Ltd., P.O.Box 336, Victoria, Mahe, Seychelles.
Union Trading Co. Ltd., Victoria, Mahe, Seychelles.
Harry Savy & Co. Seychelles (Pty) Ltd., P.O.Box 20, Victoria, Mahe, Seychelles.
M/S Allied Agencies Ltd., P.O.Box 345, Mahe, Seychelles.

REFUSE: No refuse to be dumped in the harbour and approaches. When alongside Mahe Quay garbage must be placed in plastic bags and be disposed through a licensed garbage collector at a fee.

AUTHORITY: Department of Transport, Port and Marine Services Division, P.O.Box 47, Mahe, Seychelles, Indian Ocean. *Tel:* 22311, 22800. *Telex:* 2329 Tratur Sz. *Cables:* Demarine. *Contact:* Harbour Master.

Sierra Leone

FREETOWN: 08.30 N. 13.14 W. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by Crew members).
1 Store List.
1 Arms & Ammunition List.
1 Port Health Declaration.
1 Vaccination List (cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's Owners.

1. *For Vessels Working Cargo (Discharging):*
   - *(a)* From each port of loading, by air mail to vessel's Agent: 2 copies of Cargo Manifest, 1 copy of Freighted Manifest.
   - *(b)* On arrival: 5 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

Note: Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Non-compliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port and Stevedores for Vessels Working Cargo:*

4 copies Stowage Plan, 4 copies Hatch Lists. List of all lifts over 3 tons.

PILOTAGE: Vessels may at present enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth II Quay, Kissy Oil Jetty, vessels over 20,000 tonnes summer deadweight and vessels over 30 ft. draft. Upon Master's request, Pilot available at Fairway Buoy with 24 hours' notice. Normally only during daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approx. 1 mile wide and minimum draft 36 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1.5 miles North of Cape Sierra Leone.

Pilots board from a launch painted black, with white superstructure, with letter "P" on each bow.

Aberdeen Signal Station will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on this link.

ANCHORAGE: With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with 2 horizontal black bands; Fl. white every 2 seconds.

Anchor Berth	*Bearing (T)*	*Distance (Cables)*	
E. 3	138	10.5	
E. 4	154	9	
E. 5	180	8	
E. 6	207	8	
F. 5	136	7	
F. 6	154	6	
F. 7	184	5	
F. 8	210	5	
F. 9	232	7

H. 2	234	3	
H. 3	252	5	
H. 4	258	7	
B. 1	236	11	(Vessels bunkering ex-barge)

With Cline Point bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
D. 1	232	5.5
D. 2	253	7
D. 3	253	3
D. 4	273	5.5
C. 1	244	4
C. 2	270	5
B. 2	280	7.25

With Kissy Oil Jetty bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
B. 2	235	1 mile

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

RESTRICTIONS: *Draft Limits for Deep Laden Vessels:*

Draft Limits: 38 ft. (11.6 m.) plus height of tide to a maximum of 48 ft. (14.6 m.).

Time Limits:

1. From 5 hours Flood Tide to HW.
2. From LW to 1 hour Flood Tide.
3. During hours of daylight only.

Vessels of 36 ft. draft and over must keep to the time limits.

Vessels of under 36 ft. draft may navigate the channel at any time but attention is drawn to the strong cross currents.

(H.M.S. Hydra has commented strongly on this danger).

HEALTH: Pratique by radio or on boarding. See "Agent's Cable Requirements".

RADIO: *Freetown Radio, Coast Station:* Watch is maintained on 500 kHz from 0700 – 2200 hrs. GMT on week-days, and 1200 – 1400 hrs. GMT on Sundays and Public Holidays.

The working frequency is 421 kHz and traffic lists are broadcast on this frequency after preliminary announcements on 500 kHz at 0730, 0830 hrs., etc.: up to 2130 hrs. GMT. On Sundays and holidays, traffic lists are broadcast at 0800, 1200 hrs. and 1700 hrs. GMT.

Time GMT	*9LL Freq.*	*Search-band for reply*
0800 – 0900 hrs.		
1300 – 1430 hrs.	6411	6 MHz
1700 – 1830 hrs.		
0900 – 1000 hrs.		
1200 – 1300 hrs.	8710	8 MHz
1830 – 2000 hrs.		
1000 – 1100 hrs.	13042.5	12 MHz
1530 – 1700 hrs.		

On Sundays and other holidays the H.F. Schedules are as follows:—

0830 – 0900 hrs.	8710	8354 to 8374 kHz
0930 – 1000 hrs.	13042.5	12531 to 12561 kHz
1330 – 1400 hrs.	6411	6 MHz
1600 – 1630 hrs.	13042.5	12531 to 12561 kHz
1700 – 1730 hrs.	8710	8354 to 8374 kHz

Traffic lists are broadcast at the commencement of every HF Schedule and repeated at intervals during the Schedule.

Ship's Radio Telephone and Harbour Service: Watch is kept on 2182 kHz for casual R/T traffic from 0800 – 2000 hrs. GMT on weekdays, and 0800 – 1730 hrs. GMT on Sundays and holidays.

Ships are advised to arrange their calls in advance by W/T where possible so it can be ensured that the called party is available. Calls can be connected to or from any number on the Freetown Telephone Exchange. Longer range contacts should be in the 8 MHz maritime band, the frequency of 9LL in this band being 8768.9 kHz.

Other Services: Navigational warnings issued from time to time by the Harbour Master are broadcast on W/T. Spoken telegrams are accepted at ordinary W/T rates on RT.

VHF: *Freetown Radio:* A 24-hour watch is kept on Channel 16 switching to Channel 26 for communication. Calls can be connected to the Freetown Exchange. Masters are advised the fullest use should be made of this service, particularly after office hours and during the early hours of the morning or late at night when no cable service is available. The Authority tugs are also equipped with VHF, watch being kept on Channel 16 switching to Channel 12 for communication. The same is applicable to the lighterage service, which keeps watch and communicates on Channel 12.

Signal Station	Channel 16
Pilot Office (Freetown Pilot)	Channel 16
Harbour Master	Channel 16

AGENT'S CABLE REQUIREMENTS: Masters requested cable ETA as early as possible. Following information required:

(a) For vessels working cargo: 1. Discharge or Loading Hatch distribution. 2. Gangs required. 3. If Explosives on board for Freetown or in transit.

(b) For vessels bunkering: Bunkers and water required.

(c) For Tankers discharging: 1. Total Displacement. 2. Draft. 3. Cargo particulars (quantity and grade).

(d) For vessels embarking/disembarking krooboys: 1. If krooboys provisions required and for how long. 2. Cash requirements. 3. If service on arrival if arriving between 2200 hrs. and 0700 hrs., bearing in mind the high costs for Customs overtime and port service.

(e) In general: 1. Cash requirements. 2. Water requirements. 3. Medical attendance, if required on arrival.

When ETA received and confirmed Agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

Note: For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

TUGS: 2 seagoing tugs available, *Sewa* (2,200 h.p.) and *Bintimani* (2,200 h.p.). Both are twin-screw with diesel engines and are equipped for salvage having fire-fighting equipment and a 10 ton derrick. Normally 1 tug used for berthing and unberthing operations, but 2 if necessary. Charges for berthing and unberthing include use of 1 tug, whether required or not.

BERTHING: All alongside berths: between hours of 0630 and 2330. Kissy Oil Jetty; max. displacement – 46,000 tons, max. draft 39 ft., berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; max. draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far East as steps. Unberthing not permitted from 1 hour after HW until 1 hour after LW.

Berth No. 1A: As for Berth No. 1, max. draft 31 ft. 06 in.

Berth No. 2: Berthing and unberthing, length and breadth no restrictions. Max. draft 31 ft. 06 in. No tidal restrictions.

Berths No 3 and 4: Max. draft 32 ft. 06 in.

Berth No. 5: Max. draft 31 ft. 06 in. – 32 ft. 06 in.

Berth No. 6: Max. draft 29 ft. 06 in.

Facilities for loading palm kernel oil available only at Berth No. 1.

Bulk Grain: No. 1 Berth is equipped for discharging grain in bulk through a conveyor built on No. 1 Shed to the Flour Mill. The actual discharge is effected by mobile vacuvators. Four such units are available with total potential of 80 t.p.h., though a more realistic figure would be in the region of 60 – 70 t.p.h. Grain vessels are worked around the clock.

King Tom Jetty: Berthing *not* allowed.

Dispensation will only be granted in exceptional circumstances to berth or unberth vessels before 0600 hrs. and after 2330 hrs.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board.

Sherbro River: Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 06 in. The passage between No. 1 Buoy and No. 8 Buoy and between No. 1 Buoy and Yangsai Anchorage must be navigated in daylight hours only.

The Channel between Buoy Point and Yangsai must be navigated only during period 2 hours to H.W., and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy No. 8, length and breadth unlimited. Max. draft 24 ft. 06 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

MECHANICAL EQUIPMENT:

Type	*Capacity*	*Complement*
Portal Quay Crane	3 tons	2
Portal Quay Crane	5 tons	1
Mobile Crane	15/30 tons	1
Mobile Crane	4 tons	9
Mobile Crane	5 tons	2
Mobile Crane	7 tons	2
Fork Trucks	10 tons	1
Fork Trucks	4,000/5,000 lbs.	34
Tractors	—	15
Trailers	6 tons	17
Trailers	8 tons	1
Trailers	10 tons	12
Trailers	20 tons	18
Trailers (Pole)	10 tons	2
Fire Engine	—	1
Container Handlers	26 tons	3

Berth Nos. 3 to 6 are not equipped with Portal Cranes.

DANGEROUS CARGO: Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded either alongside or into lighters unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

LIGHTERAGE: Lighterage operations have now virtually ceased to exist.

A specially fitted pontoon (PM2) is available for the disembarkation/embarkation of Kroo labour for vessels at anchorage. This service is available throughout the day and night, as is the water supply by barge.

STEVEDORES: (See "Agent's Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements, information re explosives. For tankers discharging – total displacement and draft. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from vessels at stream undertaken by Sierra Leone Ports Authority stevedoring division.

Working hours alongside quay: Normal working hours from 0800 hrs. to 1200 hrs. and 1330 hrs. to 1700 hrs. Monday to Friday.

No meal-break but the hour 1200 hrs. to 1330 hrs. counts overtime.

Working at Stream: Discharging and/or loading to or from vessels effected 24 hours a day. Gangs can be arranged at anytime between 0730 hrs. and 1800 hrs. week-days. On Sundays and holidays work must be arranged on the previous day.

MEDICAL: Hospital facilities available.

TANKERS: *Kissy Oil Jetty:* In order that berthing/unberthing operations at Kissy Oil Jetty are carried out without delay Agencies are requested to furnish to the Harbour Master the following particulars, of vessel using Kissy Oil Terminal.

ETA: At least 24 hours' notice to be given.

Displacement and deadweight: The max. permitted displacement is 46,000 tons.

Draft forward and aft: Max. draft 11.90 m. (39 ft.).

Length overall: No restriction.

The time of berthing will be at the discretion of the Port Authority, dependent on tidal and weather conditions, and vessel's draft. This is normally on a flood tide and during daylight hours only.

Notice: Port Authority Circular No. HM/241/354 dated 14th January, 1981.

Oil Tankers Berthing Kissy Oil Jetty: In view of the strain experienced on the forward back springs during ebb tide on above-named jetty, vessels are to moor using double or more forward back springs.

This is necessary to avoid any damage to the discharge/loading arms on jetty.

Agents are advised to inform shipping companies that vessels are required to carry the necessary extra mooring ropes or wires.

Port Authority Pilots are to ensure prior to berthing vessels that sufficient moorings are onboard for extra forward back springs and separate bollards on jetty head are used for each spring.

DENSITY: 1018 to 1025.

FRESH WATER: Good fresh water is available at all quay berths and at Kissy Oil Jetty. There are also 2 water barges with a total capacity of approximately 350 tons.

(Supply Rates:	Old berths	Approx. 20/25 t.p.h.
Dependent on	New berths	Approx. 40/50 t.p.h.
Ship's intake)	Kissy Oil Jetty	Approx. 15/20 t.p.h.
	Barges	Approx. 25/30 t.p.h.

FUEL: A 24 hour Shell/Mobil bunkering service is available at all berths. The supply rate is up to 200 t.p.h. dependent on ship's intake.

The supply rate at Kissy Oil Jetty is 100 t.p.h. Thin fuel oil is not available at the latter jetty but is obtainable at Queen Elizabeth II Quay.

A limited supply of gas oil (Shell) is available ex-bowsers on the quay berths. Sufficient notice should be given to the Oil Company for this service.

Texaco/BP supply bunkers to vessels at anchorage with 3 barges of 750 tons capacity each, supply rate 200 t.p.h. 1 of their tugs also has a storage capacity of 40 tons.

A 24 hour pilotage service is available (including pilotage from the Fairway Buoy if requested) for all vessels requiring bunkers only.

GANGWAY/DECK WATCHMEN: Strongly recommended, available through Agent. It is suggested that gangway is raised after close of work.

OPENING/CLOSING HATCHES: By stevedores, except mechanical hatches.

CERTIFICATES:

Ship's Register.
Derat Certificate.
Deck Passengers Certificate.
Radio Certificate.

CUSTOMS ALLOWANCES: Tobacco, 40 cigarettes *or* 0.25 lb tobacco. Wine and/or Spirits, 0.25 bottles of spirit. Master — 200 cigarettes and 1 opened bottle of spirit.

IDENTIFICATION CARDS: Not required.

REPAIRS: All repairs if spares supplied.

DRY DOCKS: No dry docks in Freetown. Slipway of 600 tons capacity.

SURVEYORS: Mining and General Services Limited, P.O.Box 68, Freetown. Telex: 3226. Cables: Mags. Are Lloyd's Agents and undertake cargo surveys.

A Lloyd's Register approved surveyor is available.

REPATRIATION: Can be arranged.

AIRPORT: By bus and ferry to Lungi Airport, 1 hour journey. Served by regular airlines.

TIME: GMT throughout year.

HOLIDAYS: Several religious and anniversary holidays. Port works every day except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: For all emergencies dial 009.

EMERGENCY CO-ORDINATION CENTRE/S.A.R. LINK: Sierra Leone Ports Authority. Telex: 3262. Cables: Portman Freetown.

TELEPHONES: Not available for placing on board.

GENERAL: Always confirm time of entering harbour with the Aberdeen Hill Signal Station to ensure turn for berthing. Draft should be indicated.

SERVICES: Tank cleaning. Tank and hull scaling.

BANKS: Barclays Bank of Sierra Leone, P.O.Box 12, Siaka Stevens Street, Freetown.

Bank of Credit and Commerce International, Sparta Building, 10 Wilberforce Street, Freetown. Telex: 332.

Standard Bank Sierra Leone Ltd., Lightfoot Boston Street, Freetown.

STORING: Moderate quantities of stores are available and can be taken ex-quay. However no bonded stores' facilities exist.

SHORE LEAVE: Allowed. Identity cards must be carried.

DELAYS: No delays experienced.

SHIP SUPPLY SERVICE: Contact: Offshore Services Ltd., P.O.Box 376, Freetown.

DEVELOPMENTS: It is the Port Authorities' intention to surface the front and rear stacking areas at Berth Nos. 5 and 6 for use as a container park.

AUTHORITY: Sierra Leone Ports Authority, P.M.Bag 386, Freetown, Sierra Leone. *Tel:* 50989 or 50111. *Telex:* 3262. *Cables:* Portman FTN. *Contact:* W. Melling, General Manager.

PEPEL: 08.34 N. 13.04 W.

LOCATION: On Sierra Leone River, 15 miles upstream from Freetown. Approach Channel between Freetown anchorage and Pepel is fully buoyed. No night navigation.

DOCUMENTS: See "Freetown".

PILOTAGE: Private pilotage undertaken by mining Company's Pilots who board at Freetown Anchorage. 48 hours ETA required, cable "Mags Freetown Sierra Leone", giving ETA Fairway Buoy, quantity water/fuel required, asking for Free Pratique, and if Pilot required to Freetown Anchorage.

ANCHORAGE: See "Freetown".

RESTRICTIONS: Draft only, decided at discretion of Berthing Master. Entry daylight hours only. Channel between Pepel and Freetown is now deepened so that depth in channel is 38 ft. plus height of tide. According to official tide tables, range of high tides is approximately 7 ft. to 11 ft. above Admiralty Chart Datum.

MAX. SIZE: Length 840 ft., beam 128 ft., depth water 38 ft.* plus height of tide which ranges from 7 ft. to 11 ft. above Chart Datum. September to December additional draft restrictions due channel silting.

* The channel has not been maintained since 1975. Dredging is to take place.

HEALTH: See "Freetown", 48 hours' advance warning for Free Pratique.

TUGS: Not used.

BERTHING: Milton Margai Pier only. Loading up to 3,000 t.p.h. according to size of vessel.

New dolphin mooring system installed to permit handling larger ships. Depth alongside 45 ft. Shiploader max. boom height when in horizontal position is 71 ft. above Chart Datum, with max. outreach 87 ft. from berthing line. Loading rate 4,000 t.p.h. Under the new conditions, limiting dimensions for ships (which must be equipped with satisfactory mooring equipment): Length overall 840 ft. Moulded breadth 128 ft.

Permissible sailing draft with allowance made for safe navigation, of all ships will, as at present, remain absolutely at discretion of Berthing Master at Pepel or his deputy. It is possible that during the months of September to December every year an additional draft allowance will have to be imposed by reason of seasonal silting of the channel, but it is intended to carry out annual maintenance dredging.

Company will be prepared to consider acceptance of ships having dimensions in excess to those above but only after specific approval of fully detailed plans of each ship concerned and, in any event, not in excess of dimensions: Length overall 870 ft., moulded breadth 136 ft., moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.

STEVEDORES: Available.

FRESH WATER: Available, 48 hours' notice required.

FUEL: Limited supplies available, 48 hours' notice required.

TIME: GMT throughout year.

TELEPHONES: None available.

SHORE LEAVE: Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.

DELAYS: First come first served.

GENERAL: See "Freetown" for all general information.

NOTES

Please also advise Shipping Guides Ltd.

Singapore

SINGAPORE (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru): 01.16 N. 103.50 E. (See Plan Book)

DOCUMENTS:

4 Ship's Passenger Lists (1 copy for Customs).

4 Crew Lists (1 copy for Customs).

5 Cargo Manifests.

3 copies of Customs Declaration for fresh issue of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers.

Master, Mate, or authorised officer required to furnish information asked for by Officer in charge of Customs' Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

Immigration: 6 copies Crew List and 4 copies each of Disembarking and Through-passenger Lists on arrival. At departure, 2 copies Crew List and 2 copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

PSA: All vessels: General Declaration on arrival or departure.

Port Health: Entry Declaration. Derat or Exemption Certificate, Yellow Fever Certificates.

Crew Lists. Passenger Lists.

PSA (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

Shipmaster's Report: June 1982

If Master's name is not on the ship's Register then Agent requires Master's Certificate of Competency and Passport to obtain vessel's clearance.

ANCHORAGES: Third Schedule

Special Anchorages: The Special Anchorages designated by the Authority are as set out hereunder. The geographical co-ordinates of the designated Special Anchorages are based upon the origin at the Government Offices Building being in Lat. 01° 17′ 15.528″ N., Long. 103° 51′ 10.808″ E. The Charts affected are the Singapore Charts SP1, GSP1, 500, 501, 502 and the BA Metric Charts 2023, 3939, 2014, 2012, 2015, 1995, 2570, 2598, 2556, 2569, 2585 and 3831.

1. The following Anchorages shall be used exclusively for the purposes stated herein in this Schedule.

1.1 *Eastern Explosives Anchorage*

Purpose – For vessels loading or discharging Explosives and Dangerous Goods Group 1 or vessels in transit with such cargo on board.

Latitude:	*Longitude:*
01° 18′ 18″ N.	103° 59′ 46″ E.
01° 18′ 18″ N.	104° 00′ 27″ E.
01° 17′ 39″ N.	104° 01′ 12″ E.
01° 16′ 53″ N.	103° 59′ 46″ E.

1.2 *Eastern Special Purposes Anchorage*

Purpose – For vessels under Arrest, Damaged Vessels, Deep-Draft Vessels requiring repairs, on prior permission of the Port Master.

Latitude:	*Longitude:*	
01° 18′ 18″ N.	103° 56′ 37″ E.	– Bedok Jetty Head
01° 18′ 18″ N.	103° 59′ 46″ E.	
01° 16′ 53″ N.	103° 59′ 46″ E.	
01° 16′ 38″ N.	103° 59′ 19″ E.	
01° 16′ 38″ N.	103° 56′ 37″ E.	

1.3 *Eastern Petroleum Anchorage B*

Purpose – For vessels loaded with Petroleum and Non-Gas-Free Vessels.

Latitude:	*Longitude:*	
01° 17′ 23″ N.	103° 55′ 06″ E.	– Rear Beacon (Resilient)
01° 17′ 23″ N.	103° 56′ 37″ E.	
01° 16′ 38″ N.	103° 56′ 37″ E.	
01° 16′ 38″ N.	103° 56′ 07″ E.	
		– Forward Beacon (Resilient)

1.4 *Laid-Up Vessels Anchorage*

Purpose – For vessels laid up in the port.

Latitude:	*Longitude:*
01° 18′ 00″ N.	103° 55′ 41″ E.
01° 18′ 00″ N.	103° 56′ 37″ E.
01° 17′ 23″ N.	103° 56′ 37″ E.
01° 17′ 23″ N.	103° 55′ 41″ E.

1.5 *Small Craft Anchorage*

Purpose – For harbour tugs, pontoons, barges and other small craft.

Latitude:	*Longitude:*	
01° 18′ 00″ N.	103° 55′ 06″ E.	
01° 18′ 00″ N.	103° 55′ 41″ E.	
01° 17′ 23″ N.	103° 55′ 41″ E.	
01° 17′ 23″ N.	103° 55′ 06″ E.	– Rear Beacon (Resilient)

1.6 *Eastern Petroleum Anchorage A*

Purpose – For vessels loaded with Petroleum and Non-Gas-Free Vessels.

Latitude:	*Longitude:*	
01° 15′ 26″ N.	103° 53′ 55″ E.	
01° 16′ 07″ N.	103° 54′ 59″ E.	– Timor Beacon (Resilient)
01° 15′ 21″ N.	103° 55′ 49″ E.	
01° 14′ 43″ N.	103° 54′ 40″ E.	

1.7 *Eastern Quarantine and Immigration Anchorage*

Purpose – For vessels arriving from the East and seeking Quarantine and Immigration Clearance.

Latitude:	*Longitude:*
01° 14′ 41″ N.	103° 52′ 46″ E.
01° 15′ 08″ N.	103° 53′ 27″ E.
01° 14′ 27″ N.	103° 54′ 10″ E.
01° 14′ 00″ N.	103° 53′ 23″ E.

1.8 *Man-of-War Anchorage*

Purpose – For visiting warships.

Latitude:	*Longitude:*	
01° 17′ 00″ N.	103° 54′ 01″ E.	– Approach Beacon (Resilient)
01° 17′ 00″ N.	103° 53′ 25″ E.	
01° 16′ 31″ N.	103° 53′ 25″ E.	
01° 16′ 31″ N.	103° 54′ 32″ E.	

1.9 *Explosives Anchorage for Lighters and Barges*

Purpose – For small craft loaded with explosives.

Latitude:	*Longitude:*	
01° 17′ 08″ N.	103° 54′ 01″ E.	
01° 17′ 08″ N.	103° 53′ 39″ E.	
01° 17′ 00″ N.	103° 53′ 39″ E.	
01° 17′ 00″ N.	103° 54′ 01″ E.	– Approach Beacon (Resilient)

1.10 *Eastern Working Anchorage*

Purpose – For general purposes of working cargo and/or receiving stores, water and bunkers or awaiting berth.

Latitude:	*Longitude:*	
01° 17′ 00″ N.	103° 52′ 54″ E.	
01° 16′ 00″ N.	103° 52′ 05″ E.	
01° 16′ 05″ N.	103° 51′ 45″ E.	
01° 16′ 00″ N.	103° 51′ 43″ E.	
01° 16′ 07″ N.	103° 51′ 29″ E.	
01° 15′ 02″ N.	103° 51′ 52″ E.	– Outer Shoal Light Tower
01° 14′ 41″ N.	103° 52′ 17″ E.	
01° 14′ 41″ N.	103° 52′ 46″ E.	
01° 16′ 07″ N.	103° 54′ 59″ E.	– Timor Beacon (Resilient)
01° 16′ 31″ N.	103° 54′ 32″ E.	
01° 16′ 31″ N.	103° 53′ 25″ E.	
01° 17′ 00″ N.	103° 53′ 25″ E.	

1.11 *Kuala Johor Anchorage* (closed)

Purpose – For general purposes on prior permission of the Port Master.

Latitude:	*Longitude:*
01° 22′ 59″ N.	104° 01′ 04″ E.
01° 22′ 48″ N.	104° 00′ 43″ E.
01° 21′ 23″ N.	104° 02′ 06″ E.
01° 21′ 34″ N.	104° 02′ 28″ E.

1.12 *Anchorage for Awaiting Singapore Pilot*

Purpose – For vessels awaiting Singapore Pilots to East Johor Strait.

Latitude:	*Longitude:*
01° 20′ 00″ N.	104° 03′ 12″ E.
01° 20′ 00″ N.	104° 03′ 42″ E.
01° 19′ 18″ N.	104° 03′ 54″ E.
01° 19′ 18″ N.	104° 04′ 24″ E.

1.13 *Western Quarantine and Immigration Anchorage*

Purpose – For vessels seeking Quarantine and Immigration Clearance during the North-East Monsoon.

Latitude:	*Longitude:*	
01° 13′ 35″ N.	103° 49′ 42″ E.	– Selegi (No. 15) Bn
01° 13′ 08″ N.	103° 48′ 41″ E.	
01° 12′ 45″ N.	103° 49′ 08″ E.	
01° 12′ 48″ N.	103° 49′ 51″ E.	
01° 13′ 09″ N.	103° 50′ 02″ E.	

1.14 *Western Working Anchorage*

Purpose – Generally for any or all of the following purposes – working of cargo, receiving stores, water and bunkers or awaiting berth.

Latitude:	*Longitude:*	
01° 15′ 27″ N.	103° 48′ 10″ E.	
01° 15′ 03″ N.	103° 47′ 14″ E.	
01° 14′ 18″ N.	103° 48′ 05″ E.	
01° 13′ 58″ N.	103° 47′ 15″ E.	
01° 12′ 59″ N.	103° 48′ 21″ E.	
01° 13′ 35″ N.	103° 49′ 42″ E.	– Selegi (No. 15) Bn
01° 14′ 59″ N.	103° 49′ 00″ E.	– Palawan (No. 44) Bn

1.15 *Western Petroleum Anchorage*

Purpose – For vessels loaded with Petroleum and for Non-Gas-Free Vessels.

Latitude:	*Longitude:*
01° 15′ 03″ N.	103° 47′ 14″ E.
01° 14′ 42″ N.	103° 46′ 25″ E.
01° 13′ 58″ N.	103° 47′ 15″ E.
01° 14′ 18″ N.	103° 48′ 05″ E.

1.16 *Reserved Anchorage*

Purpose – For LASH Ship operations and vessels requiring emergency repairs or damaged vessels.

Latitude:	*Longitude:*
01° 16′ 49″ N.	103° 46′ 06″ E.
01° 16′ 07″ N.	103° 45′ 49″ E.
01° 15′ 42″ N.	103° 46′ 20″ E.
01° 16′ 10″ N.	103° 47′ 11″ E.
01° 16′ 23″ N.	103° 46′ 42″ E.
01° 16′ 16″ N.	103° 46′ 33″ E.

1.17 *Dangerous Goods Anchorage*

Purpose – For vessels loading or discharging Explosives or Dangerous Goods Group 1 or vessels in transit with such cargo on board.

Latitude:	*Longitude:*
01° 17′ 03″ N.	103° 45′ 18″ E.
01° 16′ 26″ N.	103° 45′ 25″ E.
01° 16′ 07″ N.	103° 45′ 49″ E.
01° 16′ 29″ N.	103° 46′ 06″ E.
01° 16′ 36″ N.	103° 45′ 51″ E.
01° 16′ 46″ N.	103° 45′ 54″ E.

1.18 *Coastal Anchorage A*

Purpose – For coastal vessels of 76 m. in length or more awaiting berth at Pasir Panjang or working cargo.

Latitude:	*Longitude:*
01° 16′ 46″ N.	103° 45′ 54″ E.
01° 16′ 36″ N.	103° 45′ 31″ E.
01° 16′ 16″ N.	103° 46′ 33″ E.
01° 16′ 23″ N.	103° 46′ 42″ E.

Coastal Anchorage B (closed)

Purpose – For coastal vessels of less than 76 m. in length awaiting berth at Pasir Panjang or working cargo.

Latitude:	*Longitude:*	
01° 17′ 22″ N.	103° 46′ 05″ E.	
01° 17′ 00″ N.	103° 45′ 59″ E.	– Retan Bn
01° 16′ 48″ N.	103° 46′ 19″ E.	
01° 16′ 27″ N.	103° 46′ 47″ E.	
01° 16′ 34″ N.	103° 46′ 57″ E.	
01° 17′ 01″ N.	103° 46′ 17″ E.	
01° 17′ 11″ N.	103° 46′ 22″ E.	

1.19 *West Jurong Anchorage*

Purpose – For vessels awaiting berth, working cargo, vessels under repairs, or oil rigs.

Latitude:	*Longitude:*	
01° 14′ 54″ N.	103° 38′ 48″ E.	
01° 14′ 54″ N.	103° 36′ 30″ E.	
01° 17′ 00″ N.	103° 36′ 30″ E.	– Alert Shoal Seafix Station
01° 17′ 00″ N.	103° 38′ 48″ E.	

1.20 *Sultan Shoal Quarantine and Immigration Anchorage*

Purpose – For vessels arriving from the West and seeking Quarantine and Immigration Clearance.

Latitude:	*Longitude:*
01° 13′ 44″ N.	103° 39′ 51″ E.
01° 13′ 21″ N.	103° 39′ 03″ E.
01° 13′ 49″ N.	103° 37′ 36″ E.
01° 14′ 32″ N.	103° 38′ 46″ E.

1.21 *West Jurong Petroleum Anchorage*

Purpose – For vessels loaded with Petroleum and for Non-Gas-Free Vessels.

Latitude:	*Longitude:*
01° 13′ 56″ N.	103° 37′ 14″ E.
01° 14′ 54″ N.	103° 38′ 48″ E.
01° 14′ 54″ N.	103° 36′ 30″ E.
01° 14′ 22″ N.	103° 36′ 30″ E.

1.22 *Selat Pauh Anchorage*

Purpose – For vessels under arrest, laid-up or other vessels on prior permission of the Port Master.

Latitude:	*Longitude:*
01° 13′ 25″ N.	103° 45′ 34″ E.
01° 13′ 19″ N.	103° 45′ 01″ E.
01° 13′ 29″ N.	103° 43′ 51″ E.
01° 13′ 47″ N.	103° 43′ 09″ E.
01° 13′ 35″ N.	103° 42′ 47″ E.
01° 13′ 03″ N.	103° 43′ 02″ E.

No vessel shall, except in an emergency, anchor in an area outside its appropriate designated anchorage, even if such an area is not designated as a "Prohibited Anchorage Area".

Also see "VHF" and "Notice".

PILOTAGE: Also see "Notice".

1. *General*

1.1 In exercise of the powers conferred by subsection (1) of section 74 of the Port of Singapore Authority Act (Cap. 173), it is directed that all vessels specified in Table I in paragraph 3 below, unless exempted by the Authority, are to be under pilotage by an Authority Pilot when moving within the Pilotage District. This directive will come into force with effect from 1st June, 1983.

1.2 Vessels belonging to or operated by the Port of Singapore Authority and the Republic of Singapore Navy are not subjected to this directive.

2. *Pilotage District*

The Pilotage District is described in the Port of Singapore Authority (Pilotage District) Notification 1980. For the purpose of this circular, the Pilotage District is divided into four areas viz., "A", "B", "C" and "D". These areas are defined in Annex I and depicted in Annex II.

3. *Compulsory Pilotage*

3.1 Compulsory pilotage will be applicable to all liquefied gas or chemical carriers which have not been certified free from flammable vapours by the Authority Chemist.

3.2 Vessels to which compulsory pilotage applies, when moving within a particular area of the pilotage District, are as indicated in Table I.

Table I

Area of Movement	*Vessels to which compulsory pilotage applies*
"A"	Every vessel of 300 g.r.t. and above.
"B"	Every vessel of 5,000 g.r.t. and above.
"C"	Every vessel of 300 g.r.t. and above or overall length of 45 m. and above.
"D"	Every vessel of 300 g.r.t. and above or of 30 m. height* and above.

Remarks: *Height referred to is the height of highest point of the vessel (including the highest point of cargo, temporary or permanent structure or equipment onboard) above waterline.

4. *Pilotage Exemption*

4.1 Vessels to which pilotage exemption may be granted for movement within a particular area of the Pilotage District are as indicated in the Table II below:

Table II

Area of Movement	*Vessels to which pilotage exemption may be granted*
"A"	A vessel of:
	(a) *Less than 300 g.r.t.:* A blanket exemption is granted unless otherwise specified by the Port Master.
	(b) *300 g.r.t. and above but less than 2,000 g.r.t.:* Exemption may be granted provided that the vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption, the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III).
	(c) *2,000 g.r.t. and above but less than 5,000 g.r.t.:* Exemption may be granted subject to the following conditions: (i) The vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s) (See Annex III). (ii) In the case of a sea-going vessel, the registered Master shall have brought the vessel into and out of Port on at least 6 occasions within the 12 months immediately preceding the date of application for exemption. For subsequent exemptions, the Master shall have entered and left the Port on at least 2 occasions. However, the last of the 2 occasions shall not be more than 6 months prior to the date of application of renewal of exemption. (iii) In the case of a licensed harbour craft, the registered Master shall have served onboard as Master for a period of at least 3 months prior to the application for exemption; and (iv) The registered Master has satisfied the Port Master of his knowledge of local waters, regulations, etc.
"B"	No exemption from compulsory pilotage.
"C"	No exemption from compulsory pilotage.
"D"	A vessel of:
	(a) *Less than 300 g.r.t. and of 30 m. height* and above:* Blanket exemption is granted provided the vessel does not enter, leave or transit the Traffic Information Area.
	(b) *300 g.r.t. and above but less than 2,000 g.r.t. and of less than 30 m. height*:* Exemption may be granted provided that the vessel if fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption for the intended movement the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III);
	(c) *300 g.r.t. and above but less than 2,000 g.r.t. and of 30 m. height* and above:* Exemption may be granted provided that the vessel does not enter, leave or transit the Traffic Information Area and is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption, the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III).

Remarks: *Height referred to is the height of highest point of the vessel (including the highest point of the vessel, the highest point of cargo, temporary or permanent structure or equipment onboard) above waterline.

All Masters of vessels not under pilotage are reminded of the height restrictions in the various areas of the Port indicated in the charts.

4.2 All vessels other than liquefied gas or chemical carriers entering, leaving or shifting within the Sultan Shoal Quarantine and Immigration Anchorage are exempted from pilotage.

4.3 Exemption, when granted, is for the movement other than berthing and unberthing. For berthing and unberthing, the express permission of the Owners/Operators of the berth is also required.

4.4 All exempted vessels, when underway within the Pilotage Areas are to display by day the International Code Flag "N".

4.5 All Masters of vessels are advised not to hamper large or deep draft vessels in the restricted channels of the Port.

4.6 Application forms for pilotage exemption for vessels of 2,000 g.r.t. and above but less than 5,000 g.r.t. can be obtained from Port Master's Department, 20th Storey, Tanjong Pagar Complex, Singapore 0208.

5. *Towage with Pilotage Exemption*

5.1 Only tugs with harbour craft licence and which are not required to be under pilotage or which have been granted exemption are permitted to tow vessels subject to the following conditions:

(i) For movement within Area "A", the aggregate g.r.t. of the tug(s) and tow(s) is less than 2,000.

(ii) For movement within Area "B", the aggregate g.r.t. of the tug(s) and tow(s) is less than 5,000.

(iii) For movement within Area "D", the aggregate g.r.t. of the tug(s) and tow(s) is less than 2,000 and the height* of either is less than 30 m. (Where the tug(s) and tow(s) are required to enter, leave or transit the Traffic Information Area and when either the height of the tug(s) or tow(s) is 30 m. and above, compulsory pilotage shall apply).

(iv) The aggregate engine power of the tug(s) towing vessels of 300 g.r.t. and above is not less than 150 kilowatts (200 b.h.p.).

(v) Compliance with Regulation 49 (3) of the Singapore Port Regulations 1977.

6. *Pilot Boarding and Disembarkation Grounds*

6.1 The 5 Pilot Boarding Grounds for vessels coming into port are:

(i) Eastern Boarding Ground "A" – in position Lat. 01° 13.52′ N., Long. 103° 53.55′ E.

(ii) Eastern Boarding Ground "B" – in position Lat. 01° 15.50′ N., Long. 103° 57.50′ E. This boarding ground is to be used by all tankers requiring Pilots when arriving from the East and proceeding to the appropriate anchorages in the Eastern sector of the port. Other vessels may also use this boarding ground to pick up Pilots provided special arrangement has been made with Port Operations Centre. Anchoring is strictly prohibited at this boarding ground as it is within the submarine cable area.

(iii) Southern Boarding Ground – South of Sebarok Beacon within port limits. (To be used only by special arrangement with Port Operations Centre).

(iv) Western Boarding Ground – in position Lat. 01° 13.73′ N., Long. 103° 36.50′ E.

(v) East Johore Strait Boarding Ground – S.E. of Johore Shoal Buoy in position Lat. 01° 18.00′ N., Long. 104° 05.50′ E.

6.2 The 10 Pilot Disembarkation Grounds as in positions are follows:

No. 1: Lat. 01° 18.47′ N., Long. 104° 05.72′ E.
No. 2: Lat. 01° 16.95′ N., Long. 103° 59.77′ E.
No. 3: Lat. 01° 15.50′ N., Long. 103° 56.90′ E.
No. 4: Lat. 01° 14.25′ N., Long. 103° 54.78′ E.
No. 5: Lat. 01° 13.48′ N., Long. 103° 53.30′ E.
No. 6: Lat. 01° 15.50′ N., Long. 103° 51.87′ E.
No. 7: Lat. 01° 11.75′ N., Long. 103° 49.45′ E.
No. 8: Lat. 01° 10.68′ N., Long. 103° 46.98′ E.
No. 9: Lat. 01° 12.80′ N., Long. 103° 39.28′ E.
No. 10: Lat. 01° 13.97′ N., Long. 103° 37.37′ E.

Vessels may, at the discretion of Port Operations Centre, be directed to make use of the nearest disembarkation grounds.

7. *Pilotage Orders*

7.1 When placing orders for pilotage service, as much advance notice as possible should be given.

7.2 Pilotage service orders may be placed by the following means:

(i) VHF Radio-telephone: For vessels proceeding to or leaving berths in the East Johore Strait orders should be placed on Channel 21 and on Channels 12 or 20 for other areas in the port.

(ii) Telephone: Orders should be placed with Sembawang Control for service in the East Johore Strait and for all other areas, the Port Operations Centre.

(iii) Telex: Companies are encouraged to use telex. For service in the East Johore Strait the telex should be addressed to Sembawang Control, Telex: RS 35962, Answerback: Semco. For all other areas, the telex should be addressed to Port Operations Centre, Telex: RS 34970, Answerback: Portpm RS 34970.

7.3 When placing orders through VHF radio-telephone, telephone or telex the following information should be provided:

(a) Date and time of message transmitted.

(b) Agent's name and valid PSA account number.

(c) Name of vessel, her call sign and nationality.

(d) Vessel's g.r.t., length overall, height of highest point of the vessel above waterline (including highest point of cargo, temporary or permanent structure or equipment on board).
For vessel moving into and out of Area "C", state the max. beam of the vessel.

(e) Date, time and description of pilotage service required.

(f) For arriving vessels, state whether Health/Immigration Clearance is required. State also the applicable Pilot Boarding Ground or if the vessel is at the anchorage, her location in grid reference (refer to Singapore Chart GSP1 on Anchorages and Aids to Navigation).

7.4 Personal application for pilotage service is necessary for companies which do not have accounts with the Port of Singapore Authority. The application should be made at the Pilotage and Tugs Section of Port Master's Department, 21st Storey, Tanjong Pagar Complex, Singapore 0208.

7.5 Vessels are to confirm to Port Operations Centre their ETA at the specified boarding grounds, 2 to 3 hours before arrival. For those bound for the East Johore Strait, confirmation should be made to Sembawang Control, 3 hours before arrival.

7.6 Vessels at anchor and requiring Pilots should display the "White over Red" lights by night and fly the "G" flag by day.

7.7 The Authority reserves the right not to accept orders for Pilot service for vessels at the anchorages, with the exception of the Quarantine/Immigration Anchorages, if the vessels have not reported their anchoring position to Port Operations Centre. All vessels above 300 g.r.t. must report their final anchoring position in the port in terms of bearing and distance from the following reference points:

(i) Eastern Sector	Katong Beacon (in position: Lat. 01° 17.65′ N., Long. 103° 53.30′ E.)
(ii) Western Sector	Tg Rimau Beacon (in position: Lat. 01° 15.60′ N., Long. 103° 48.50′ E.)
(iii) West Jurong and Selat Pauh Anchorages	Sultan Shoal Lighthouse (in position: Lat. 01° 14.38′ N., Long. 103° 38.98′ E.)

8. *Traffic Information System*

Masters of vessels intending to enter, transit or leave the East Johore Strait are to refer to the Port Circular in force (presently No. 33 of 1984 dated 4th May, 1984) on Traffic Information System for Ships Transiting The Serangoon Harbour and where applicable, comply with the directives given therein.

9. *Access to Vessels*

9.1 Mariners are reminded that Pilots and other Government Officers have every right, on grounds of personal safety, to refuse service unless a safe and satisfactory means of access to the vessel is provided. The safety requirements in respect of pilot ladders, should be in accordance with Regulation 17 of Chapter 5 of the SOLAS Convention 1974.

9.2 In the case of accommodation ladders and shore gangways, the following should be complied with:

(i) Accommodation Ladders

(a) The embarkation and disembarkation of Pilots and Government Officers are to be supervised by a responsible Officer of the ship.

(b) The accommodation ladder is to be in good condition, secured and properly illuminated at night. The landing platform is to be properly adjusted to provide safe access.

(c) A manrope is to be attached to the lower bridle in order to provide a good handhold for boarding, and a lifebuoy with self-igniting light is to be available close to the upper platform.

(d) Discharges in the way of the accommodation ladder are to be properly covered or stopped while the ladder is in use.

(ii) Vessel and Shore Gangways

(a) Where a vessel's gangway or a shore gangway is used when the vessel is berthed alongside a wharf, the gangway is to be landed squarely onto the vessel and wharf. No person other than those engaged in the rigging of the gangway should be permitted to embark or disembark before it is properly secured.

(b) Where the gangway is landed onto the ship's bulwark, steps and adequate handholds are to be provided for safe and convenient access.

(c) The gangway shall be adequately illuminated at night and tended by a watchman.

(d) When a shore gangway is used, Masters are advised not to permit it being landed onboard before crew members of the vessel are available to receive it.

10. *Signal Lamp*

During the hours of darkness, all piloted vessels are required to have an Aldis lamp ready for use.

11. Port Circular No. 45 of 1981, dated 8th June, 1981 is hereby cancelled.

Annex I:

Pilotage District Areas

1. Area "A" – is defined as that part of the Pilotage District Westwards of the line joining the following positions including the area up to the causeway in the Johore Strait:

(a) Lat. 01° 16.27′ N., Long. 103° 51.43′ E.
(b) Lat. 01° 15.03′ N., Long. 103° 51.87′ E.
(c) Lat. 01° 14.68′ N., Long. 103° 52.28′ E.
(d) Lat. 01° 14.68′ N., Long. 103° 52.77′ E.
(e) Lat. 01° 13.35′ N., Long. 103° 51.87′ E.
(f) Lat. 01° 12.73′ N., Long. 103° 52.12′ E.

2. Area "B" – is defined as that part of the Pilotage District excluding Area "C" Marina Bay and Kallang Basin Eastward of the line joining the positions referred to in paragraph 1 above up to the line joining the following positions:

(a) Lat. 01° 20.55′ N., Long. 103° 59.80′ E.
(b) Lat. 01° 20.00′ N., Long. 104° 02.80′ E.

3. Area "C" – is defined as follows:

From a position in Lat. 01° 17.89′ N., Long. 103° 51.98′ E., by a straight line to a position in Lat. 01° 17.77′ N., Long. 103° 51.97′ E., thence by a straight line to a position in Lat. 01° 17.63′ N., Long. 103° 51.97′ E., thence along the coastline to a position in Lat. 01° 17.38′ N., Long. 103° 52.01′ E., thence by a straight line to a position in Lat. 01° 17.07′ N., Long. 103° 52.11′ E., thence by a straight line to a position in Lat. 01° 16.91′ N., Long. 103° 52.32′ E., thence by a straight line to a position in Lat. 01° 16.74′ N., Long. 103° 52.45′ E., thence by a straight line to a position in Lat. 01° 16.57′ N., Long. 103° 52.53′ E., thence by a straight line to a position in Lat. 01° 16.68′ N., Long. 103° 52.73′ E., thence by a straight line to a position in Lat. 01° 16.83′ N., Long. 103° 52.52′ E., thence by a straight line to a position in Lat. 01° 17.04′ N., Long. 103° 52.33′ E., thence by a straight line to a position in Lat. 01° 17.33′ N., Long. 103° 52.15′ E., thence by a straight line to a position in Lat. 01° 17.63′ N., Long. 103° 52.05′ E., thence by a straight line to a position in Lat. 01° 17.76′ N., Long. 103° 52.03′ E., thence by a straight line to a position in Lat. 01° 17.85′ N., Long. 103° 52.04′ E., thence by a straight line to the point of origin.

4. Area "D" – is defined as that part of the Pilotage District Northwards of the line joining the following positions up to the causeway in the Johore Strait.

(a) Lat. 01° 20.55′ N., Long. 103° 59.80′ E.
(b) Lat. 01° 20.00′ N., Long. 104° 02.80′ E.
(c) Lat. 01° 20.00′ N., Long. 104° 03.17′ E.
(d) Lat. 01° 19.55′ N., Long. 104° 03.67′ E.
(e) Lat. 01° 18.75′ N., Long. 104° 04.40′ E.
(f) Lat. 01° 18.30′ N., Long. 104° 05.63′ E.
(g) Lat. 01° 19.30′ N., Long. 104° 05.78′ E.

Annex II: See "Plan Book".

Annex III: Reporting Stations

Station	*Function*	*VHF Channel*	*Frequency (MHz)*
Port Operations Centre	General Reporting	12	156.60
	Pilotage Service and Information	20	157.00 161.60
Sembawang Control	Reporting Station for East Johor Strait	21	157.05 161.65
Jurong Control	Reporting Station for Jurong Area	21	157.05 161.65

NAVIGATIONAL CHANNELS:

Name	*Controlling Depth*
Johor Shoal to Johor Port Water Front	12.5 m.
Johor Port Water Front to Sembawang Shipyard	11.6 m.
Sembawang Shipyard to Ordnance Reach	11.0 m.
Approach Channel to Tg. Pagar Container Terminal	12.0 m.
East Keppel Fairway	10.1 m.
West Keppel Fairway	14.8 m.
Sisters Fairway (Selat Tg Hakim)	18.1 m.
Jong Fairway	14.3 m.
Sinki Fairway (In Channel)	14.2 m.
Selat Pandan (Out Channel)	12.5 m.
Western Approach to Esso SBM (Dredged Channel at Selat Sinki)	20.8 m.
Pesek Fairway	12.3 m.
East Jurong Fairway	12.6 m.
Jurong Fairway	12.7 m.
West Jurong Fairway	10.6 m.
Selat Sakra	10.2 m.

Keppel Harbour Aerial Cableway – Vertical Clearance: The vertical clearance of Aerial Cableway across Keppel Harbour is 56 m. above MHWS or 57 m. above MSL.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Also see "Notice".

Inward Health Clearance of Ships:

1. *Revised Inward Health Clearance Procedure*

1.1 With effect from 1st April, 1980, Radio Pratique will be introduced to replace the present practice of granting Inward Health Clearance of ships either at the quarantine anchorages and/or by Radio Provisional Pratique.

1.2 Under the revised procedure, all ships from infected ports (except those stated in para 2.10) will not be required to anchor on arrival at the quarantine anchorages and await for inspection and health clearance by the Port Health Officer. Instead, they should apply for "Radio Pratique".

2. *How to obtain "Radio Pratique"*

2.1 The Master/Agent shall notify the Port Health Office between 8 hours and 24 hours prior to the ship's arrival in Singapore stating that all the crew and passengers are healthy on board; that the ship is in possession of a valid DC/DEC; that there is no death on board; that there is no mortality or illness among rodents; and that Radio Pratique is requested for.

2.2 The notification may be made by cable or wireless, radio telephone or VHF radio Channel 14 to the Port Health Office. The telephone number of the Port Health Office is 2222585.

2.3 If the ship is not equipped with a radio transmitter, the Master or the Agent must notify the Port Health Office whenever practicable before arrival or otherwise immediately on arrival. The ship's Agent may apply for Radio Pratique by completing an application form in Appendix I and handing it over to the Port Health Office.

2.4 The Port Health Office will grant Free Pratique on receipt of the information stated in para. 2.1 and 2.3. The granting of Radio Pratique merely clears the ship in so far as the Port Health Office is concerned. It does not exempt the ship from the requirements of other Authorities.

2.5 On arrival in the working anchorage or alongside the wharves, the Master, Owner or Agent is required to produce to the Port Health Officer, the following documents for verification:–

(a) Entry Declaration signed by the Master;
(b) DC/DEC for the ship;
(c) crew and passenger list.

2.6 These documents should be produced to the Port Health Office for verification not later than 12 hours after arrival of the ship. Port health endorsements for Outward Port Clearance will also be granted at the same time.

2.7 Of the vessels granted Radio Pratique, 10% will be randomly selected and inspected by Port Health Officers on arrival at the working anchorages or alongside the wharves.

2.8 The Port Health Officer reserves the right to examine any ship and the right to require any vessel granted Radio Pratique to return to the Eastern Quarantine Anchorage for Inward Health Clearance, should he subsequently deem it necessary.

2.9 The Master/Owner/Agent is responsible for the compliance of any health requirement and/or correction of any health irregularity immediately after arrival.

2.10 Radio Pratique will not be granted to the following categories of ships which will be required to anchor on arrival at the Eastern Quarantine Anchorage for inspection by the Port Health Officer:–

(a) Vessels which have been in a plague infected area within 60 days prior to arrival in Singapore;
(b) Vessels with illness on board, specifically with the following signs and symptoms:–
  (i) temperature of 38°C or greater or persisted for more than 48 hours and accompanied or followed by one or more of these signs: rash, jaundice, glandular swelling;
  (ii) diarrhoea severe enough to interfere with work or normal activity.
(c) Vessels with a death on board;
(d) Vessels with dead rodents on board.

2.11 The Master/Agent of a ship under any of the categories in para 2.10 shall:–

(a) notify Port Health Office not more than 12 hours and where practicable, not less than 4 hours before arrival;
(b) display the appropriate day or night signal when the ship enters the Singapore Port Limit;
(c) anchor at the Eastern Quarantine Anchorage and until "Free Pratique" has been obtained, ensure that no person, other than a Pilot, Immigration Officer or Customs Officer, boards or leaves the ship without the permission of Port Health Officer.

2.12 Masters, Owners and Agents of vessels wishing to have further information should contact the Port Health Office at 7B Keppel Road number 06-07/09 Tanjong Pagar Complex, Singapore 0208, or telephone number 2226924/2222585.

Appendix 1:

To: The Port Health Officer, Singapore

RADIO PRATIQUE

1. I hereby wish to apply for a Radio Pratique for my vessel ______________________________, Port of Registration____________________which is expected to arrive in Singapore at ____________hours on____________.

2. A copy of the telegram/cable by the Master of the vessel with answers to the questionnaire on health conditions of the vessel is attached.

3. I hereby declare that the information given below is correct:

(a) Name of port and date of visit during the last 14 days:

Name of Port	Date of Arrival	Date of Departure

	ANSWER YES or NO
(b) Has there been any case or suspected case of plague, cholera, yellow fever or smallpox on board?	____________
(c) Has plague occurred or suspected among the rodents on board during the voyage, or has there been an abnormal mortality among them?	____________
(d) Has any person died on board during the voyage other than as a result of accident?	____________
(e) Is there a sick person on board now?	____________
(f) Is there on board or has there been during the voyage any case of illness which you suspect to be of an infectious nature? In the absence of a surgeon on board, the Master should regard the following symptoms and signs as grounds for suspecting the existence of an infectious disease: (i) Fever accompanied by prostration or persisting for 7 days or more; (ii) fever with glandular swelling; (iii) acute skin rash or eruption with or without fever; (iv) severe diarrhoea with symptoms of collapse; (v) jaundice accompanied by fever.	
(g) Are you aware of any other condition on board which may lead to the spread of disease?	____________
(h) Is the Derat Certificate/Derat Exemption Certificate for the vessel valid?	____________

Date:____________ ____________________

SIGNATURE & STAMP OF AGENT

Note: Penalty for untrue declaration is a fine not exceeding $5,000/–.

IMMIGRATION CLEARANCE: Also see "Notice".

Inward Clearance Appendix 'A':

Physical Clearance: Owners/Agents requesting clearance for vessels are required to contact the appropriate offices and to follow the procedures as outlined below:–

Location for Clearance	*Office covering the Location*	*Telephone No./ VHF Channel*	
Eastern/Western and Sultan Shoal Quarantine/ Immigration Anchorages & PSA Wharves	Immigration Finger Pier Checkpoint	2226012/VHF Channel 14	24 hours
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818	
Sembawang Port	Immigration Woodlands Checkpoint	2692531	

The Owners/Agents contacting the office regarding the ETA of vessels are required to give the following information. Such ETAs should be given at least 24 hours before the arrival of the vessels. The office for this purpose provides a 24-hour service.

(i) Name of Vessel;
(ii) Location for clearance of the Vessel;
(iii) Expected time of arrival (ETA);
(iv) Last/Next Port of Call;
(v) Agents of Vessel;
(vi) Owners of Vessel;
(vii) Number of Passengers, if any, on board;
(viii) Stowaway/Unauthorised persons/survivors, if any, on board.

Any vessel arriving in Singapore, excluding those vessels which have been granted Advance Immigration Clearance, must proceed to the prescribed Immigration/Quarantine Anchorage for Immigration Inward Clearance.

Vessels on arrival must exhibit the necessary signals for easy identification and speedy clearance. The Immigration signal shall be:–

(i) by day, the flags in the International Code of Signals corresponding to:–
  (a) the numerals "25" in respect of vessels not carrying passengers; and
  (b) the numerals "34" in respect of vessels carrying passengers.
(ii) by night, in every case, 2 green lights mounted vertically, 6 ft. apart, visible all-round the horizon for a distance of at least 2 miles.

Agents must ensure that the vessel has a proper and secure gangway which is ready on arrival so that Immigration Officers can board the vessel immediately. The use of rope-ladders is discouraged. Co-operation in this regard will enable Immigration Officers to grant fast clearance.

Procedure on Board

The Master is required to submit 7 copies of the Crew List and if there are passengers, 4 sets of the Passenger List to the Clearing Officer who boards the vessel. The Master has to certify on the original Crew List that the details in the lists submitted are correct and that there are no stowaways or unauthorised persons on board.

If requested by the Clearing Officer, seaman's books/travel documents will have to be produced. Crew members may be required to present themselves before the Officer.

All passengers shall present themselves before the Clearing Officer. Disembarking passengers shall complete the Disembarkation Forms (IMM 23A). Agents may obtain the forms from the Immigration Field Division Headquarters.

The Master shall execute the Seaman's Security Bond, bonding crew members (except the Master) for $1,000/–each. If there are persons who are refused entry by the Clearing Officers, the Master shall execute the Security Bond, bonding such persons who are refused entry, for not less than $2,000/– each.

Summary action will be served on the Master giving him the names of all those who have been refused entry, and/or the breakdown figures of the transit passengers and disembarking passengers.

When clearance has been granted, the Master shall haul down the Immigration signal upon the Immigration Officer leaving the vessel.

Outward Clearance Appendix 'B':

Physical Checkout: Owners/Agents requiring physical checkout of vessels should contact the following offices 12 hours prior to the departure of vessels:–

Location of Vessel	*Office of Contact*	*Telephone No./ VHF Channel*
Eastern/Western Anchorages, PSA and Oil Refinery Wharves and West Jurong Anchorages	Immigration Finger Pier Checkpoint	2226013/VHF Channel 14 } 24 hours
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818
Sembawang Port	Immigration Woodlands Checkpoint	2692531

Procedure

Vessels requesting Immigration Outward Clearance must either fly the "Blue Peter" in addition to the "25" or "34" signals during the day. By night to display 2 green lights in every case mounted vertically 6 ft. apart, visible all-round the horizon for a distance of at least 2 miles. This is to assist the Officers in locating the vessels.

The Master is required to submit 3 sets of Crew Lists/3 sets of Passenger Lists to the Checking-Out Officer. The Master should certify on the Crew Lists that all crew are on board. Passengers if any and persons who have been refused entry will have to be presented to the Checking-Out Officer.

Inward Clearance Appendix "C".

Advance Immigration Clearance (AIC)

(i) The Advance Immigration Clearance (AIC) facility is extended to merchant vessels over 75 n.r.t. and carrying not more than 12 passengers. Fishing vessels are excluded.
(ii) AIC cannot be granted to vessels arriving from High Seas.
(iii) Application to be submitted at least *6 hours* before arrival of vessel.
  The Owner/Agent of the vessel should obtain from the Master by radio or post the requisite information as outlined below:–
  (a) Crew List – 5 sets required;
  (b) Transit Passenger List (if any) – in quadruplicate;
  (c) Disembarking Passenger List (if any) – in quadruplicate.
  These lists must be inserted with the necessary details and must be duly signed by an authorised representative of the Owner/Agent of the vessel. These lists should be submitted to the Immigration Check-Point, Finger Pier Building, Prince Edward Road, Singapore 0207 (24 hours) or the Immigration Counter at 2nd Floor, Podium Link, Tanjong Pagar Complex, Keppel Road, Singapore 0208 during office hours.
(iv) If AIC is granted, 1 copy each of the Crew List, Transit Passenger List and Disembarking Passenger List bearing the Appropriate Immigration endorsements can be collected by the Owner/Agent on execution of the relevant documents such as Seaman's or other Security Bonds. If any person is not permitted to land, Owner/Agent will be required to inform the Master of the vessel accordingly and upon the vessel's arrival must ensure that such person in fact does not disembark from the vessel.
(v) After the arrival of the vessel, it shall be the responsibility of the Owner/Agent to submit immediately the Master's copy of the Crew List (3 copies) and/or Passenger List (2 copies) to the Immigration Office, Seamen Section at Finger Pier Building (24 hours) or the Immigration Counter at 2nd Floor, Tanjong Pagar Complex during office hours, bearing the signature of the Master of the vessel certifying that the details previously submitted through the Owner/Agent are correct. Whenever required, travel documents and Seaman's books of the crew and/or passengers must be handed over to either one of the abovementioned Immigration Offices, for checking within *4 hours* of the vessel's arrival. Passengers will not land until their passports have been endorsed with the appropriate passes.
(vi) The Owner/Agent may submit the certified copy of the Crew List by *0900 hours* or earlier if his vessel arrives between 0001 hours and 0600 hours on that day.
(vii) If the Port is infected, provisional Radio Pratique should first be obtained from Port Health Authorities before AIC can be considered.

RADIO:

Radiotelegram Services to Ships (Radiotelephony):

Singapore Radio Working Schedules for MF/HF Radiotelephony:

1. The following schedules of watch-keeping will be operated by the Singapore Coast Station:

Singapore Radio	*Transmit Frequency (kHz)*	*Hours of Watch (UTC)*	*Ship Transmit Frequency (kHz)*	*Remarks*
9VG4	2182	Continuous	2182	Call, Reply and Safety
9VG87	4125	Continuous	4125	
9VG88	6215.5	Continuous	6215.5	
9VG89	8780.9	Continuous	8257	Common Calling Frequencies
9VG90	13162.8	Continuous	12392	
9VG91	17294.9	Continuous	16522	
9VG5	2760	Continuous	2527	Working Frequencies
9VG60	4369.8	Continuous	4075.4	
9VG63	8728.2	Continuous	8204.3	
9VG67	13156.6	Continuous	12385.8	

2. Singapore Radio maintains a continuous watch on Call, Reply, Safety and Common Calling Frequencies.

Navigational Warnings and Weather Bulletins:

1.Navigational Warnings and Weather Bulletins for shipping are broadcast from Singapore Radio at the following times:

Singapore Radio	*Frequency (kHz)*	*Times (UTC)*	*Remarks*
9VG 5 9VG63	2760 8728.2	0145	Navigational Warnings and Weather Bulletin.
9VG 5 9VG63	2760 8728.2	0405 0805	Navigational Warnings only.
9VG 5 9VG60	2760 4369.8	1345	Navigational Warnings and Weather Bulletin.

2. The broadcast will normally be made on the two listed frequencies simultaneously except during transmitter maintenance periods when the broadcast will be made on the two frequencies consecutively.

Traffic Lists:

1. Singapore Radio will transmit Traffic Lists on the following two listed frequencies simultaneously except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively:

Singapore Radio	*Frequency (kHz)*	*Times (UTC)*
9VG 5 9VG63	2760 8728.2	0005, 0405, 0805 and 1205
9VG 5 9VG60	2760 4369.8	1605

Medical Advice to Ships:

1. A radio Medical Advice service is available to ships of all nationalities and no charge is made for this service.

2. Radiotelegrams requesting medical advice should state briefly and clearly the symptoms of the illness of the person affected and contain a brief description of the contents of the medical chest carried by the ship. Such telegrams should be in English Language, be signed by the Master of the ship and addressed "Radiomedical Singapore".

3. In very urgent cases, the urgency signal (PAN) may be used in order to ensure priority over all other communications, with the exception of those relating to distress calls.

MF and HF Telephone Service:

1. General. The MF and HF radiotelephone service is available continuously to ships at sea, subject to radio propagation conditions and provided that the ships are suitably equipped.

Ships wishing to contact Singapore Radio may do so on any of the calling carrier frequencies listed under "Radio Working Schedules" above.

After establishing contact, the call will be booked. Both the coast and ship station will then change over to any one of the following frequencies as agreed upon by both stations (depending on the position of the vessel and the time of day) prior to connecting the telephone subscriber.

Singapore Radio	*Transmit Frequency (kHz)* Coast	Ship	*Remarks*
9VG52	2780	2685	Connection to the telephone system on demand
9VG61	4376	4081.6	
9VG62	6509.5	6203.1	
9VG64	8762.3	8238.4	
9VG65	8790.2	8266.3	
9VG66	13147.3	12376.5	
9VG68	17270.1	16497.2	
9VG69	17356.9	16584	
9VG70	22630.1	22034.1	

Maritime Radiotelex service available.

Enquiries regarding the Maritime Mobile Services may be made to the Supervisor at either Singapore Radio or the International Telephone Exchange as appropriate, or in writing to Telecoms, Comcentre, Exeter Road, Singapore 0923.

VHF: VHF Radio Telephony transmitting and receiving Channels used within the Port of Singapore. All the stations offer a 24-hour service.

Notice:

Port Circular No. 49 of 1981. Issued by P.S.A. 18th June 1981.

Notification of arrival and VHF reporting procedures:

1. Pursuant to regulation 2A of the Singapore Port Regulations, 1977, I hereby direct that the Master of every vessel of 500 g.r.t. and above intending to enter the port of Singapore shall with effect from 1st July 1981 notify the Port Master of the intended arrival of the vessel by means of radiotelegrams at least 12 hours and not more than 24 hours before arrival of such vessel. Masters of vessels coming from nearby ports with less than 12 hours steaming time to Singapore shall immediately on departure from such ports notify the Port Master on telegraphic address "Portmaster Singapore".
2. In notifying the Port Master as provided above, the Master of the vessel shall provide the following information:
   (a) name of ship;
   (b) date and estimated time of arrival;
   (c) height of mast or superstructure or height of cargo equipment whichever is the highest point above the waterline.
   (d) name of local shipping agency;
   (e) last port and next port of call;
   (f) any condition affecting the navigation of the vessel including fire or hazard on board, defective propulsion machinery, defective steering equipment, excessive list or engagement in towing;
   (g) whether or not pilotage service is required on arrival;
   (h) draft of vessel if pilotage service is required.
3. The Master of every vessel of over 300 g.r.t. or every tug engaged in towing, if the combined g.r.t. of the tug and tow exceeds 300 g.r.t., intending to enter the port of Singapore shall with effect from 1st July 1981 report to Singapore Port Operations on VHF Channel 12 when:
   (a) approaching from the East, on crossing meridian 104° 10′ E., (Abbreviation ME 1) or one hour's steaming time away from the Eastern most point along the Singapore Port Limit whichever is the earlier; or
   (b) approaching from the West, on crossing meridian 103° 30′ E., (Abbreviation MW1) or one hour's steaming time away from the Western most point along the Singapore Port Limit whichever is the earlier; or
   (c) approaching from the South, one hour's steaming time away from the Southern most point along the Singapore Port Limit.
4. The report required to be made under paragraph 3 to Singapore Port Operations shall contain the following information:
   (a) name of vessel;
   (b) whether the vessel will enter via the Eastern or Western approaches of the Port;
   (c) whether the vessel will proceed directly to berth or via any Quarantine and Immigration Anchorage;
   (d) date and estimated time of arrival at a particular Pilot boarding ground or a particular anchorage.
5. The Master of every vessel shall, in addition to the requirements in paragraph 4, report to the designated communications centre specified in the 1st schedule hereto *"the height of the mast or superstructure or height of cargo or equipment whichever is the highest point above the waterline"* if the vessels intends to enter, transit or leave any of the following areas:
   (a) East Johore Strait;
   (b) Kallang Basin;
   (c) Eastern Special Purposes Anchorage;
   (d) Eastern Explosive Anchorage.
6. When a vessel anchors or moors within the Port Limit of Singapore and its approaches, the Master shall report immediately to Singapore Port Operations the date, time and place at which the vessel is so anchored or moored. Masters of vessels cleared by Immigration/Health authorities are required to notify Singapore Port Operations and to indicate in their notification whether pilotage services are required for shifting to berths or other anchorages.

6.1 The anchored position shall be reported in the form of a bearing and distance from one of the following reference points:

(a) Eastern Sector – Katong Beacon (Latitude: 1° 17′ 39″ N., Longitude: 103° 53′ 18″ E.)
(b) Western Sector – Rimau Beacon (Latitude: 1° 15′ 36″ N., Longitude: 103° 48′ 30″ E.)
(c) West Jurong – Sultan Shoal Lighthouse (Latitude: 1° 14′ 23″ N., Longitude 103° 38′ 59″ E.)

6.2 When a vessel that is anchored or moored within the Port Limit of Singapore and its approaches ceases to be so anchored or moored or is to be moved within the Port Limit of Singapore, the Master shall immediately report such event to Singapore Port Operations.

7. The Master of every vessel intending to leave Singapore shall advise Singapore Port Operations on Channel 12 of his intention at least 1 hour before the departure.
8. In the interest of safety of navigation, ships transiting the Singapore Main Strait and not calling at Singapore are requested on a voluntary basis to notify Singapore Port Operations in accordance with the procedure set out in paragraph 3 above.
9. If for any reason it is not possible to operate the radiotelephone equipment carried on board a vessel, the Master shall at the earliest practicable time restore it or cause it to be restored to effective operating condition.

9.1 During the time it is not possible to operate the radiotelephone equipment carried on board a vessel, compliance with Section 1 and 2 shall be made by means of radiotelegrams addressed to "Portmaster Singapore".

1st Schedule

Designated Communications Centre	*Channel*	*Usage*
Singapore Port Operations	20 12	For request of pilotage service and reporting of arrivals, anchored positions, movements, departures, as well as other navigational or shipping information.
Jurong Control	21	Berthing/unberthing at Jurong Wharves and reporting of movements within the Jurong Area.
Sembawang Control	21	Pilotage service, berthing/unberthing at Sembawang Area, as well as reporting of movements in the area including East Johore Strait.

MEDICAL: When infectious disease not suspected, permission will be granted by Port Health Officer to Agent to take doctor on board and remove the patient, if necessary, to hospital. Preferably as much notice as possible. Several hospitals, General Hospital, Gleneagles, Mt. Alvernia to name a few. Cholera, smallpox, plague, etc., are not endemic in Singapore.

Also see "Radio" – Medical Advice to Ships.

TUGS: PSA has a fleet of 19 tugs, they are:

Name	*Horsepower*	*Bollard Pull (tonnes)*
Tekun	1,200	16.5
Tenaga	1,200	15.25
Tegap	1,060	13.5
Tambat	1,060	13.0
Teman	674	10.5
Victory (V5)	2×1,500	28.5
Vigilant (V6)	2×1,500	26.0
Valiant (V7)	2×1,500	34.0

VST 2	2×1,276	25.0
VST 3	2×1,276	25.0
VST 4	2×1,276	25.0
Vanguard (V8)	2×1,500	32.7
Vertex (V10)	2×1,500	32.7
Valour (V9)	2×1,500	32.7
Viking (V11)	2×1,500	32.0
Alpha 1	2×1,900	26.0
Alpha 2	2×900	16.0
Alpha 3	2×900	16.0

Shell operates 2 tugs approximately 1,500 b.h.p. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

BERTHING: Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, cargo particulars, ETA and ETD of, and Dangerous Cargo Declaration listing out dangerous cargo (including petroleum products and explosives) on board vessel at least 48 hours before berth required.

BERTHING FACILITIES:

NOTE: All depths are reduced to Chart Datum unless otherwise stated.

*Only controlling depths that are shallower than the depths alongside are listed.

Coastal Berth (Fishery)	213 m.	4.0 m. (1983)	4.4 m. (1981)

Mechanical Equipment:

Type	Maximum Rated Capacity per Unit	No. of Unit
Unloader crane	450 tonnes/p.h.	3
	300 tonnes/p.h.	1
Suction type unloader	100 tonnes/p.h.	2
	200 tonnes/p.h.	2
Scrap Unloader	150 tonnes/p.h.	2

CARGO HANDLING FACILITIES: *Keppel Wharves:* Vessels working only general cargo will normally be berthed at the Keppel Wharves. This is the largest of the 5 gateways of Port of Singapore Authority, having marginal wharves of 4.8 km. that are capable of ,accommodating 30 vessels at one time. There are well-ventilated transit sheds and warehouses totalling 133,400 sq.m., and 61,984 sq.m. of concrete hardstanding for open storage.

Tanjong Pagar Container Terminal: Length of 6 main berths is 1,909 m. Able to handle 6 third-generation vessels at one time. 14 container quay cranes of 35 tonnes average lifting capacity are available, feeder berth 238 m. for coastal vessels and a cross berth of length 213 m. The container freight stations, for stuffing and unstuffing operations presently have an approximate covered area of 34,779 sq.m. The stacking yard of approximately 28.5 hectares can accommodate some 31,000 TEUs stacked 2 to 5 high.

Bunker facilities are available. Bunker fuel can be pumped at the rate of 1,000 tonnes/p.h. through 18 in. diameter mains. There are 48 outlets along the quay. Marine and fresh water are also available.

Sembawang Wharves: The Port of Singapore Authority operates 5 berths at the Sembawang Wharves, situated North of Singapore. The length of the berths totals 822.67 m., with covered storage space available totals 51,100 sq.m. It is geared towards handling of low-value, high volume homogeneous cargoes like bulk sawn timber, logs, grains and fertilisers. There is also 1 container quay crane of 35 tonnes lifting capacity.

Jurong Port: The port is a bulk-handling facility to serve the Jurong Industrial Estate. The marginal wharves of 1,792 m. can accommodate 10 ocean-going vessels. In addition, there is a 172 m. wharf for coastal shipping. There are 85,652 sq.m. of covered storage and 234,068 sq.m. of open storage space.

The terminal has facilities for the discharge of grain (by elevator), sugar, fertilisers, cement, clinker, sulphur, etc. Shore bulk-handling cranes are used.

The equipment includes 2 kangaroo crane unloaders with capacity of 350 – 450 tonnes/p.h. Two gantry type unloader cranes each with capacity of 450 tonnes/p.h. Grain silos with capacities up to 84,000 tonnes. 4 pneumatic grain handling units with discharging capability of 150 – 200 tonnes/p.h./per unit. Two units of scrap iron unloaders capable of discharging scrap iron and pig iron at 150 tonnes/p.h.

Pasir Panjang Wharves: 2,320 m. of wharves which can accommodate 23 lighters, 6 LASH barges, 9 coastal vessels and 3 ocean-going vessels at any one time. There are 7 transit sheds covering 55,750 sq.m., 1 back-up shed 22,296 sq.m., 10 warehouses 163,108 sq.m. (of these 151,068 sq.m. outside the Free Trade Zone) and some 128,297 sq.m. of open storage area.

Telok Ayer Wharves: This gateway caters for coastal vessels and lighters/barges. There is a total of 744 m. of wharves for lighters and coastal vessels. With land reclamation carrying on at this place, 5 new berths can accommodate vessels with a draft of up to 6.4 m.

BRIDGES:

Name	Vertical Clearance Above MHWS (m.)	Vertical Clearance Above MSL (m.)

Ord Bridge (centre of span)	1.5	2.6

Also see "Restrictions".

STEVEDORES: Labour should be ordered by 0900 hrs. for 2nd shift (1500 to 2300 hrs.) on same day and by 1300 hrs. for 1st shift (0700 to 1500 hrs.) for next day, by 1100 hrs. for 3rd shift (2300 to 0500 hrs.) on same day.

Under normal circumstances no work is performed during meal hours, 1100 – 1200 hrs. and 1830 – 1930 hrs. unless the ship is classified as a "key" vessel or the Agent orders work during the meal hours.

TANKERS: Bunkering and discharge facilities available at Eastern and Western petroleum anchorages or installations at Pulau Bukom, Pulau Ayer Chawan, Tanjong Penjuru, Tanjong Berlayer, Jurong and Pulau Merlimau.

PSA operates a Slop and Sludge Reception and Treatment Centre at Pulau Sebarok with facilities for the disposal of slops, sludge, tank cleaning, water and dirty ballast. Also see "Pollution".

Smoking not permitted during period tanker alongside PSA wharves.

Grades permitted for discharge along PSA wharves:

(a) marine diesel oil,

(b) fuel oil.

Shell

Pulau Bukom, 4.6 km. off the S.W. coast of Singapore – 10 berths and a single buoy mooring. Depth of water in approach is 18.3 m. LWOST. Fresh water, fuel oil, gas oil and diesel oil available.

Tank cleaning is carried out alongside or in Roads, as arranged with Pulau Bukom.

Shore tankage for slops/dirty ballast is limited to 15,000 cu.m. for all purposes. Each vessel is normally limited to 400 cu.m., although larger quantities MAY be accepted by prior arrangement, giving preferably 7 days' notice. Waxy slops are only received on wharves 6, 7 and 8. When waxy slops are on board for discharge, vessels are requested to advise Pulau Bukom 48 hours in advance in which case quantity must be stated. Waxy slops should be segregated if other slops are carried.

SBM	23.00	—	353,784	

The refinery has a refining capacity of 23 million tonnes per annum. It manufactures LPG, petrol, aviation turbine fuel, kerosene, gas oil, diesel fuel, solvents, fuel oil, lub oil and bitumen for local and overseas markets. There are 200 oil storage tanks with over 3 million tonnes capacity. All grades of bunkers are available 24 hours a day.

Mobil

5 berths and a shared single buoy mooring (Esso/Mobil). Night time berthing at the discretion of the Pilot. At Berth No. 3 day-time berthing and unberthing only possible, on flood tide.

Berth	*Draft* (m.)	*Max. Length* (m.)	*Max. d.w.t. Displacement*	*Remarks*

Notes:

[1] The "Golden Fortune" provided actual displacement does not exceed 2,500 d.w.t.

[2] Lengths are approximate only, based on spacing of mooring points. Actual lengths are governed by minimum separation of 150 ft.

[3] For guidance only. Actual number of tugs is dictated by prevailing conditions.

[4] "Esso Orient" loaded to 90,000 d.w.t.

[5] Maximum freeboard includes height of manifold connection above deck.

[6] Up to 120 k.d.w.t. light loaded.

[7] Approach Channel controlling depth 40 ft. (12.3 m.), except to and from Berth No. 5 using the Jurong Fairway when the controlling depth is 41 ft. (12.5 m.).

Caltex

Operates berths (No. 1 and No. 2) at Tanjong Penjuru which can accommodate vessels alongside up to 13.71 m. max. draft. Berth No. 1 (4 breasting dolphins) capable of handling vessels up to 100,000 tons displacement. Berth No. 2 (4 breasting dolphins) can handle any vessels exceeding 91.4 m. flat sides, up to 32,000 tons displacement and length not exceeding 182.8 m. Night time berthing at the discretion of the Pilot.

B.P. Refinery

Refinery with 3 berths situated at Tanjong Berlayer. Small jetty inside harbour known as Jetty No. 2 can receive small vessels up to 1,000 tonnes as water depth only 4.8 m. below ACD.

Jetty No. 1 at S.W. side of Tanjong Berlayer can accommodate vessels up to 33,000 tons at off-shore mooring where dredged channel 11.0 m. below ACD. Berthing cannot be effected for 43 days of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No. 1 trunkway, vessels up to 5,000 tonnes can be berthed; water depth 7.6 m. below ACD. Simultaneous mooring of vessels at Jetties No. 1 and 1A not allowed as floating hose used to connect Jetty No. 1 to ship at mooring buoys.

Singapore Petroleum

Provides 5 berths for bunkering and other services on Pulau Merlimau, an island off the S.W. coast of Singapore. The marine berth can accommodate vessels up to 85,000 d.w.t. and 14 m. loaded draft, refining capacity 170,000 barrels per day. Night time berthing at Pilot's discretion. Fresh water available ex-pipe-line. Bunkers available by barge or pipe-line.

Gatx Terminals

Vessels berth at marine trestle 1,400 ft. (427 m.) offshore. One berth for vessels up to 85,000 d.w.t. and 1 for vessels of 5,000 d.w.t. 46 operating pipe-lines serve the main berth and 9 pipe-lines serve the subsidiary berth. The terminal handles chemicals and petrochemicals. Total capacity 646,570 barrels in 85 tanks.

Main Berth Docklines	2× 75 mm. dia.
	3×100 mm. dia.
	34×150 mm. dia.
	6×200 mm. dia.
	1×300 mm. dia.
Subsidiary Berth Docklines	6×150 mm. dia.
	2×200 mm. dia.
	1×250 mm. dia.

Singapore Refining Co.

S.B.M. located 2.4 km. S.E. of Sultan Shoal Lighthouse in Selat Sinki. Max. size 320,000 d.w.t. Discharge of crude oil to S.R.C. Refinery. 2 flexible hoses of 600 mm. diameter.

Petro Chemical Corporation of Singapore

Berths	*Depth Alongside (Year Surveyed)*	**Controlling Depth In Approaches*

*See "Berthing Facilities" – Note.

DENSITY: Usually between 1019 and 1022 unaffected by tide or temperature variations. Variation due to periodic heavy run-off of rain water.

FRESH WATER: Fresh water available at any point of PSA's wharves. PSA also has a fleet of 9 waterboats to supply fresh water to ships anchored within the port limits.

FUEL: All grades available alongside PSA wharves and ex-installation, otherwise by barge. Marine diesel oil. Heavy fuel oil at 180 cst to 380 cst. Blended fuel from 60 cst to 180 cst.

FIRE PRECAUTIONS: Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

GANGWAY/DECK WATCHMEN: Recommended, particularly in Roads. Agents normally arrange. Cost varies.

OPENING/CLOSING HATCHES: Conventional hatches by stevedores. Mechanical hatches usually by ship's crew.

CERTIFICATES: If dangerous drugs on board, an export authorisation from country of origin and an import authorisation from country to which drugs being conveyed should be available for sighting and endorsement.

All vessels	Certificate of Registry, Tonnage Certificate, Certificate of Insurance or other financial security as applicable under CLC '69 and International Loadline Certificate or equivalent.
Passenger Ships	Passenger Safety Certificate issued under SOLAS Conventions.
Cargo Ships	Safety Equipment Certificate (if over 500 g.r.t.) or equivalent. Safety Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable.

CUSTOMS ALLOWANCES: Tobacco: for crew and adult transit passengers – first day of arrival 50 cigarettes or 15 cigars or other tobacco 60 gms.; and for each subsequent day to the maximum of 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wines: 1 bottle per day to maximum of 8 days. Spirits: 7⁄8ths bottle (in opened bottles) on first day of arrival and 1⁄8th bottle per day for rest of 7 days.

CONSULS: Consuls, Embassies and High Commissions. Arab Republic of Egypt, Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Bulgaria, Burma, Canada, People's Republic of China, Denmark, Finland, France, Federal Republic of Germany, Great Britain, Greece, India, Indonesia, Ireland, Israel, Italy, Japan, Democratic People's Republic of Korea, Republic of Korea, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Panama, Philippines, Poland, Romania, Saudi Arabia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Union of Soviet Socialist Republic, USA.

REPAIRS/DRY DOCKS: All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

10. M.T. 'Sea Puma'	495

Harbour Launches: 2.

CARGO GEAR: Possession of valid test certificates. At PSA wharves all cargo gear should be inspected by an Authorised Port Officer before use.

IDENTIFICATION CARDS: Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept passports, discharge books or any identification cards issued by Masters of vessels for purpose of granting shore leave to Crew members, provided these documents sufficiently identify person concerned

Gate Passes issued against crew list at wharves and installations. No passes required from roads, although some form of identification advisable.

SURVEYORS: A.B.S., B.V., Det Norske Veritas, Lloyd's Register, N.K.K., G.L., Polski Register Stratkow, China Corporation Register of Shipping and Salvage Association.

REPATRIATION: Ships' Agents responsible for repatriating seamen. Mercantile Marine Office undertakes repatriation of distressed British seamen on behalf of Board of Trade, United Kingdom, whenever necessary. Seamen who hold proper documents which ensure entry into their countries of origin, citizenship and destination are normally granted Special Passes after discharge for purpose of repatriation.

AIRPORT: 20 km. from city. Regular and frequent services to all parts of the world.

TIME: GMT plus 8 hours. No seasonal change.

HOLIDAYS: Work can be arranged on all 10 Public Holidays. New Year's Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (1st May); Vesak Day; National Day (9th August); Deepavali; Hari Raya Puasa; Christmas Day.

POLICE/AMBULANCE/FIRE: City Police 999; Fire/Ambulance only, 328111; Flag signal: CB3. VHF Channels 12 or 16. PSA Police 2712211 ext. 2222; Fire ext. 2209 or ext. 2333; Ambulance 2712211.

We quote the contents of Port Circular No. 123 of 1984 issued by the Port of Singapore Authority:

Ships Requiring Police Assistance:

1. The shipping community is hereby reminded that vessels within Singapore waters can directly contact Marine Police for assistance on those matters falling within police jurisdictions.

2. For such assistance, vessels should establish radio contact on:

VHF Channel	*Hours*	*Ship Tran./Rec. Frequencies*	*Call sign (Voice)*
21	24	157.05/161.65 MHz	Marine Police
or			
7	24	156.350/160.950 MHz	Marine Police

Giving the following information:

(a) Name of vessel.
(b) Location of vessel.
(c) Nature of emergency.
(d) Nature of police assistance required.

3. Vessels within the port and requiring immediate police assistance shall display following signals in a conspicuous position to facilitate easy identification by the Marine Police:

By Day: International Code "CB3".
By Night: Red-Red-White (Red on top).

4. Vessels may in addition sound on their whistle or siren at intervals of about 1 minute three prolonged blasts to attract the attention of Marine Police personnel in the vicinity.

5. The shipping community is advised to illuminate and step up surveillance onboard its vessels, particularly those moored just outside the outer limits of the port, to discourage unauthorised boarding of its vessels.

TELEPHONES: Available on board vessel at PSA wharves only.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from Officers of Customs. Customs Officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SERVICES: Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service. Compass adjusting and DF Calibration. Radar and Radio servicing depots.

SHORE LEAVE: No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (e.g. CPG Crew), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and Crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:

(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

POLLUTION: No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluents to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:

(a) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life; or

(b) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do so shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

Slop Reception: The P.S.A. Slop and Sludge Reception and Treatment Centre at Pulau Sebarok has a total tank capacity of 82,000 cu.m.

Berthing facilities consist of 2 piers – Piers 1 and 2. Depths alongside: Pier 1 – 12.8 m., Pier 2 – 11.0 m.

The Centre can accommodate vessels up to an overall length of 264 m. and a displacement of 45,800 tonnes

7 barges with a total capacity of 8,500 cu.m. are used for the reception of slops/tank cleaning water at anchorages and transported to the Centre for disposal.

Communications: VHF Station Channel 61.

Safety and security at the island is well provided and maintained by both the Authority's Police Force and Fire Brigade.

Also see "Shipmaster's Report" and "Tankers – Shell".

DELAYS: Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

NOTICE: *Port of Singapore Authority – Port Circular No. 114 of 1984. Dated 28th November, 1984.*

CHANGE OF ANCHORAGE FOR HEALTH/IMMIGRATION CLEARANCE AND USE OF ANCHORAGES FOR VESSELS ARRIVING FROM EAST AND WEST

1. *Health/Immigration Clearance*

Masters, Owners and Agents of vessels are hereby informed that with effect from 0600 hours on Saturday, 8th December, 1984, the use of the Eastern Quarantine/Immigration Anchorage for Health/Immigration Clearance will cease until further notice.

Vessels arriving from the East and requiring Health and/or Immigration Clearance are to make use of the Western Quarantine/Immigration Anchorage.

Vessels arriving from the West shall continue to make use of the Sultan Shoal Quarantine/Immigration Anchorage.

2. *Use of Working or Petroleum Anchorages in the Eastern and Western Sectors*

Vessels arriving from the East can continue to make use of the appropriate anchorages in the Eastern or Western Sectors, and likewise vessels arriving from the West can make use of the appropriate anchorages in the Eastern or Western Sectors. In all cases they should first obtain their Health and Immigration Clearances either by Radio Pratique/Advance Immigration Clearance at the appropriate anchorages mentioned in paragraph 1 above.

3. *Use of Controlled Anchorages*

Masters/Owners/Agents requiring to anchor their vessels in any of the following anchorages are to obtain prior permission from the respective Units of the Port Master's Department:

(i) Eastern Explosives Anchorage	Dangerous Goods & Port Limit Craft Unit
(ii) Western Dangerous Goods Anchorage	
(iii) Eastern Special Purposes Anchorage	Enforcement Unit
(iv) Western Reserved Anchorage	
(v) Laid-up Vessels' Anchorage	Shipping Unit
(vi) Selat Pauh Anchorage	

Application should be made in advance by letter or telex stating the name, g.r.t. and maximum draft of the vessel, the required anchorage, the purpose and the period of stay at the anchorage. Vessels intending to use the Eastern Explosives or Eastern Special Purpose Anchorage are to state the height of the highest point of the vessel (inclusive of cargo and superstructure) above waterline.

4. *Pilotage*

Vessels requiring pilotage services are required to use the appropriate Pilot Boarding Grounds specified below:

(i) Vessels from the West proceeding directly to Berths/Anchorages in the Western Sector (with Advance Clearance)	Western Boarding Ground (Sultan Shoal)
(ii) Vessels from the West proceeding directly to Anchorages in the Eastern Sector (with Advance Clearance)	Eastern Boarding Ground A
(iii) Vessels from the West proceeding directly to Keppel Wharves (with Advance Clearance)	Eastern Boarding Ground A or Western Boarding Ground (depending on the tidal stream)
(iv) Vessels from the East proceeding directly to Berths/Anchorages (with Advance Clearance)	Eastern Boarding Ground A or B as arranged with the Pilotage Section.
(v) Vessels from the East requiring Health/Immigration Clearance	Eastern Boarding Ground A

5. The foregoing directives are issued pursuant to Section 65 of the Port of Singapore Authority Act (Cap 173) of 1970.

6. Port Circular No. 18 of 1984 is hereby cancelled.

DEVELOPMENTS: Two conventional wharves at Keppel Wharves to be converted to container handling berths (Berth Nos. 42 and 43). Total length 535 m.

Studies are being made to strengthen the wharf decking at Berth Nos. 44 and 45 to moor feeder containerships.

Petrochemical Plant to be built at Pulau Sakra/Pulau Bakau. Completion expected 1986.

SHIPMASTER'S REPORT: September 1983.

Ballast: Slop reception barges cannot receive slops at more than about 250 t.p.h. Message should be sent to Port Master 1 day before arrival with ETA and height above water and same information repeated to Port Operations Channel 12 three hours before arrival.

AUTHORITY: Port of Singapore Authority, PSA Towers, 3 Maritime Square, Singapore 0409. Postage Address: P.O.Box 300, Singapore 9005. *Tel:* 2712211. *Telex:* RS 21507. *Cables:* "Tanjong" Singapore. *Contact:* Port Master. Senior Public Relations Officer (ext. 2524).

AGENT: Jardine Shipping Agencies, Marina House, 70 Shenton Way, Singapore 0207. Tel: 2218011. Telex: RS 24179. Cables: "Jarship".

NOTES

Please also advise Shipping Guides Ltd.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.

PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.

ANCHORAGES: Vessels may anchor in the port roads in depths of 34 m. – 21 m. Good holding ground in sand and coral.

RESTRICTIONS: Night pilotage is impracticable due to the absence of lighted navigation marks.

MAX. SIZE: Length 220 m., beam 30 m., draft 9 m.

HEALTH: Vessel should ask for Free Pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.

RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2182 and 8230 kHz.

TUGS: No tugs available at Bora Bora.

BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. Only used by small warships, coasters and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges and coasters. These two quays were repaired in 1983.

MEDICAL: No doctor available, but there is a local infirmary.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.

AIRPORT: Situated 7 km. from Vaitape, only inter-island services.

TIME: GMT minus 10 hours. No change during the year.

HOLIDAYS: See "Papeete".

SHORE LEAVE: Allowed.

AUTHORITY: Capitainerie du Port de Papeete, B.P.91, Papeete (Tahiti), P.F. *Contact:* Harbour Master.

PAPEETE: 17.33 S. 149.34 W. **(See Plan Book)**

DOCUMENTS:

Required by Port Health:

Maritime Declaration of Health (form provided by the Pilot).

Required by Police (2 copies of each):

Crew List.
Lists of Passengers Disembarking.
Lists of Passengers in Transit.
List of Ship's Characteristics.

Required by Customs (2 copies of each):

Manifest of Cargo for Discharge.
Provisions List.
Mail List.
Crew Personal Effect List.
Bonded Stores List.
Ship's Spares List.
Crew List.
List of Passengers Disembarking.
List of Passengers in Transit.
List of Animals Disembarking.
List of Animals in Transit.
List of Plants.
Complete Cargo Manifest.

Required by Merchant Marine Authorities:

1 Declaration of Safe Rules on board ship (form supplied by Pilot).

Required by Port Captain:

Entry Declaration (form supplied on arrival).
Crew List.
List of Passengers Disembarking.
List of Passengers In Transit.

PILOTAGE: Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length and draft of the ship, amount of cargo for discharge and any other requirements. In addition, Masters must give their ETA 24 hours before arrival to Capitainerie du Port, Papeete. Pilot station and pilot launches are equipped with VHF and may be contacted on Channel 12 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. The pilot flag is described as the colours of code flag "W" upside-down. International code flag signals may be used to call Pilot. Pilot boards about 1.5 miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.

Pilotage available 2400 hours.

ANCHORAGES: Vessels up to 170 m. length can anchor in the port roads in depths of 18 m. – 25 m. Good holding ground in mud.

RESTRICTIONS: Ships coming from a country infested by "oryctes rhinocerus strategus" (coconut beetle) cannot stay alongside in the harbour from 1700 hrs. to 0600 hrs. if they have been at sea less than 20 days since the last infested port.

MAX. SIZE: Length 250 m., beam 32 m., draft 35 ft. The Q.E. II, length 294 m. entered and docked in 1978 and 1983.

HEALTH: Vessels should ask for Free Pratique by radio to Sante Maritime Papeete, via Coast Station Mahina Radio. This message should be sent 24 hours before arrival. Pratique is automatic for vessels coming from another Polynesian port. Also see "Restrictions".

RADIO: Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2182, 8281.8 kHz, and on VHF Channel 16.

G.M.T. 0118 hrs. —	8461 kHz	FJA 8	A1	W/T
G.M.T. 0733 hrs. —	17040.8 kHz	FLA26	A1	W/T
G.M.T. 0433 hrs. —	8461 kHz	FJA 8	A1	W/T
G.M.T. 0503 hrs. —	17040.8 kHz	FJA26	A1	W/T
G.M.T. 0903 hrs. —	4298 kHz	FJA41	A1	W/T
G.M.T. 0933 hrs. —	8461 kHz	FJA 8	A1	W/T
G.M.T. 1333 hrs. —	8461 kHz	FJA 8	A1	W/T
G.M.T. 1733 hrs. —	4298 kHz	FJA41	A1	W/T
G.M.T. 2018 hrs. —	8461 kHz	FJA 8	A1	W/T
G.M.T. 2048 hrs. —	17040.8 kHz	FJA26	A1	W/T

VHF: The Port Captain's Office is equipped with VHF. Watches are kept on Channel 12 when a ship is expected.

TUGS: Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are two naval tugs up to 700 h.p. which may assist if required.

BERTHING: Passenger Quay: 233 m. length, 2 berths, depth alongside 9 m.

Cargo Quay: 450 m. length, depth alongside 10.50 m.

Fishing Boat Quay: 100 m. length, depth alongside 5.50 m.

STEVEDORES: Cargo information should be confirmed to the Agents with ETA 48 hours before arrival.

MEDICAL: Advance notice required if medical attendance needed on board. 2 hospitals available. Passengers disembarking must present a valid vaccination certificate.

TANKERS: 1 tanker berth, 105 m. long. Max. allowed draft 33 ft. Discharging hoses are: Mobil Oil 8 in., Standard Oil 6 in.

1 gas tanker berth, at Pont de Taunoa, accessible via Taunoa Channel. For vessels max. LOA 85 m., max. breadth 13.80 m., max. draft 6.0 m.

FRESH WATER: Available from pipe-lines on all quays. Loading rate is 50 t.p.h. at passenger and cargo quays and 30 t.p.h. at the tanker berth.

FUEL: Diesel available subject to 1 week's notice.

GANGWAY/DECK WATCHMEN: Services of shore watchmen are necessary.

OPENING/CLOSING HATCHES: Hatches opened and closed by crew if they are of mechanical type, otherwise the stevedores will perform this operation.

CUSTOMS ALLOWANCES No restrictions for crew members but all tobacco and alcohol must be declared. Crew members going ashore must not take more than two packets of cigarettes. Passengers disembarking may take 200 cigarettes or 50 cigars or 400 grammes of tobacco and one bottle of alcohol.

CONSULS: The following countries maintain representatives at Papeete:

Austria	Denmark	Netherlands
Belgium	Finland	Norway
Chile	Italy	Sweden

REPAIRS: Woodwork, electrical and welding repairs can be effected. There are 2 floating docks for vessels up to 3,800 tons.

SURVEYORS: Lloyd's Register and Bureau Veritas.

REPATRIATION: Can be effected.

AIRPORT: Tahiti — Faaa Airport is situated 6 km. from the port. Regular international flights.

HOLIDAYS: 1st January, 5th March (Arrival of the Gospel in French Polynesia), Easter Monday, 1st May, Ascension Day, Whit Monday, 14th July, 15th August, 1st November, 11th November, 25th December. No work is carried out on Sundays or on 1st May. All other holidays can be worked on double overtime rates.

TIME: GMT minus 10 hours. No alterations during the year.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 2 96 74.

EMERGENCY CO-ORDINATION CENTRE: Contact Amiral Commandant la Zone Maritime. Telex: 269 FP. Tel: 2.6501.

TELEPHONES: Can be installed on board vessels at all quays.

BANKS: 1. Banque de Polynesie, Branch of Societe Generale France, Telex: 230 Polybank FP, - B.P. 530, Papeete. (Joined to Credit Cards Visa system).

2. Banque de Tahiti, Branch of Bank of Hawaii, Honolulu. Branch of Credit Lyonnais, Paris. Telex: 237 FP - B.P. 1602, Papeete.

3. Banque Indosuez, Branch of Indosuez Paris, Telex: 232 FP & 244 PF - B.P. 120 Papeete.

STORING: Vessels can be stored by truck, which can proceed alongside the berth. Forklift trucks can be used. Special Customs Regulations in use.

SHORE LEAVE: Allowed without restriction.

SHIP SUPPLY SERVICE: The off-shore ship supply services are operated by the Pilot launches belonging to the Port Authority with 24 hours' notice for ship-to-shore transport of personnel, essential stores and sick crew members.

AUTHORITY: Port Autonome de Papeete, B.P. 91, Papeete, Tahiti, Polynesie Francaise. *Tel:* 3.60.60. *Cables:* Capitaine Port Papeete. *Contact:* J. W. Ahnne, Port Captain.

Solomon Islands

GIZO: 08.05 S. 156.52 E.

Gizo is the copra and cocoa receiving centre for Western Solomons. Situated on Gizo Island West of New Georgia. Entrance to harbour is beaconed and a jetty with depth alongside of 9 ft. Sheltered anchorage available in 16 fathoms. The British Solomons Trading Company Ltd. provides stevedores and conducts a lighterage handling and warehousing service to Importers and Exporters.

PILOTAGE: 24 hours' notice ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch about 0.75 miles N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.

ANCHORAGES: East of Port Main Leading Lights. Fl. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are available for transporting crew from anchorage to the shore. The landing stage is at Joanna Jetty on the East side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 4 ft. at low tide.

APPROACHES: Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashes every 5 seconds from Tower on radio station building. When in line these 2 lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during S.E. season blow from N.E. direction sometimes reaching Force 4 to 5 in early afternoon. During N.W. season direction and force variable generally between North and West up to Force 4 and occasionally Force 5.

RESTRICTIONS: Berthing in daylight hours only – departure any time.

MAX. SIZE: New Wharf, up to 650 ft. long and max. 29 ft. draft. Old Wharf, up to 200 ft. long and max. 13 ft. draft. Tankers, mooring at buoys, 600 ft. long and 27 ft. 6 in. draft.

HEALTH: Pratique can be obtained by radio. Cable Port Health. Suspect vessels should inform Health Authorities and Harbour Master by radio for doctor to board on arrival.

Cable to Quarantine Officer Honiara between 12 and 4 hours before arrival the following message: "Request Radio Pratique negative answers all health questions Maritime Declaration of Health Master." Normally, the P & T Radio Officer may grant Pratique immediately whilst he is in radio contact with the ship. After arrival the Health Officer will check for rhinoceros beetle and will clear.

RADIO: Radio Honiara VQJ. Watch continuous. 6204 kHz, 2182 kHz, 500 kHz. GMT Schedule 0020 – 0030 transmits 11560 kHz receives 8 or 16 MHz.

TUGS: There is a small 100 h.p. tugboat assisting with mooring when necessary.

BERTHING: At Point Cruz, berth length 235 ft., depth alongside 30 ft. Vessel berths port side alongside.

STEVEDORES: At least 24 hours' notice, usually 3 gangs, indicate any extra gangs required. To facilitate quick turn around advisable have cargo in middle holds evenly distributed not at extreme end or massed in one hold only.

MEDICAL: Notice should be given in advance if medical attendance required on board. Inoculations available at clinic on Fridays only. Limited hospital facilities available.

Cholera: Required if arriving from infected area. Vaccination Certificates are checked individually for those passengers permanently disembarking.

For all other passengers and the crew ship's doctor must provide a statement advising that all passengers and crew comply with the health regulations and vaccinations required.

In case some passengers have for health reasons not been vaccinated, a letter from their doctor giving reason why no vaccination given must be produced. Passengers will be allowed to go ashore.

Central Hospital, Tel: 09-61.
Emergency and Ambulance, Tel: 09-33
Doctors, Tel: 09-44
Dentist, Tel: 09-43

All medical facilities are provided from the Hospital. One private doctor available: Dr. M. Strickland, Tel: 770.

TANKERS: Tanker buoys, 8 in. pipe-line, max. draft 32 ft. New Wharf, 4 in. pipe-line, max. draft 27 ft. 6 in. Old Wharf, 4 in. pipe-line, (ADO), max. draft 13 ft.

DENSITY/TIDE: Approx. 1025. Tidal range about 3 ft.

FRESH WATER: At wharf by hoses. 40 t.p.h.

FUEL: Diesel and gas oil available. 48 hours' notice, butane gas.

FIRE PRECAUTIONS: Normal fire precautions, with gang standing by with fire pump.

GANGWAY/DECK WATCHMEN: Watchmen to be recommended. Customs provide a preventive officer for duty at a charge.

OPENING/CLOSING HATCHES: Stevedores assist crew. Crew to rig gear.

CERTIFICATES: Certificate of Registry.

CUSTOMS ALLOWANCES: 200 cigarettes or 0.5 lb. tobacco per crew member. 3 quart bottles of beer per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: Australian.

REPAIRS: Limited facilities only.

DRY DOCKS: Nil.

REPATRIATION: Facilities available.

AIRPORT: Situated approximately 10 miles from the wharf. Air Niugini have 2 flights per week from Sydney via New Guinea, and Air Pacific have 2 flights a week from Suva via New Hebrides.

TIME: GMT plus 11 hours all year round.

HOLIDAYS: Cargo work can be arranged on all holidays except Christmas Day and Easter period.

POLICE/AMBULANCE/FIRE: Emergency phone numbers: Police 666; Ambulance 933; Fire 299.

SERVICES: Labour can be hired for assistance with painting and cleaning. Other services not normally available. 24 hours' notice required.

SHORE LEAVE: Permitted.

VISAS: Transit passengers: not required. Disembarking passengers require visa for a stay over 48 hours. Visa can be obtained from nearest British Consul.

LANDING CARDS: Only permanently disembarking passengers need special Landing Cards which can be obtained from Immigration Officer on arrival.

WEATHER: Cyclone season December to April, winds N.W. to variable, strength 0 – 5. From April to November winds are from N.E., strength 4 – 5.

DELAYS: Nil, except when other ships being worked.

DEVELOPMENTS: Copra Wharf, length 100 m. to be constructed.

AUTHORITY: Harbour Master, Solomon Islands Ports Authority.

SHORTLAND HARBOUR: 07.04 S. 155.52 E.

DOCUMENTS: 3 copies of all documents including "Nil" sheets of Crew Lists, Passenger Lists, Customs, Health Manifests, Bills of Lading, Ship's Particulars, Ship's Certificates.

PILOTAGE: Apply for Pilot by anchoring on Pilot Point and sounding whistle. The pilot vessel is a 50 ft. tugboat and is visible at anchorage from the Pilot Point (Lat. 7° 03′ 30″ S., Long. 155° 53′ E.). The pilot vessel will immediately come to the vessel. The Pilot Point is unaffected by bad weather.

ANCHORAGES: The anchorage is beside the wharf in the channel. It is protected to the East and West by islands and is unaffected by wind, tides or currents. Minimum depth alongside the wharf is 8 m. at the extreme Southern end. The depth at the Northern end is 16 m.

RESTRICTIONS: As no lights are available all entries are made during daylight hours.

MAX. SIZE: Max. length 125 m., breadth, no restriction, max. draft 8 m. draft is applicable at maximum low tide.

HEALTH: Pratique granted on board on arrival. If any suspected or confirmed disease or fever on board notify the Health Inspector immediately on arrival. He will advise procedure. Pratique is automatic when arriving from another Solomon Islands port.

RADIO: Lofung Station and tug on 5775 kHz, telex is HQ 66343.

VHF: Not available.

RADAR: No radar facilities.

TUGS: Tug joins vessel at Pilot Point and escorts vessel in. Ship's lines are used, vessels stand-by to run ship's lines ashore. All charges are included in the Agency fees.

BERTHING: Alongside wharf (07° 03′ 50″ S., 155° 51′ 50″ E.), length 87 m., depth 8.0 m., loading and discharge by ship's gear. Basically only trucks and other machines are discharged and only Solomon Island round logs loaded.
CRANES: None.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO FACILITIES: None.
BRIDGES: None.
STEVEDORES: The stevedores are company personnel and available immediately ship is berthed and cleared.
MEDICAL: A clinic with limited medical and dental facilities available 2 km. away. Usual inoculations and certificates available. Malaria is present in port area.
TANKERS: No facilities.
FRESH WATER: Not available.
FUEL: Not available.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No facilities.
DRY DOCKS: Not available.
SURVEYORS: Not available.
WATCHMEN: Not necessary.
HATCHES: Opening and closing by ship's crew.
CUSTOMS ALLOWANCES: 2 litres spirits, 200 cigarettes.
CARGO GEAR: One forklift available.
REPATRIATION: Not possible.
AIRPORT: 5 miles away by sea on Ballalae Island. Flights Mondays, Tuesdays, Thursdays, Fridays to Honiara.
TIME: GMT plus 11 hours.
HOLIDAYS: Christmas Day, New Year's Day, Good Friday, Easter Monday, 7th July (Independence Day), Queen's Birthday and Whit Monday in June.
POLICE/AMBULANCE/FIRE: Not available.
EMERGENCY CENTRE: Honiara.
TELEPHONES: Not available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
REGULATIONS: Normal Customs, Immigration and Health requirements.
DELAYS: Normally straight onto berth after Pilot on board.
DEVELOPMENTS: None planned.
GENERAL: Shippers' Office may be contacted on SBB 5775 at 0700, 1200 and 1630 hrs. local time.
AUTHORITY: None.

AGENT: Allardyce Lumber Company Limited, P.O.Box 164, Honiara, Solomon Islands. *Cables:* Alcol.

YANDINA: 09.04 S. 159.14 E.

Yandina is situated in Russell Islands and is copra export port for Lever Solomons Ltd. A concrete and steel wharf on South side of entrance with length 53.34 m. and minimum depth alongside 6.0 m.

Sheltered anchorage for vessels of up to 500 ft. in length, available in Renard Sound. Lever Solomons Ltd. provide stevedores and conduct handling and warehousing service to importers and exporters.
AUTHORITY: Lever Solomons Ltd., Yandina, Russell Islands, Solomon Islands. *Contact:* The Resident Engineer.

NOTES

Please also advise Shipping Guides Ltd.

Somali Democratic Republic

GENERAL:

REPORT: *Immigration Regulations:* According to new Somali Immigration Instructions, no foreigner of any sort (including seamen, supercargo or owners' representative) shall be allowed to enter into Somalia without a visa.

No transit visa will be allowed for seamen joining their vessels in Somali ports.

Anybody arriving at Somalia should first obtain entry or transit visa from the Somali Consulates in their respective countries.

BERBERA: 10.26 N. 45.01 E. (See Plan Book)

DOCUMENTS:

6 Crew Lists.
2 Stores Lists.

2 Lists of Articles owned by Crew i.e. tobacco, wine/spirits, cameras, binoculars, wrist-watch, radio, firearms/swords etc.

1 Cargo Manifest (must be made out in accordance with original Bill of Lading issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurements in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted; 2 copies to be sent by the ship's box.

1 Copy Non-Negotiable Bill of Lading for each Bill of Lading issued.

2 Lists Transit Cargo (total number of packages and total weight for each destination).

6 Lists of Passengers to be Disembarked.
2 Lists of Passengers In-Transit.

1 Health Document will be prepared on arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessels await Pilot on the Outer Roads, 5 – 10 cables S.W. of Tamara Lighthouse. In case of stormy weather and rough seas, it is permitted to wait for Pilot on the Inner Roads.

ANCHORAGES: Outer anchorage 5 – 10 cables S.W. from Tamara Lighthouse. Inner anchorage limited by the line between 10° 26′ 16″ N., 45° 00′ 14″ E. and between perpendiculars from the ends of this line towards Cape of Tamara.

RESTRICTIONS: All ships should anchor in such a position that with any wind they should lie on the leading line, or Southward from it, or opposite the deep water pier.

MAX. SIZE: Draft 28 ft., length/breadth no restrictions.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali Ports subject to same procedure.

RADIO: Cable Agents giving ETA, draft, length and cargo via port radio station – 6OY call and reply in the frequency 500 kHz, working 450 kHz. Working hours from 0700 to 1700 hrs. local time. Traffic list 3 times a day at 0800, 1200 and 1600 hrs.

TUGS: Use ship's lines. There is one tug of 1,200 h.p. and one of 700 h.p. to assist vessels in berthing and unberthing.

BERTHING: Depth at pier 28 ft., length of pier 320 m.

Transhipment of cargo is allowed with exemption of Harbour Tax and Warehouse Dues. Only handling charges are levied according to port tariff.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent to order gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700-1400 hrs., but loading to and discharging from vessel is performed day and night.

MEDICAL: General hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.

TANKERS: Discharge at two mooring buoys with connecting hoses of American and British standards.

DENSITY: Salt water at all times.

FRESH WATER: Available alongside quay through hoses. Rate 15/20 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by Customs Police, food on vessel's account. Ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel do so. Crew may close hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Crew to carry passport or seamen book whilst ashore.

CONSULS: None.

REPAIRS: Port Management own a well-equipped workshop where minor repairs for ships can be carried out.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

TELEPHONES: No possibility for placing telephones on board.

GENERAL: Vessels should not dispose of any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.

REGULATIONS: Livestock vessels are given priority.

DEVELOPMENTS: The present two berths are being extended by a further two berths. (Work is underway).

SHIPMASTER'S REPORT: June 1981.

References: Guide to Port Entry, Shipping Guides Limited. British Admiralty Chart BA 3530. Red Sea and Gulf of Aden Pilot. (NP64) 12th Edition 1980.

Documents:

2 Crew Lists. 2 Lists Personal Effects.
2 Stores Lists. Cargo Manifest.
Copy Non-Negotiable Bill of Lading for each consignee.
2 Lists of Transit Cargo.
2 Passenger Lists. "Nil" declaration required.
1 Health Document filled in on berthing on special local form.
1 Copy Arrival Report on special local form.
1 Copy Ship's Record and Master's Report on special local form.

Pilotage: Two Somali Pilots available. Pilot boards at Outer Anchorage from tug "Saaxil" which has black hull, white upperworks, funnel markings: blue funnel with white star. Tug has VHF Channel 16. Pilot can also be contacted via Somali Shipping Agency on VHF Channel 16, call sign "Somship Berbera". Agents can usually only be contacted from 0900 – 1200 hrs. and 1600 – 1800 hrs.

Anchorage: Good anchorage obtained in Outer Anchorage shown on BA 3530. Somali Harbour Regulations forbid anchoring in such a way as to obscure leading and other lights.

Radio: Normal 72, 48 and 24 hour notice to Agents via Aden Radio. Berbera Radio (6OY) not heard.

Fresh Water: Only supplied alongside at Commercial Wharf. No water barge available and tug "Saaxil" unable to deliver water at Oil Berth or Anchorages.

Tugs: One tug "Saaxil", 1,100 b.h.p., fitted with VHF Channel 16. No tug lines, all ship's lines.

Gangway/Deck Watchmen: Two watchmen are compulsory under Somali Harbour Regulations. Ship has to provide food and accommodation. Charges for watchmen:

45 Somali shillings for 12 hours (daytime).
55 Somali shillings for 12 hours (night time).

Fridays 50% additional and 26th June 50% additional. 1st July and other public holidays 100% additional.

Customs Allowances: 200 cigarettes or 5 lb. tobacco or 0.5 lb. cigars. 1 bottle of spirits.

Airport: The landing ground shown adjacent to the Oil Tank Farm on BA Chart 3530 has now been taken over for extension of the tank farm and is no longer in use.

A new military airfield is situated 2 miles S.W. by W. from the old landing ground.

All commercial flights are from Hargeisa, 160 km. S.W. of Berbera with 3 flights weekly to Mogadiscio.

Time: GMT plus 3 hours all year round.

Agency: Somali Shipping Agency. Tel: Berbera 142. Cables: Somship Berbera. No telex facilities available and all cables have to be sent to Somali Shipping Agency, Mogadiscio, for transmission out of Somalia.

Somali Shipping are the only Agency allowed in Berbera, being a Government Agency.

Berthing: Oil Berth: (See "Plan Book"),

The submerged pipe-line shown on BA. 3530 was replaced by pipe-lines fitted on a steel jetty built in 1975. The jetty consists of a pier carrying oil pipe-lines to a platform which has 2 chicksan loading arms at its seaward end. The pier is in a poor state of repair and both chicksan arms are in bad condition and no longer usable. Oil is discharged via a 6 in. floating pipe-line connected to the Eastern side of the platform. Maximum allowed discharge pressure is 3 kg./sq.cm. but in practice the discharge pressure was found to be about 2.5 kg./sq.cm. The white conical buoy formerly marking the end of the submerged pipe-line has been removed. Unlit white painted mooring buoys have been laid in positions A, B, C, D, E and F as shown on the Plan. The 2 mooring buoys G and H laid either side of the white conical buoy are still in use. At the time of this vessel's call Buoy B was lying on its side almost awash. Vessel berthed stern up to the berth with both anchors down, 6 shackles on the port and 5 on the starboard. The original tie-up, to Pilot's instructions, was 2 lines each from aft to Buoys F, G and H. During the vessel's first day on the berth the effects of the strong S.W.'ly "Kharif" parted one wire to Buoy F and caused ship to lie down from the wind causing the 2 lines to Buoy G to foul the platform, chafe and eventually part. Vessel resecured to Master's satisfaction using ship's lifeboat and crew as follows:

2 lines from port side after-end main deck to Buoy D.
3 lines from port quarter to Buoy F.
3 lines from starboard quarter to Buoy E.

2 lines from starboard quarter to Buoy H to hold vessel in position during calms between "Kharifs". Swell conditions causing a continual tugging motion on all lines, renders the use of wires, even when fitted with tails, inadvisable. Vessel securely moored for remainder of discharge without further problems. Following discussions with the Senior Pilot for Somalia, travelling as passenger for 10 days from Mogadiscio. I am advised that he is to try and carry out the following changes to the berth to provide for safer moorings and discharge:

Buoy F to be moved approximately 200 ft. South by West.

Buoy B to be raised and brought back into service.

Vessels to then berth head into "Kharif" on heading approximately 230° (true) with both anchors out to 6 shackles on each, spread approximately 60°. 2 lines from starboard quarter to Buoy C. 2 lines from port quarter to Buoy A. 2 lines from aft to Buoy B.

If required, dependent on length of vessel, lines from port and starboard bows to Buoys E and relaid Buoy F.

Ships would then discharge from midships manifolds via floating hose approximately 150 m. off platform.

Deeper water than shown on the chart is reported to the S.W. of Buoy G but vessel was unable to carry out soundings with tug "Saaxil" before sailing. The Senior Pilot intends to carry out a survey in this area.

Additional Moorings: Four unlit mooring buoys have been laid in the Inner Anchorage in the positions shown (see "Plan Book").

Fuel: None available.
Repairs: Minor repairs can be carried out but nothing that could not be carried out by ship's staff.
Weather: During the ship's stay at Berbera the "Kharif" blew as follows:
0000 hrs., S.W., Force 3.
0400 hrs., S.W. by S., Force 6.
0800 hrs., S.W., Force 6 to 8.
1200 hrs., S.W., Force 5.
1600 hrs., S.W. by S., Force 3.
2000 hrs., Calm.

SHIPMASTER'S REPORT: June 1983.
Restrictions: All navigational lights are extinguished.
Pilotage: Only during daytime. Departure at night can be discussed with the Pilot.
Radio/VHF: Coastal radio station is out of order and will not be repaired. No VHF port radio station but sometimes Pilot or Agent will call using VHF from vessel in port.
Medical: Cholera and yellow fever vaccinations are inspected on arrival.
Tankers: Max. draft for tankers is 35 ft. and berthing will be effected with 2 anchors forward and 6 ropes to the mooring buoys, i.e. 2 stern ropes and 1 breast rope on each side. Distance from stern to jetty about 20 m. - stern discharge. Tankers up to 24 ft. – 25 ft. draft can berth between the buoys and use their manifold. In both cases a 6 in. shore hose is hauled up to the ship's connection, max. back pressure allowed is 3 bar and discharge rate of white products about 250 cu.m./hour. After each grade, water has to be pumped to clear the shoreline. Position of oil jetty Lat. 10° 26.18′ N., Long. 45° 00.8′ E., and a steel construction framework pier runs from this position in direction 146° to the shore. Loading arms at pier are in state of deterioration. When berthing, sounding by hand is advisable and have tidal heights available.

AUTHORITY: Somali Ports Authority, Berbera.

CHISIMAIO (Kismayu): 00.22 S. 42.34 E.

DOCUMENTS:
6 Lists of Crew.
2 Stores Lists.
2 Lists of articles owned by Crew, i.e., tobacco, wine/spirits, camera, wrist-watch, radios, binoculars, firearms/swords, etc.
1 Cargo Manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cu.m.). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance (freighted). 2 copies to be sent by ship's box.
1 copy non-negotiable B/L for each B/L issued.
2 Transit Cargo (total number of packages and total weight for each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers in Transit.
1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessel picks up Pilot at approximate position Lat. 0° 20′ S., Long. 42° 34′ E., 2 miles S.E. of Fairway Buoy.
ANCHORAGES: In the port basin, from 27 ft. to 30 ft. deep, excellent holding ground.
RESTRICTIONS: Entrance channel about 200 m. wide, marked by buoys. Entrance effected during daylight hours only. Port closed for vessels from 1800 hrs. to 0600 hrs.
MAX. SIZE: Port consists of 2 L-shaped quays, one 340 m. length, the other 280 m. Max. draft 28 ft. at lowest low tide.
HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports subject to same procedure.
RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.
TUGS: Two tugs of 800 h.p. each are available to assist ships in berthing and unberthing. Ship's lines used.
BERTHING: No specific requirement to berth in the port. Vessels entering port basin after 1745 hrs. will berth next day at 0630 hrs. Vessel must sail before 1730 hrs. otherwise sailing will be postponed to next day at 0630 hrs.
STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs.

No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700 – 1400 hrs. but loading to and discharging from vessels is performed day and night.
MEDICAL: Hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.
FRESH WATER: Available at wharf through hoses, rate 15/16 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Gangway watchmen service carried out by the Customs Police. Food on vessel's account; ships are also supplied with local watchmen through Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.
CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.
IDENTIFICATION CARDS: Crew to carry passport or Seaman's Book whilst ashore.
CONSULS: Italian Consul only.
REPAIRS: No facilities available.
REPATRIATION: Air communication via Mogadiscio.
AIRPORT: About 6 km. N.W. of the port.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: See "Mogadiscio".
TELEPHONES: No possibility for placing telephones on board.
GENERAL: Vessels should not dispose any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.
SHORE LEAVE: Permitted.
REGULATIONS: Banana and livestock vessels are given priority.
DEVELOPMENTS: Facilities to be improved to enable port to handle liquids, livestock and general cargo.
AUTHORITY: Somali Ports Authority, Chisimaio.

MOGADISCIO: 02.02 N. 45.20 E. **(See Plan Book)**

DOCUMENTS:
2 Lists of Crew.
2 Stores Lists.
2 Lists or Declarations of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, binoculars, firearms/swords, etc. Vessels calling from other Somali ports subject same procedure.

Cargo Manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted and 2 copies to be sent by ship's box.

2 Lists Transit Cargo (total number of packages and total weight for each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers in Transit.
1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Pilot joins vessel at anchorage about 0.5 miles offshore. Pilot can be requested by International Code signals or through VHF using Channels 12, 14 or 16.
ANCHORAGES: About 0.5 miles offshore in depths up to 45 ft., in open roadstead. Because of occasional heavy swell maximum recommended draft 31 ft.
RESTRICTIONS: Berthing/unberthing of vessels is restricted to daylight hours. Max. draft permissible is 10 m. at general cargo berths and 12 m. at tanker berths.
HEALTH: Pratique granted after Port Authorities including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports, subject to same procedure.
RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.
TUGS: Tugs join vessels at anchorage or as directed by the attending Pilot. Vessel's lines normally used. No extra charge for tug's lines.

Two tugs of 1,400 h.p. each available and 1 tug of 4,000 h.p. available for salvage and rescue operations.

BERTHING: Incoming vessels are assigned berths on a turn basis subject to operational requirements.

Harbour: Alongside deepwater port protected by 820 m. strong breakwater.

Berths: 5 berths. Berth lengths vary from 170 m. – 200 m. with depths alongside 8 m. – 12 m.

BULK CARGO FACILITIES: None.
STEVEDORES: Vessel to give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700 hrs. – 1400 hrs., but loading to and discharging from vessels is performed day and night.

CRANES: Only ships' derricks are used. No portal cranes at quay but a number of mobile cranes are available for handling and stacking cargo with maximum lifting capacity of 50 tons. No floating cranes available.
MEDICAL: No advance notice for medical attention required. Hospital facilities available but specialised treatment and surgery is not. Yellow fever and cholera certificates inspected on arrival.
TANKERS: One berth available for tankers with a draft of 12 m.
DENSITY: Salt water at all times.
FRESH WATER: Available alongside through hoses at a rate of 15 – 20 t.p.h.
FUEL: Fuel oil only may be available, check with Agent.
FIRE PRECAUTIONS: Fire engines situated within easy reach of docks 24 hours per day. The tugboats are also equipped with fire fighting appliances.
CONSULS: Algeria, Belgium, Peoples' Republic of China, Egypt, France, Democratic Republic of Germany, Federal Republic of Germany, India, Iran, Iraq, Italy, Kenya, People's Democratic Republic of Korea, Kuwait, Libya, Netherlands, Nigeria, Pakistan, Qatar, Romania, Saudi Arabia, Sudan, Syria, U.A.E., U.K., U.S.A., U.S.S.R., People's Democratic Republic of Yemen, South Yemen, Yugoslavia.
REPAIRS: No facilities available.
DRY DOCK: None available.
GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by the Customs Police, food on vessel's account. Ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.
CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.
REPATRIATION: Facilities available.
AIRPORT: About 5 km. to the West.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Idul Fitr, (1st & 2nd Shawaal); Idul Adha, (9th & 10th Dilhija); Prophet Mohammed Birthday, (12th Rabiul Awal); International Labour Day, (1st May); Independence Day N. Region, (26th June); Independence & Union Day, (1st July); Revolution Festivals, (21st and 22nd October).
POLICE/AMBULANCE/FIRE: Police 28088; Ambulance 30000; Fire 85055.
TELEPHONES: Arrangement for placing telephones on board is not available.
IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.
SHORE LEAVE: Permitted.
GENERAL: Vessels should not dispose of any waste into harbour or on to quays, lower lifeboats, or use radio station without prior permission.
Tidal Range: 2.5 m.
Shipchandling: Available.
Major Exports: Fresh bananas, livestock, hides and skins and frankincense.
Imports: General cargo, crude oil, etc.
DELAYS: Nil, except when other ships are working alongside.
DEVELOPMENTS: Construction of 1 more berth with a depth of 10 m. is planned.

SHIPMASTER'S REPORT: June 1979.
Documents:
5 Crew Lists
1 Stores List
1 Crew Personal Effects Declaration
1 Cargo Manifest
1 List Passengers in Transit
1 Health Document (International Declaration of Health)
1 Vaccination List, Crew and Passengers
1 Form "A", Ship's Record and Master's Report
1 Arrival Report (Agency Form)
1 Application for Temporary Use of New Harbour
2 Cargo Plans for Discharging Cargo
6 Lists of Passengers to be Disembarked
Pilotage: Compulsory. Pilot boards about 0.75 miles from breakwater entrance. Ladder on lee side 6 ft. above water with manropes. Usually 1 Pilot, assistant or trainee, and one communications man. Pilots use VHF Channel 16.
Anchorage: Open roadstead about 0.5 – 0.75 miles off breakwater. Assigned anchorage is West of new breakwater light bearing 310°. Do not anchor West of a line drawn perpendicular to West end of breakwater. There is a submerged tanker pipe-line and buoys West of breakwater, unlit at night. There are occasionally small unlit coasters anchored in the anchorage. Depth, clearance and congestion make anchorage unsuitable in heavy weather. During S.W. monsoon, ship's head approximately 180° – 225° without circular swing.
Communications: Send ETAs through Radio Mombasa.
Clearance: Health, Customs, Immigration and Harbour Master board at anchorage. Hours are 0700 to 1600. Agent and Stevedore representative may be present. Seamen's books or I.D. cards are required for shore leave. Crew allowed ashore at anchorage 0730 to 1730 hrs. to comply with harbour curfew at 1800 hrs. Passengers not permitted ashore at anchorage. Curfew of 2400 hrs. exists at dock, and passengers permitted ashore after being recleared by Immigration. They were given a 1900 hrs. curfew.
Customs Allowances: 200 cigarettes, 0.5 lb. tobacco or cigars. Currency exchange strictly controlled at banks and legal hotels. Trafficking in any items strictly prohibited. Coffee, sugar and tea are considered bond items, but were not sealed.
Watchmen: Two by regulations; 1 on duty and 1 off duty. At anchorage, ship must provide sleeping area.
Medical: Smallpox, yellow fever and cholera vaccinations required.
Fresh Water: Fresh water can be made in port due to open status of harbour.
Time: GMT plus 3 hours.
Opening/Closing Hatches: Stevedores will open pontoon type hatches. Recommend modern mechanical or hydraulic hatches to be opened by crew.
Stevedores: Paid on a tonnage basis. Gangs usually given contract of approximately 100 tons bagged goods or equivalent. First shift 0700 to 1500 hrs.; second shift 1500 to 2200 hrs. No third shift, however, 2nd shift may be extended for a set amount of additional tonnage which usually finishes by 0100 hrs. Typical figures; bagged goods, 250 tons per hatch per day with single gangs. Doubling of gangs in hatch subject to warehouse congestion and shortage of transport. Overall quality with bagged goods was fair to good, and stevedores provided own sweepings and bag sewers. No cleaning gangs were hired by vessel, though said to be available.
Launch Service: Available at anchorage 0700 to 1730 hrs. One launch for all ships.
Harbour Development: A new deep water port has been constructed. There are wide aprons, new warehouses, and good rubber fenders. Strong bollards approximately every 75 ft. Plan of N.O. Chart 61240 or BA Chart 671 (both corrected by overlay) show harbour with good accuracy. The red light on end of new breakwater is extinguished and the lights listed as Occ. R. are F.R. The main light is NOT visible as given. It has sufficient brightness, but not sufficient height. It can be seen about 20 – 25 miles depending on draft.

There are three warehouses. Transport to clear warehouses is limited. The main quay formed by the new breakwater has three berths. There is a tanker berth at the East end, and it is not usable by cargo ships. When occupied, there is sufficient room left for one large and one coastal vessel to work general cargo. When empty, two large ships can work. There is an additional berth against the inner wall that can handle 1 cargo ship to about 500 ft. This berth is 'stern first' and is the banana dock. Fruit boats have priority and any ship there must be shifted out. On the main quay, unannounced shifts are likely depending on the tanker berth. There is 1 small livestock berth at the West end of the harbour for coaster size vessels only. The lighterage piers at the East end of the harbour appear to no longer be used, and no lighterage work was observed.

There is considerable surge caused by both the openness of the harbour and lack of protection from onshore winds. "4 & 2" tie-up is recommended and chafing gear advisable.
Tugs: One of 4,000 h.p. and 2 of 1,100 h.p. are available, tugs are new. For berthing, one short ship's line was used from vicinity quarter ship's length from bow and stern, necessitating the bringing of sufficient line from the mooring stations to these locations.
Approaches: Approaching from the South, there are strong cross currents, from last 24 hours out. Sets of over 1 m.p.h. have been experienced. Approach on a North-Easterly heading from seaward should provide the most clarity of landmarks and radar picture. At night, a white loom is visible, with a yellowish flame-off loom noted to the S.W. The harbour and first navigation lights to be sighted are in the North-Eastern half of the white loom. The town steps uphill sharply from the harbour, causing town lights to be visible well before the other navigation lights. Anchored ships may also obscure the lower lights. Harbour is well defined on 3 cm. radar at about 6 miles. Set drops off nearer to shore.

"Registration for port" is the time anchored. Pilots do not board ships to anchor. Pilots (port radio) are on VHF Channel 16. The transmitter is weak and range about 5 miles. When checking in, they will ask Name, Flag, Call Sign; F. & A. Draft; g.r.t. and n.r.t.; discharge tonnage and type. There is usually much repeating so earliest possible contact at slowest speed is advised so that this can be done with sufficient sea room. Only after completion will anchorage be "assigned".
Agency: SOMSHIP is government agency and services accordingly.

SHIPMASTER'S REPORT: March 1981.
Documents:
1 Declaration of Health (Local Form).
1 Set Vaccination Lists.
5 Crew Lists.
6 Landing Passenger Lists.
In-Transit Passenger Lists.
Ship's Record and Master's Report (Form A).
Arrival Report (NSL Form).
Application for Temporary Use of New Harbour (Local Form).
1 Set Cargo Manifests.
2 Sets Discharging Cargo Plans.
Stores List (Company Form).
Crew Declarations.

Notes: Application for use of Harbour Form contains highly objectional liability clause 4(c).

No mail or telex service, no Agency assistance.
Health: Radio Pratique not available.

SHIPMASTER'S REPORT: June 1981.
Documents:
2 Crew Lists.
2 Stores Lists.
2 Personal Effects Lists.
Cargo Manifest.
Copy Non-Negotiable Bill of Lading for each consignee.
2 Transit Cargo Lists.
2 Passenger Lists. "Nil" declaration required.
1 Health Document filled in on berthing on special local form.
2 Copies Declaration of Ship's Details and Cargo Carried for Port Harbour Master on special local form.
4 Copies Pilotage Declaration on special local form.
Pilotage: Pilots listen 0600 hrs. to 1200 hrs. on VHF Channels 16 and 12. At other times the pilot station is usually manned. Pilot boards from a large pilot cutter at the vessel's anchorage position. Pilot cutter has black hull, white upperworks with "Pilot" in black letters. Manropes are essential for use on the pilot ladder due to the normal heavy swell running.
Anchorage: Good anchorage in sandy bottom in 10 – 11 fathoms (approx.), 4 cables South of New Port Breakwater. Monsoon causes currents of up to 4 – 5 knots during S.W. monsoon. (Ref: Admiralty Publication, Africa Pilot Volume III, supplement No. 8, page 48).

The whole bottom area is foul due to cargo lost during time port was operated as a surf port. An anchor and cable is reported to lie close to the intersection of the 311° and 278.42° leading lines.

Somali Harbour Regulations forbid anchoring in such a position as to obscure leading and other lights.
Health: Local doctors available.
Radio: Normal 72, 48 and 24 hour notice to Agents via Aden or Mombasa Radio. Mogadiscio Radio not heard during vessel's stay in Mogadiscio.
Fresh Water: Available from Berth Nos. 1, 2, 3, 4 and 5 at approximately 20 t.p.h.
Stevedores: Rigging of derricks and opening/closing hatches are the responsibility of ship's crew.
Gangway/Deck Watchmen: Two watchmen per vessel. Ship has to provide accommodation and food.
Customs Allowances: 200 cigarettes, or 5 lb. tobacco or 0.5 lb. cigars. Spirits 1 bottle. Bond sealed on arrival but Customs very good and will come down to give issue whenever required.

Airport: Regular international flights from airport situated 8 km. from port. No problems with repatriation. Crew members joining are issued with entry visas at Mogadiscio Airport providing Agents are informed in sufficient time. Mogadiscio is the only international airport of entry. There are local flights approximately 3 times a week to Kisimayu and Berbera.

Time: GMT plus 3 hours all year round.

Berths: Ras Sif Oil Terminal, Lat. 2° 01.05′ N., Long. 45° 20.05′ E.

This is a sea berth 1 cable S.W. of Ras Sif. (See Plan Book). During the S.W. monsoon, vessel secures with both anchors down on a heading approximately 210° (true) about 1 cable offshore. On this vessel's call 10 shackles were put out on each cable position "A" shown on plan. On vessel's approach to the berth no tugs were available for assisting in berthing as fuel for tugs had run out and our vessel had the new supplies on board. Three attempts were made to secure at the Discharge Berth. Final position was that shown in position "A". In this position vessel was heading 185° (true), 10 shackles out on each cable, 3 ship's lines to shore and 2 shore lines to ship. The vessel at this time rode to the wind at 180° – 185° and did not take up a heading into the S.W. monsoon at any time. The effects of the Somali current during vessel's stay was negligible at the berth. The normal berth off Ras Sif is that shown in position "B". I consider this position dangerous at this time of the year as the wind being mainly Southwesterly swings the vessel's stern up towards the shore, far closer than in position "A".

Lines: 2×4 in. floating hoses provided for connection to stern discharge manifold from red painted structure close South of the B & W truncated pyramid on Ras Sif. Maximum discharge pressure 3 kg./sq.cm. (approx. 150 t.p.h.). Height of tanks 24 m., distance to tanks 350 m. 1×6 in. line is available for midships manifold but this is only suitable for small ships. Shore requires water plug prior to commencement of discharge, on completion of each grade and on completion of final grade. Shore staff connect pipe-lines.

Maximum draft on berth 40 ft.

On the evening of 12th June the S.W. monsoon blew very strongly accompanied by a very heavy 15 ft. – 20 ft. swell. Vessel being light was moving a great deal and was eventually forced to carry out an emergency departure after jettisoning pipe-lines following a water plug through and cutting all ship's lines. This berth is wide open to the effect of the S.W. monsoon and when the monsoon is blowing strongly the weather conditions combined with the very poor unmooring facilities render the berth untenable. For these reasons this berth was declared by the Master to not be a "Safe Berth" within the meaning of the relevant Charter Party.

Mogadiscio New Port: Following Ras Sif being declared an unsafe berth arrangements were made for all floating hoses in possession of the Oil Terminal to be led via storm drains to Berth 5 following suggestions made by the ship. Vessels berthed stern up to Berth 4 or Berth 5 and cargo discharged via stern manifold to Ras Sif Oil Terminal.

Berth 5: Maximum draft 27 ft. Berth is well fendered with old tyres. Due to length of berth vessel berthed with starboard anchor down, 6 shackles on same, as maximum vessel length on berth 180 m. This berth is at present being extended by a further 200 m. Maximum discharge pressure 3 kg./sq.cm., maximum discharge rate 150 t.p.h. for products.

Berths 1, 2, 3: Maximum draft 32 ft. All cargo discharged by ship's gear. On Berth 3 there is one 8 in. pipe-line to the refinery 10 miles South of Mogadiscio for crude oil only. Booster pumps for this line are provided at the Ras Sif Oil Terminal.

Berth 4: Drafts alongside from 27 ft. – 32 ft. and is provided with a bridge for landing of livestock although to date this bridge has not been used. This berth is normally used by fishing vessels and smaller ships as a lay-by berth.

Tugs: Two tugs available. "Xamar 1" and "Xamar 2". Both fitted with VHF, 1,500 b.p.h. No tug lines. Ship's lines used for all operations.

Bunkers: Not available.

Repairs: Not available.

Somali Port Regulations: Notice to all ships, Mogadisho Port. Abstracts from Somali Ports Authority Regulation No. 67 of 15-4-1978.

1. All ships must keep their VHF open and standby when approaching the Port and while remaining berthed alongside, on Channel 16.
2. All ships having on board persons suffering from contagious diseases must hoist the quarantine flag when anchoring and keep it hoisted until inspected and instructions given by the Port Health Officer.
3. While anchored in the roads, ships must keep clear from bearing directly obstructing leading lights and beacons on shore.
4. Ships having an N.R.T. exceeding 200 must engage harbour Pilots and tugs while berthing or unberthing at the deep water berths.
5. Ships are not allowed to throw any kind of refuse, dirt or oil spillage into the harbour waters.
6. Ships are not allowed to carry out engine repairs without permission from the Port Manager, while at berth.
7. Ships anchored in the roads or berthed alongside must keep the Somali National flag hoisted at a height clearly visible for a reasonable distance.
8. All ships lying alongside berths must engage the garbage service provided by the authorised garbage group of the harbour.
9. Oil tankers must have on board their own facilities for the retention of oil drainage and sludge, dirty ballast and tank washings.
10. It is prohibited to discharge oil, oily mixtures and any chemical residues at any distance less than 50 nautical miles from the shore line.
11. Officers of the Port Management are authorised to inspect the efficiency of facilities provided on board vessels for the retention of dirty substances, solid or liquid.
12. All ships at anchor or berthed alongside must take sufficient precautionary measures to fight fire outbreaks.
13. All ships berthed alongside must provide ratguards for their mooring lines.
14. Rigging of ship derricks and opening and closing of hatches are the responsibility of the ship's Master and crew.
15. Crew members of all vessels berthed alongside or anchored in the roads are not allowed to go ashore later than 2300 hrs.
16. Crew members going ashore and wishing to return to their ships are not allowed to enter the Port later than 2300 hrs.

Signed – Port Manager

AUTHORITY: Somali Ports Authority, P.O.Box 935, Mogadiscio, Somalia. *Tel:* 30081/3. *Telex:* 708. *Cables:* Somport, Mogadiscio.

NOTES

Please also advise Shipping Guides Ltd.

South Africa

GENERAL:

NOTICES: Following is an extract of British Notices to Mariners No. 1647(1979).

Routing of Laden Tankers off the coasts of South Africa (West):

Laden tankers in the Summer months should pass not less than 10 miles South of Alphard Banks (Lat. 35° 02′ S., Long. 20° 50′ E.) (See *Africa Pilot Vol. III)* and then keep 25 miles off the following points:

Cape Agulhas	(Lat. 34° 50′ S., Long. 20° 01′ E.).
Quoin Point	(Lat. 34° 47′ S., Long. 19° 39′ E.).
Cape Point	(Lat. 34° 21′ S., Long. 18° 30′ E.).
Slangkop Point	(Lat. 34° 09′ S., Long. 18° 19′ E.).
Cape Columbine	(Lat. 34° 50′ S., Long. 17° 51′ E.).

During the Winter, laden tankers should maintain the recommended distance offshore until the Winter Load Line Zone is reached and then keep as close to that line as possible. This will entail passing North of Alphard Banks and then about 12 miles off Quoin Point and Cape Point.

Vessels proceeding to the Replenishment Area (Lat. 33° 55′ S., Long. 18° 15′ E.). off Cape Town should maintain the above distances off shore until in a position where course can be safely altered to approach the Replenishment Area crossing the main traffic flow as nearly at right angles as possible.

Routing of Laden tankers off the coasts of South Africa (East):

Laden tankers in the summer months should pass 25 miles off the following points:

South Sand Bluff	(Lat. 31° 20′ S., Long. 29° 58′ E.).
Bashee River	(Lat. 32° 14′ S., Long. 28° 55′ E.).
Hood Point	(Lat. 33° 02′ S., Long. 27° 54′ E.).
Cape Recife	(Lat. 34° 02′ S., Long. 25° 42′ E.).

and then steer to pass 10 miles South of Alphard Banks (Lat. 35° 02′ S., Long. 20° 50′ E.).

During the Winter laden tankers should maintain the recommended distances off shore until the Winter Load Line Zone is reached and then keep as close to that line as is possible. Between Cape Recife and Cape Agulhas this will entail passing North of Alphard Banks. It is recommended to pass about 6 miles North of these banks.

CAPETOWN (Table Bay): 33.56 S. 18.26 E.

(See Plan Book)

PORT LIMITS: Westwards by a straight line between Green Point and Robben Island Lighthouses, and Northwards by a straight line from Robben Island Lighthouse East (true) to the Eastern shore of Table Bay, thence Southwards along high water mark, so as to include the foreshore to the Castle, thence back to Green Point Lighthouse.

DOCUMENTS:

Customs:
- *Form DA.1, Report Inwards/Outwards for Ships.
- *Form DA.3, Certificate of Clearance for Ships.
- *Form DA.4, Transire – for a destination in the R.S.A.
- *Form DA.5, List of Sealable Goods on board ship.
- Ship's Crew List (Customs Department) 6 Copies.

Post Office:
- *P1/27, Certificate of Departure of Vessel.
- P1/8, Post Office Certificate (Declaration).

Port Health:
- Maritime Declaration of Health.
- Crew List with last vaccination dates.
- Derat Certificate.

Port Authority:
- *T958, Report of Arrival.
- *T962, Departure/Shifting Notification.
- Ship's Manifest.
- *Completed by Agent.

Shipmaster's Report: March 1981.
- Declaration of Health (Form GES-22)
- Set Vaccination Lists. 1st port only; even with Radio Pratique.
- Derat/Derat Exemption (if boarded).
- 2 Crew Lists.
- 2 Intransit Passenger Lists.
- 4 Landing Passenger Lists (Form DI-35).
- Crew Sealable Goods (Form DA-5).
- Crew Declarations (Company Form).
- Inventory of Slop Chest (Company Form).
- Register and Set of Ship's Certificates (used by Agent for clearing and returned).
- Arrival/Departure Record (Form BI-55) (Disembarking passengers only).
- Livestock Form (if nil, write on top of DA-5).
- Ship's Mail Declaration (Form P1/149) (if nil, write on top of DA-5; if mail aboard, cable Postmaster details free message, and forms will be presented by Agent at boarding).
- Certificate of Medical Officer, Master . . . (Form DI-67).
- Report of Arrival (Form T958) (to Pilot).
- Leaving Certificate (Form BI-86).

Notes: Fly "I" flag entering all ports; "B" if flammable cargo aboard. Include ship's entertainment TVs, radios, etc., cameras and walkie-talkies on DA-5. Although part of DA-5, addition of tobacco/spirits on Crew Declarations (Company Form) will allow same form to be used in Mozambique and Somalia.

PILOTAGE: Compulsory. One hour advance notice to be given to the Port Captain through VHF radio, call sign Port Operations, on Channel 16, working Channel 12. Pilot boat fitted with multi-channel VHF. Motor pilot boat, black hull, white housing also 2 pilot vessels with black hull, brown upperworks, gold and green funnel. Pilot taken aboard at port entrance.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daylight hours.

MAX. SIZE: Passenger and dry cargo vessels: max. length up to 1,000 ft. overall; draft 36 ft. Tankers: (for discharging) max. length 820 ft. overall; draft 43 ft. (tidal).

Tankers/ore carriers in ballast up to 350 m. in length, 350,000 d.w.t. and draft 10.7 m. may berth for bunkers, repairs, etc.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Capetown Radio, call sign ZSC. VHF and R/T 2182.

TUGS: Join vessel approximately 0.25 miles from harbour entrance. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

CRANES: *Floating Cranes:* Lifts 60 tons at 24.4 m. radius and another floating crane lifts 200 tons at 21.5 m.

BULK HANDLING FACILITIES: *Grain Elevator:* 1 terminal grain elevator of 27,220 tons storage capacity, with loading conveyors to the Collier Jetty. Continuous intake capacity of elevator, 750 t.p.h.; shipping capacity, 1,000 t.p.h. Other bulk cargoes handled at general cargo berth with shore crane. No LPG facilities.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. 50 t.p.h.

BERTHING: †Chart datum is that referred to in the South African Tide Tables published by The Hydrographer of South African Navy.

Roll-on/Roll-off Facilities: Available at Berths 500 and 501, as well as at "L" and "M" Berths. 2 berths ("A" and "J") for ships with slew ramps only.

Cold Store: Blue Continent Cold Storage Co. (Pty) Ltd. Tel: 51-3154. Telex: 577355 and 577232. Operates cold store with capacity of 17,000 tonnes at −30°C.

TANKERS: Tanker Basin to accommodate two tankers simultaneously, one of max. overall length of 256.0 m. and one of 204.2 m. overall length. Max. permissible draft 13.1 m., subject to a minimum of 0.9 m. on tide gauge.

Slop tank: Capacity 1,500 tons, available for oily ballast from tankers back loading white oil.

FUEL: 48 hours' notice required. All grades of fuel available.

GANGWAY/DECK WATCHMEN: Ship's Agent makes necessary arrangements.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES:
- Safety Certificates in respect of construction and gear.
- Radio Certificate.
- Load Line Certificate.
- Derat Certificate.
- Certificate of Competent Officers (passenger ships only).

CUSTOMS ALLOWANCES: The Master, officers and other members of the crew who remain on the ship during its stay in port may each be allowed to retain in his possession the following quantities (to cover 4 days) of the undermentioned sealable goods:

	Tobacco in any form grammes	Potable spirits in any form litre	Wine litres	Beer or stout litres
The Master/Pilot	230	1	3	3
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	175	1	3	3
Other members of the crew	115	nil	3	nil

Where the Master, officers or other members of the crew remain on board the ship for more than 4 days, the Controller of Customs and Excise may on request authorise the issue from under seal, for consumption on board, of the following further quantities per day:

	Tobacco in any form grammes	Potable spirits in any form millilitres	Wine litres	Beer or stout litres
The Master/Pilot	30	100	1	1
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	25	100	1	1
Other members of the crew	15	nil	1	nil

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Not required.

SURVEYORS: Lloyd's, BV, N.V., N.K.K. and ABS.

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS:

Sturrock Graving Dock: Situated at S.E. end of Duncan Dock:

Dimensions:		
	Overall docking length	360.0 m.
	Length on keel blocks (first to last keel block)	338.3 m.
	Length on bottom (dock floor)	350.4 m.
	Width at coping	47.5 m.
	Width at entrance top	45.1 m.
	Maximum width at bottom	38.4 m.
	Depth on entrance sill, HWOST	13.7 m.
	Depth on inner sill, HWOST	15.1 m.

A docking length of 369.6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments of either 132.5 m. and 216.1 m. or 205.7 m., and 142.9 m. respectively.

1×50 ton and 1×10 ton electric crane on 7.6 m. gauge track, 2×5 ton electric cranes on 4.9 m. gauge track and 3×4 ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

A landing wharf 548.6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 457.5 m. in length is provided off "M" berth. 2×15 ton electric crane on 9.1 m. gauge track is available.

Robinson Graving Dock: Situated in Alfred Basin:

Dimensions:		
	Overall docking length	161.2 m.
	Length on keel blocks (first to last keel block)	142.6 m.
	Length on bottom	152.4 m.
	Width at coping	27.4 m.
	Width at entrance top	20.7 m.
	Maximum width at bottom	17.2 m.
	Depth on entrance sill, HWOST	7.9 m.

3×4 ton electric cranes on 4.1 m. gauge track and 1×15 ton electric crane, on 4.1 m. gauge track are available.

The dock can be emptied in 3 hours.

Floating Dock No. 2:

Dimensions:		
	Extreme length	62.8 m.
	Length on bottom	61.0 m.
	Length on keel blocks	58.2 m.
	Extreme width	19.2 m.
	Width at entrance	13.7 m.
	Height of keel blocks	1.2 m.
	Draft on keel blocks, HWOST	5.6 m.
	Lifting capacity	1,016 tons

A 4 ton electric crane is mounted on a side wall of the dock.

Syncrolift: Situated in Alfred Basin:

Dimensions:		
	Lifting capacity	1,750 tons
	Maximum length of vessel	61 m.
	Maximum width of vessel	15 m.

Slipways:

There are 4 boat slips for yachts and small craft.

REPATRIATION: All facilities available.

1. *Vessels Docking*
   - (a) Any personnel arriving to join a vessel at Capetown should possess a valid travel document and a brief letter of introduction. Entry Permits can be extended if the vessel is late in arriving.
   - (b) Application to spend time (longer than 48 hours) in South Africa prior to repatriation should be made to the local Immigration Authorities.
2. *Vessels Calling Off Port Limits*
   - (a) The same requirements apply as for 1(a) with the exception of personnel who have entered the country from a vessel calling off Port Limits.
   - (b) The following applies to all personnel disembarking from vessels calling off Port Limits.
     - (i) Repatriation must be made within 48 hours from time of signing off.
     - (ii) In order to comply with local Immigration Authorities the Agent requires the following details, for each individual, at least 72 hours before disembarkation:
       - *(a)* Full name and nationality.
       - *(b)* Rank and, if Technician, name of employers.
       - *(c)* Passport number, place and date of issue.
       - *(d)* Place and date of birth.
       - *(e)* Destination and class of travel.
       - *(f)* If air ticket held on board, full details of routing.
       - *(g)* Reasons for disembarkation.

In the case of personnel transferring from one company vessel to another, the same conditions apply except the maximum time permitted for such transfer is 78 hours. If they have not joined the vessel within this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medical reasons.

AIRPORT: D.F. Malan Airport – 20 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Founder's Day (6th April); Good Friday; Family Day; Ascension Day (date varies); Republic Day (31st May); Kruger Day (10th October); Day of the Vow (16th December); Christmas Day (25th December); Day of Goodwill (26th December). Cargo is not worked on Christmas Day and New Year's Day.

POLICE/AMBULANCE/FIRE: Police, 438-3471; Ambulance, 51-5151; Fire, 438-3431 or 22-2222.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICES:

Helicopter Service: Available for mail and small items of stores for vessels not wishing to enter harbour.

Launch Service: For vessels not wishing to enter harbour, Agent may arrange launch service for mail, stores, etc. In this case service only permissible in area North and West of position at least 5 miles due West of Robben Island.

Supplied by:

Court Helicopters (Pty) Ltd., P.O.Box 2546, Cape Town 8000.
Ocean Ferries (Pty) Ltd., P.O.Box 6426, Roggebaai 8012.
Sealink Ltd., P.O.Box 4962, Cape Town 8000.
Southern Offshore Supplies, P.O.Box 1339, Cape Town 8000.

Also see "Shipmaster's Report".

SHIPMASTER'S REPORT: Off limits launch and helicopter service.

Port, Immigration, Customs and Health Authorities have made it clear that this service is a privilege and not a right. It is therefore of the utmost importance that the regulations are strictly adhered to.

The Agent must apply to the Port Captain for permission to service the vessel and the following details must be submitted. Name of vessel, time and date of arrival, draft, where from, where to, stores required and other reasons for call.

Launch is only allowed to be alongside vessel for 1 hour maximum otherwise vessel will have to enter port limits and incur port dues.

If personnel embarking, Immigration Authorities require name of vessel, tonnage, whether ballast or loaded and names of persons embarking. If persons disembarking then full names, dates and places of birth, nationality, passport or discharge book number and expiry date, whether South African visa held and comprehensive reason for leaving vessel, arrangements made for departure from South Africa (usually 24/48 hours allowed), and flight number. This does not apply to medical cases. Guarantee from Agent accepting full responsibility and liability regarding maintenance and repatriation expenses. Persons disembarking must report immediately to Passport Control. Failure to report or leave South Africa on the booked flight is an offence and in addition to any fine or imprisonment the Owners will be refused any further off limits service for *any of their vessels.*

Port Health require application for Radio Pratique 48/24 hours before arrival. Customs require all bonded stores loaded to be signed for and ship's stamp applied. Stores or spares being landed must have prior notification to Agent and an accompanying letter giving full description and disposal instructions.

Agents require 168, 96, 48, 24, and 12 hours' notices followed by any amendment to ETA. Stores requirements should be sent at least 96 hours before arrival. Three copies of Crew List to be sent ashore with launch (or helicopter).

Services operate 24 hours per day and usual rendezvous position is 5 miles West of Green Point Lighthouse for launch (and 12 miles West for helicopter). Launch can carry up to 30 tons stores (and helicopter up to 2,000 kg.). Vessels should not anchor but provide a good lee and have derrick rigged. Contact should be made with the launch (or helicopter) 1 to 2 hours before arrival rendezvous point using Channel 16.

AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713–3305. *Telex:* 4–24205 S.A. *Contact:* Dr. E. L. Grove, Director-General.

Capetown: P.O.Box 4245, Capetown 8000. *Tel:* (021)–438 2405. *Telex: 57–26544 SA. Contact:* Port Manager.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 220, Capetown, 8000. Tel: (021)–211830. Telex: 57–27417. Cables: Baronet, Capetown.

DURBAN (Port Natal): 29.53 S. 31.02 E.

(See Plan Book)

PORT LIMITS: The area of sea bounded by:

(1) to the North, a line drawn from the coast in position: Lat. 29° 48′ 42″ S., Long. 31° 02′ 32″ E. in a 090° (True) direction to position Lat. 29° 48′ 42″ S., Long. 31° 07′ 30″ E.;

(2) to the South, a line drawn from the coast in position; Lat. 29° 54′ 06″ S., Long. 31° 02′ 30″ E. in a 090° (True) direction to position Lat. 29° 54′ 06″ S., Long. 31° 07′ 30″ E.;

(3) to the East, a line joining the seaward positions in (1) and (2).

DOCUMENTS: See "Cape Town".

PILOTAGE: Compulsory. As much advance notice as possible to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Call Pilot by Aldis lamp if necessary. Pilot boats fitted with multi-channel VHF.

Motor pilot boat – hull painted international orange, white housing. "Pilot-loods" painted in black on housing. Pilot taken aboard at Pilot Boarding Area situated approximately 2 miles N.N.E. of South breakwater light.

Vessels not to approach closer than 2 miles from entrance until contact has been made with pilot boat.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daytime hours. The depth of the inner and outer channels is 12.8 m. below chart datum.

Hazardous Cargoes: Details of all hazardous cargo for discharge or loading at Durban and hazardous cargo remaining on board during a vessel's stay, are to be made known to the authorities through the vessel's Agent, not less than 72 hours prior to vessel's arrival.

Information required: Commodity, packaging, weight and volume, IMO group and stowage on board.

Vessels having on board more than 10 tons of hazardous cargo, will require to maintain a fire watch manned by qualified shore firemen and in addition, have an emergency shore telephone on board.

MAX. SIZE: The draft permitted is 38 ft. (11.58 m.) The length of 800 ft. is exceeded with the Port Captain's approval.

Size of vessels permitted to enter during the hours of darkness and also to shift berth at night: Vessels not exceeding 200 m. in length and 26 m. in beam may be brought into port at night provided weather conditions are suitable. Maydon and Esplanade Channels may not be traversed in either direction at night by vessels whose length exceeds 182.89 m. Vessels whose beam exceeds 35 m. are brought into port only when weather conditions are suitable.

RADIO: Durban Radio – ZSD.

VHF: Durban Port Control office is fully equipped with VHF communications.

HEALTH: Pratique message to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Shipmaster's Report: Valid Yellow Fever Certificate not required.

TUGS: 9 first-class tugs available. Join vessels in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

CRANES: *Floating Cranes:* 2, lifting capacities of 40 tons and 125/200 tons, respectively.

Mobile Cranes: Diesel-electric road cranes: 2×12.5 ton, 1×30 ton and 6×35 ton cranes.

BULK HANDLING FACILITIES: *Bluff Coaling Appliance:* Operators: S.A. Transport Services. 4 berths, BCA 1, 2, 3 and 4 equipped with electrically driven appliances for the loading of coal. 1 belt loader with capability of loading at the rate of 550 t.p.h. and 2 bucket transporters with an aggregate capacity of 1,100 t.p.h. are available. The overhead storage bins have a capacity of 9,220 tons, while concrete bins are provided for ground storage with a capacity of 58,630 tons of anthracite. All exports are brought in by rail trucks. Overall productivity 4,000 tons per 24 hours. There is no work between 1100 hrs. Saturday and 0700 hrs. Sunday.

Coal Anthracite Storage Facilities: Concrete ground storage bins of 18,290 tons capacity at Causeway Road.

Island View 3: Operators: Durban Bulk Shipping Co. (Pty) Ltd. Max. draft 10.64 m., max. length 167.5 m., max. reach 9.4 m., dolphin max. height 13.1 m. Storage capacity: 40,000 tons.

Although a variety of products are handled at this berth, the operators mainly import and export their own product, which is de-fatted germ meal pellets.

Load/discharge Rates in tons per hour:	*Load*	*Discharge*
De-fatted Germ Meal	380	160
Chrome Ore	550	200
Andalusite	550	—
Mono Calcium Phosphate	100	—
Agricultural Commodities	380	160

A tank farm is sited adjacent to the terminal silos with storage facilities for 6,500 tons of vegetable oils and liquid products.

New Pier 109 – Storage Silo – Soda Ash: Operators: St. Auffer. Imports of Soda Ash. Max. length 244 m., max. draft 12.74 m.

Vessels are discharged using 2 vacuum operated suckers to a storage facility of 32,000 tons at 300 t.p.h. or direct to rail trucks at 140 t.p.h.

Maydon Wharf 2 – Sugar Terminal: Operators: S.A. Sugar Association. Exports of bulk and bagged sugar. Max. draft. 9.84 m., max. reach 15 m., max. throw 15 m., max. height 14 m. Max. wharf length of continuous gantry: 131 m. Storage in 3 silos with 520,000 tons capacity.

Loading is facilitated over 2 appliances, but only one operated at a time with a rate of 750 t.p.h. 24 hour operation if required. Stowage Factor: 43.

Maydon Wharf 5 – Multi Product Installation: Operators: Rennies Bulk Terminals. Max. length 189 m., max. draft 9.84 m.

Discharge and loading of minerals, agricultural and processed products in bulk.

Storage capacity: Minerals.

3 covered sheds containing 14 segregated concrete bins – 80,000 tons. 2 concrete silos – 12,000 tons.

Storage capacity: Non-Minerals.

17 concrete silos – 4,540 cu.m. 3 star bins – 690 cu.m.

Loading Rates:

To ship: Agricultural – 400 t.p.h., minerals 700 t.p.h.

Ex-ship: Agricultural – 200 t.p.h., minerals – 200 t.p.h.

Hours of Operation: 24 hours per day, 7 days. Normal Monday – Friday 0600 – 1800 hrs. Balance at overtime rates.

Trimmer and Boom: Max. height of loading MSL +7.2 m., minimum depth of lowest bulkhead MSL + 1 m. Max. distance from quay 19 m. Minimum distance from quay 9.2 m. Max. throw 12 m. Rotation 360°.

Maydon Wharf 8 – Grain Terminal: Operators: S.A. Transport Services. Loading of bulk grain. Max. draft 9.84 m. Vessels have loaded up to 10.6 m. on a rising tide but the Master must take full responsibility and prior permission must be obtained from the Port Captain. Loading through 4 spouts. Storage capacity 34,560 tons (maize) and 15,000 tons (sun flower seed). Loading rate (maize) 1,290 t.p.h. Bagging rate 3,000 bags per day.

Hours of Operation: Ordinary time Monday – Friday 0600 – 1200 hrs., 1230 – 1800 hrs. Overtime: Monday – Friday 1800 – 0600 hrs. Saturday 0600 – 0600 hrs. Sundays and public holidays 0600 – 0600 hrs.

Max. length: Wharf 171.7 m. Gantry 133.56 m. between outermost shipping spouts. Max. beam with elevator spouts extended 27.43 m. Max. height from water level to top of coaming 14 m.

Average Stowage Factors	*Lower Hold*	*Tween Decks*
Conventional Vessels:		
Sorghum	49	51
Yellow Maize – Grade 1	46	47
Yellow Maize – Grade 2	47	48
Bulk Carriers:		
Sorghum	45.5	
Yellow Maize – Grade 1	46.5	
Yellow Maize – Grade 2	46.5	

Maydon Wharf 9 – Bulk Molasses: Operator: Pure Cane Molasses. Max. length 180 m., max. draft 9.84 m., storage capacity 42,000 tons, shipping rate 200 t.p.h. Piping and flanges available from operator. Shipping of Molasses in bulk.

Maydon Wharf 14 – Bulk Soda Ash Appliance: Operator: I.C.I. Max. draft 9.84 m., max. length 190 m., max. reach 17 m.

Discharge of bulk soda ash through 2 vacuum operated suckers simultaneously to shore storage facility of 22,000 tons. Hours of operation 24 hours – 7 days. Rate of discharge 120 t.p.h.. Max. 2,000 tons per 24 hours.

Maydon Wharf 15 – Bulk Manganese Ore Appliance: Operator: Associated Manganese. Max. draft 9.84 m., max. length 230 m., outreach 12 m. Hours of operation: 24 hours – 7 days.

Loading of bulk manganese ore over single boom conveyor. Appliance fed from 30,000 ton capacity open air storage facility, shipping rate 400 t.p.h.

CONTAINER HANDLING FACILITIES: A major container terminal comprising 5 deep sea berths (201-205) and 2 coaster berths (108-109) is equipped with 7×40 ton wharf container cranes at deep sea facility and 1×40 ton unit at Berth 108.

The entire complex covers some 102 hectares and provides very substantial stacking areas backed up by a large terminal building with computer control, workshop complex and a road/rail transfer terminal to handle unit trains conveying 100 TEUs. This rail terminal is served by 2 modern 35-ton container gantry cranes covering 3 rail tracks and 2 traffic lanes. The back up system operates on a combined trailer/straddle carrier system comprising 34×30 ton, 8-wheeled straddle carriers augmented by a substantial fleet of terminal haulers and trailers as well as a large cartage fleet operated by the Port Authority for the local delivery of containers.

A very modern stuffing and re-stuffing depot located on a 13 hectare site immediately adjacent to the harbour terminal is operated by private enterprise (Messrs. S.A. Cargo Depots). The depot is fully equipped with re-stuffing sheds and container handling equipment to cater for LCL traffic.

The container terminal operates a 24 hour day, 7 days a week service.

PRECOOLING FACILITIES: Precooling stores for the export of citrus fruit are available at "B", "L" and "M" berths point. The capacity of the precooling chambers is 9,000 shipping tons.

The following appliances are used:

2 electric haulers.

47×2 ton fork lift trucks.

10×5 ton low-lift platform trucks.

29×4 ton low-lift platform trucks.

10×3 ton fork lift trucks.

STEVEDORES: Stevedoring undertaken by private enterprise stevedores appointed by ship's Agent.

Port Working Hours:

The port is a 7 day, 24 hour port as far as berthing and pilotage are concerned. Cargo working hours are:

Monday – Friday (2 shifts)	0600 – 1400 hrs.
	1400 – 2200 hrs.
Sunday (1 shift)	0700 – 1500 hrs.

Saturday working (0600 – 1200 hrs.) only authorised when the port is congested. Saturday and Sunday working as overtime.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: *SBM:* An off-shore single buoy mooring, suitable for crude dischargers between 70,000 and 300,000 d.w.t., is situated in position 30° 00.5′ S., 30° 58.5′ E. A Mooring Master will board in position 2 miles Eastward of the SBM. A starboard derrick, capacity 10 tons should be ready and crew available to lift mooring equipment on board from launch. A good lee on the starboard side is desirable.

Mooring to the buoy is with 2 lines provided by the terminal but vessels are required to provide a rope messenger, available on the forecastle. The mooring operation is carried out by shore personnel, assisted when necessary by ship's crew.

Pipe-line manifold should be ready to connect two 16 in. discharge hoses ASA 150 flanges. Connection by terminal personnel. The hose connection team remain onboard throughout the discharger's stay at the SBM.

No bunkers, or water are available from the SBM. Vessels using the buoy and receiving water or stores ex-launch may only do so prior to berthing or after leaving the SBM and at a distance of more than 2 miles from the buoy.

Port Tanker Berths: There are 7 tanker berths for vessels of max. length 244 m., max. draft 12.3 m. at Island View.

Slop tank facilities with a capacity up to 4,000 tons are available. Requirements in excess of this volume should be made known to the vessel's Agents with as much prior notice as possible.

Crude oil discharge through 10 in. hoses, white oil 8 in. hoses and loading products through 8 in. hoses.

Bunkers and fresh water available ex-berth.

Chemical tankers up to 183 m. berthing at No. 1 Island View are permitted to berth during hours of darkness. Agent to advise Port Control in advance that SOLAS and Classification Certificates are valid.

2 tugs required for shifting and all tanks to be sealed.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 40 t.p.h.

FUEL: The following types of fuel are available as indicated:–

New Pier:	Fuel oil and diesel.
Island View:	Berths 1, 2, 3, 4, 9 – Fuel oil and diesel
Island View:	Berths 5, 6, 7, 8 – Fuel oil, diesel and gas oil.
Point:	Berths A to R – Fuel oil, diesel.

There is a self-propelled bunkering barge called the "Durban Servicer" with a capacity of 140 tonnes of gas oil, 650 tonnes fuel oil and 280 tonnes diesel.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Derat Certificate.
Certificate of competent officers (passenger ships only).

CUSTOMS ALLOWANCES: See "Capetown".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection. Under normal conditions vessels are obliged to use shore cranes.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

CONSULS:

Netherlands	,, 321770		

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Prince Edward Graving Dock:*

Dimensions—	Overall docking length	352.044 m.
	Length on keel blocks	327.660 m.
	Length on bottom	352.044 m.
	Width at coping	42.215 m.
	Width at entrance top	33.528 m.
	Maximum width at bottom	33.528 m.
	Depth on entrance sill HWOST	12.497 m.
	Depth on inner sill HWOST	13.106 m.

A docking length of 364.44 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments:
Outer 206.906 m. and inner 138.684 m.

The dock can be emptied in 4 hours.

Dry Dock Cranes:

2×8 ton with 27.50 m. radius
1×10 ton with 27.40 m. radius
1×25 ton with 27.40 m. radius
1×5 ton with 15.20 m. radius
1×10 ton with 18.28 m. radius
1×50 ton with 27.40 m. radius

Floating Dock No. 3:

Dimensions—	Extreme length	106.680 m.
	Length on bottom	106.680 m.
	Length on keel blocks	104.546 m.
	Extreme width	26.822 m.
	Width at entrance	19.482 m.
	Height on keel blocks	1.219 m.
	Draft on keel blocks, HWOST	5.334 m.
	Lifting capacity	3,629 tons
	Crane	4 tons

SURVEYORS: All Classification Societies represented.

REPATRIATION: All facilities available. Also see "Capetown".

AIRPORT: Louis Botha Airport – 15 miles from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Founder's Day (6th April), Good Friday; Family Day; Ascension Day (date varies); Republic Day (31st May); Kruger Day (10th October); Day of the Vow (16th December); Christmas Day (25th December); Day of Goodwill (26th December). Cargo is not worked on Christmas Day.

POLICE/AMBULANCE/FIRE: Police, 310-2714; Ambulance, 62333; Fire, 62333 or 4502222.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents. Also see "Restrictions" – Hazardous cargoes.

GENERAL: A copy of the Regulations for the Republic of South Africa supplied gratis to Masters on arrival.

SERVICES: Tank-cleaning facilities, compass adjustments and repairs to all electronic gear can be undertaken.

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICE: Crew changes are permitted by helicopter or launch at Durban and can be arranged with prior permission from Immigration and Customs Authorities provided vessel has been granted Radio Pratique.

Helicopter Services: A single engine Sikorsky S62 helicopter is available for crew changes and supply services to vessels passing off Durban. The above helicopter is available for daylight service only, except in emergencies.

Normal Service: Within 15 nautical miles of Cooper Light.

Note: Normal Rendezvous area is 10 nautical miles off the coast. Bearing (160°T) from Cooper Light. (For service where more than one flight is required the ship MUST route through the 10 nautical miles rendezvous position).

Launch Service: A Company operates launches suitable for servicing vessels off port limits. Up to 20 tons of stores and/or provisions and a maximum of 14 passengers can be carried. The condition of transport is that same is performed solely at Owner's risk.

The costs involved are R100 per half hour or part thereof and nominal charges are raised for the use of the launch's 1.5 ton hydraulic crane and steel cages to carry stores.

Communication can be established with the launch 1 hour prior to the ship's arrival at the Rendezvous position, on either VHF Channel 16 or 2182 kHz. The normal Rendezvous is five miles East of the Durban Harbour breakwater, but this can be easily varied.

The following two private companies have small craft licensed at this port to serve vessels off limits:

1. Messrs. Offshore and Ships Supplies (Pty) Ltd., P.O.Box 29139, Maydon Wharf 4057.
2. Messrs. Southern Offshore Supplies (Pty) Ltd., P.O.Box 38011, Point 4069.

Helicopter service provided by: Helicopter Services (Pty) Limited., P.O. Louis Botha Airport, Durban 4029. Tel: 426101/426192. Telex: 564246 SA.

SHIPMASTER'S REPORT: September 1980.

Pilotage: Pilot ladders should be provided with manropes, uncovered manila, not less than 32 mm. diameter and without knots at the end.

Container Handling Facilities: The terminal has been completed. General cargo vessels with 10 containers or more have to handle these through the container terminal and shift berth later for handling of general cargo.

Bunkers: On Maydon Wharf no bunker facilities, bunkers to be taken by barge, but only one barge available. Sometimes vessels have to shift to bunker pier for bunkering.

SHIPMASTER'S REPORT: June 1979 (updated February 1982).

Approaches: Decca Chain 10C, can be erratic, especially at night. 'Bluff shows up at 48 miles on radar. Cooper Point D/F continuous.

Pratique: Send message to "Porthealth" Durban 36 hours before arrival. If no complications free Pratique given quickly from Durban Radio.

Anchorage: Satisfactory if good weather, within about 4 miles N.E. of breakwaters, however if Southerly winds and swell build up it can be dangerous and it is often best to lie off.

Pilots: Send message to 'Port Captain Durban' 24 hours before arrival; ship's particulars, type, cargo, length, draft and Agent's name. Contact Durban Harbour Radio at least 1 hour before arrival. Pilot boards from large black fast cutter, nearly always on vessel's starboard side (landward side).

Must have fixed ladder with manropes, if vessel has large freeboard gangway required at half height. Pilots dislike hoists.

Entry: Due to swell and cross currents around breakwater vessel has to be "driven" through breakwater entrance which requires full harbour speeds and sometimes more if heavy swell conditions, once well inside breakwaters speed is reduced.

VHF: Durban Harbour Radio and Pilots generally work Channel 12 but numerous other Channels available.

For public correspondence use Durban Radio which usually works Channel 26, but very busy in the morning.

Tugs: 9 large powerful firefighting tugs are on station. Tugs are all diesel powered and comprise Schottel, Z-Peller and Voith propulsion systems with bollard pull varying from 23 tons to 40 tons. Two tugs fitted with extendable hydraulic fire fighting monitors. Very manoeuvrable and excellent stopping power. For most ships two tugs used inward and one outward, tug's wires used. A 20,000 h.p. ocean going tug is usually on station at Durban.

Tugs join vessels just inside breakwaters. For large vessels will accompany vessel on either side from anchorage area and then connect up when swell slackens inside.

Berth: For bunkers, Island View, Starboard side to. Swing in turning basin. For oil transfer of any kind use gantry 'Sheepbridge' with flexible pipes. Shock absorbing fenders. For vessels of 207 m. in length at No. 7, 8 and 9 Berths the straight section of the ship's side lay along the quay. FW available from quay.

Lines: Three head and stern lines, one of which is a shore line from mooring posts ashore. Two backsprings either end to the jetty. Mooring boat used.

Bunkers: Meter pump. Stop on meter at quantity stemmed. Rate up to 200 t.p.h.

Stores: Have to be taken from roadway down to the jetty. Generally local labour has to assist.

General: D/F calibration can be easily undertaken off Cooper Light, good continuous beacon from red tower near water tower, generally little traffic.

Customs/Immigration: Papers as per 'Guide to Port Entry'. Immigration require 'I' flag flown until Immigration clearance granted.

AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713-3305. *Telex:* 4-24205 SA. *Contact:* Dr. E. L. Grove, Director-General.

South African Transport Services, P.O.Box 38022, Point 4069, Durban, South Africa. *Tel:* 310-2434. *Contact:* Captain I. W. Edwards, Port Captain.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 1, Durban 4000. Tel: (031)-319851. Telex: 6-22446. Cables: Baronet, Durban.

EAST LONDON: 33.02 S. 27.55 E. (See Plan Book)

PORT LIMITS: These are defined in the "Regulations for the Harbours of the Republic of South Africa" as follows:

The area of the sea bounded by a line drawn from the Nahoon Point in position 32° 59′ 50″ S. 27° 57′ 07.5″ E. in a 114° direction for 1,852 m. to a position 33° 00′ 13.9″ S. 27° 58′ 12.8″ E. thence in a 216.5° direction to a position 33° 03′ 14.46″ S. 27° 55′ 37.18″ E. and thence in a position 295° direction to the coast in position 33° 02′ 36″ S. 27° 53′ 57″ E. (All bearings are true.)

For Charter Party purposes: An "arrived ship" is when she enters the port limits.

For Harbour Revenue purposes, a vessel "arrives" when it passes into the harbour proper or upon first contact at anchorage whilst waiting for berth.

DOCUMENTS: See "Cape town".

Immigration: Produce their own forms which are:

(a) Arrival and Departure forms.
(b) Prohibition Notice – which states all crew must sail with vessel unless officially signed off through Immigration.
(c) Medical Certificate.
(d) Advice letter from last South African port – if applicable.

They require Crew Lists and the "I" Flag to be flown until vessel cleared by Immigration Officer.

Also see "Capetown" – *Shipmaster's Report,* March 1981. Same Documentation except 3 crew lists and 1 copy "nil" livestock form.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. Pilot taken aboard at outer anchorage. Pilots prefer pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: Mondays to Fridays 0600 to 2200 hrs., Saturdays 0600 to 1200 hrs. (Ro-Ro vessels handled up to 1800 hrs. on Saturdays), Sundays 0600 to 1900 hrs. Tankers are handled in daylight only.

MAX. SIZE: Tankers: max. length 204 m. overall, draft 9.9 m.

Passenger and dry cargo vessels: max. length 239 m. overall, draft 9.9 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until Radio Pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: Two tugs available. Join vessel in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers dischaging crude.

BERTHING:

Wharfage	*Length (m.)*	*Depth at Chart Datum (m.)*	*Cranes (electric) No.*	*Lifting capacity (tonnnes)*
East Bank

New Commercial Berths (S and T Berths)	388.1	10.7	—	
Oil Tanker Berth	259.1	10.7	—	

Containers handled at West Quay. (Length of 10 m. where depth is 9.06 m.).

Ro/Ro vessels handled at No. 5/6 Quays (K Berth).

STEVEDORES: No Saturday work except for refrigerated vessels in fruit season or at Port Manager's discretion.

CARGO HANDLING FACILITIES: One berth equipped for bulk loading of maize. One berth equipped for discharging bulk petroleum products and LPG. All other berths for general cargo. Grain elevator: Storage capacity 75,986 tons; loading rate 1,650 t.p.h. through 4 spouts.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: One tanker berth suitable for vessels of 204 m. length with maximum draft 9.9 m. Diameter of hoses, 300 mm. LPG Tankers accepted, hose diameter 150 mm.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 60 t.p.h. Drought conditions can cause restrictions of 150 tons per ship.

FUEL: 48 hours' notice required. Heavy Oil and Gas Oil available.

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CERTIFICATES:

Safety Certificates in respect of Life Saving Equipment and gear.
Radio Certificate.
Load-line Certificate.
Derat Certificate.
Certificate of Competent Officers (passenger ships only).

CUSTOMS ALLOWANCES: See "Capetown".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

CONSULS:

Belgium
Denmark
France
Germany
Italy
Netherlands
Norway
Portugal
Sweden
United Kingdom

SURVEYORS: General cargo surveyors available.

Rennie Murray & Co. Ltd. Tel: 29612. Telex: 75–0711 as local Agent for Lloyd's Register, B.V., U.S. Salvage and Salvage Association.

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Princess Elizabeth Graving Dock:*

Dimensions—Overall docking length	198.5 m.
Length on keel blocks	193.1 m.
Length on bottom	198.5 m.
Width at coping	31.2 m.
Width at entrance top	27.2 m.
Maximum width at sill level	22.9 m.
Depth on entrance sill, HWOST	10.2 m.
Depth on inner sill, HWOST	10.2 m.

A docking length of 209.2 m. can be obtained by placing the caisson in the emergency stop at the entrance.

Two 15-ton and one 5-ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

REPATRIATION: All facilities available.

AIRPORT: Ben Schoeman Airport – 8 km. from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Capetown".

POLICE/AMBULANCE/FIRE: Police 2–5555; Ambulance 2–1212; Fire 2–1212. National Sea Rescue 22555. Harbour Police 442032.

EMERGENCY CO-ORDINATION CENTRE: Contact Port Captain: Tel: 44–2042 or 44–2142. Telex: 75–0774.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

SHORE LEAVE: Allowed. No shore pass required.

STORING: See "Prelims" page viii.

1. Truck only.
2. Not applicable.
3. Truck may proceed alongside unless explosives being handled. Vehicles not permitted at tanker berth. (Distance to gate – 200 m.)
4. Yes, except tanker berth.
5. Ship chandler places entries for bonded stores.
6. Ship chandler supplies labour.

DEVELOPMENTS: An additional 5 ton crane is to be provided at "C" Berth (No. 2 Quay). Two additional 4 ton cranes will also be erected at the dry dock.

AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713–3305. *Telex:* 4–24205 SA. *Contact:* Dr. E. L. Grove, Director-General.

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E.

(See Plan Book)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1 nautical mile on the Northward by a line drawn from the extreme point of the East bank of the Zwartkops River, East (true) distant 1 nautical mile, on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Zwartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Alicedale.

DOCUMENTS:

Customs

Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ship's Crew List (Customs Department).
Livestock Form (Customs Department).

Post Office

P1/27 Notice of arrival and departure of vessel.
P1/8 Declaration and Post Office Certificate.

Port Health

Maritime Declaration of Health.
Crew List with last vaccination dates.
Derat or Derat Exemption Certificate.

Port Authority

T958 Report of Arrival.
T962 A Departure/Shifting Notification.
Ship's Manifest.

Also see "Capetown" – Shipmaster's Report March 1981.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-Loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 3.5 km. East of breakwater. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side.

Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 3.5 km. Eastward of breakwater, in the Outer Anchorage. Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterlies being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Dry-cargo ships 0600 to 2200 hrs. Pilot must be aboard by 2030 hrs.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max. length	*Draft*
Passenger, dry-cargo and container vessels	Subject to Port Captain's prior approval	11.6 m.
Tankers	203.3 m. overall	9.3 m.
Ore carriers	251.5 m.	11.6 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Port Elizabeth Radio. Call sign ZSQ.

VHF: See "Pilotage".

TUGS: Three "Z-Peller" diesel tugs available, fitted with radar and VHF. Tugs join between anchorage and harbour entrance. Tug's wires used at no extra charge.

BERTHING:

Wharf	*Dimensions* *Length (m.)*	*Cope level (m.)*	*Depth at LWOST* *Max. (m.)*	*Min. (m.)*	*Cranes* *No.*	*Lifting capacity (tons)*

Container back-up facilities: 22 ha. with 3,500 ground positions for deep sea container traffic and 52 ground positions for reefer container traffic. 4.3 ha. with 924 ground positions for coastwise container traffic.

10 straddle carriers, 21 haulers and 21 bath-tub trailers for internal use.

A rail terminal for forwarding and receiving containers to and from inland destinations.

Ro-Ro facilities: Side loading for deep sea traffic. End loading for coastwise traffic.

BULK HANDLING FACILITIES: *Ore Loading Plant:* Storage capacity approx. 460,000 tons. Rated loading capacity 1,360 t.p.h.

Ore loaders:

Maximum outreach from quay face	19.35 m.
Extreme elevated height of loaders above HWOST	13.92 m.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agent.

TANKERS: Stand-by tugs for the fire watch compulsory.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. 160 t.p.h.

FUEL: 48 hours' notice required. Bunker fuel and gas oil available at ore berth. Bunker oil available at Berth No. 15.

CUSTOMS ALLOWANCES: See "Capetown".

CARGO GEAR: Undertaken by shore cranes. No floating crane available.

STEVEDORES: To be arranged through ship's Agency.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

CONSULS:

REPAIRS: Minor deck and engine room repairs.

DRYDOCKS: None. Electrically operated 1,200 ton slipway; depth on keel blocks F. 3.7 m.; A. 7.5 m. HWOST; telescopic cradle 75.4 m. long, minimum length 44.3 m. Max. length of ship 82 m. and max. beam 12 m.

SURVEYORS: All Classification Societies represented.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Shipmaster to liaise with stevedores.

REPATRIATION: All facilities available.

AIRPORT: 4 km. from harbour. Regular daily S.A. Airways flights to and from all major centres.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Founder's Day (6th April); Good Friday; Family Day; Ascension Day (dates vary); Republic Day (31st May); Kruger Day (10th October); Day of the Vow (16th December); Christmas Day (25th December); Day of Goodwill (26th December). Cargo is not worked on Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Police (City) 10111, Police (Harbour) 520-2280; Ambulance 414111; Fire 2-1555.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents.

IDENTIFICATION CARDS: Ship's passes required at container berths.

SHORE LEAVE: Allowed.
DEVELOPMENTS: Bulk loading facility to be extended by 200 m. (depth 12.1 m.) in order that larger vessels may be handled. There will be discharge facilities for petroleum products, LPG, cargo black feedstock and bitumen.
AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713-3305. *Telex:* 4-24205 SA. *Contact:* Dr. E. L. Grove, Director-General.

AGENT: King & Sons (Pty.) Ltd. P.O.Box 1, Port Elizabeth, 6000. Tel: (041) 521688 . Telex: 74-7627. Cables: Baronet, Port Elizabeth.

PORT NOLLOTH: 29.15 S. 16.50 E.

PORT LIMITS: Northward by a line drawn 245° from North Point to a point 4,827 m. from the shore; Westward by a line drawn 155° from the above point to the point where it meets a line drawn 245° from Guap Point, southward by the latter line.
DOCUMENTS: Port Nolloth is not a port of entry for foreign going vessels. Any vessel arriving from outside South Africa must enter at either Capetown or Walvis Bay. Only document required is one copy of the arrival form.
PILOTAGE: None. Harbour Master will give directions either from the shore, or will come on board a vessel if requested. 72 hours advance notice of ETA required. Harbour Master stands by on VHF Channel 16 and R/T 2182 from 0800 to 1700 hrs. Monday to Friday, 0800 to 1200 hrs. Saturday. Outside these hours only if a vessel is expected.
ANCHORAGES: Anywhere about half a mile seaward of the fairway buoy, usually just North or South of the transit line.
RESTRICTIONS: Daytime port only. Entry usually only possible about 2 to 3 hours either side of HW. Tide gauge on jetty and vessels only allowed to enter when 1 m. above chart datum shown on this gauge.
MAX. SIZE: Length 200 ft., draft 4 m.
HEALTH: Pratique automatic as vessel must have cleared at another South African port.
RADIO: Local radio station as under "Pilotage", or call Capetown Radio.
VHF: VHF in Harbour Master's office; (Multi-Channel). R/T 2182 kHz. Other VHF Channels available (i.e. 6, 10) on portable VHF sets.
RADAR: Not available.
TUGS: None. 40 ft. launch available if required.
BERTHING: 1 berth, 217 ft. long. Depth alongside 3.5 m. at Chart Datum.
CRANES: 1 electric travelling crane, 7.5 tons SWL (only 4 tons SWL under normal cargo working). 1×7.5 ton mobile crane available.
STEVEDORES: Stevedores supplied by CDM (Pty) Ltd. who operate the port. 2 gangs available, no advance notice required.
MEDICAL: Local hospital, no resident doctor. Main hospital at Alexander Bay (80 km. distant). Doctor visits Port Nolloth 4 mornings a week.
TANKERS: Tankers discharge alongside main cargo jetty. Gas oil only. No slop discharge facilities and no loading of oil. Discharge by vessel's pumps, 2 discharge lines available (Shell and Caltex).
DENSITY: 1025.
FRESH WATER: Fresh water available, brackish in quality. Delivery by small bore hose (garden tap size); pressure dependent on municipal mains.
FUEL: Marine diesel available on all 3 jetties (2 fishing jetties and main cargo jetty). Delivery from standard type pump nozzle.
FIRE PRECAUTIONS: Normal when discharging gas oil.
CONSULS: None.
REPAIRS: Small deck and engine repairs can be undertaken.
DRY DOCKS: None. 1 slipway for vessels up to 20 m. length and 60 g.r.t.
SURVEYORS: No cargo surveyors. South African Department of Transport represented by the Harbour Master.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing carried out by vessel's crew.
CUSTOMS ALLOWANCES: No Customs officers available.
REPATRIATION: In emergency only.
AIRPORT: Alexander Bay 80 km.; Springbok 140 km. Daily flights from Springbok to Capetown. 3 weekly flights from Alexander Bay to Capetown and to Luderitz, Walvis Bay and Windhoek.
TIME: GMT plus 2 hours throughout the year.
HOLIDAYS: Third Saturday each month is a long weekend. Good Friday, Ascension Day, Day of the Vow (December 16th), Christmas Day, Boxing Day and New Year's Day are holidays – cargo work can be arranged on some of these days, but it is not usually asked for.
POLICE/AMBULANCE/FIRE: Police – Port Nolloth Tel: 8320. Ambulance – Port Nolloth Tel: 8345 (municipality) or Tel: 8411 (state). Fire – No fire brigade in the town – CDM fire fighting facilities Tel: 8355 or Tel: 8404 after office hours.
TELEPHONES: No facilities exist for placing telephones on board.
SHORE LEAVE: Permitted, no restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Tidal, unless berth occupied.
BANKS: Barclays Bank Ltd., P.O.Box 72, Port Nolloth 8280. Tel: Port Nolloth 8216. Telex: 57–20471 SA.
EMERGENCY CO-ORDINATION CENTRE: Port Captain, Capetown. Tel: Capetown 2183413. Telex: 57–26544 SA.
Port Captain, Walvis Bay, Tel: Walvis Bay 3631.
Port Captain, Saldanha Bay, Tel: 41726.
Any coast radio station, i.e. Capetown Radio or Walvis Bay Radio.
STORING: See "Prelims" page viii.
1. By truck.
2. No barges available.
3. Trucks can proceed alongside the vessel.
4. Yes.
5. None.
6. Yes.

AUTHORITY: South African Transport Services, P.O.Box 30, Port Nolloth, 8280. *Tel:* Port Nolloth 8340. *Contact:* Captain D. M. Bridge, Harbour Master.

RICHARDS BAY: 28.48 S. 32.06 E. (See Plan Book)

LOCATION: The port is located some 200 km. North of Durban. Mid point of the bay is approximately Lat. 28° 48′ S., Long. 32° 02′ E.
DOCUMENTS: The following documents should be prepared and ready on berthing:
Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Certificate.
Immigration:
3 Crew Lists ("I" Flag International Code to be flown).
Customs:
2 Crew Lists.
1 Ship's Stores List.
1 Crew Customs Declaration (local form only).
1 Narcotics List.
1 Personal Effects List signed by each crew member.
1 Passenger List.
All vessels using the port, will be subject to Customs Inspection and must obtain a Customs Clearance.
Agents:
2 Crew Lists.
Loading Certificate.
Safety Radio Certificate
Safety Equipment Certificate.
Register.
1 Transire from previous South African port.
PILOTAGE: Pilotage is compulsory and Pilots are provided by the Marine Department of South African Transport Services.

Boarding points are determined by the Pilot, but generally speaking will be within an area approximately 3 nautical miles S.E. of South breakwater.

At the present time vessels can only enter and leave during daylight. Later this position will be reviewed to consider a 24 hour service. Tugs and Pilots normally work 0600 hrs. – 1800 hrs. daily.

Vessels with freeboard in excess of 10 m. must have accommodation ladder rigged in addition to the pilot ladder. Pilot hoists not normally accepted.
ANCHORAGES: 3 to 5 nautical miles off Port but not opposite Entrance (precise area not yet demarcated). *Quality of Bottom:* Sandy.
Note: Anchorage is similar to Durban and in high S.W. winds anchorage is safe, but in high N.E. winds caution should be exercised.
MAX. SIZE: LOA Max. 314 m. Beam max. 47.25 m. Draft max. 17.3 m. D.W. Limit max. 170,000 d.w.t.
Minimum Ballasted Condition on Entry:

Length	*Draft – Fore*	*Draft – Aft*
600 ft. (183 m.)	20 ft. (6.1 m.)	24 ft. (7.3 m.)
700 ft. (213 m.)	25 ft. (7.6 m.)	28 ft. (8.5 m.)
800 ft. (244 m.)	26 ft. (7.9 m.)	30 ft. (9.1 m.)
900 ft. (274 m.)	27 ft. (8.2 m.)	32 ft. (9.8 m.)
over 900 ft. (274 m.)	28 ft. (8.5 m.)	34 ft. (10.4 m.)

HEALTH: Radio Pratique can be obtained by cabling Port Health – Durban using the standard international procedure for working. See "Radio".
RADIO: *Arrival Advice:*
To "Porthealth Richardsbay" – direct through Durban Radio – 24 to 48 hours prior arrival – advising ETA, last port, date sailed, number of crew, full inoculation/vaccination status, and state of health of crew, and requesting Radio Pratique. Porthealth will cable vessel directly, either granting Pratique or requesting further details. These messages are free of charge.

To "Portcaptain Richardsbay" during normal port working hours, otherwise signal station outside hours. – direct through Durban Radio – 48 hours prior arrival, advising ETA, draft, freeboard and reason for call at Richards Bay.
VHF: Vessels can communicate with Port Control on Channel 16 VHF, watch is maintained continuously. When at anchor, listening watch should be kept to receive berthing instructions.

TUGS: Tug attendance is compulsory. Tugs are owned and operated by South African Transport Services and consist of the following:

1. Voight Schneider (2 tugs)	4,200 h.p.
	Bollard Pull 43 tons.
2. Diesel Kort Nozzle (2 tugs)	4,400 h.p.
	Bollard Pull 52 tons.

Stand-by tugs compulsory for tankers dischaging crude.

BERTHING: Line boats are provided by the Harbour Authorities, as are berthing gangs.

Coal Terminal:

Berths No's 301, 302 and 304 are used solely for the export of South African Steam Coal. Berth No. 304 is currently used as a lay-by berth but loading conveyors will be extended to this berth. The plant is owned and operated by the Richards Bay Coal Terminal Company (Pty.) Ltd.

Length (301-304)	1,400 m.
Depth	19 m.
Permissible draft	17.3 m.
Quality of bottom	Sandy to hard
Height of quay above HWOST	3.2 m.

Shiploaders: Three. (Dimensions apply to one machine)

Loading rates:	Loaders 1 and 2
Nominal –	8,500 tonnes. p.h.
Average –	5,000 tonnes. p.h.
	Loader No.3
Nominal –	10,500 tonnes. p.h.
Average –	6,500 tonnes. p.h.
Working Range of Boom	15° up to 15° down
Height of Boom above HWOST with Loader at max. working elevation	21.6 m.

Coal Terminal working hours: 24 hours daily, 7 days per week. Christmas Day not usually worked.

Clean Cargo Berth:

On the North side of the harbour 1,300 m. of quay wall has been constructed and commissioned (Berths 609 and 701 – 703. Height of quay above HWOST 3.2 m. Quality of bottom, sandy.)

Berth 609	length	300 m.
	depth	12.8 m.
	permissible draft	12.0 m.
Berth 701	length	300 m.
	depth	12.8 m.
	permissible draft	12.0 m.
Berths 702/703	length	700 m.
	depth	19 m.
	permissible draft	17.1 m.

Berths 702-703 have a shiploader of max. capacity 2,500 t.p.h. Ship's unloader at berths No. 701 and 702 with max. capacity of 1,250 t.p.h., also ship loader for the export of woodchips with max. capacity 600 t.p.h., as well as rail tracks and adequate back-up areas.

A very substantial multi-purpose bulk handling facility is being developed behind Berths 701-703 for the import of sulphur, petroleum coke and alumina. The terminal, which is partially completed, and comprises truck tipplers, silos, open and covered storage, conveyors, etc. is at present handling the export and import of chrome, coal, alumina, petroleum coke, sulphur, potash clay, vermiculite, wood chips, rock phosphate, zircon, rutile, titanium slag, pig iron and ferro-alloys by means of wharf cranes or belt loader.

Clean Cargo Berth working hours: 24 hours daily except from 0600 hrs. Saturday to 0600 hrs. Sunday when no work. Christmas Day, Good Friday and New Year's Day not usually worked.

Berth 609, which is served by rail tracks and an adequate surfaced area is currently being used for general cargo on a small scale.

A phosphoric acid terminal with a storage capacity of 36,000 tons is located behind the quay and tankers are loaded at a rate of 1,200 t.p.h. via means of pipe manifolds at Berth 703.

MEDICAL:

Hospital: There is a modern and well equipped hospital at Empangeni. (Approx. 25 km. from the berth).

Doctor/Dentist: Usual port services available on 24 hour basis.

DENSITY: 1026.

FRESH WATER: Available at the berth. Rate approx. 25 t.p.h.

FUEL: Heavy and Medium Fuel Oil. Diesel Oil and Gasoil are available by pipe-line at Berths 301, 302 and 209 only. Bunkering can take place concurrently with loading.

Stems for bunkers should be placed with normal bunker suppliers who will arrange delivery through the bunker supply company at Richards Bay. All vessels calling for bunkers must either be gas free or inerted before they will be permitted to enter the port.

CONSULS: In Durban.

REPAIRS: Written approval must be obtained from the Port Authorities, via the Agents for vessel to immobilise engines to carry out repairs. Repairs may be carried out at the berth.

SURVEYORS: Lloyd's, ABS, BV and NV in Durban. Societe Generale de Surveillance and Chettle and Company in Richards Bay.

GANGWAY/DECK WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: See "Capetown".

REPATRIATION: Possible.

AIRPORT: There is an airport at Richards Bay 26 km. from the Coal Berth, and there are 8 flights per week to Durban and 3 flights per week to Johannesburg, where international connections can be made.

HOLIDAYS: *Local Holidays:*

New Year's Day, 1st January; Founder's Day, 6th April; Good Friday; Easter Monday; Ascension Day; Republic Day, 31st May; Kruger Day, 10th October; Day of the Vow, 16th December; Christmas Day, 25th December; Day of Goodwill, 26th December.

Where such a holiday falls on a Sunday, the Monday following becomes a Public Holiday.

TIME: GMT plus 2 hours.

POLLUTION: The Port Authorities demand that no vessel using the port shall discharge any garbage, refuse, vegetable or food matter, deck cleanings, polluted bilge water, oil or rubbish of any description in the vicinity of or in the port of Richards Bay.

Heavy penalties will be imposed for breach of the regulations.

Vessels arriving in Ballast must have clean ballast on board, as deballasting takes place alongside the berth. Dirty ballast pumped into the harbour will incur heavy penalties for pollution.

TELEPHONES: Telephones are available at the berth. Application for the service should be made through the Agents in advance.

All telephone calls made will be charged to the vessel's account.

Caution: With direct dialling available internationally it is strongly recommended that telephones are placed in the custody of a responsible officer to avoid abuse.

SHORE LEAVE: There are no restrictions on shore leave for crew. Entertainment in the Richards Bay area is very limited. Durban, 2.5 hours drive away, however, can offer very much more. (Crew members proceeding to Durban require written permission from Immigration Authorities.)

IDENTIFICATION CARDS: Seaman's Book sufficient.

SHIP SUPPLY SERVICE: A helicopter service through Court Republic Helicopters, P.O. Louis Botha Airport, Durban L, 4029. Tel: (031) 426101. Telex: 624246.

Rendevous position Port Dunford Lighthouse 090°T 23 nautical miles.

Note: Aircraft can carry out approximately 100 mile round trip in 1 hour.

A launch service is carried out by the South African Transprt Service via the Pilot launch. The efficient operation is dependant on the work load of the Port at the time service is required.

Prior to helicopter/launch being permitted to leave, signed authority from Port Health, Customs and Immigration must be obtained.

GENERAL: The harbour and the quays are owned by South African Transport Services.

Provisions: Stores and provisions can be obtained through local Ship's Chandlers.

Game Parks: National Parks Board Game Reserves (Hluhluwe and Umfolosi) are within easy reach of Richards Bay by car.

Car Hire: Cars can be hired, through the Agents at reasonable cost to officers and responsible crew members only. An International Driving Licence is required to make use of this service.

Navigational Aids: Lighthouse (500,000 candlepower). Radio beacon at lighthouse "ZK", on 285.5 kHz. Continuous transmission, North of the harbour at position 28° 48′ S., 32° 06′ E.

Leading lights – Front Red, fixed during day, flashing at night in position 28° 47′ 26.17″ S., 32° 02′ 10.53″ E.

Back leading light, white, fixed during day, occulting at night in position 28° 47′ 09.25″ S., 32° 01′ 19.77″ E. Leading line 110° 44′ 20″.

Breakwater tip lights (2 flashes per 5 secs.) South light Red, North light White.

Tides: Tidal change between HWOST and LWOST is approx. 2 m.

Prevailing Winds: South Westerly; North Easterly.

DEVELOPMENTS: The development of the town and surrounding areas is taking place rapidly together with large scale industrial and commercial developments.

Apart from the development of the extensive multi-purpose bulk handling terminal behind Berths 701-703 the South African Transport Services has provided two additional coal berths (No. 303 and 304) and the Richards Bay Coal Terminal Company are expanding their handling and storage facilities for an export capacity exceeding 40 million tons per annum.

SHIPMASTER'S REPORT: January 1980 (Updated 1984).

Pilotage: Compulsory.

Restrictions: At the present time vessels cannot enter or leave during the hours of darkness. However, 24 hour service is under consideration. Vessels able to dock and undock at any stage of the tide.

Max. Size: 170,000 d.w.t. LOA 314 m., beam 47.25 m., and max. draft 17.3 m.

Tugs: Four tugs available.

2×Voight Schneider 4,200 h.p. Bollard pull 52 tons.
2×Diesel Kort Nozzle, both 4,400 h.p. Bollard pull 50 tons.

Radio: Richard's Bay Signal Station and Port Control.

VHF: Channels used 16, 9, 11, 12, 13 and 14. Pilot and Port Authority on Channels 16 and 12.

Berthing: Distance from entrance to berth 6.5 km. Maximum size 170,000 d.w.t., max. draft 17.3 m.

Hours of movements within the port, 0600 hrs. to 1800 hrs. A multi-purpose bulk handling appliance has been erected. There are 4 cranes of 4 tons capacity available. Ro-Ro facilities for ships equipped with quarter ramp available. No floating crane available. Port not geared to handle palletised cargoes.

Consuls: Nearest Consuls in Durban.

Facilities Available: Fresh water; Fresh provisions; Repairs (limited); Machine ship (limited); Airport; Lloyd's Surveyor; Salvage Surveyor (from Durban); Laundry service; Bunker fuel oil and diesel oil (at Coal Berth) and Berth No. 209; Lubricating oils; Doctor and hospital; Groceries and Meats.

AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713-3305 *Telex:* 4-24205 SA. *Contact:* Dr. E. L. Grove, Director-General. *Richards Bay:* Port Captain, S.A. Transport Services, P.O.Box 18 Richards Bay 3900. *Tel:* 593231.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 9, Richards Bay, 3900 Tel: (0351)-31291/2. Telex: 6-20488. Cables: Baronet, Richards Bay.

SALDANHA BAY: 33.02 S. 17.58 E. (See Plan Book)

DOCUMENTS:

Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Exemption Certificate.

Immigration:
3 Crew Lists only.

Customs:
1 Crew List.
1 Ship's Stores List.
1 Crew Declaration.

Agents:
2 Crew Lists.

Customs: Arrangements have been made with Customs that loading shall commence before Customs Entry is completed. Customs will normally board on arrival for the purpose of checking and sealing Bonded stores, etc.

Immigration: On arrival at the port, any vessel which is not cleared by Immigration shall show the 'I' flag. No persons may disembark or embark without the express permission of the Immigration Officers until such time as Immigration formalities have been completed.

PILOTAGE: Pilotage is compulsory at Saldanha Bay, and is undertaken by fully qualified Master Mariners employed by the South African Transport Services.

High sided vessels which do not *fully* comply with I.M.O. recommendations in respect of Pilot boarding arrangements may be subjected to delay as well as extra charges for helicopter utilisation.

APPROACHES: Masters of vessels are warned not to proceed too close to the shore line in the vicinity of Saldanha Bay harbour, nor to enter the S.B.H. limits without a Pilot. The Wasserfall Bank situated between Jutten and Malgas Islands across the entrance to the outer bay constitutes an unmarked hazard. The recommended position to embark the Pilot is North Head light × 050°T (ships in ballast only). Distance 2 nautical miles but *not* in any circumstances closer to the Saldanha Bay harbour limits.

Ships in loaded or part loaded condition should board Pilot in position North Head light 030° distance 3 nautical miles.

MAX. SIZE: LOA 350 m. Draft 21.25 m.

HEALTH: Vessels requesting Free Pratique should cable Port Health, Capetown, via Capetown Radio (ZSC) at least 24 hours before arrival. There is no charge for messages addressed to Port Health. When Free Pratique cannot be granted, then the vessel will be required to show the 'Q' flag on arrival and will be boarded by Port Health Inspectors at the anchorage in Saldanha Bay.

RADIO: Saldanha Bay will be served by Capetown Radio (ZSC).

Arrival: Vessels calling at Saldanha Bay to load ore will be required to send their ETA 96 hours prior to arrival, stating the approx. tonnage of ore required, the type of ore and the loading programme. Further messages will be required to be sent at 48 hours and 24 hours prior to arrival, updating the ETA. These ETAs are to be sent via Capetown Radio (ZSC) addressed to Port Captain, Iscor Maritime Co-ordinator and also to the Agent. In addition, VHF contact on Channel 16 or MF on 2182 kHz must be established as soon as possible with Port Control. To cater for simultaneous or near simultaneous arrival of ships, Masters are requested to advise Port Control when, if Northbound, they are 12 miles from South Head or if Southbound when 12 miles from North Head to assist in allocation of service.

Vessels calling at Saldanha Bay after leaving Capetown will be required to send by telex their ETA 24 hours before the expected time of arrival at Saldanha Bay, together with their final tonnages of cargo required, type of ore and loading programmes.

With the final 24 hour ETA the Master will be required to provide the draft forward and aft, and the deballasting time required on arrival. If there is any change to this programme a further message should be despatched as soon as possible after any such change is known.

48 hours prior to arrival, in addition to the updated ETA, the vessel must indicate her requirements, i.e. fuel, fresh water, other services to Port Captain, Iscor Maritime Co-ordinator and the Agents. Final advice of loading programme:

1. Quantity
2. Grading
3. Sequence

to be provided at least 24 hours before Notice of Readiness is given. Failure to provide this information may result in a delay of 12 hours before loading commences. Vessels are to request docking instructions from Port Control 6 hours before arrival. Instructions will be given promptly and concisely.

Vessels will be loaded in regular turn subject to cargo availability and Charter Party Lay Days, providing they berth with hatches open and are ready for loading in all respects.

VHF: *Port Control:* Saldanha Bay Port Control is equipped with VHF and contact can be made direct using Channels 16, 12, 11, also MF 2182.

Tugs: The tugs operate with VHF Channels 1 – 28 and 60 – 88, and radio telephone.

TUGS: There are 3 tugs stationed in Saldanha Bay Harbour operated by South African Transport Services. Each tug is propelled by Voith Schneider gear, and is of 4,000 h.p. and 42 ton bollard pull.

Depending on length of vessel, draft, weather conditions, etc., a fourth tug may have to be sent from Capetown at vessel's expense.

There is one small diesel tug of 900 h.p. and four diesel launches for running lines.

BERTHING: The jetty construction is of the caisson type, spanned with a deck construction between the caissons. The total jetty length is 991.65 m. and the total mooring length available will be 650 m. for iron ore loading vessels and 310 m. for oil tankers at a depth of 23 m. below chart datum. Vessels can be accommodated on both sides of the jetty and the jetty is equipped with adequate quick release hooks and fenders.

The design of the jetty makes provision for the mooring of 350,000 d.w.t. loaded vessels with a max. theoretical approach speed of 18 cm./sec.

The width of the dredged area is 260 m. maximum on either side of jetty, tapering to 220 m. at the oil jetty, 380 m. at No. 4 Buoy and 400 m. at No. 1 and 2 Buoys.

A turning basin with a diameter of 580 m. and a depth of 23.20 m. below CD is provided in the navigational channel, seaward of the jetty.

From the turning basin seawards the depth of the navigational channel increases to 23.45 m. CD and eventually to 23.70 m. CD in the section marked by buoys. From the outer buoys the depth increases from 24 m. to 45 m. at the outer harbour approaches.

Loading: Bulk ore loading will be effected by means of two luffing, slewing and travelling ship loaders, together capable of loading continuously at a rate of 8,000 t.p.h. average, with a peak rate of 10,000 t.p.h.

General Cargo Quay: Situated on the Western side of the ore jetty causeway and mid-way between the shore line and the jetty, is in operation. Length 250 m. Depth 12 m. at chart datum. 2×15 ton cranes.

Accepts vessels up to 30,000 d.w.t., 200 m. in length and max. draft 10.5 m. (11.25 m. at high tide). At present lead, zinc and copper concentrates are loaded.

Approach Channel: Parallel to causeway. Length 1.2 km., width 150 m., depth 12.5 m. LWOST.

MEDICAL: *Hospitals:* There is a fully equipped hospital in Vredenberg, 13 km. from Saldanha Bay. Serious medical cases, however, will normally be referred to one of the hospitals in Capetown.

Doctors: There are several doctors available in Saldanha Bay and nearby Vredenberg. To expedite appointments, however, and to arrange for attendance on board, Agents should be consulted.

Dentist: There are several dentists available in the area, and in order to expedite appointments, Agents should be consulted.

AIRPORT: International Airport near Capetown. Military airport locally but special landing rights have to be applied for.

FRESH WATER: Fresh water will be delivered at the rate of 35 t.p.h. Application for the supply of water should be made to Port Captain through the Agents.

FUEL: Bunkers not yet available ex-jetty.

CONSULS: There are no Consulates established in Saldanha Bay, but the following countries are represented at Capetown:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada
Chile
Denmark
Finland
France
Germany
Greece
Israel
Italy
Japan
Monaco
Netherlands
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
Taiwan
United Kingdom
U.S.A.
Uruguay

CUSTOMS ALLOWANCES: See "Capetown".

HOLIDAYS: The following are recognised Public Holidays in the Republic of South Africa:

New Year's Day, January 1st; Founder Day (6th April); Good Friday; Family Day; Ascension Day; Republic Day, May 31st; Kruger Day, October 10th; Day of the Vow, December 16th; Christmas Day, December 25th; Day of Goodwill, December 26th.

Should any of the above mentioned days fall on a Sunday, the following Monday is observed as a Public Holiday.

Cargo is worked 24 hours every day.

TELEPHONES: Telephone facilities are available from the jetty. In order to obtain a telephone, however, arrangements will have to be made by the Agents. In this respect we would point out that many foreign countries have direct dialling facilities with South Africa, and in all cases arrangements should be made for lockable telephones to be placed on board, and the use of that telephone placed under the control of the Master.

SHIP SUPPLY SERVICE: As Saldanha Bay Harbour is situated only 60 nautical miles North of Capetown the "Off Shore Services" based there are used in the normal course of events.

The harbour tugs of launches could be utilised from Salhanah in the case of medical emergency in the close proximity to Salhanha Bay.

GENERAL: *Removal of Rubbish:* Arrangements are available for the removal of rubbish and can be made through the Agents.

Weather: The climate is temperate. Average high temperatures year round are 20°C (68°F) and average low temperatures are in the region of 11°C (52°F). Sea water temperatures average 16°C. Prevailing winds in Summer are S.S.E'ly and in Winter N.W'ly. Rainfall figures are approximately 300 mm. per annum. Saldanha Bay is a Winter rainfall area. Fog occurs generally in the March to August period. Currents – there are no sea or thermal currents in the harbour area. Tidal currents generally will not exceed 1 knot.

Currency: The standard unit is the Rand. One Rand divided into 100 cents.

Electricity: Can be made available ex-jetty on application to S.A. Transport Services via the Agents.

Compressed Air: Will be available ex-quay on application to S.A. Transport Services via the Agents.

Cranes: A mobile crane will be made available through S.A. Transport Services via the Agents.

Ship Chandlers: Local Chandlers now operating.

Sporting Facilities: Can be arranged for all sports through the Port Captain in co-operation with Military and Naval Authorities in area.

SHIPMASTER'S REPORT: 1977 (Vessel – 150,000 d.w.t. OBO) updated 1984.

Port Limits: A line drawn between North Head and South Head lighthouse. Vessel considered arrived after passing these limits.

Documents: Request Radio Pratique 48 hours before arrival giving (1) Name and Nationality of Vessel (2) Last Port (3) Destination (4) Health condition on board (5) Number of crew and passengers (6) Type of cargo or in ballast (7) ETA.

Pre-arrival cable via ZSC Capetown to Iscor Vredenburg, Port Captain Saldanha and the vessel's Agents.

Advise ETA 96, 48 and 24 hours out and if any changes. With 24 hours ETA, or earlier if available advise Agents:–

- (a) Final stowage required and types of ore. (Hatch Totals).
- (b) Loading sequence. (Hatch Runs, Trimming stops, etc.).
- (c) Deballasting time required.
- (d) Drafts on arrival, estimated drafts on sailing.
- (e) Whether OBO vessel and whether or not in possession of gas-free certificate.
- (f) On vessel's first call – Summer d.w.t., LOA, breadth from foremost hatch coaming to bow, aftermost hatch coaming to stern, distance upper gangway platform to stern and whether leading forward or aft. Advise Agents all requirements 48 hours pre-arrival.

Port Papers: 4 copies Crew and Passenger list.
3 copies report inward DA1 to DA3 (Agents supply).
1 Crew declaration.
1 Store list.
1 Slop chest list.
1 Livestock list if applicable.
1 Gasfree Certificate.

If a vessel's last cargo was oil, or if vessel carries slops, or a valid gas free certificate is not onboard, then a chemist will be required to come from Capetown to inspect vessel and provide gas free certificate on arrival. No vessel may dock to load ore without being certified gas free. Agents will arrange for chemist.

Pilotage: Compulsory. Pilot boards off North Head but in practice comes some way to seaward to meet vessel. Cutter is a rakish red craft capable of 23 knots, fitted VHF, all normal Channels. IMO regulation pilot ladders required complete with manropes. There are 5 Pilots in the port.

Anchorage: Vessels are permitted to anchor in the bay under pilotage. Swell and depth of water make the area to seaward unsafe.

Restrictions: Vessels sailing with a draft of 21.25 m. and arriving with a draft of 20 m. can be handled at HW. The port's largest vessel to date was a 284,000 tonner. When the developments are complete it is expected that vessels of at least 350,000 d.w.t. can be handled.

Pratique: See "Documents".

Radio: ZSC Capetown for messages, and the Port Radio Service on arrival.

Radar: Decca 50S surveillance radar system in Port Control Office, manned 24 hours – VHF communication.

Tugs: 3 Voith Schneider tugs of 3,960 b.h.p. each. Tugs connect to vessel in berth approaches. Tug's lines at no extra charge.

Berthing: Vessels berth against Yokohama fenders on either East or West side of quay. Ordinary moorings but extra moorings available on hire during infrequent heavy swell conditions. Vessels are always swung to berth head out. There is apparatus for indicating vessel's approach velocity.

Handling Facilities: 2 ore loaders nominal capacity 10,000 t.p.h., 1 loading and the other placed for next run. Actual load rate about 7/8,000 t.p.h.

Medical: Services available. Advise through Agents pre-arrival. Small hospital at Vredenburg and extensive facilities in Capetown, 1.5 hours away.

Density: Salt – 1025.

Fresh Water: Available ex-jetty at about 40 t.p.h. Berthing staff connect hose.

Fuel: Not available at present. Small stocks of diesel and gasoil.

Repairs: Small repairs are possible locally. Major repairs can be handled from Capetown, Globe Engineering have a branch at Saldanha. If vessel has urgent repairs pre-arrange attendance with Agent.

Note: Permission is required to immobilise main engine. Also advantageous to pre-arrange.

Surveyors: Available on request from Capetown for all Societies.

Watchmen: Not required, but readily available.

Customs Allowances: (Period of 4 days) – Local officer enforces allowances.

Master: 230 gm. tobacco (any form), 1 litre spirits (any form), 3 litres of wine, 3 litres beer or stout.

Officers and Petty Officers: 173 gms. tobacco, 1 litre of spirits, 3 litres wine, 3 litres beer.

Crew: 115 gm. tobacco, no spirits, no beer, 3 litres wine.

Wine only permitted on ships where wine is part of rations – French, Italian, Spanish vessels etc.

Repatriation: Readily available, 1.5 hours in car to Capetown, thence by International air network. Due regularity of crew changes off Capetown there are competing courier services etc., so very few delays. Hotel accommodation is available in Saldanha if required.

Time: South African Standard.

Holidays: Cargo not worked on Christmas Day and Good Friday.

Police/Ambulance/Fire: Through Port Control and VHF.

Telephones: Available.

Services: Cleaning gangs, riggers, watchmen, etc., readily available.

Shore Leave: Saldanha town 10 miles from dock.

Identity Cards: Not required, except on tankers.

B/L Figures: By survey of ship's drafts. Vessels are not permitted to submerge their Plimsoll Lines, avoid sag or shortshipment inevitable.

General: Provisions and laundry available from Capetown, cable requirements. Lorries permitted on dock provided no interference with operations, but not at tanker berth. Service technicians also available from Capetown.

Trip to and from Capetown regularly and routinely undertaken by all and sundry involved at Saldanha, but to avoid time loss and delay ensure that wherever possible contractors and Agent are aware of requirements.

AUTHORITY: South African Transport Services, Paul Kruger Building, Private Bag X47, Johannesburg 2000, South Africa. *Tel:* 713-3305. *Telex:* 4-24205 SA. *Contact:* Dr. E. L. Grove, Director-General.

Saldanha Bay: Port Captain, South African Transport Services, P.O.Box 105, Saldanha Bay 7395. *Tel:* (02281) 41726. *Telex:* 57-22225.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 102, Saldahna Bay, 7395. Tel: (02281) 41259. Telex: 57-27417. Cables: Baronet, Saldahna Bay.

NOTES

Please also advise Shipping Guides Ltd.

Spain

AGUILAS and HORNILLO: 37.24 N. 01.35 W.
(See Plan Book)

DOCUMENTS: See "Almeria".

PILOTAGE: Hornillo port has no Pilot. The Pilot of Port of Aguilas which is less than a mile from Hornillo, does pilotage services of both. To enter both ports of Hornillo and Aguilas, anchor mile or a mile and half distance from entrance of Aguilas. Wait for Pilot with engine stopped. To call Pilot give three long blasts several times. Pilot's launch is small motor boat painted white, with letter "P" painted on both sides of boat. During night it carries white light on top of mast, and 8 ft. lower a red light, besides the usual lights.

RESTRICTIONS: It is not possible to enter Hornillo port during dark. Wait till dawn outside Aguilas.

MAX. SIZE: Length up to 160 m., draft about 29 ft.

HEALTH: See "Almeria".

TUGS: None in port and not necessary for either port. If necessary, tugs are available from nearby Port of Garrucha.

BERTHING: Aguilas port has a commercial quay with a berth area about 300 m. and depths of between 8 m. – 12 m. Hornillo port has a pier to handle minerals with berth area of 90 m. to 100 m. and depths between 6 m. – 10 m.

BULK HANDLING: 2 conveyor belts. 1×400 t.p.h. capacity and 1×100 t.p.h capacity for grain and other bulk cargoes.

STEVEDORES: Team of stevedores who belong to "Port Workers' Trade Unions" (Sindicato de Obreros Portuarios).

MEDICAL: Master can send cables to consignee requiring this kind of service. There are a number of doctors and a hospital.

FRESH WATER: Available by pipe-line at berths.

FUEL: There are no supplies of fuel in either port.

GANGWAY/DECK WATCHMEN: Not necessary, usually this is done by crew.

OPENING/CLOSING HATCHES: Usually this is done by crew.

REPAIRS: No facilities.

REPATRIATION: Facilities for effecting crew changes exist. Repatriation can be done by train to Madrid and by plane from there.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Almeria".

POLICE/AMBULANCE/FIRE: Ambulance and fire services can be requested from Port Authority. If the police services are required call to "Caseta de Vigilancia" of the Civil Guard in either port.

SHORE LEAVE: Crew members are allowed ashore.

GENERAL: Hornillo port is used only for loading and discharge of minerals, and for this purpose a pier is provided with a railway. The nearest port of Aguilas, less than a mile distant on the West, is the commercial port, with a quay for loading/discharging and a crane of 10 tons capacity.

AUTHORITY: Ayudante de Marina, Capitan del Puerto, Ayudantia de Marina, Aguilas, Murcia, Spain. *Tel:* 968 41 10 74.

ALGECIRAS: 36.08 N. 05.26 W. (See Plan Book)

DOCUMENTS: *Clearance Inwards of Vessels:*
1 copy Maritime Health Declaration.
5 copies Crew List.
2 copies Cargo Manifests: 1 on entry, 1 on sailing.
2 copies Manifests in Transit: 1 on entry, 1 on sailing.

If vessel is in transit:
5 copies Transit Passenger List.
2 copies of Arrival Documents.
2 copies Lists of Passengers who have disembarked or embarked.

Tankers:
2 copies Cargo Manifest: entry, sailing or ballast.

PILOTAGE: Vessels entering port must call the Pilot by International Signal Code, sound, light or VHF.

The pilot boat is painted with a black "P" on both sides at its widest part. By day it will fly a blue flag with the letter "P" in white. At night, it will show the International Pilot Lights. The area where the Pilot boards is a circle 0.5 miles radius with its centre 1 mile East of the Western end of the breakwater extremity (red light).

ANCHORAGE: Vessels awaiting the Pilot can anchor to the North of Barranco Lighthouse in water 30 m. depth under indications given by the Pilot by VHF.

RESTRICTIONS: Vessels may enter by day or by night.

MAX. SIZE: Port of Algeciras – No restrictions as to length, max. draft 36 ft.

Tankers: Gibraltar Refinery: Max. length 315 m., max. draft 60 ft.

Monobuoy: Depth of water 60 m. Designed for vessels up to 500,000 d.w.t. Largest vessel accommodated to date: 423,000 d.w.t. with draft 22.9 m.

HEALTH: Free Pratique is obtained automatically when Authorities board on arrival and Maritime Declaration of Health is completed. In case of suspected disease or fever on board full details should be sent by radio to Sanidad Maritima, Algeciras, before arrival.

RADIO: Tarifa, Mijas, Aranjuez Radio and Cadiz Radio. Vessels bound for the Gibraltar Refinery must announce their arrival on VHF to the Port Captaincy using Channel 16 for calling and Channel 13 for communication.

Agent requires 72, 48 and 24 hours notice of arrival.

TUGS: 8 tugs up to 2,250 h.p., working in accordance with instructions from the Pilot. It is usual for vessels to provide tow-lines.

BERTHING:
Darsena Sur (South Dock):

Name	*Length* (m.)	*Depth* (m.)	*Usage*
Dique Norte	125	8 – 10	Bunkers
	590	10	Bunkers
	703	14	Bunkers
Muelle de la isla Verde	33	8 – 12	General cargo
	750	12	General cargo, containers and solid bulk cargoes.
	150	9	Ro/Ro
Muelle de la Galera (South)	75	4	Passengers
	305	6	Ferries
	264	10	Ferries
Muelle de la Galera (North)	180	8 – 10.5	General cargo and Ro/Ro
(East)	110	10.5	Frozen fish and bulk liquids
Muelle del Navio (East)	500	14	General cargo and containers
(South)	300	12	General cargo, containers
	225	10.5	General cargo
(West)	180	10.5	Ro/Ro

BULK HANDLING FACILITIES: *Cement:* Discharged to 2 storage silos at Muelle de la isla Verde. Rate 200 t.p.h.

Containers: 4×30 ton Paceco (Sealand) gantry cranes at Muelle de la isla Verde and 2×30 ton transtainers.

Scrap iron and metal products: Acerinox Quay: Length: 250 m. Depth 9.5 m. 2 jib cranes, capacity 25 tons each.

CRANES: (Also see "Bulk Handling Facilities").

Location	*Owner*	*No.*	*Capacity*
Muelle de la Galera (North)	Port Control	3	6
Muelle de la isla Verde	Port Control	1	30
Muelle de la isla Verde	Port Control	2	6
Muelle de la isla Verde	Private	1	3 – 8

Junta del Puerto (Port Control) also own mobile cranes, 1×3 – 6 ton, and 2×6 – 25 ton capacity.

STEVEDORES: Ordered by vessel's Agent on basis of Master's ETA.

MEDICAL: Doctors and hospital facilities available. International vaccination certificates only required if vessel is proceeding from an infected area.

TANKERS: Refineria Gibraltar (C.E.P.S.A.) – 5 berths for tankers up to 283 m. length, 2 of which can accept draft up to 65 ft. Loading/discharge lines are 12 in., 10 in., 8 in., 6 in. and 4 in. Refineria Gibraltar has 2 slop tanks each of 600 cu. m. capacity which can accept oily residues.

Berth	*Length* (m.)	*Depth* (m.)
South	700	19 – 20
North	380	17 – 19
North	300	17 – 19
North	115	6
South	115	6

There are 18 hydraulic and 10 manually operated loading arms. Max. pressure permitted 150 p.s.i.

Monobuoy: Operated by Compania Espanola de Petroleos S.A. (C.E.P.S.A.).

Location: Lat. 35° 10′ N. Long. 05° 24.8′ W.

Depth: Approx. 60 m.

Anchorage: Pilot will advise anchorage in accordance with weather conditions.

Prohibited Anchorage: Vessels are not to anchor within 0.3 miles of the monobuoy or within 150 m. of the underwater pipeline which runs in a N. 20° E. direction from the buoy to the Terminal onshore.

Pipelines: There are two underwater pipes, one 42 in. for crude oil and one 16 in. for bunkers.

Navigation Aid: Light: Fl. 3 every 8 seconds ("U") Range 5 miles. Height above sea level 6.0 m.

The buoy is also equipped with a radar reflector 7 m. above sea level, "Racon" letter "U" and fog signal manually operated with characteristic 3 blasts every 3 seconds ("U" in Morse code).

The floating hoses display white flashing lights 70 m. apart, 20 flashes every 60 seconds. Range 1 mile. Height above sea level 0.75 m.

Charts: Spanish: No. 3500 and 3503. British: B.A. No. 1448.

Communications:

Telegraphic Address: Spanoil, Algeciras.

Telex Address: 78007 Cepsa E.

Telegraphic Communications: Once the vessel has left the port of loading, Master must send a telegram via Aranjuez Radio, giving the following information:
(a) Name of vessel.
(b) ETA in GMT.
(c) Amount loaded per Bill of Lading.
(d) Specific gravity.
(e) Maximum draft.
(f) Capacity of tanks.
(g) Slops in the cargo.
(h) Whether it has a central bow installation, in which case give dimensions.
Where not, indicate type, characteristics and distance to the stem.

If vessel is to effect loading operations, once it has left its unloading port, Master must send the following telegram:
(a) Name of vessel.
(b) ETA in GMT.
(c) Quantity of cargo required.
(d) Amount of dirty ballast and deballasting time.

(e) Capacity of tanks.
(f) Amounts of slops and kind.
(g) Whether it has a central bow installation, in which case, give dimensions.

Where not, give type, characteristics and distance to the stem.

If the cargo receiving points are of a different type to 16 in. or 12 in. standard ASA 150 lb. this must be communicated both in the case of a vessel coming to load and one which will be discharging.

Within 72 hours of arrival, the Master must send a second telegram including the following information:

(a) Name of vessel and Master.
(b) ETA in GMT.
(c) Amount of fuel required.
(d) Additional requirements.

Within 48 and 24 hours prior to arrival, he must send further telegrams confirming his ETA.

Radiotelephonic Communications: A soon as the vessel is within VHF range, contact must be made with the Pilots or the Port Captaincy of the "Gibraltar" Refinery on Channel 13 to receive instructions with regard to berthing, this station listens out 24 hours a day.

Notice of Readiness: Will be accepted by the Monobuoy Berthing Master, when the vessel is in all respects ready to commence operations.

Notice of Readiness will be accepted under either of the following situations:

(a) When the Master receives the Monobuoy Berthing Master or,
(b) When the vessel has anchored in the anchorage area.

Port Closed: The Notice of Readiness will not be accepted when port closed.

Port closure periods are considered to be such when the weather conditions prevent vessels coming alongside and berthing. The decision to close the port is made by the Marine Authority.

Berthing sequence: Vessel will berth normally in strict order of arrival and any alteration will be duly communicated and sufficiently in advance.

Services and Facilities:

Pilotage: The Pilotage service is obligatory and the Corporation is available permanently. The waiting area for Pilots is between Lat. 36° 07.5′ and Lat. 36° 08.5′ N. and Long. 5° 24.0′ and Long. 5° 25.0′ W.

Mooring: The Monobuoy Berthing Master will board the vessel in the vicinity of the buoy together with a foreman, 2 deckmen and 2 divers and will assist the Pilot and crew respectively in the berthing operations. These services are provided free of charge and the personnel remain on board during the whole duration of operations during which food and accommodation of an adequate nature must be provided.

Tugs, launches, mooring equipment: Tugs and/or launches can assist the vessel in the operations of berthing and unberthing under the direct control and supervision of the Pilot and the Monobuoy Berthing Master. There are also launches for transporting crew members ashore.

Consignee: The Compania Espanola de Petroleos, S.A. at its "Gibraltar" Refinery, has a Consignee department. Vessels utilising this service must send their radiograms to the following address:

Compania Espanola de Petroleos, S.A.
"Refineria Gibraltar",
San Roque (Cadiz) – Spain
Telephones: 761700 – 764811 – 762600
Telex: 78007 Cepsa E
Telegrams: Spanoil (Algeciras)

Arrival Documents: The following documents are required:

6 copies of the Crew List
1 Negative Passenger List
3 Copies of Passenger List if any onboard
2 Copies of the Cargo Manifest for Algeciras
1 Copy of the Cargo Manifest for cargo in transit
2 Copies of the vessel's manifest list, including bunker, oil, tobacco, alcohol, medicine, belonging to the vessel.
2 Copies of a list of the crew's and passengers' personal effects.

The maximum quantity of tobacco and alcohol permitted for each crew member and passenger outside the manifest is 200 cigarettes and 1 litre bottle.

Free Pratique: It is not necessary to advise the Health Authorities prior to arrival unless there is any sickness on board.

Free Pratique is granted when the vessel is visited by the Health Official at the anchorage or when it is berthed at the Monobuoy and the following documents will be required:

1 Health Declaration
1 Crew List
1 Passenger List or
1 Negative Passenger List

The Health Official will inspect the Derat Certificate or Exemption. This Certificate can be drawn up or renewed at Algeciras if required.

Doctor: Medical Service, if required, can be obtained via the Agent and will be sent as quickly as possible.

Fuel Bunkers: Fuel Oil is supplied via the Monobuoy.

Apart from the advice by radio to the local Consignee, owners must contact Campsa-Madrid, advising them of the type and quantity of bunkers required on arrival.

(The suggestion above is based on the fact that in Spain all supplies are effected directly by Campsa through the authorised refineries).

Direct contact with Campsa by the Owner, and the transfer of funds for the supply, required by the local Agent prior to bunkering taking place.

Oils: A majority of international companies have stocks of oil in the country, requirements to be advised via their Agent sufficiently in advance in order to prepare documentation and delivery. This delivery will not be made whilst the vessel is moored at the Monobuoy carrying out loading or unloading operations since it has to be effected by barge or a tanker type tug. Only vessels operating with inert gas are excepted.

Water: This is supplied by a 200 ton vessel (the "Caracola"), and must be requested 48 hours in advance via the local Agent. There is no water line via the Monobuoy.

Victualling and Provisions: All kinds of stores obtainable in Algeciras and deck and machinery supplies can also be provided, requirements are to be communicated to the Agent or Consignee by radio.

All deck and machinery supplies will be supplied by launches or tugs prior to berthing or after unberthing at the Monobuoy.

Spares to be supplied from abroad for vessels at Algeciras must be sent to the airport of Malaga or the airport of Seville, addressed to the Master of the vessel in question and consigned to the local Agent at Algeciras.

Goods sent by TIR should be despatched to Malaga for Customs clearance.

Repairs: Only minor repairs can be carried out by local workshops. In the event of major repairs being required, there is at Cadiz, which is 120 kilometres away (approx.), all types of workshops and equipment. Any kind of repair which might leave the vessel without means of propulsion is absolutely prohibited whilst it is berthed at the Monobuoy.

Classification Societies: No classification societies have representatives at Algeciras.

The Agent will be advised to prepare the visit of Inspectors from Cadiz where all the Societies have a representative.

Telephone Numbers:
"Gibraltar" Refinery:

Monobuoy Berthing	761700 – 764811 – 762600 (Ext. 243)

Port Captain	761700 (Ext. 222)
Fire Fighting	764811 – 762600 (Ext. 111)
Ambulance	764811 – 762600 (Ext. 111)
Medical	

Algeciras:

Command Post	663648
Police	660400
Fire Fighting	662222
Ambulance	662054

Mooring:

Preparation for Mooring: Vessels must have in position a Pilot ladder and/or hoisting ladder or a gangway which is safe and firmly protected for immediate use and sufficiently long to reach the Monobuoy Berthing Master's launch.

For vessels with a freeboard of 40 ft. or more, the gangway must be extended, lowered and the platform must not be more than 10 ft. from sea level, a Pilot ladder shall also be provided for boarding the platform.

Vessels must provide a lee on the port side for the embarkation or disembarkation of Monobuoy Berthing Masters.

Vessels must have prepared on the forecastle and in the bow section the following:

(a) 2 mooring cables of polypropylene if possible.
(b) 2 veering cables 5 in. circumference, min. length 300 ft.

Vessels must have ready amidships and on the port side the following:

(a) Derrick equipped and ready to lift equipment from the launch.
(b) Mooring shackles.
(c) Wire and equipment for connecting hoses.

Note: If vessels moor with the aid of tugs, the Port Pilot will indicate the number of tugs to be used and the cables required.

Mooring at the Monobuoy: The Monobuoy is equipped with a cable 19 in. in diameter and 180 ft. long (55 m.) and with a breaking strain of 795.6 tons, its ends having collars and special cable protections with corresponding shackles. The shackle which connects it to the Monobuoy has a test strain of 688.8 tons and this is connected to a meter, which indicates at any time the strain to which the whole assembly is subjected. The shackle placed at the other end has a test strain of 510 tons and is connected to a length of chain of two different dimensions, its total length being 40 ft. (12 m.). The first 25 ft. (8 m.) are of 4 in. ending in two lengths of 702 mm. length and 440 mm. wide, and which are connected to the remaining 15 ft. (5 m.) of chain with a dimension of 2.75 in. which ends in two open links 478 mm. long and 293 mm. wide. The end of this length of chain is connected by means of a shackle S.W.L. 40 tons to a plaited cable of polypropylene 11 in. diameter and 250 ft. (76 m.) long, known as the approaching cable. The end of this cable is identified by means of a small 12 in. diameter buoy connected to it by means of a 0.5 in. guy and 5 ft. long. The weight of the length of chain mentioned above is supported by a cylindrical buoy 3,600 kgs. in weight.

When the vessel is close to the Monobuoy the crew must pay out the end of the veering cable through the central fairlead or nearest alternative lead available on the port side, whilst at the same time, various flexible cables 16 in. or 10 in. are made fast on board, according to the tonnage, to each bitt and also to the bow, and if there is no central fairlead available, onto the bitts on the port side. Once on board, the chain will be made fast to the cables by means of two 4 in. or 2.5 in. shackles according to the type of cable to be used. Where the vessel has a "Smit Bracket" or similar type of berthing fitment, the chain will be made fast to this. Vessels of less than 150,000 d.w.t. will be connected to the 2.75 in. chain and those exceeding this tonnage will be connected to the 4 in. chain.

Whilst the vessel is berthed at the Monobuoy a tug will remain alongside in the event of it being necessary to remove the vessel from the Monobuoy, in which case she must have available at the stern a very good towing line.

Turbine vessels which may have their propellor turning, must go astern so as not to come close to the buoy and cause damage.

Connection and Disconnection of Hoses:

General: The Monobuoy has two floating hoses 20 in. in diameter for discharge and loading which end in 3×16 in. diameter sections, each for direct connection having an approximate weight of 7 tons. The hoses will be hoisted and connected by the crew of the vessel in collaboration with the foreman and two deckmen from the Terminal. The Monobuoy Berthing Master will assist the vessel's officers in the connection operations. For supply of bunkers there is a 12 in. diameter hose available with a weight limit which is less than those mentioned above.

Derricks: All tankers operating at the Monobuoy must have a derrick with minimum capacity of 10 tons on the port side.

Flanges: The connecting flanges are 16 in. ASA for loading/unloading and 12 in. 150 ASA for bunkers. In the event of vessels not having flanges of these dimensions or reducers, this should be notified by radio 72 hours in advance.

Ballasting and Deballasting:

Anti-pollution precautions: The vessel's Master must take the necessary measures so that there is no loss of dirty ballast and is responsible at all times for damages and costs which may originate from this.

Scuppers: Before commencing operations the scuppers must be closed.

Sea Valves: During the operation of ballasting, the tightness of the sea valves and inlets must be checked, taking all precautions to obviate contamination of the sea.

Ballasting/Deballasting during the night: If these operations are carried out during the night, the area must be adequately lit.

Inability to receive dirty ballast: All vessels operating at the Monobuoy must arrive with clean ballast since there is no facility for reception of dirty ballast. In the event that they have residue arising from tank cleaning, this must be pumped to the slop tanks, which will be measured and which will be loaded by the "load on top" system.

Loading and Discharging:

Communications during loading/discharging: All communications relative to loading and discharging of vessels will be made via the Monobuoy Berthing Master who will remain in contact constantly with the Refinery Blending department via portable VHF on Channel 9. In the event of damage to the portable VHF, contact will be continued via the vessel's equipment.

Damage during communication: In the event of damage to all communications with the Blending Department, the loading and discharging operations will cease immediately.

Average of loading and discharge: The installation can operate at an average (max.) of 12,000 cu.m. per hour and at a working pressure of 12 kg/sq.cm., at the vessel's manifold.

The supply of bunkers can be effected at a maximum average of 2,000 t.p.h. with a working pressure equal to 12 kg./sq.cm.

Anti-pollution precautions: Contamination of the sea by hydrocarbons is absolutely prohibited; this prohibition includes pumping. The non-fulfilment of this regulation can give rise to serious penalties and for which reason all vigilance must be applied to stop leaks which would give rise to the immediate cessation of all operations, the Master/Owner being entirely responsible for costs or damages which might arise therefrom. Trays must be provided to catch any possible leaks during connection or disconnection of hoses to the manifold.

Valve closure due to excessive loading: No valve will be closed which may stop or reduce the movement of the product, whilst the shore pumps are operating unless prior advice has been given to and the approval obtained from the Monobuoy Berthing Master. The practice of closing the valves at the vessel's manifold must be obviated.

If a decrease in pumping rate is required the shore terminal will lower the pumping rate to the required level if requested.

The Master will be responsible for any damage which may arise from the sudden stoppage in flow due to faults on board the vessel. It cannot be overemphasised for this to occur it is extremely dangerous and may give rise to extremely extensive damage to the installation.

Sample intakes and empties: All vessels which have available inert gas installations in service must arrive with all tanks depressurised for the purpose of taking samples, emptying water, etc. Once this operation has been effected, tanks can be pressurised once again. Once discharge has been terminated, the tanks will be depressurised in order that they may be inspected.

FRESH WATER: Available from all berths in Algeciras rate 30 t.p.h. – 200 t.p.h. depending or location and at Refineria Gibraltar. Can also be supplied by barge at the rate of 15 t.p.h.

FUEL: Fuel oil and Gas oil supplied by C.A.M.P.S.A. at Dique Norte (North Breakwater) and Muelle de la isla Verde.

Product	*Location*	*No. of Points*	*T.p.h. per Point*	*T.p.h. of Quay*
Heavy fuel No. 1	Dique Norte	4	200	200
Gas Oil "A"	Dique Norte	4	250	250
"B"	Dique Norte	4	250	250
"B"	Dique Norte	1	75	75
"B"	Dique Norte	1	20	20
"B"	Dique Norte	1	30	30
Heavy Fuel No. 1	Muelle de la isla Verde	3	150	150
Gas Oil "A"	Muelle de la isla Verde	3	200	200
Gas Oil "B"	Muelle de la isla Verde	3	200	200

Bunkers can also be delivered by road tanker or barge.

GANGWAY/DECK WATCHMEN: Not available from shore.

OPENING/CLOSING HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: Max. quantity of tobacco permitted in ship's stores is 3 kilos per crew member and 2 kilos per passenger. The quantity that may be held out of bond is 40 grammes tobacco per person per day. Wine/Spirits. 1 decilitre per person per day may be held out of bond.

CONSULS:

Denmark
El Salvador
France
Great Britain
Italy
Morocco
Netherlands
Norway
Panama
Sweden

REPAIRS: Small repairs afloat can be effected. No dry docks.

AIRPORT: Nearest is at Malaga, 120 km. from Algeciras.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day, 6th January, 19th March, Maundy Thursday, Good Friday, Easter Saturday, 1st May, Corpus Christi, 29th June, 25th July, 15th August, 12th October, 1st November, 8th December, 25th December.

POLICE/FIRE/AMBULANCE: *Algeciras:* Police, tel: 660400; Fire, tel: 662222, Ambulance, tel: 662054. *Refineria Gibraltar:* Fire, tel: 761700, 764811, 762600 (ext. 222); Ambulance, tel: 761700; 764811, 762600 (Ext. 111).

SHORE LEAVE: Crew members are permitted to go ashore subject to police control.

AUTHORITY: Junta del Puerto de Algeciras-La Linea, Apartado No. 7, Paseo de la Conferencia S/N, Algeciras (Cadiz), Spain. *Tel:* 651011 – 651050 – 651100 - 651150 – 651390. *Telex:* 78036 JPAG E. *Contact:* Joaquin Lefler Pino, Port Director.

ALICANTE: 38.23 N. 00.28 W. (See Plan Book)

PORT LIMITS: The line drawn from Cabo de las Huertas and Cabo de Santa Pola.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
10 Manifests for Cargo, including cargo in transit as well as cargo for Alicante. Tobacco and Cargo Manifests to be visaed by Spanish Consulate in port of origin.
All vessels' Certificates.

PILOTAGE: The Pilotage service is permanent, and should be requested by means of the International Signals Code. It has a VHF radio station and can be called up on Channel 16. The Pilots have a motor launch painted white with the letter "P" on both sides, and flies a black flag with letter "P" in white, whilst at night it shows lights in accordance with the International Regulations. The launch meets vessels 1 mile from the green breakwater light, but in bad weather closer to that light.

ANCHORAGE: Vessels waiting to enter port may anchor at a distance of 0.5 miles off the breakwater in depths of 16 m.

MAX. SIZE: Vessels of up to 225 m. length and 38 ft. draft (60,000 – 80,000 d.w.t.) can be berthed alongside. For tankers, max. draft 35.20 ft. (10.73 m.) 36,000 d.w.t. at Muelle 11.

Discharge of butane is carried out at buoys located to the South of the port and with a limitation of maximum length of 140 m. between perpendiculars and 28 ft. draft.

HEALTH: Regulations as dictated by the International Regulations for Foreign Health are enforced.

RADIO: Radio-telephone communication through Radio La Costera, Alicante, medium frequency range approx. 220 miles and VHF approx. 40 miles.

TUGS: Only 1 tug available to assist berthing of 1,295 h.p. Normally ship's lines used for connection with tug. Tug meets vessel at Port entrance.

BERTHING: The breakwater extends in a S.W. direction and vessels berth within the breakwater. Max. depth being available at the outer end of the breakwater, decreasing in the N.E. direction.

Muelle 14: Extends along the length of the N.E./S.W. breakwater and depths vary alongside the berth from 12.5 m. at the S.W. end to 8 m. at the N.E. end. Length of quay – 970 m.
Muelle 12: Depth alongside 8.0 m. Length – 296 m.
Muelle 10: Depths alongside the berth vary from 6 m. to 8.75 m. Length – 203 m.
Muelle 9: Depth alongside berth 8.75 m. Length – 103 m.
Muelle 7: Depth alongside berth 8.75 m. Length – 240 m.
Muelle 11: A combined tanker, dry cargo and container berth. Length – 360 m.

CRANES: All quays have cranes of 3 – 6 tons, and on Quay No. 11 there is a 30 ton crane. Loading and discharging operations are always carried out by shore personnel, irrespective of the means used.

SPECIAL CARGO HANDLING FACILITIES: There are 3 berths located at the head of berths 10/12 and 12/14 for Ro/Ro traffic.

STEVEDORES: It is necessary to advise Agents 48 hours in advance of the arrival of the vessel.

The main goods shipped at this port are: canned goods, aluminium ore, asphalt, ground pepper, bulk cement, etc. Average speeds of loading and discharge are: bulk cargo 50 t.p.h.; general cargo 9 t.p.h.; bagged cargo 40 t.p.h.

MEDICAL: Many hospitals and medical services available. Advise Agent prior to arrival if medical assistance required.

TANKERS: Tankers discharge takes place at Muelle 11 (see "Berthing"). Product handled: Fuel oil, (2×12 in.) and Gas oil (2×10 in.)

DENSITY: Average 1030.

FRESH WATER: Available from hydrants at the quays at the rate of 10 t.p.h., per hydrant.

FUEL: Supplied by Campsa. Vessels requiring fuel are requested to berth alongside Muelle 11 and will incur delays if berth is already occupied. Maximum advance notice to Agent is essential.

CONSULS: The following countries have local representation: F.D.R., Belgium, Bolivia, Brazil, Chile, Denmark, Colombia, Finland, France, Gt. Britain, Greece, Guatemala, Haiti, Liberia, Norway, Netherlands, Panama, Paraguay, Peru, Dominican Republic, Sweden.

SURVEYORS: Comisario Maritimo Espanol (Spanish Maritime Commissary) and Lloyd's.

REPATRIATION: Possible, without difficulty.

GANGWAY/DECK WATCHMEN: Agents normally provide watchmen.

OPENING/CLOSING HATCHES: Normally opened by crew and closed by stevedores using cranes.
CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per person.
CARGO GEAR: All berths have cranes, varying from about 6 tons capacity. There is 1 heavy lift crane capacity 30 tons, and one with capacity 10 tons.
REPAIRS: Only minor repairs carried out. There is a dry dock for small craft.
AIRPORT: About 8 km. distance from Alicante, and serviced by international flights.
IDENTIFICATION CARDS: Additional identification cards only required by crew members of communist-flag ships.
TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.
HOLIDAYS: Normally no work is carried out on the following holidays: New Year, 1st January; Epiphany, 6th January; La Pelegrina, 26th April; Maundy Thursday; Good Friday; Labour Day, 1st May; Festival of San Pedro, 29th June; Corpus Christi; Santiago Apostol, 25th July; Assumption; Festival of the Spanish Speaking World, 12th October; All Saints', 1st November; Immaculate Conception, 8th December and Christmas Day, 25th December.
POLICE/AMBULANCE/FIRE: Police, Tel: 091. Ambulance, Tel: 20.72.01. Fire Brigade, Tel: 22.90.80.
TELEPHONES: Can be installed on board; the cost of installation currently is about 12,000 pesetas.

SHIPMASTER'S REPORT: October 1983.
Documents: Unnecessary to have any papers visaed in previous port. Normal IMO papers acceptable but preferable to have separate Bonded Stores List.
Pilotage: In bad weather, Master will enter harbour without Pilot. Max. speed of pilot boat 7 knots.
On sailing, call Pilot 30 minutes before required by VHF Channels 16 or 12.
Health: No radio health message required.
Discharging: Discharging rate for boxes of pineapples using shore cranes was 25 t.p.h. per gang.
Fresh Water: Available at approx 15 t.p.h.
Watchmen: No watchman required.
Identification Cards: Agent provides separate I.D. cards for non-E.E.C. country crew members going ashore.

AUTHORITY: Comandancia Militar de Marina, Alicante.
Contact: Manuel Gonzalez Sicilla, Commandante.

ALMERIA: 36.52 N. 02.30 W. (See Plan Book)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists (embarking, disembarking and in transit).
2 Cargo manifests of goods destined to Almeria, as well as other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Note: Tobacco. In case vessel carries more than 6 kilos of tobacco per man, excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority of former port of clearance. Otherwise, the vessel would be fined.
PILOTAGE: Compulsory, service is permanent. Pilots board vessels by motor-boat in roads, near entrance formed by two breakwaters. This entrance is 287 m. wide. Pilot boats are painted white and letter "P" is painted in black on each bow. Also boats have a blue flag hoisted on mast, with letter "P" in white on both sides of flag. At night, boats have white light, under this light is a red light. When weather is bad vessels approach as close as possible to entrance so that Pilot can easily board the vessel.
ANCHORAGE: When harbour is congested, vessel can anchor at West Mole while waiting for berth.
MAX. SIZE: Only limitation is draft. Max. draft 38 ft. in the inner port and 43 ft. in the outer port.
HEALTH: Pratique is obtained immediately after berthing, when Health Officer boards vessel, In case of suspected disease or fever on board Master must send a radio message to Agents, in order that they advise the Health Officer. Following documents are required by Health Officer upon berthing: Maritime Declaration of Health, Derat Certificate, 1 Crew List.
RADIO: Nearest important radio stations are Cadiz Radio and Palos Radio.
VHF: Call Almeria Radio on Channel 16 for connection with pilot station.
TUGS: 2 tugs available and compulsory in accordance with LOA, DWT and weather conditions.
BERTHING: Prior to ship's arrival and in accordance with Master's ETA Agent attends Port Authorities to procure a proper available berth. Commercial quays have a length of 475 m. with double sheds and 25 ft. water depth, 350 m. with single shed with max. depth 23 ft and 365 m. with max. depth 24 ft. – 29 ft. for tankers and Ro-Ro traffic. There is 363 m. of berthing space with 32 ft. depth and 250 m. with 39 ft. depth with open storage area for solid bulk cargoes.
There is a Ro-Ro ramp, max. load 20 tons per axle.
Iron Ore Berth: Max. size 80,000 d.w.t. Max. draft 13.9 m. 1 ship loader, rate 2,000 t.p.h.
STEVEDORES: It is necessary that Master sends ETA so that Agent can inform Receiver's stevedores accordingly and arrange for proper reception of cargo and berth. Timetable of shifts available at the port; Daytime, normal working hours, from 0800 – 1200 hrs. and 1400 – 1800 hrs. (1 shift), 0800 – 1400 hrs. (1 intensive shift), 1400 – 2000 hrs. (1 intensive shift). Night time, from 1800 to 2400 hrs.; Sundays and holidays, from 0900 to 1200 and 1400 to 1800 hrs.
MEDICAL: Medical facilities are available; only it would be appreciated for Master to send a radio message if a crew member is in need of urgent medical attention.
FRESH WATER: Always available. Deliveries from quay available at all berths, supplying about 30 t.p.h.
FUEL: Ordinary fuel oil and gas oil is available at local refinery of "Campsa". It is advisable that Shipowners stem bunkers through their own Contractors, with an ETA of 48 hours, so that the order can be received in time.
FIRE PRECAUTIONS: Tankers perform their operations at the berth of "Campsa" at East Pier, which has the necessary fire precautions. No special precautions at other piers.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: This work normally carried out by crew.
CERTIFICATES: Vessel should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Derat Certificates are required by Authorities.
CUSTOMS ALLOWANCES: The quantity allowed per each crew member is 3 kilos tobacco. (See "Documents".) Wine and/or Spirits: Only one bottle for each crew member.
CARGO GEAR: Muelle de Levante: 1 crane capacity 15/25 tons.
Muelle de Ribera: 5 cranes capacity 3 tons.
Muelle de Poniente: 6 cranes capacity 3/6 tons, 2 cranes capacity 6 tons and 2 cranes capacity 12 tons.
IDENTIFICATION CARDS: Not required.
CONSULS:

Denmark, Alvarez de Castro 22	Tel: 212245
Sweden, Alvarez de Castro 22	„ 212245
Belgium, Paseo Generalismo 151	„ 214455
Netherlands, Paseo Generalismo 151	„ 214455
Finland, Aguilar Martell 7	„ 215954
Italy, Paseo Generalismo 18	„ 215790
France, Avenida Vivar Tellez	„ 220050

REPAIRS: All types deck and engine repairs available.
REPATRIATION: Good facilities available.
AIRPORT: Airport is located about 6 km. from town, well served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; 19th March; (St. Joseph) Good Thursday afternoon; Maundy Thursday; Good Friday; 1st May (Labour Day); Corpus Christi; 25th July (Santiago), 15th August; Assumption Day; Last Saturday in August (Our Lady of the Sea – Local Holiday); 12th October; 8th December; 25th December and 26th December (second Christmas Day).
POLICE/AMBULANCE/FIRE: Police 214081; Ambulance 215780; Fire 220044.

SHIPMASTER'S REPORT: October 1983.
Pilotage: Pilot boat max. speed 6 knots. In bad weather, vessel should enter breakwater at slow speed and embark Pilot under lee of breakwater.
Health: No radio health message required.
Loading Rate: Vegetables per gang hour 20 – 25 tons using vessel's or shore cranes.
Watchmen: Not necessary.

AUTHORITY: Puerto de Almeria, Avda. Del Generalissimo 159, Almeria, Spain. *Contact:* Manuel Gimenez-Cuenca Nieto, El Director Del Puerto.

AVILES: 43.35 N. 05.56 W. (See Plan Book)

DOCUMENTS:
4 Crew Lists.
2 copies Crew Personal Effects Lists, signed by each crew member.
2 Passenger Lists or a negative.
3 sets of Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Provisions and Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.
Transit Tobacco Manifest: The Spanish Customs Regulations provide for 6 kilos of tobacco per crew member to be on board as usual provisions. If the total quantity of tobacco (including cigarettes, cigars, pipe and any other kind of tobacco) does not exceed said average of 6 kilos per crew member, such quantity may be declared as "provisions" on the usual Provisions List, and no further documentation is necessary. If the total quantity on board exceeds said average, the excessive quantity must be shown on a special transit manifest. Usual manifest forms may be employed, describing the tobacco in Spanish as "Tabaco en transito". The essential point is that this transit manifest is visaed by the Spanish Consulate, which must insert a full and complete visa. A simple consular stamp is not sufficient. If there is no Spanish Consulate at the last port of call or nearby, the tobacco manifest may be visaed by the local Customs Authority or by another consulate, but the visa is still essential.

PILOTAGE: Compulsory for vessels over 50 g.r.t. Telegrams to be sent to Corporacion de Practicos, San Juan de Nieva – Aviles Tel. 563013 or 566856. Vessel exceeding LOA 130 m. require 2 Pilots.

Send ETA 2 hours in advance, confirming by VHF when vessel some 10 miles off. Pilots listen continuously on Channels 16 and 12. Pilot craft are painted black with a white "P" on each bow. They are equipped with VHF and listen out on Channel 12, having also available Channels 16, 14, 9 and 6. When coming alongside a vessel they hoist the "H" flag. Normally they remain within the port, going out to vessels up to 1 mile from La Forcada.

ANCHORAGE: Outside the port vessels can use the sector between North and W.N.W. of La Forcada and at a distance of 1 mile from it, in 15 m. to 25 m. depth and sandy bottom. There are no sheltered anchorages. When awaiting a berth, vessels must remain at anchorage with one or two anchors.

RESTRICTIONS: Vessels LOA 180 m. – 210 m. enter and sail during daylight only.

Entrance Channel: Breadth: 153 m. Length: 920 m. up to San Juan de Nieva Basin. Depth at LW: 10 m. to 8.5 m. in the axis. Nature of bottom: Sand, hard clay and rock. Exposure: N.W. Breadth: 160 m. Depth at LW: 10 m. Maximum tidal flow: 2.25 knots.

MAX. SIZE: Max. LOA 210 m. In exceptional cases Port Authority may allow vessels up to 220 m. LOA to berth.

Keel Clearance:

LOA up to 130 m. – Keel clearance 2 ft.
LOA 130 m. – 150 m. – Keel clearance 3 ft.
LOA over 150 m. – Keel clearance 4 ft.

The admitted draft is calculated by deducting the number of feet required under the keel from the total depth of water which varies in accordance with tidal conditions. Tide tables are available upon request. In addition, the draft so calculated may still vary (by ± 1 ft.) under special atmospherical conditions. However, for a rough guidance, the following average figures, from which the respective number of feet under the keel must be deducted, may be sufficient:

	Normal	*Equinoctial*
Neap tides	*Spring tide*	*Spring tide*
8.80 m.	9.70 m.	10.60 m.
(23 ft. 10 in.)	(31 ft. 10 in.)	(34 ft. 9 in.)

Alongside the quays (equinoctial LW) draft varies between 11 ft. and 30 ft.

HEALTH: Yellow flag to be hoisted, and once Health Authority has boarded, and the Marine Health Certificate completed, provided this is negative, clearance is automatic.

Health documents required: Marine Health Declaration if coming from another country, but if from another Spanish port, the Health Clearance Document from that port suffices.

Derat, or Exemption Certificate required.

If coming from country where epidemic is in force, certificates of vaccination for each crew member.

If sickness on board, patient will be examined immediately and decision taken as to clearance or isolation.

RADIO: *Coastal Station:* Cabo Penas Radio: Lat. 43° 39′ 22″ N., Long. 5° 50′ 53″ W.

Operational Procedures:

1. Safety, Assistance, and Urgency: All medium wave coastal stations listen out permanently on 2182 kHz. It is of maximum interest for the safety of human life at sea for all vessels in Spanish coastal waters at reasonable distances from the coast to maintain a listening watch for as much time as possible on this frequency.

2. Traffic from the Coastal Stations: Having firstly announced the fact on 2182 kHz, Cabo Penas Radio transmits at 1133 hrs. Call-up lists firstly of foreign vessels and then of national vessels. Weather forecasts are transmitted at 1103 hrs. and 1733 hrs.

3. Operating frequency: The station's main frequency is 1757.5 kHz and the subsidiary is 2649 kHz. In calling vessels on these frequencies, the respective vessel reply frequencies are 2013 kHz. and 3231 kHz.

Where vessels call-up Cabo Penas, they use respectively 2013 kHz and 3231 kHz, the coastal station replying on 1757.5 kHz and 2649 kHz respectively. The frequency of 2182 kHz may be used exceptionally by vessels to call up the coastal station when that frequency is not working emergency traffic.

Vessels which do not have the above frequencies, should call up on 2182 kHz, the coastal station inviting them to pass to one of the frequencies assigned to such ships.

Radio telephone calls and messages: Once radio contact has been established with the coastal station, a request is made as follows:–

Radio telephone calls:

(a) name and call sign of the vessel making the request.
(b) Identity number assigned by C.T.N.E. or in the absence of this, the name of the shipowner or responsible entity for paying the ship's accounts, and the CIAC code in the case of a foreign vessel.
(c) Person requesting the call.
(d) Telephone number of person or entity to be called.
(e) Locality, province or country, if the call is international.

At the end of the call, the coastal station will indicate the length and cost of the call, if requested.

Messages: Only vessels belonging to the Maritime Message Service can use this service. The vessel sends its message to the coastal station, firstly indicating the name of its owner and telephone number.

Radio Medical Service: Crew members at sea can obtain help and advice via the coastal station who will connect the ship to the Radio Medical Centre. There is no charge for this service.

VHF: There is no transmission of weather forecasts, although a vessel may obtain such information on VHF by requesting connection to the Regional Meteorological Centre. Such connections have to be paid for.

Assistance, Urgency and Safety: All VHF coastal stations listen out permanently on Channel 16.

Cabo Penas Radio transmits call-up lists at 1103, 1303, 1703, 1903 and 2030 hrs. It transmits general Notices to Mariners at 0903 hrs. and 1603 hrs.

Its main VHF frequency is Channel 26, but also operates on Channels 24, 25 and 27.

The following table shows the frequencies in MHz for traffic between coastal station and vessel.

Channel	*Coastal Stn.*	*Vessel*	
26	161.90	157.30	Duplex working for public correspondence
24	161.80	157.20	
27	161.95	157.35	
25	161.85	157.25	

Radio telephone calls: These can be made in the same way as the M/F transmission.

Operating Range: Cabo Penas Radio operates between Cabo (Cape) Lastres and Cabo (Cape) Vidio.

TUGS: "Aranon" 600 h.p.; "Adelantado" 1,200 h.p.; "Nieva" 1,200 h.p.; "Raices", 1,800 h.p.

Requirements: LOA 100 – 130 m. – 1 tug.
LOA 130 – 150 m. – 2 tugs (1,000 h.p.)
LOA 150 – 210 m. – 2 tugs (3,000 h.p.)

BERTHING: 10 berths available.

Berth	*Length (m)*	*Depth (m)*	*Use*
Raices	822.84	8.0	Bulk and General
S. San Juan	300.00	6.0	" " "
W. San Juan	277.70	4.0	" " "
S.W. San Juan	90.25	2.0	" " "
New Fish Quay	303.00	5.0	Fish
Aviles Fish Quay	515.94	2.0 – 1.0	Fish
E. Ensidesa	300.00	9.0	Fuel, General, Bulk
E. and S. Ensidesa	715.00	7.0	General, Bulk
S. Ensidesa	107.50	5.0	General
Endasa	132.84	7.0	Bulk cargo

CRANES:

Ensidesa:

4×15 tons lifting capacity
9×12 tons lifting capacity
2× 6 tons lifting capacity
1×150 tons lifting capacity
2 gantry cranes×12 tons lifting capacity

Endasa:

2×10 tons lifting capacity

Commercial Berths:

5 cranes× 6 tons lifting capacity
2 cranes×45 tons lifting capacity
2 cranes×35 tons lifting capacity
2 cranes×12 tons lifting capacity
4 cranes× 5 tons lifting capacity
1 crane × 4 tons lifting capacity

STEVEDORES: Working hours: At "Ensidesa" berth 24 hours a day, 7 days a week, Sundays and holidays included.

All other Quays: Monday/Friday. 0800–1200 hrs., 1300/1700 hrs.

Overtime: 1700/2300 hrs.

Saturdays: 0800/1200 hrs. No overtime.

Sundays and Holidays: No work done.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc., should be reported by the Master to the Ship's Agent in order to make the necessary arrangements. All services available.

TANKERS: Oil/Gas Berth: Equipped with facilities to load/unload oil products and gas through pipe-lines.

Liquified Gas Facilities:

Name	"Muelle de Ensidesa" – Zona "B" and "A".
Type of Berth	Concrete berth with rubber fenders.
Mooring	Normal mooring system giving lines to bollards alongside.
Length	300 m.
Depth	29 ft. LWOST alongside at berth, always afloat.
Type of handling installation	Shore hose connections of 6 in. for liquid and vapour available. No vessels' hoses required.
Largest LGC entered/ discharged (part cargo)	34,230/20,406 g.r.t./n.r.t., 53,400 cu.m. cargo capacity. Length overall: 216.10 m. Max. draft 36 ft. 2 in. (April 1982).
Shore Storage Particulars	
Operator	Empresa Nacional de Fertilizantes, S.A. ("Enfersa").
Other Users	Some Spanish companies occasionally operating by previous agreement with "Enfersa".
Products handled	Ammonia.
Minimum temperature	Minus 33° C.
Cargo pressure	3 kg – 4 kg.
Receiving temperatures	Ambient and fully refrigerated down to minus 33° C.
Maximum discharging rate	500 t.p.h. at minus 33° C.
Actual discharging rate	350 t.p.h. – 400 t.p.h.
Cargo operations permitted by night	Yes.
Round the clock discharging	Yes (SHinc).
Vapour return line available	Yes.
Distance from berth to storage	2.8 km.
Hoses of 6 in. available	Yes
Diameter of shore lines	12 in. Liquid and 8 in. Vapour.
Maximum back pressure permitted	3 kg – 4 kg.

Tanks	*Temperature*	*Capacity*	*Cu.m.*
2 Spherical	Ambient	2,000 tons	2,500
1 Cylindrical	Fully refrigerated	10,000 tons	15,000

Cargo handling equipment at Marine Terminal 1 shore line.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed on the stay of ship in port. 1 bottle of spirit per man. Also see "Documents".

REPAIRS: There is one shipyard at Aviles for small coasters and fishing trawlers. All types of repairs will be readily attended by specialised workshops. Advanced notification is suggested. Electrical power is supplied ex-wharf. Diver available.

DRY DOCKS: 1 dock at Las Canteres, owned by "Empresa Nacional Siderurgica", length 50 m., width 9.50 m. Capacity 600 tons.

4 docks at El Monumento owned by Astilleros Ojeda y Aniceto, length, 2 of 100 m. and 2 of 85 m. width 3.10 m. Capacity 500 tons.

FRESH WATER: Available ex-wharf or barge. From the wharf connections, it is supplied at 25 t.p.h. and from barge at those berths where there is no supply facility.

FUEL: Fuel and gas oil are supplied to ships by barge. There is a small tanker doing the service. Stem for bunkers can be arranged through usual contractors.

CONSULS: The following countries have consular representation in the nearby port of Gijon: Brazil, Colombia, Costa Rica, Dominican Republic, Finland, France, Italy, Netherlands, Norway, Panama, Peru, Portugal and Sweden.

SURVEYORS: Lloyd's Register, A.B.S., B.V. and G.L.

AIRPORT: The regional airport, named Asturias (in some instances it is still known as Oviedo) is 12 km. away from the port. There are daily flights linking Aviles with Madrid, Bilbao, Barcelona, Malaga, Tenerife and Santiago. Bus service available to and from the airport.

TIME: GMT plus 1 hour, except during Summer when GMT plus 2 hours.

HOLIDAYS: 1st January, 6th January, 19th March, 1st May, 21st June, 16th July (Mercantile Marine), 25th July, 28th August, 8th September, 12th October, 1st November, 8th and 25th December, Maundy Thursday, Good Friday, Easter Monday, Corpus Christi, Ascension Day.

POLICE/AMBULANCE/FIRE: Police 544311 and 544511. Ambulance 540080, 540511, 540733, 540844. Fire 546114, 544127.

AUTHORITY: Ayudantia Militar de Marina, Avenida Conde Guadalhorce, Aviles, Spain. *Contact:* Carlos Gago Lopez, Comandant.
Junta del Puerto y Ria de Aviles, Calle de Muelle 8, Aviles.

AGENT: Alvargonzalez, S.A., Guadalhorce 1, Aviles. Tel: 562075/6. Telex: 87492.

BARCELONA: 41.20 N. 02.10 E. (See Plan Book)

DOCUMENTS:

(1) Manifest of Barcelona cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine. It is important that the Master has copies as Manifests mailed by Agents in loading ports sometimes arrive too late or not at all.
(2) Manifest of Transit Cargo: 2 sets (same recommendations as above).
(3) 3 Crew Lists.
(4) 1 Negative or Passengers List.
(5) 2 sets of Bills of Lading of the Barcelona cargo.
(6) 2 Provisions Lists.

Of items (3), (4) and (6) above several copies will be required for distribution among various authorities, therefore it would be well for the Master to have at least 3 copies of each ready at hand on arrival. Tobacco allowed per crew member is 6 kg.

All tobacco in excess of the 6 kg. allowed by the Spanish authorities should be manifested and signed by the Spanish Consul at the last port of call before Spain. If there is no Spanish Consul at the last port before calling at Spain, then the consulate of a country friendly to Spain or the Port Authorities could carry out the same formality. The same procedure must be followed when the vessel loads a cargo of tobacco for discharge in Spanish ports, or when the tobacco cargo is loaded in transit.

If any item of cargo manifested for Barcelona should be discharged in error at any other port in the ship's itinerary before arrival at Spain, there would be a fine imposed here for shortage of goods if no advice of such shortage is given before arrival.

PILOTAGE: Pilot boats painted black, with letter "P" in white on each bow. Telegraphic address: "Pilot Station-Barcelona". Required notice of ETA 24 hours before arrival. Signals to be made by vessels requiring Pilot: the letter "G" in sound and/or light.

Pilot boats have no radar and are reluctant to venture more than just outside port entrance in poor visibility. Pilots give priority to vessels nearest port entrance. Pilotage is compulsory and the service is permanent. In case of port congestion vessels remain at anchor at the roads.

ANCHORAGES: In the Outer port for small vessels only, with depths over 50 ft. Also at the roads 0.5 miles away from breakwaters where vessels usually remain at anchor.

APPROACHES: *Entrance:* Width 600 m., depth 16 m. Nature of bottom is mud and sand.

MAX. SIZE: Only limitation is draft: max. 45 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must send a message to Agent, to advise Health Office. Following documents are required by Health Officer upon berthing; Maritime Declaration of Health, Derat Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD.

VHF: Barcelona Radio can be contacted on VHF Channel 16, 3 hours before arrival and Channel 26 for long distance calls.

TUGS: Tugs join vessel at entrance of port. Usually use ship's lines; if tug's lines used usual charge 10% of official tariff. It is normal for 2 tugs to be used for vessels from 5,000 g.r.t. to 15,000 g.r.t.

10 tugs available, from 800 h.p. to 1,800 h.p.

BERTHING: Commercial quay, length 12,100 m. with depths 6.0 m. – 14.0 m., depending on location. Pier Barcelona, berths for transoceanic maritime passenger traffic, depths 26 ft. and 31 ft. Shore fenders keep vessel about 1 m. off quay.

CARGO HANDLING FACILITIES: Liquid methane reception and gasification plant with a storage capacity for 240,000 cu.m. of liquid gas. Potash reception and loading plant with mechanical loading bridges which can load up to 450 t.p.h. of this product.

General cargo handling is fully mechanised and, apart from the pier cranes, there are fork-lift trucks, truck cranes and a palletisation process.

17 Ro-Ro ramps available.

CONTAINER HANDLING FACILITIES: 2 container terminals, depth 14 m., total area 295,000 sq.m., 4 container cranes of 40 tonnes capacity.

Section A (Maritima Layetana, S.A.): 22 straddle carriers, 17 fork lifts with capacity 2.5 tonnes – 11.5 tonnes.

Section B (Tersaco, S.A.): 3 transtainers, 8 tractors, 16 trailers, 4 fork lifts of 35 tonnes capacity, 12 fork lifts 2.5 tonnes – 5 tonnes capacity.

BULK HANDLING FACILITIES:

Bulk Grain and Seed Discharge Terminal: Capacity 145,000 tonnes. Performance in 24 working hours: 15,000/17,000 tonnes.

The terminal for discharge, silage and delivery of cereals and seeds is located on Muelle Contradique (East Side). It comprises 3 silos with capacities of 20,000, 45,000 and 80,000 tonnes respectively. The terminal itself has a railway and truck-loading bay which may be used for ensiling or delivery.

The terminal has pneumatic facilities on the wharfside for discharging vessels and which may reach optimum rates of 1,200 tonnes/hr.

For delivery, which is gravity fed, there are two 60 tonne weighbridges.

Cereals, especially corn, and soya bean are discharged at this terminal. The latter is taken by belt conveyor to a factory located in Anden Costa for conversion to oil and meal.

These products are shipped in large bulk carriers of up to 280 m. length. The maximum draft at the present time is 13.10 m.

In addition there is another terminal located on the Alvarez de la Campa wharf specialising in the discharge, conversion and processing of soya bean.

It has a 250 m. long wharf with 11.20 m. depth and is equipped with modern pneumatic facilities for discharging, and like the Anden Costa factory described above, meal and oil are also loaded at this terminal.

The terminal's storage capacity is 42,000 tonnes of soya bean and 2,000 tonnes of oil, the discharge rate being 500 tonnes/hr.

Soya Bean Discharge Terminals: 2 terminals. Grinding plants with a capacity for 1 million tonnes. Meal and crude oil production.

Bulk Clinker and Cement Loading Terminal: Located at Muelle Contradique (South Side). Capacity for 50,000 tons clinker and 20,000 tonnes cement.

The terminal is equipped with a 22 m. hoistable and rotary arm gantry crane for loading bulk carriers.

Vessels up to 40,000 tonnes gross and having a draft of up to 12 m. may be loaded here without delays, due to the large storage capacity available at this terminal.

The suitability of this terminal is highlighted by the loading rates achieved: 1,000 tonnes/hr. for cement and 1,500 tonnes/hr. for clinker.

Apart from this terminal, there is another located on Muelle Alvarez de la Campa. Both are leased out under concession. The latter terminal has a storage capacity of 8,800 tonnes. This terminal receives cement from a works in the province of Tarragona for subsequent overland distribution.

Potash Loading Terminal: Storage capacity: 80,000 tonnes. 3 loading gantry cranes: 1,000 tonnes/hr.

Iron, Steel and Scrap: Handled at Muelle del Contradique Sur and Muelle Sur No. 1. 12 tonne and 30 tonne capacity cranes are used. Hourly rate is 80 tonnes for scrap and 250 tonnes for manufactured products.

Coal: Discharged at Contradique Sur, depth 12 m. Muelle Sur No. 1 (North Side) depth 12 m. and Muelle Sur No. 1 (East Side) depth 14 m.

Cranes of 12 tonne capacity are adapted and discharge rate is in excess of 110 tonnes per crane hour. The Storage Area is sufficient for a vessel discharging 60,000 tonnes.

TANKERS: There are 6 berths for oil tankers (refined products), max. size 60,000 d.w.t., discharge rate 1,000 t.p.h., depth alongside 12 m. (2), 11 m. (2), 8.5 m. (2). Diameter of loading lines 4 in. and 8 in., diameter of discharge lines 10 in., 12 in. and some of 16 in. Storage capacity 350,000 cu.m.

There is 1 natural liquid gas berth, depth alongside 12 m.

There are 5 berths for inflammable liquids, asphalt, vegetable oil and tallow, depth alongside 12 m.

Also see "Shipmaster's Report".

STEVEDORES: *(a)* Daytime, normal working hours, from 0800–1200 and 1400–1800 hrs. (1 shift); *(b)* 0800 – 1400 and 1400 – 2000 hrs. (2 "intensive" shifts). Night-time, from 2000 – 0200 and 0200 – 0800 hrs. (2 intensive night shifts). Extra costs are involved for intensive shifts. Nightwork is paid on an overtime basis. Average rates for discharge of grains in bulk are about 7,500/8,000 tons per day of 24 consecutive hours; for general cargo a rate of 100 tons within normal working hours

MEDICAL: All medical facilities are available; it would be appreciated if the Master advises in advance if crew member is in need of urgent medical attention. Contact Barcelona Radio in an emergency.

FRESH WATER: All piers have water available by shore pipes or by barge. Rate of delivery about 16/20 t.p.h. Rate by barge 150 t.p.h.

Ship's Master advises that fresh water is very saline and that it is not advisable to take any.

FUEL: Fuel oil and gas oil available at "Campsa", installation. It is advisable that Shipowners stem bunkers through their own contractors, with advance notice of 48 hours. Delivery either by barge, or at the bunkering pier of "Campsa". Bunker barges allowed alongside vessel during cargo-handling.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew, except in liner vessels which is contracted for by stevedores.

CERTIFICATES: Vessels should have all usual certificates aboard but only the Safety Wireless, Safety Equipment and Derat Certificates are required by authorities.

CUSTOMS ALLOWANCES: Quantity allowed for each crew member is 200 cigarettes and 1 bottle wine/spirits.

CARGO GEAR:

57 Quay cranes up to 3 tons
55 " " " 6 tons
6 " " " 10 tons
8 " " " 15 tons
141 Mobile cranes 1 – 50 tons
3 Floating cranes up to 160 tons

IDENTIFICATION CARDS: Not required.

REPAIRS: All types deck and engine.

DRY DOCKS: 1 floating dock, length 111 m., lifting power 12,000 tons; belonging to Port Management.

Dry dock, maximum available length 215 m., available beam 34.7 m. Cross-beam height at zero level of the port 19.6 m. Height of stocks above zero level 8.74 m. Cross-beam height to top of superstructure 12.1 m. 50 ton, 20 ton, 5 ton and 3 ton cranes. Can accommodate vessels of 50,000 d.w.t.

SURVEYORS: Lloyd's; 2410400. A.B.S.; 2399275. N.V.; 3192906 and 2463164.

REPATRIATION: Good facilities available.

AIRPORT: Located about 7 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour; GMT plus 2 hours (29th March – 26th September).

HOLIDAYS: 1st January; 6th January, Good Friday; 1st May, 25th December.

No cargo work Maundy Thursday, Good Friday, Easter Sunday and Easter Monday.

POLICE/AMBULANCE/FIRE: Police 091; Harbour Police 3026367; Ambulance 3171717 (Also 24 hour medical service); Fire 080 and 2535353 (080 is best).

TELEPHONES: Only at Terminal Station.

SERVICES: Carpenters, lashing, hatch and tank cleaning all available.

DEVELOPMENTS: Lengthening under construction of breakwater Dique del Este, and pier Contradique. A wharf for 6 berths for tankers only, plus 4 berths for vessels loading/unloading crudes in bulk with a depth of 39 ft.

2×30 ton cranes on order to be located at South No. 1 Wharf for the handling of bulk solids.

8×6 ton cranes on order to be located at Costa and Anden de Costa Wharves for the handling of general cargo.

2 container cranes on order to be located at the South end of Principe de Espana Wharf.

Completion of 550 m. of new quay at South No. 1 Wharf with a depth of 140 m.

350 m. of new wharf to be built at Alvarez de la Campa Wharf, including a Ro-Ro berth and 45,000 sq.m. of open space and a depth of 12.0 m.

SHIPMASTER'S REPORT: March 1981.

Approaches: If vessel coming from the East, no problems, as the radar picks up the line of the breakwater about 20 miles out. There is also a D.F. station close to the entrance to check vessel's position. Also suitable for calibrating the D.F. if time allows.

The extension to the breakwater is now completed, and the light buoy marking the end of the extension has now been removed.

Anchorage position is about 0.5 miles from the breakwater where vessels usually remain at anchor awaiting instructions.

Port: The large Southern extension of the port is well under way, and it was in this dock that the vessel berthed. It would appear that this extension will be used for general cargo, containers, and oils/gases. The gas berths lie on the Eastern side of the dock. There being 3 berths available at present. The Northern Berth handles LNG/LPG. The second berth LPG and No. 3 Berth handles oils. Dredged depth alongside according to chart B.A. 1180 is 10 m.

Pilots: Pilots board the vessel just outside the breakwater, from a small launch painted black with a white letter "P" painted on its sides. Pilots are reluctant to proceed very far outside the breakwater entrance.

Pilots can be contacted on VHF about 30 miles out at sea. Working Channels 16 and 12.

After completion of cargo, Pilots are called and appear on the vessel within 30 minutes.

For arrival Pilots are required to be given 24 hours' notice.

Berthing/Unberthing: Vessel's usually berth port side to head up the dock, but if it is required by the ship they will berth starboard side to.

Vessels can berth or sail at any time of the day or night.

Vessel assisted by 2 tugs forward and aft. Tugs using ship's lines. The 2 land side tugs put the lines ashore, and then push the vessel onto the quay until mooring is completed. No particular problems with berthing or unberthing.

Berth: The vessel lies alongside dolphin, which carries the pipe-line. The dolphin is adequately fendered. Fenders are large flat wooden faces, with a backing of large rubber tyres.

Aft mooring arrangements not very satisfactory at this call as 2 of the mooring hooks were inoperative. Had they been working the usual arrangement of 3, 2 and 2 could have been possible.

Attention must be paid to the mooring boat, whose crew will take the ropes to any position they feel inclined. This happens forward. Aft they have fewer choices as to where to put the ropes. Vessel tied up at No. 2 Berth on this call.

Cargo Operations: Connection is to a cargo hose 12 in./8 in. line ASA 150. Shore provide the reducer and connect and disconnect. Pumping rate varied between 230/110 t.p.h. (butane). Butane tanks are 3 km. away so the usual high back pressure was experienced. Back pressure during discharge was 8 bars. Discharge was carried out using 2 pumps.

Vessel was informed by the surveyor that it was advisable to use as many pumps as the back pressure allowed, as the shore may protest at the slow discharge rate.

During this stay the shore tanks were full and were being topped off, this could have been the reason for the low rate. Possibly a better rate could be expected with propane as the tanks are only about 1 km. away.

The cargo hose was in a poor condition on the exterior. Burning was in operation on the berth ahead of the vessel, smoking regulations seemed lax.

Communications between the ship and shore were very poor as nobody spoke any English or French. Communications between the jetty and the tanks, were also very poor, messages are passed by sound powered telephone but it would appear that at the tanks nobody is in attendance at all times.

If it is possible and vessel is berthed at No. 2 Berth use the forward manifold otherwise the gangway will not be able to be landed on the dock, and will overhang by a few feet.

General: Papers required for the port are those laid down in "Guide to Port Entry". Chandler available, who can deliver by either road or barge. Storing from the quay would be awkward due to the space available on the dock, and in fact the derrick is supporting the cargo hose. After stores cranes cannot work to the quay. Stores were not taken at this port, for this reason.

Deck and engine repairs can be carried out at this port.

Lloyd's Surveyors are available for hull and engine surveys.

The airport is about 4 miles away and there is no problem with repatriation.

The berth is a considerable distance from the town and arranging taxis to come down to the vessel can cause problems. For this reason the vessel laid on a taxi service for a limited time during the vessel's stay in port. Taxi fare to town was about 400 pesetas.

No telephone available on the berth, but local calls may be made from the gate house of the "Enagas" Terminal across the road from the berth.

Water density 1025 (arrival), 1026 (departure).

AUTHORITY: Puerto Autonomo de Barcelona, Pl. Puerta de la Paz 1, Barcelona-2, Spain. *Tel:* 3188850, 3188750. *Telex:* 54000 JOPB. *Contact:* Jose Ma. Munteis Aumatell, Port Director.

BILBAO: 43.22 N. 03.05 W. (See Plan Book)

DOCUMENTS:

6 copies Crew List.

4 copies Passenger List (if any on board) or 2 Negative Passenger Lists.

3 copies Crew's Personal Effects Lists, if any.

3 copies Ship's Store Lists.

Safety Radiotelegraphy Certificate.

Safety Equipment Certificate (g.r.t. 500 or above)

Safety Construction Certificate (g.r.t. 500 or above)

International Health Declaration Form.

Narcotic List.

Vaccination List.

Declaration of no animals on board.

3 copies Cargo Manifest.

2 copies Manifest of Cargo in Transit.

Tobacco Allowance: Crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The rest must be included in the vessel's store lists, and is to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Laws is 6 kg. of tobacco for each person aboard.

Any quantity over this amount should be manifested as "tobacco in transit" and this manifest to be visaed by the Spanish Consulate in the previous port. For ships diverted at sea to a Spanish port or if a Spanish Consulate is not available at the last port of call, Master is required to send prior to arrival the following cable to:

DIRECCION GENERAL DE ADUANAS-MADRID

"Vessel ....Coming from ....

bound to Bilbao with tobacco Manifest not visaed in the last port of call due to not being available Spanish Consulate.

Master ....

The text of the cable should be entered in the Log Book and a copy delivered to the Custom's Agent when boarding.

Clearance: Health and Customs Authorities will board either when vessel is at anchor or berthed. Customary national and international regulations concerning Free Pratique are applied. Unless contagious sickness being on board, or vessel coming from an epidemic zone, radio advice to Health Authority is not required. Health Declaration, Derat Certificate and Crew List are required by Health Authorities.

PILOTAGE: Pilotage is compulsory for vessels entering and leaving the Port of Bilbao. Vessels must make contact with the pilot station 1 hour before arrival; Masters shall make contact again when 7 miles from the port entrance.

Arrival Information: There are no traffic separation schemes or traffic control systems in the approaches to the port of Bilbao.

The pilot station keeps permanent radio watch on VHF Channel 12. When Pilot on board and ship approaching the berth VHF communication is carried on Channel 14.

ANCHORAGE: Masters will be informed by Harbour Pilot about the estimated berthing time and any other particulars that concern berthing prospects. Should need for anchoring arise, vessels will be requested to anchor under the control of the Harbour Pilot in the usual anchorages, i.e. in waters between former entrance mouth of Santurce and new entrance mouth of Lucero.

Crude and oil product carriers follow the same procedure, the anchorage position is stated by the Refinery Terminal Superintendency, although vessel receives instructions through VHF from Pilot on arrival.

Reference "A": (Open sea outside harbour entrance): Recommended for vessels with a draft greater than 20 m. or over 150,000 d.w.t., in case of emergency it is deemed the better manoeuvring area.

Holding ground: Sand.

Depth: 50 m.

Bearings and distances: Northward from the entrance green lighthouse, 1.7 miles away and bearing 314° from Punta Galea Lighthouse, distance 2.7 miles.

Reference "B": (Inside the harbour entrance): 90,000 – 150,000 d.w.t. vessels whose draft is less than 20 m.

Holding ground: Sand.

Depth: 27 m.

Bearing and distance: 261° from Punta Galea Lighthouse, distance 1.9 miles.

Reference "C": (Inside the harbour entrance): Less than 90,000 d.w.t. vessels.

Holding ground: Sand.

Depth: 24 m.

Bearing and distance: 229° from Punta Galea Lighthouse, distance 1.2 miles.

Reference "D": (Inside the harbour entrance): Used when anchorage "C" is occupied.

Holding ground: Sand.

Depth: 20 m.

Bearing and distance: 204° from Punta Galea Lighthouse, distance 1.2 miles.

Ships in general (other than those bound for Refinery Terminal) that are required to wait due to berthing schedule, or tide level when bound up river, may receive instructions from Pilot to anchor either in between new outer Port Entrance of Lucero and the older Santurce breakwater; or inside waters enclosed by Arriluce and Santurce breakwaters. In this latter area an additional facility of 3 sets of mooring buoys for lightening, LASH type ship turnround operations, etc., are located in waters 14 m. deep.

MAX. SIZE: Drafts available for dry cargo vessels range from 4 m. up to 14.5 m. and tankers up to 32 m. The largest vessel received was 409,499 d.w.t, length 378.01 m. and draft 22.48 m.

HEALTH: Vessels requiring Free Pratique have to fly "Q" Flag whe entering port. If proceeding direct to berth, Pratique obtaine immediately after berthing. Otherwise, at anchorage on arrival. Case suspected disease or fever on board, Master must radio Agent, t advise Health Office. On berthing Health Authorities require Healt Declaration, Derat Certificate and Crew List. Also see "documents".

RADIO: Short wave communication link through Aranjuez Radio an Pozuelo del Rey Radio. Medium wave communication link is throug Machichaco Cape Radio.

VHF: Bilbao Coastal Radio Station on Channel 16.

Other stations in vicinity and operating on the same calling channe are Cabo Mayor, Cabo Machichaco and Choritoquieta.

Petronor Refinery Terminal keeps permanent watch on VH Channels 12 and 14.

TUGS: No tugs required for entering port, only for berthing or shiftin inside river. Ship's lines used, tugs employed according Pilot's advice 28 tugs available, 125 h.p. – 4,000 h.p.

BERTHING: Operated by the Port Authority:

General Cargo:

750 m. of berthing with depth of more than 12 m. and Ro/Ro facility.

1,640 m. of berthing with depth between 8 m. and 10 m.

150 m. of berthing with depth between 6 m. and 8 m.

681 m. of berthing with depth between 4 m. and 6 m.

Bulk Cargo:

174 m. of berthing, water depth 14.5 m.

1,043 m. of berthing, water depth 14 m.

154 m. of berthing, water depth 10.5 m.

1,088 m. of berthing, water depth 8 m. – 10 m.

527 m. of berthing, water depth 6 m. – 8 m.

Liquid Cargoes:

Crude and oil products: Lucero Terminal (leased to Petronor)

Berth No. 1 draft 32 m., length 400 m. (with a fendered jetty 140 m. wide

Berth No. 2 draft 19 m., length 400 m. (with a fendered jetty 96 m. wide

Berth No. 3 draft 13 m., length 200 m. (with a fendered jetty 85 m. wide

Berth No. 4 draft 11 m., length 200 m.

Berth No. 5 draft 11 m., length 200 m.

Berth No. 6 draft 7.5 m., length 100 m.

Other oils and chemicals:

220 m. of berthing, water depth 5 m.

*620 m. of berthing, water depth 9 m.

*980 m. of berthing, water depth 14 m.

*Jointly shared with dry cargo handling operations.

Privately owned Chemical Plants and Mills: Specially fitted for dry and liquid cargo handling, totalling 5,469 m. of berthing space; water depth 4 m. – 8 m.

Containers:

645 m. of berthing with depth of 14 m.

500 m. of berthing with depth between 8 m. and 9 m.

Passenger:

180 m. of berthing with depth between 10 m. and 12 m.

There are also 3 Ro/Ro ramps available.

CRANES: *Dry Bulk:*

Gantry type, 2 (leased)×35 tons lifting capacity.

Luffing type, 12 (leased)×14 tons lifting capacity.

Luffing type, 10 (public)×12 tons lifting capacity.

Luffing type, 32 (public)×6 tons lifting capacity.

Break Bulk:

Luffing type, 2 (leased)×30 tons lifting capacity.

Luffing type, 3 (public)×30 tons lifting capacity.

Luffing type, 6 (public)×12 tons lifting capacity.

Luffing type, 50 (public)×6 tons lifting capacity.

Container Terminals:

Ship to shore, gantry type, 2 (leased)×50 tons lifting capacity.

Ship to shore, gantry type, 2 (leased)×40 tons lifting capacity.

Ship to shore, gantry type, 1 (leased)×32 tons lifting capacity.

Mobile type, 20 (leased)×20 – 100 tons lifting capacity.

Floating Cranes: 4 units for bulk cargoes, 12 tons – 35 tons capacity.

1 for heavy lift cargoes up to 400 tons capacity.

STEVEDORES: Ordinary working time (Monday/Friday) 0800 - 1200 hrs., 1400 – 1800 hrs. (break at noon).

Ordinary working time (Monday/Friday) 0800 – 1400 hrs; 1400 - 2000 hrs. (2 intensive relief turns).

Extraordinary working time: Round the clock, 7 days a week available.

Inform Agent about requirements in advance.

MEDICAL: Medical service must be arranged by the Agent.

TANKERS:

Petronor Refinery: *Location:* The Petronor Refinery is located on the North coast of Spain; the Marine Terminal is situated near the Township of Abanto v Ciervana. Geographical situation is approximately Latitude 43° 22.2′ N. Longitude 3° 05.8′ W.

Arrival Information: Vessels must send radio advice to Petronor (Somorrostro), telephone 6605291 and ETA advice 72, 48 and 24 hours prior to arrival.

The 24 hour advance notice should be updated there after whenever 2 hours delay or more is likely.

Contact can be made via Aranjuez/EAV, or Coastal Radio stations of Corunna, Cabo Mayor and Bilbao (VHF Channel 16).

The arrival cable shall include: Name of the vessel; ETA; Master's full name.

For VLCCs, Pilots will board 3 miles from outer entrance mouth. No traffic separation schemes or traffic control systems are established.

When vessels are coming to load the cable must also specify: the quantity and grade of cargo, loading order when it is more than one grade, tons of ballast and estimated deballasting time, bunkers required and the type. All communications with the Refinery Marine Terminal, do not relieve the Master of keeping the vessel's Agent duly informed.

Anchorage: Masters will be informed by Harbour Pilots of the estimated berthing time and any other information in connection with berthing prospects; should need for anchoring arise due to terminal necessities or any others, vessels will be requested to anchor under the control of the Harbour Pilots in the usual anchoring places, which must be confirmed by Pilots.

Depths: The depth at the entrance and manoeuvring area to berths is 28 m. to 29 m., the maximum tidal range is 4.5 m. All depths refer to low water equinoctial springs.

Health: Garbage or trash must not be dumped into the port waters. The area surrounding the vessel shall be kept clean.

VHF: Petronor Marine Terminal, is provided with a permanent radio watch service through VHF Channel 14 or 12.

Before berthing, Control will monitor VHF Channel 12; when the vessel is approaching the berth, it will change to work on Channel 14. Likewise, Petronor personnel appointed to the berth are constantly in communication with the Port Control through the radio. For internal communications between Berth/Port Control and the Refinery, there is, in addition to radio, a telephone system for restricted use.

Berthing: Speed Reference Lights: Placed inside the West breakwater from its initial point, near the port entrance are vertical blue lights that will help on determining the speed when vessel is proceeding towards berths.

From the initial point of the inside breakwater to Berth No. 1, lights are installed every 200 m. From Berth No. 1 to No. 2 every 100 m.

Berthing Assistance Information; Nereides System: Berths No. 1 and 2 are provided with a radar and sonar system which, by means of a luminous panel placed at berth and easily seen from the vessel, supplies the Master and Pilot with an instantaneous indication of the vessel's speed in cm./sec. of the hull side in connection with berthing at bow and stern; likewise, by means of the sonar, the distance in metres, from the hull to the contact points (fenders) bow/stern, appears on the same panel.

Berth No. 1	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depths	31 m.	
Loading arms (Hydraulic speed seal connection)		
Crude	4×16 in.	
Ballast	2×16 in.	
Bunker	1×12 in.	

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth No. 2	HW	LW
Spring tides	15 ft. 6 in.	0
Neap tides	9 ft. 6 in.	4 ft. 11 in.
Currents	None reported	
Depth	19.5 m.	
Loading arms (Hydraulic speed seal connection)		
Crude/fuel/ballast	2×12 in.	
Clean products/ballast	2×10 in.	

Moorings
2 quick release hooks of 60 tons each.
3 quick release hooks of 100 tons each.
Mooring wires are permitted.

Berth Nos. 3-4-5-6
Tides and currents: Same for Berth Nos. 1-2.

Loading arms

Berth No. 3	Fuel/ballast	2×12 in.	Speed seal
	Clean products	1× 8 in.	Speed seal
	Clean products	1× 6 in.	Speed seal
Berth No. 4	Fuel/ballast	2×12 in.	Speed seal
	Ballast/clean products	2× 8 in.	Speed seal
Berth No. 5	Fuel/ballast	2×10 in.	No Speed seal
	Clean products/ballast	1× 8 in.	No Speed seal
	Gasoline	1× 6 in.	Speed seal
Berth No. 6	Fuel/ballast	2×10 in.	No Speed seal
	Clean products	1× 8 in.	No Speed seal

Moorings: Mooring wires are permitted on the quick release hooks; if shore bitts are used the eyes of mooring line must be of manila, synthetic fibre or similar.

Mooring Lines: Vessels must be provided with suitable mooring lines in quality and quantity in accordance with their size. The quantity should not be less than 4 headlines, 4 breast and 4 springs at bow and stern respectively. The vessel's crew must keep the mooring lines taut and to the satisfaction of the Petronor supervisor at all times; the variations of the vessel due to changes of tide and/or vessel operations shall be taken into account constantly. The use of the tension winches will be carried out under Terminal Chief authorisation, in order to have the protection of the loading arms always guaranteed.

The use of mooring wires by the vessel will be allowed on the quick release hooks. If using wires to the bollards ashore, the tail pieces must be of Manila, synthetic fibre or similar with a breaking load at least equal of the wires.

Cargo information:

Heavy Hydrocarbons: Heavy hydrocarbons, such as Fuels, Diesel, Asphalts, etc., with an ignition point higher than 65°C (150°F) will be loaded in accordance with the rates established by the Refinery or limited to the conditions of the vessel lines.

Middle Distillates: Products such as Kerosenes, JP-5, Jet A-1, JP-4, Naphtha, Gasoline, Benzene, Toluene, etc.

The flow loading rate of these products to the vessel tanks will not exceed 1 m./sec. (3 ft./sec.) till the cargo level is 1 m. over the tank bottoms (covering lines, heating coils, etc.), in order to avoid turbulence and splashes.

This loading rate could be increased up to 5 m./sec. once the liquid reaches the mentioned level and it will be decreased to 1 m./sec. whenever the cargo level reaches 1 m. under the upper maximum level (vessel deck.)

The flow loading rate will be according to the following table:

Cargo line diameter	*Velocity flow rate 1 m./sec. bbls./cu.m.*	*Velocity flow rate 5 m./sec. bbls./cu.m.*
4 in.	168 bbls./h. 27 cu.m.	840 bbls./h. 133 cu.m.
6 in.	380 bbls./h. 60.3 cu.m.	1,900 bbls./h. 301.4 cu.m.
8 in.	675 bbls./h. 107.1 cu.m.	3,375 bbls./h. 535.7 cu.m.
10 in.	1,080 bbls./h. 171.4 cu.m.	5,400 bbls./h. 857 cu.m.
12 in.	1,510 bbls./h. 239.6 cu.m.	7,550 bbls./h. 1,198 cu.m.
14 in.	1,850 bbls./h. 293.6 cu.m.	9,250 bbls./h. 1,467.2 cu.m.
16 in.	2,450 bbls./h. 388.9 cu.m.	12,250 bbls./h. 1,944.4 cu.m.

Medical: Medical services must be arranged through the Agent. In case of emergency this service can be requested through VHF in order to have everything prepared on arrival either at berth or at anchorage.

Petronor will advise the Health Authorities through VHF 16 or 14.

Fresh Water: No fresh water facilities on the berths. Fresh water must be arranged through the Agent in order to be supplied by barges.

Fuel: The fuel-oil/gas-oil requirements will be arranged directly between the vessel's Agent and Campsa. Fuel-oil is only available at Berth No. 1 with fuel-oil and gas-oil at all other berths.

Ballast: All ballast will be discharged into the shore facilities. The Master will report to the terminal when due to bad weather, the ballast quantity is above normal.

The sea suction and overboard discharge valves will be inspected, closed and sealed before starting any operation; representatives from the terminal and the vessel will take part in the inspection of the closing and sealing. The bilge valves of the engine with sea discharge will be also sealed.

Crew landing Permits: There is no restriction.

The Master will receive Control Permits of the terminals on arrival which will be duly completed before going ashore, each member will give one copy to the Petronor Representative at the berth gate.

Communications: The Marine Terminal is located at a distance of 8 km. from the nearest rail station in Santurce; the departure frequency of trains is every 10 minutes.

The distance to/from Bilbao is 25 km. by road.

Visitors: Access to the terminal is only authorised to those persons who under previous justification should get on board.

The Marine terminal of the refinery will issue the pass permit, pointing out the authorised area and time limit.

To go on board, under the previous authorisation of the Master, all persons should be provided with the respective permission of the Spanish Marine Authority.

DENSITY: 1025.

FRESH WATER: Available at some berths, rate 25 – 60 t.p.h., otherwise by barge.

FUEL: Pipe-lines available at some berths, rate at cargo berths 130 t.p.h. per loading point and up to 3,000 t.p.h. and VLCC berth, otherwise by barge. Advise Agent 48 hours in advance.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by crew, except in liner vessels, when contracted by stevedores.

CERTIFICATES: Have usual documents on board, but only Safety Radio, Safety Equipment and Derat Certificates required by authorities.

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes, and 1 bottle wine/spirits per man. Also see "Documents".

CARGO GEAR: Usually shore cranes employed in loading or discharging.

IDENTIFICATION CARDS: Not required.

REPAIRS: Good repair facilities, and several important shipyards.

DRY DOCKS: 3 graving docks. Biggest: length 166 m., breadth: 20 m. (owner AESA).

SURVEYORS: Most internationally recognised and well founded survey companies, concerned with cargo or ships' class certification, are established in the Port of Bilbao as well as those related to insurance in both areas. Ship's Agent can provide detailed information.

REPATRIATION: Good facilities.

AIRPORT: Sondica airport 6 km. from the City, Tel: 4531350.

Foronda airport, 50 km. from the City, Tel: 945-273300.

Overseas services and links to all over the world from both airports.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Good Friday; 1st May; Corpus Christi Day; 16th July, 25th July; 15th August; 12th October; 1st November; 8th December; 25th December; and another two fixed local holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 4402011.

Ambulance/Hospitals: Basurto Hospital Tel: 4418700. Emergency medical service, Tel: 4614000 – 4614111.

Red Cross: Sea service, Tel: 4600200. Shore service, Tel: 4446256.

Fire Service: Santurce Area, Tel: 4373375. Bilbao Area, Tel: 4233000.

EMERGENCY CO-ORDINATION CENTRE: Marine Authority is in charge of services which are covered by the Coast Guard.

TELEPHONES: Every wharf has fixed public telephone kiosks and stevedoring terminal offices have up to date means of communication. No telephone plugs at berths.

SERVICES: Electronic and conventional marine equipment repairs, tanks and pipe cleaning and services in general up to the level corresponding with a first class port. Detailed information can be provided by ship's Agent.

BANKS: Due to the large activity of the port in international trade, every bank has specialised personnel in charge of overseas maritime commercial affairs.

STORING: Authorised ship chandler service is compulsory in order to arrange Customs Clearance. Ship is free to load up to 10 tons of stores. If over 10 tons dockers must be used.

SHORE LEAVE: In general there are no restrictions.

IDENTIFICATION CARDS: No shore passes are issued. Passport or Seaman's Book should be carried for dock entrance gate checking with Crew List.

DELAYS: Very exceptional and short time if any.

GENERAL: International Seafarers Center, Tel: 4616699 – 4616911.

Stevedores' and Ship Agents' Association, Tel: 4234185 – 4239327.

DEVELOPMENTS: Pier No. 3, in Santurce Port Section, under construction (1,000 m. berthing line, 14 m. draft, 350,000 sq.m. for cargo deposits). Pier No. 2 lengthening will be the next port facility enlargement in the near future.

AUTHORITY: *Port Authority:* Puerto Autonomo de Bilbao, Campo Volantin, 37 Bilbao-7. *Tel:* 4452000. *Telex:* 32708 Padb E. Berthing Superintendency: *Tel:* 4612626 – 4613626. *Telex:* 31282 Jprb E.

BURELA: 43.39 N. 07.20 W.

BERTHING: Sheltered berth for vessels with draft up to 20 ft. Facilities includes 2 silos for bulk cement.

CADIZ: 36.30 N. 06.20 W. (See Plan Book)

DOCUMENTS:

Entrance Declaration.
Health Declaration.
List of Crew on Arrival.
List of Crew on Departure.
List of Passengers on Arrival (if applicable).
List of Passengers on Departure (if applicable).

All vessels must be represented by a local Agent who will be responsible for completing the required Customs, Health and Port Authorities documentation.

PILOTAGE: International Code Signals used to call Pilot. Pilot can be contacted by VHF (Channels 14 and 16) or through telegraphic address. "Praticos Cadiz". 6 to 8 hours' notice of ETA preferred.

Pilots operate diesel launches both painted black with yellow funnel on which letter "P" is painted in black on both sides. Pilot boat does not remain at station but comes out when ordered. Pilot boards in an area between the Rota Light and San Sebastian Light. In case of bad weather the Pilot will board nearer Los Cochinos shore and meanwhile signal instructions to the vessel until the Pilot is able to board.

ANCHORAGE: Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Junction Buoy in 16 m. – 18 m. depth where the Pilot boards at first opportunity.

RESTRICTIONS: Entry is restricted only by the depth of the entrance channel, maximum safe draft 30 ft.

Power Cable: In position Lat. 36° 30.9′ N., Long. 06° 15.2′ W. with clearance of 50 m.

HEALTH: Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the Port Authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when Free Pratique will be given provided health situation is satisfactory.

TUGS: Normally join vessel off San Felipe Breakwater. 7 tugs available, up to 2,600 h.p.

BERTHING:

Mole No. 1 or Reina Sofia: 370 m. length, depth alongside 10 m. LW.
Mole No. 2 or Alfonso XIII: 300 m. length, depth alongside 10 m. LW.
Mole No. 3 or Generalisimo Franco: 340 m. length, depth alongside 10 m. LW.
Mole No. 4 or Reina Victoria: 232 m. length, depth alongside 10 m. LW.
Mole No. 5 or Marques de Comillas: 425 m. length, depth alongside 10 m. LW.

TANKERS: 3 Tanker berths for vessels up to 27 ft. draft at the piers in the Zona Franca, operated by Campsa. Hoses: Fuel oil 10 in., gas oil 8 in., gasoline 8 in. No slop discharge facilities.

International Terminals Corp. Berth, length 170 m., depth 9.5 m.

FUEL: Fuel, gas oil and several types of marine diesel can be supplied.

REPAIRS: There are 3 shipyards – Astilleros Espanoles SA, at Cadiz and Matagorda. Empresa Nacional Bazan-Carraca, and several workshops of Auxiliar de la Construccion Naval. All types of repairs can be effected.

DRY DOCKS: Largest is 380 m. long, 66.65 m. wide. In addition Astilleros Espanoles (Factoria de Cadiz) have 1 dry dock of 234.7 m. length, 36.3 m. wide, and 2 floating docks, 1 of 231 m. length, 24 m. breadth, lifting capacity 39,400 tons, and the other 100 m. length, 17.54 m. breadth, lifting capacity 4,500 tons.

At Matagorda, there is a dry dock of 150.97 m. length, 19 m. width, and 6.23 m. max. draft.

At Puerto Real Factory there is a dry dock of 500 m. length, 100 m. width, and 9.0 m. draft, where they can accommodate vessels up to 400,000 tons.

OPENING/CLOSING HATCHES: This work is normally effected by the stevedores.

CONSULS: Argentina, Belgium, Bolivia, Colombia, Denmark, Finland, France, Germany, Greece, Italy, Liberia, Netherlands, Norway, Sweden, Portugal and Venezuela.

CUSTOMS ALLOWANCES: Max. of 6 kilos of tobacco for each person on board, all to be declared. Wine or spirits, 1 decilitre per man per day.

AIRPORT: Nearest at Seville, about 150 km. away. Daily flights to Madrid, Barcelona and overseas.

TIME: GMT plus 1 or 2 hours, depending on season.

TELEPHONES: Connection to vessels can be arranged by Agents.

SHORE LEAVE: Crew are permitted to go ashore subject to police control.

DEVELOPMENTS: Astilleros Espanoles is building a new dry dock to accommodate vessels up to 400,000 tons.

Dredging underway to ensure a draft of 11 m. in Entry Channel at LW. Breakwater under construction.

AUTHORITY: Junta del Puerto de Cadiz.

CARBONERAS: 36.58 N. 01.54 W.

SHIPMASTER'S REPORT: November 1983.

DOCUMENTS:

5 Crew Lists.
2 Stores Lists.
2 Crew Declarations.
1 Maritime Declaration of Health.
2 Cargo Manifests (in-transit cargo only).

PILOTAGE: Compulsory. Agents inform Pilot of vessel's requirements. The Pilot boards by tug or small fishing boat, about 1.5 miles off the jetty.

The pilot station is situated at Garrucha, about 15 miles North of Carboneras.

ANCHORAGES: There is a small anchorage South of an island called "Isla Carboneras" locally. The approx. position of the island is Lat. 36° 59.6′ N., Long. 01° 53.9′ W. About 1 mile South of the island vessels can anchor; it is not advisable for larger vessels to stay there long, because this place is too close to the shore and strong Southerly winds can be hazardous.

The depth of this anchorage is between 40 m. and 50 m.

MAX. SIZE: Max. draft 40 ft. Max. LOA 210 m. Max. beam 32 m. Max. airdraft 13 m.

HEALTH: No Radio Pratique available, no yellow flag necessary.

RADIO: The nearest stations are Cabo de Gata – VHF Channels 16, 20, 27 and Cabo de Palos (EAP) – VHF Channels 16, 26, 27, but very poor reception.

VHF: The Pilots have to be called on VHF Channel 16; working Channels 12 or 9. Also see "Radio".

TUGS: 2 tugs are available, each 1,300 h.p. If more tugs are necessary, they have to be ordered via Agents from Almeria.

BERTHING: In front of the entrance to the port the vessel will be turned around by two tugs and enter the port stern first. There is one berth only and the ships always have to berth with the port side alongside. Usually the starboard anchor will be used. 4 headlines made fast to the shore by a small fishing boat as well as 3 sternlines and 1 breastline aft. 2 fore and 2 aft springs are made fast to the jetty. The jetty is fitted with 4 elastic fenders and additional tyres.

BULK CARGO FACILITIES: There is one conveyor for loading cement and/or gypsum with a range of approx. 30 m. Every vessel with a length of approx. 200 m. has to shift for loading all holds. 2 cranes with a capacity of 8 tonnes each are installed.

STEVEDORES: Stevedores work 24 hours a day, including Saturdays and Sundays.

MEDICAL: Only one doctor available. Serious cases are treated at hospital in Almeria. Vaccinations are done in Almeria.

FRESH WATER: Available by lorry only, each lorry carries 8 tonnes. Price in November 1983 = 600 Pesetas per tonne.

FUEL: Available by lorry from Almeria, max. 50 tonnes per lorry.

CONSULS: The nearest Consulates are at Almeria.

REPAIRS: Can be undertaken by workshops in Almeria or Cartagena.

GANGWAY/DECK WATCHMEN: Not compulsory as there is a guard at the factory gate.

HATCHES: Opening/closing done by crew. Open parts of hatches will be covered with tarpaulins by stevedores to prevent dust.

CUSTOMS ALLOWANCES: The quantity allowed per each crew member is 1 bottle spirits and 1 bottle wine. 6,000 cigarettes is to be allowed on board for each person on board.

REPATRIATION: Possible via Almeria, approx. 70 km. from Carboneras.
AIRPORT: At Almeria.
TIME: GMT plus 1 hour; from June to September GMT plus 2 hrs.
HOLIDAYS: See "Almeria".
POLICE/AMBULANCE/FIRE: No facilities. In case of emergency vessel has to inform the stevedores who will contact the agency.
IDENTIFICATION CARDS: Not required. Crew members have to take their seaman's books ashore and the guard at the gate checks their names with a crew list, received from the Agents.
CERTIFICATES: No certificates required by Port Authority or Agents.
OPERATORS: Private port. Owners are "Hornos Ibericos S.A.", a cement and gypsum factory. The port has been active since 1981.

CARTAGENA: 37.35 N. 00.59 W. (See Plan Book)

DOCUMENTS:

6 copies of the Crew List.
6 copies of the Passenger List, or 2 negative copies as the case may be.
2 sets copies Manifests covering cargo destined to Cartagena and carried in transit.
Store Provision List, in duplicate, including items such as: tobacco, spirits, radios, coffee, tea, bunkers, and any other items belonging to the vessel.
2 copies of all Personal Effects Lists, from passengers and ship's crew.

The amount of cigarettes allowed for each member of crew/passenger is 6 kilos; any amount over has to be manifested as "tobacco in transit", and this manifest must be visaed by a Spanish Consul in the last loading/discharging port. If there is no Spanish Consul in the port of call before Cartagena, the Master is requested to send a cable to: Direccion General de Aduanas, Madrid, quoting as follows: "m.v. '. . .' coming from . . . order to proceed to Cartagena tobacco manifest unlegalised = Master".

This cable is to be inserted in the radio log-book, and copy of same to be delivered to local Customs Authorities when boarding the vessel.

PILOTAGE: Compulsory. Position of pilot station 37° 34.6′ N., 0° 59′ W. Position with green light of Dique de Curra bearing 000°, and the white light of Las Losas bearing 090°. This is the position at which the Pilot normally boards.

Vessels bound for Escombreras wait for Pilot in position 37° 34.2′ N., 0° 59′ W., with green light of Dique de Curra bearing 000° and the green light of Dique Bastarreche bearing 090°.

Pilot launch is a motor-boat with cabin, about 9 m. long, white hull, red below water line, black letter "P" painted on both sides.

When bad weather prohibits Pilot boarding in the above position, vessel may be required to embark Pilot inside the harbour breakwaters.

Vessels call Pilot in daytime by code flag "G", or by sounding 3 prolonged blasts on the whistle.

At night, Pilot may be called by flashing code signal "PT", or by 3 prolonged blasts on whistle.

Radio messages, with ETA, may be sent direct to Practicos Cartagena with 24 hours' notice, and confirmed 12 hours before arrival, messages should include vessel's sea water draft and, if calling for the first time, vessel's length overall. Pilot station equipped with VHF.

APPROACHES: Escombreras Bank with datum depth of 9.5 m. situated West of Escombreras Island, extends from 200 m. to 400 m. West of the Eastern tip of the island. This bank is unmarked.

Area of underwater obstructions exists between the coast, the meridian of Santa Ana Buoy, and the parallel of Las Losas Beacon.

There is a zone used for submarine exercises which is marked on the charts. Occasionally, naval divers carry out exercises in the vicinity of the port entrance. These are accompanied by naval vessels showing appropriate signals.

Ships bound for Escombreras, to enter the port, should steer for a point situated at the intersection of the N.S. line of the red light at the extremity of Curra Pier, and the E.W. line through the green light at the extremity of the Bastarreche Pier, at which point, approximately, the Pilot boards the vessel.

The least recorded depth in the entrance to the port is 25 m. The approaches to the port of Escombreras do not present any difficulties.

ANCHORAGE: Vessels anchored within the port limits should not carry out repairs affecting main engines as the possibility of sudden storms in Winter may make it necessary to move to a sheltered anchorage North of Cabo Tinoso, or to put to sea.

Vessels under 29 ft. 6 in. draft may anchor inside the breakwater provided they do not obstruct other vessels' movements.

Anchorage for larger vessels in Cartagena Roads, approx. position 37° 35′ N., 0° 59′ 30″ W. in depths of 40 m.

Anchorage for tankers off Escombreras in approx. position 37° 34′ N., 0° 58′ 23″ W., in depths of 42 m.

MAX. SIZE: No length limitations. For Cartagena max. draft 31 ft. 6 in. For Escombreras max. draft 68 ft.

HEALTH: Free Pratique is immediately obtained when vessels berth any time from sunrise to sunset. Port Health Officers, require Maritime Health Declaration, Derat Certificate, and copy of crew and passenger lists.

RADIO: Cabo Palos Radio, Aranjuez Radio, and/or Gibraltar Radio.

TUGS: 3 tug-boats 500 h.p. – 1,000 h.p. with fire-fighting capabilities. All 3 tugs on duty 24 hours duly equipped, with 2 shifts of crew.

Tugs join vessels in vicinity of port entrance, vessel's lines normally used.

The tugs available to assist berthing tankers in Escombreras are all diesel tugs, equipped with fire-fighting equipment. 5 tugs available of up to 2,400 h.p.

BERTHING: Total length of general cargo quays 679 m. Depth alongside 8 m. – 10 m. Solid bulk materials: total length of berthing 717 m. Depth alongside 8 m. – 10 m.

CRANES:

No.	*Capacity*	*Type*
7	3 – 20 tons	Electric Gantry
2	3 tons	Mobile-Diesel
1	6 tons	Mobile-Diesel
2	25 tons	Mobile-Diesel
1	90 tons	Mobile-Diesel

STEVEDORES: In the case of a vessel calling at Cartagena at night time, Sundays or holidays, it is important that Master cable 24 hours in advance to advise his ETA in order that Agents are able to arrange stevedores' operations. Gangs can be called on as follows: on weekly working days 0800 and 1330 hrs. On Sundays/holidays 0800 hrs. (with prior advice to Union by 1200 hrs. on Saturdays or day preceding holidays). The official working hours are: Monday/Saturday 0800 to 1200 and 1330 to 1730 hrs. – Sundays/holidays: from 0800 to 1400 hrs.

MEDICAL: Medical services rendered as soon as requested but, in case of emergency, Master required to send urgent cable in advance.

TANKERS: Tankers call at port of Escombreras 2 miles away from Cartagena Port, this port owned by Refineria de Petroleos de Escombreras S.A. Slop discharge facilities available at Escombreras.

For ships of 250,000 d.w.t Berth No. 7, of recent construction, consists of 4 dolphins, in a line parallel to Bastarreche Pier. Between the first and third dolphin is situated a loading platform with loading/discharging lines. The centre of this platform is situated at a distance of 230 m. from the head of Bastarreche Pier, bearing 140°.

The least depth in Berth No. 7 is 21.45 m. or 70 ft. 4 in. at the extreme South of the berth. The rest of the area has a depth of between 24 m. to 28 m.

The maximum length foreseen for tankers of 250,000 tons d.w.t. is 250 m. or, 1,145 ft., since the total length of the berth is 430 m.

The maximum allowable draft is 21 m. or 68 ft. 1 in.

Shore lines for crude oil are 1 of 40 in. diameter and 3,500 m. length, and another of 24 in. diameter and 3,500 m. length.

The Woodfield hose-handling gantry has 4×16 in. hoses of which the 2 outside hoses should be used for loading bunkers as well as for discharging. Connecting flanges of 16 in. diameter, type 150 ASA.

Fresh water can be supplied by pipe-line at all berths at a rate of 45 t.p.h.

Only vessels up to about 100,000 d.w.t. may be berthed at night.
8 berths suitable for tankers from 29 ft. 6 in. to 43 ft. draft.
2 berths for LPG carriers up to 29 ft. 6 in. draft.
Also see "Shipmaster's Report".

FUEL: At Cartagena, only gas oil available from tank trucks. At Escombreras all grades of fuel available subject to advance notice given.

FRESH WATER: Available from quay by hose connections, only on working days. On Sundays/holidays notification to be required before 1400 hrs. preceding day.

FIRE PRECAUTIONS: The port area has its own Fire Department under supervision of Port Director. Although there is no water-borne equipment available, tug "Brio" will assist as required as well as Cartagena City Fire Department.

CONSULS: The following countries are represented in Cartagena:

Belgium
Denmark
Finland
France
Greece
Italy
Netherlands
Norway
Panama
Peru
Sweden

GANGWAY/DECK WATCHMEN: Not compulsory, only used when required by Master under Immigration Police Supervision.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes per each crew member, out of bond. The excess to be declared as cargo in transit. Wine and/or spirit: 1 bottle for each crew member or passenger.

CREW IDENTIFICATION CARDS: Not required.

REPAIRS: There are very good repair facilities. A private shipyard "Empresa Nacional Bazan" and 2 other private repair shops.

DRY DOCKS: 1 dry dock can accept vessels (35,000 d.w.t.) of 566 ft. length and 73 ft. beam. 1 floating dock of 6,500 tons lifting capacity. Syncrolift of 8,740 tons lifting capacity.

REPATRIATION: All facilities available.

AIRPORT: San Janvier Airport situated 27 miles from Cartagena with daily service to Madrid, Barcelona and Almeria.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Maundy Thursday from 1400 hrs.; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National holiday); 15th August; 12th October; 1st November (All Saints' Day); 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 501456. Ambulance, Tel: 503470. Red Cross, Tel: 510727. Fire Department, Tel: 501111. Port Fire Department, Tel: 503100.

DEVELOPMENTS: There is a programme to increase berthing-places by building new piers close to breakwaters, available for 3 vessels.

SHIPMASTER'S REPORT: March 1981.
Approaches: Approach to the port provides no great problem coming from either the East or West. Plenty of positions are available from the land as you near the port. The bay in which the port is situated is deep water up to the breakwater. So for anchoring, vessel has to proceed well into the bay. Pilots will advise the number of vessels lying at anchor and a suitable anchorage position.

The bay is exposed to winds from the S.E. through to the S.W. As the weather was good on both occasions that the vessel has visited, no comment can be made as to whether the anchorage would be tenable in strong winds, from these quadrants.

Pilots: Readily available day or night. Pilots board from a small boat, which is rather slow. The same boat acts as line boat when the vessel is berthing. Pilots work Channel 16, and can be contacted about 1 hour out from the port.

Berthing/Berth: Vessel can berth either side of the LPG Pier. Although on the Eastern side of the berth the max. draft allowed aft is 31 ft. 6 in. and forward 28 ft. On the Western side of the pier there is 36 ft. of water. Vessels berth with the assistance of 3 tugs (1 forward and 2 aft). Ship's lines are used to the tugs. Usual tie up forward is 4-2-2 and aft 4 lines go to buoys, 2 springs from the stern, and 2 breast lines from the main deck winch.

Pilots advise that the berth is exposed to S.W. winds and vigilance is required in tending moorings. The berth is adequately fendered with large tyres.

Fresh water is available at short notice, and is piped to the quay. The water man can be found at the gate. Water can be supplied any day except on a Sunday. Bunkers are also available from the quay.

Cargo: Cargo is discharged through a 12 in. 150 ASA "T" connection from which 2×6 in. lines are lead off. Shore supply this connection, and connect the pipe.

Discharge back pressure is 8 bars which means running 2 pumps. Discharge rate is between 70 – 210 tonnes per hour. The discharge rate varies without any notice being given to the vessel by the terminal as they direct the cargo into shore tanks or coastal vessels.

Communications are very poor between the terminal, the vessel and the Agent. Little or no information is relayed to the vessel, as to the state of the tanks, number of coasters arriving, etc. On this occasion we discharged half the cargo into another vessel in order to complete the discharge in time for loading our next cargo.

Customs and the shipper's agreements had to be granted.

Daily cargo surveys are carried out, at either 0800 hrs. or 1600 hrs. Surveyor is happy to take ship's readings without sighting ullages and temperatures himself. For commencing and completion surveys he is of course present. From daily surveys the terminal require total discharged and the hourly pumping rate for the day.

The terminal upon arrival, also asks the ship to sign a letter saying they require the cargo to be pumped with a back pressure of 15 kg./sq.cm. and for the cargo to be heated. A booster pump is required for this port and also a cargo heater (this may soon be supplied). At present the vessel has the pipe work for the heater. Heater and booster pump will be sited on the quay, and ship's power and pumps will be used to run both appliances.

With the high back pressure it is difficult to strip the tanks, so if time allows strip tanks into one tank with the manifold valve closed, and then finally discharge from this tank. In the end this will save time.

Shore will request hot gas to clear the cargo lines.

Chandler: Can supply most items but needs a few days to organise matters. Stores can be supplied by boat. The boat is rather like a small pleasure craft but quite adequate.

Shotblast can be supplied at this port. The shot was also delivered by barge.

Repairs: Engine repairs can be carried out in this port by the local shipyard repair firm.

AUTHORITY: Capitan de Navio, Comandante Militar de Marina de Cartagena, Comandancia de Marina.

CASTELLON DE LA PLANA: 39.58 N. 00.01 W.

(See Plan Book)

DOCUMENTS:

Manifest of Castellon cargo: 1 set covering all loading ports; make sure that this manifest is in perfectly good order before ship's berthing, as the Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine.

Manifest of the Transit Cargo: 2 sets (the same recommendations as above).

3 Crew Lists.

2 Negative of Passengers.

2 sets of Bills of Lading of Castellon cargo.

2 Provisions Lists.

2 Manifests of personal effects.

PILOTAGE: Compulsory, and service is permanent. Pilots board vessels by a cutter in Roads near entrance formed by the 2 breakwaters.

Pilot cutters are painted white and have the letter "P" in black on each bow. Cutters have a blue flag, with letter "P" in white. Signals to be made by vessels requiring Pilot: 3 long blasts. Telegraphic address: "Practicos, Comandancia Marina, Castellon".

ANCHORAGE: Vessels can remain at anchor at the Roads. Recommended anchorage: 0.5 mile East of lighthouse in depth of 12 m.

RESTRICTIONS: Max. draft 22 ft. for vessels of about 110 m. – 120 m. length. For vessels of more 120 m., to 140 m. length, max. draft is 20 ft. – 21 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must radio Agent to advise the Health Office. Following documents are required by the Health Officer upon berthing: Maritime Declaration of Health, Derat Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD, 36 – 48 hours prior arrival nearest radio station is El Grao Radio, call sign EAV.

TUGS: Tugs join vessels at entrance of port. Vessels of more than 100 m. length normally use 1 or 2 tugs. Ship's ropes used.

STEVEDORES: Very important that Master sends in advance short radio notice regarding vessel's ETA so Agent can inform Shippers or Receivers' stevedores accordingly. Official working hours of port are: Monday/Saturday 0830 – 1230 and 1400 – 1800 hrs.

MEDICAL: All kinds of medical services can be arranged. In case a crew member needs medical attendance urgently, it is advisable that Master sends a radio message in advance.

TANKERS: "Campsa" berth in Muelle Serrano Lloberes.

Petroleos del Mediterraneo S.A. Refinery Terminal. Breasting Island; Lat. 39° 56′ 7″ N., Long. 00° 01′ 6″ E. for tankers. Depth of water in the berth is about 12.5 m. (41 ft.).

Vessels berth heading either East or West. The Breasting Island is built on piles. A central platform about 70 m. (230 ft.) long and 15 m. (49 ft.) wide will accommodate the loading arms and the Island services. 2 mooring dolphins are located at about 128 m. (420 ft.) from the centre of the platform. They are linked with the main platform by a walkway. The platform elevation from the sea level is an average of 6.8 m. (22 ft.).

Both sides of the Breasting Island central platform and the Eastern dolphin are provided with a resilient fendering system. No fendering system is installed on the Western dolphin. Vessels can be docked at both sides of the Breasting Island.

2 "swamped" breasting wires are anchored about 200 m. (640 ft.) off both sides of the Breasting Island. Quick-release hooks are provided on the platform corners and on both mooring dolphins.

Hoses: 2 loading arms of 10 in. – 150 lbs./ASA and 2×8 in. loading arms 150 lbs./ASA.

Any vessel from 3,000 d.w.t. through 37,000 d.w.t. can be accepted at the Breasting Island having a deepest draft of 36 ft.

Sea Berth: For crude oil cargoes with submarine pipe-line: Lat. 39° 56′ 4″ N., Long. 00° 02′ 7″ E.

Depth of water in the berth is about 25 m. (82 ft.). Vessels berth heading 075°/080° true using both anchors forward, with about 280 m. (900 ft.) of chain out on each anchor and 2 swamped mooring legs if it is necessary.

The stern is secured to 5 lamgar buoys equipped with 2 release hooks on each. These buoys have flashing lights.

1 navigational range consisting of 2 lighted buoys, is used to proceed to the sea berth and drop the anchors.

Any vessel from 27,000 d.w.t. to 165,000 d.w.t. can be accepted in the sea berth.

Bunkering available. Water available by barge. Provisions available. Pilotage compulsory – Petromed Pilots. Tugs: 2 tugs compulsory.

LPG: See "Shipmaster's Report".

BALLAST: All ballast must be discharged to shore tanks, no exception will be made to this rule. A total of 17,000 cu.m. (110,000 bbls.) can be received by the Refinery ballast tanks.

FRESH WATER: All piers have water available by shore pipes. The rate of delivery is about 8 t.p.h. – 9 t.p.h.

FUEL: Available with 5 days' notice and subject to "Campsa" berthing availability.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Vessels should have usual documents on board, but only the Safety Wireless, Safety Equipment and Derat Certificates are required by authorities.

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes per man out of bond and 1 bottle of spirit per man.

CARGO GEAR: All commercial piers served by electric shore cranes able to lift 3 – 6 tons and 14 – 18 tons (restricted use).

IDENTIFICATION CARDS: Not required.

CONSULS Italian, Navarra 99, tel. 211004; France, Avda. Almazora S/N, tel. 211717; Norway, Enmedio, 9, tel. 222550; Sweden, Maestro Ripolles, 28, tel. 220053.

REPAIRS: Work shop for small repairs.

REPATRIATION: Good facilities exist.

AIRPORT: Valencia, 70 km. away.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours (29th March – 26th September).

HOLIDAYS: 1st January; 6th January; 19th March, St. Joseph; Maundy Thursday after 1400 hrs.; Good Friday; 1st May, Labour Day; Ascension Day; Corpus Christi; 14th June, local holiday; 29th June, St. Peter and St. Paul; 18th July, National holiday; 25th July, St. James; 15th August; 12th October; 1st November; 8th December; 25th December; and 2 or 3 local holidays more, variable.

POLICE/AMBULANCE/FIRE: Police: tel. 220516; Ambulance 213944; Fire 221222.

SHIPMASTER'S REPORT: December 1980.

Approach: Straightforward (Chart BA. 1701). A plan of the port is included on BA. 1458. During final approach care must be taken not to pass between the buoys around the sea berth for oil tankers.

Anchorage: Can be obtained 1 mile Eastwards of Dique de Levante in 15 m.

Pilotage: Call on VHF Channel 16 and Pilot boards approximately half a mile Eastwards of Dique de Levante. Strong S.W.'ly set experienced whilst awaiting Pilot. Pilot boards from small launch which doubles as a mooring boat.

One tug is taken outside the breakwater using 2 ship's lines through the centre lead forward. A second tug makes fast at port main deck aft (tug's line) when vessel is in inner harbour. (Darsena Comercial). Draft limitation of 22 ft.

Berthing: Possible day or night. Starboard side to Muelle de Serrano Lloberes. The berth doubles as a bulk facility and care must be taken to avoid fouling the loading elevator with the bow flare. The elevator is on rails 1.0 m. inside the face. The berth is fendered with tyres on wooden axles – quite common in Spain and quite effective.

There are ample bollards. As soon as first lines are ashore, the forward tug takes up position at the break of forecastle using tug's line to assist in pushing vessel alongside. Lining up takes some little time using mooring winches.

Connection: Six shore anacondas link a hydrant-like pipe, emerging from a manhole on the quay, with the vessel's 10 in. manifold. Hoses are 6 in. (300 ASA) and shore personnel connect/disconnect. Vessel supplies and fits reducers. Starboard derrick used to support a metal cradle carrying hoses over ship's rail.
Discharge: Upon completion of cargo survey, discharge commences slowly whilst hoses are purged by a small hose from the 'hydrant' to the sea. No heater or booster pump are required at this port. Back pressure approximately 3 kg./sq.cm. and average rate of 125 t.p.h. overall with usual hourly rates of 150/160 tonnes/p.h.
Shore Tanks: Are atmospheric and situated some 200 m. N.E. of berth. There are 2 tanks (each 2,000 – 2,500 tonnes capacity). There would appear to be no reliquefaction plant and gas is flared during filling from a flare situated atop each tank. It is reported that this leads to discrepancies in cargo figures but this was not the case for this call. Throughput is estimated at 15,000 tonnes per month with ammonia arriving from U.S.S.R., Libya, and Mexico.
Customs: Attended in the morning. Their visit was brief as transit papers (RUTA) has been prepared prior to the vessel's departure from Cartagena. Remember that bond locker must remain sealed when coasting. Customs checked bond seal.
General: Fresh water is available but none taken this call. Lub oils available via normal Madrid 'permit'. The Pilot can be reached on Tel: 22 24 57 if required during the vessel's stay.

Only 2 tugs available and as preference is given to tankers berthing at sea berths, delays can occur in docking/undocking. We were delayed for four hours on leaving. Tugs are necessary for this port.

Local town (El Grao) is very quiet with numerous small restaurants all within a few minutes walk of the berth. A three star hotel opposite the yacht club is good for telephone calls to U.K. (cost around 265 pesetas for first three minutes).

Castellon proper lies 4 km. inland. Bus fare 30 pesetas.

AUTHORITY: Comandancia Militar de Marina, Grao de Castellon, Castellon de la Plana, Spain.

CASTRO-URDIALES: 43.24 N. 03.14 W.

DOCUMENTS:

3 Cargo Manifests. 1 visaed by the consular authority.
3 Cargo Manifests for other ports if the vessel has called at and loaded in other ports.
3 Ballast Manifests (if the vessel has arrived in ballast).
5 Passenger Lists (if passengers are carried).
5 Master's Certificates to the effect of "No Passengers" if no passengers are carried.
5 Crew Lists.
5 Stores Lists.
5 Crew's Store Lists – cameras, radios, spirits, cigarettes, etc.
Health Certificate.
Certificate of Derat and fumigation against insects.
4 Bills of Lading.
International Freeboard Certificate.
International Safety Certificate.
International Radio Certificate.
Certificate of Stowage of cargo.

PILOTAGE: *To request pilotage:* 1. Advise the arrival of the vessel 24 hours in advance. 2. Hoist flag "G" of the International Flag Code. 3. Anchor within the pilotage limits of the port.

Port Pilotage Limits: Coastal zone comprised between the Onton meridian and that of the Punta del Rabanal at 1 mile from the coast. The Pilot goes out to a limit of 1 mile outside the port. There are no means of radio communication with the pilot boat or pilot station. ETA to be given 24 hours in advance. Sound signals to summon the Pilot – 3 long blasts. In the event of bad weather, the Pilot does not proceed to sea, and the vessel must enter the port and anchor in the bay.

Anchorage to await Pilot: In the mouth of the port at 1 mile distant. The pilot boat carries a blue flag with the white letter "P" upon it. The pilot boat is blue and is a small motor-launch.
ANCHORAGES: The best anchorage is 045° – 800 m. from the green coloured beacon of the breakwater at the port entrance, in a depth of 12 m.
RESTRICTIONS: There are no entry restrictions. Vessels with a draft greater than 6 m. cannot enter the port.
MAX. SIZE: Length 105 m., draft 5 m., depth at the entrance 9.14 m.
HEALTH: The Health Official boards the vessel as soon as it is berthed alongside. In the event of suspected illness or fever, advise Agent by radio and anchor near the port until the Health Doctor authorises entry.
RADIO: The best radio station to pass the ETA telegram to consignees or Agents is Santander Radio station call sign "EAS". Frequency 500 kHz.
TUGS: None available.
BERTHING: Irrespective of tide. The S.E. pier has a total length of 980 ft., of which 500 ft. forms the commercial wharf, mainly for coasters sundry cargoes. No cranes. Fresh water supply. Depth 17 ft. at low water.

Iron ore loading tips: Along open coast adjoining Castro-Urdiales are several cantilever piers connected with the Iron Ore Mines, partly sheltered in creeks or small coves. All vessels bound to load iron ore there should clear and apply at Port of Castro-Urdiales. Vessels cannot remain at these berths during rough weather but may find good anchorage in roads, or immediate shelter at the port of Castro-Urdiales, or better at Bilbao Harbour 9 miles East.

The Iron Ore Loading berths (no length limit) are as follows:

Name	*Situation*	*Approx. ebb tide draft*	*Loading rate per working hour*
Dicido	1 mile E.	21 ft.	800 tons
Saltacaballo	1.5 miles E.	22 ft.	800 tons
Onton	2 miles E.	21 ft.	1,000 tons

STEVEDORES: Ordered by Agent or Shipper. No ETA to stevedores necessary.
MEDICAL: It is not necessary for Agent to receive advance notice that medical attention is required. In the port there is a corps of doctors and one of them is always on duty for any emergency. Furthermore, there is a permanent Spanish Red Cross service with ambulances to transport any patient to a large hospital centre. There is also a hospital in this town.

In the case of serious illness, patients are taken by ambulance to the Cruces Medical Aid Centre (province of Vizcaya-Bilbao) 18 km. from Castro Urdiales.

International Vaccination Certificates are required.
DENSITY: 1016.
FRESH WATER: Water may be taken on board at the San Luis Quay (also known as the Ocharan Mazas Quay). By means of hoses and at a rate of delivery of about 40 t.p.h.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
CERTIFICATES: Safety Wireless, Safety Equipment, and Derat generally inspected.
CUSTOMS ALLOWANCES: Normally 200 cigarettes per man. For longer stay, new allotment out of bond obtainable. Wine/and/or Spirit: 1 bottle per man.
CARGO GEAR: At the small commercial wharf ship's derricks are used. At the iron ore loading berths along the coast with Cantilever Piers, conveyor belt employed with spout at the tip.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Limited.
REPATRIATION: Crew changes and repatriation can be effected, bearing in mind that any consular negotiation must be made in Bilbao, since there are no Consulates in this port.
AIRPORT: Nearest Sondica (Bilbao) 40 km. by road.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Sundays; 1st January; 19th March (Saint Joseph); April, Holy Thursday and Friday (variable each year); 1st, 23rd May; 13th and 29th June; 18th and 25th July; 15th August; 12th October; 1st November; 25th December. On holidays, work may proceed if requested.
POLICE/AMBULANCE/FIRE: Police C.G. Tel. 861146; Ambulance Red Cross 861147 and 861191; Hospital 860196; Fire 861294.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew allowed ashore.
DELAYS: The only delays that can normally be expected are those due to bad weather.
AUTHORITY: Military Marine Adjutant – Port Captain.

CEUTA: 35.53 N. 05.17 W. (See Plan Book)

DOCUMENTS:

Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
4 Crew Lists.
5 Passenger Lists.

PILOTAGE: Radio Agent advising ETA 24 hours in advance; in the event of any unforeseen delay advice should be direct to the pilot station. International code signals used to call Pilot, or give 3 long blasts. Sound signal used day and night. Pilot boards 1 mile from the breakwater. Pilotage compulsory. Pilot on VHF Channel 16 throughout 24 hours, working Channel 12.
ANCHORAGES: To the N.W. of the green light buoy marking the port entrance and to a distance of one mile, in depths of 10 – 15 fathoms, but vessels must leave this area during strong winds from the first and fourth quadrants, in which case the anchorage in the South Bay is advisable. The outer part of the N.W. side of the Western Quay is very rocky.
Prohibited Anchorage: To the East of the meridian passing through the Red Light on the Eastern Quay, anchorage is prohibited due to the presence of submarine cables.
RESTRICTIONS: Vessels carrying explosives must give ample warning of arrival in advance to the pilot station in order that precautions may be taken.
MAX. SIZE: At berths: Length 220 m. Max. draft 33 ft. 6 in.

In bay: No limits at anchorages.
HEALTH: Pratique obtained immediately after berthing when vessel boarded by health officials.
RADIO: Tarifa, Mijas, Malaga, Gibraltar and Tangiers Radio. Preferably the first 3 stations (VHF Channel 16).
RADAR: No service available.
TUGS: Normally 2 tugs in service, 1,100 h.p. and 2,300 h.p. Tugs use ship's lines.
BERTHING:

Berth	*Length*	*Depth*	*Remarks*
Dock-Quays	270 m.	33 ft. 06 in.	—
	1,250 m.	30 ft. 02 in.	—
Muelle Espana	400 m.	7.0 m. – 9.0 m.	—
Muelle Canonera Dato	4×125 m.	7.0 m.	4 Ro-Ro berths
Muelle Pesquero	260 m.	3.0 m.	Fish Quay
Muelle de Ribera	4×150 m.	7.0 m.	Under construction

CRANES: One crane of 20/30 tonnes capacity and 7 cranes of 3/6 tonnes capacity.
STEVEDORES: To be requested when sending ETA. The times for engaging personnel are from 0730 hrs. to 0830 hrs. and from 1630 hrs. to 1730 hrs., and within these times personnel are appointed up to midnight of that day.

On holidays, engagements take place the previous day at 1730 hrs. For Sundays, personnel are engaged on Saturday at midday. Extraordinary working hours are prohibited. With effect from 2000 hrs., work is considered as nightwork, and is subject to 50% increase in rates. Sundays, holidays, and Saturday afternoons are subject to 40% increase in paid rates.

MEDICAL: Advance notice by radio preferred. Hospital facilities available.

DENSITY: About 3.64%.

FRESH WATER: Available.

FUEL: All grades available, to be ordered in advance. Also see "General".

GANGWAY/DECK WATCHMEN: Available but not essential.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Maximum 6 kilos tobacco for each crew member. Normal daily consumption of wine and spirits allowed.

CARGO GEAR: Loading and discharging permitted using ship's gear. Loading and discharging of containers and handling of Ro-Ro vessels permitted.

IDENTIFICATION CARDS: Not required.

CONSULS:

FERROL: 43.28 N. 08.16 W. (See Plan Book)

PORT LIMITS: Whole of the area in the Estuary joined by an imaginary line between Punta Coitelada and Cabo Priorino.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. International code signals used to call Pilots. Pilots board off Ensenada de Carino.

MAX. SIZE: For entering and leaving the River Mouth: Cargo vessels up to 32 ft. draft. Tankers up to 35 ft. draft.

HEALTH: If vessel proceeds directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival. If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.

RADIO: Corunna Radio (Riazor): Calls on 1748 kHz and listens on 2182 kHz and 2122 kHz.

Corunna (Eiris): Call sign "EAR" on 500 kHz and 472 kHz.

VHF: El Ferrol Pilot maintains permanent watch on Channel 14.

Corunna (Eiris): Call sign "EAR" on Channel 16 and 26.

TUGS: Available up to 1,750 h.p. Also salvage tug normally stationed at Ferrol.

BERTHING: Depth alongside quays 25 ft. – 32 ft.

CRANES:

No.	Capacity (tons)	Reach (m.)
2	3/5	15/9
2	3/6	20/15
1	3/6	20/15
1	7.5/15	15/9
1	6	20
4	12	26

Floating cranes available up to 130 tons capacity.

TANKERS: Campsa Oil Terminal, 3 berths, can accommodate tankers up to 656 ft. length and 35 ft. draft.

Tanker Cleaning and Gas-Freeing Plant: A deballasting, gas-freeing and tank cleaning plant is operating at Ferrol. It allows for vessels of any tonnage, and provides washing and degassing of tanks, dirty ballast intake and slops intake. Supply of drinking water and hot water – up to 70°C – is provided for washing tanks with a flow rate of up to 600 cu.m./hr. and an average pressure of 15 kg./sq.cm. Crane facility is also available.

FRESH WATER: Can be supplied from the quays.

FUEL: Can be supplied from the quays.

REPAIRS: Facilities for repairing all kinds of Naval and merchant ships are available. Any kind of hull or machinery repairs and installations can be carried out, as well as annual and 4 yearly surveys, reclassification, transformations and enlargements.

DRY DOCKS: 5 dry docks for building and repairing Naval and merchant ships. Largest dry dock length 330.20 m., width 50 m., capacity 230,000 g.r.t.

Shipyards: There are two main shipyards in the bay area, one of them with a turbine manufacturing section.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.

AIRPORT: Alevedro Airport (La Coruna), two services a day to Madrid. Labacolla Airport (Santiago) 108 km. from the port. Regular services to Oviedo, Santander, Bilbao, San Sebastian, Barcelona, and Madrid.

TIME: GMT plus 1 hour in Winter. Summertime kept from March to September.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Easter Monday; St. Joseph Artisan (May 1st, full day); Labour Day (July 13th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); Immaculate Conception (December 8th); Christmas Day (December 25th, full day).

SERVICES: A modern deballasting, gas-freeing and tank cleaning plant accepts tankers up to 350,000 d.w.t.

AUTHORITY: Puerto de el Ferrol. *Contact:* Jaime Gonzales Paramo, Port Director.

GANDIA: 38.59 N. 00.09 W. (See Plan Book)

LOCATION: Gandia a small commercial port at the mouth of River San Nicolas, about 20 miles N.W. of Cape San Antonio.

APPROACHES: The harbour is entered along the South side of a 1.0 km. long breakwater, running E.S.E. from the shore North of the harbour. The Entrance Channel is about 600 m. in length with depths of 7 m. to 6 m. (23 ft. – 20 ft.) LWS over a width of 100 m. The distance between the South Pierhead and the root of the breakwater is about 85 m.

PILOTAGE: Compulsory. Arrival notice should be given by telephone to Agent. Vessels are met about 0.5 – 1 mile off the Breakwater Head.

ANCHORAGES: Vessels can anchor off the harbour, in depths of 10 m. to 15 m., bearing of breakwater head (green light) 250° (True) distance 0.5 miles. Bottom sand and mud.

TUGS: There are 2 tugs of 600 h.p. available.

BERTHING: The N.E. end of the commercial basin provides a turning place of about 180 m. diameter, where vessels normally turn for berthing bow seaward.

Muelle Sur: Length 295 m., depth 5.8 m. (19 ft.). Rail track and 1 container crane for 20 ft. and 40 ft. units. Covered warehouses. 1 Ro/Ro berth.

Muelle Frutero: Length 300 m., depth 5.65 m. (18 ft. 6 in.). Covered warehouses. 1 Ro/Ro berth.

Muelle Motoveleros: Length 175 m., depth 4.5 m. (15 ft.).

Muelle Pesquero: Length 100 m., depth 2.7 m. (9 ft.), used only for fishing boats.

Muelle Norte: Length 125 m., depth 5.5 m. (18 ft.). Work in progress for Ro/Ro berths.

CARGO HANDLING FACILITIES: Good warehouse accommodation. Several shore cranes. Forklifts, trucks, clamps, etc.

There is a warehouse for cold/frozen cargoes storage.

STEVEDORES: *Working Hours:* Winter: 0800 – 1200/1300 – 1700
Summer: 0800 – 1200/1400 – 1800.

FRESH WATER: Can be supplied alongside all piers.

REPAIRS: Small repairs can be carried out.

AIRPORT: Valencia Airport, 70 km. distant.

AUTHORITY: Ayudante de Militar de Marina, Gandia. *Tel:* 2842901. *Contact:* Francisco Agudo.

AGENT: Navarro y Boronad, S.L.C., Avda Puerto, 27, Apartado 23, Gandia-Puerto. Tel: 2840100 (5 lines). Telex: 62489 (Nava E). Cables: Nava.

GARRUCHA: 37.10 N. 01.49 W. (See Plan Book)

SHIPMASTER'S REPORT: (Updated 1984).

DOCUMENTS: Usual forms required:

4 Crew Lists
1 Crew Declaration
1 Ship's Stores Declaration
Ship's Register
Cigarettes and spirits sealed.

APPROACHES: Coming in from the East the port is easy to find, first sighting is of a small Spanish town at the edge of the sea. On the radar the harbour breakwater begins to show up at 12 miles, and is clearly distinguished at 6 miles.

PILOTAGE: The Pilot boards from a small open boat about 2 cables from the end of the breakwater, the boat is painted white and for a short spell shows a blue flag with a white "P" on it to convey that he is the Pilot and not a local fisherman.

There are 2 Pilots available. The service of a Pilot is obligatory both on entry and leaving for vessels of more than 50 g.r.t.

ANCHORAGE: On our arrival 1 vessel was anchored in a position off the centre of the town, 2 cables from the end of the breakwater on a line drawn continuing from the breakwater, this appears to be the anchorage mentioned in the Admiralty Pilot Book. We passed close inshore of him and obtained soundings of 14 m. – 16 m. when passing his position, whilst we were alongside another vessel arrived and anchored 1.5 cables to seaward from the breakwater.

RADIO: ETA to Pilots 24 hours prior to arrival.

VHF: Call Pilots on Channel 16, 1 hour prior to arrival.

TUGS: Two tugs of 1,200 h.p. to assist manoeuvring of vessels on entry and departure, the tug's assistance being obligatory for vessels of more than 110 m. LOA or 3,500 g.r.t.

HARBOUR: The maximum permitted draft at the commercial quay is 8.5 m. The commercial quay will be extended to 220 m. length.

The harbour is man-made, the outer wall is made of high stone blocks in an "L" shape, the foot of the "L" attached to the land and the outer part running in line with the shore. It is entered from the South with a mole on the port hand enclosing a small fishing harbour. Minimum depth according to the Pilot is 6.3 m. In the N.W. corner on the outer breakwater there is a large concrete apron extending for a length of approximately 100 m. where we loaded, then from the seaward end to the end of breakwater there is an open berth with a large cantilevered loading chute jutting out over the harbour which is fed from conveyors on the seaward side of the breakwater.

BERTHING: The vessel entered the harbour from the South, when the bow was almost level with the end of the inner berth the starboard anchor was dropped to 1 shackle and the vessel swung to starboard on the anchor, a headline was sent away and when the vessel was three quarters swung the anchor picked up. The face of the quay was protected with large roller rubber tyre fenders.

LOADING: The main export of the port is gypsum stone in bulk, we loaded from quay with 4 conveyor belts being fed by dumper trucks into bins on the end of the conveyor belts from the cargo stacked on the quay. The loading rate with the 4 conveyors was up to 1,000 tonnes/p.h. The labour was helpful in positioning the conveyors to our requirements, and they have one man who keeps a careful eye on the draft.

SUPPLIES: There is a ship chandler in Garrucha. Fresh water is supplied by road tanker and pumped aboard, the tankers holding approximately 6 tonnes and 10 tonnes.

GIJON: 43.34 N. 05.41 W. (See Plan Book)

LOCATION: The port is located on North coast of Spain in Gijon Bay. The harbour of Gijon has 3 main areas: Commercial area (formerly called Puerto del Musel) on N.W. of Bay; Local Harbour on S.E. of Bay (used by fishing vessels and yachts); Central area, where ship and dockyards are located.

DOCUMENTS: A set of *Cargo Manifests* (minimum 3 copies) covering the cargo to be discharged in the port is required. Additional sets of Manifests covering the cargo in transit are also to be presented. If the vessel arrives in ballast, a "nil" Cargo Manifest is still required. The following additional documents are also to be presented by the Master on arrival:

Provisions and Stores List: It has to be submitted in duplicate. Usual international forms to be employed.

Crew List: 4 copies duly signed and stamped are required.

Personal Effects Declaration: It has to be submitted in duplicate and must be signed by all members of crew.

Passenger List: Including passengers in transit, must be presented. Where no passengers are on board a "nil" passenger paragraph has to be included in the Cargo or Ballast Manifest, as follows: "No Pasajeros".

Transit Tobacco Manifest: The Spanish Customs Regulations provide for 6 kilos of tobacco per crew member to be on board as usual provisions. If the total quantity of tobacco (including cigarettes, cigars, pipe tobacco and any other kind) does not exceed said average of 6 kilos per crew member, such quantity may be declared as "provisions" in the usual Provisions List, and no further documentation is necessary. If the total quantity on board exceeds said average, the excessive quantity must be shown on a special transit manifest. Usual manifest forms may be employed, describing the tobacco in Spanish as "Tabaco en transito". The essential point is that this transit manifest is visaed by the Spanish Consulate which must insert a full and complete visa. A simple consular stamp is not sufficient. If there is no Spanish Consulate at the last port of sailing or nearby, the tobacco manifest may be visaed by the local Customs Authorities or by another consulate, but the visa is still essential.

PILOTAGE: On approaching the Port of Gijon, Masters are urged to contact the pilot station via VHF Channel 14. The Pilot will board the vessel in the roads, whether scheduled to berth or to remain at anchorage. The Pilot will be instructed beforehand in respect of ship's berthing/anchorage instructions. Pilotage is compulsory.

ANCHORAGE: The Port of Gijon is located in the Bay of Gijon. It is a wide open area with deep water in the Bay of Biscay. Large vessels remain at anchor (when berth is not available) outside of the inner port limits. Smaller ships may anchor within breakwaters. Masters should contact Pilot for most suitable anchorage place.

RESTRICTIONS: The mouth of the harbour is 400 m. wide, and depth over 21 m. Tidal range: 4.6 m. Also see "Tugs".

MAX. SIZE: See "Tugs" and "Developments".

HEALTH: It is strongly recommended that Masters send a radio message requesting Free Pratique 24 hours before the vessel's arrival in port, to "Sanidad Exterior" Gijon, also notify Agent.

VHF: *Communications with ships at anchor:* Communication may be established by VHF Channels 16 and 26 via Cabo Penas Radio. Pilot station may be contacted through Channel 14.

TUGS: "Jove" (500 h.p.), "Torres" (1,000 h.p.), "Penas" (2,500 h.p.). "Arbeyal" (1,630 h.p.). When required, service is complemented with the tugs based at the nearby port of Aviles.

Entrance Regulations: These Regulations will be applicable to all vessels in good manoeuvring condition. Length is to be understood as overall for bulbous bow ships, and between perpendiculars for all others. Unless otherwise specified, tug's horsepower is to be understood as being not less than 500 h.p.

Group 1:
  Length from 215 m. to 250 m. Max. draft: 45 ft.
  Water beneath keel during entrance manoeuvre: 5 ft.
  Tugs: 3 (1 of 2,000 h.p.) or 4 (2 of 1,000 h.p.)

Group 2:
  Length from 250 m. to 260 m. Max. draft: 45 ft.
  Water beneath keel during entrance manoeuvre: 6 ft.
  Tugs: same as group 1.

Group 3:
  Length from 260 m. to 275 m. Max. draft: 45 ft.
  Water beneath keel during entrance manoeuvre: 7 ft.
  Tugs: 4 (1 of 2,000 h.p. and 2 of 1,000 h.p.)

Group 4:
  Length from 275 m. to 290 m. Max. draft: 43 ft.
  Water beneath keel during entrance manoeuvre: 8 ft.
  Tugs: Same as group 3.

Group 5:
  Length from 290 m. to 305 m. Max. draft: 41 ft.
  Water beneath keel during entrance manoeuvre: 9 ft.
  Tugs: 5 (1 of 2,000 h.p. and 4 of 1,000 h.p.).

Manoeuvring of Groups 2 and 3 will be done during good weather and of Groups 4 and 5 during good weather and preferably in day time.

For ships over 305 m. length, entering must be approved by competent authorities, conditions to be determined.

Ships bound to perform unloading operations at "Muelle Moliner" may enter with a max. draft of 46 ft. and a max. length of 275 m.

BERTHING: Pier's name, depth alongside during lowest Spring tide, usage and facilities

Muelle de Los Porticos (North Pier):
First Section:
  554 m. length. 14 m. depth. Bulk discharge.
  4 portico-type cranes, each discharging 500 t.p.h. Connecting conveyor belt.
Second Section:
  146 m. length. 14 m. depth. Liquefied Gas discharge.
  Connection to gaseoduct.

Muelle Norte:
  415 m. length. 8.5 m. and 11.0 m. depth. 3 cranes of 6 tons handling 60 t.p.h.

Muelles de Ribera:
Primera Alineacion:
  230 m. length. 7 m. depth. General cargo.
  2 cranes of 3 tons handling 28 t.p.h.
  4 cranes of 3 tons handling 30 t.p.h.
Segunda Alineacion:
  109 m. length. 7 m. depth. Bulk cement loading.
  Bulk cement loading installation 400 t.p.h.
Tercera Alineacion:
  156 m. length. 8 m. depth. General cargo and containers.
  1 crane of 45 tons handling 140 t.p.h.
  2 cranes of 3 tons handling 25 t.p.h.
  2 cranes of 5 tons handling 28 t.p.h.

Espigon I:
North Section:
  220 m. length. 8/10 m. depth. General cargo.
  4 cranes of 3 tons handling 30 t.p.h.
South Section:
  360 m. length. 9 m. and 11.5 m. depth. Heavy cargo and steel goods.
  Section I:
  9 m. depth.
  2 cranes of 25 tons handling 140 t.p.h.
  2 cranes of 12 tons handling 90 t.p.h.
  Section II:
  11.5 m. depth.
  1 crane of 25 tons handling 140 t.p.h.
  1 crane of 12 tons handling 90 t.p.h.

Estacion Maritima:
Cuarta Alineacion:
  32 m. length. 6 m. depth. Out of service.
Quinta Alineacion:
  225 m. length. 7 m. depth. Coal loading berth and Ro-Ro ramp.
  Coal loading installation handling 400 t.p.h. each of the 2 bridges.
  1 crane of 45 tons handling rail wagons.
  A Ro-Ro ramp.

Espigon II:
North Section 1:
  80 m. length. 7 m./8 m. depth. Cement loading.
  Cement loading installation: 200 t.p.h.
North Section 2:
  220 m. length. 8 m./9.5 m. depth. Oil and Bulk cargo.
  3 connections for oil products.
  5 cranes of 6 tons handling 60 t.p.h.

Testero:
  90 m. length. 12 m. depth. No equipment.
South Section 1:
  166 m. length. 8.5 m. depth. General cargo, scrap, steel products.
  2 cranes of 6 tons. Handling 60 t.p.h.
South Section 2:
  180 m. length. 9.0 m. depth. General and bulk cargo.
  1 crane of 6 tons handling 60 t.p.h.
  Tanks for vegetable oil: 200 t.p.h.

Pantalan de Petroleros (Oil Berth):
North Section:
  180 m. length. 8.5 m. depth. Oil products.
  Connection for discharging oil products.
South Section:
  180 m. length. 8.5 m. depth. Oil products.
  Connection for discharging oil products.

Muelles del Rendiello:
Sexta Alineacion:
  346 m. length. 5 m. depth. Fishing and small boats. Repairs.
Muelle Adosado:
  443 m. length. 5 m./7 m. depth. Repairs and fitting out.

Muelles de la Osa:
Septima Alineacion 1:
  117 m. length. 8 m./10 m. depth. Bulk, general cargo and containers.
Septima Alineacion 2:
  450 m. length. 12 m. depth. Bulk and general cargo.
  2 cranes of 6 tons handling 60 t.p.h.
  5 cranes of 12 tons handling 100 t.p.h.
Octave Alineacion:
  206 m. length. 11.5 m. depth. Heavy and general cargo.
  3 cranes of 6 tons handling 60 t.p.h.
  2 cranes of 30 tons handling 150 t.p.h.

Novena Alineacion:
  198 m. length, 10 m./11.5 m. depth. No equipment. Repairs/waiting berth.

Muelle Moliner:
  313 m. length. 14 m. depth. Bulk cargo and steel products.
  5 cranes of 12 tons handling 100 t.p.h.

TANKERS: 1 tanker berth owned by Campsa. See "Berthing".

STEVEDORES: *Working Hours:* At "Muelle de los Porticos" only, 24 hours a day, 7 days a week, Sundays and Holidays included. All other quays: Monday/Friday 0800 hrs. – 1200 hrs., 1300 hrs. – 1700 hrs. Overtime 1700 hrs. – 2300 hrs. Saturday 0800 hrs. – 1200 hrs. Sunday/Holiday No work.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc. should be reported by the Master to the Ship's Agent for prompt attention. All necessary facilities are available at Gijon.

FRESH WATER: Available ex-wharf or barge. From the wharf connections it is supplied at 20 t.p.h., and from barge at those berths where there is no shore supply facility.

FUEL: Fuel and diesel oil are supplied to ships either directly from shore connection (available only at oil berth) or by a small tanker in service for the purpose.

CONSULS: The following countries have consular representation in Gijon: Brazil, Colombia, Costa Rica, Dominican Republic, Finland, France, Italy (Vice-Consul), Norway, Netherlands (Vice-Consul), Panama, Peru, Portugal, Sweden.

REPAIRS: There are 5 shipyards at Gijon, and work shops specialised in naval works. All types of repairs will be readily attended. It is recommended that advanced notification is given when assistance is required. Electrical power is supplied ex-wharf.

Spare Parts: In case of spare parts being forwarded by airfreight, each consignment must be accompanied by an original Airwaybill and a commercial invoice (in triplicate).

CUSTOMS ALLOWANCES: See "Documents".

DRY DOCKS: 3 companies own a total of 6 dry docks at Gijon, the largest of which is 170 m. length, 27.40 m. wide for vessels up to 26,000 tons.

TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.

AIRPORT: The regional airport, named Asturias (in some instances it is still known as Oviedo) is 45 km. away from the port. There are daily flights linking Gijon with Madrid, Bilbao, Barcelona, Malaga, Canary Islands and Santiago. There is a bus service for passengers from Gijon to the airport and vice versa.

HOLIDAYS: (1984) January 1st and 6th, March 6th, Maundy Thursday, Good Friday, May 1st, June 13th, June 21st, July 16th, July 25th, August 15th, September 8th, October 12th, November 1st, December 8th and 25th.

DEVELOPMENTS: The "Muelle de Minerales" has already been built and is now subject to being equipped. Its draft is 19 m. to 21 m. The installation will consist of 2 gantry-type cranes, a storage area, conveyors, etc., for the discharge of large bulk carriers. Estimated outturn: 6,000 t.p.h. Max. size vessel (orientative): 250,000 d.w.t.

AUTHORITY: Junta del Puerto de Gijon, Apartado 82, C/Claudio Alvargonzales 32, Gijon (Asturias), Spain. *Tel:* 354945 and 320000. *Telex:* 87369 Jupo E. *Contact:* El Director del Puerto.

AGENT: Romualdo Alvargonzalez, S.A. Apartado 141, Gijon. Tel.: 344400. Telex: 87366.

HUELVA: 37.16 N. 06.55 W. (See Plan Book)

PORT LIMITS: *Zone I:* The area between the meridians of 6°40.4′ W. and 7° 03′ W. and between the Parallel of 37° North and the coast including the bar as far as the Watchtower Quay (pilotage bar quay on map).

Zone II: From the Watchtower Quay to a line running East/West through Colon Monument on Sebo Point.

Zone III: From Colon Monument up to Odiel Point.

DOCUMENTS:

3 Crew Lists.

2 Passenger Lists or a negative.

1 Cargo Manifest of goods destined to Huelva.

Another Manifest covering transit cargo.

2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.

Safety Wireless Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by the Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. Services from middle to high tide, depending on draft of vessel on arrival or departure. Pilot's motorboat painted white. Letter "P" in black at both bows. Agent must be in close contact with Pilot Office. Pilots are informed by Agent of ETA at bar. In rough weather Pilots will not be available for entries or sailings. Depths of water depend on location, ranging from 15 ft. to 30 ft. in high tide. Pilot station equipped with VHF Channel 16.

Telegraphic address of Pilots – "Practicos–Huelva", 24 hours' notice of ETA required.

At night the regulation lights are exhibited. Contact must be made by VHF to take Pilot on board. Regulation ladder required.

In the event of bad weather the Pilot will board at Cascajera.

MAX. SIZE: Max. length for entry to Cascajera, 200 m. Max. length for entry from Punta del Sebo to Tharsis Quay, 180 m. Max. draft, permitted 28 ft. 05 in. up to 32 ft. 05 in. depending on the tide.

The entry to port is always subject to tides and maximum sizes of vessels able to proceed to inner quay berths will depend upon the berth and the tidal constant.

HEALTH: As long as Masters of vessels notify Medical Office by cable that there are no sick on board and that the ship proceeds from an area free from contagious diseases as specified by the International Sanitary Regulations, Free Pratique will be granted to the vessel, although this does not eliminate all the sanitary measures specified in the Exterior Sanitary Regulations in force.

Notice should be given en-route towards the Port of Huelva and sufficiently in advance to permit the Free Pratique to be granted.

When there is any sickness on board, no operation will be carried out until the vessel or its personnel have been inspected by the Medical Authorities.

The granting of Free Pratique does not signify that the Yellow Flag may be lowered. This will be done once the Medical Authorities have carried out their inspection or are in possession of the Maritime Health Declaration Form signed by the Master.

RADIO: Local coastal radio station Chipiona Radio located at Punta Umbria. Working frequency: 1700 kHz. Listens out permanently on 2182 kHz and Channel 16 on VHF.

Hours of service 24 hours (continuous).

National and International Radio traffic – radio conversation, radio-telegrams, advice to navigators.

TUGS: Only used inside harbour. Ship's lines employed, 4 tugs available. Number required to assist vessels at the discretion of the Pilot in charge.

BERTHING: Mineral loading quay – 435 m. mooring length and 12 m. depth of water at LWST. Has 2 loaders of 1,200 t.p.h. each.

Jetty belonging to "Energia e Industrias Aragonesas S.A." for movement of liquid and solid bulk cargo. Has 150 m. mooring, with 8 m. depth of water at LWST. For movement of solids, a gantry crane of 6 tonnes is available, together with 3 tubes for liquids.

Extension of the Fosforico Espanol S.A. jetty consisting of fitting out liquid quay for movement of solid bulk cargo. Has a 7 ft. depth of water, 3×15 tonnes gantry cranes and pipes for conveyance of phosphoric and sulphuric acids.

"Reina Sofia Quay" of the Union Explosivos Rio Tinto S.A. for the movement of liquid bulk cargoes, is 500 m. long and 8 m. draft at LWST. Has 2 berths for vessels up to 6,000 d.w.t., 1 berth for vessels up to 3,000 d.w.t. and 2 berths for lighters and tugs.

Pantalan de Foret S.A.: Liquids pier for vessels of 60 m. – 120 m. LOA and draft up to 7.5 m.

Levante (Eastern) Quay: Length 1,200 m. of which 700 m. is for general cargo and bulk cargo. Depth 8 m. Equipment includes 2×12 ton, 2×6 ton and 11×3-6 ton cranes.

Tharsis Quay: 320 m. long, depth of water 7 m. 2 gantry cranes of 15 tons for loading ore.

Fertiberia Quay: 120 m. long, depth of water 4.7 m. Used for solid and liquid bulk cargoes.

Pertrechos Quay: Used for fishing boat repairs.

Saltes Quay: 200 m. long, depth of water 5.5 m. Used for fitting out and deballasting.

Ingeniero Juan Gonzalo Quay: 920 m. long, depth of water 12 m. LWST. Equipped with 8 gantry cranes of 12 tons and 2 cranes of 6 ton, used for general cargo and solid bulk cargoes. Discharge rate 5,000 tonnes per day.

STEVEDORES: 48 hours' advice to Agent necessary to engage labour.

MEDICAL: Agent must give at least 24 hours advance notice where medical aid is required. There is a provincial hospital. Vaccination certificates against fevers and cholera are issued by the Provincial Health Authority.

TANKERS: Rio Tinto Minera S.A. (Oil Division) operate a SBM tanker-mooring 7 miles offshore, about 20 miles distant from Huelva. Mooring is suitable for vessels 900 ft. long with draft up to 70 ft. salt water. Mooring 66 ft. is used for discharging only. Discharge rate is about 1,300 t.p.h. through two 12 in. lines and a 30 in. submarine line.

Within Huelva port, there are 2 tanker berths of which one is used by Campsa. The 2 berths at the "Torre Arenillas" quay permit a draft of 12 m. at low water but the max. length permitted at the oil quay is 200 m.

Berth No. 1 (North) loading/discharging:

LPG	8 in. line
Gasoline	10 in. ,,
Naphtha	10 in. ,,
Diesel	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Berth No. 2 (South) loading/discharging:

Benzene	8 in. line
Cyclohexan	8 in. ,,
Gasoline	10 in. ,,
Diesel	10 in. ,,
Distillates	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Residues: There is a receiving station near the oil quay for tank residues, together with a product separator. Connection lines are 10 in.

Product	*S.G.*	*A.P.I.*
Propane	0.507	—
Butane	0.573	—

Industrial F.O.	0.945	18.24

DENSITY: Water at this port is salt water. Fresh water, in quantity of 1 in. to 7.5 in., only present in heavy rainy weather.

FRESH WATER: The supply of drinking water is made at the Eastern (Levante) quay at the rate of 20 t.p.h. per vessel. This can also be provided by means of tugs at a rate of 50 t.p.h and 30 t.p.h.

FUEL: Fuel oil and diesel available in main port. Not available at offshore tanker terminal.

GANGWAY/DECK WATCHMEN: The employment is at the discretion of Masters, who are free to either employ or do without any watchmen.

OPENING/CLOSING HATCHES: Normally effected by crew, liner vessels excepted.

CERTIFICATES: Safety Wireless, Safety Equipment and Derat Certificates should be at hand for production if requested.

CUSTOMS ALLOWANCES: 200 – 300 cigarettes per man out of bond. If necessary permit may be obtained from Customs Authorities to open bond and provide crew with fresh supplies, if stay in port justifies procedure. Wine and/or Spirit Allowances: Two bottles per man.

IDENTIFICATION CARDS: Not necessary.

CONSULS:

Belgium
Denmark
Finland
France
Germany
Greece
Italy
Netherlands
Norway
Panama
Portugal
Sweden

REPAIRS: Any kind in engine room, and hull above water.

DRY DOCKS: Only 1 small dry dock available for vessels up to 3,500 g.r.t.
REPATRIATION: No difficulty in this respect.
AIRPORT: The nearest is at Seville – San Pablo. A distance of 100 km. from Huelva.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; 19th March; Thursday preceding Good Friday as from 1400 hrs. Good Friday; 1st May; Corpus Christi; 29th June; 3rd August; 15th August; 12th October; 1st November; 8th December; 25th December.

Permit to work on any of the mentioned holidays (1st January, Good Friday and 25th December excepted) can be obtained, but sufficient reasons must be given to justify permission.
POLICE/AMBULANCE/FIRE: Police and Civil Guard 248992 – 245738; Fire-brigade 244421; Customs 248794.
SHORE LEAVE: Permitted.
TELEPHONES: No arrangements exist, for the time being, to place telephones on board vessels.
DEVELOPMENTS: The breakwater has been completed out to No.2 buoy. The Channel is being dredged to a depth of 10m.
AUTHORITY: Comandancia Militar de Marina, Zona Maritima de Estrecho, Huelva, Spain. *Contact:* Alfonso Jaraiz, Comandante.

IBIZA: 38.54 N. 01.28 E. (See Plan Book)

DOCUMENTS: *Passenger Liners:*
5 Crew Lists (Customs, Comandancia de Marina, Health, Police and Consignee).
6 Passenger Lists (Customs, Police, Guardia Civil, Obras del Puerto, Health and Consignee).
2 Lists of Crew and passengers personal effects (Customs).
2 Store Lists (Customs).
Health Certificate (Health Department).
2 Cargo Manifest, if any. (Customs).
2 Negative Cargo manifest, if no cargo.
Cargo Ships:
5 Crew Lists.
2 Lists of Crew personal effects.
2 Store Lists.
Health Certificate.
2 Cargo Manifests.
PILOTAGE: Pilotage compulsory. No ships allowed to go further than imaginary line between Botafoch Lighthouse and Isla Negra del Este, without a Pilot. Advisable to give 24 hours' notice of ETA. Shortly VHF will be installed in pilot station and boats. Pilot's boat is of the canoe type with white sides and letter "P" in black on both sides. Vessels requiring a Pilot must give three long whistles. By night flash morse "G".

Pilot will board between Botafoch Lighthouse and Isla Negra del Este. In bad weather vessel should follow pilot boat until Pilot is able to board.
ANCHORAGES: Anchorage area situated inside imaginary line: Botafoch-Negra del Este with depths of 40 ft. to 50 ft. Pilot required to anchor.
MAX. SIZE: Max. length for berthing, 135 m. Maximum draft 21 ft.
HEALTH: Report in advance to Pilot if there is any problem. If situation is normal, then, after ship berths the health inspector boards and quickly grants Pratique. In event of any suspected disease or fever on board, the Pilot (without boarding), will show the anchorage area, then health inspectors and authorities will board, and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining Pratique.
TUGS: Not available.
BERTHING: Depths alongside 4 m. – 8 m.
STEVEDORES: Available, ETA required 24 hours in advance.
MEDICAL: Civil hospital, military hospital, and 3 private clinics available.
TANKERS: Load/discharge lines 10 in. and 8 in. No facilities for discharging residues. 1 berth. Max. draft of the ship is 21 ft.
FRESH WATER: Available at the quays. 9 m.t.p.h.
FUEL: Available. Notice required 24 hours.
FIRE PRECAUTIONS: Tankers should have a rope over bows, at water level while the ship is berthed.
GANGWAY/DECK WATCHMEN: Performed by crew.
OPENING/CLOSING HATCHES: There are no fixed rules on this matter: it varies according to the circumstances.
CUSTOMS ALLOWANCES: There are no free allowances.
IDENTIFICATION CARDS: Required.
REPAIRS: There are good work shops and engineers but with limited possibilities. There is a shipbuilder's yard where they build and repair yachts and canoes.
REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriations.
AIRPORT: 8 km. away, served by scheduled flights daily.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Cargo work can be arranged on the official holidays with an extra charge of 40% to the workmen.

New Year; Epiphany (6th January); Saint Joseph (19th March); Maundy Thursday: half-day (the evening); Good Friday; Ascension of our Lord (40 days after Resurrection); Saint Joseph the Artisan (1st May); The Holy Heart (last Friday of June); Exaltation to work (18th July); Santiago, Lord of Spain (25th July); Our Lady of the Snows, Lord of Ibiza (5th August); Ascent of Blessed Virgin Mary to Heaven (15th August); Feast of the Hispanicism (12th October); All Saint's Day (1st November); Festival of the Immaculate Conception (8th December); Christmas Day (25th December).

Although not yet official there will be introduced as a holiday Easter Monday and 26th December.
POLICE/AMBULANCE/FIRE: Police 301131; Ambulance 301214; Fire telephone call to the Comandancia de Marina, tel. 301190.
SERVICES: Compass adjusting.
SHORE LEAVE: Crew members are allowed ashore.
DEVELOPMENTS: Increasing depths in the port to 7 m. It has also been approved to enlarge berthing quays to 220 m. and 7 m. depth, and build a fishing dock.
AUTHORITY: Comandancia Militar Marina – Ibiza. *Contact:* Edmundo Fraga Ferreiro, Comandante.

MAHON: Minorca, 39.52 N. 04.18 E. (See Plan Book)

DOCUMENTS: *Health Department:*
Crew List.
Passenger List.
Disinfect and Derat Certificates.
Port Authorities:
Crew, Passenger List.
Ship characteristics and other details.
Cargo.
Indication of previous Port and destination.
Customs:
Cargo Manifest.
Bill of Lading (Cargo for this port).
Crew List and Passenger List.
Also the Master will produce, if required, Log book and passports of crew.
PILOTAGE: Compulsory to take Pilot on entry, departure and any movements within port. On approaching port, during day, ships will hoist flag corresponding to International Code "I need a Pilot". By night, by means of lights, according to International Code.

During day Pilot's boat is recognised by a square blue flag with letter "P" (painted white) in centre of flag. Pilotage area comprises all the estuary, from inside port to outside Capes of La Mola and San Carlos.
ANCHORAGES: Inside are good anchorages, for instance Cala Llorga and Plana de Cala Figueras.
MAX. SIZE: Unlimited length and width, but draft is limited to commercial port, 25 ft.; and to anchorage, 43 ft.
BERTHING: Commercial Quay: Length 518 m. average depth alongside 8 m.

Container and Ro/Ro Quay: Length 180 m. depth alongside 6.5 m.
STEVEDORES: Available. Loading and discharge is as follows:

Container Berth: 2 fixed cranes 800 tonnes per day loading and discharge.

Commercial Quay: 2 fixed cranes and 1 mobile crane with a capacity of 1,000 tonnes per day. Priority to regular lines.
MEDICAL: In case of accident or illness of any member of crew medical assistance and hospitalisation will be in civil hospital.
FRESH WATER: Available. 4 points on the Container Quay and 7 points on the Commercial Quay.
FUEL: Available from Campsa at Cala Figueras.
OPENING/CLOSING HATCHES: Carried out by crew before 0800 hrs.
IDENTIFICATION CARDS: Not required.
CONSULS: Italy: Tel. 363393; France: Tel. 363889; Netherlands: Tel. 362703.
REPAIRS: Small repairs possible.
AIRPORT: 5 km. from Mahon – international and national flights.
TIME: GMT plus 1 hour from September to March, and 2 hours from March to September.
HOLIDAYS: Main holidays are: 1st January (New Year), Holy Week (variable), 1st May (Labour Day) Corpus Christi (variable), 24th June – National Holiday, 8th September, local holiday, 25th December – Christmas. Work is possible on all these dates provided the labour force is paid extra.
POLICE/AMBULANCE/FIRE: Police: Tel: 36.37.12; Ambulance: Tel: 36.11.80; Fire Brigade: Tel: 36.39.61.
TELEPHONES: No telephones on the Quays.
AUTHORITY: Comandancia Militar de Marina de Menorca, Anden de Levante 12, Mahon, Menorca, Spain. *Tel:* 364107. *Contact:* Ricardo J. Ruiz de Gopegui y Sendagorta, Comandante.

MALAGA: 36.41 N. 04.24 W. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists or Negative.
1 Cargo Manifest of goods destined to Malaga, as well as of other cargoes in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.

Details list in duplicate of all personal effects of the crew and Passengers (tobacco, spirits, cameras, radios, etc.). For vessels bigger than 499 g.r.t., Safety Equipment Certificate.
Note: Tobacco: In case vessel carries more than 6 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority or Consul of a friendly nation at the former port clearance. Otherwise, vessel may be severely fined.
PILOTAGE: Pilotage is compulsory and service is permanent. Pilots board vessel by cutter in roads, near entrance formed by 2 breakwaters. Pilot cutters are painted black and have letter "P" in white on each bow. Cutters have a blue flag hoisted on mast, with the letter "P" in white, at both sides of flag. At night, cutters have white light, and under this light, red one. Entrance between breakwaters is 260 m. wide and easily accessible. When weather in the roads is bad, which seldom happens, vessels approach as close as possible to entrance in order that Pilot can board easily.

ANCHORAGE: Vessels can anchor outside of breakwaters, in roads in depths of 80 ft. – 90 ft. Anchoring is prohibited in vicinity of tanker moorings, the Pilot will advise best position. Weather is bad occasionally when East wind blows, during Winter.

MAX. SIZE: No restrictions in respect of length or breadth. Max. advisable draft to enter port is 42 ft. – 44 ft.

The tanker sealine berth can accept vessels up to 300,000 d.w.t.

Largest vessels to enter port: Passenger ship "Queen Elizabeth II", length 294 m. Draft on entering and leaving 9 m. Bulk-carrier "Soledad Maria" length 254 m., draft on entering or leaving 8.53 m. Tanker "Calatrava", 50,376 d.w.t., length 225 m., draft 12.49 m. on entering.

Largest tanker at buoy mooring "Liotina", 317,521 d.w.t., length 352 m., draft on entering or leaving 22 m.

HEALTH: If vessels proceed directly to berth, Pratique can be obtained immediately after berthing. In case of any suspected disease or fever on board, Master must radio to Agents, in order that they can advise Health Office.

RADIO: Nearest important radio station is Radio Costeva (VHF – Onda Media) Cadiz, or Gibraltar and Aranjuez. Master's messages should be received at least 24 hours before arrival.

TUGS: Ship's lines are used, tug-boats are employed according to Pilot's advice, and upon request. 7 tugs available, 620 h.p. – 1,800 h.p.

BERTHING: Pilots will advise Masters whether vessel has a free berth or not. Also if she has to anchor in Roads. Further particulars can also be obtained from Pilot.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	472	9.4	General Cargo, Bulk and Passengers.
	99	8.0	General
2	450	10.5	General Cargo, Bulk and Passengers
3	189	9.0	Passengers and Ferries
	180	10.5	Passengers and Ferries
	200	8.5	Passengers and Ferries
4	455	8.0	General Cargo, Bulk and Passengers.
5	101	6.5	Armament
6	500	10.5	Bulk Solids and Bulk Liquids.
7	145	9.4	Fish
8	128	5.0	Storage
	135	5.0	Fish
Foreport:			
East side	—	11.0	Berth for passenger ships when weather fine.
7	335	13.5	Quay for bulks, solids and liquids when weather fine (partially completed).
South side	—	13.5	Berth for tankers with crude or refined oil.

SPECIALISED CARGO HANDLING FACILITIES: Quay No. 2 includes 15,000 ton silo for grain, loading and discharging capacity 200 t.p.h.

Quay No. 7 (Foreport) includes 3,312 cu.m. silo for molasses, discharging capacity 150 t.p.h. Also delivery can be performed at Quay No. 6 (Inner Basin).

Quay Nos. 6 and 7 can handle all cargo in bulk, rate for coal 3,000 tonnes per day. Also 3 ton forklifts and a Hyster 620 capable of handling containers up to 26 tons. There are regular car ferries for passengers and cargo, Ro/Ro plying with Tangiers, Genoa, Marseilles and Casablanca, all of them direct. For butane gas a special sea-line outside the port Westward, along the beach in front of the depot. For LPG and chemicals Quay No. 7 and berths in foreport can be used, though loading and unloading has to be done into tank trucks. 20 ft. containers can be handled with a crane up to 30 tons and a Hyster forklift with appropriate spreader, eventually 30 ft. containers also.

CRANES: 33 quay cranes with capacity up to 30 tons and 1 mobile crane with capacity of up to 8 tons.

STEVEDORES: It is important that Master sends advance message regarding the vessel's ETA. Agents can inform Shippers or Receivers' stevedores accordingly, to arrange operations properly. Official working hours of port are: Monday/Saturday 0800 – 1200, 1400 – 1800 hrs.

TANKERS: Petroleum handled at Quay Nos. 6 (partially) and 7. Depths 10.5 m. and 13.5 m. respectively. Also at the Tanker Berth, depth alongside 13.5 m. (see "Max. Size").

Quay Nos. 5, 6 and 7: Operator: Demagrisa. Crude oil discharge pipe-line – 250 t.p.h. Refined oil discharge pipe-line – 800 t.p.h.

Playa Misericordia: Operator: Enpetrol. Sea-line for discharging tankers up to 250,000 d.w.t. Max. discharge rate 6,000 t.p.h. through 1×30 in. pipe-line.

Operator: Butano. Sea-line for butane which also handles propane. Max. discharge rate 300 t.p.h.

Operator: Sociedad Anonima Cros. Ammonia pipe-line for discharging tankers up to 17,500 d.w.t. through 1×10 in. line, depth 9.5 m.

Quay Nos. 6 and 7: Operator: Sociedad Anonima Cros. 4 lines for naphtha discharge. Rate 210 t.p.h.

Operator: Enpetrol. 4 discharge lines for oil. Rate 1,500 t.p.h.

Tanker Berth: Operator: Enpetrol. Crude oil pipe-line, diameter 24 in. with 2 discharge arms and 1 spare. Discharge capacity 2,000 – 2,500 t.p.h. Also Campsa, refined oil. 4 pipe-lines available 3×12 in., 1×14 in., with 2 discharge arms.

Quay Nos. 6 and 7: Operator: Campsa. 4 pipe-lines available, 2×10 in., 1×12 in. and 1×14 in. maximum pumping rate 800 t.p.h.

DENSITY: 1025.

FRESH WATER: Always available. Deliveries are performed directly from the quay, rate 20 t.p.h. – 200 t.p.h. or occasionally by tugs. Minimum tonnage, 10 tons, occasionally supplies by tank-barge, minimum 50 tons.

MEDICAL: Any kind of medical service can be arranged. In case a crew member needs medical attendance urgently, it is advisable that the Master radio in advance.

FUEL: Ordinary fuel oil and gas oil are available at local refinery of "Campsa". It is advisable that Shipowners contract bunkers through their own contractors, with of 48 hours notice, so that order can be received in time. Delivery can be performed at bunkering pier at a rate of 60 t.p.h. or by road tankers.

FIRE PRECAUTIONS: Tankers perform their operations at the petroleum berth by Enpetrol or "Campsa" which have necessary fire precautions.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work effected normally by crew, except in liner vessels, which is contracted by stevedores.

CERTIFICATES: Vessels should have the usual documents on board.

CUSTOMS ALLOWANCES: Normally, customs permit 200 cigarettes per man out of bond. 1 bottle of spirit for each crew member.

CARGO GEAR: Usually shore cranes of 2-3-6-12-15-30 tons lifting capacity employed in loading or discharging operations, if vessels require any lightening then vessel derricks are employed.

IDENTIFICATION CARDS: Not required.

CONSULS: Most countries have consulates at Malaga.

REPAIRS: Facilities of a limited nature.

DRY DOCKS: There is a floating dock for vessels up to 2,000 tons.

REPATRIATION: Good facilities.

AIRPORT: The airport is about 8 km. from town. Daily services with Madrid, Barcelona, Seville, Valencia, Tangier and Melilla. Also direct flights to London, Paris, Amsterdam, Brussels, Frankfurt, Stockholm, Helsinki, Geneva, Zurich, Nice.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; St. Joseph (19th March); Good Thursday; Good Friday; Labour Day (1st May); Corpus Christi; 18th and 29th June; 25th July; 15th August; 8th September; 12th October; 1st November; 8th and 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 211302 and 091, 215005. Ambulance, Tel: 390400, 215121, 224400. Fire, Tel: 234567.

DEVELOPMENTS: An extensive plan to increase facilities of port, and for building new piers. Other important work being effected at breakwater, to erect new piers for large passenger ships.

AUTHORITY: Junta del Puerto de Malaga, Muelle de Canovas, Malaga, Spain. *Tel:* 952-214516, 952-210590. *Telex:* 77536 JPMA. *Contact:* Port Director.

MARIN: 42.24 N. 08.42 W. (See Plan Book)

MOTRIL: 36.43 N. 03.30 W. (See Plan Book)

DOCUMENTS:

Health Certificate.
5 Passenger Manifests (1 Health, 2 Customs, 1 Police, 1 Agent).
4 Crew Manifests (1 Health, 2 Customs, 1 Agent).
2 Store Lists (for Customs).

PILOTAGE: Arranged by Agent basis ETA given 24 hours in advance. pilot boat distinguished by painted "P". Night pilotage possible approx. 100% extra, on holidays 50% extra. Vessels await Pilot just outside port. Pilot compulsory for all foreign vessels and Spanish vessels arriving from abroad. Pilot should be requested when 1 mile from the port by means of international signals.

ANCHORAGE: Area near port. The Roads to the East of the port have very little depth. The sea is rough in this area and vessels can run the serious risk of beaching. The best location for anchorage is outside the port 0.25 miles S.S.W. from the port entrance, in 14 m. to 25 m. of water, mud bottom.

RESTRICTIONS: None, vessels may enter day or night.

MAX. SIZE: Entrance 33 ft. at LWS. Maximum draft alongside quays, 27 ft.

HEALTH: Free Pratique given on board.

RADIO: Harbour tugboats and pilot operate on VHF Channel 12.

TUGS: One tug, 1,100 h.p. available.

BERTHING: There is 470 m. of quayage with a depth of 8.2 m. (27 ft.) at LWS and 107 m. of quayage with a depth of 6.4 m. (21 ft.) at LWS.

CRANES: There are 5 electric cranes of 3.5 to 6 tons capacity; 3×6 tons and 1×3 tons to 6 tons mobile crane.

BULK CARGO FACILITIES: Muelle de Levante: 300 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Three cranes 6 ton capacity for handling bulk cargoes (grain, ore, coal, fertilisers, etc.). Loading/discharge rates: 300 t.p.h. One crane 3.5 tons to 6 tons for handling general cargoes.

Muelle de Poniente: 110 m. length. Maximum shipdraft 6.4 m. (21 ft.) at LWS. Two cranes 3.5 tons to 6 tons capacities for handling bulk and general cargoes.

Muelle de Costa: 300 m. length. Maximum shipdraft 8.2 m. (27 ft.) at LWS. Two cranes 3.5 tons to 6 tons for handling general cargoes.

SPECIALISED CARGO HANDLING FACILITIES: Muelle de Poniente equipped for handling liquid chemicals and asphalt, by lines.

Ro-Ro Berths: 2 Ro/Ro berths at Muelle de Costa and 1 Ro/Ro berth at Muelle de Levante.

STEVEDORES: No ETA advice necessary. Agents arrange gangs.

MEDICAL: No advance notice required. All facilities available.

TANKERS: Vessel about 8,000 tons. No special requirements.

DENSITY: 1025.

FRESH WATER: Available alongside all quays.

FUEL: Available at Muelle de Levante. Rates of delivery: 200 t.p.h.

GANGWAY/DECK WATCHMEN: Agent arranges.

OPENING/CLOSING HATCHES: Crew open and close hatches.

CUSTOMS ALLOWANCES: Tobacco: About 100 cigarettes per man. Wine and or spirit. None.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None in Motril. The nearest Granada or Malaga.

REPAIRS: Minor repairs can be affected. There is a slipway for vessels up to 150 tons.

REPATRIATION: Facilities available.

AIRPORT: The nearest airports Malaga 105 km., Granada 70 km. and Almeria 120 km.

TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (January 1st), Epiphany Day (January 6th), Vote Day (January 13th), Maundy Thursday, Good Friday, Wort's Day (May 1st), Santiago Day (July 25th), Assumption Day (August 15th), Pilar's Day (October 12th), Local Holiday (October 15th), Immaculate's Day (December 12th) and Christmas Day (December 25th).

Work can be arranged on above days, however dependent upon permission of the Work Authority.

POLICE/AMBULANCE/FIRE: Police Tel: 601221. Ambulance Tel: 600200. Fire Tel: 600200.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members are allowed ashore.

DEVELOPMENTS: 1 Roll-on/Roll-off berth under construction on Muelle de Costa.

AUTHORITY: Grupo de Puertos de Granada-Almeria, Direccion del Puerto, Motril (Granada). *Tel:* (958) 601207, 601238. *Contact:* Port Director.

PALAMOS: 41.50 N. 03.08 E.

DOCUMENTS:

3 Crew Lists.
1 Passenger List or negative.
Manifest of goods destination Palamos and in transit.
Store List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
Detailed list in duplicate of all personal effects of crew and passengers (Tobacco, spirits, camera, radios, etc.).

Tobacco – any excess over 6 kilos per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles removed and heavy fine imposed.

PILOTAGE: Pilotage is compulsory and service is permanent. Often no berths available between 2400 hrs. and 0600 hrs. owing to port occupied by fishing boats. Pilot is informed by Agent of vessels ETA given 24 hours in advance. When vessels approach the breakwater, Pilot will board. Pilot boat is white with a black "P" painted on the side.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get authorisation for berthing prior to arrival of the ship.

MAX. SIZE: No restrictions in respect of length. The maximum advisable draft for berthing is 24 ft. stern, 20 ft. bow.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio to Agent in order inform Health Office in time.

RADIO: Radio Costera of Barcelona, Bagur or Marmella.

TUGS: None. Barcelona's tugs could be hired should the vessel's size make it necessary.

BERTHING: Depth of water in centre of harbour 42 ft. – 52 ft. Commercial Wharf length: North 689 ft., depth 18 ft. – 26 ft. South 246 ft., depth 15 ft. – 24 ft.

Pier Wharf or breakwater are not available for commercial traffic. Length 2,100 ft.

Also see "Developments".

STEVEDORES: Information about ETA time is advisable in order to arrange gangs.

MEDICAL: Any kind of medical service can be arranged if information received in time.

FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.

FUEL: Can be supplied if required.

GANGWAY/DECK WATCHMEN: It is not compulsory but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to Charter Party.
CERTIFICATES: Usual documents on board. Safety Wireless, Safety Equipment, Derat and Registered Tonnage Certificates are the only ones required by the Authorities.
CUSTOMS ALLOWANCES: Crew : 6 kilos tobacco per person. Passengers: 2 kilos per person. Any excess on this amount must be declared on a separate Manifest as in transit. Wine and/or Spirit: only 1 bottle per man. Any excess, must be declared on a separate Manifest as cargo in transit and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of heavy fines and confiscation of the excess tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS:

France	Tel: 314472	Portugal	Tel: 320148
Denmark	,, 314400	Sweden	,, 320850
Italy	,, 320200		

REPAIRS: Only small repairs.
REPATRIATION: Good facilities exist.
AIRPORT: Gerona Airport situated at 40 km. distance and half an hour by car from Palamos. Regular flight services with Madrid, Barcelona, Palma Mallorca, London, and all over the world with transfer at Madrid and/or Barcelona.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 31 41 87; Ambulance 31 43 50; Fire 31 43 50.
DEVELOPMENTS: A new berth alongside the breakwater, length 200 m., depth 14 m., will be ready in 1984.
AUTHORITY: Ayudante Militar de Marina, Ayudantia Militar de Marina, Palamos (Gerona – Spain). *Tel:* 314070. *Cables:* Ayudante Marina Palamos.

PALMA, Majorca: 39.34 N. 02.38 E. (See Plan Book)

PILOTAGE: Compulsory. Order through Agent.
ANCHORAGE: In outer harbour in depths up to 13 m.
RESTRICTIONS: Depth in harbour entrance up to 15 m.
TUGS: Available if required.
VHF: The Spanish Telephone Company has established a station for ship-to-shore communications.
BERTHING: Quays at Porto-Pi with 12 m. depth alongside. Quays at Puerto de Palma with up to 10 m. depth alongside.
Facilities: Container Terminal, Ro/Ro Terminal and Commercial Quays at New Quay (Dique de Levante)

At Porto Pi there are facilities for cement, oil, petrol and bulk cargoes.
FUEL: Supplied at the quays by CAMPSA. Depth alongside 36 ft. Gas oil available at 120 cu.m.p.h. Fuel oil No. 1 at 250 t.p.h. Intermediate fuel oil also available.
FRESH WATER: Available at the quays.
AIRPORT: Palma Airport well connected with the Peninsula (mainland) and with foreign airports.
AUTHORITY: Junta del Puerto de Palma de Mallorca, Muelle Viejo No.3, Palma de Mallorca, Baleares, Spain. *Tel:* (971) 215100. *Telex:* Jppm 69075. *Contact:* D. Rafael Soler Gaya, Port Director.

PASAJES: 43.20 N. 01.56 W. (See Plan Book)

PORT LIMITS: In this port a vessel is considered to be an "arrived ship" (subject to C/P Terms) when the Pilot leaves the vessel once she is inside the port. The laytime will commence when the Master has delivered in writing the Notice of Readiness.
Agent's Comment: The Pasajes Port Authority consider the port to be limited by an imaginary line linking the West of Arando Grande and the East of Arando Chico.
DOCUMENTS:

4 Crew Lists.
2 Passenger Lists or negative.
2 Cargo Manifests with an individual copy of each Bill of Lading for items to be discharged at port of Pasajes.

Copy of Manifest covering other cargo on board in transit for other ports.

Stores List in duplicate, including tobacco, cigarettes, spirits, radios, etc., belonging to the vessel.

Detailed Crew's Stores List, in duplicate, of all personal effects pertaining to crew and passengers (tobacco, cigarettes, spirits, cameras, radios, arms, etc.).

For vessels exceeding 499 tons g.r.t., Safety Certificate, Safety Equipment Certificate and Derat Certificate should be on board ready for production.

PILOTAGE: Pilot service is compulsory and permanent. Pilots board vessel in an area about 1.5 miles out from leading lights of port entrance. The telegraphic address is: Corporacion de Practicos, Pasajes. Notice should be given 24 hours before arrival; generally Agents keep Pilots informed of vessel's time of arrival when they are advised by Masters. VHF service in operation.

Pilots' cutter is painted in naval-grey with letter "P" painted in white on both sides of bridge; flag with letter "P" in white, is hoisted on cutter's mast.

International pilot signals are used by Pilots, by means of Aldis lamps, when approaching vessel at night. International light and sound signals to be made by vessel when requiring Pilot.

In event of bad weather Pilots cannot board vessel at usual 1.5 miles location. In this case vessel has to wait for instructions (VHF or radio) for entering port.

With respect to boarding and safety measures, the international safety regulations are to be followed.
ANCHORAGES: A limited number of vessels may anchor in Roads inside the port, in good shelter. Depth in area of anchorage is 25 ft. – 29 ft.
RESTRICTIONS: The entrance channel is 80 m. – 120 m. wide, 1,200 m. long and its depth 10 m. at LST, with sandy bottom. Vessels with a length not over 130 m., provided their draft allows, may enter or leave at any time during the day or night. Vessels with a length between 130 m. and 140 m. may enter or leave from 1 hour – 3 hours before high tide during day or night. Vessels with a length over 140 m. may only enter or leave from 3 hours – 1 hour before high tide during daylight. Vessels with a draft over 25 ft., though less than 130 m. in length, will only be allowed to sail or enter from 4 hours before high tide to 2 hours after, on account of their draft, both during the day or at night.
MAX. SIZE: The Port Authority has determined the maximum particulars of the vessels that may use the port: those with a length not over 185 m. and a draft not over 28 ft. forward and 29 ft. aft on entering/leaving. However, a special authorisation must be obtained from the Naval (military) Commandancy for vessels with a length from 175 m. – 185 m. Vessels bound to Lezo Quays are limited to the same draft as above but to 160 m. length.
HEALTH: If vessels proceed directly to berth Pratique can be obtained immediately upon berthing. If vessels anchored in bay, Pratique can be obtained after anchoring. In case of any suspected disease or fever on board, the Master must advise the Agents, by radio, in order that they may inform the Sanitary Authorities in advance.
RADIO: Nearest Radio stations are the coastal radio stations of Igueldo and Cabo Mayor. Messages by radio-telephone can be transmitted via Radio Arcachon (France). Notice of ETA should be sent to Agent 24 hours before arrival.
TUGS: No tug-boats required for vessels with normal steering when entering port. Tug-boats are required for berthing or shifting to and/or from quays for vessels over 80 m. length. Ship's lines are used and tug-boats are employed according to Pilot's advice.

8 tugs available, the smallest and largest being 150 h.p. and 1,250 h.p. respectively.
BERTHING: Berths are allocated by Port Control after notice of arrival and information regarding cargo given by Agent. Pilots inform Masters of location of berth appointed, if any. No tidal difficulties for berthing or shifting inside the port.

Berths belonging to Port Control.

Name	*Length* (m.)	*Depth* (m.)	*Uses*
Ancho	273.2	10	General Cargo
Avanzado Molinao	145.0	10	Liquid gas/bulk cement
Molinao	313.0	10	Containers, scrap, general cargo
Capuchinos	298.3	10	Solid/liquid bulk
Petroleos	159.5	10	Liquids. Special installation
Iberduero	250.0	10	Private
Lezo – 1	298.4	10	Scrap/General cargo
Lezo – 2	150.1	10	Scrap/General cargo
Trasatlantico	234.1	8	General cargo
Lezo – 3	151.0	8	Roll-on/Roll-off
Hospitalillo	87.6	6	Shipbuilding/repairs
Avanzado Norte	63.6	6	Service boats
Avanzado Este	114.6	6	Solid bulk/general
Avanzado Oeste	120.3	6	Solid bulk/general
Darsena de Petroleos	50.0	6	Ship's stores
Herrera	399.4	5	General cargo
Reloj	240.0	5	Solid bulk/scrap

BULK HANDLING FACILITIES: At Capuchinos there are 19 electric conveyor belts with a capacity of 400 tonnes/p.h., 8 electric conveyor belts with a capacity of 30 tonnes/p.h., 2 electric loading jib cranes with a capacity of 400 tonnes/p.h., 1 electric conveyor belt 200 tonnes/p.h., 1 electric conveyor belt system 200 tonnes/p.h., 1 pumping installation 125 tonnes/p.h., 1 pneumatic installation 200 tonnes/p.h., 1 pumping installation of 150 tonnes/p.h., and at Lezo there is also a conveyor belt, 320 h.p., 500 tonnes/p.h.
CARGO HANDLING: *Containers:* 4×30 tonne cranes available for container handling.

Mechanical Handling Equipment: There are 45 fork lift trucks ranging from 1.5 tonnes to 28 tonnes capacity, 10 trucks of 2 tons and 3 tons, 28 loading scoops of between 1.5 tonnes and 16.2 tonnes capacity, 8 tractors, 19 platforms.

The Port Authority also owns 4 additional electrically driven conveyor belts of 2 h.p., giving a loading rate of 40 tonnes and 60 tonnes respectively.

Various ancillary equipment, scrapers, bagging units, bulldozers, barges, lighters, work boats. There are 4 floating cranes, whose power ranges between 6 h.p. and 60 h.p., maximum reach on the largest being 12 m. and its height above sea level being 21 m.

Ro-Ro Traffic: The port has two ramps for Ro-Ro traffic at Avanzado Molinao.

Whenever a vessel arrives with flammable products, such as gas, propane, etc., the quay where vessel is discharging is fenced off.

CRANES:

Location (Berth)	*No. of Cranes*	*SWL* (tons)	*Reach* (m.)	*Output* (tonnes/p.h.)
Trincherpe	1	3.5/6	22.5/12.5	80
Herrera	4	3.5/6	22.5/12.5	80
Reloj	7	3.5/6	22.5/12.5	80

Molinao	4	12	25	150
Molinao	2	30	22.5	200
Molinao	1	12	25	150
Capuchinos	4	6	22	100
Capuchinos	3	12	25	150
Lezo-1	6	12	25	150
Lezo-2	2	6	22	100
Lezo-2	2	30	22.5	200
Iberduero (Container)	1	15	22.7/6	500
Iberduero	1	12.5	16.5	250

Mobile Cranes: 2×2–10 tons, 2×1–6 tons, 1×2–5 tons, 1×7–9 tons and 1×1.5–45 tons.

Floating Cranes: 1×60 tons, 1×6 tons, 1×18 tons (private) and 1×20 tons (private).

STEVEDORES: ETA advice should be received by Agent 24 hours before arrival in order arrange loading/unloading operations with stevedores. The official working time in the port is: Monday/Friday 0800 to 1200 hrs. and 1330 to 1730 hrs. and Saturday 0800/1200 hrs.

MEDICAL: Any kind of medical assistance is available. In case urgent surgical or medical assistance required on vessel's arrival, Agent should be informed in plenty of time to make the necessary arrangements.

No particular inoculations required or vaccination/fever certificates to be produced unless epidemic at last or recently visited ports.

TANKERS: Berth at Muelle Petroleos: 2×8 in. (Gas oil), 2×8 in. (Fuel oil No. 1 & 2 and Gas oil).

FRESH WATER: Fresh water available at all wharves. Rate of delivery 25 cu.m./hr. – 70 cu.m./hr.

FUEL: Fuel is supplied by C.A.M.P.S.A. at Ancho, Molinao and Capuchinos Quays. The rate of delivery is 100 t.p.h. Owners must pay C.A.M.P.S.A. for the fuel 24 hours prior to its delivery.

FIRE PRECAUTIONS: No specific precautions required unless the vessel carries flammable cargo. Special harbour fire-fighting corps.

GANGWAY/DECK WATCHMEN: Not compulsory. Shore watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's Registry, Radio, Load Line, Equipment and Construction.

CUSTOMS ALLOWANCES: In case the vessel carries more than 6 kilos tobacco per crew member and more than 2 kilos per passenger, the excess must be declared in a separate Manifest which must be legalised by the Spanish Consular Authorities. In absence of Spanish Consular Authorities that Manifest will have to be legalised by an Authority of last port of clearance wherefrom the vessel proceeds. A reasonable amount of alcohol is allowed per man.

IDENTIFICATION CARDS: Not required.

CONSULS: Consulates/Vice-Consulates at San Sebastian and/or Pasajes:

Argentina
Belgium
Brazil
Colombia
Costa Rica
Chile
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden

REPAIRS: Repair shops and shipyards available, where repairs or overhauls may be carried out.

DRY DOCKS: One (1) floating dock 91.56 m. long. (internal 76.56 m.), 23.25 m. wide (18 m. internal), and 10.40 m. depth of water. Capacity 2,900 tonnes.

One (1) floating dock 66.27 m. long, 23.25 m. wide, and 9.125 m. depth of water.

Two (2) slipways with 8 ramps of length between 130 m. and 157 m. and widths between 3 m. and 9.4 m. Max. admissable vessel tonnage: 1,200.

REPATRIATION: Good facilities for repatriation.

AIRPORT: Airport of Fuenterrabia is situated at 15 km. from Pasajes. Regular daily services with Madrid and Barcelona.

TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Maundy Thursday (afternoon); Good Friday; 1st May; Corpus Christi; 29th June; 7th July; 16th July; 31st July; 15th August; 12th October; 1st November; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 351841; Ambulance 414142; Fire from 0800 to 1930 hrs. tel. 351844, from 1930 to 0800 hrs. tel. 397262; Red Cross (local) 351032; Hospital, San Sebastian, 423632.

TELEPHONES: No possibility of placing telephones on board.

SERVICES: Divers.

SHORE LEAVE: Crew allowed to land immediately upon arrival.

DEVELOPMENTS:

1. Improving the depth in the bay (2nd phase) giving a depth of 12.0 m. at LW and HW.

2. Donibane Area: In the 1st phase a quay length of 360 m. will be provided with a depth of 12.0 m. To be extended in the second phase to 600 m.

3. Lezo Area: Lezo 3 to be extended, permitting Ro-Ro vessels length 145.0 m. and beam 26 m. to berth.

AUTHORITY: Comandancia Militar De Marina De San Sebastian, Pasajes, Spain. *Contact:* Guillermo Aldir Albert, Military Marine Commandant.

Junta del Puerto de Pasajes. *Contact:* Francisco Miner Urdampilleta, Port Director.

AGENT: Sobrinos De. M. Camara S.A., Telegrams "Camara". Tel: 357045, 357046 and 357047. Telex: 36241.

(Shipbrokers, Customs/Forwarding Agents, Chartering Agents, Lloyd's Sub-Agents).

RIBADEO: 43.32 N. 07.02 W.

DOCUMENTS:

Manifest of Cargo, including cargo in transit.
3 Crew Lists.
2 Passenger Lists or negative.
2 Stores Lists.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

PILOTAGE: Prior advice of ETA required by Pilot, who boards at the mouth of the river at the time advised by Agent. Pilot boat is white-painted motor launch, carrying international pilot signals.

In case of bad weather, Pilot will instruct vessel by signals to proceed to anchorage or to berth.

The Pilot always boards on the lee side, in the latitude of Isla Pancha.

ANCHORAGE: At Ensenada de Arneo, approx. position Lat. 43° 33′ N., Long. 7° 01.6′ W. in depth of 9 m. LW.

RESTRICTIONS: Vessels enter night and day, limited only by draft and state of tide.

MAX. SIZE: Length and beam not limited. Max. draft 15 ft.

HEALTH: Pratique given on arrival on production of clean Bill of Health. International quarantine signals to be used. Port Authorities to be advised if any case of suspected disease or fever on board.

RADIO: Messages may be routed through coastal stations at Vigo, La Coruna or Gijon.

TUGS: None available.

BERTHING: Vessels may berth at the mole at any time, or state of tide, according to draft.

STEVEDORES: Stevedores services operated only by Servicio de Trabajadores Portuarios.

MEDICAL: Nearest clinic at Mondonedo 35 km. from Ribadeo.

DENSITY: 1025.

FRESH WATER: Water connections exist along the length of the mole. Rate, 20 t.p.h.

FUEL: There is a gas oil supply for small vessels, rate 12 t.p.h.

GANGWAY/DECK WATCHMEN: None required.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per man.

CONSULS: Nearest at La Coruna.

REPAIRS: Minor mechanical repairs can be effected. Slipway for vessels up to 200 tons.

AIRPORT: Nearest at La Coruna, 150 km. away, or Aviles, 165 km. away, with regular services to Madrid.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel: Ribadeo 110650.

AUTHORITY: El Ayudante Militar de Marina de Ribadeo.

ROSAS: 42.14 N. 03.10 E. (See Plan Book)

DOCUMENTS:

Crew List.
Passenger List.
(1 of each) Ship's Papers.

PILOTAGE: No Pilots in this port.

ANCHORAGE: Bay of Rosas is anchorage area.

MAX. SIZE: Draft in Commercial Port is 4 m., with berths for cargo ships of about 1,000 n.r.t. (metric).

HEALTH: Once ship is anchored in the bay it obtains Pratique by means of signals, and by raising the yellow health flag. When vessel entering after calling at another port in the same country, this procedure is not required; Health Inspector boards at the quay side.

RADIO: No radio station in the port, but can contact Coastal Radio Station of Barcelona (1730 kHz – 173.4 m.), power 150 W.

TUGS: None.

BERTHING: Advisable during daylight only.

MEDICAL: Port Health Doctor available. Hospitals 18 km. distance.

FRESH WATER: Available at Commercial Port at rate of 8 tonnes/p.h. to 10 tonnes/p.h.

FUEL: Available to small vessels only.

POLICE/AMBULANCE/FIRE: Police Service 25-62-72; Ambulance Service 25-68-28; Fire Service 25-66-32.

AUTHORITY: Ayudante Militar de Marina de Rosas.

SAGUNTO: 39.42 N. 00.14 W. (See Plan Book)

PORT LIMITS: The East/West line through the point of Cape Escollera de Levante.

DOCUMENTS:

2 copies Entrance Manifest.
4 copies Crew List.
Passenger List disembarking at this port.
Passenger List in transit.

Refer to "Barcelona" for other important information concerning Documentation.

PILOTAGE: Port is privately owned, and Pilots employed by Altos Hornos del Mediterraneo S.A. As Pilots are employed in Consignees Office no separate ETA is necessary. They are sent out to meet vessels as required. Pilot boat is not fitted with radar or VHF. Boat displays signals in accordance with international regulations.

ANCHORAGE: From 155° to 170° from the Cape Canet Lighthouse in 20 m. of water.

RESTRICTIONS: Delays may be caused by berth being occupied. Larger vessels may be delayed by bad weather (the Levante), as dredged channel is narrow.

MAX. SIZE: Draft 29 ft. 5 in. No other limitations.

HEALTH: Pratique can be arranged at any time by Consignees.

RADIO: Cadiz Radio-EAC, Cabo Palos Radio-EAP and Valencia Radio EAV.

TUGS: Normally join vessel either in anchorage or 0.5 miles from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessel's length and cargo.

BERTHING: Subject to berth occupation and to berthing priority that Altos Hornos gives to different cargoes. Overnight berthing is allowed, in cases of emegency, or for ship safety.

BULK HANDLING FACILITIES: Ore loading pier for Sierra Menera (approx. 1,700 m. in length). Max. draft 48 ft.

CRANES: 10 at 6 tons on the coal quay, 4 at 20 tons, 4 and 60 tons and a 250 ton winch on the new quay.

STEVEDORES: Employed by consignees.

MEDICAL: Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by Altos Hornos.

TANKERS: No facilities.

DENSITY: Salt water.

FRESH WATER: Available.

FUEL: None available.

FIRE PRECAUTIONS: Fire service organised by Altos Hornos.

GANGWAY/DECK WATCHMEN: Usually by crew. The Civil Guard keep watch on all ships for contraband.

OPENING/CLOSING HATCHES: Effected by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.

IDENTIFICATION CARDS: Passport only.

CONSULS: Nearest at Valencia.

REPAIRS: Small repairs possible.

REPATRIATION: Facilities for effecting crew changes and arranging repatriation.

AIRPORT: Manises Valencia, 40 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: *Religious Festivals:* January 6th, March 19th, August 15th, December 8th and 25th. Variable: Good Friday and Corpus Christi. *National Festivals:* January 1st, May 1st, July 25th, October 12th.

TELEPHONES: None on board. Telephones placed in Boat house and Pilots' Office.

SHORE LEAVE: Crew members allowed ashore.

DEVELOPMENTS: Port to be expanded during the next five years to accommodate 300,000 tonners, at specialised cargo handling facilities. (Delayed for time being).

AUTHORITY: Ayudante Militar de Marina, Calle General Mola 75, Sagunto, Spain.

SAN CIPRIAN: 43.43 N. 07.28 W. (See Plan Book)

LOCATION: Located on the N.W. coast of Spain mid way between Burela and Vivero.

The port is owned by Aluminio Espanol and Alumino Espanola, whose factory is dedicated to produce aluminium and alumina. In its construction the most advanced technical systems have been used.

PILOTAGE: 2 Pilots available.

RESTRICTIONS: Harbour Master's Regulations only allow vessels to enter port or sail during daylight hours.

MAX. SIZE: Max. draft 12.95 m.

VHF: New Radio Station with service on Channel 16.

TUGS: The Factory has time-chartered 2 tugs: "Sertosa Diecisiete" and "Sertosa Catorce" to service the port. A third tug based at Aviles is also used to assist large vessels (i.e. 60,000 d.w.t.).

BERTHING: The port is sheltered by the Northern breakwater called "Dique Norte" which is 1,700 m. long.

The Southern breakwater called "Dique Sur" is the commercial wharf. It has a length of 800 m. The bar of the port is 280 m. wide and its depth 22 m.

Southern breakwater main berth ("A" on Plan) is 280 m. long and its depth 14 m. It has been equipped with a tower-type crane to discharge bulk cargoes, particularly bauxite, and it averages 1,100 to 1,200 t.p.h.

Southern breakwater auxiliary berth ("B" on Plan) is 80 m. long and its depth 7.5 m. It is equipped with 2 cranes of 5 tons lifting capacity each and used to discharge petroleum coke at a rate of 2,000 tons per work shift (0800 – 2000 hrs.). Loading of aluminium ingots and slabs is also undertaken, with a load rate of 500 tons per 24 hours of work. This berth is also being equipped in order to accommodate vessels discharging fuel oil and liquid soda.

FRESH WATER: Available.

FUEL: Not available.

AUTHORITY: Harbour Master.

AGENT: Romualdo Alvargonzalez, S.A. Trv. Puerto 2, San Ciprian. Tel: 58.03.33. Telex: 87492.

SANTANDER: 43.28 N. 03.49 W. (See Plan Book)

PORT LIMITS: Between Cabo Menor and Punta Galizano.

DOCUMENTS:

5 Crew Lists.
7 Passenger Lists, or 3 negative.
3 Cargo Manifests of the goods destined to the Port of Santander, 2 sets of manifests for cargoes in transit.
Store List in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 g.r.t: Safety Wireless Certificate and Safety Equipment Certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 6 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in provisions list (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.

PILOTAGE: Compulsory and service is permanent. Pilots board vessel by a cutter at the road, near the entrance off Mouro Island. Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, at both sides of flag. At night cutters have a white light, under this a red one. VHF available.

ANCHORAGES: The harbour consists of a large bay which provides good anchorage.

RESTRICTIONS: Entrance is well marked and there is no bar. Depth at entrance is at minimum 35 ft.

MAX. SIZE: No restriction in respect of length or breadth, the maximum advisable draft to enter port is 35 ft. at LWOST, and 13 ft. – 14 ft. should be added for depths at HWOST.

HEALTH: If the vessel proceeds directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique. If vessel has to be fumigated or deratted a charge is made.

RADIO: Nearest important radio station is Cabo Mayor Radio, and it is advisable that messages received at least 24 hours before arrival.

TUGS: No tug-boats required for entering the port, only for berthing or shifting when in port. Ship's lines are used, and tug-boats are employed according to Pilot's advice.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Calderon	270	4
Maura	55.6	6.5
Albareda	267	7.25 to 9.5
Almirante	107.2	9.5
Maliano (Sections 10 and 11)	229.1	10.5'
Maliano (Section 9)	129	7
Maliano (Section 8)	106.4	5
Maliano (Sections 1 – 7)	710	8
North Edge	538	9.5
RAOS (No. 1)	300	13.0
RAOS (No. 2)	208	13.0
Campsa Quays	280	8.5
Calatrava Quay	—	11.5

All depths of water quoted above correspond to LWOST and 13 ft. – 14 ft. should be added for depths at HWOST. Bottom is generally soft.

Calatrava Wharf: For discharge of chemicals. Depth alongside 34 ft. with overall length limitation of 980 ft. Up River, at Astillero, beyond the harbour area, there is one spout called Orconera Tip for loading iron ore. Vessels up to 260 ft. – 270 ft. length are allowed with a maximum draft, fully loaded, of 19 ft. Loaded vessels can only sail at high water. A modern installation for dismantling and scrapping vessels is operating up river, on the way to Astillero.

CARGO HANDLING FACILITIES: There are berths for handling bulk cargoes, grain, ore, coal, etc. There are also berths for handling bulk liquids, chemicals. Berth available for Roll-on/Roll-off traffic.

STEVEDORES: It is very important that Masters send advance notice regarding vessel's ETA. With this notice, Agents can inform Shippers or Receivers' stevedores accordingly. Official working hours of port, are: Monday/Saturday: 0800 – 1200 hrs.; 1400 – 1800 hrs.

MEDICAL: Any kind of medical services can be arranged.

TANKERS: "Campsa" (Spanish State Monopoly): Installation is served by two identical concrete wharves situated in Maliano Basin, berthing space of which is 500 ft. with a depth alongside of 29 ft.

DENSITY: Sea water.

FRESH WATER: Always available. Supply is performed by tug-boats and from shore connections at various quays.

FUEL: Ordinary fuel, diesel and gas oil are available at "Campsa". Depth alongside 19 ft. – 32 ft.

Advisable that shipowners stem bunkers through their own Contractors with (at least) 48 hours' notice. Delivery can be performed either by tank-trucks or at bunkering pier.

GANGWAY/DECK WATCHMEN: Not compulsory but available upon request.

OPENING/CLOSING HATCHES: Effected normally by crew, except in liner vessels, which is contracted by stevedores.

CERTIFICATES: Vessels should have the usual documents on board, but only the safety Wireless, Safety Equipment and Derat Certificates are required by Authorities.

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.

CARGO GEAR: Shore cranes are usually employed in loading/discharging operations.

CRANES:

Maura Quay	1 fixed 30 ton crane (electric)	
Albareda Quay	3 electric cranes	3 tons
Maliano Quay (Sections 10 & 11)	6 " "	6 tons
Maliano Quay (Sections 1 to 7)	14 " "	3 – 6 tons
North Edge Quay	4 " "	6 tons
	5 " "	12 tons
RAOS	8 " "	16 tons

Also movable motor cranes, mechanical shovels and similar, available.

IDENTIFICATION CARDS: Not required.

CONSULS:

Portugal
Sweden

Note. Acting as Consul of those countries with no Consular Representation: Valentin Lavin del Noval, Dominican Rep. Consul.

REPAIRS: Good repair facilities with various shipyards at port. All types of deck, engine, etc., repairs are possible.

DRY DOCKS: Three dry docks, one of which is within the harbour area and the other at Astillero (beyond the harbour area). Dimensions are:

Extreme length	405 ft.	434 ft.	722 ft.
Breadth at entrance	58 ft.	54 ft.	105 ft.
Depth on sill (high water)	23.7 ft.	20 ft.	38 ft.

REPATRIATION: No difficulties.

AIRPORT: About 4 miles from town. There are regular services with Madrid and Barcelona. Also charter flights to U.K. and other European countries.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS:

POLICE/AMBULANCE/FIRE: Police 222543; Civil Security Guards 232004; Hospital, Casa de Socorro 221214, Valdecilla 231400; Fire 231662; Ambulance Cruz Roja 270235.

TELEPHONES: In very special instances, can be arranged.

SERVICES: Available for tank cleaning, washings, compass adjusting, hull cleaning whilst floating, radio installation repairs, etc.

SHORE LEAVE: Crew allowed ashore at any time.

DEVELOPMENTS: New Ro/Ro and container terminal under construction.

Extensions: The entrance channel has been widened to 200 m. and has some depths between 9.5 m. and 10.5 m. at LWOST.

AUTHORITY: Junta del Puerto-Santander, Paseo de Pereda 33-1° Santander, Spain. *Tel:* 42-21 20 58. *Telex:* 35.936 Jpsr E. *Contact:* Rafael Martinez Diez-Canedo, Director del Puerto.

AGENT: Modesto Pineiro y Cia., P.O.Box 14, Paseo de Pereda 27, Santander. Telegrams: "Pineiro-Santander". Tel: 220000. Telex: 35832. (P & I Club representatives, Shipbrokers, stevedores and chartering Agents, Lloyd's Sub-agents, Brittany Ferries. British, Greek, Netherlands and Peruvian Consulates.)

SANT FELIU DE GUIXOLS (Gerona): 41.46 N. 03.01 E. (See Plan Book)

PILOTAGE: Pilotage is compulsory. Service between 0700 to 2400 hrs. Tel: 320910 or call Barcelona Radio or Bagur Radio (VHF).

ANCHORAGE: Vessels arriving after midnight or due to port congestion are anchored outside the breakwater.

MAX. SIZE: The maximum advisable draft for berthing is 22 ft. and up to 115 m. length.

TUGS: No tugs available.

BERTHING: Due to the fact that a few vessels can work at the same time, it is advisable to know as soon as possible the ETA for berthing arrangements.

Commercial Wharf	Length 108 m.	Depth 22 ft.
Breakwater	Length 116 m.	Depth 22 ft.

A pier for coasting vessels with a maximum draft of 18 ft.

MEDICAL: Any kind of medical services can be obtained in Sant Feliu or Gerona hospital.

FRESH WATER: By means of hoses from the pier.

FUEL: Can be supplied in small quantities.

CARGO GEAR: Commercial pier is served by an electric crane able to lift up to 6 tons. Normally vessel's derricks are used.

AUTHORITY: Ayudantia Militar de Marina, Raig 6, Sant Feliu de Guixols (Gerona), Spain. *Tel:* 972-320967. *Contact:* Harbour Master.

SEVILLE: 37.25 N. 06.00 W. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
2 Cargo Manifest, including cargo for discharge and in transit.
Declaration of Health.
2 Lists of Provisions and Stores.
2 Copies of Bills of Lading.

If vessel carries over 6 kilos tobacco per man the excess to be declared in a separate manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

PILOTAGE: *At the Bar:* Vessels may commence to enter and leave the river 1.5 hours after low water. Bar Pilots are stationed at Chipiona and come out to board vessels when requested, 2 miles North of Chipiona Lighthouse.

Pilot motor launches about 9 m. long, painted white with black "P" on sides. They carry regulation lights and signals day and night.

River Pilots: Vessels should radio their ETA at least 24 hours in advance to "Practicos Sevilla". River Pilots are stationed at the pier at Bonanza, Lat. 36° 48′ N., Long. 06° 20′ W. Sound signal to call Pilot is 3 long blasts. Pilot boards from white-painted launch marked by black letter "P" and carrying regulation signals. Pilots require means of embarkation in accordance with International Conventions.

ANCHORAGE: At Bonanza, in depth of 20 ft. below chart datum.

RESTRICTIONS: Navigation in the River Guadalquivir is prohibited at night, both inward and outward for tankers or vessels with hazardous cargoes. Any vessel with a draft greater than 19 ft. may not leave at night.

Draft is controlled by height of tide and this should be ascertained by Owners or Agents in advance for the probable date of entry.

MAX. SIZE: Max. draft 21 ft. 6 in., max. beam 24.2 m. (The limitation in beam is for passing through the lock). Lock length 200 m., width 25 m. Tankers are required to have an additional 1 ft. keel clearance.

HEALTH: Pratique is obtained on arrival at Bonanza, on presentation of International Health Certificates.

RADIO: Tarifa Radio – EAC.

TUGS: Normally join vessel in the anteport. Ship's tow line is used.

BRIDGES: Vessels berthing at Delicias Quay must pass through the Alfonso XIII drawbridge. May be opened at any time of day.

STEVEDORES: 24 hours' notice should be given by Agents and confirmed 12 hours before vessels arrival.

MEDICAL: All medical and hospital facilities available.

TANKERS: There are 2 berths, depth alongside 20 ft.

At Quay No. 2, hoses 8 in. diameter.
At Quay No. 3, hoses 8 in. and 10 in. diameter.

DENSITY: Fresh water. The tide has no influence at Seville.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Not considered necessary. All quays are watched by the Guardia Civil.

OPENING/CLOSING HATCHES: Performed by ship's crew.

CUSTOMS ALLOWANCES: 6 kilos tobacco per crew man, and 2 kilos per passenger; this includes tobacco in bonded stores. No restriction on wines/spirits.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented at Seville:

Belgium
Bolivia
Colombia
Cuba
Chile
Denmark
Dominican Republic
Germany, F.R.
Great Britain
Greece
Honduras
Italy
Liberia
Nicaragua
Netherlands
Panama
Peru
Portugal
Sweden
United States
Uruguay
Venezuela

REPAIRS: All types of repairs can be effected.

DRY DOCK: Astilleros Espanoles S.A. have 1 dock, length 149 m., breadth 25 m.

REPATRIATION: All facilities available.

AIRPORT: Situated 12 km. away, regular daily flights to Madrid, Barcelona, other parts of Spain. Some transatlantic flights.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: (1982). 1st January; 6th January; 19th March; Maundy Thursday; Good Friday; 1st May; Ascension Day; Corpus Christi; 29th June; 25th July; 15th August; 11th and 12th October; 1st November; 8th December; 25th December. All holidays may be worked with overtime.
POLICE/AMBULANCE/FIRE: Police: 091; Fire Brigade: 232123; Ambulance: 231945.
TELEPHONES: Can be installed on board if requested 10 days in advance.
SHORE LEAVE: No restrictions.
SERVICES: Fresh provisions and stores available, refuse collection, correction of compasses.
AUTHORITY: Comandancia Militar de Marina de Sevilla, Avenida de Molini, Sevilla, Spain. *Contact:* Comandante, Militar de Marina.

SOLLER, Majorca: 39.47 N. 02.46 E.

DOCUMENTS: See "Bilbao".
PILOTAGE: None available. 2 intermittent lights situated on the Mola indicate the Entry Channel.
MAX. SIZE: Advisable length and draft 60 m. and 4.50 m. respectively.
TUGS: None available.
MEDICAL: It is advisable to give advance notice if medical attention is required. There are no hospitals. Medical service is available 5 km. from the port.
FRESH WATER: Not available at the quay.
FUEL: None available. If required the order should be placed to Campsa through the Agent.
GANGWAY/DECK WATCHMEN: Crew do this operation.
OPENING/CLOSING HATCHES: Crew.
IDENTIFICATION CARDS: It is advisable to have these available.
CONSULS: None.
REPAIRS: No facilities exist.
AIRPORT: The airport is situated 40 km. away; the island is well connected with the Peninsula (mainland) and with foreign airports.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
SHORE LEAVE: Allowed.
AUTHORITY: Jefe Encargo del Despacho de Buques, Oficianas del Destacamento de la Comandancia Militar de Marina en Soller.

TARRAGONA: 41.05 N. 01.14 E. (See Plan Book)

DOCUMENTS: Cargo Manifest of all goods in ship, stating any foreign port from where those goods come. This procedure should always be done in the first Spanish port.

In first Spanish port ship should produce an Itinerary Manifest; and those ships which carry goods to discharge should produce this Manifest in those ports in which they will discharge the goods.

Supplies Certificate for those ships not having any goods to discharge in any Spanish port, or who have previously been in other Spanish port.

Register of the Supplies and Equipment in ship.

Register of the Crew's Effects, if the ship comes directly from a foreign port.

Passenger List (if there are passengers). Negative Passenger List (if there are no passengers).

Crew List.

Health Certificate, if the ship comes from another Spanish port.

Gas Free Certificate for tankers.

PILOTAGE: Every ship upon arrival should note following signals: During day, hoist flag letter "G" of International Signals Code. Sound signal, three long whistles. During the night, flash signal letter "G" of code or the letters "PT". Cable Address: Practicos Puerto Tarragona. VHF station Channels 16, 14, 12 and 9.

Pilot boats: Black colour with letter "P" painted in white on both sides. Lights: according to International Regulations. Pilotage area begins at a max. distance of 2 miles from port entrance. Ships awaiting for Pilot anchor in the Rada and East of the lighthouse. If weather does not allow, Pilot will meet ship at port entrance. Ladder for Pilot to be placed at leeward side.

ANCHORAGES: The West limit is marked by imaginary line running N./S. at the end of the breakwater. East limit is marked by imaginary line between the Paseo de Sta. Clara with the cathedral tower. Depths in Rada are 16 m. and 30 m.; quite good for anchoring (mud and sand).
APPROACHES: *Entrance Mouth:* Width 350 m., depth 15.0 m., max. current 2 knots.
Entrance Channel: Width 250 m., length 1,050 m., depth 15 m., bottom – gravel and sand.
RESTRICTIONS: There are restrictions regarding berthing of Tankers in the Pantalan and Monobuoy of EMP during night hours, whatever their tonnage.
MAX. SIZE: LOA 280 m., draft 44 ft.
Largest Vessels: Bulk Carriers: Length 276 m., draft 12.19 m. and length 280 m., draft 13.31 m.
Tankers: Length 371 m., draft 17.50 m.
LPG Vessels: LOA 220 m., draft 40 ft.

HEALTH: Hospitals and clinics available. There is a doctor service in health department of port, which is authorised to vaccinate, and give certificates against yellow fever authorised by the OMS.
RADIO: No radio station.
VHF: Pilot on VHF Channel 16.
TUGS: 8 tugs, 825 h.p. – 2,610 h.p. Tugs join vessel outside port. Ship's lines are used.

BERTHING: *Port Authority Facilities:*

Mobile Cranes:
3×1 – 6 tons (Port Authority).
1×1 – 6 tons, 1×2.3 – 30 tons (Astilleros Tarragona).
Floating Crane: 1×65 tons.

SPECIALISED CARGO HANDLING FACILITIES:

Location	*Owner*	*Characteristics*
Muelle Aragon	Silos de Tarragona, S.A.	Cereal silos of 44,000 tons capacity, with 2 automatic lifts for grain of 400 t.p.h. and pneumatic scales of 5 tons for weight control, 2 elevators for filling and recirculation of 400 t.p.h., 2 elevators at the entrance and 2 at the exit, all 4 producing 300 t.p.h. each. A grain conveyor belt from the berth to the silos of 400 t.p.h.
	Berge y Cia. S.A.	Polyvalent warehouse for cereals and other uses of 35,000-ton capacity with 4 mechanical lifts for grains with with a capacity of 250 t.p.h. each, 2 conveyor belts of 250 t.p.h. and another of 500 t.p.h.
Muelle Costa	La Vinicola Iberica, S.A.	Pipe of 15 cm. diameter with 3 outlets for the loading of wine in bulk to tankers.
Muelle Reus	EDEGRASA	3 outlets with 4 pipes for the loading and unloading of chemical products onto or from tankers with capacity of 20,758 cu.m. of storage at 150 t.p.h.
Muelle Reus	Cia. Industrial de Abastecimientos, S.A.	Port silos for grain of 30,700 tons capacity, with 3 elevators for filling and recirculation and 2 conveyor belts for filling and unloading of 300 t.p.h. 1 pneumatic unloader of grain from ship to silo of 150 t.p.h. 2 conveyor belts for grain from berth to silos of 300 t.p.h. each.
Muelle Reus	CAMPSA	2×10 in. pipe-lines for the loading and unloading of liquid combustibles producing 250 t.p.h.
Muelle Reus	Terminales Quimicos, S.A.	Vegetable oil discharge. 23 tanks with 13,963 cu.m. capacity. 3 pipes for loading/discharging vessels.
Muelle Rioja	CAMPSA	3×10 in. pipe-lines and 1×12 in. for the loading and unloading of liquid combustibles producing 250 – 350 t.p.h.

Muelle Castilla	Cia. Industrial de Abastecimiento, S.A.	Port silos for grain of 40,000 tons capacity with an automated elevator of 800 t.p.h. and a 10 ton receiving hopper scale, 2 elevators for filling and recirculation and 2 conveyor belts for filling and unloading of 800 t.p.h. each. A pneumatic unloader of 450 t.p.h. for grain from ship to silo. A conveyor belt from berth to silos of 800 t.p.h.
Atraque Inflamables	Butano, S.A.	2×8 in. pipe-lines and 1×10 in. for the loading and unloading of LPG with an average of 100 t.p.h. in normal unloading conditions (they do not allow an operational temperature of less than 4°).
Atraque No. 1 de Inflamables	Terminales Quimicos, S.A.	4 outlets with 4 pipes of 6 in.
Puerto Exterior	Asfaltos Espanoles, S.A.	Dolphin 1,300 m. long with 3 moorings for ships of 7,500, 20,000 and 50,000 d.w.t.
Puerto Exterior	ENPETROL	Dolphin 1,489 m. long with 3 moorings for ships of 11,000, 35,000 and 100,000 d.w.t. Monobuoy for loading and unloading of ships up to 250,000 d.w.t. in normal conditions and exceptionally up to 325,000 d.w.t. and 40 m. draft. 2 floating hoses of 300 m. radius of 24 in. whose connection with the ships is 16 in. ASA or 150 lb. and a capacity of 12,500 t.p.h.

CARGO HANDLING EQUIPMENT: (Private).
Fork Lift Trucks: 2×10 tonnes, 7×2.5/6 tonnes, 21×3/7 tonnes, 13×2.5/12 tonnes, 19×2/4 tonnes, 8×4/7 tonnes, 5×3/5 tonnes, 2×40 tonnes, 6×4/6 tonnes, 1×2.5 tonnes, 1×1.5 tonnes and 1×3 tonnes.
Fork Lifts with Spreaders for Containers: 1×40 tonnes, 1×25/32 tonnes, 1×25/30 tonnes.
Shovel Loaders: 53×0.5 tonnes – 11 tonnes.
Grabs: 13×6.5 cu.m. – 21 cu.m., 9×0.5 tonnes – 60 tonnes.
Hoppers for Trucks: 19×8 tonnes – 50 tonnes.
Conveyor Belts: 23×100 tonnes per hour – 600 tonnes per hour for bulk cargo. 7 belts also available for bags.

GANGWAY/DECK WATCHMEN: Not compulsory, if Master requires them he is provided with specialised staff for this purpose.

OPENING/CLOSING HATCHES: Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.

TANKERS:

Berth	*Length* (m.)	*Depth* (m.)	*Use*
A.S.E.S.A.			
Platform 50	260	14.4	Petroleum
Platform 20	150	10.9	Petroleum
Platform 6	130	9.0	Petroleum (also see "LPG")

ENPETROL:

There are 4 berths with the following identification and characteristics:

Berth	*Max. Draft*	*d.w.t.*	*LOA*
80 S	14.47 m. (47.59 ft.)	100,000	149 m. – 269 m.
35 S	11.40 m. (37.50 ft.)	40,000	85 m. – 210 m.
35 T	11.40 m. (37.50 ft.)	40,000	85 m. – 210 m.
11 S	8.05 m. (26.48 ft.)	11,000	25 m. – 140 m.

Mooring and unmooring manoeuvres are performed with the help of tugs.

No engine repair is allowed that could prevent the immediate departure of the tanker. The International Safety Regulations are to be observed.

Monobuoy:

SBM type, with a diameter of 11 m. Anchored with 6 chains, 42 m. depth. Connected to the Monobuoy are 2 floating hoses of 24 in. diameter, 287 m. length. Vessels sailing in the proximity should give a wide berth.

The Monobuoy geographic location:
Lat. 41° 04.1′ N., Long. 1° 13.3′ E.

Day marking of Monobuoy: Yellow "X" shaped figure. Night marking by yellow light visible all round, with 4 flashes every 20 secs. range 5 miles.

Pipe-lines: There are 2 pipes of 8 in. diameter and 1 of 10 in. diameter from the CAMPSA plant to the Reus and Rioja Quays, the former having a capacity of 250 t.p.h., the latter 350 t.p.h.

Between the Butano, S.A. Plant and the Inflammables Berth there are 2 pipe-lines of 8 in. and 1 of 10 in. for the unloading of LPG with a capacity of 250 t.p.h. The characteristics of these pipe-lines do not permit an operational temperature of less than 4°.

There is a pipe of 15 cm. diameter and a loading capacity of 100 t.p.h. between Vinicola Iberica, S.A. and the Costa Quay.

On the jetty of Asfaltos Espanoles, S.A. (ASESA) there are a total of 24 pipes; 2 of 20 in. diameter for crude and naphtha with a capacity of 12,000 t.p.h. and 1,000 t.p.h. respectively; 1 of 16 in. for ballast at 1,000 t.p.h.; 6 of 12 in. for fuel oil (2), naphtha (2), asphalt (1) and water (1) for fire-fighting with a capacity of 600 t.p.h.; 3 of 10 in. for diesel, petrol and ethylene with capacities of 500, 600 and 250 t.p.h. respectively; 1 of 8 in. for propylene at 120 t.p.h.; 7 of 6 in. for different chemical products with a capacity of 100 t.p.h.; and 1 of 4 in., 1 of 3 in. and 2 of 2 in. for water supply and gas returns.

On the jetty of Empresa Nacional de Petroleo, S.A. (ENPETROL) there are a total of 12 pipes: 1 of 56 in. for crude with a capacity of 12,500 t.p.h.; 1 of 30 in. also for crude at 3,500 t.p.h.; 6 of 20 in. for fuel oil (2), petrol (2), diesel (1) and ballast (1) with capacities of 1,800, 1,400, 1,500 and 1,000 t.p.h. respectively; 2 of 18 in. for naphtha and propylene with a capacity of 400 t.p.h.; 1 of 16 in. for kerosene at 1,000 t.p.h. and 1 of 14 in. for fuel oil supplies with a capacity of 400 t.p.h.

Dirty Ballast:

At the installations of EMP there is a plant for the disposal and treatment of ballast with a maximum capacity of 30,000 cu.m. at a maximum flow of 2,000 cu.m.p.h. The plant is available to all tankers due to take cargo in the Pantalan.

Also see "Specialised Cargo Handling Facilities".

LPG:

Asesa Berth No. C-06:

Ship's Length	Minimum 75 m., maximum 125 m.
Draft	Maximum 27 ft.
Deadweight	Pier owners (Asesa) receive vessels up to 20,000 d.w.t. at this berth.
Allowed weather conditions for berthing	Max. wave height 70 cm. – 80 cm. Max. wind force 35 km./hr. – 40 km./hr.
Mooring Details:	See "Plan Book".

Products:

Ethylene:	
Storage capacity	9,000 tonnes (2 tanks)
Operating pressure storage tanks	10 gm. – 65 gm.
Design pressure storage tanks	70 gm.
Compressor capacity	4.6 tonnes per hour
Pipe-lines to berth	Liquid nominal diameter 10 in. Liquid nominal diameter 2 in. (for pre-cooling purposes only)
Lengths of pipe-lines	1,100 m.
Unloading facilities on dock	Chicksan type DCMA, nominal diameter 8 in., length 46 ft.
Unloading rate max.	400 tonnes per hour at –103°C (at higher temperatures unloading rate decreases fast).
Propylene Oxide:	
Storage capacity	1,600 tonnes (1 tank)
Operating pressure	0.3 – 0.45 kg./sq.m.
Design pressure	0.50 kg./sq.m.
Pipe-lines to berth	Liquid nominal diameter 8 in. Vapour nominal diameter 4 in.
Lengths of pipe-lines	1,100 m.
Unloading Facilities on dock	SS hoses nominal diameter 4 in. (for vapour)

FRESH WATER: Supply of fresh water by means of an underground pipe in all the commercial quays of the port. Rate 5 t.p.h. – 15 t.p.h. per connection. Max. rate per berth, 45 t.p.h. at Muelle Aragon.

Ship's Master advises that water is very saline and it is not advisable to take any on board.

FUEL: Fuel oil, diesel oil and gas oil available. Request of this supply should be done with 24 hours' notice through the Commercial Agent of Campsa.

CUSTOMS ALLOWANCES: It is permitted to have a packet of tobacco per person per day. Unlimited allowance for national drinks.

IDENTIFICATION CARDS: Not required.

CONSULS: Various available.

REPAIRS: Small repairs available.

DRY DOCKS: None.

REPATRIATION: Facilities exist.

AIRPORT: The town of Reus 12 km. distance has a military airport that is also used for charter flights and regular flights to Madrid.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 20-11-29; Ambulance at local hospitals; Fire 20-19-50.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Cataluna Quay, when completed, will accept vessels of 175,000 d.w.t.

AUTHORITY: Junta del Puerto de Tarragona, Explanada Arranque Rompeolas, Tarragona, Spain. *Tel:* 226611 and 226709. *Telex:* 56520 JOPT-E. *Contact:* Jose Munne Costa, President. Joaquin Juan Dalac, Port Director.

TORREVIEJA: 37.58 N. 00.40 W.

PORT LIMITS: The port limits are considered to be at 1 mile distance from the lighthouse at the end of the Eastern Dock or breakwater.

DOCUMENTS:

4 Crew Lists.
4 Lists of Passengers.
10 Cargo Manifests, including cargo in transit, together with cargo for Alicante. Tobacco and cargo manifests visaed by the Spanish Consul in the port of origin. All the vessel's certificates, and where necessary in respect of the cargo which international regulations require.

PILOTAGE: The corporation does not have a radio station, however, it does have a walkie-talkie with a range of about 12 miles on VHF equipped with the following Channels: 6, 9, 11, 14, 16. The pilot craft is 10 m. overall length and is painted white, with the letter "P" painted in black on the sides. The pilot craft normally operates within a 1 mile radius of the white light of the breakwater lighthouse.

ANCHORAGE: The anchorage which is most recommended for vessels is 1 mile from the breakwater, with a sandy bottom and good holding ground.

MAX. SIZE: The port's maximum sizes are: Overall length 150 m. Max. draft on entry of 21 ft., if the vessel has to remain anchored awaiting a berth, and max. departure draft of 29 ft. 6 in.
HEALTH: Regulations as laid down by the International Foreign Health Requirements are enforced.
RADIO: Coastal station at Alicante; on MF with average range of 220 miles, and on VHF with a range of 40 miles.
TUGS: None available.
BERTHING: There is a berth in the Western Dock, with a length of 360 m., and a max. depth of 10 m. The loading operations are effected by shore equipment, provided that bulk salt is being loaded, or with the vessel's gear when bagged salt is being loaded.
CRANES: The port has no cranes, however, a mobile crane can be used for any weight which has to be loaded, the max. capacity of this crane is 7 tons.
STEVEDORES: There are no stevedoring gangs as the work force is employed by the Salt Plant. The only commodity loaded is salt and work is between 0600 hrs. and 2200 hrs.
MEDICAL: If a doctor is required by the Master, medical services can be furnished locally, it being necessary to transfer the patient to clinic in Alicante, if the case is serious.
TANKERS: No facilities available.
DENSITY: Average port density is 1030.
FRESH WATER: Available. Rate 5 t.p.h.
CUSTOMS ALLOWANCES: Each crew member is permitted to have 200 cigarettes and 1 bottle of spirits out of ship's bond.
REPATRIATION: Possible.
HOLIDAYS: Normally no work is done in the port on the following holidays: New Year (January 1st), Epiphany (January 6th), San Vicente (April 23rd), Maundy Thursday, Good Friday; Labour Day (May 1st); Festival of San Pedro (June 29th), Corpus Christi; Santiago Apostol (July 25th); Assumption Day, Festival of the Spanish speaking world (October 12th); All Saints (November 1st); Immaculate Conception (December 8th) and Christmas Day (December 25th).
AUTHORITY: Ayudante Militar de Marina.

VALENCIA: 39.27 N. 00.18 W. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another manifest covering transit cargo.
2 Store Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Wireless Certificate and Safety Equipment Certificate.
If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.
PILOTAGE: Pilotage is compulsory for this port. Day and night service. The pilot launch is painted black with a letter "P" painted in white on the sides.
ANCHORAGES: There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.
RESTRICTIONS: Entrance to the port faces S.S.E. and is 260 m. wide, with a low water depth of 15 m.
MAX. SIZE: The following size vessels have entered the port.

GRT	*LOA*	*Draft**
85,982 tons	294 m.	10.67 m.
44,688 tons	257 m.	13.30 m.

*Real draft on entry/departure.
HEALTH: If the vessels proceed directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.
If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.
RADIO: Coastal radio station with international frequencies 1580 kHz. ETA to be sent to Agent in advance.
TUGS: Not compulsory for entering port. 10 tugs available up to 1,800 h.p. Two tugs normally used for berthing and unberthing.
BERTHING: Quays operated by Port Authority:

Name	*Length (m.)*	*Depth (m.)*	*Use*
North Pier	174.00	9.00	Containers
Extension, Levante (1st. Section)	495.00	14.00	Containers
Extension, Levante (2nd Section)	200.00	9.00	Containers
Levante	928.00	9.00	General Cargo, Ro/Ro
Transversal of Outer Levante	123.00	7.00	Ro/Ro
Inner Levante Transversal	186.00	7.00	General Cargo, Ro/Ro
Customs Quay (1st. Section)	75.00	7.00	General Cargo
Customs Quay (2nd Section)	165.00	7.00	Containers
Grao Quay	240.00	7.00	Ro/Ro, General Cargo, Passengers
Estacion Quay (1st Section)	130.00	7.00	Ro/Ro, Passengers
Estacion Quay (2nd Section)	130.00	7.00	Ro/Ro, Passengers
Estacion Quay (3rd Section)	98.00	7.00	Ro/Ro, Passengers
Nazareth Quay	175.00	7.00	Ro/Ro
Inner Poniente Transversal	212.00	7.00	General Cargo, Ro/Ro
Transversal of Outer Poniente	206.00	7.00	General Cargo, Ro/Ro
Poniente Quay (1st Section)	186.00	9.00	General Cargo
Poniente Quay (2nd Section)	160.00	11.00	General Cargo, Logs
Turia Pier, Extension North, Section 1	62.00	9.00	Fluids with Special Installation
Turia Pier, Extension North, Section 2	219.00	11.00	General Cargo, Logs
Turia Pier Head	151.00	11.00	Solid Bulks with Special Installation
Turia Pier, Extension South, Section 1	166.00	9.00	Petroleum Products and General Cargo
Turia Pier, Extension South, Section 2	219.00	11.00	Petroleum Products and General Cargo
Turia Quay	404.00	9.00	Bulks and General Cargo
South Quay	600.00	14.00	Bulks, General Cargo, Logs

CARGO HANDLING FACILITIES: Cereals, fertilisers, etc., in bulk are handled at Turia Pier and Turia Quay. Also at Turia Quay is a chemical-handling installation, depth alongside 9.0 m. Solid bulk cargoes, coal, etc., are handled at South Quay, depth alongside 14.00 m. Length 600 m. Loading rate for cement 800 t.p.h.
Containers: The container terminal is located in the extension of Levante Quay and has 2 quays: Extension Levante (length 495 m., depth 14 m.), and North Pier (length 174 m., depth 9.0 m.: this for feeder ships). At present this terminal has 3 container cranes of 30 tonnes for loading and discharging, and 187,000 sq.m. of storage area, provided with 6×30 ton transtainers for internal movement within the terminal.
Ro-Ro: There are 8 berths for Ro-Ro vessels situated in the Inner Basin and Transversal of Outer Levante (depth from 7.5 m. – 9.0 m.). 3 new Ro/Ro berths will soon be completed (depth from 8.0 m. – 11.0 m.). Close to Estacion Quay (1st Section) a new marine station for passengers has been placed into service.
CRANES: One floating crane, capacity 80 tons.
The Port Authority operate 55 gantry cranes with capacity of 3 tons to 30 tons and 3 mobile cranes. 12 privately owned shore cranes and 9 privately owned mobile cranes of 2 tons – 20 tons also available.
TANKERS: *Campsa:* One berth, length 210 m., depth 12.0 m.
Pipe-lines: The port areas equipped for oil traffic are connected to the C.A.M.P.S.A. plant by means of a network of 5 pipe-lines, starting at the Turia pier and quay, and ending at the plant itself. These pipe-lines are 1×10 in. diameter with a capacity of 300 cu.m./hr., and another of 8 in. and 250 cu.m./hr. for movement of fuel-oil.
2×8 in. diameter and 250 cu.m./hr. one for gas-oil and one for gasoline. There are also means of delivery of aviation paraffin by means of 1 pipe-line 6 in. diameter at the rate of 120 cu.m./hr. Also see "Berthing".
Two deballasting berths each length 200 m. Depths 7.50 m. and 9.00 m.
MEDICAL: All medical services available in the port and in the city.
REPAIRS: All types of hull and machinery repairs can be effected.
FLOATING DOCK: 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tonnes.
CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirit per man.
FRESH WATER: Available at all main berths at the rate of 30 t.p.h.
FUEL: Campsa can supply by pipelines at the Turia berths, at the rate of 100 t.p.h. – 280 t.p.h.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AIRPORT: Valencia Airport, 15 km. from the port.
CONSULS: The following countries are represented in Valencia:

Argentina
Belgium
Bolivia
Brazil
Colombia
Costa Rica
Chile
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Germany (F.R.)
Great Britain
Greece
Guatemala
Honduras
Iceland
Italy
Nicaragua
Norway
Netherlands
Panama
Portugal
Sweden
Switzerland
U.S.A.
Uruguay
Venezuela
Yugoslavia

POLICE/AMBULANCE/FIRE: Police 091; Fire 3730080; Ambulance 3606211, 3526750.
HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Saint Joseph Artisan (May 1st, full day); Labour Day (July 16th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); Holiday of the Virgin Mary (December 8th); Christmas Day (December 25th, full day).
GENERAL: *Shipbreaking:* There is one quay 200 m. length and 7.5 m. depth.
DEVELOPMENTS: The new area of almost 500,000 sq.m. has been completed. The current container terminal has 120,000 sq.m. to add to its surface and the other 380,000 sq.m. is being paved to be used as a storage zone for general cargo. The container terminal will soon receive a new crane with capacity of 30 tons. The building of the new quay in the Darsena Norte of 600 m. length, 16 m. draft and with a surface area of 150,000 sq.m. is in progress.
The container storage area of the current terminal will be increased with an 80,000 sq.m. expansion in the North area reclaimed from the sea.
AUTHORITY: Puerto Autonomo de Valencia, Muelle de la Aduana, S/n, Valencia, Spain. *Tel:* 96-323 09 91. *Telex:* 62510 Pave E. *Contact:* The General Manager.

VIGO: 42.14 N. 08.40 W. (See Plan Book)

DOCUMENTS:

Maritime Declaration of Health.
Crew List.
Passenger List.
Manifest of Cargo for the Port.
Manifest of Cargo in Transit.
Ship's Stores List.
Crew's Personal Effects List.
Ship's Particulars Declaration.

Note: Tobacco. In case the vessel carries more than 6 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In the absence of the Consul, said document will have to be visaed by an authority of the former port of clearance. Otherwise the vessel would be severely fined.

PILOTAGE: Pilotage at Vigo is compulsory and the service permanent day and night. Pilots board in auxiliary motor-boats with a letter "P" in white at both sides of the hull and a blue flag with the letter "P" in white, near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South Entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International Code signals used to call Pilot, or 4 long blasts on the whistle. Pilot station situated at Transatlanticos Pier 3. Pilot boats normally on station on a line connecting Borneira and Transatlanticos Pier.

ANCHORAGE: Several suitable anchorages in the Vigo Estuary, naturally sheltered, in depths of more than 35 m. The main anchorage opposite the port on the South side of the "Ria" has depths of 15 m. – 25 m.

MAX. SIZE: No limitation for length and beam, unlimited deep water approaches.

HEALTH: If vessels proceed directly to the berth, Pratique can be obtained immediately after berthing. Otherwise, at the anchorage on vessel's arrival. In case of suspected disease or fever on board, the Master must send a radio message to the Agent in order that they advise the Health Office.

RADIO: The nearest Radio Station is Vigo Radio, situated in the limits of Vigo Port.

TUGS: No tug-boats are required for entering the port. Only used for berthing ships from 120 m. length upwards according to Pilot's advice. At Vigo there are 5 modern tugs of 750 h.p., 950 h.p., 1,375 h.p., 1,600 h.p. and another of 5,000 h.p.. Tugs join vessel off the berth. Tug's line used at no extra charge.

BERTHING: The commercial piers to load or unload have a depth of up to 36 ft. and the Transatlantic Pier, depth of about 40 ft. at LW. The tide difference between HW and LW is about 3.5 m.

At Rande, in the Lower Harbour, there are very modern special loading installations for mineral ore, at an average rate of 2,000 t.p.h. The depth alongside this installation is 36 ft. LW.

Containers: Unloaded at the Arenal Quay with 15 tonne and 28 tonne cranes. Depth 10 m. at Spring low tides, and at the Transversal Quay with a 30 tonne crane.

Ro-Ro traffic: In addition to Bouzas Terminal mentioned below, there is one fixed ramp at the Commercial Quay, berthing length 250 m., depth 9.0 m. and 1 adjustable ramp at the Transatlantic Quay, berthing length, 200 m., depth 6.0 m.

Terminal de Transbordadores de Bouzas: 3 berths with Ro/Ro ramps, lengths 100 m., 150 m. and 200 m. Depths at LWS 8.0 m., 8.0 m. and 10.0 m. respectively. Storage area 60,000 sq.m.

Guixar Quay: 240 m. length with depth 12.0 m. and 550 m. with depth 16 m. Land area 22.0 Ha. The quay will be used for containers, bulk cargo and oil, when completed.

CRANES: 43 cranes with capacity up to 30 tonnes. 2 floating cranes with capacity up to 150 tonnes.

TANKERS: Tankers berth at a pier depth alongside 11 m. at LW. Tankers up to 300 m. length acceptable. Inner berth suitable for vessels of less than 100 m. length with a draft of 6 m. Discharge lines 12 in., 10 in. and 2×8 in. diameter.

STEVEDORES: It is very important that Masters send advance notice regarding the vessel's ETA. With this notice, Agents can inform Shipper's or Receivers' stevedores accordingly, so that they arrange operations properly. The official working hours of the port are Monday-Friday 0830 – 1230 hrs., 1400 – 1800 hrs. Saturday 0830 – 1230 hrs.

MEDICAL: Doctors and hospital facilities available. Advance notice preferred in urgent cases.

DENSITY: Average 1026.

FRESH WATER: Available from the quays at the rate of 50 – 80 t.p.h. Can also be supplied by tugs at 500 t.p.h.

FUEL: Available from the Oil Pier or delivered by barge. 24 hours' notice of requirements recommended.

GANGWAY/DECK WATCHMEN: Available from shore if required.

OPENING/CLOSING HATCHES: Opening may be done by crew to avoid delays. Closing hatches usually performed by crew.

CUSTOMS ALLOWANCES: 200 – 250 cigarettes or 6 kilos of tobacco and 2 bottles spirits may be held out of bond for each person. Wine not restricted.

IDENTIFICATION CARDS: Shore passes are provided by the Agent.

CONSULS: Most countries have consulates at Vigo.

REPAIRS: All types of deck and engine repairs are possible.

SURVEYORS: Lloyd's Register.

FLOATING DOCKS: One floating dock available: length 128 m., breadth 22.40 m.

REPATRIATION: Crew changes and repatriation can be arranged without difficulty.

AIRPORT: Local airport, situated 8 km. from the port, has at least 1 daily flight to Madrid. International Airport of Santiago de Compostela is 100 km. away.

TIME: GMT plus 1 hour in Winter. Summertime from March to September.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Good Thursday; Good Friday; 28th March (local holiday, Reconquest Day); 1st May (Labour Day); Corpus Christi; 25th July (St. James' Day); 15th August; 16th August (Local); 12th October; 8th December (Immaculate Conception); 25th December.

POLICE/FIRE/AMBULANCE: Police Tel: 21.00.00. Fire Tel: 21.20.00. Ambulance Tel: 21.25.09.

TELEPHONES: No arrangement for connecting on board.

SHORE LEAVE: Allowed without restriction.

STORING: See "Prelims" page viii.

NOTES

Please also advise Shipping Guides Ltd.

Sri Lanka

COLOMBO: 06.56 N. 79.50 E. (See Plan Book)

DOCUMENTS:
- 5 each of Crew and Passenger Lists.
- 8 Manifests.
- 1 Arrival Report for Pilot.
- 1 Master's Declaration for Immigration, and same for Police.
- 2 Private Property Lists of Officers and Crew for Customs.
- 2 copies of Preliminary Report by Master for Customs.
- 1 Maritime Declaration of Health for Port Health Officer.
- 1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the "G" flag by day or 2 red lights at night. They can, in addition, flash the pilot station or use VHF Channel 16. The telegraphic address of pilot station is "Pilot Station Sri Lanka Ports Authority Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the "H" flag by day or red and white lights by night according to the international code. The Pilot boards within an area of about 1 mile of the harbour entrance. Advice of where to anchor can be obtained from the Pilot by VHF or signal light.

ANCHORAGES: The anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles. This anchorage is to be used on instructions from pilot station.

All vessels arriving have to anchor South of Panadura (Lat. 6° 43′ N.) or off Negombo until instructed to proceed to the anchorage off harbour.

RESTRICTIONS: Entry may take place at all hours of the day and night but it is unusual for the Pilot to board between midnight and 0400 hrs.

MAX. SIZE: For entering harbour, max. draft 36 ft. and a length of 800 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' max. dimensions for berthing alongside: length 750 ft., draft 34 ft.

HEALTH: Vessel entering port must fly the "Q" flag until boarded by the Port Health Officer to grant Pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port — no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming Pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double "Q" flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

VHF: The pilot station is presently available on VHF Channel 16 and the Port (Cargo) Corporation on VHF Channels 8, 10, 11, 13 and 14.

TUGS: Tugs normally join the vessel at the harbour mouth and use ship's lines.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft is most advisable. See "Developments".

CRANES: 3×30 ton gantry cranes for containers at Queen Elizabeth Quay.

60 fork lift trucks 2 tons – 33 tons capacity.

STEVEDORES: The stevedores at Colombo are the Port (Cargo) Corporation, a nationalised concern having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible. Gangs for day shift which commences at 0730 hrs. must be ordered by 0700 hrs. and gangs for the evening shift, commencing at 1630 hrs., by 1600 hrs. This excludes the Poya Day on which only the day shift is worked, and gangs must be ordered by 0930 hrs. on the previous day.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or the Government hospitals. The following inoculations are required: cholera; yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: There are 3 tanker berths, 1 for importing crude oil suitable for tankers of 750 ft. length, max. draft 34 ft. One berth for white oil tankers with max. draft 33 ft. One berth for fuel oil imports for vessels with a max. draft of 31 ft., and this same berth is used for exports when permissible draft is 33 ft.

The diameter of discharge lines;
Crude oil, 24 in., capacity 1,000 t.p.h.
White oil, 10 in., capacity 250 t.p.h.
Gasoline, 10 in., capacity 170 t.p.h.
Furnace oil, 14 in., capacity 500 t.p.h.
Naphtha, 12.75 in., capacity 450 t.p.h.

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge. The rate of delivery is approx. 40 t.p.h. The water is of good quality.

FUEL: Furnace diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately.

4 barges available, 450 tons, 650 tons and 1,000 tons. Fuel also available by pipe-line if berth (max. draft 34 ft.) available.

Note: Vessels may be limited to a maximum of 400 tons of fuel oil, also bunkers may only be made available to vessels loading or discharging cargo.

GANGWAY/DECK WATCHMEN: Watchmen are available and are to be recommended unless members of the crew are available to provide this service.

OPENING/CLOSING HATCHES: This work is normally carried out by the stevedores except in the case of McGregor or similar hatch covers which they will not handle.

CERTIFICATES: Register showing vessel's name, port of registry, gross and net tonnages and owner. Safety Equipment Certificates quadrennial and annual, Ship's Articles (British) and clearance from previous port and Derat Certificate.

CUSTOMS ALLOWANCES: Cigarettes 25 per man per day. Tobacco 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits 0.25 bottle per man per day. Wine 1 bottle per man per day. Beer 2 bottles per man per day.

IDENTIFICATION CARDS: These are not essential but the crew is expected to carry some form of identification with a photograph on it when they leave the vessel.

CONSULS:

Belgium

STORING: See "Prelims" page viii.
1. Yes, able store both by barge and truck.
2. Yes, vessel could store from barges during both loading and discharging.
3. Trucks could proceed alongside vessel.
4. Yes, fork lift trucks could be used.
5. Any operation could be carried out with prior approval of Customs, under Customs supervision.
6. No. Port Stevedoring labour has to be made use of. However, local riggers can be employed by obtaining special permission from the Chief Operations Manager of the Sri Lanka Ports Authority.

GENERAL: Ships should not discharge oil within territorial waters, dispose any waste into harbour or on to quays, immobilise main engines without prior permission, use radio for transmission in harbour. Ships should hoist national flag during daylight hours.

SHORE LEAVE: There is no restriction on crew members being allowed ashore but advised to carry passport or other identification.

DELAYS: Delays for vessels working cargo are seldom over 24 hours. However, it is very unusual for vessels calling for bunkers, fresh water, stores, etc., to be delayed for more than a few hours.

DEVELOPMENTS: One new alongside dry-cargo berth length 1,000 ft. with a draft of 36 ft. completed. Container berth gantry cranes (2×35 ton) to be installed mid-1985 and present draft of 36 ft. to be increased to 39 ft. at this berth.

Drydock, capacity 90,000 d.w.t., under construction, completion mid-1985.

3 tugs, 1×365 h.p. and 2×550 h.p. under construction.

A second container berth to be constructed, completion mid-1986.

SBM to be installed 10 km. offshore.

AUTHORITY: Sri Lanka Ports Authority, No. 19 Church Street, P.O.Box 595, Colombo 1. *Telex:* 21805 Ports Ce. *Contact:* Mr. W. Ameresekera – Chairman, Sri Lanka Ports Authority – *Tel:* 25559.

Mr. C. D. Chinnakoon – Chief Operations Manager, *Tel:* 25049.

Capt. G. O. Henricus – Harbour Master. *Tel:* 21079.

Capt. S. Chinniah – Deputy Harbour Master. *Tel:* 22674.

GALLE: 06.01 N. 80.14 E.

PORT LIMITS: To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league from the line between these points.

DOCUMENTS: Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hours prior arrival via Colombo Radio. Vessels telegraph direct to Master Attendant, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Master Attendant's Office and Pilot will board about 0.25 mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about 0.5 mile from bell buoy.

RESTRICTIONS: Vessels should not proceed North of bell buoy. Entry prohibited after 1700 hrs. and may be delayed by bad weather. Generally a wind force of over 25 knots and a swell of over 4 ft. delays entry.

MAX. SIZE: At present only 1 stream berth available for vessels of length 475 ft., max. draft 23 ft. in N.E. monsoon and length 450 ft., max. draft 21 ft. in S.W. monsoon.

Two alongside berths available for vessels up to 540 ft. length and 26 ft. draft. 750 ft. of quay space available.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. Port Health Officer also requires 2 Crew Lists, synopsis of Vaccination Certificates, Derat Certificate and examines Certificate of Vaccination.

RADIO: Colombo Radio.

TUGS: At present only 1 tug of 250 h.p. available throughout year. If sufficient notice given (over 24 hours) an additional tug could be sent from Colombo (only available during N.E. monsoon). Tug meets vessel at berth, tug's lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.

BERTHING: Vessel berthing in stream lies to both anchors and picks up 4 to 6 mooring lines from buoys aft. To pick up mooring lines, vessel should have ready at stern 2 messenger wires of 2.5 in. diameter and 60 fathoms length.

STEVEDORES: All stevedoring carried out by Government Corporation. Gangs, lighters etc. are all arranged by Port (Cargo) Corporation. 16 lighters of approx. 15 d.w.t. capacity available for working vessels in stream berth.

MEDICAL: Vessels arriving in Galle and requiring medical attention should cable Agent and "Port Health – Galle" at least 12 hours in advance.

DENSITY: 1025.

FRESH WATER: In cases of emergency up to 20 tons fresh water could be supplied daily in stream in 400 gallon tanks conveyed by lighters. Alongside main quay up to 50 tons per night could be supplied by Bowser.

FUEL: Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days' prior notice required.

GANGWAY/DECK WATCHMEN: Ceylon Police Station. Two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.

OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.

CUSTOMS ALLOWANCES: Present allowance 200 cigarettes per week, 2 bottles beer per day. Others proportionately.

CONSULS: All Consular Officers in Colombo, 72 miles away, 2 hours by train, 2.5 hours by road.

REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.

REPATRIATION: Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.

AIRPORT: Colombo.

TIME: Standard Time GMT plus 5.5 hours.

HOLIDAYS: Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Good Friday, 1st May; Wesak Full Moon in May; 22nd May; 26th September; Christmas Day.

POLICE/FIRE/AMBULANCE: Harbour Police 3222; Ambulance 2261. No fire brigade available.

TELEPHONES: No telephones available aboard.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: Master Attendant, Master Attendant's Office.

KANKESANTURAI: 09.49 N. 80.03 E.

SHIPMASTER'S REPORT: May 1979.

LOCATION: Kankesanturai (KKS) is situated on the North coast of Sri Lanka in position Lat. 9° 48′ 57.5″ N., Long. 80° 02′ 41.5″ E.

DOCUMENTS: See "Colombo".

APPROACHES: Kankesanturai cannot be approached directly from sea but is approached via the Pedro Channel. The area seaward of Pedro Channel is very shallow and abounding in reefs.

Approaches to Pedro Channel: The East coast is low lying and sandy with only palm trees. The landmarks for making Pedro Channel are (a) Mullaittivll Light and (b) an obelisk situated in position Lat. 9° 35′ N., Long. 80° 27.5′ E. Mullaittivll Light was not working and the obelisk which is 100 ft. high can hardly be distinguished because it is surrounded by vegetation. The best approach is to steam on a course of 280° (T) heading straight for the obelisk. (Note: Radar distances etc., could not be observed as the vessel's radar was out of order). This area is covered by BA Chart Nos. 2197, 2031 and 68A. These charts are not to be fully relied upon as the charts last large correction etc., was in 1947. This vessel did not have a working radar, hence it was decided to lower the boat and sound the intended track ahead. The track sounded was followed until the obelisk was ahead of the track and visible, which was in this case at about 5 miles. Once the vessel enters Pedro Channel it has to proceed on a course parallel to the coast. After altering course in a NW'ly direction the obelisk which is the only mark in the area is soon covered by vegetation and not visible. The next landmark being the Point Pedro Lighthouse which is 25 miles away to the North. The objects marked on the chart like churches, buildings etc., cannot be relied upon at all as they are numerous in number.

Depths in Pedro Channel: As marked on the chart the depth in Pedro Channel varies from 6.5 to 9 fathoms. During this vessel's transit, it was suspected in patches to be less and at certain points, the boat was again lowered and soundings of 28 ft. were obtained.

Approaches to KKS: After passing Point Pedro Light course was altered to West keeping about 3 miles off the land and dangers. "KKS" can be observed from quite a distance because of chimneys of a cement factory. The "KKS" lighthouse could also be visually observed at a distance of about 8 miles. When "KKS" lighthouse bore South, distance 2.5 miles, the vessel was stopped and again the boat was lowered to sound the anchorage area and approaches. Depths of 30 ft. to 36 ft. were found just 0.5 miles distance from the land. The anchorage was approached and this vessel anchored with "KKS" light distance 0.5 miles. Four shackles were used and throughout the stay the vessel held fast.

After anchoring soundings were taken all round the vessel and the least depth obtained was 31 ft. at low water. There is hardly any tide, the maximum difference being about 2 ft. The vessel usually lies in an East-West direction and when swinging around usually does so via North. Only on one occasion throughout the stay did she swing via the South.

RADIO: Communication with "KKS" from even Colombo (telephone) was very difficult, sometimes delays over 4 to 5 hours were experienced. "KKS" has no telex communication. The best method is to keep the vessel's radio station open and communicate via Madras Radio.

CARGO OPERATIONS: *Port of "KKS" and discharging:* This is a anchorage only port which is open from March to October. Cargo is bagged on board and discharged into lighters. The lighters are then beached on the beaches and labour carries bags ashore to the warehouse which is about 30 yards away. On this vessel cargo was bagged during the night and discharged by day. There are at one time about 200 – 300 labourers on board. The labour for bagging and discharging are different. The average discharge rate worked out to about 800 tons. This is the first time the bagging had to be done as normally vessels calling are loaded with bagged cargo. The crane operators are very careful and follow the instructions given by the vessel with regard to the cranes. About 12 vessels call at this port per year during the season.

DENSITY: Density was found to be constant at 1025.

FRESH WATER: None available. Ample fresh water needed as water also has to be supplied to the labour.

PROVISIONS: Almost all types of provisions available at reasonable costs. Rice which is also available is of very poor quality. The Agents also handle the ship chandling.

LAUNDRY: Laundry facilities are available, but costs are slightly on the high side. This is also handled by the Agents.

REPAIRS: There is a small workshop available for mechanical/electrical repairs.

GENERAL: "KKS" is a very small town. The largest town being Jaffna which is 14 miles away. Buses and taxis are available.

CURRENCY: All currencies have to be declared and all currencies except Indian, Pakistani and Bangladesh can be changed in banks. The above three currencies are supposed to be banned in Sri Lanka. Exchange rate was 1 Sri Lanka rupee = 53 Indian Paisa.

TRINCOMALEE (including Pulmoddai):

08.36 N. 81.15 E.

DOCUMENTS:
International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: Call Pilot on VHF Channel 16, also send ETA via Colombo Radio to pilot station. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Master Attendant, Trincomalee, at least 24 hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 hrs. about 2 cables Northward of Round Island (Lat. 8° 30′ 48″ N., Long. 81° 13′ 24″ E.). Vessels embarking Pilot should whenever possible lower an accommodation ladder; if this is not practicable should let down a pilot ladder and provide 2 man ropes not less than 3 inches in circumference. Vessels awaiting a Pilot should anchor 0.5 miles N.E. of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800 – 2100 hrs. may be brought in at Deputy Master Attendant's discretion if they come to anchorage 5 cables N.E. of Round Island.

ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.

RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.

MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only 1 berth which can accommodate up to 600 ft. length, and 36 ft. draft. This jetty used for discharging tankers and bunkering.

HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant Pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.

RADIO: All cables to Deputy Master Attendant, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4 PB.

Pilot carries a portable VHF set, Channel 16, with about 2 miles range.

TUGS: One tug attends when required. Tow-lines generally not used; but if required tug/ship's lines used.

BERTHING: A bulk-grain berth to accommodate vessels of 800 ft. in length, and draft forward 41 ft. and aft 46 ft. is available at Malay Cove, in the vicinity of Round Point.

Pulmoddai: Pulmoddai is a roadstead, on the Eastern coast of Sri Lanka and approximately 38 miles from Trincomalee. The loading season is usually from April to September.

The Mineral Sands Corporation has housing for their staff and a medical practitioner is employed by them who also acts as a Port Health Officer for granting Pratique to vessels.

The Corporation has two godowns with a capacity of 14,000 tons of rutile and 25,000 tons of ilmenite. Presently ore is transported by conveyor belts from the godowns for lighterage along a pier stretching up to 250 ft. into the sea. The Corporation has a fleet of 8 steel lighters, of which 6 are of 100 tons capacity and 2 of 200 tons capacity. The loading rate is around 2,000-2,600 tons per day working five hooks in good and fair weather.

The stevedore labour is private and is recruited from Trincomalee whenever a ship operates at Pulmoddai. As the stevedores stay on board until completion of loading, it will be necessary for the vessel to carry sufficient water to meet the stevedore requirements.

It is customary for the ship to provide food and accommodation for two Customs Officers and a representative of the Shippers during cargo operations.

Prior information is also essential by the Agents of vessel's ETA, etc., which should be passed to the Plant Manager of the Corporation at Pulmoddai by cable or telex to enable him to obtain labourers from Trincomalee.

There is no launch service, but the Corporation provides a launch on a schedule drawn by the Corporation, and the Agents could make use of this facility.

STEVEDORES: Stevedoring operations have been nationalised and are carried out by the Port (Cargo) Corporation, Trincomalee.

TANKERS: One tanker berth at which vessels of 600 ft. length and 32 ft. draft are discharged.

DENSITY: Salt water.

FRESH WATER: Available, supplied by water lighters and from bunkering jetty.

FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours' notice.

GANGWAY/DECK WATCHMEN: Watchmen are provided by the Port Tally and Security Services Corporation.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco issued as required. Wine and/or Spirit issued as required.

IDENTIFICATION CARDS: Identity Cards or Passports are required to be carried by crew members ashore.

CONSULS: All Consular Officers are in Colombo.

REPAIRS: Only minor repairs can be carried out.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: No International flights through Trincomalee.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.

TELEPHONES: Police 308; Ambulance 448; Fire 335. There are no telephone connections for ships.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Alongside facilities to be built. Two floating cement plants to be installed.

AUTHORITY: Master Attendant, Port Commission.

NOTES

Please also advise Shipping Guides Ltd.

Sudan

PORT SUDAN: 19.37 N. 37.14 E.

DOCUMENTS:

Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy B/Lading.
1 Provisions List.

PILOTAGE: 24 hours' notice ETA. VHF Channel 16. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

ANCHORAGES: Towartit Anchorage, approx. 8 km. S.E. of harbour.

RESTRICTIONS: No restrictions providing berth available.

Age Restrictions: The Sea Ports Corporation, Port Sudan, issued the following circular:

"(1) Ships of over fifteen years of age will not be allowed to work in the harbour unless able to produce a Sea Worthy Certificate stating that all deck appliances and propellers are fit for work and capable of lifting and handling all kinds of goods carried on board the ship. The Owner or the Charterers of the ship will be held responsible for the correctness of the Certificate and for any delay incurred due to defect or non-efficiency of ship appliances.

(2) Ships working within the Red Sea Basin will be allowed to enter the harbour despite their age limit or nationality provided that they produce the Certificate referred to in Para (1) above.

(3) Ships carrying goods to Port Sudan Harbour must not carry any packages which cannot be lifted by the ship's own gear or are away from the reach of their gear.

(4) Breaches of any of the above will be subject to a fine of two thousand Sudanese pounds."

MAX. SIZE: Length 850 ft. Max. draft at Oil Terminal 37 ft., other berths between 28 ft. and 34 ft. 6 in.

HEALTH: Radio Pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether Pratique is granted or not.

RADIO: Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8652 MHz from 0400 hrs. to 1600 hrs. GMT; 4356 MHz from 1600 hrs to 0400 hrs. GMT; 500 kHz – continuous listening watch for first 10 minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

TUGS: About 1 mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

BERTHING:

Berth	*Length*	*Depth* Winter	Summer
Nos. 1 to 5 main berths	458 ft.	30 ft.	28/33 ft.
No. 5A	426 ft.	35 ft.	33 ft.
Nos. 6 & 7	606 ft.	35 ft.	33 ft.
Nos. 8 & 9	600 ft.	37 ft.	35 ft.
No. 15	642 ft.	37 ft.	36 ft.
No. 16	230 ft.	37 ft.	35 ft.
Nos. 17 & 18	908 ft.	39 ft.	37.5 ft.

CARGO HANDLING: Grain silo of 50,000 tons capacity situated at Berth No. 15.

Span of coal transporters is 420 ft.

Container traffic handled at Berth Nos. 17 and 18. Ro-Ro vessels handled at Berth No. 16.

Also see "Developments".

TANKERS: At Berth No. 16, vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 37 ft. draft. Berths connected by pipe-line to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

STEVEDORES: Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5 – 10 tons per hook per hour. Bagged cargo, 15 – 20 tons per hook per hour.

Exports: Main exports, cotton, cottonseed, gum Arabic, oilcakes, MOP shells, trocas shells, senna, beans, domnuts, oilseed, hides, skins, salt, beeswax, durra, wheat bran, chick peas, karkadeh, ground nuts, livestock, castor seed and edible oil.

Tea: Following exports should not be stowed with tea: castor-seed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton: Gum should never be stowed with cotton.

Transhipment cargo: Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight: Deadweight of cargo is expressed per ton of 1,000 kilos.

MEDICAL: Advance notice advisable. Hospital facilities available. Crew and passengers must have valid International Health books.

DENSITY: 1025.

FRESH WATER: Available ex-quay and ex-barge.

FUEL: Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours' advance notice advisable. Name of suppliers is required. Bunkers at times in short supply.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per person. Wine and/or Spirit, 2 bottles of different kinds per person. Only personal requirements may be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: A.R.E. (Egypt) and Nigeria.

REPAIRS: Minor deck and engine repairs.

DRY DOCKS: Slipways for 2 vessels up to 500 tons capacity.

REPATRIATION: Not recommended. Formalities take 2/3 days.

AIRPORT: 3 miles away. Flights twice per day Port Sudan to Khartoum, 2 flights per week Port Sudan to Cairo.

TIME: GMT plus 2 hours. In Summer, GMT plus 3 hours.

HOLIDAYS: The following government holidays will be considered as port holidays. (The dates may vary in other years) January 1st (Independence Day – 1 day), February 19th (Mulid El Nabi – 1 day), March 3rd (National Unity – 1 day), May 1st (Sham el Nassem – 1 day), May 25th (Revolution Day – 1 day), September 3rd-6th (Ramadan Bairam), November 10th-14th (Kurban Bairam), December 1st (Mohammedan New Year – 1 day), December 25th (Christmas Day).

The port will not work on the following days: January 1st (Independence Day), November 10th–14th (First Day Kurban Bairam), December 1st (Mohammedan New Year), February 19th (Mulid El Nabi), May 25th (Revolution Day), September 3rd (First Day of Ramadan Bairam), December 25th (Christmas Day). Overtime will be worked on all other days.

POLICE/AMBULANCE/FIRE: Police 4888; Ambulance 2400; Fire 5922.

TELEPHONES: No arrangements exist for placing telephones on board.

GENERAL: No foreign currency allowed ashore. Crew are permitted to go ashore with any amount Sudanese Currency.

DEVELOPMENTS: The first development stage includes modification of 2 existing berths to accept ships of up to 50,000 d.w.t. and container vessels, relaying railway track in the port area and asphalting. Purchase of 20 mobile cranes with capacity 7 tonnes – 54 tonnes and 60 fork lift trucks completed 1983.

Second phase of development includes extension of 2 container berths, additional works at the Ro-Ro berth and upgrading of the grain silo complex.

AUTHORITY: Managing Director's Office, Sea Port Corporation.

Suriname

MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica River, a tributary of the Commewijne River, which latter joins the Suriname River at Fort New Amsterdam. Moengo is 94 miles from the Suriname River Light Vessel.

DOCUMENTS/PILOTAGE/GENERAL: Refer to "Paramaribo".

PILOTAGE: Vessel arriving after 2000 hrs. at the light vessel for Moengo can proceed on a suitable tide and anchor at Fort New Amsterdam without having to call at Paramaribo to be entered. In this case vessel will be entered on arrival at Moengo.

Also see "Paramaribo".

TUGS: Two tugs are available, the larger is 1,750 h.p.

Towage is compulsory in the Cottica River from 40 miles below Moengo for vessels over 200 ft. long.

MAX. SIZE: Ships of 525 ft. can be accommodated. Ore vessels call daily. The Commewijne Bar is 18 ft., so that the ruling draft is that of the Suriname River. Maximum admissable draft being 22 ft. 6 in., subject to the Suriname River.

BERTHING: Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 t.p.h. One pier is 430 ft. long and has a depth of 24 ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.

PROVISIONS: Not available.

FUEL: Small quantities can be supplied.

FRESH WATER: Small quantities can be supplied.

AIRPORT: About 5 km. from docks.

AUTHORITY: District Commissioner acts as Harbour Master.

NEW NICKERIE: 05.57 N. 56.59 W.

DOCUMENTS:

2 copies Crew List.
2 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
3 copies Manifests of Export.
1 copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

PILOTAGE: Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a Pilot available; ETA to be sent 48 hours before arrival and, 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the Sea Buoy (Buoy No. 1). The pilot boat is a small wooden, grey and white painted vessel. The pilot boat does not use the international red-white pilot lights at night. It is possible to make radio telephone contact with the boat (Pilot carries a walkie-talkie VHF equipped with Channel 12). There is a signal lamp on board.

Send ETA message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the Sea Buoy.

ANCHORAGES: With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the Sea Buoy. It is not advisable to anchor in the Nickerie River for a long time, the river is too narrow.

MAX. SIZE: Minimum depth on the bar is 1.20 m. with maximum draft at HW varying from 10 ft. to 13 ft., maximum length is 130 m., governed by the width of the river (170 m. and upriver 70 m.). The vessel has to use the high-inlet for cooling water, etc., while passing the bar.

At low water ships are seated in the mud without consequence to hull, rudder or propeller alongside the wharf. There are berths for oil-carriers.

HEALTH: There is no Pratique procedure. Only in the event of any suspected disease or fever on board must a doctor must be called.

RADIO: Send ETA cables to Paramaribo Radio. The pilot office at Nickerie has a radio telephone transmitter. Frequency 8233.9 kHz; listening hours 0700, 1200, 1800 hrs. local time. SSB and VHF equipment also used.

TUGS: No powerful tugs available.

BERTHING: The port of New Nickerie is 3 miles up river.

Wageningen: Lies 27 miles up river and can be reached with the same draft as New Nickerie, but the width of the river is only 70 m., which restricts length to 200 ft.

STEVEDORES: The Agent orders the gangs (maximum 3 gangs available).

MEDICAL: No advance notice required for medical treatment. There is 1 hospital in Nickerie with a surgeon.

TANKERS: There are 3 piers in Nickerie: Esso, Shell and Texaco pier. Maximum permitted draft 14 ft. 9 in. at Spring tide.

DENSITY: In the dry season the density on the river near New Nickerie is 1015. In the rainy season the density is 1005 near HW, and 1000 near LW. These all depend upon Spring tide or Neap tide.

FRESH WATER: Fresh water is available alongside the wharf of New Nickerie. It is loaded from shore by hose.

FUEL: Small quantities of fuel available from Esso or Shell, also grease and petrol.

GANGWAY/DECK WATCHMEN: It is recommended to have a watchman during the night.

OPENING/CLOSING HATCHES: Patent hatches must be opened by the crew, other hatches by the stevedores.

CUSTOMS ALLOWANCES: Master included: for every 72 hours staying in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 gm. tobacco plus 0.25 bottle spirits or 5 bottles beer or 1 bottle wine.

IDENTIFICATION CARDS: Not needed.

CONSULS: No consuls in Nickerie.

REPAIRS: Small engine repairs and shaft repairs and some welding repairs can be done.

REPATRIATION: Possible via Paramaribo.

AIRPORT: The airport is 10 miles from the port of Nickerie. Twice per day there is a flight to Paramaribo arranged by a local company, called S.L.M.

Daily bus service between New Nickerie and Paramaribo.

TIME: Local time is GMT minus 3.5 hours. No alteration during year.

HOLIDAYS: New Year's Day; Good Friday; Phagwa; Queen's Birthday (April 30); Ascension Day; Labour Day (May 1st); Day of Liberties (July 1st); Idul Fitre; Christmas Day and Boxing Day. On these days work can be done by paying overtime.

POLICE/AMBULANCE/FIRE: Police 356; Ambulance 241; Fire 333.

TELEPHONES: No arrangements can be made for a telephone connection on board.

SHORE LEAVE: No restrictions.

DELAYS: Delays in berthing: There are only 2 wharves with a total length of 700 ft. Banana ships have priority. Delays in loading and discharging: there are only 3 gangs of stevedores. These can be enlarged to 5 "small gangs".

DEVELOPMENTS: In the future a bigger and deeper port will be built in the Corentyne River, about 20 miles up the river.

AUTHORITY: District Commissioner acts as Harbour Master.

PARAMARIBO: 05.49 N. 55.09 W.

PORT LIMITS: The seaward boundaries of the port, within which a vessel is considered to be "arrived" is the entrance of the Suriname, Matowijne, Coppename, Corantijn and Nickerie Rivers. Laytime commences to count after vessel has anchored or berthed.

LOCATION: On the left bank of the Suriname River about 8 miles above New Amsterdam and 21 miles from light-vessel at river entrance.

DOCUMENTS:

5 Incoming Cargo Manifests (if any cargo), otherwise 3 copies.
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so that they can be translated into Dutch.

4 Crew Lists.
2 Store Lists.
2 Crew Declaration Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. All ships are requested to amend their estimated time of arrival in local time, at least 12 hours in advance by special message through the wireless station to their Agents or to the Harbour Master. Arrival message should include draft of vessel and other requirements. 6 hours prior to arrival the ETA has to be confirmed and if necessary corrected. The Pilot will be dispatched after receiving the confirmed ETA. As shipping only uses the Suriname River, the Commenwijned River, the Cottica River and the Nickerie River, all Pilots except one for Nickerie are stationed at Paramaribo. Paramaribo Pilots board the vessels 1 mile North of the light vessel and between the light and Braamspunt (Lat. 5° 58′ N., Long. 55° 10′ W.). Pilot station on VHF Channel 12. Pilot station and harbour office to be advised of deepest draft. All vessels have to stop off the light vessel.

ANCHORAGES: Anchorage off town in 18 ft. – 35 ft. of water at LWS. Government Officials board vessels immediately on arrival for inward clearance. Vessels which are required to anchor off the port to wait for berths may be boarded at the anchorage.

CHANNEL: The channel is marked by numbered buoys with radar reflectors, odd numbers on the West with white lights, and even numbers to the East with red lights and painted respectively black and white or red and white chequers.

RESTRICTIONS: The bar at the entrance of the Suriname River controls the ports of Paramaribo, Moengo, Paranam and Smalkalden, and has a depth of 15 ft., with a rise at neaps of 6 ft. 7 in. or springs 8 ft. 10 in., but it is soft mud. Due to the fact that the bar consists of mud, vessels regularly leave the port with drafts between 22 ft. and 23 ft.

LIGHT VESSEL: There is a radio light-vessel which is anchored off the Suriname River 6.75 miles N.N.W. of Braamspunt (Lat. 6° 04′ 37″ N., Long. 55° 12′ 58″ W.) This light vessel is equipped with a radio beacon PZER or PZCR, on 415 or 365 kHz, range 60 miles and also VHF Channel 12.

HEALTH: Port doctor will visit an arriving ship only if there is a case of contagious disease aboard, or if one of the preceding ports of call has been declared to harbour contagious disease. No bill of health is required. A ship with an infection on board must advise the Harbour Master by special message through the wireless station before arrival. Yellow Fever Certificates required. Pratique granted by Customs Officer.

RADIO: There is a 24 hour radio telephone watch at the Harbour Master's Office on 8233.9 kHz; 500 kHz; 2182 kHz; and VHF Channel 12. The coast station, PZN, also maintains a 24 hour radio telegraph (500 kHz) and telephone service in the 2182 kHz band. The light vessel *Suriname River* is equipped with VHF Channel 12.

VHF: Harbour Office on Channel 12, 24 hours a day. Radio Station "PZN" on Channel 16, 24 hours a day.

RADAR: None.

TUGS: Available from Paranam.

BERTHING:

Government Wharf: Length 1,815 ft., depth 21 ft. – 25 ft.

O.G.E.M. Wharf: 120 ft. long, least depth 14 ft. Oil/gas discharge for public undertakings. Wharf partly dismantled and declared unfit to receive vessels.

B.E.M. Wharf: 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.

Banana Export Pier: 297 ft. long, least depth 18 ft. Fresh water can be supplied.

New Oil Terminal: Moorings 570 ft. apart. Least depth 18 ft. Platform length 70 ft. Used for oil and gas.

Flour Pier: 36 ft. long. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator, rate 30 t.p.h.

Vensur Cement Wharf: 180 ft. long, depth alongside 14 ft. Moorings 600 ft. apart.

New Haven Dock: 1,815 ft. long. Least depth 19 ft. at LWS. Max. depth 21 ft. Fresh water can be supplied.

Belwaarde: 3 miles above Fort New Amsterdam on the right bank of the Suriname River. Length of pier: 279 ft., least depth 18 ft. – 20 ft. Loading sugar in bags.

Shell Oil Terminal: Moorings 540 ft. apart. Least depth at LWS 21 ft. Exclusively for oil, gas and bunkering.

CRANES: One crawler crane 25 tons capacity.

MEDICAL: Excellent medical and dental attention is available to crew members of all vessels. Four hospitals available.

FRESH WATER: The water is of excellent quality. Available at most berths as mentioned above.

FUEL: Ship's bunkers are available in most ports of Suriname in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking. Suppliers are Shell, Esso and Texaco.

CUSTOMS ALLOWANCES: 60 cigarettes or 15 cigars or 0.5 lb. of tobacco. One-fifth litre of spirits, one-third litre of wine, 2 litres of beer, for each crew member.

All remaining stores must be declared and placed under seal. If vessel remains in port over 72 hours Customs will allow an issue of stores.

REPAIRS: No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are 2 floating dry docks and 1 floating derrick owned and operated by the Suriname Drydock Co. Lifting capacities dry docks: 400 – 650 tons.

SURVEYORS: Lloyd's Register, A.B.S. and N.V.

GANGWAY/DECK WATCHMEN: The Customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the Customs Boarding Officer.

The local authorities assign one or more Customs Guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These Officials must be provided with meals on board at regular meal hours, and cabins if necessary.

CARGO GEAR: Load/discharge by ship's gear.

REPATRIATION: Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

AIRPORT: Zaneerij Airport, 146 km. from Paramaribo. Served by SLM, KLM, ALM and Guyana Airways.

CONSULS:

Austria
Belgium
Brazil
China
Colombia
Denmark
Dominican Republic
Ecuador
France
Great Britain
Germany (West)
Guyana
Indonesia
Japan
Norway
Portugal
Sweden
Venezuela
U.S.A.

TIME: Local time is GMT minus 3.5 hours. Vessels are required to use local time in ETA messages and when dealing with Agents.

HOLIDAYS: New Year's Day, Revolution Day (February 25th), Holi Phagwa (March 10th), Good Friday, Easter Monday, Labour Day (May 1st), Freedom Day (July 1st), Id-Ul-Fitr*, Republic Day (November 25th), Christmas Day, Boxing Day. *These holidays depend on the moon.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

GENERAL: While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except ships of war, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All firearms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Suriname. Any violation of this regulation renders the vessel subject to fines and confiscation of firearms and ammunition.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

BANK: Algemene Bank Nederland N.V., Kerkplen 1, Paramaribo. Tel: 71555. Telex: 122 Bancol Sn.

EMERGENCY CO-ORDINATION: Harbour Office. Tel: 72845. Telex: 163 Havkan Sn.

STORING: Can be arranged by Barge or Trucks, whilst loading or discharging, depending on berth, with Customs in attendance. Local labour available.

AUTHORITY: The Ministry of Transport and Industry, Fort Zeelander, Kleine Combieweg, Paramaribo. *Tel:* 72845. *Telex:* 163 Havkan Sn.

AGENT: Alcoa Steamship Company, Inc., P.O.Box 1842. Paramaribo, Suriname. Tel: 77600, 73613. Telex: 113. Cables: Alcoaship Parbo. Steamship Agents/Stevedoring Operators.

PARANAM: 05.38 N. 55.05 W.

Located on left bank of the Suriname River about 42 miles from the light vessel, consisting of bauxite mining, alumina refining and an aluminium smelter with facilities for shipping these commodities.

DOCUMENTS/PILOTAGE: and all General Information refer to "Paramaribo".

RESTRICTIONS: See "Berthing".

MAX. SIZE: Vessels up to 40,000 d.w.t. load to outer bar draft (approximately half load) and usually top off at Trinidad. Max. LOA 700 ft.

HEALTH: Health Officer does not board unless there are quarantinable diseases aboard.

TUGS: Available.

BERTHING: *General Dock:* Concrete pier of about 350 ft., moorings 660 ft. apart. Least depth 30 ft., max. air draft 42 ft., max. beam 80 ft. This dock used for loading bauxite or aluminium ingot and for discharging general cargo, oils, caustic and other raw materials,

Alumina Pier: Depth 25 ft., moorings 680 ft. apart. Used for loading alumina or discharging oils and caustic. Max. air draft 50 ft., max. clearing height 72 ft.

Loading Capacity: Bauxite General Dock: 900 t.p.h.
Alumina at Alumina Dock: 850 t.p.h. Loading by conveyor, spout trimmed (Telescopic chute).

CRANES: One gantry crane 55 tons capacity.

FUEL: Small quantities of light diesel No. 2 only in emergency.

FRESH WATER: Can be supplied.

REPAIRS: None can be effected.

AIRPORT: At Zanderij, 45 km. from dock.

GENERAL: The Outer Bar is the limiting factor for the port. Harbour Office Paramaribo give Bar drafts for each tide.

The river silt is extremely soft and in consequence the river water is very dirty and although fresh (995 at the berths) the evaporators cannot be kept on line. There is also a great danger of blocking the cooling water system, especially when crossing the bars. Blackouts on both motor and steam ships are a common occurance. Care should be taken to ensure that cooling systems are as clear as possible before entering the river.

AUTHORITY: District Commissioner officially acts as Harbour Master but vessel movements, pilotage, etc. handled by Paramaribo Harbour Master's Office.

SMALKALDEN: 05.37 N. 55.05 W.

A bauxite mining town on the left bank of the Suriname River 1 mile below Paranam and 41 miles from the light vessel.

DOCUMENTS/PILOTAGE: and all General information; refer to "Paramaribo".

TUGS: None available.

BERTHING: Wharf with length of 218 ft. Moorings 535 ft. apart, least depth 30 ft. Ships can load to outer bar draft. Bauxite loaded by 1 conveyor with an average of 800 t.p.h. at each berth. Max. LOA 700 ft. Vessels berth port side alongside.

FUEL: None available.

FRESH WATER: Small quantities can be delivered by trucks.

REPAIRS: None.

AIRPORT: At Zanderij, 45 km. from dock.

GENERAL: The tide is 3 hours after Paramaribo and the water becomes fresh before reaching Smalkalden.

SHIPMASTER'S REPORT: 1978.

Documents: 2 Crew Lists, 2 Stores Lists and 2 Crew Declaration Lists.

Customs: Customs board at Smalkalden on arrival and clear vessel. They do not remain on board.

Pilotage: Available and compulsory. Pilot station at Paramaribo.

Anchorage: Safe anchorage available 4 miles North of the Sea Buoy, depth of water about 30 ft., nature of bottom, mud.

Approaches: Inwards: There is a direction finding station at Paramaribo. Light vessel not on station. The buoy channel is almost non-existent as some buoys have disappeared and have not been replaced. The light buoys are extremely poor.

On entering the river, it was noticed that the propeller stirred up dense mud. The main engine cooling filters became choked even though the high suctions were being used. Top side ballast tanks were then used to discharge ballast and cool the main engine at the same time.

Vessel anchored at Suzannasdaal on passage up river to await tide, and clearance of another vessel which was on the berth. The anchorage was good, vessel used five shackles. Vessel then proceeded up river to Smalkalden but on passing Domburg, heard that the other vessel could not complete on time, so we had to pass the berth and anchor off Chatillon. The river is very narrow at this point and engines were kept on standby to be used when turning in case vessel became too close to the shore. Vessel docked at Smalkalden just before HW.

Outwards: On completion of loading, vessel sailed 2.5 hours before HW Paramaribo and proceeded down river. The vessel's draft was 23 ft. 2 in. and in places the river became very shallow and the vessel slid over mud at various points. The worst place noticed being between Beacon "D4" and Buoy No. 12 at Sunoza. The vessel again anchored off Suzannasdaal to await the rising tide, 6 shackles in the water as the current was very strong. The vessel later sailed for the sea 3.5 hours before HW at Paramaribo and again touched bottom at various places whilst proceeding towards the sea. The main engine was cooled using ballast discharge for suction which is higher than normal high suction. whilst on passage Beacons "R6" and "R10" were extinguished and 6 of the Channel Buoys were missing, also buoy lights were of extremely low intensity.

Restrictions: Vessels can enter and leave port day and night.

Max. Size: Agent advised that max. draft was equal to: (4.50 m. + height of tide) – FWA of 4 in.

However Pilot advised differently as follows:

Safe Loading Calculation:
Least channel depth . . . ft.
Plus rise of tide . . . ft.
Equals safe loading draft . . . ft.

*Least channel depth rising tide (from Neap to Spring tide 4.60 m.)
*Least channel depth falling tide (from Spring to Neap tide 4.35 m.)

Pilot also advises that the FWA from Sea Buoy to Suzannasdaal is practically nil – so do not take FWA into account.

VHF: Pilots and Harbour Office maintain a continuous watch on Channel 12.

Tugs: Not available and not normally required. Should vessel experience difficulties tugs can be called from Curacao.

Berthing: Suriname Billiton Bauxite Berth: Maximum permissible draft varies with the tide. Tidal range 1.16 m. to 2.39 m.

Maximum permissible length and breadth of vessel not known.

Loading/Discharge Gear: There are 2 chutes approximately 150 ft. apart which are semi-movable. Loading rate varies between 200 and 600 long tons per hour. Cargo operations continue throughout 24 hours. A gang consists of one foreman and four men.

In addition to the facility at which we berthed, there are general cargo berths alongside the modern quay and a bulk aluminium loading berth with one chute which is semi-movable. See "Paranam".

Density: For the berth, the density is 998. Also see "Max. Size".

Fuel: Not available.

Fresh Water: Delivered by truck with capacity of 7 tons. Delivery is slow and extremely expensive. Arrangements are to be made with the foreman.

Medical: Hospital facilities available.

Shore Leave: Possible, however, crew required on board most of the time as vessel has to be shifted up and down the jetties for loaders.

Gangway: Accommodation ladder not used. Shore ladder is provided.

Provisions: Fresh fruit and vegetables available but of poor quality and very expensive.

Transportation: The town of Smalkalden is about 30 minutes by car from Paramaribo and about 1 hour by bus (taxi fare, 25 Guilders, bus fare 1 Guilder).

Publications: BA 517 and BA 99 also South American Pilot Volume 4 (No. 7A) used. BA Chart 99 does not extend far enough to sea as the sea buoy is not shown on it and the outer anchorage is about 3 to 4 miles outside this buoy. The Pilot informed me that the local Dutch Chart is available from the Harbour Master at Paramaribo and is much more satisfactory.

AUTHORITY: District Commissioner acts as Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Sweden

GENERAL:

ICE-BREAKING SERVICE:
Location: Ice-breaking Directorate, Norrkoping.
Telephone: (011) 19 10 00 (0800 hrs. – 1640 hrs. local time).
(011) 12 29 60 (outside above hours).
Telex: 64416 Ice Serv S.
Cables: Civilmarin.
Procedure: Requests for ice-breaker assistance should be made well before vessel's arrival at the ice to the Directorate, locally (to most Swedish Harbour or Pilot Offices) or to an ice-breaker.

Vessels approaching ice-bound areas may be instructed, in daily Ice Reports issued by Coastal Radio Station (see ALRS Vol. 5), to report to the Directorate. Reports, which should be made well before arrival at the ice are to include the following details of the vessel:

1. Name.
2. Nationality.
3. Call sign.
4. Size.
5. Draft.
6. Engine power.
7. Year built.
8. Ice class.
9. Amount of cargo.
10. Destination.
11. ETA at ice-covered waters.

Vessels which have made a request or report and subsequently cancel or delay their voyage must inform the Directorate, a local office or an ice-breaker immediately.
Information Service: For details of Coastal Radio Stations which broadcast Ice Reports, including positions of ice-breakers, see ALRS Vol. 5.
Ice-Breakers:
Call: Swedish ice-breakers with their call signs are:

Ymer	SPIA	Tor	SCYN
Frej	SBPT	Oden	SBXQ
Atle	SBPR	Thule	SCKD
Njord	SBPO	Ale	SBPQ

Frequency: 500 kHz	WT
2182, 2140 kHz	RT
Channels 16, 6	VHF

Procedure: Calls to ice-breakers may be booked through the nearest Coastal Radio Station. Vessels receiving assistance must maintain continuous listening watch on the channel specified by the ice-breaker.

AHUS: 55.56 N. 14.19 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilots meet vessels at Pallagrund. Telegraphic address: "Pilotstation, Ahus". Tel: 044 – 240027. VHF Channel 16 call sign: "Pilot Station, Ahus." Awaiting Pilot, anchor outside Pallagrund. Depth 15 m. – 20 m. (Also see "Stockholm").
ANCHORAGES: Anchorage forbidden in dredged entrance channel.
RESTRICTIONS: No special regulations.
MAX. SIZE: Max. length 160 m., max. draft 7.7 m.
HEALTH: No special regulations.
RADIO: Stockholm Radio (SDI) also VHF, Channel 16 and working Channel.

Ahus Port Radio keeps watch, Monday to Friday 0800 to 1600 hrs. on VHF Channel 16. Working Channel 11, 12 and 13. At other times Ahus Pilot Station.
RADAR/VHF: Radar on pilot station. VHF call sign: Pilot Station, Ahus. Channel 16. Also see "Radio".
TUGS: 1 tug available with advance notice.
BERTHING: Depth alongside (at MW) as follows:

Berth	*Length* (m.)	*Depth* (m.)
Wine Quay	100	4.2
No. 1 – 4	270	5.8
No. 5 – 17	740	7.2
No. 18 – 26A	470	8.2
26B	15	4.2

Depth allowance 0.5 m.
STEVEDORES: Ahus Stuveri AB. Tel: 044-240038. Working hours: Monday to Friday 0700 – 1600 hrs. Meal breaks 0845 – 0900 hrs. and 1200 – 1245 hrs.
FRESH WATER: Delivered from pipe-line.
FUEL: Available day and night.
FIRE PRECAUTIONS: No special regulations.
GANGWAY/DECK WATCHMEN: If wanted, watchmen available.
OPENING/CLOSING HATCHES: Normally by the crew.
CUSTOMS ALLOWANCES: See "Stockholm".
CARGO GEAR: 7 shore cranes, capacity 5 – 25 tons. No cranes at Berths No. 1 – 4 or Wine Quay.
IDENTIFICATION CARDS: Crew list needed. No cards.
CONSULS: Danish Vice-Consul: Vasagatan 17B, 29153 Kristianstad. Tel: 044-114841. Norwegian Vice-Consul: Mast. Bonggatan 2, 29154 Kristianstad. Tel: 044-115605.
REPAIRS: Minor repairs only.
DRY DOCKS: No dry dock. Nearest dry dock Solvesborg.
AIRPORT: Nearest airport about 10 miles away. 2 flights per day.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Police Tel: 242030; Ambulance Tel: 90000; Fire Tel: 90000.
TELEPHONES: 1 public telephone on quay.
AUTHORITY: Ahus Hamn, Hamnkontoret, 29600 Ahus, Sweden. Tel: 044-242070. *Contact:* Ingvar Ericsson, Harbour Master.

BROFJORDEN: 58.21 N. 11.25 E. (See Plan Book)

PORT LIMITS: Between "Stretudden" (crude oil berth) and the island "Rixo" in Brofjorden.
DOCUMENTS: Documents required for entry and clearance:

Certificate of Registry, Certificate of Tonnage, Derat Exemption Certificate, 3 Crew Lists, 1 Crew Manifest, 1 Declaration of Bonded Stores. Free Pratique will be received via Customs on arrival berth. Oil Pollution Certificate.
PILOTAGE: Pilot station VHF Channel 16 around the clock. Channel 16 for calling only, thereafter changing to an agreed Channel. Call: Lysekils Pilots.

According to harbour regulations VLCCs are requested to give 72 hours ETA, and if any changes 48 and 24 hours ETA.

Product tankers are requested to give 48, if any changes 24 hours ETA.
Position where Pilot will Board:

VLCCs	Lat. 58° 13′ 05″ N.,	Long. 11° 09′ 05″ E.
Product tankers	Lat. 58° 15′ 01″ N.,	Long. 11° 13′ 03″ E.

ANCHORAGES:
VLCCs East Scaw, Lat. 57° 42′ N., Long. 10° 49′ E.
Water depth: 26 m.
Holding ground: sand, good.
Product Tanker Only (up to 60,000 d.w.t.):
Lat. 58° 20′ 03″ N. Water depth: 28 m.
Long. 11° 21′ 00″ E. Holding ground: clay, good
Lat. 58° 19′ 07″ N. Water depth: 26 m.
Long. 11° 23′ 05″ E. Holding ground: clay, good
RESTRICTIONS: *When Berthing VLCC:*

Visibility minimum 4 miles, wind force max. 12 m./sec. and current max. . knot at the outer buoys (Nos. 1 and 2).
MAX. SIZE:

Crude Oil Jetty:	
Deadweight:	50,000 – 500,000 tons.
Length overall:	No limit.
Beam restriction:	No limit.
Draft restriction:	25 m. (82 ft.)
Depth of water:	28.0 m. (92 ft.).
Product Jetty (Berth Nos. 2 and 3):	
Deadweight:	50,000 tons.
Length overall:	230 m. (754 ft.).
Beam restriction:	No limit.
Draft restriction:	14.4 m. (47 ft.).
Depth of water:	16.0 m. (53 ft.).
Product Jetty (Berth No. 1):	
Deadweight:	7,000 tons.
Length overall:	120 m. (394 ft.).
Beam restriction:	No limit.
Draft restriction:	8 m. (26 ft.).
Depth of water:	8.8 m. (28 ft.).

HEALTH: No special papers required. Master informs by radio or on arrival.
RADIO: For ETA cables to Agent and Receivers call Gothenburg Radio.
VHF: VHF stations are installed at the pilot station, the pilot boat, the tug boats and at the Scanraff Harbour Office. Scanraff and Lysekil Pilot listen on Channel 16 day and night.

When mooring: the Pilot, Harbour Master, mooring boats and the mooring gangs carry portable VHF sets. Channel 69 is usually used.
RADAR: At the pilot station two radar sets are installed for watching the entrance.
TUGS: *For VLCCs:* Tugs made fast after passage of Dynabrott and Brandskars Flak Lighthouses.
For Product Tankers: Tugs made fast when passing Bubacka Buoy (opposite crude oil berth).
BERTHING:

Instruments:	SAMI-doppler and current meter at crude jetty.
Salinity:	18 – 34%
Current Velocity:	0.2 – 0.9 knots at entrance.
Nature of Bottom:	Clay.

The crude and product jetties are equipped with quick release hooks. The coaster berth has usual type of bollards.

One Safety Tug-boat is always standing-by within the harbour area in case of emergency. When a Crude Carrier is alongside an additional Safety Tug-boat is standing by.
MEDICAL: Hospital available in Lysekil. No particular inoculations required.
TANKERS:
Crude Jetty:
Concrete jetty for tankers of 50,000 to 500,000 d.w.t.
Length of jetty-deck: 135 m.
Height of jetty-deck above MWL: 6 m.
Minimum distance between fenders: 96 m.
Height of gangway tower: 27 m.
3×16 in. marine arms for cargo handling.
1×12 in. marine arm for bunker supply (Only Bunker "C" available).

All 4 arms are equipped with hydraulic operated speed seal couplings designed for 150 lb-ASA flanges, minimum size 10 in.

Reach capability of arms: Max. 30 m., min. 4 m. above sea level. Max. 11 m., minimum 3 m. from berthing line. Drift: 4.5 m. each side of manifold centre line.

Fresh water can be supplied at a rate of 60 t.p.h.

1×4 in. sewer-line connection is located between manifolds on jetty-deck.

Vessel arriving shall have 1 derrick rigged amidships to lift on board garbage-container.

Shore-connected telephone will be placed on board. Telephone number 605 88. Area number 0523.

Telephone number to Scanraff switchbord 604 60. Area number 0523.

Mooring: Vessel is normally moored port side to jetty.

Approach velocity is continously measured by doppler radar and provided to ship's Master/Pilot during berthing operation.

Max. allowed approach speed is shown in "Plan Section".

Communication between jetty-pilot-tugboats and mooring-boats by VHF.

Under normal weather conditions 6 tugboats representing approx. 23,000 h.p. will be used for berthing of VLCCs. Under abnormal weather conditions additional tugboats can be ordered.

2 mooring-boats are provided to assist in line handling.

18 mooring lines are required for safe mooring. All lines to be provided by the ship.

Mooring lines to be arranged in accordance with "Plan" (See "Plan Section"), or as close to as possible.

Combination of synthetic, ropes and wires in the same direction shall be avoided.

Self tensioning winches are not allowed.

All mooring lines will be put on quick release hooks of 150 tons SWL each.

4×10 in. mooring lines are available on jetty-deck for emergency use.

Safety Precautions: Vessel must be safely moored before gangway is placed on board and marine arms connected.

Correct setting of winch brakes to be checked regularly by ship's personnel.

Safety wires to be properly rigged fore and aft.

Cargo handling and/or bunkering will be stopped if wind velocity reaches 17 m./sec. (33 knots) for wind between N.W.-S.W. and during thunderstorms. If reaching the above limit: Stop discharging/bunkering, drain and disconnect all arms. Close all tank lids and ullage plugs. Tugs to be ordered to ship's side.

2 safety tugboats are always available in Brofjorden Harbour while a crude carrier is alongside the crude jetty.

The Harbour Office together with the ship's Master will decide on approach actions to be taken.

Product Jetty: (Berth 2 and 3)

Berth No. 2: 1×12 in. (F.O. No. 4 and F.O. No. 5).
1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
2×10 in. (F.O. No. 1 and diesel oil).
1×10 in. (Premium gas).
1×10 in. (Naphtha and regular gas).

Berth No. 3: 1×12 in. (F.O. No. 4 and F.O. No. 5).
1×12 in. (F.O. No. 4, F.O. No. 5 and ballast).
2×10 in. (Diesel and fuel oil No. 1).
1×10 in. (Premium gas).
1×10 in. (Regular gas).
1× 4 in. (TML).

Potable water and bunker oil are available at all berths.

A 4 in. sanitary sewer line is available at all berths and dry garbage can be left ashore (free of charge) in containers placed between Berth No. 2 and 3.

Product Jetty: (Berth 1)

Size	*Flange rating*	*Service*
6 in.	150 lb ASA	Prem. gas, reg. gas.
6 in.	„	Diesel, F.O. 1.
8 in.	„	F.O. 4, F.O. 5 Ballast.
8 in.	„	Sulphur.

Max. discharge rate at Crude Oil Jetty 18,000 cu.m. per hour. Max. pressure allowed 10 kilos. Max. loading rate at Product Jetty 1,500 cu.m. per hour. Max. pressure allowed 10 kilos.

Both Crude and Product Jetty have 4 in. 150 lbs sanitary sewer and 4 in. 150 lbs potable water connections available which may be used by running hose from ship.

All arms are hydraulically operated except those at the Coaster Jetty. No hoses are allowed for oil handling.

Ballast water can be discharged at Product and Coaster Jetties.

FUEL: Bunker "C" only is available at Crude Oil Jetty. Bunker "C" and diesel oil are available at Product Jetties and the Coaster Jetty.

FIRE PRECAUTIONS: A special Fire Instruction will be given on board on arrival.

POLLUTION: Oil pollution prevention. A special instruction will be given on board on arrival.

CONSULS: Denmark, Finland, Netherlands, Norway and Germany have consuls in Uddevalla, 40 km. from Scanraff.

REPAIRS: Uddevallavarvet and Skandiaverken. For hull and engine repairs, harbour and voyage service.

Pemco: For construction work, mechanical erection and repairs.

Andersson & Callenberg: For electrical installations.

Engine repairs must be reported to Port Captain for permission.

DRY DOCK: Gothenburg, capacity 250,000 tons.

SURVEYORS: Saybolt, Caleb Brett and other cargo inspectors are available.

Lloyd's Register, Det Norske Veritas and others surveyors are available.

GANGWAY/DECK WATCHMEN: The crude oil jetty has gangway tower, but accommodation ladder is necessary in the product harbour.

Watchman is compulsory at the Crude Oil Jetty. At the Product Jetty watchman is available on request.

CUSTOMS ALLOWANCES: 1 bottle spirit and 200 cigarettes or 200 grams tobacco.

REPATRIATION: Changing of crew and any necessary repatriation is possible.

AIRPORT: Nearest airport is Gothenburg, 100 km. South of Lysekil.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE: Dial 90 000 and ask for necessary service.

EMERGENCY CO-ORDINATION CENTRE: Skandinaviska Raffinaderi AB Scanraff. Tel: 0523-60460, Fire and Safety Department.

TELEPHONES: A telephone can be connected on board if ordered through Agent or jetty operator. Telephone numbers: Alarm Centre 90 000 (Ask for ambulance, police etc. Can be in action within 10 minutes); Safety tug-boat 608 33; Lysekil Pilot 608 00; Scanraff switchboard 604 60; Product berth No. 1: 608 76; Product berth No. 2: 602 41; Product berth No. 3: 602 34. A slot telephone is also available in the gate house.

SERVICES: Compass adjusting is available. Local ship chandler available.

BANK: Skandinaviska Enskilda Banken, Postbox 22. 453 00 Lysekil. Tel: 0523-14020. Telex: 21020 (Gothenburg Office).

STORING: See "Prelims" page viii.

1. Vessel can be stored by barge.
2. Vessel can be stored by barge during loading/discharging operation if ship's crane abaft the funnel can be used. Storing amidships can be permitted but not during loading/discharging operation.
3. No trucks are allowed to handle stores. Minor storing can be done by means of wagon from the gate to the jetty and via the ship's gangway.
4. Fork lift trucks are not allowed to be used on the jetty to handle stores.
6. Local riggers are employed by the local ship's chandler to assist with storing.

SHORE LEAVE: Crew members are allowed ashore. No identification card or passes are needed.

REGULATIONS: The Harbour Regulations will be placed on board on arrival.

GENERAL: At the Crude Oil Jetty there is a refuse container to be lifted on board by means of the ship's gear. At the Product Jetty are 2 containers, which will remain ashore. These containers are free of charge to the ships.

AUTHORITY: Skandinaviska Raffinaderi AB, Scanraff, Box 10004, S-453 00 Lysekil. *Tel:* 0523-60460. *Telex:* 42135 Scanraff S. *Contact:* Harbour Master.

GAVLE: 60.41 N. 17.11 E. (See Plan Book)

PORT LIMITS: A line from Utvalnas (approx. 60° 45.2′ N. 17° 21.4′ E.) over Bakharen to Langharen (approx. 60° 41.0′ N. 17° 17.5′ E.).

DOCUMENTS:

4 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.
1 Tobacco List.
1 Stores List.

Following documents supplied by Agent and signed by Master:

On arrival from foreign port:
1 Maritime Declaration of Health.
4 Reports of Arrival (Customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).

On arrival from any port:
1 Report of Arrival (Harbour Office).
1 Report of Receivers (Harbour Office).
1 Cargo List (or Manifest).
1 Transfer.

On departure to foreign port:
4 Reports of Departure.
1 Declaration of Master (of persons on board).

On departure to any port:
1 Report of Shippers (Harbour Office).
1 Declaration by foreign Master.

PILOTAGE: *(a)* Sea Pilots: Pilot station: Bonan, Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gavle. 5 hours advance notice of ETA pilot station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station or Grundkallen lighthouse.

VHF: Channels 16: Calling and Safety } Pilot station and
13: Pilotage traffic } Pilot boats.

All pilot boats are orange. International signals for calling pilot. Pilot boards: S.E. of Grasjalsbadan 60° 43′ N., 17° 27′ E., and on request South of Eggegrund Lighthouse, 60° 43′ N., 17° 34′ E. In case of bad weather closer to pilot station. Anchorages: Graberget roadstead N.E. of Bonan Lighthouse (approx. 60° 44.8′ N. 17° 20.5′ E.), about 350 m. from shore and 18 – 21 m. (10 – 13 fathoms) deep. Open to Easterly winds.

(b) Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 17 88 61 or 17 88 62 or by VHF to Gavle Port Radio, Channels 16, 14 and 13.

ANCHORAGES: See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans light. Outer roadstead well protected, depth of 15 – 11 metres (8 – 6 fathoms). Anchoring forbidden:

(a) In dredged channel between lights in Northern channel and to a point 800 m. W.S.W. of Light No. 4.

(b) In white sector of Fredriksskans light E.N.E. within a distance of 2,000 m. from same.

(c) In navigable channel from Fredriksskans Light to Gavle Dolphin Light.

(d) In Fredriksskans Harbour basins.

(e) In Gavle River from Berth No. 18 to Berth No. 10.

RESTRICTIONS: Two fairways lead to harbour. Northern fairway is 11.0 m. deep and has bottom width of 60 m. Day-time: Max. LOA 220 m. Max. breadth 28.0 m. Max. draft 10.5 m. or max. breadth 30 m. Max. draft 9.0 m. Night-time: max. draft 7.45 m.; max. length 172 m. Southern fairway (daylight only) permits draft of 3 m. All depths are referred to mean water level. Ships on way from outer roadstead or passing from Fredriksskans Harbour to Inner Harbour shall give way to vessels proceeding in opposite direction. This shall not apply to vessels with tow unless vessel approaching also has tow.

MAX. SIZE: Max. permissible draft (at mean water) as follows:

Fredriksskans Harbour

	Max. Draft *m.*	*ft. in.*	*Real depth* *m.*	*Allowance* *m.*
Oil Berth No. 21	10.5	34 05	10.9	0.4
Max. length 220 m. (722 ft.)				
Oil Berth No. 1	7.45	24 05	7.8	0.35
Max. length 200 m. (656 ft.)				
Oil Berth No. 2 – 3	5.3	17 05	5.5	0.2
Berth No. 4 – 8	7.45	24 05	7.8	0.35

Berth No. 110, North end.	6.1	20 00	6.4	0.3
Length 75 m. (246 ft.)				

Terminal Granudden: See "Cargo Handling".

HEALTH: Pratique always automatic. If any suspected disease or fever on board, notify ship's Agent.

TUGS: Join vessel outside Fredriksskans Lighthouse or outside Korsnas Works for berthing, and outside Northern entrance channel for passage through same. Ship's lines always used.

CARGO HANDLING: Container berth, max. draft 9 m. Three cranes with 30 ton capacity, two of which have automatic container spreaders for 20 ft. containers.

Roll-on/Roll-off berth, max. draft 4.7 m.

Terminal Granudden: A new port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal comprises 350 m. of quay with a Roll-on/Roll-off berth, having max. draft for vessels: 9.0 m. for length of 150 m. adjacent to Roll-on/Roll-off ramp and 10.5 m. for length of 200 m., 2 warehouses each having an area of 22,000 sq.m., as well as extensive storage space. The total terminal area is 150,000 sq.m. and it will have an annual maximum capacity of 1.2 million tons forest products. The terminal has very good connections with both main roads and the railway system.

STEVEDORES: 24 hours' notice (if possible) order arrange gangs.

MEDICAL: Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Vaccinations necessary on arrival from diseased area. (Common for all Swedish ports.) Quarantine Station established at Gavle with Quarantine Anchorage on outer roadstead.

TANKERS: *Tanker Berth No. 21:*

Max. length 220 m. (722 ft.). Max. draft (M.W.) 10.5 m. (34 ft. 5 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to Depot pipe-line size:

	mm.	in.
Heavy Fuel Oils	450	18
Gas Oil	400	16
Gasoline	350	14
Kerosene	250	10

Tanker Berth No. 1:

Max. length 200 m. (656 ft.). Max. draft (M.W.) 7.45 m. (24 ft. 5 in.).

Manifold connection size:

	mm.	in.
Fuel Oils	250	10
Gasoline	200	8
Kerosene	200	8

Berth to Depot pipe-line sizes:

	mm.	in.
Fuel Oils	350	14
Gasoline	300	12
Kerosene	250	10

Tanker Berth No. 2 and 3:

Max. length 125 m. (407 ft.). Max. draft (M.W.) 5.3 m. (17 ft. 5 in.).

Manifold connection size (all grades) 150 mm. (6 in.).

Berth to Depot pipe-line sizes (all grades) 150 mm. (6 in.).

Tanker Berth No. 105-106:

Max. length 195 m. (640 ft.). Max. draft (M.W.) 6.6 m. (21 ft. 8 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to Depot pipe-line (all grades) 250 mm. (10 in.).

Tanker Berth 107-108:

Max. length 195 m. (640 ft.). Max. draft (M.W.) 7.9 m. (25 ft. 11 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to depot pipe-line (all grades) 250 mm. (10 in.).

New Tanker Quay K201:

Max. length 220 m. (722 ft.). Max. draft 10.5 m. (34 ft. 5 in.).

Owned by Krangede A.B.

RADIO: Harnosand Radio (SAH).

RADAR/VHF: No port radar service, but Bonan Pilot Station, Eggegrund Lighthouse, and three pilot cutters equipped with both radar and VHF and assist any ship approaching pilot station on request. After calling pilot station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.

Also see "Pilotage."

DENSITY: Fresh water.

FRESH WATER: Delivered from water posts at all quays in Fredriksskans Harbour. Inner Harbour, at Korsnas Works and on roads fresh water delivered by water boat.

FUEL: All kinds of fuel oils available either from pipe-lines at oil berths or by lorries at all other quays. Following viscosities (Redwood I) normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscosities can also be delivered. Notice of delivery is required day before.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by either crew or stevedores. Only patent hatches have to be opened by crew.

CERTIFICATES:

Tonnage Certificate.
Derat Certificate (Not older than 6 months).
Certificate of Nationality (for Swedish ships only).

CUSTOMS ALLOWANCES: Tobacco: each crew member 200 cigarettes or 100 grammes of tobacco out of Bond.

Wine and spirit: Each crew member 1 bottle (75 centilitres) of spirit and moderate quantities of wine and beer out of bond. After a week in Sweden the same quantity may be taken out on request to Customs Office.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Denmark	Tel: 115050	Netherlands	Tel: 105200
Finland	Tel: 121204	Norway	Tel: 188180

REPAIRS: Repairs can be carried out in all parts of harbour by Granges Metalock AB.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriation arranged by Agent.

AIRPORT: Stockholm Airport (Arlanda) 145 km. (90 miles) served by regular airlines. Rorberg airport 16 km. (10 miles). Regular traffic to Swedish airports.

TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Twelfth Day (Jan. 6th); Good Friday; Easter Day; Easter Monday; First May (May 1st); Whit Sunday; Whit Monday; Midsummer Day (Saturday nearest to June 24th); All Saints' Day (first Saturday in Nov.); Christmas Day (Dec. 25th); Boxing Day (Dec. 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 11 53 00; Ambulance Tel: 12 90 90; Fire Tel: 12 90 90. Emergency Tel: 90 000.

TELEPHONES: Fredriksskans and Inner Harbour: Telephones can be placed on board at all berths in Fredriksskans Harbour and at three berths in Inner Harbour. At Korsnas Works: Telephones can be placed on board at two berths in Karskar and one at Kastet Pier.

SERVICES: Minor quantities of oil and other liquid residues can be discharged into tank lorries with special suction equipment.

DELAYS: Normally no delays in berthing, loading, discharging or bunkering.

DEVELOPMENTS: New shipping terminal for coal and coke where discharging capacity will be very high.

AUTHORITY: Gavle Hamn, Hamntorget 4, 80350 Gavle, Sweden. Tel: 178840. *Telex:* 47349. *Contact:* B. Walfridson, Port Director. (A.O.H. Tel:193369). M. Berglund, Port Captain (A.O.H. Tel: 128482).

GOTHENBURG: 57.42 N. 11.57 E. (See Plan Book)

DOCUMENTS:

2 Cargo Declarations (IMO model).
3 Crew Lists.
2 Passenger Lists.
2 Crew Declarations (must be signed by each crew member).
2 Stores List.
1 Health Document.
Nationality Certificate.
Tonnage Certificate.
Derat Certificate.
Certificate of Insurance or other financial security in respect of civil liability for oil pollution damage (if more than 2,000 tons of oil on board).
Manifests, Bills of Lading.

TRAFFIC CONTROL SYSTEM: The Port of Gothenburg has in co-operation with the National Swedish Administration of Shipping and Navigation established a traffic control system. It is a vessel movement control and information system managed from the Gothenburg Traffic Control Centre (TCC), call sign "Gothenburg Traffic". The system is based on radar control and VHF communication. Vessels over 300 g.r.t. or exceeding 50 m. length should report to the TCC on VHF Channel 13 incoming when 6 miles off Vinga Island, out-going when leaving the berth. There are also certain way-points in the area (marked on the charts) where vessels should report to the TCC. Vessels should keep continuous watch on VHF Channel 13 within the whole traffic-control area. A special "Master's Guide to Gothenburg Port Entry" issued by the Gothenburg Port Authority can be obtained from the Port Authority or from ship's Agent.

PILOTAGE: Incoming vessels have to notify the Traffic Control Centre (TCC) call sign "Gothenburg Traffic" on VHF Channel 13 or by telephone 031-12 54 33 that they require a Pilot. Notification to be done 3 hours before ETA at the pilot grounds at Vinga Island, where the pilot boat will be at hand. The pilot grounds are marked on the charts. Approved pilot ladder (if rail is high, accommodation ladder), heaving line and a man standing by to receive Pilot (Also see "Stockholm").

ANCHORAGES: Anchorages "A", "B" and "C" marked on the charts in the area round Trubaduren light, at Rivo Fjord and Dana Fjord. VLCCs should anchor in Area "A", 2 miles S.W. of Trubaduren light.

MAX. SIZE: Torshamnen, water depth 19.6 m. Fully loaded tankers of 225,000 d.w.t. on draft of 19.05 m. received. Partly loaded tankers of max. 380,000 d.w.t. have been received. Skarvik Harbour, water depth 13 m. Tankers up to 50,000 d.w.t. Skandia Harbour, general cargo, container vessels, water depth up to 12 m. General cargo harbours: for other cargo and passenger vessels 10 m. Water depth at MWL. Tide of no importance.

HEALTH: The Master of every ship, whose voyage has touched lands outside Europe (excepting U.S.A., Canada, Azores, Canaries, Madeira and Morocco), and who, within 28 days, arrives at Gothenburg from a port in any such land, shall submit to Customs on demand a Declaration of Health for the ship in the prescribed form. If ship arrives within 14 days of calling at any such port she must not touch land until inspected by the Quarantine Medical Officer and permission to land granted. Compulsory medical examination not required where a ship liable to inspection has undergone an approved Quarantine Inspection in either a Danish, a Norwegian or a Finnish port, and all questions in the Declaration of Health have been answered negatively. Exemption may also be granted to any other ship which would otherwise be liable for examination, if Master, pursuant to Article 21 of Quarantine Regulations for Sweden, has previously radioed all information regarding state of health on board to Health Authorities (Radio Pratique). Telegraphic address: "Portsan, Gothenburg". Messages must be made not less than 4 hours prior to ETA. (Preferably, messages should not be made during night). Free Pratique messages should include: Name of the ship; estimated time and day of arrival; number of crew; number of passengers; names of the last two ports called at outside Europe, and dates of departure therefrom; replies to the 6 questions contained in Declaration of Health.

RADIO: Goteborgs Radio, call sign SAG.

VHF: Pilot vessel on Channels 13 and 69.

TUGS: Tugs normally join vessel between the islands of Nya Alvsborg and Rya Nabbe. Tugs join at Dana Fiord for tankers bound for Torshamnen. According to Master's desire ship's or tug's lines can be used. Charge for tug's lines SKR 380 per tug; ships over 75,000 d.w.t. SKR 950 per tug.

BERTHING: No restrictions at any time of day and night. VLCCs berth and unberth in daylight only.

STEVEDORES: Goteborgs Hamn provides dock workers.

General Conditions for Assignment of Personnel (excluding external terminals):

Working time and guaranteed hours. (Gothenburg Stevedoring Co. supplement to the general terminal conditions of the Swedish Stevedoring Association).

1. *Normal Working Hours*	Inner Harbour	Skandia Harbour
	Monday-Friday	Monday-Friday
Day time	7 a.m. – 4 p.m.	7 a.m. – 4 p.m.
Shift I		6.30 a.m. – 4 p.m.
Shift II		4 p.m. – 12 midnight
Overtime:	4.30 p.m. – 5 a.m.	4.30 p.m. – 5 a.m.
Please note that all	Saturday	Saturday
overtime work is voluntary.	7 a.m. – 10 p.m.	7 a.m. – 10 p.m.
		Crane work
		7 a.m. – 4 p.m.
	Sunday/Holiday	Sunday/Holiday
	7 a.m. – 10 p.m.	7 a.m. – 10 p.m.
Completion:	Monday-Friday	Monday-Friday
	4.30 p.m. – 5 a.m.	4.30 p.m. – 5 a.m.
	Saturday	Saturday
	7 a.m. – 5 a.m.	7 a.m. – 5 a.m.
	Sunday/Holiday	Sunday/Holiday
	7 a.m. – 10 p.m.	7 a.m. – 10 p.m.

2. *Normally no work will be performed on the following days:* New Year's Day, May 1st, Midsummer Eve, Midsummer Day, Christmas Day, New Year's Eve.

3. *Guaranteed Hours:* Extra labour is guaranteed a minimum of four hours pay.

Overtime:	
Monday-Friday	3 hours
Saturday	5 hours
Sunday/Holiday	6 hours

Guaranteed hours are always to be paid in full. Ordinary labour is entitled to special compensation for work later than 9 p.m. Monday – Friday.

4. *Ordering times for assignment of resources:*

Inner Harbour and Skandia Harbour:	Weekdays latest 10 a.m. on the day before operation. Cancellation latest 12 noon on the day before operation.
Overtime:	Weekdays latest 10 a.m. on the same day. Cancellation latest 12 noon on the same day. Saturday/Sunday latest 10 a.m. on Thursday. Cancellation latest 9 a.m. on Friday. Holiday latest 10 a.m. on the day before the last working day before the holiday. Cancellation latest 9 a.m. on the last working day before the holiday.

5. The working hours are counted for each extra hour or part of that hour.

6. The above regulations are not valid in case of "force majeure" such as strikes, lock-outs, natural catastrophies, or any other unforeseeable incidents of which the Stevedoring Co. could have no control.

7. These regulations are valid until further notice. They can, however, be changed with immediate effect when/if some other agreement is made with labour unions concerned.

CONTAINERS: The Skandia Harbour for container handling with 4 terminals including 20 berths and 13 ferry ramps. Depths up to 39 ft. 04 in. (12 m.). Container cranes 30 ton – 60 ton.

BRIDGES: Alvsborgsbron (suspension bridge) in the Western part of the city (clearance 45 m.), Gotaalvbron (weighbridge) in the centre of the city (clearance 19.5 m.) and Marieholmsbron (railway bridge) in the Eastern part of the city (clearance 5.3 m). The bridges Gotaalvbron and Marieholmsbron keep continuous watch on VHF Channel 9. If no connection, contact "Gothenburg Traffic" on VHF Channel 13.

TANKERS:

Torshamnen:

		Berth No. 801	*Berth No. 800*
Operator		Gothenburg Harbour	
Users		BP, Shell and various	
Product		Crude Oil	
Minimum water depth at mean water	approaches	20.50 m.	20.50 m.
	alongside	19.60 m.	19.60 m.
Under keel clearance	approaches	1.45 m.	1.45 m.
	alongside	0.55 m.	0.55 m.
Dimensions safely acceptable (also see below)	length	335 m.	280 m.
	beam	no restr.	no restr.
	draft	19.05 m.	19.05 m.
	d.w.t. (summer)	abt. 250,000	abt. 115,000
Water density		1.013	1.013
Nature of bottom		clay	clay
Boom arrangement		4×16 in.	4×12 in.
Manifold heights	maximum	22.00 m.	17.00 m.
	minimum	3.00 m.	1.50 m.
Public telephone number		31632446	31632445

Draft: That the above figure, 19.05 m., is given on the basis of mean water level and brackish water (density 1.013). There is very little tide at Gothenburg, only about 20 cm. (8 in.). The draft is more affected by wind, Easterly winds blowing the water away from the coast, Westerly winds blowing the water towards the coast. In winter and early spring (January-May) there can be long periods of Easterly wind, when it would be prudent not to arrive on a deeper draft than 18.60 m./brackish water.

Lightering: In case of need lightering can be arranged 3 nautical miles S.W. of the Trubadur Lighthouse. This is in open sea and restricted to wind force less than 6 – 7 m./s.

For crude oil distribution to other refineries lightering can take place across the finger jetty from Berth No. 801 to Berth No. 800.

Gas lightering is being done via 8 in. acid proof steel pipe-line across jetty. Flanges drilled to ASA 150 and 300. No hoses available, vessels have to provide same.

Ballast: Cannot be received ashore.

Dimensions: The harbour is prepared to accept vessels exceeding 335 m. length provided distance from bow to manifold is max. 180 m. and vessels' draft does not exceed 18.29 m. (60 ft.), brackish water. Special approval needed in each case.

Bunkers: Supplied by barge only.

Moorings: Berth 801 – VLCCs: Owing to the somewhat exposed nature of berth Masters are advised, that when strong off-shore winds are forecast, to ballast the vessel, stop discharge if necessary and, maintain steam on the winches to supplement the brakes. It is strongly recommended that vessels over 210,000 s.d.w.t. make use of the extra mooring as described below.

Instructions for the use of extra mooring (E.M.):

1. Pass ashore a wire and a shackle and make fast to the eye of the E.M. on the caisson. Free the E.M. from its hook by means of the capstan on the caisson. Bring home the E.M. and belay it.
2. At departure. Before letting go the E.M. make fast a strong rope or a wire in the eye of the E.M. and take the other end to the caisson for hanging off the E.M. Let go the E.M. and, by means of the capstan, back to the caisson and place it on its hook, heave it.

Remarks:

520-521: Only used for loading from or discharging to BP.

519: Mainly used by Shell and for discharge of asphalt crude. Being deepest product berth can in case of need also be used by other importers/exporters after approval by Shell. However, products will then have to be pumped over long distances, causing slow loading/discharge.

510-511: "Common users".

Note: Maximum draft:

On lesser draft sizes up to 210 m. – 215 m. may be accepted but special approval from the Harbour Authorities needed on each occasion.

DENSITY: Average density 1012. Tide of no importance.

FRESH WATER: Available from quay or water boats.

FUEL: All grades available at short notice.

GANGWAY/DECK WATCHMEN: Watchmen accepted by Harbour and Fire Authorities on tankers and vessels loaded with explosives. On other vessels not necessary.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCES: Tobacco, per 10 days 200 cigarettes or 250 gram other tobaccos. Wine and/or Spirits, per 10 days 1 bottle of spirits and 1 litre of wine, alternatively 2 litres of wine.

Require report latest 24 hours prior to arrival via Port of Gothenburg Co.

CARGO GEAR: Certificates that equipment is approved.

IDENTIFICATION CARDS: Not necessary. Crew list to be furnished in the oil harbours.

CONSULS:

The following countries are represented in Gothenburg:

Argentina
Austria
Bangladesh
Belgium
Bolivia
Brazil
Costa Rica
Denmark
El Salvador
Finland
France
Fed. Rep. of Germany
Great Britain
Greece
Guatemala
Iceland
Ireland
Italy

HALLSTAVIK: 60.03 N. 18.35 E. (See Plan Book)

DOCUMENTS: 4 Crew Lists; other documents see "Stockholm".

PILOTAGE: Svartklubben Pilot Station. VHF Channel 16 and others. Radar at station and in boats. 5 hours' notice prior to arrival. Tel: Hallstavik 0175/10006. Cable: "Pilotstation Hallstavik".

ANCHORAGES: Good and protected anchorage places available.

RESTRICTIONS: Tankers are navigated in daylight only.

MAX. SIZE: Draft not to exceed 23 ft.

HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.

RADIO: Stockholm Radio.

TUGS: Normally available.

STEVEDORES: Loading effected by factory. Ordinary working hours 0630 – 1530, maximum 1 hour overtime. Saturdays no work.

MEDICAL: Medical attendance available day and night.

TANKERS: Max. draft 23 ft. Connection 6 in., pipe to quay-cisterns is about 1,000 m., discharging rate about 200 t.p.h.

DENSITY: Practically fresh water.

FRESH WATER: Available from quay; rate 1 t.p.h.

FUEL: Delivered by lorries from Stockholm.

CONSULS: At Stockholm, 100 km. away.

REPAIRS: Minor repairs only.

OPENING/CLOSING HATCHES: Ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: Loading by ship's gear.

AIRPORT: Stockholm Airport, Arlanda, 75 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Easter; Whitsuntide; Midsummer; Christmas and New Year's Day.

POLICE/AMBULANCE/FIRE: Alarm Tel: 90000.

GENERAL: *Shippers:* Holmens Bruk AB. Export about 300,000 tons of newsreel/year. Import about 130,000 tons of fuel oil. 2 ordinary loading quays and 1 Roll-on/Roll-off berth available.

Agency: Erik Clemedson AB. Cables: "Clemed". Telex: 17277.

AUTHORITY: Holmens Bruk AB, 76301 Hallstavik, Sweden. *Tel:* 0175-21000. *Telex:* 19259. *Cables:* Holmen. *Contact:* N. Magnusson, Harbour Master.

HALMSTAD: 56.40 N. 12.52 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
3 Stores Lists (Tobacco and Stores).
5 Manifests.
2 Bills of Lading and Ship's Papers.

PILOTAGE: Advance notice of ETA 5 hours before arrival. Pilot station and pilot boat equipped with VHF Channels 16, 13, 6. Pilot boards by lightbuoy Halmstad Road (L.Fl. 10 sec. 56° 37′ N., 12° 47.5′ E.) (Also see "Stockholm".)

ANCHORAGES: Good holding ground in 30 – 40 ft. on road 1 to 2 miles S.E. of breakwater.

MAX. SIZE: *Inner Harbour:* Length 700 ft., draft 30 ft.

Outer Harbour: Length 770 ft., draft 37 ft.

RADIO: Gothenburg Radio.

RADAR: Pilot station equipped with radar.

VHF: Port Authority on Channel 16, 13 and 9.

TUGS: Meet at Halmstad Road. Ship's lines used.

BERTHING:

Berth	*Length* (m.)	*Max. draft* (ft.)
Ostra kajen	300	30 ft.
Jarnverkskajen	220	27 ft. 6 in.
Ostra kajen	230	27 ft.
Importkajen	470	23 ft. 6 in.
Importkajen	270	22 ft.
Tullkammarkajen	400	18 ft.
Kattegattshamnen	285	27 ft. 6 in.

SPECIAL CARGO HANDLING FACILITIES:

Roll-on/Roll-off: Kattegattshamnen: 2 fixed ramps. 43 m. and 23 m. wide. Max. draft 27 ft. 6 in.

Ostra kajen: 1 fixed ramp. 25 m. wide. Max. draft 27 ft. 6 in.

Containers: Handled at Ostra kajen and Kattegattshamnen.

BULK HANDLING FACILITIES: A new harbour basin (Oceanhamnen) was opened in 1981. Alongside the berth ships with max. LOA 235 m. and max. draft 11.3 m. can be handled. A rail mounted bulk-unloader, screw type, can discharge bulk-cargoes at a capacity of 500 t.p.h. On the quay is a bulk-terminal operated by Nordic Bulk AB, Halmstad.

Bulk cargo can also be handled alongside the Importkajen and Jarnverkskajen with grab-equipped cranes.

CRANES: One mobile crane, 30 tons at 21 m.

MEDICAL: Hospital facilities available.

TANKERS: Max. draft at oil berth 30 ft. Max. LOA – 700 ft. Diameter of discharge lines 8 in. and 10 in.

DENSITY: Average 1005.

STEVEDORES: *Working Hours:* Monday – Friday 0700 – 1630 plus 3 hours' overtime. Saturday – Overtime 6 hours. Sundays – By special agreement.

FRESH WATER: Fresh water available from berth 35 t.p.h.

FUEL: Viscosities available: 1.2 englergrades/20°C. By arrangement ship's Agent.

GANGWAY/DECK WATCHMEN: Not necessary. Available if required.

OPENING/CLOSING HATCHES: Normally carried out by crew, but if carried out by stevedores cost charged to vessel.

SHIP CERTIFICATES: Bill of Measure, Nationality Certificate and Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco/spirits, 1 bottle spirits, 1 bottle wine and 200 cigarettes free on board. Quantity over will be closed under Customs seal. No other restrictions.

IDENTIFICATION CARDS: Only needed in oil harbour.

CONSULS:
Danish, Dutch, Finnish, German and Norwegian.

REPAIRS: Shipyard carries out ship repairs.

DRY DOCKS: 2 slips.

REPATRIATION: Facilities exist for changing crew and repatriation.

AIRPORT: Halmstad Airport, 1 mile from town centre. 2 flights per day for Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Twelfth Day; Good Friday; Easter Day; Easter Monday; Ascension Day; Whit Sunday; Whit Monday; Mid-Summer Day; All Saints' Day; Christmas Day; Christmas Monday, Labour Day.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONE: For placing a telephone on board cost is 90 crs., and 40 crs. a day for hire.

SHORE LEAVE: Crew members allowed ashore.

GENERAL: *Charts:* BA 3671. Swedish Charts Nos. 92 and 923.

AUTHORITY: Halmstad Hamnforvaltning, P.O.Box 235, 30104 Halmstad, Sweden. *Tel:* 035-11 80 30. *Contact:* J. Benninger, Port Captain.

HARGSHAMN: 60.10 N. 18.29 E.

The port is situated in the Archipelago of Oregrund, about 130 km. North of Stockholm and about 110 km. South of Gavle. Only iron ore products are exported, and the port is managed by the shippers, SSAB Dannemora Gruvor. It is a natural and well sheltered harbour, suitable for vessels up to about 25,000 d.w.t., bigger vessels are loaded with limited cargoes.

DOCUMENTS: ETA is to be given 48 and 24 hours in advance by cable or phone to "Oreship Uppsala". On arrival a cargo plan is to be given to the Agent or foreman, stating quantity required and loading rotation of hatches, as well as estimated draft on sailing.

The Customs Officers require the following documents on arrival:
Tonnage Certificate (Certificate of Registry).
Certificate of Nationality.
Swedish Light Dues receipts for current year.
Crew List IMO FAL Form No. 5, 3 copies
Crew's effects declaration IMO FAL Form No. 3, 1 copy
Ship's stores declaration IMO FAL Form No. 4, 1 copy.

If the international IMO Forms are not available, similar Forms are accepted.

PILOTAGE: Pilotage compulsory for vessels over 1,600 g.r.t.

Pilot is embarked off Svartklubben lighthouse (60° 09′ N., 18° 52′ E.) and has to be ordered 5 hours before needed. Pilot can be ordered via the Agent or the Svartklubben Pilot Station, phone: Hallstavik (0175) 100 06. Cable: "Pilotstation Hallstavik" or by VHF at any of the Swedish pilot stations. Distance to Hargshamn is about 17 miles. For vessels arriving from ports in Gavle district, Pilot will board on request at Oregrund or North thereof, such request to be made as above.

RESTRICTIONS: Loaded vessels with draft over 23 ft. 6 in. at MWL are navigated in daylight and good visibility only.

MAX. SIZE: Max. draft allowed (at MWL in FW) 34 ft. (10.4 m.). Density of water: 1006. Max. length about 575 ft. (175 m.). Max. breadth about 80 ft. (24.4 m.). The breadth limitations may be increased in the case of ore-carriers with side tanks. Max. distance water level to hatch coamings about 33 ft. (10 m.).

TUGS: A tug of 1,200 h.p. is available from Hallstavik, and is normally used to assist vessels over 9,000 d.w.t. on departure only. A small tug of 230 h.p. is available at the port.

BERTHING: There is an ore quay about 90 m. in length and depth alongside of 36 ft. The loading conveyor moves along the quay over a distance of 85 m., therefore only the biggest vessels have to shift during loading. Loading capacity 650 – 800 t.p.h. Stowage factor of the ore 17 – 18 cu.ft./ton and concentrate about 13 – 14 cu.ft./ton.

STEVEDORES: Work is effected in 2 shifts: 0600 – 2200 hrs., Saturdays and days before holidays 0600 – 1200 hrs. Work on night shift and on Sundays/holidays can be arranged on request. However, on the following holidays work cannot be arranged: New Year's Day, Good Friday, Easter Eve, Easter Sunday, 1st May, Whitsun Eve, Whit Sunday, Midsummer holidays (last Friday/Sunday in June), All Saint's Day (1st Saturday in November), Christmas Eve, Christmas Day, New Year's Eve.

FRESH WATER: Available.

CUSTOMS ALLOWANCES: 200 cigarettes per man and 1 bottle of spirits per Officer.

EMERGENCY CO-ORDINATION CENTRE: Stockholm Radio.

STORING: Can be effected with some minor difficulties.

SURVEYORS: From Stockholm (130 km. away).

ICE: The port can be kept open all Winter by an ice-breaking tug. Normally there is ice from the last week of December until the last week of March/first week of April. In port and the entrance there is fast ice up to 1.5 – 2 ft. Navigation is maintained in a broken ice-channel. At the pilot station or in the Aland Sea there is very seldom packed ice or other difficulties during a normal Winter.

AUTHORITY: SSAB Dannemora Gruvor, S-740 73 Hargshamn, Sweden. *Tel:* 0173-20192. *Telex:* 76042. *Cables:* Gruvkontoret Dannemora. *Contact:* R. Soderqvist, Harbour Master.

AGENT: Bjorsbo Shipping HB, S-740 73 Hargshamn. Tel: Osthammar 0173-200 80. Telex: 76042. Telegrams: Oreship Uppsala.

HARNOSAND (Hernosand): 62.38 N. 17.57 E.

DOCUMENTS:
2 Crew Lists and/or 2 Passenger Lists (stating what tobacco, cigarettes or spirits each man has in their possession).
Derat Certificate.
Manifest and/or Bills of Lading.
Register, and if vessels have previously been in Sweden same year, bills for light dues paid.

PILOTAGE: Applications for licensed Pilots should be made at least 5 hours before arrival. When making application, specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable to make application by telephone or by radio via a coastal station or by some other method direct to pilot station. Also possible to request Pilot by VHF.

Pilot station at Spikarna/Sundsvall for Northbound vessels and Skagsudde/Ornskoldsvik for Southbound vessels.

ANCHORAGES: In port approaches in depth of 15 m. to 40 m.

RESTRICTIONS: During Winter assistance given by State Ice-breakers.

MAX. SIZE: Up to 32 ft. 5 in. draft. Also see "Tankers".

RADIO: Cable Agents to give ETA, draft and cash required via either Hernosand Radio SAH or Stockholm Radio SDJ.

HEALTH: Vessels arriving from ports outside Europe must, for inward clearance, provide Customs Officer with written declaration of freedom from infection. Further instructions will be issued by Customs Office when such a declaration cannot be given.

TUGS: Tug assistance is available.

BERTHING: Depth alongside main quays from 7 m. to 8 m.

TANKERS: *Municipal Oil Pier:* Max. LOA 200 m. Max. draft 10.0 m. Depth alongside 10.5 m. Max. d.w.t. 30,000. Vessels berth starboard side alongside. Tugs available but not required. Offshore anchor used.

DENSITY: Nearly fresh water.

FRESH WATER: Available from the quays or by barge.

FUEL: Can be supplied.

GANGWAY/DECK WATCHMEN: Gangway watchmen available.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 75 centilitres spirits per man/week. Extra granted on request.

CERTIFICATES: See "Stockholm".

IDENTIFICATION CARDS: Not necessary.

REPAIRS: Most repairs possible.

DRY DOCK: At Gustavsvik.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day.

Work ceases at 1130 hrs. on the following eves of holidays and is voluntary and paid with 100 per cent overtime: Easter Eve; Whitsun Eve; Midsummer's Eve; Christmas Eve and New Year's Eve.

POLICE/AMBULANCE/FIRE: Telephone numbers: Accidents, Police, 90000; Fire: ask for alarm 90000.

AUTHORITY: Harnosands Hamn, P.O.Box 200, 87101 Harnosand, Sweden. *Tel:* (0611) 12119, 12010. *Telex:* 71020. *Cables:* Ramstrom. *Contact:* Harbour Master.

HELSINGBORG: 56.03 N. 12.41 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Call Pilot on the VHF Channel 16 (Tel: 042-110035). Pilots board about 0.5 nautical miles off jetty of Helsingborg Northern Harbour. Good anchorage within area of about 0.5 nautical miles off jetty.

Pilot's Report: April 1982.

Pilotage: Call Pilot on VHF Channel 16. Pilots board about 3 nautical miles North or South of Helsingborg North Harbour. On request Pilot will meet at Svinbadan Lighthouse or at Oresund North Lightbuoy, outside Hoganas. Helsingborg Pilots are also Seapilot for the Sound, Kattegatt, Baltic and North Sea.

Anchorages: It is not recommended to anchor outside Helsingborg due to the heavy ferry traffic.

Good anchorage is found at Raa Roads, about 0.5 nautical miles S.W. from Raa Lighthouse (3 nautical miles South from Helsingborg).

Pilots: 24-hour service. Channel 16, 14 and 13 (VHF relay station on Kullen Lighthouse).

APPROACHES: The harbour basins are very easy to approach. The deep water outside breakwaters – varying from 10 m. to 30 m. (33 ft. - 98.5 ft.) – adjacent to the sailing route in the Sound facilitates port calls. Normally comparatively large ships can proceed directly to the quays without tug assistance.

ANCHORAGES: See "Pilotage".

MAX. SIZE: Permissible length about 220 m.; breadth unlimited; draft 13.0 m. on MLW. No tides but certain variations following prevailing winds.

Tankers: Max. draft 10.5 m.

HEALTH: Pratique automatic for all vessels arriving from non-infected ports. In cases where Pratique should be obtained, notice to be given through ship's Agent. Further directions given by Pilot.

RADIO: For communication – Goteborgs Radio.

VHF: 24 hour watch on Channel 16. Call sign "Helsingborg Harbour", working Channels 11 and 12. Ships to contact the harbour 1 hour before arrival and 1 to 0.5 hour before departure.

Pilots: Channel 16, working Channels 13, 14 and 69.

Tugboats: Working Channels 11, 12 and 69.

TUGS: Join vessel outside entrances. Vessel's lines used.

3 tugs available, up to 2,640 h.p.

SERVICES: Tank cleaning, discharge of tank washings, compass adjustments, etc., can be carried out after application through local Agents.

Environment Protection: For oil protection, cleaning, sludge-suction, refuse collection etc., call Sylvan & Qvibelius AB, tel. 042-12 75 90.

Dustbins for Ships: Dustbins are available. Galley refuse is to be delivered in plastic bags.

Receiving Station for Waste Oil: By law, water pollution from ships is prohibited. Oil residues may be accepted by the Receiving Station, tel: 042-11 72 73 or 10 63 00.

Provisions: Provisions are supplied by ship-chandlers 24 hours daily. For ships calling for provisions only, no harbour dues apply.

Repair/Maintenance: Repair and maintenance of containers, flats, trailers, trucks and other cargo handling equipment is carried out by AB Scandrep, tel: 042-13 82 72, telex: 72090.

Testing according to CSC provisions (Convention for Safe Containers).

For ship repair call AB Fartygsmekano, tel: 042-12 02 95.

SHORE LEAVE: No restrictions.

REGULATIONS: Normal regulations apply.

DELAYS: No other delays than berths being occupied by working vessels can be expected.

AUTHORITY: Helsingborgs Hamn, P.O.Box 1434, 251 14 Helsingborg, Sweden. *Tel:* 042-10 63 00. *Telex:* 72215. *Contact:* E. Lorentzon, Marketing Manager.

HOGANAS: 56.12 N. 12.33 E. (See Plan Book)

Privately-owned port serving owning company only – Hoganas AB. Customs and pilotage arranged through Authorities in Helsingborg (12 nautical miles S.E. of Hoganas).

DOCUMENTS: See "Stockholm".

PILOTAGE: Compulsory. Pilot obtainable at Hoganas or at Helsingborg. Pilot service day and night, available after request to pilot office at Helsingborg.

RESTRICTIONS: Entrance channel, Length 750 m.; width 65 m.; depth 8.20 m.

The harbour is seldom closed by ice.

MAX. SIZE: LOA 130 m., max. draft 7.40 m.

TUGS: There are no tugs stationed at Hoganas, but tugs are available after request to the Harbour Office at Helsingborg.

BERTHING: *The Pier (Extending South-Westerly).*

Length of quayage:	380.00 m.
Depth alongside:	
For 120 m. (from outer end)	6.60 m.
For the next 160 m.	8.20 m.
For remaining 100 m. varies down to	4.00 m.

The Cross Quay:

Depth alongside at 75 m. from Northern end	3.50 m.
the remainder is unnavigable	

Quay in the Middle of the Harbour:

Length of quay:	180.00 m.
Depth alongside N.W. side:	
For 120 m. (from outer end)	6.60 m.
For the next 35 m. the depth varies from to being unnavigable.	4.2 m.
Depth alongside S.E. side:	
For 30 m. (from outer end)	2.50 m.
remainder	unnavigable

The depth of water at this port is somewhat affected by winds.

CRANES: 1×25 ton rail mounted electric crane (21 tons-grab duty), 1×25 ton mobile crane.

REPAIRS: Machine shop repairs only.

STEVEDORES: Working hours; a normal working day, Monday to Friday from 0700 to 1600 hrs. Normally no working on Saturdays.

FRESH WATER: Available.

FUEL: Can be supplied.

AUTHORITY: Hoganas Hamnbyggnads AB., Box 501, S-263 01 Hoganas, Sweden. *Tel:* 46 42-38000; (Harbour) 042-38224. *Telex:* Hoganas AB 72744 Hbeldf S. *Cables:* Clayworks Hoganas. *Contact:* Bo Norberg, General Manager. Leif Andersson, Harbour Master.

HORNEFORS: 63.37 N. 19.54 E. (See Plan Book)

DOCUMENTS:

1 List of Bonded Stores.
2 copies Tobacco List.
3 Crew Lists.
3 Passenger Lists.
Health documents, none – if all on board healthy. In case of illness on board, this must be reported to Customs on arrival.
Copy B/L and copy Manifest.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None.

REPAIRS: No facilities available.

REPATRIATION: No facilities for crew changes.

AIRPORT: 25 km. from port. Served by Linjeflyg domestic services, flights to Stockholm 6 times a day.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Christmas Eve; Christmas Day; Second day after Christmas; New Year's Eve; New Year's Day; Easter Friday; Saturday and Sunday; Midsummer Eve and Midsummer Day; Whitsunday; Epiphany (1st May); Ascension Day; The Day of All Saints (1st weekend November).

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONES: None available for placing on board.

AUTHORITY: Norrlands Skogsagares Cellulosa AB, Hornefors Fabriker, P.O.Box 176, 87201 Kramfors 1, Sweden. *Telex:* 54040.

HUDIKSVALL (including Iggesund): 61.44 N. 17.07 E. (See Plan Book)

PORT LIMITS: Vessel is considered to be an "arrived vessel" when berthed alongside quays in port or, if berths not available, at anchor in Inner Roads, outside berths; but not when vessels, owing to darkness etc., are anchored outside pilot stations or in Outer Fairways.

DOCUMENTS: If arriving direct from foreign port, following documents presented to Customs Officer who embarks during office hours (0800 – 1700 hrs.).

3 Crew Lists.
2 Tobacco Lists.
Derat Certificate (not over 6 months old).
Certificate of Nationality.
Certificate of Tonnage.
2 Manifests covering incoming cargo.
Receipts of Light Dues, paid to Swedish Authorities during year.

PILOTAGE: Hoelick Pilot Station Lat. 61° 37′ N., Long. 17° 28′ E. open for ordering Pilots. VHF Channel 16, after contact working Channel VHF 13. Pilot to be ordered 5 hours before arrival. If ordered before 2100 hrs., vessel can also obtain Pilot between 2100 – 0530 hrs. Pilot boat: orange painted cutter. International pilot signals. Pilot boards near "Myran" Lightbuoy: Lat. 61° 36′ N., Long. 17° 29′ E. Telegraphic address of pilot station at Hoelick: "Pilotstation Hudiksvall". (Also see "Stockholm").

Note: Gavleborg Pilots will undertake pilotage. Call "Gavleborg Pilots" on VHF Channels 16/13 to arrange rendezous.

ANCHORAGES: Anchorage places for vessels awaiting Pilot or anchoring owing to weather conditions: 61° 37.5′ N., 17° 25.0′ E.; 61° 37.0′ N., 17° 22.0′ E.; 61° 37.7′ N., 17° 21.3′ E. depending upon prevailing winds, etc. Bottom mud and/or sand. Depth 10 m. – 30 m.

RESTRICTIONS: No tidal water at Hudiksvall. Tankers of more than 100 m. in length between perpendiculars not allowed entry during darkness because of narrow channel with some curves. Dry cargo vessels up to 150 m. length allowed entry after dark.

MAX. SIZE: *Tankers:* Daylight 45,000 d.w.t., length 210 m., draft 10 m. After dark 6,000 d.w.t. length 100 m., draft 7.5 m.
Other Vessels: 16,000 d.w.t., length 160 m., draft 8.7 m.

LW between 0.2 m. – 0.5 m. sometimes as much as 0.7 m. below MWL, may occur often. LW periods may occur when N.W. winds blowing over Northern Sweden.

HEALTH: Pratique automatic. No doctor visits incoming vessels if not specially ordered for treatment on board, etc.

RADIO: Vessels coming from South and having not yet passed the Stockholm area are recommended to call Stockholm Radio – VHF Channels 25 or 28 for vessels between Gotland/Sweden, 24 outside Stockholm South, 28 Stockholm East and North, 23 North of Aalands Sea, and in Gavle Bay. Hernosand Radio SAH: Channels 25 Hudiksvall area, 24 Sundsvall area, 23 Hernosand area, 28 Ornskoldsvik area. Hudiksvall harbour office: Channel 16. Working Channel 9.

TUGS: Tug compulsory for tankers over 6,000 d.w.t. and for other vessels over 8,000 d.w.t. in fairway. Vessels met near isle of "Enbarsskar" at Lat. 61° 39.5′ N., Long. 17° 17.0′ E. For mooring purposes tug compulsory for tankers over 6,000 d.w.t. and for other vessels exceeding 5,000 d.w.t. Ship's lines used. Ice-breaking tug "Mercur", call sign SIJL, 3,000 h.p. available in Hudiksvall during the whole year.

BERTHING: Main berth Hudiksvall draft allowed at MW 8.7 m. alongside 165 m., thereafter 5.4 m. alongside 30 m. and thereafter 4.9 m. alongside 160 m. One Ro–Ro ramp draft allowed 8.7 m. at MW.

Pier at Iggesund 7.4 m. draft allowed MW 150 m. length of pier. Ro-Ro berth 17.4 m. draft if more than 12 m. from Ro-Ro berth, if less, draft allowed 6.3 m. Ro-Ro berth II 7.4 m. draft allowed if more than 12 m. from berth, if less, 6.7 m.

STEVEDORES: Ordered 1600 hrs. on day preceding vessel's arrival. For loading starting Monday morning, gangs to be ordered before 1100 hrs. local time Saturday. 3 – 5 gangs available at Hudiksvall and Iggesund; Stocka 3 gangs. Working hours: Monday-Friday, 0700 – 1600 hrs.; Meal hours: 0900 – 0930, 1230 – 1300. 2 hours' overtime at extra cost of 50% Monday, Tuesday, Thursday, Friday (1600 – 1800 hrs.). For completing vessel, further 3 hours Monday, Tuesday, Thursday, Friday (1800 – 2100 hrs.). Extra cost of 100%. For completing vessel 5 hours' overtime can be obtained on Wednesday (1600 – 2100 hrs.), 2 hours at 50% and 3 hours at 100% extra.

On Saturdays no normal work, but stevedores available for maximum 8 hours' work, 100 per cent overtime has to be paid, and minimum 5 hours has to be paid even if vessel working less than 5 hours on Saturdays.

TANKERS: One berth only. Depth alongside 11 m. Draft allowed 10 m. at MW. Pipe diameter for fuel: 10 in., light oils: 8 in. Connecting hoses between pipes and vessel: 8 in. diameter, both types. Shore tanks lie about 100 m. – 200 m. from berth, 5 m. – 8 m. above sea. Surface of jetty about 2 m. above sea level.

DENSITY: Average 1002 – 1001.

FRESH WATER: Fresh water available all berths. Delivery capacity about 15 t.p.h. – 20 t.p.h. During Winter it is difficult to arrange hoses, vessels assist with own hoses.

FUEL: Available all berths. Delivered by tank-lorries from Sundsvall 50 miles North of Hudiksvall. 24 hours' notice required.

FIRE PRECAUTIONS: No special precautions. Within bounded area oil jetty smoking prohibited. Also on new quay outside sawmill.

GANGWAY/DECK WATCHMEN: Available in all ports, not necessary if not required by vessel.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Crew over 18 allowed 200 cigarettes; 1 bottle of spirits out of bond. If vessel stays in Swedish ports but still in foreign trade, above quantities obtained from bond once a week (every 7 days). Instead of spirits 1 bottle wine or 6 bottles export beer allowed.

IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable he carries passport.

CONSULS:

For Stocka: as Hudiksvall.

TELEPHONES: No telephones available for connecting onboard at Iggesund. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.
GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.
The port of Stocka is closed to commercial vessels.
SERVICES: No tank cleaning or discharge of tank washings. Compass adjusting: Tel: 0650/10 339 (Pilot Office). Ordered through Agent.
PORT REGULATIONS: Speed limit: maximum 5 knots within the harbour basin. Plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as protection against oil leakage.
DELAYS: During Winter (December-April) delays on berthing/sailing owing to ice in fairways and alongside quays. Mooring delays will occur owing to ice between vessel and quay.
AUTHORITY: Hudiksvalls Hamnstyrelse, Tullhuset, 82400 Hudiksvall, Sweden. *Tel:* 0650/19166, 17140. *Contact:* Arne Strandell, Harbour Master.

HUSUM: 63.20 N. 19.09 E. (See Plan Book)

PILOTAGE: Contact local Agent: Grundberg Shipping AB, Tel. 0660/10 235.
MAX. SIZE: Max. draft 10.6 m.
TUGS: Available.
BERTHING: No special requirements other than authority from local Agent.
In the South part of the harbour basin there is a new concrete berth; namely the raw material berth.
(i) The South part of the wharf is 180 m. long with 11.4 m. depth.
Loading: Pulp and paper by mobile cranes. Turpentine and resin-oil via 6 in. – 8 in. pipe-connections. Capacity 200 t.p.h.
Discharging: Raw-oil via 12 in. and sodium hydrate via 6 in. – 8 in. pipe-connections. Unloading of limestone, china clay, sodium sulphate, sulphur, aluminium sulphate, softwood and hardwood by mobile cranes.
(ii) The North part of raw-material berth is 65 m. long, 10 m. depth. with a solid Ro-Ro berth 16 m. wide. There are connections available for loading/unloading fluid products.
To the North of the raw material berth there is the loading berth, 300 m. long and approximately 10 m. depth for loading pulp and paper using mobile cranes. Connected to the loading berth is a solid Ro-Ro berth with a length of 30 m.
There are warehouses with a total storage capacity of 15,000 sq.m.
STEVEDORES: Stevedores can be ordered from representative of local Agent. Labour must be ordered prior to 1400 hours to start following day or for a second shift. Labour for the same day at 1000 hours must be ordered at 0800 hours, labour for 1200 hours ordered at 0930 hours and labour to start at 1400 hours ordered prior to 1100 hours.
FRESH WATER: Available through hose pipes.
FUEL: All grades and viscosities available.
AIRPORT: Approximately 30 minutes by car, served by regular airlines.
TIME: GMT plus 1 hour. Summertime kept April to October.
POLICE/AMBULANCE/FIRE: All services available.
TELEPHONES: Available on wharf.
SERVICES: Post and telex facilities. Various other services available or can be provided.
GENERAL:
Tides: Water level in metres above (+) and below (–) average water level.

High water level	+1.0 m.
Normal high water level	+0.7 m.
Normal low water level	–0.6 m.
Low water level	–1.1 m.

Local Travel: Buses from Husum to Ornskoldsvik (25 km.). Railway station at Ornskoldsvik.
AUTHORITY: Mo Do Cell AB, S890 35, Husum, Sweden. *Tel:* 0663-10700. *Telex:* 6058 Massa/Pulp or 6070 Paper/Pulp. *Cable:* Modocell Husum. *Contact:* Frank Pettersson, Harbour Master.

KALMAR: 56.40 N. 16.20 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for vessels carrying dangerous cargo and vessels exceeding 800 g.r.t. Pilot may be ordered on VHF, Channel 16 or by telephoning 0480/10719. Approaching from North, Pilot boards at Skaggenas or Krongrundet, from the South at Tradgardsgrundet. Round-the-clock service provided. (Also see "Stockholm").
ANCHORAGES: Good anchorage availale outside port.
MAX. SIZE: Largest vessel 25,000 tons deadweight, draft 24 ft. Channel and harbour depth 26 ft. Ferry berth 22 ft.
TUGS: Available, order by Tel. 15775.
RADIO: Stockholm Radio.
VHF: Harbour Master on VHF Channel 16.
BERTHING:

Quay	*Berth No.*	*Length (m.*	*Depth (m.)*	*Remarks*
Elevator Kajen	2 – 3	200	7.7	—
Finngrundet-Barlastholmen	22 – 31	990	5 – 7.7	1 Floating Ro/Ro Terminal-Link-span
Tjarhov	38 – 47	910	6 – 7.7	—

CARGO HANDLING FACILITIES: 3 portable electric cranes of 5 tons each, 4 mile cranes of 23 – 36 tons and 1 mobile crane of 18 tons. 1 floating crane available, maximum lifting capacity 75 tons.
STEVEDORES: Available weekdays 0700 – 1630 hrs. Overtime is worked Saturdays and eves of public holidays.
TANKERS: Oil Dock (Berth No. 48) has depth of 8 m. alongside and has dealt with partly loaded ships of 25,000 tons. Discharge capacity about 28,000 cu.ft./hr.
MEDICAL: Hospital available.
FRESH WATER: Available from wharves.
FUEL: Bunkers available by barge or at Oil Dock. Tel: (480) 11730.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes plus 1 bottle spirits.
CONSULS:

Danish Vice-Consulate	Tel. 14719
Finnish Consulate	Tel. 15580
German Consulate	Tel. 26100
Netherlands Vice-Consulate	Tel. 14444
Norwegian Vice-Consulate	Tel. 22050

REPAIRS: Available. Divers for underwater repairs. Major repairs undertaken.
DRY DOCKS: 2 floating docks. 1 for vessels up to 3,000 d.w.t. and 1 for vessels up to 10,000 d.w.t., also slip for vessels up to 850 tons. (AB Kalmar Varv Tel. 0480/15390, Telex 43100).
AIRPORT: 10 km. from the port.
DEVELOPMENTS: Store houses for general cargo and sawn timber of about 7,000 sq.m. have been erected.
AUTHORITY: Kalmar Hamn, Box 810, 39128 Kalmar, Sweden. *Tel:* 480-15775. *Contact:* C. J. Nordheim, Secretary.

KARLSBORGSVERKEN (Kalix District): 65.48 N. 23.17 E.

PILOTAGE: Pilot station "Erikren", Karlsborgsverken. Pilots embark or disembark at Maloren 18 nautical miles South of Karlsborgsverken.
MAX. SIZE: Max. draft entrance to Karlsborgsverken 6 m., to Axelsvik 8.8 m. Size no limit.
TUGS: Available.
BERTHING:

	Max. draft.	*Length of quay*
Cellulose Quay	6.0 m.	145 m.
Timber Quay	6.0 m.	250 m.
Axelsvik Oil Harbour	8.8 m.	60 m.
Tore (17 nautical miles) N.W. Karlsborgsverken	6.0 m.	170 m.

CRANES: No land cranes. Mobile cranes to hire for loading/discharging.
STEVEDORES: Available, No particular ETA advice required except as normally sent by Master to the Agent.
MEDICAL: Hospital and dental services available.
TANKERS: Axelsvik (Oil Harbour) 4 miles East. See "Berthing".
FRESH WATER: Available at all berths except at Axelsvik Oil Harbour.
OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
CONSULS: None.
REPAIRS: Workshop available for repairs.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone 90000 in emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.

AGENT: Grundberg Shipping AB, P.O.Box 716, S–941 28 Pitea, Sweden. Tel: 0911–46070. Telex: 68307 Shipexp S. Cables: Grundbergs Pitea. Contact: Ake Kattstrom.
At Karlsborgsvrken: Grundberg Shipping AB, G: a Faktorskontoret, S–950 53 Karlsborgsverken. Tel: 0923-20156. All communications to be via Pitea.

KARLSHAMN: 56.10 N. 14.52 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists (IMO Forms
3 Passenger Lists.
2 Tobacco Lists.
2 Store Lists.
1 Manifest.
1 Bill of Lading.
PILOTAGE: Vessels approaching port call Karlshamn Pilot Station 5 hours in advance on VHF Channel 16. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Ortholmen Pilot Station, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").
ANCHORAGES: Depths of water in anchorage area approximately 20 m. – 25 m.
RESTRICTIONS: Tankers not allowed to enter during darkness. Max. draft for tankers 32 ft. 6 in.
MAX. SIZE: Max. length 180 m., max. draft 32 ft. 6 in.
Oil pier Kolo harbour, outside main harbour, length 270 m., max. draft 41 ft. No tide.
HEALTH: If infectious disease on board Master must immediately send information to Agent.

RADIO: Karlskrona Radio.
RADAR/VHF: The pilot station is fitted with radar and VHF.
TUGS: 2 tugs available, 3,000 h.p. and 2,000 h.p. Join vessels about 1 nautical mile outside harbour boundary. Ship's lines always used.
BERTHING:

Inner Harbour: West Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
Ocean Quay	150	10.0
Soja Quay	250	8.5
West Quay	400	7.5 – 6.0

These quays are served by 5 rail-bound bulk goods cranes of 5 – 10 tons and have 2 grain elevators.

Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as other bulk goods.

East Harbour Area.

Berth	*Length (m.)*	*Depth (m.)*
East Pier	160	8.5
East Quay	500	6.0

The East Pier is equipped with 2×6.7 tons rail-bound unit goods cranes and served by 2 railway tracks. Adjacent to the East Pier are 2 cold stores with a total floor area of 7,000 sq.m.

Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 5 mobile cranes with lifting capacities ranging from 4 to 23 tons.

Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.

Sterno Harbour:

A special harbour for stone products, wood and timber. Water depth is 6 m.

Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from quay by a newly-erected stone-crushing plant. The crushing plant is owned by Armerad Betong-Vagforbattringar.

At Sterno Harbour a timber floating terminal consisting of an 80 m. long quay and timber landing areas, both on land and in the water, have been arranged and leased to Mo och Domsjo AB. The timber is floated from Karlshamn to MoDo's pulpmill at Husum.

The quays of the old shipyard are used chiefly for shipping timber. Timber Terminalen AB have built a timber terminal with a sawmill, planing mill and sorting plant adjacent to the quay area.

Stilleryd Harbour:

Karlshamn's new outer harbour; it was inaugurated in 1975 and consists of a 400 m. long quay with water depths of 8 m. and 11 m. on the West side, and one 150 m. long quay on the East side with 8 m. water depth. 2×35 ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.

The harbour also has Ro-Ro facilities with a water depth of 8 m. Stilleryd Harbour accommodates vessels of up to 35,000 d.w.t. The harbour area features 3 warehouses with a total storage area of 21,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 40,000 sq.m. is asphalted.

Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd Harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.

CRANES: In addition to the cranes mentioned above, there is a heavy lift crane capacity 300 tons.
MEDICAL: Hospital facilities available.
TANKERS: Different lines used. From 12 in. to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour 32 ft. 6 in. draft, 1 at Kolo Harbour 41 ft. draft and 1 at Oxhaga.

Kolo Oil Harbour:

Position Lat. 56° 09′ N., Long. 14° 43′ E. Pilot boards by Laknallarna, position Lat. 56° 07′ 8″ N., Long. 14° 53′ E. Berthing during daylight only. Max. size 270 m., draft 41 ft. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 46 ft. 2 tugs are generally used.

The pipe-line is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cu.m./hour (HFO). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.

Fresh water available at 20 t.p.h. by pipe-line.

Old Oil Harbour:

Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground rock storage facilities.

The oil quay has a depth of 11 m. and can accommodate fully-laden tankers of up to 30,000 d.w.t.

Oxhaga Oil Harbour:

Karlshamn's new oil harbour, situated at Munkahusviken where the water depth at the quay is 13 m. Underground rock storage facilities with a total capacity of 400,000 cu.m. – 200,000 cu.m. for heavy oil and 200,000 cu.m. for light oil – have been constructed. Storage has been leased to manufacturing companies, municipalities and oil companies.

Oxhaga Nabb's oil harbour is used by fully laden tankers of 50 – 55,000 d.w.t.

An above ground storage area for petroleum, oil and chemicals is planned for the oil harbour areas. Surveys have shown that it is possible to build additional rock storage facilities for petroleum products in the Oxhaga area.

DENSITY: 1003.
FRESH WATER: Fresh water available and delivered by hoses.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Watchmen only necessary when tankers discharge petroleum products.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Certificates of Tonnage, Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man/week. Wine and/or Spirits, 1 bottle per man/week.
IDENTIFICATION CARDS: Not needed.
CONSULS:

Denmark, Tel: 52080
Finland, Tel: (0454) 11319
Netherlands, Tel: 10041
Norway, Tel: (0454) 14225

REPAIRS: Small deck and engine repairs can be effected.
DRY DOCKS: None.
REPATRIATION: Facilities for repatriation of crew possible.
AIRPORT: Distance from airport 3 miles. 3 flights per day.
HOLIDAYS: January 1st and 6th; Easter; May 1st, 15th, 26th; June 21st; November 1st; December 25th, 26th. No work can be arranged during holidays.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Telephones on board arranged at cost of 85 Sw. Cr.
AUTHORITY: Karlshamns Hamnar, P.O.Box 8, S-29200 Karlshamn, Sweden. *Tel:* 0454-14220. *Contact:* Nils-Gunnar Sjoberg, Harbour Master.

KARLSKRONA: 56.10 N. 15.36 E.

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot is taken at Aspo. Tel. 0455/39016. (Also see "Stockholm"). Ordering Pilot between 2100 – 0500 hrs. contact Karlshamn Pilot Station Tel. 0454/14102. Stations operating on VHF Channel 16. Pilot should be ordered 5 hours in advance. Pilot boats usually orange.
ANCHORAGES: On roadstead. Refer to nautical chart No. 821 (Swedish).
MAX. SIZE: Max. draft 9.1 m. (30 ft.).
HEALTH: See "Stockholm".
RADIO: Stockholm Radio. Karlskrona Radio.
VHF: Karlskrona Port Office equipped with VHF Channels 16, 14.
RADAR: Radar service available when entering port. Tel. 0455/25075 or 0455/50780.
TUGS: Tug assistance available.
BERTHING: Total quay length 4,700 ft., oil terminal 400 ft., Depth alongside quay 13 ft. – 33 ft., oil terminal 29.5 ft. Ro-Ro quay 23 ft.
STEVEDORES: Available. Ordered through Agents or directly by Tel. 0455/10518.
MEDICAL: Advance notice to Agents desirable.
TANKERS: No specific requirements applicable to oil carriers. Two tanker berths available. Draft 7.0 m. and 8.5 m.
FRESH WATER: Available, customary delivery from quay-berth.
FUEL: All grades available. No advance notice required.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CONSULS:

Danish Vice-Consul, Tel. 15006.
Netherlands Vice-Consul, Tel. 10926 and 12495.

REPAIRS: All types of deck and engine repairs possible.
DRY DOCKS: Largest dry dock: length 185 m., breadth 20.76 m., depth 8.80 m. Six smaller docks.
REPATRIATION: Not allowed.
AIRPORT: 30 km. from port.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: None available.
SERVICES: Compass adjusting.
AUTHORITY: Harbour Master.

KARLSTAD: 59.23 N. 13.31 E. (See Plan Book)

PORT LIMITS: Vessel considered to be an "arrived ship" when berthed, or anchored South of the Gerholmsrevet buoy in case of congestion.
DOCUMENTS: As usually required in Swedish ports.
PILOTAGE: Not compulsory. However Pilots available.
ANCHORAGES: There is a safe anchorage South of the Gerholmsrevet buoy, sand and clay.
RESTRICTIONS: There are no restrictions imposed upon entry. Vessel to give 1 prolonged blast – 1 short blast – 1 prolonged blast to call the attention of boatmen.
MAX. SIZE: Vessel's length, breadth and draft maximised by the locks of the Trollhatte canal (87 m. × 13 m. × 5.3 m.).
HEALTH: Documents' etc. as usually required in Swedish ports.
RADIO: Gothenburg Radio.
VHF: ETA to be given to Karlstad Port Radio (0800 – 1600 hrs. local time)
RADAR: No port radar available.
TUGS: Two icebreaking tugs available. Ship's lines usually used.
BERTHING:

Vanerterminalen	Length	175 m.
(The Venerterminal)	Ship draft	5.3 m.
Mobile cranes		
Styckegodskajen	Length	270 m.
(The general cargo quay)	Ship draft	5.3 m.
Three general cargo cranes	6 tons	
Trakajen	Length	120 m.
(The wood quay)	Ship draft	5.3 m.
Mobile cranes		

Kolkajen	Length	350 m.
(The coal quay)	Ship draft	5.3 m.
One bulk cargo crane	5 tons	
One heavy-lift crane	28 tons	
Wermlands Kajen	Length	200 m.
(Wermlands Quay)	Ship draft	5.3 m.
One container crane		
Lambergshamnen	Length	230 m.
(The Lamberg Harbour)	Ship draft	5.0 m.
Mobile cranes		
One heavy-lift crane	160 tons	
Inrehamnen (Inner harbour)	Not used by merchant vessels.	
Oljehamnen	Each pier	70 m.
(Oil harbour)	Mooring space both sides	
Three jetties for handling oil, etc.	Ship draft	5.3 m.

STEVEDORES: Modern and extensive machinery equipment. Loading/discharging can be arranged in two or three shifts.
MEDICAL: Hospital facilities available.
DENSITY: Fresh water in the port.
FRESH WATER: Delivered by hose from piping on the quay.
FUEL: All kinds of bunker oil available.
CONSULS: Danish, German and Norwegian.
REPAIRS: All kinds of deck and engine repairs possible. Slipway 2,300 tons
SURVEYORS: All major Classification Societies represented in nearby port of Gothenburg. Government ship surveyor situated at Karlstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew
CUSTOMS ALLOWANCES: As usually allowed in Swedish ports.
CARGO GEAR: Shore gear usually used.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Regular domestic airlines. Several flights per day to and from Stockholm and Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tank washings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used when ship is berthed.
DELAYS: Normally not to be expected.
AUTHORITY: Karlstads Hamn, Box 5030, S-65005 Karlstad, Sweden. *Tel:* 054-195000. *Contact:* Captain P. Thomas Ahsberger, Port Director. Ake Sallas, Harbour Master.

KLINTEHAMN: 57.23 N. 18.11 E.

The Harbour Quay is 330 m. long and depth 5 m. Depth on entrance 5.5 m. The most unfavourable winds are South — West. The harbour is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measurement, Passenger List, Crew List, Derat Certificate, Ship's and Crew Declaration.

Pilot Station at Visby. Pilots have VHF on Channel 16.

Bunkers and water can be obtained.

AUTHORITY: Klintehamn Hamn, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegren, Harbour Master, Island of Gotland.

KOPING: 59.31 N. 16.00 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vessels from Landsort to Sodertalje and from Sodertalje to Koping; for outward bound vessels from Koping and Sodertalje. Via Stockholm: Pilots obtainable for inward bound vessels from Simpnas, Furusund, Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm to Koping; for outward bound vessels from Koping and Stockholm. (Also see "Stockholm"). Harbour pilotage obtainable but not compulsory in harbour area. Assistance of a boatman is compulsory for arriving vessels.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje – Koping, (nautical miles) 69; Landsort – Dalaro, (nautical miles), 32; Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockholm, (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vasteras – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2.
ANCHORAGES: At the "Broken" light buoy, clay bottom.
RESTRICTIONS: Ice is prevalent in Lake Malaren and the inlet from the Baltic from January to March, but the entrance channel is kept open during Winter season.
MAX. SIZE: The pilot station on Lake Malaren, Tel: 0755/30467, will give information on the max. admissible sizes of vessels. In general the following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.	15 m.
Draft	6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation according to the water level. The entrance fairway to the port has been dredged to a depth 7.6 m., the width of the bottom being 60 m.
VHF: Work frequency Channel 14. Call Koping port radio, Channel 16.
TUGS: Available day/night.
BERTHING: *Deep-Water Harbour:* (built 1932, large extension 1936-64) has 152 m. of quayage with a depth of 6.2 m. and 377 m. with a depth of 7.3 m. alongside, and is equipped with 2×6 ton portal cranes and 4×7 ton level-luffing jib cranes, 2 of them having a maximum lifting capacity of 10 tons each at 18 m. radius; and further, 1×33 ton "multi-purpose" crane.

There is also an 80 m. quay, depth 6.2 m. – without cranes – where loading/unloading by vessel's own winches can be undertaken.

Mobile cranes also available.

The quays are rail-connected and equipped with connections for supplying electricity, telephones and fresh water.

There are about 10,000 sq.m. of concrete stockyards within reach of the cranes, and outside this area and at a short distance from the cranes, a space of about 40,000 sq.m. is available for storage of goods. There are also about 22,000 sq.m. of sheds of different types in connection to the quays.

The cranes are well equipped with lifting devices such as grabs of different types etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment are also available.

Old Harbour: 400 m. of quayage with depth varying from 3.6 m. to 4.5 m. alongside, mobile cranes are used.

Oil Harbour: A modern oil harbour is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 m. and 5.7 m. respectively.

On the North side is an 80 m. concrete quay for grain loading vessels. Depth alongside 7.3 m.

Private Wharves: There is (on the North side) a private 120 m. concrete quay, depth 6.2 m., belonging to Messrs. Tibnor Ltd., (Iron and Steel Merchants). One 10 ton travelling portal crane available.

A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-Water Harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and 1×6 ton travelling portal crane and 1 belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.
STEVEDORES: Working hours: 0700 – 0900 hrs., 0930 – 1300 hrs. and 1330 – 1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays for 3 hours daily and 6 hours on Saturday.
GANGWAY/DECK WATCHMEN: Always available.
FUEL: Water, provisions, coal and oil obtainable.
REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.
AUTHORITY: Kopings Hamn, P.O.Box 108, S-73123 Koping, Sweden. *Tel:* 0221-18315. *Cables:* "Midlandport". *Contact:* T. Gustafsson, Harbour Master.

KRISTINEHAMN: 59.19 N. 14.07 E. (See Plan Book)

PORT LIMITS: A line drawn Westward from Strandudden to Valon (see Swedish Chart No. 132) defines the seaward limits of the port.
DOCUMENTS:

Certificate of Nationality.
Identification and Measurement Papers.
Oil Log.
Certificate regarding insurance for oil damage.
Derat Certificate.
Last Port Clearance.
1 set of General Declaration (Form 611.10).
2 copies Ship's Stores Declaration (Form 611.13).
2 copies Crew's Effects Declaration (Form 616.8).
2 copies Cargo Declaration (Form 611.7).
1 set Crew List (Form 612.13).
1 copy Declaration on account of Import Prohibition as to Livestock (Form 730.5).
1 copy Maritime Declaration of Health (Form 612.7).

PILOTAGE: Pilotage compulsory for tankers exceeding 1,200 g.r.t. and for all ships carrying dangerous cargo.

Pilots available at Vanersborg, the entrance to the Lake of Vanern after leaving Trollhatte Canal, and at Kristinehamn.

No local pilotage.
ANCHORAGES: In the Varnumsviken, N.W. of Kristinehamn. The roads have a depth of 5 m. – 9 m., bottom clay.
RESTRICTIONS: In Winter, the fairways to the harbour will be kept open by the local icebreaker from 0600 hrs. until 1600 hrs. Any icebreaking services beyond these hours have to be ordered and will be charged accordingly.
MAX. SIZE: All vessels capable of passing through the Trollhatte Canal can enter Kristinehamn. Max. dimensions: length 88 m., beam 13.1 m., draft 5.3 m.

HEALTH: First entry will be cleared alongside, otherwise automatic.

VHF: The port can be reached by VHF Channels 9, 11, 12, 14 and 16. In Winter, the icebreaking tug may communicate on all channels.

Instructions/Regulations regarding traffic communications will be available when passing the Trollhatte Canal.

RADAR: No port radar service.

TUGS: The tug "Dan", 600 b.h.p. and 5 tonnes bollard pull, will assist on request.

BERTHING: The outer harbour (Berth Nos. 20 – 25), has a quay of 360 m. length; in the river there is a quay (Berth Nos. 16 – 19) approx. 170 m. length. Depth 5.7 m at chart datum.

On the S.W. side of the river there is a berth, 88 m. length, for loading grain. Loading equipment on berth. Depth 5.7 m.

On the West side of Varnumsviken, Kroksvik, there is a 80 m. concrete pier for discharging refined oil products. Depth 5.7 m.

Also see "Tankers".

CRANES: Three 7 tonne slewing cranes with luffing jibs, on rails, in the outer harbour (Berth Nos. 20 – 25). Three railway tracks underneath the portals along the quay. One fixed crane, 40 tonnes, at Berth No. 16.

BULK CARGO FACILITIES: On the S.W. side of the river there is a loading elevator for agricultural produce. Loading capacity 200 tonnes per hour.

On Berth Nos. 20 – 25, bulk commodities like coal, ore, grain and scrap iron can be handled by cranes Nos. 8 and 9 equipped with grabs.

SPECIALISED CARGO HANDLING FACILITIES: No special equipment for handling containers. No Roll-on/Roll-off berth.

BRIDGES: None.

STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.

General cargo: 40 – 60 tonnes per gang per hour.

Forest industries produce: Approx. 100 tonnes per gang per hour.

MEDICAL: Full hospital facilities available without prior notice.

TANKERS: There is a concrete pier, length 80 m., on the West side of Varnumsviken, with a berth on each side. Max. draft 5.3 m. The pier is equipped with a crane for lifting lines. Diameters of discharging lines are 6 in. and 8 in. Average discharging rate 500 – 700 cu.m.p.h.

DENSITY: 1000 (Fresh water).

FRESH WATER: Available at Berth Nos. 20 – 25, rate 5 – 10 tonnes per hour.

FUEL: Available at all berths, delivered by truck.

FIRE PRECAUTIONS: As per international standards.

CONSULS: France, Germany (Federal Republic) and Norway are represented at Karlstad, 45 km. distant.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Lloyd's and Norske Veritas.

GANGWAY/DECK WATCHMEN: Not required.

CARGO GEAR: Shore cranes normally used.

REPATRIATION: Can be arranged.

AIRPORT: At Karlstad, 45 km. distant.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.

CUSTOMS ALLOWANCES: 1 litre spirits, 1 litre wine, 5 litres beer and 200 cigarettes per person. Additional allowances for the Master.

HOLIDAYS: January 1st and 6th, May 1st and 20th, December 24th, 25th, 26th and 31st. Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Dial 90000.

TELEPHONES: Can be arranged on request.

SERVICES: No facilities for disposal of tank cleanings.

SHORE LEAVE: Permitted, no restrictions.

DELAYS: Normally no delays.

IDENTIFICATION CARDS: Seaman's book is sufficient.

BANKS: Handelsbanken and Wermlandsbanken represent a number of foreign banks.

EMERGENCY CO-ORDINATION CENTRE: Dial 90000 and the Centre will notify the necessary services.

STORING: See "Prelims" page viii.

1. Vessels can be stored by trucks only.
3. Trucks can proceed alongside the berth.
4. Fork lift trucks can be used when handling stores.
5. Ship's chandler will take care of Customs Regulations.
6. Local riggers can be employed to assist with storing.

DEVELOPMENTS: None.

AUTHORITY: Kristinehamns Hamn, Bajortgatan 9, S–68100 Kristinehamn, Sweden. *Tel:* 0550-15340. *Contact:* Jim N. Hjelmtvedt, Harbour Master.

LANDSKRONA: 55.52 N. 12.48 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot available on request from Helsingborg Pilot Station or from Landskrona Pilot Station in daytime. 5 hours' notice required. Pilot stations and boats equipped with VHF. (Also see "Stockholm").

ANCHORAGES: Vessels of up to 10 m. draft can safely anchor North of Staffans Bank.

MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.) Max. draft 10 m. Max. LOA 190.0 m.

HEALTH: See "Stockholm".

RADIO: Gothenburg Radio call sign SAG; Malmo Radio call sign SDP. Harbour office, pilot station, pilot boats and tug boats equipped with VHF.

TUGS: Tugs usually meet off Pilhaken Lightbuoy. Ship's lines.

BERTHING: Terminal for handling bulk cargoes. Rock phosphate can be discharged with a capacity of 8,000 tons per 24 hours.

MEDICAL: Medical attention and hospital facilities available.

TANKERS: No oil berth in Landskrona.

DENSITY: Density of water changes with currents.

FRESH WATER: Available from quay.

FUEL: Small quantities of fuel oil can be obtained from quay.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Usually carried out by ship's crew.

CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: See "Stockholm".

IDENTIFICATION CARDS: Not needed.

CONSULS:

Danish Vice-Consulate	Tel. 0418/16150
Finnish Vice-Consulate	Tel. 0418/78000
Netherlands Vice-Consulate	Tel. 0418/35020

REPAIRS: All types of deck and engine repairs.

DRY DOCKS: Dry dock for ships up to about 25,000 d.w.t. (189 m. length). Floating dock for up to about 5,000 d.w.t.

AIRPORT: Sturup, 60 km.

TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel. 90000.

TELEPHONES: Can be placed aboard.

STORING: See "Prelims" page viii.

1. Yes.
3. Yes.
4. Yes.
6. Yes.

REGULATIONS: Anchoring prohibited between and up to 50 m. from harbour lights.

AUTHORITY: Landskrona Hamn, Box 275, 261 23 Landskrona, Sweden. *Tel:* 0418-17911, 0418-10311. *Contact:* Arne Wennberg, Port Director.

LIDKOPING: 58.30 N. 13.10 E.

DOCUMENTS:

3 Crew Lists (IMO Fal Form 5).
2 Crew Effects List (IMO Fal Form 4).
2 Ship's Store Declarations (IMO Fal Form 3).

PILOTAGE: Not compulsory.

MAX. SIZE: Length 88 m., beam 13.1 m., draft 5.3 m. and air draft 27 m. are maximum dimensions for passing through the Trollhatte Canal.

VHF: Lidkoping Harbour operates on Channel 16.

TUGS: One tug available, 600 h.p.

CRANES: 3 shore cranes of 5 tonnes each.

STEVEDORES: Working hours 0700 – 1630 hrs., Monday to Friday.

MEDICAL: Hospital facilities available.

FRESH WATER: Available.

FUEL: Gas oil available.

REPAIRS: Workshops can undertake repairs.

HATCHES: Opening/closing carried out by crew.

REPATRIATION: Facilities exist for carrying out crew changes.

AIRPORT: Nearest International Airport is Gothenburg, 130 km. distant.

TIME: GMT plus 1 hour, Summertime GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: Dial 90000

AUTHORITY: Lidkopings Harbour, P.O.Box 900, S-531 19, Lidkoping.

AGENT: Lindahl & Collin AB, P.O.Box 7091, S-402 32, Gothenburg Tel: 427180. Telex: 2329 Cargo S. Cables: "Lloydsagent".

LULEA: 65.35 N. 22.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Telegraphic address, "Pilotstation Lulea". Tel: 170 97 or 120 63. Advance notice 5 hours. VHF Channel 16. Pilot boat, orange with international signals. Pilot boards about 2 nautical miles West of Rodkallen for entering Germandoleden and 1 nautical mile N.E. of Farstugrundens Lighthouse for entering Sandoleden. Location of anchorage when awaiting Pilot: West of Rodkallen and South of Farstugrunden Lighthouse.

APPROACHES: *Fairways:* Two fairways lead into Lulea. The South Fairway, Germandoleden, is about 17 nautical miles long and the North Fairway, Sandoleden, is about 27 nautical miles long.

Special rules and traffic regulations apply to these fairways.

Ice Conditions: The port area is generally ice-infested during the period December-April. During this period, ships at sea are assisted by the State-owned icebreaker and within the harbour area by the Lulea Bogserbats AB port icebreaker. Year-round navigation has been possible since Spring 1970.

ANCHORAGES: Germandofjarden, 1.5 nautical miles S.E. of Larsgrundet Lighthouse and Inner Roads.

MAX. SIZE: Max. draft at MW 11.4 m. in Sandoleden and 7.5 m. in Germandoleden.

HEALTH: No special regulations.

RADIO: Harnosand Radio, call signal SAH.

VHF: Port Authority on Channels 16, 14, 12, 11 and 10.

Traffic Control on Channels 16, 14, 13, 12, 11 and 10 throughout 24 hours. Tel: 932 93 or 122 91.

Tugs on Channel 16.

TUGS: Meet ships at the Inner Road for the ore dock, and in Sandoleden 1 nautical mile South of the coal quay and the oil terminal. Ship's lines to be used.

Two tugs of 4,200 h.p. each are available for towing and icebreaking. *Towing:* Lulea Bogserbats AB is responsible for towing and ice-breaking in the Port of Lulea. Special tug regulations apply at Uddebo Oil Port, SSAB Quay and the Ore Quay. Tugboat assistance can be ordered through the signal station, Tel: 932 92 or 122 91, or through VHF call Channel 16.

Boatmen: The port boatmen are on duty if needed at all quays. They can be ordered through the signal station – Tel: 122 91 – or VHF call Channel 16. At the Ore Quay and the SSAB Quay, however, the respective companies provide their own boatmen.

BERTHING: *Deep Quay:* Length 345 m., depth 6.5 m. – 9 m. General cargo and wood. One 7.5 ton crane. Railway.

SJ Quay: Length 190 m., depth 6.9 m. Railway.

Cement Quay: Length 60 m., depth 9 m. Cement.

LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploaders of 4,000 t.p.h. each.

SSAB Quay: Length 498 m., depth 8.0 m. Iron, steel. Eight 6 – 12 ton cranes.

Coal Quay: Length 575 m., depth 12.2 m. Coal, coke, iron, steel, limestone. Three 18 ton grab cranes, 35 tons with hook. Quay to be extended by 150 m. and additional 25 tonne grabbing crane to be operative in 1986.

STEVEDORES: Bottenvikens Stuveri AB.

TANKERS: Diameter of lines from 150 mm. up to 350 mm. 2 oil jetties depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Facilities for receiving dirty ballast. Capacity 300 cu.m./hr.

New Oil Berth: Max. LOA 250 m., max. beam 32.3 m., max. draft 11.3 m., max. d.w.t. 45,000. Distance bow to manifold 120 m. Vessels berth starboard side to.

DENSITY: Fresh water, 1000.

FRESH WATER: Fresh water available at all berths.

FUEL: All grades of oil available.

GANGWAY/DECK WATCHMEN: Safety watchmen are to be on board all tankers when loading or discharging.

OPENING/CLOSING HATCHES: Stevedores.

SHIP'S CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams of tobacco for each Crew member every 10 days. (Wine/Spirits) 1 litre for each Crew member over 20 years old, every 10 days.

IDENTIFICATION CARDS: Not necessary.

CONSULS: Telephone Numbers:

Danish 15602	German (F.R.) 53852
Finnish 10445	Norwegian 20600
French 16329	Netherlands 12003

REPAIRS: Only small engine repairs.

SURVEYORS: Ship and Cargo Control, Authorised Inspectors, Sodra hamnplan. Tel: 110 50.

AIRPORT: 10 km. from port. Served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/FIRE/AMBULANCE: Tel: 90 000.

TELEPHONES: Connections available at oil terminal, coal terminal, ore terminal and deep quay.

GENERAL: All ships mooring at oil terminal over 3,000 d.w.t., and ore dock have to use tugs.

Lulea Soldiers' and Sailors' Institute: Seamen and national servicemen who come to Lulea have their own premises at Stationsgatan 72, where various facilities are available, including a canteen with reasonably priced food, billiard table, TV, telephone and a music room. These premises are open Monday-Friday 1700 – 2200 hrs. and Sunday 1800 – 2230 hrs.

Seamen also have access to the services of a Seafarers' Assistant. He can, for example, take seamen to various leisure facilities, arrange sightseeing trips and exchange films and books on ships.

Lulea Soldiers' and Sailors' Institute – Tel: 676 20 or 288 75.

The Seafarers' Assistant – Tel: 259 96.

The Institute is run by the Merchant Navy Culture and Leisure Board, which also employs the Seafarers' Assistant.

AUTHORITY: Lulea Hamn, Varvsgatan 41, S-951 34 Lulea, Sweden. *Tel:* 0920-930 00. *After Hours Tel:* 932 93 or 122 91. *Contact:* Bo Westman, Port Director.

LYSEKIL: 58.17 N. 11.26 E. **(See Plan Book)**

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot boards 2 miles West of Gaven Lighthouse. 5 hours advance notice required. Pilot ordered by VHF Channel 16 or telephone No. 60800.

ANCHORAGES: Safe anchorages both for small and large vessels just outside harbour in Gullmarsfiord.

RESTRICTIONS: No restrictions night entry, except max. draft possible 30 ft. No tide.

MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.

HEALTH: Declaration of health only when required from Customs or for vessel coming from outside Scandinavia.

RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.

RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16.

TUGS: Must be requested through Agent at least 12 hours before arrival.

BERTHING: 3 berths available. Gullmarskajen length 600 ft. max. draft 30 ft., Grotokajen 500 ft. max. draft 22 ft. Anderssons Kav 400 ft. max. draft 18 ft. Railway on all berths.

CRANES: Five mobile harbour cranes working all berths. Maximum capacity 40 tons. No restrictions against using ship's own gear.

STEVEDORES: Ordered by Agents.

MEDICAL: Hospital in town.

TANKERS: See the port of "Brofjorden".

DENSITY: About 1027.

FRESH WATER: Available from shore installation.

FUEL: Gas oil and diesel available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally opened by crew.

CERTIFICATES: Registered Tonnage Certificate.

CUSTOMS ALLOWANCES: See "Stockholm".

IDENTIFICATION CARDS: Not required.

CONSULS: Denmark, Finland, Iceland, Norway.

REPAIRS: Small repairs possible.

HOLIDAYS: See "Stockholm".

REPATRIATION: Change of crew and repatriation possible.

AIRPORT: None.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONE: Police, Ambulance, Fire Brigade, Tel: 90000.

DEVELOPMENTS: New berths under construction.

AUTHORITY: Lysekils Hamn, Hamnkontoret, S-45300 Lysekil, Sweden. *Tel:* 0523-14090. *Contact:* Olle Samuelson, Harbour Master.

MALMO (including Limhamn): 55.37 N. 13.00 E. **(See Plan Book)**

DOCUMENTS:

2 Crew Lists.
1 Passenger List.
2 Lists of Personal Effects (Tobacco List).
1 Declaration of Health.
2 Stores Lists.
3 Cargo Manifests.
1 Bill of Measurement.
1 Certificate of Nationality.
1 Derat Certificate.

PILOTAGE: Vessel applies for Pilot by telegram, by telephone or VHF (Telegraphic Address, Pilotstation, Malmo; Tel. (040) 115269; VHF Channel 16). Advance notice required 5 hours before pilotage to commence. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm").

ANCHORAGES: Vessels anchor about 5 cables North of fairway buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn Nedre and Malmo Oljehamn Ovre. Depth 12 m. to 14 m. and bottom hard clay.

REGULATIONS: All ships over 50 tons gross and ships under towage with a total length over 50 m. are obliged to report to the Malmo Port Radio, VHF Channel 16, working Channel 14, at least 2 nautical miles before approaching respective channels to Malmo and Limhamn (excluding the South Port of Limhamn). The same announcement is valid for the above ship before departure including movements inside port.

RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at minimum speed. Bridge opening signal for passing from South Wharf Basin 2 long blasts, followed by 1 short.

MAX. SIZE: *Bulk/Oil Harbour (under construction):* Max. length 250 m. on draft not exceeding 12.2 m. for bulk harbour and 10.8 m. for oil wharf.

Free Port: Max. length 220 m. on draft not exceeding 8.6 m. Max. length recommended in New Harbour is 150 m. on max. draft 6.6 m. and in Industrial Harbour 180 m. on max. draft 8.4 m. No tides.

HEALTH: Free Pratique automatically granted arriving from non-infested areas. If arriving from infested areas health declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval of City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of Medical Adviser.

RADIO: Vessel can route ETA cables to Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.

VHF: Port Control Office equipped with VHF (Channel 16, 9, 10, 11, 12, 13 and 14), open 24 hours a day. Masters can receive information about berthing place, present traffic and existing hazards to navigation in harbour area.

TUGS: Tugs usually meet vessels at roadstead. Ship's lines used.

Tugs can be arranged through a shipbroker or the Port Control office and are available round the clock from the Roda Bolag. Three tugs are based in Malmo, two of them with 3,000 h.p. Others are available if necessary.

BERTHING:

Passenger Harbour:

Port of Limhamn: Incorporated with Malmo Port Authority 1978. This port consists of an oil and cement jetty, a centreport and a ferry port.

The Port of Limhamn lies to the South of Malmo and is accessible via two fairways; the Southern one has a depth of 5.0 m. and leads to the Ferry Harbour, and the Northern fairway has two branches, one to the Oil Harbour with a depth of 10.5 m. and one to the Central Harbour with a depth of 8.0 m.

			Cranes	
Berth	Length m.	Depth m.	No.	tons
Centreport:				
107 – 111	500	8.4	1	5 (private berth)
104 – 106	200	8.0 – 8.4	–	
112 – 113	180	8.0	–	
117 – 118	200	8.0	Tanker berth	
Ferry port:				
217, 220		5.0	Car ferry berth	
Oil berth (jetty):				
125	90	10.5	Loading plant for cement and tanker berth	

BRIDGES: Will be opened with certain exceptions 0700 – 1700 hrs. weekdays. May be opened other hours on request to Port Control Office.

STEVEDORES: Normal working hours are from 0700 – 1600 hrs., Monday to Friday. Standard overtime shifts of up to 3 hours can be arranged. Additional overtime work can be obtained by special arrangement with the Terminal Company. Overtime work can also be arranged on Saturdays, Sundays and holidays.

Stevedore Company: Malmo Sjoterminal AB, Hjalmaregatan 1, 211 20 Malmo. Tel: 040-34 40 00. Telex: 32713 Seaterm S. Director: Bertil Cederholm.

CONTAINER HANDLING FACILITIES: 10 Roll-on/Roll-off ramps, 2 container berths with 40 tons capacity container cranes, 3 forklift trucks with 25 – 40 tons capacity.

MEDICAL: No advance notice required for medical attention. Good hospital facilities available. See also "Health".

TANKERS/BULK CARRIERS: The Bulk/Oil Harbour in the Northernmost section of the port of Malmo, and can be reached by a special approach fairway, the Oil Harbour channel, which has a depth of nearly 43.5 ft. The harbour is equipped with 7 berths, 2 of these being for ocean-going tankers with modern equipment for the unloading of oils and chemicals. Water depth varies between 19.5 ft and 39 ft.

The harbour can accept fully-loaded tankers of up to 60,000 d.w.t. as well as partly-loaded ships of up to 100,000 tons.

The berths for ocean-going tankers are each equipped with 3 hydraulically manoeuvrable transfer plants for faster and more reliable unloading. A piping system leads from the berths, unloading capacity of up to 2,000 tons per transfer plant, berth and hour. Tanks and pipes can be heated from a central steam-production station used by all firms. The Oil Harbour area also contains storage tanks for liquid chemicals and solvents. There are also good possibilities for development within the area, e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*	*Crane capacity*
1001 – 1002	656 ft.	43.5 ft.	500 t.p.h.
1003	770 ft.	39 ft.	
1004	770 ft.	39 ft.	
1006 – 1007	295 ft.	19.5 ft.	
1008 – 1009	295 ft.	19.5 ft.	
1010	328 ft.	19.5 ft.	

Also see "Berthing" – Port of Limhamn.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water can be ordered from the Port Control office (Tel: 040-128864) and is available at all quays at a rate of about 20-30 t.p.h.

FUEL: All types of bunker oil are available from tank trucks at various quays in Malmo and Limhamn.

FIRE PRECAUTIONS: Apart from usual non-smoking precautions, vessel discharging or loading dangerous goods of Class 1 in IMO code required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard.

GANGWAY/DECK WATCHMEN: Not considered necessary other than in Malmo Oil Harbour. Decision to be made by Master.

OPENING/CLOSING HATCHES: Normally carried out by stevedores on ocean-going vessels.

CERTIFICATES:

International Bill of Measurement.
Certificate of Nationality.
Derat Certificate.
Load-line Certificate.
Radio Certificate.
Safety Equipment Certificate.
Gear Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or 40 cigars or 150 grams of smoking tobacco per week out of bond. Spirits, 0.75 litre spirits per week out of bond.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not needed.

DELAYS: No delays expected.

AUTHORITY: Malmo Port Authority, Hjalmaregatan 1, S-211 20 Malmo. *Tel:* 040-34 40 00. *Telex:* 33275 Mport S. *Contact:* Lars-Olof Skoglund, Harbour Master. Bertil Cederholm, Port Director. Knut A. Nilsson, Marketing Manager.

NORRKOPING: 58.36 N. 16.12 E. (See Plan Book)

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Crew Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving at first Swedish port from abroad has to give Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical miles North of the lighthouse Gustav Dahlen. The Pilot must be ordered on radio, telephone or in some other way at least 5 hours before piloting to start.

ANCHORAGES: Lat. 58° 38.7′ N., Long. 16° 22.5′ E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gasoline must not move in port at night-time. Tankers over 15,000 d.w.t. will not be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded with more than 10,000 tons must not enter at night-time. Inner Harbour: Tankers loaded with more than 15,000 tons must not enter at night-time.

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 45,000 d.w.t. with max. draft of 11.4 m. MLW. Gastgivarehagen Oil Jetty can berth vessel with a max. draft 8.4 m. MLW and length 195 m. Ramshall and Tallbacken Oil Jetty can berth vessel with max. draft 7.9 m. MLW, length 177 m., breadth 24.4 m., daytime only. General cargo and bulk cargo quay at Pampushamnen with max. draft 11.4 m. MLW. General cargo quay (Ohmanskajen) can berth vessel max. draft 8.4 m. MLW and max. LOA 195 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of max. LOA 195 m. and max. breadth of 23 m. and vessels of max. LOA 180 m. and max. breadth of 26 m. permitted. Vessels exceeding this size shall obtain prior permission from Pilots to enter the Ohmanskajen through the Lindo Kanal. Vessels must be able to make headway through the Kanal with a speed not exceeding 5 knots. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 6.4 m.

Largest tanker at Pampushamnen, 65,405 d.w.t. LOA 236.66 m. Also see "Tankers".

RADIO: Stockholm Radio, Tingstade Radio.

RADAR/VHF: VHF Channel 9, 14 and 16. No radar.

TUGS: 3 tugs available, 1,680 b.h.p., 1,265 b.h.p. and 310 b.h.p. The 2 large tugs are icebreaking. Join vessel off St. Juten Lat. 58° 38.1′ N., Long. 16° 19.6′ E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 974".

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for Roll-on/Roll-off traffic, berths handling liquid chemicals. 4,500 m. of quayage with depths of 5 m. – 12 m. and 6 oil jetties.

Roll-on Roll-off Berths:

One Ro-Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes may take place simultaneously with Ro-Ro operations. Stern loading vessels port side alongside.

One Ro-Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro-Ro operations only. Stern loading vessels starboard side alongside. One Ro-Ro berth with a fixed concrete ramp adjacent to the heavy lift crane specially designed for heavy loads. Water depth 9 m.

Djuron

Grain Terminal, position Lat. 58° 38′ N., Long. 16° 20.1′ E. 160 m. long concrete pier with a water depth of 12.2 m. MLW. Travelling grain loader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Lat. 58° 38.3′ N., Long. 16° 16.1′ E. 126 m. long concrete pier with a water depth of 8.8 m. MLW. Mobile cranes for loading on request. Otherwise ship's gear. Roll-on/Roll-off fixed concrete ramp 20 m. wide with a water depth of 6.8 m. MLW. Stern loading vessels starboard side alongside.

CRANES: All cranes are owned and operated by the Port Authority. These include 22 electrical transportable quay cranes with a capacity of 4 – 10 tonnes, two 25 tonnes cranes adapted for 20 ft. and 40 ft. container handling which together can lift 45 tonnes, two 25 tonnes mobile cranes, one fixed heavy lift crane with a maximum lifting capacity of 320 tonnes and one 4 tonnes floating crane.

STEVEDORES: Gangs must be ordered before 1500 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers.

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipe-lines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted. Receiving capacity during the first hour is 650 cu.m. Thereafter, 150 cu.m./h.

Tallbacken (Shell): Depth alongside 8.5 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Gulf): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

FRESH WATER: Delivered by 1 water boat of 90 cu.m.

FUEL: All grades available, delivered by boat. Notice: daytime not necessary.

DENSITY: 1000.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary. Hose-watcher required during loading and discharging of tankers.

OPENING/CLOSING HATCHES: Decided from case to case.

CERTIFICATES: International Tonnage Certificate, Derat Certificate, Trade Certificate, and Radio Safety Certificate.

IDENTIFICATION CARDS: Not needed. Crew List to be used on Oil Jetties.

MEDICAL: Hospital available.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Minor repairs only can be effected.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

HATCHES: Opening/closing is normally carried out by the crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 litre spirits for each crew member.

AIRPORT: Karlstad 90 km; Gothenburg (Torslanda) 180 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: January 1st and 6th; Good Friday; Easter Monday; May 1st; Whitsuntide; December 25th and 26th.

POLICE/AMBULANCE/FIRE: Tel: 90000

TELEPHONES: Not possible to place telephones on board. Telephones available at harbour office.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: Otterbackens Hamn AB., Fack 65, S-547 02 Otterbacken, Sweden. *Tel:* 0551-22250. *Telex:* 66088 Otbsped S. *Cables:* Otterbacksped. *Contact:* Ulf Levin, I. Wahlin.

OXELOSUND: 58.40 N. 17.08 E. (See Plan Book)

PORT LIMITS: The seaward boundaries of the port is a line between the Eastern point of Ljungholmen and the oil quay. For ore-loading ships, a vessel is considered to be an "arrived vessel" when at anchor at the roads West of Vinterklasen.

DOCUMENTS:

4 Crew Lists (3 for Customs and 1 for Ship's Agent).
4 Passenger Lists, if passengers are not inserted in Crew List.
2 Customs Documents, showing all alcoholic liquors and tobacco, belonging to Officers, crew and passengers.
2 Customs Documents, showing ship's store of alcoholic liquors and tobacco.
Health Documents, not necessary.
Manifests, at least 4 copies, normally only for general cargoes.
Bills of Lading, at least 1 copy if not otherwise stipulated.
Ship's Paper, Ship's Register and Derat Certificate, not older than 6 months.

PILOTAGE: (See "Stockholm"). Pilot station located at Oxelosund, tel. 0155 30200. ETA required 5 hours in advance in order to avoid charge for waiting. When ships in open sea inform pilot station by telephone, transfer via Stockholm Radio, call sign SDJ or Gothenburg Radio, call sign SAG, will be recommended. VHF Channel 16 can be used for contacting Pilot station or Pilot boat. Approaching vessel applies for Pilot when daylight with flag signal "G" and when dark with pilot-light or Morse Code PT. Pilot boats orange. Ships advised to proceed through Northern inlet, where Pilot will board at Norra Krankan Lighthouse, Lat. 58° 37′ N., Long. 17° 27′ E. International requirements with respect to boarding and safety measures. Vessels awaiting for Pilot are prohibited to ride at anchor North of "Gustaf Dalen" Lighthouse.

ANCHORAGES: Suitable anchorages West of Vinterklasen; clay-holding ground, depth 30 m. – 40 m. Ships are not allowed to berth until they receive orders and in the meantime must anchor and await such orders.

RESTRICTIONS: No tides. Draft not over 42 ft. at MLW. No other restrictions with exception of berthing ships of 40,000 d.w.t. and over.

MAX. SIZE: Ore loading berth: Vessels between 3,000 and 80,000 d.w.t. can be loaded. Depth at quay 45 ft. Berth for unloading coal, iron ore: Ships of up to 65,000 d.w.t. can be discharged. Depth at quay 39 ft. 4 in. Berth for general cargo: Depth at quay 32 ft. 10 in. Oil pier: Oil carrier up to 95,000 d.w.t. can be berthed. Depth at quay 45 ft.

HEALTH: No special regulations.

RADIO: Stockholm Radio, call sign SDJ, or Gothenburg Radio, call sign SAG.

VHF: Harbour Authorities and Clearance Department for ore loading ships has VHF Channel 16.

TUGS: 2 combined tugs and ice-breakers of 1,680 and 1,260 i.h.p. Ship's lines to be used. Tugs normally join vessel near Beten Lighthouse, near harbour.

BERTHING: Harbour Pilot compulsory and normally ordered by ship's Agent. No tides. Depths in harbour can vary occasionally from minus 1 ft. 6 in. to plus 1 ft. according to temporary alterations of MWL. Ships of 40,000 d.w.t. and over cannot be berthed when dark.

CARGO HANDLING FACILITIES: The port has, among other things, one ore quay equipped with a travelling ore-loader with an average capacity of 2,000 t.p.h. One quay for unloading coal, iron ore and similar equipped with two travelling cranes with a capacity of 600 t.p.h. At No. 7 Quay there is a 25 m. traverse ferry ramp equipped to accommodate Roll-on/Roll-off traffic.

STEVEDORES: Master of ship with general cargo has to inform Agent in advance number of gangs required.

MEDICAL: Necessary for Agents to receive advance notice of required medical attention, informing Agent if doctor should meet upon ship's arrival, if ambulance is required for transport to hospital and promptness required. No special vaccination/fever certificates necessary. Hospital at Nykoping, about 8 miles from Oxelosund.

TANKERS: One tanker berth, depth at quay 45 ft. Connection to load/discharge lines, diameter of 8 in. – 16 in. Almost all types of heavy fuel oils.

DENSITY: 1006 – 1016, 75% fresh water. No tides.

FRESH WATER: Available. Delivery through lines from quays at a rate of 10 t.p.h. Fresh water can also be delivered by tugs which have fresh-water tanks.

FUEL: Not available.

FIRE PRECAUTIONS: Watchman necessary when loading/discharging gasoline.

GANGWAY/DECK WATCHMEN: When ship berthed, reliable gangway must be arranged to quay. Tankers discharging/loading gasoline must have watchmen, arranged through ship's Agent.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Usual international certificates. In order not to delay despatch, important that following certificates are available and valid: Measurement, Life-boat, Radio and Derat (not older than 6 months).

CUSTOMS ALLOWANCES: (Tobacco), each crew member permitted out of bond about 200 grams tobacco and 5 packets of cigarette-paper. (Wine and/or Spirits), each crew member is permitted to have out of bond 1 bottle spirits or 2 bottles of wine, if he is over 20.

CARGO GEAR: International certificates necessary. No additional requirements.

IDENTIFICATION CARDS: Not needed.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: None.

SURVEYORS: Surveyors and cargo inspectors in Stockholm.

REPATRIATION: Crew changes can be effected and necessary repatriation arranged by Agent.

AIRPORT: Arlanda 40.4 miles outside Stockholm. Distance Oxelosund – Stockholm 92.8 miles. Total distance 133.2 miles. Served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: General holidays on which no cargo work can be arranged: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day; New Year's Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.

POLICE/AMBULANCE/FIRE: Dial tel. 90 000 and ask for "Police-alarm", "Ambulance" or "Brandalarm" (Fire alarm).

EMERGENCY CO-ORDINATION CENTRE: Dial 90 000 (Alarm No.).

TELEPHONES: Arrangements for placing telephones on board exist at Berth Nos. 9.5, 10 and 11. Cost for connection is charged per day.

SERVICES: No tank-cleaning equipment. Facilities for discharge of tank-washings.

BANKS: Skandinaviska Enskilda Banken, Box 6, S-613 01 Oxelosund. Telex: Stockholm 19154 Essebs.

STORING: See "Prelims" page viii.

1. By truck alongside dock only.
3. Trucks must remain 3 m. away from vessel.
4. Yes.
5. Regulations for bonded stores only.
6. No.

SHORE LEAVE: No restrictions.

DELAYS: Normally no delays.

AUTHORITY: Port of Oxelosund, Box 1200, S-613 01 Oxelosund, Sweden. *Tel:* 0155-31940. *Telex:* 64025 Portox S. *Cables:* Portox. *Telefax:* 0155-34321. *Contact:* Eric Balldahl, Harbour Master. Bjorn Engstrom, Port Director.

PITEA (Including Haraholmen, Pitsundet): 65.19 N. 21.29 E. (See Plan Book)

Pitea town closed to navigation.

DOCUMENTS:

2 Crew Lists.
2 Lists Spirits and cigarettes.
Manifests and Bills of Lading of incoming cargoes to be presented to Customs.
1 erat Certificate.

PILOTAGE: Pilot to be taken at Gaasoeren-Skelleftea district. Must be ordered at least 5 hours prior arrival. All VHF Channels used – also onboard pilot-boats. (Also see "Stockholm").

Outward-bound vessels must order Pilot from Harbour Office during office hours.

Signal station at Pitsund.

ANCHORAGES: Accordance Pilot's advice.

RESTRICTIONS: No entry in darkness to smaller ports in district.

MAX. SIZE: Max. draft to Skuthamn 22 ft. Max. size through Pitsundet draft up to 22 ft. Max. draft to Skuthamn 22 ft. Bridge over Pitsundet under construction (ready November 1984). For information regarding passage and bridge opening apply to Harbour Office.

No tides. Also see "Berthing" and "Tankers".

HEALTH: No special restrictions. Diseases must be reported to Customs before entering port.

RADIO: Stockholm Radio, Harnosand Radio.

VHF/RADAR: Radar and VHF on all stations. VHF also at signal station in Pitsundet – entrance to Pitea. Channel 16 only. Harbour Office, Channels 16, 9 and 13.

TUGS: Tugs available if ordered beforehand. Tugs compulsory for larger vessels. Costs for 2 tugs about Skr 30,000.

BERTHING: Haraholmen: Quay recently completed, length 600 m. plus Ro-Ro ramp, depth 12.5 m., max. draft 11.5 m. Quay is equipped with electricity, telephones, water and oil. Quay is very strong, capable of taking loads up to 250 tons.

Harbour is specially built for all year round traffic. 10 propeller engines are installed under the quay to keep water running and quay ice-free. Special lights are installed to assist in bad visibility.

Quay is equipped with 2 *"Asea"* cranes of 12.5 tons and 19.5 m. outreach.

BRIDGES: See "Max. Size".

STEVEDORES: Bottenvikens Stuveri AB – Pitea. Labour must be ordered latest at 1400 hrs. for morning start following day. Tariff available from Agents.

MEDICAL: All treatments available without notice.

TANKERS: Only one berth at Haraholmen. Max. size 70,000 d.w.t. Max. LOA 240 m. (approx.). Max. draft 37 ft. 10 in. FW. No further restrictions. 2 tugs compulsory for vessels over 15,000 d.w.t.

FRESH WATER: Available by pipe and lorries.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Not necessary but available if ordered.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes/man per week. (Wine and Spirit), 1 bottle man/week. Only crew members over 18.

IDENTIFICATION CARDS: Not needed.

CONSULS: None.

REPAIRS: All types of repairs can be effected.

DRY DOCKS: None.

AIRPORT: Regular flights 9 times per day. Kallax Airport at Lulea. Distance 50 km. from port. 60 minute flight to Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel. 90000.

TELEPHONES: Facilities for placing on board available.

GENERAL: Masters to note the signals to be given before passing Pitsundet. Master must remember that Pilot must be taken at Gaasoeren-Skelleftea district. If Pilot on bridge all way from Skelleftea to Pitea, a distance fee is charged. Piloting from Nygraan Lighthouse (entrance Pitea) only normal fee.

DEVELOPMENTS: A chemical terminal has recently been completed, capacity 10,000 tons. Also see "Max. Size".

AUTHORITY: Hamnkontoret Pitea, Sjofartshuset, P.O.Box 716, S-94128 Pitea, Sweden. *Tel:* 0911-46070. *Telex:* 68307 Shipexp S. *Contact:* Aake Kaettstroem, Harbour Master.

RONNEBY: 56.10 N. 15.17 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
4 Customs Documents.
1 Health Document.
2 Manifests.
1 Bill of Lading.

PILOTAGE: Pilot is taken at Karlshamn or Aspo (Karlskrona) pilot stations. Tel. Karlshamn 0454/14102, Aspo 0455/29016. Ordered over Karlskrona Radio on 3289 kHz or by VHF on Channel 16. Pilot should be ordered 5 hours in advance. (Also see "Stockholm").

ANCHORAGE: Open roads.

MAX. SIZE: Limited by depth in fairway: 20 ft. 9 in.

RADIO: Karlskrona Radio, 2182 kHz.

VHF: VHF call sign Ronnebyhamn, Channel 16, 12, 13.

TUGS: None, when necessary such ordered from Karlsham.

STEVEDORES: ETA given to ship's Agent sufficient.

MEDICAL: Medical attention required ordered by Agents.

TANKERS: Only small tankers with max. draft 20 ft. 6 in. 1×10 in. and 1×12 in. line. No facilities for residue discharge.

DENSITY: 1000. No tide.

FRESH WATER: From water post on quay.

FUEL: Diesel oil from tank-lorries.

OPENING/CLOSING HATCHES: Performed by crew.

CERTIFICATES:

Derat Certificate not over 6 months old.
Certificate of Nationality.
Certificate of Tonnage.

CUSTOMS ALLOWANCES: 200 cigarettes plus 1 bottle spirits.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish Consulate, tel. 0457/15060.

REPAIRS: Minor repairs only.

DRY DOCK: None.

AIRPORT: About 6 miles from Ronneby Harbour; daily flights to Malmo, Stockholm, Visby and Copenhagen.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 90000; Ambulance 90000; Fire 90000.

TELEPHONES: Telephone box on Quay.

AUTHORITY: Ronneby Harbour Board, Box 3160, S-37203 Ronneby, Sweden. *Tel:* 0457-70080. *Contact:* Sven O. Hall, Harbour Master.

SIKEA: 64.09 N. 20.59 E.

SHIPPING HAS CEASED AT THIS PORT.

SKELLEFTEHAMN: 64.41 N. 21.15 E.

DOCUMENTS:

2 copies of Crew Lists (3 copies at Ronnskarsverken).
1 List of Provisions.
Measure Bill.
Manifests and Bills of Lading.

PILOTAGE: Compulsory. Telegraphic address: "Pilot Station Skelleftehamn". Advance notice required, 5 hours. Contact pilot boat or pilot station on VHF Channel 16. Calling signal "Skelleftea Pilot" (pronounced – Shellefteo Pilot). Pilot motor boats usually orange. Pilot taken on board 2 miles East of Gasoren Lighthouse. (Also see "Stockholm".)
RESTRICTIONS: No tides or tidal current.
MAX. SIZE: Maximum permissible length of tanker 185 m. in accordance to dredged basin's length.
HEALTH: In case of disease or suspected disease, ship should call for medical assistance in accordance with Swedish rules.
RADIO: Stockholm Radio or Harnosand Radio. When in reach of VHF station of harbour office, at 0830 – 1200 hrs. and 1300 – 1700 hrs., or else through pilot station VHF. Call signals "Skelleftea Hamnradio" or "Skelleftea Pilot Station".

3. Yes.
4. Yes.
5. Duty free goods can be obtained in Visby.
6. Yes.

SHORE LEAVE: Permitted.
AUTHORITY: Cementa AB, Storgat 116, 62030 Slite, Sweden. *Tel:* (0498) 20500. *Telex:* 4136. *Cables:* Cementa Slite. *Contact:* Walter Laakso, Harbour Master.

AGENT: Atktiebolaget Rob. Myrsten, 620 30 Slite, Telex 4137 – A/S Myrsten. Cables: "Myrsten – Slite". Tel. 0498/22070. After hours 0498/20102/20021/25565.

SODERHAMN: (includes Stugsund, Langror oilberth, Sandarne factory berth and Orrskar woodchip berth.) 61.18 N. 17.05 E. (See Plan Book)

DOCUMENTS:

2 Crew Lists.
3 Bills of Lading.
3 Manifests.
1 Tobacco List.

PILOTAGE: Pilot must have 5 hours' notice. Telegraphic address "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot boat and pilot station and 13. Pilot boat is orange. International signals to be used. Vessels can normally receive Pilot between Hallgrund and Storjungfrun. In case of bad weather or ice, Master consults Pilot for advice (also see "Stockholm").

ANCHORAGES: Liljungfru Anchorage S.W. Liljungfrun, where depths are 15 m. – 20 m., is W. or S.W. of Norrutharet. Branthalls Anchorage W. Branthall Island, depths 10 m. – 15 m.

MAX. SIZE: Langror oil berth. Breadth of entrance fairway 55 m. – 60 m. and depth 8.5 m. at mean level. Max. ship length about 170 m. at the quay.

Orrskar: Woodchip terminal, breadth of entrance fairway 110 m., depth 13 m. m.l. New quay for general cargo, depth 10.65 m. m.l.

Sandarne: Breadth 30 m., depth 7.2 m. m.l. 55 m. – 60 m. in unlit fairway.

Stugsund: Breadth 30 m., depth 6.2 m. m.l.

Soderhamn: Breadth 10 m. – 15 m., depth 3.7 m. m.l.

Depth varies about 1 ft. below and 1 ft. above m.l. Breadth given at narrowest point in fairway.

HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.

RADIO: Stockholm Radio when vessels come from South and Harnosand Radio from North. Within reach Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16, 13, 12.

There is a radar station at Soderhamn. Pilot station, Ljusne, and some of the pilot boats are fitted with radar.

TUGS: Normally meet large vessels at Otterhallans Lighthouse and others off quays on request. Ship's lines to be used.

BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.

STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.

CRANES: One electric crane to lift 10 tons in Stugsund. In other berths mobile cranes can be hired.

MEDICAL: Medical attendant available day and night.

TANKERS: 6 in. or 8 in. connections. Only 1 berth and max. depth at quay 8.5 m.

DENSITY: Practically fresh water.

FRESH WATER: Available in all ports. Delivered through pipe-lines on wharf. Rate: 10 t.p.h.

FUEL: Any normally used grade on request to oil company with few hours' notice.

GANGWAY/DECK WATCHMEN: Watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

SHIP'S CERTIFICATES: Traffic permission (not necessary for ports within the Custom district boundaries), Nationality and Reg. Certificate (or interim Nationality Certificate), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nationals Crew Passports, Derat Certificate (6 month), Certificate of Health.

CUSTOMS ALLOWANCES: (Tobacco), out of bond, 200 cigarettes or 100 gm. tobacco and 100 cigarettes. (Wine/Spirits), out of bond, 1 bottle of spirits, 75 cl.

CARGO GEAR: Valid cargo gear certificates.

IDENTIFICATION CARDS: Not needed.

CONSULS: Danish, French and Dutch.

REPAIRS: Minor plate-work and welding can be carried out.

SURVEYORS: A Commonwealth Surveyor is appointed at the Port.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Nearest international airport Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.

POLICE/AMBULANCE/FIRE: Police 90000 or 0270/10020; Ambulance 90000; and Fire 90000 or 0270/18550.

TELEPHONES: In Sandarne, quay telephones can be placed on board. 2 telephones. Telephone can be placed on board at Orrskar Quay.

EMERGENCY CO-ORDINATION CENTRE: Harnosand Radio, Tel: 0611/20520.

SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund Berth.

BANKS: Skandinaviska Enskilda Banken, Box 4, Kopmangatan 1, 826 00 Soderhamn.

STORING: See "Prelims" page viii.

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Only bonded stores.
6. Stevedores, on request.

REGULATIONS: Port regulations available from Agent or Port Office.

DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.

GENERAL: There is a VHF port radio at the Port Office, Soderhamn. Working time 0730 – 1630 hrs. Channel 16 for call and Channel 12 for working. During the ice-breaking season the tug may be out even at night. Tug has same channels. Soderhamn Customs District includes all berths mentioned above.

AUTHORITY: Soderhamns Hamn, S:a. Hamngatan, S-82600 Soderhamn, Sweden. *Tel:* 0270-14828, 11311 and 54125. *Contact:* Ragnolf Eriksson, Port Captain. Christer Bjorklund, General Manager.

SODERTALJE: 59.12 N. 17.38 E. (See Plan Book)

PORT LIMITS: Approximately 2 nautical miles from entrance.

DOCUMENTS:

Crew List.
Cargo Manifest.
List of Ports of Call.

PILOTAGE: Pilot to be ordered at least 5 hours before arrival at Landsort Pilot Station on VHF Channel 13. Distance from Landsort to Sodertalje is 34 nautical miles.

Pilotage compulsory for all vessels carrying petroleum, gas and chemicals.

ANCHORAGES: Pilots direct vessels to suitable anchorages.

RESTRICTIONS: Cables over fairway with vertical clearance of 42 m. at MLW.

MAX. SIZE:

	Length	*Beam*	*Draft*
Uthamnen (Outer harbour)	200 m.	32 m.	8 m.
Sydhamnen (South harbour)	200 m.	32 m.	9 m.
Igelstahamnen (Igelsta harbour)	200 m.	32 m.	9 m.
Oljehamnen (Oil harbour)	200 m.	32 m.	9 m.

HEALTH: Derat Certificate required.

RADIO: Stockholm Radio.

VHF: Channel 13 calling "Pilot Sodertalje" or "Malarbron" for ordering of boatmen 1 hour before arrival.

RADAR: No port radar service.

TUGS: Available through local Agents for vessels over 10,000 d.w.t.

BERTHING: *Sydhamnen:*

Ro/Ro Berth No. 9, length 70 m., draft 6.5 m. MW.
Ro/Ro Berth No. 10, length 130 m., draft 8 m. MW.
Ro/Ro Berth No. 11, length 130 m., draft 8 m. MW.
Ro/Ro Berth No. 12, length 160 m., draft 10 m. MW.

Oljehamnen: Jetty No. 6, draft 9 m. Jetty No. 7/8, draft 7 m.

Uthamnen: Lo/Lo berth (general cargo), length 300 m., draft 6 m. – 8 m. Silo Quay, length 120 m., draft 7 m. – 8 m.

Igelstahamnen: Coal and oil discharge berth, length 150 m., draft 9 m. Coal discharged using shore equipment.

CRANES: *Uthamnen:* 4 cranes up to 10 tons each, 1 crane for heavy lifts up to 25 tons.

Sydhamnen: Mobile cranes up to 18 tons, forklifts up to 42 tons.

Igelstahamnen: Shore equipment for coal discharge.

BULK HANDLING FACILITIES:

Uthamnen: Salt in bulk/bags, fertiliser, coal/coke and general cargo.

Siloquay: Grain loading.

Igelstahamnen: Coal discharge, oil discharge.

Oljehamnen: Oil petroleum products and liquid chemicals.

SPECIALISED CARGO HANDLING FACILITIES: 24,000 sq.m. for cold and warm storage available.

STEVEDORES: Working hours: 0700 – 1230 hrs., 1300 – 1600 hrs, on weekdays. Maximum 3 hours' overtime can be worked. Stevedores can be ordered by telephoning 0755-61040/62210 or by telex No. 10273 Sodstuv.

TANKERS: See "Berthing".

FRESH WATER: Available at all berths.

FUEL: Available at all berths.

REPAIRS: Can be undertaken at all berths.

DRY DOCKS: Nearest at Stockholm.

GANGWAY/DECK WATCHMEN: Available.

HATCHES: Opening/closing carried out by stevedores.

AIRPORT: Nearest at Stockholm, 60 km. distant.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: Cargo work can be carried out by special agreement on holidays.

POLICE/AMBULANCE/FIRE: Dial 90000 and request necessary service.

TELEPHONES: Can be placed on board vessels.

SHORE LEAVE: Permitted.

BANKS: Only Swedish banks are represented.

STORING: See "Prelims" page viii.

1. By truck.
2. Vessels can store while loading/discharging.
4. Forklifts available.
6. Yes.

SURVEYORS: Cargo surveyors are available from Stockholm.

AUTHORITY: Port of Sodertalje, Box 2015, S – 15102 Sodertalje. *Tel:* 0755/21430. *Telex:* 10273 Sodstuv. *Contact:* Captain Erik Nachtweij or Michael Samsioe, General Manager.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Ahus, Tel: 044/240027, needs 5 hours notice. Pilot Station (Karlshamn): Tel: 0454-14102. Pilot station and pilot boat can be ordered by VHF Channel 16, working on Channel 13. Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)

ANCHORAGES: Roadstead to South of harbour 25 ft. deep with good holding ground.

MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (656 ft.) Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.

HEALTH: See "Stockholm".

Animals: Private dogs and cats etc., not allowed ashore without quarantine.

RADIO: Stockholm Radio and Gothenburg Radio.

VHF: Harbour Office can be reached by VHF, Channel 16. Working frequency Channel 14.

Tug "Hafnia" – Channels 6, 13, 14 and 16.

Tug "Portia" – Channels 6, 13 and 16.

TUGS: 2 tugs available, 1×665 h.p. (ice-breaking) and 1×800 h.p. Ordered through Agent or directly to Harbour Office.

BERTHING:

Location	*Length m.*	*Depth m.*	*No. of cranes (max. load in tons)*
Inner harbour:			
Western quay, Southern section	225	7.5	1 (5)
Western quay, Northern section	129	6.5	1 (6)
Northern quay	85	5.0	Mobile (20)
Blekinge quay	53	4.0	—
Other quays	190	3.0	Mobile (18)
Outer harbour:			
Ro-Ro ramp	20	6.0	—
Side-deck at the Ro-Ro ramp	45	6.0	Mobile (35)
Outer harbour quay	200	8.2	1 (20)
Oil Jetty	25 + Dolphins	8.2	—
Shipyard:			
Fitting-out quay (dock)	165	6.0	1 (15)
New quay	115	6.0	1 (15)

(The Ro-Ro berth, quay and oil landing-stage are situated on a 500 m. line).

An opportunity of using a 200 tons floating (pontoon) crane belonging to the Solvesborg Shipyard.

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 17,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

Stevedoring Company: Solvesborg Stuveri AB. Tel: 10119,12295.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

SHIP CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 litre/week.

Customs House, Tel: 12000.

IDENTIFICATION CARDS: Not needed.

CONSULS: Royal Danish Vice-Consulate. Railway Station Building. Tel: 0456/10115.

Royal Norwegian Vice-Consulate, Stortorget 10, Box 115, S-29401 Solvesborg. Tel: 0456-150 20.

REPAIRS: Carried out by Solvesborgs Shipyard. Tel: 0456/15060.

DRY DOCKS: Dry dock in ship yard, 341 ft. long, 51 ft. wide at entrance, 14.5 ft. deep on sill HWOST.

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

DELAYS: Normally no delays.

AUTHORITY: Solvesborgs Hamn, Box 49, S-294 01 Solvesborg, Sweden. *Tel:* 0456-13600 or 10072. *Contact:* Sven Holmer, Harbour Master.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan Book)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 2 terminals.

1. The Powerboard Terminal.
2. The Esso Havden Terminal.

Both are located about 20 miles from the Hatteberget Light Tower (57° 52′ N., 11° 28′ E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.

2 Passenger Lists.

1 Tobacco and/or Stores List.

1 Manifest.

1 List of Animals on Board (if any).

Access to the usual ship's papers (measurement, register, certificate, etc.).

If away from Sweden more than 15 days: Bill of Health.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact. The Pilot boards at Hatteberget Light Tower. Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA pilot station and destination.

APPROACHES: When approaching from the West, ships must keep North of the area dangerous due to mines extending to 57° 47′ N., 11° 03′ E.

Currents in this area are unpredictable and are much influenced by the wind. Ships have reported experiencing a change in direction of current on approaching the Hatteberget Light Tower, for example, South-going outside Hatteberget, North-going inside Hatteberget. Currents of 1 to 3 knots have been experienced.

Seabuoy-Berth: For larger ships bound for Stenungsund the recommended track is Algo Fjorden shown on charts as passing between N. Meholm and S. Meholm is not always followed by Pilots, some preferring to pass South of the Hunden Shoal and S. Meholm. Great caution is needed in taking this Southerly route as there are unmarked dangers. During darkness or in poor visibility the Pilot's intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the North end of Hake Fjord and under the Tjornbron (bridge) between Kallon and Almon is in the form of an "S" bend and vision is obstructed. Traffic may be suddenly met with little warning, particularly as some ships do not carry Pilots, and there is no speed limit. Engines should be on standby, anchors ready and manned in this area.

ANCHORAGES: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Navigation of ships drawing more than 9.2 m. (30 ft.). is not practised inwards of Algo Fjorden during darkness.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Esso Havden: Max. d.w.t. 36,000. Max. LOA 210 m. Max. draft 10.4 m. (34 ft.). Distance bow to manifold 99.0 m.

HEALTH: No special Pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge. Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned W.N.W – E.S.E. located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (58° 05.3′ N., 11° 49.2′ E.). It is shown on BA Chart 890. It is used for the import of fuel oil for the power station located 0.5 mile away and for the import of products, solvents and LPG for oil companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg/sq. cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Esso Terminal, Havden: *General:* Esso's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (58° 05′ N., 11° 48.5′ E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chiksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Esso Terminal, Havden, is not required.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

CONSULS: At Gothenburg.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

AUTHORITY: Statens Vattenfallsverk, Box 79, S-44401, Stenungsund, Sweden. *Tel:* 46-303-70670. *Telex:* 2408 Svvstd S. *Cables:* Kraftverket. *Contact:* Bengt Jonsson, Harbour Master.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan Book)

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*
Cable address	Furusund Pilot Station	Stockholm Pilot Station	Nynashamn Pilot Station
Notice of arrival	5 hours	5 hours	5 hours

(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 tons d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 400 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 400 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Tankers with gross tonnage exceeding 22,000 tons must be accompanied by a tug through the Archipelago to Stockholm and nearby ports.

Ships with a gross tonnage exceeding 400 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm pilot station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 9.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships

Gashaga	9.8 m. – 10.3 m.	200 m.
Kvarnholmen	9.4 m. – 10.8 m.	183 m. – 230 m.
Loudden	8.1 m. – 11.3 m.	190 m. – 230 m.
Rasta	10.9 m.	213 m.
Telegrafberget	11.4 m.	230 m.
Vartan	7.4 m. – 10.3 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for inward clearance provide Customs Office with written declaration of freedom from infection. Further instructions will be issued by Customs Office when such a declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 pilot stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

BERTHING: Services of boatmen available any time day or night. Boatmen are ordered from Stockholm Port Authority. Tel: 08/635500 or by VHF Channel 12. *See Table on page 1316.*

STEVEDORES: Stevedores available from Stockholms Hamngods AB. Tel: 08/635500. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.

TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside (ft. in.)*	*Diameter of Discharge Pipe-lines (in.)*

** Besides the quay cranes there is a pontoon crane of 260 tons lifting capacity, with own propelling machinery. The number of cranes is thus 34. In addition to these there are some cranes in private ownership. The port also owns a floating link-span.

MEDICAL: Duty Medical Officer available all hours day or night. Tel. Stockholm 21 55 49, 11 83 31 or 20 30 91. Seamen admitted to hospital with note from Medical Officer for Seamen, but not necessary for emergency admissions. Valid certificates of vaccination must be produced. Any necessary vaccinations carried out by Medical Officer for Seamen.

FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

CERTIFICATES:

Tonnage Certificate.
Certificate of Nationality.
Derat Certificate not more than 6 months old.
Ship's articles, crew list or similar document listing all persons signed on aboard.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

IDENTIFICATION CARDS: Passport or seaman's discharge book with photograph.

REPAIRS: All types of deck and machinery repairs can be carried out.

DRY DOCKS: Gustav V Dock, length 598 ft., width 79 ft., depth 31 ft. Also 3 other dry docks and 5 floating docks.

REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.

AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saints' Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.

SERVICES: Electric current can be laid on at some quays. Port has a special barge for collection of oil residues. Licensed compass adjusters available.

SHORE LEAVE: No restrictions.

DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.

AUTHORITY: Stockholms Hamn, P.O.Box 27314, S- 10254 Stockholm. *Tel:* 08/635500. *Telex:* 10612. *Cables:* Capitalport. *Contact:* Thomas Krokstedt, Harbour Master.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E.

(See Plan Book)

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.

DOCUMENTS:

Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Derat Certificate), not older than 6 months. Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns Harbour Radio).

Vessels may not berth without permission of the Company.

PILOTAGE: Pilot boards in the outer approaches and should be ordered at least 5 hours in advance by Tel: 0498/27010 (Storugns) or 10138 (Visby). Pilots keep watch on VHF Channel 16.

ANCHORAGES: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hindrance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.

Prohibited Anchorage: From 57° 52.45′ N., 18° 46.85′ E. thence North to 57° 27.7′ N. then East to Eastern shore, then South along the shore to 57° 52′ N., then West to the point of origin.

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.

HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.

RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, or by telephone 0498/27160 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude.

Between 0500 and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).

VHF: Storugns Harbour Radio VHF Channels 16 and 9.

TUGS: Not available on the island of Gotland.

BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone, which is of high purity and has a very low percentage of impurities, is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu. m.

The stowage factor varies between 17 and 26 (17 – 18 for grades 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 24 for grades above 120 mm.).

Quay		*Length*		*Depth*	
Quay 1	outside	140 m.		outside	9.5 m.
	inside	120 m.		inside	7.0 m.
Quay 2		48 m.	(no loading)		5.0 m.
Quay 3		110 m.		outer	7.0 m.
				inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels can obtain boatmen service through their Agents or by calling the boatmen service firm "Trossvakt" over Tel: 0498/254 33 or over VHF Channel 16. Booking should be done at least 2 hours before ETA. Shipper/NordKalk AB cannot offer boatmen service.

BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 is about 500 – 600 t.p.h and on Quay 3 about 300 – 350 t.p.h.

Shipmaster's Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday-Friday 0530 – 2230 hrs. Overtime working to complete loading is available to a limited degree, as is loading on Saturdays and Sundays. Vessels requiring overtime loading Saturday/Sunday must give notice not later than Friday 1100 hrs.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.

FRESH WATER: Not available.

FUEL: Most grades available from Visby subject prior notice.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Ship's crew open and close.

CUSTOMS ALLOWANCES: Presently 200 cigarettes per head/week. Practically no spirits allowed out of bond.

IDENTIFICATION CARDS: Seamen's book or passport if travelling outside port area.

CONSULS: Nearest consuls (for Denmark, Finland, Norway, West Germany) at Visby.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

REPATRIATION: Good possibilities for changing crew.

AIRPORT: Visby.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

SHORE LEAVE: Permitted.

POLICE/AMBULANCE/FIRE: Tel: 90 000.

AUTHORITY: NordKalk AB, Storugns, S-620 34 Laerbro, Sweden. *Tel:* 0498-27100. *Telex:* 4150 Nkalks. *Contact:* Gote Sandberg.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".

ANCHORAGES: Available within port for vessels up to and including 3,000 d.w.t.

MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.

BERTHING: No particular restrictions for berthing within the port.

FRESH WATER: Available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

IDENTIFICATION CARDS: Needed.

CONSULS: Norway: Bertil Alen, Hjartagatan 13.

REPAIRS: Repairs possible.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.

HOLIDAYS: Cargo work cannot be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 90000.

TELEPHONES: No arrangements exist for placing telephones on board.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

DELAYS: No delays in load or discharge.

AUTHORITY: Hamnforvaltningen Stromstad.

SUNDSVALL: 62.25 N. 17.20 E. (See Plan Book)

DOCUMENTS:

3 copies Crew Lists.
3 copies Passenger Lists (if passengers onboard only).
2 copies Crew Declaration on tobacco, liqueur, cigarettes and spirit, etc.
2 copies Ship's Stores List.
1 copy Cargo Declaration.
Derat Certificate.
Tonnage Certificate.
Register.
Swedish Light Dues.
Manifest and/or Bill of Lading.

PILOTAGE: Pilot station (Tel: 060-58 60 00/7) at Spikarna Southern Point of Alno Island VHF Channel 16. For communication and instructions Channel 13.

Pilot boarding from pilot cutter 2.5 miles East of Gubben Lighthouse in position Lat. 62° 21′ N., Long. 17° 40′ E.

Entrance passage Gubben Light – Spikarna Light – Draghallan Light all 14 m. deep.

ANCHORAGES: Between islands of Tjufholmen and Alno and also in Svartvik Bay.

MAX. SIZE: See "Berthing".

RADIO: Cable Agents giving ETA, draft and Cash requirements either via Hernosand Radio SAH or Stockholm Radio SDJ. At least 24 hours' notice required. Change in ETA to be given at least 5 hours before ETA Pilot.

TUGS: Available, ordered by Agent. Compulsory at Sundsvall Oil Terminal for tankers of more than 10,000 d.w.t.

BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Kubikenborg: Lat. 62° 22.7′ N., Long. 17° 22′ E.

Length of quay 150 m. Max. length 192 m. Max. draft 10.5 m. 1 shorecrane, capacity 5 tons. 1 suction-installation, capacity 150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Norra Nyhamn: Lat. 62° 20′ N., Long. 17° 24.8′ E.

Length of quay (pierhead only) 8 m. Tankers to be secured aft and drop both anchors forward. Discharging aft-connection. Max. draft along the quay, 6 m. Pilot distance 6 nautical miles. Distance from Sundsvall Town 18 km.

Ortviken: Lat. 62° 23.8′ N., Long. 17° 21.8′ E.

Oil Berth: Quay length 140 m. Max. draft at max. 200 m. length is 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: Lat. 62° 29′ N., Long. 17° 21′ E.

Salt Berth: Length of quay 75 m. Max. draft 5 m. (port side alongside). 1 shore crane, capacity 5 tons.

Glaubersalt Berth: Length of quay 40 m. Max. draft 5.4 m. 1 shore crane, capacity 4 tons.

Oil Berth: Tankers berthed outside 3 timber rafts, max. LOA 200 m., max. draft 6.0 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 15 km.

Soraker: Lat. 62° 30.5′ N., Long. 17° 30′ E.

Length of quay 150 m. Max. LOA 90 m. Max. draft 5.8 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the Alno Island). Pilot distance 20 nautical miles (West of the Alno Island). Distance from Sundsvall Town 34 km.

Stockvik: Lat. 62° 20′ N., Long. 17° 22′ E.

Length of quay 190 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall Town 9 km.

Sundsvall Town Quay: Lat. 62° 23.5′ N., Long. 17° 19.5′ E.

1 Berth:	Length 90 m. Max. draft 7.8 m.
1 Berth:	Length 175 m. Max. draft 5 m. – 7 m.
1 Ferry/Ro-Ro Berth:	Max. beam 15 m. Max. draft 7.5 m.

No cargo is handled on Sundsvall Town Quay. Pilot distance 12 nautical miles.

Sundsvall Oil Berth: (Vindskarsudde) Lat. 62° 23.2′ N., Long. 17° 21.8′ E.

Length of quay 100 m. Max. LOA 250 m. Max. draft 11.3 m. Max. d.w.t. 70,000. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall Town 3 km. Vessels berth port side to.

Svartvik: Lat. 62° 19′ N., Long. 17° 22′ E.

Length of quay 140 m. Max. draft at 100 m. length is 6.5 m.

Oil Berth: Tankers berthed outside 3 timber rafts. Max. draft at 170 m. length – Forward 6.9 m., Aft 9.1 m. Pilot distance 10 nautical miles. Distance from Sundsvall Town 11 km.

Port of Sundsvall (Tunadalshamnen): Lat. 62° 25′ N., Long. 17° 23′ E.

Length of quay 450 m. Max. draft 9.2 m. 3 shore cranes, capacity 10 tons. Additional berth: Length of quay 200 m. Max. draft 12.6 m. Pilot distance 13 nautical miles. Distance from Sundsvall town 7 km.

Ro/Ro Berth: Max. beam 30 m. Max draft 9.2 m.

Tunadal Sawmill: Lat. 62° 25′ N., Long. 17° 23′ E.

Length of quay 195 m. Max. draft at 80 m. length is 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Vivstavarv: Lat. 62° 29′ N., Long. 17° 28′ E.

Length of quay 160 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 18 km.

MEDICAL: First class medical attention and dental care available.

TANKERS: See "Berthing".

STEVEDORES:

Ordinary working hours Monday – Friday 0700 – 1600 hrs.

Overtime on Saturdays 0700 – 1330 hrs. at 100% additional cost.

CRANES: 3 cranes available 10 – 20 ton. At Tunadalshamnen cargo is also handled by mobile cranes. Also see "Berthing".

CUSTOMS ALLOWANCES: See "Stockholm".

DENSITY: Nearly fresh, 1005.

FRESH WATER: Supplied at Sundsvall, Kubikenborg, Stockvik and Tunadal.

FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down at weekends.

SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at oil terminals only.

CONSULS: Denmark, Finland, Germany, Iceland, Netherlands, Norway.

REPAIRS: Most repairs possible through local repair shops.

DRY DOCKS: Lunde Varv outside Kramfors.

SURVEYORS: Cargo inspectors available through Sundsvall Control Service or Lloyd's Agency for cargo or vessel.

Surveyors available from Stockholm in most cases. Call Agents for details at time.

AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel: 90 000.

EMERGENCY: CO-ORDINATION CENTRE: Tel: 90 000 giving full details of situation or call Harnosand Coast radio station VHF or MF.

STORING: Vessels stored by truck only, through assistance of stevedores and forklifts. Can be done close alongside ship.

GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port Authorities in advance of nature, quantity and IMO code number of goods concerned.

Wintertime: Ice-breaker service available if needed (Wintertime mid-December to mid-April).

AUTHORITY: Sundsvalls Hamnforvaltning, Hamnplan 4, S-851 85 Sundsvall, Sweden. *Tel:* (060) 19 10 00. *Contact:* Erik Westerlund or Sten Lundell, Harbour Masters, Tel: (060) 19 15 91.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan Book)

DOCUMENTS: See "Stockholm".

PILOTAGE: Available day and night. To obtain Harbour Pilot report 5 hours in advance. To obtain outward Pilot report 24 hours in advance of departure. Meet inward-bound ships on Roads with motor boat. Outward-bound Pilot obtained from pilot station of Trelleborg. Tel: 040-115269, 040-978315. Pilot boats provided with short-wave radio telephone, and in pilot station an up-to-date radar set is installed. Also see "Stockholm".

ANCHORAGES: Recommended West of entrance fairway between Fairway Buoy and No. 1 Light Buoy. Depth varies from 7 m. – 14 m. Anchor ground good – clay and sand.

RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 96 m.)

HEALTH: See "Stockholm".

VHF: Port and pilot station on Channels 16 and 9.

TUGS: Tug-boats can be obtained promptly from Malmo.

BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by 1 bridge crane (6.2 tons) and 1 mobile crane of 36 tons. Western Harbour Basin has depth of 7 m. in Western and Northern part and 8 m. in Eastern part. Eastern Harbour Basin has depth of 6.5 m. in Eastern and Northern part and 8 m. in Western part. Oil Quay 230 ft. long, depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. From oil harbour area direct importation of oils is made to Svenska Fina, Statens Jarnvagar (the Swedish State's Railway Company), the Trelleborgs Gummifabriks AB (Trelleborg Rubber Factory Ltd.). Five berths equipped for Ro/Ro traffic.

STEVEDORES: Available (Tel: 43135).

FRESH WATER: Available on all quays at request to Harbour Office.

FUEL: All grades bunker oils supplied at oil quay through direct pipe-line from sea depot. rder on phone Trelleborg 107 76.

REPAIRS: Available through private firms. Tel: Trelleborg 150 60, 109 66 or 124 50.

CONSULS: Denmark, Finland, Norway and West Germany.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: Ship's telephone available at Oil Quay, Tel: 148 28, and at the Harbour Bridge, Tel: 147 67. Order is made through Harbour Office.

SERVICES: Divers available through the Harbour Office. Refuse containers can be hired.

AUTHORITY: Trelleborgs Hamn, Box 26, 23101 Trelleborg, Sweden. *Tel:* 0410-41015. *Contact:* Karl-Axel Green, Harbour Master.

UDDEVALLA (including Froland): 58.21 N. 11.56 E. (See Plan Book)

DOCUMENTS:

3 Crew Lists.

3 Passenger Lists.

Health Document. Derat Certificate when ship arrives from abroad, except from Denmark, Norway and Finland.

3 Manifests.

1 copy of Bill of Lading.

Tonnage Certificate.

Nationality Certificate.

1 Crew Effects Declaration.

2 Ship's Stores Declaration.

1 Declaration of Living Animals (if any).

PILOTAGE: Pilotage at Marstrand. Address "Marstrand Pilotstation". Required ETA 5 hours. VHF 16 and 11. Pilot boat S.W. of Hätteberget Lighthouse (Lat. 57° 51.8′ N., Long. 11° 27.65′ E). (Also see "Stockholm".)

MAX. SIZE: Draft 11 m., height 44 m.

HEALTH: Cable to Agent and he will arrange with Health Authorities.

RADIO: SAG. Gothenburg Radio (Goteborg Radio).

RADAR/VHF: No port radar service, VHF Channels 16, 11 and 14.

TUGS: 3 Tugs up to 3,200 h.p. available. Can be ordered through Pilot or Agent.

BERTHING: Depths alongside (at MW) as follows:

	Length (m.)	*Depth* (m.)
Skeppsholm Quay	290	10.7
Bado Quay	430	7.0 – 9.5
Bave Quay	180	7.0
Skans Quay	180	6.0
Thule Quay	105	4.0
Juno Quay	200	6.0
Froland	225	12.0

CARGO HANDLING FACILITIES:

Skeppsholmspiren: 6 electric cranes of 12 to 35 tons capacity. This berth is especially constructed to handle the loading/unloading of bulk cargoes ore, coal, coke, scrap iron etc. Very large storage areas. 1 berth equipped for Ro-Ro traffic.

Bado Quay: 8 electric cranes with capacities of 7 – 12 tons. 9,000 sq.m. of warehouses and 13,000 sq.m. of storage.

Bave Quay: 2 electric cranes with capacities of 6 tons. 3,400 sq.m. of warehouse and 14,000 sq.m. of storage.

Grain Cargoes: 2 silos owned by private companies.

Froland: (Lat. 58° 20′ N., Long 11° 52′ E.) Total length 225 m., depth alongside 12 m., 3 electric cranes with capacities of 35 tons. 35,000 sq.m. of storage. One berth equipped for Ro/Ro traffic, depth 8.0 m.

STEVEDORES: Arranged by Agent.
TANKERS: Draft in the Skeppsviken Oilport, 11 m.; at the Bado Oilport, 9.5 m.
FRESH WATER: Available at all quays.
FUEL: All grades available.
FIRE PRECAUTIONS: Watchmen necessary when loading or discharging oils by pipe-lines.
GANGWAY/DECK WATCHMAN: Watchman accepted by Harbour and Fire Authorities on vessels loaded with explosives.
OPENING/CLOSING HATCHES: Preferably by crew. Can be arranged by stevedores.
CERTIFICATES: Tonnag Certificate, Nationality Certificate, Derat Certificate.
CUSTOMS ALLOWANCES: 100 cigarettes and 0.5 bottle of spirits for each (every 3rd day) man as a normal quantity. Possible to be increased for Master.
IDENTIFICATION CARDS: Not required.
CONSULS:

STORING: See "Prelims", page viii.
1. Vessel can be stored by barge or truck.
2. Before storing the Port Authority must be contacted.
3. Trucks can proceed alongside at every berth.
4. Fork lift can be used.
5. Storing under Customs supervision.
6. Local riggers can be employed.

SHORE LEAVE: No restrictions.
AUTHORITY: Uddevalla Hamn, 451 81 Uddevalla, Sweden. *Tel:* 0522-147 70. *Telex:* 42269 Uddport S. *Contact:* Trafik Department.

UMEA: 63.49 N. 20.16 E. (See Plan Book)

DOCUMENTS:

Ship's Documents:
Tonnage Certificate.
Certificate of Nationality.
Derat Certificate (not older than 6 months).

Supplied by Master on arrival:
1 copy of each Manifest.
1 copy of each Bill of Lading.

Supplied by Agent and signed by the Master on arrival from foreign ports:
1 Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
1 Crew Effects Declaration.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).

Furthermore on arrival from any port:
1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.

On departure to a Foreign Port:
5 Reports of Departure.

PILOTAGE: Umea Pilot Station: Bredskar. Tel: 090-45021 and 090-45544. Telegraphic address "Pilotstation Umea".

At least 5 hours' advance notice of ETA at pilot station, stating time and pilot station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish pilot station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel.

All pilot boats orange with flag "H" and equipped with radar.

Boarding point, Lat. 63° 36.5′ N., Long. 20° 25.5′ E., 1.0 nautical miles 145° (T) from Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the pilot station.

Anchorage for vessels awaiting Pilot: Lat. 63° 36′ N., Long. 20° 28′ E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 m. to 30 m.

ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea hamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of Lat. 63° 42.3′ N., Long. 20° 21.0′ E. and with a depth of 12 m. to 22 m.

Anchorage is forbidden around position Lat. 63° 40.5′ N., Long. 20° 20.0′ E.

Cables and fresh water pipe-line on Osterfjarden roadstead passing East-West around Lat. 63° 42.5′ N.

RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 13,000 d.w.t. and a max. draft of 7.62 m., and dry cargo vessels with a draft not exceeding 8.53 m.

During unsuitable weather conditions, according to the Pilot on duty. Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.

MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft (m.)*
Ferry Station No. 1-2	7.6
Ferry Station No. 3	10.2
Stormskar Oil Berth and Obbola	10.2
Holmsund Oil Jetty	5.5
Umea Inner Harbour and Gimonas Oil Jetty	3.0

No tide.

HEALTH: Free Pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents").
RADIO: Harnosands Radio (SAH) on 2182 kHz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port radio: Umea port radio keeps watch, Monday to Friday, 0815 – 1630 hrs. on VHF Channel 16. Working Channels 11 and 13. At other times Umea pilot station. No port radar service, but Umea Pilot Station and the pilot boats are equipped with VHF and can assist on request.

TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.
BERTHING: Depth alongside (at MW) as follows:

Umea Outport:	*Depth in metres*
Ferry Stations:	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	9.0
North Quay, Berth Nos. 2 to 6	7.0
North Quay, Berth Nos. 1 to 2	6.0

CRANES:
North Quay: 3 cranes, 2 – 7.5 tons.
Pier Quay: 3 cranes, 3 – 7.5 tons.
South Quay: 1 crane of 40 tons.
Ferry Station No. 3: 1 crane 3 – 5 tons.

TANKERS: Oil berths at Port of Umea.

Stormskar: Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses. Max. LOA 215 m., max. beam 30.0 m., max. draft 10.2 m. (channel limitation at MLW is 9.7 m.) Max. d.w.t. 42,000. Vessels usually berth starboard side to.

Obbola: Oil Jetty, depth 11.0 m. Max. LOA 200 m., max. draft 10.2 m. (channel limitation at MLW is 9.7 m.). Max. d.w.t. 40,000. Vessels berth port side to.

DENSITY: Nearly fresh water.
STEVEDORES: Holmsunds Stuveri AB. Tel. 090-40970. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday to Friday 0600 – 1500 hrs., meal hour 1000 – 1100 hrs. Coffee breaks 0800 – 0810 hrs.; 1300 – 1310 hrs.

MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.
FRESH WATER: Delivered from water posts in Port of Umea at Ferry Station No. 1, Oil Berth, Berth Nos. 1 – 10 and in Umea Inner Harbour.
FUEL: All kinds and grades of fuel oil available in Port of Umea. Bunkering at Berths 1 – 10 possible during normal loading or unloading from pipe-line. At Ferry Station Nos. 1 and 2 and the Oil Berth also bunkering from pipe-line. Fuel can also be delivered from lorries. Notice as soon as possible.
FIRE PRECAUTIONS: Security watchmen from port of Umea while alongside the Oil Berth. Alarm regulations in writing will be delivered on arrival.
GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.
OPENING/CLOSING HATCHES: Can be done by stevedores if necessary, except patent hatches.
CUSTOMS ALLOWANCES: *Tobacco:* 200 cigarettes or 250 grammes of tobacco (7 ozs.)

Spirits and Wine: 1 bottle of each (1 litre), minimum age 20 years.

Above mentioned quantities are per crew member and per week in Sweden. After a week quantities are taken out after request to the Customs Office.

IDENTIFICATION CARDS: Not required. Seaman's book sufficient.
CONSULS: Following countries have representatives in Umea: Denmark, Finland, Netherlands, Norway.
REPAIRS: Most deck and engine repairs.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Umea, approx. 20 km. away, served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Saturday in November); Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.
TELEPHONES: Available for placing on board at Berths 1 – 10 and Oil Berth at Stormskar.
AUTHORITY: Umea Hamn, S – 91300 Holmsund, Sweden. *Tel:* 090-24230. *Contact:* Per Ove Englund, Port Director.

VALLVIK: 61.11 N. 17.11 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Soderhamn (Ljusne Station).
ANCHORAGES: *(a)* Ljusne bight sheltered from W., N. to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun island sheltered from South to S.W. winds, depths 10 to 12 fathoms.
RESTRICTIONS: No direct restrictions. Ships of about 5,000 tons d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to Pilot and weather conditions).
MAX. SIZE: Max. draft in fairway 7.5 m. Loading pier is 200 m. Berthing possible on both sides.

	Distance	Depth MWL (m.)
East side (from outer end):		
	0 – 80 m.	8.3
	80 – 85 m.	7.7
	85 – 110 m.	7.2
	110 – 140 m.	6.7
	140 – 175 m.	5.8
	175 – 195 m.	5.7
	195 – 200 m.	5.2
West side (from outer end):		
	0 – 40 m.	7.6
	40 – 70 m.	5.8
	70 – 90 m.	5.5
	90 – 140 m.	4.6

HEALTH: No special action except if suspected disease. In that case contact Agent.
RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.
RADAR/VHF: No port radar service. There is a radar station at Ljusne. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channels 16 and 13.
BERTHING: Ship's Agent keeps contact with port Authorities.
STEVEDORES: Agent arranges required or available gangs according to the Shipmaster's wishes.
TANKERS: 10 in. diameter discharging hoses and pipe-line. Tanker berth at loading pier, 3 different connecting points.
FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.
FUEL: Tanker lorries ordered through Agent, available with a few hours' notice.
GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.
OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.
CARGO GEAR: Cargo gear certificates valid.
IDENTIFICATION CARDS: Not needed.
CONSULS: Danish, Dutch, and French Consuls in Soderhamn.
REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.
DRY DOCKS: None.
REPATRIATION: Facilities for crew changes available.
AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Soderhamn".
POLICE/AMBULANCE/FIRE: See "Soderhamn".
TELEPHONES: No arrangements for placing telephones on board. Telephone for ship's use available in Harbour Master's Office.
AUTHORITY: Vallviks Hamn, NCB-Vallvik, 82021 Vallvik, Sweden. *Tel:* 0270-69510. *Telex:* 47011. *Contact:* Benny Westin.

VARBERG: 57.07 N. 12.15 E. (See Plan Book)

DOCUMENTS:
Crew List.
Passenger List.
Maritime Declaration of Health (including Derat Certificate).
Ship's Certificate of Registry.
Manifests and B/L copies.

PILOTAGE: Application for Sea Pilot through ship's Agent. Telephone to Pilot station 0340/10300. Pilot to board vessel on the road about 0.5 nautical miles off Varberg. (Also see "Stockholm".)
ANCHORAGE: On the roads 33 ft. depth.
RESTRICTIONS: No tide or other entry restrictions.
MAX. SIZE: Length 170 m., breadth 25 m., draft 23 ft. No tide.
HEALTH: Vessel to be kept in quarantine if disease on board suspected.
RADIO: Gothenburg Radio, SAG. VHF Channels 16 and 26.
TUGS: Tugs to be ordered 12 hours in advance.
STEVEDORES: Gangs to be ordered in advance through ship's Agent.
MEDICAL: Hospital facilities available. Desirable to give advance notice.
TANKERS: 1 tanker berth, max. draft 23 ft.
FRESH WATER: Available all docks 35 t.p.h.
FUEL: Fuel Oil No. 1 – 5 available from tank trucks.
FIRE PRECAUTIONS: Oil and petrol to be discharged under supervision of watchman.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Generally done by stevedores.
CERTIFICATES: Certificates of Registry and Derat and also Crew List.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes per man. (Wine/Spirits), 1 bottle per man.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Vice-Consul of Finland, Tel: 0340/16000
Vice-Consul of Netherland, Tel: 0340/16270
Vice-Consul of Denmark, Tel: 0340/16130

REPAIRS: Only minor repairs.
REPATRIATION: Can be effected.
AIRPORT: Nearest airport with regular airlines, Torslanda/Gothenburg, 50 miles North of Varberg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Principal Swedish Holidays – when no cargo work is obtainable: New Year's Day; Good Friday; Easter Day; 2nd Easter Day; Labour Day (May 1st); Whitsun Day; 2nd Whitsun Day; Midsummer Day; All Saint's Day (November); Christmas Day; 2nd Christmas Day.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Available on dock and one for placing on board.
DEVELOPMENTS: Planned increases of draft at the entrance to 9 m. = 29 ft. and in the harbour to 8 m. = 26 ft.
AUTHORITY: Port Authority of Varberg, Hamnkontoret, 43200 Varberg, Sweden. *Tel:* 0340-88528. *Contact:* Tore Gustavsson, Port Manager.

VASTERAS: 59.37 N. 16.33 E. (See Plan Book)

DOCUMENTS:
Ship's Register.
2 Crew Lists.
1 Tobacco List, signed by all hands on board.
1 Valid Derat Certificate.
1 copy of Manifest or Bill of Lading for each Swedish port of call.
Light dues receipts, if on board.

PILOTAGE: Incoming ships receive Pilot from Landsort. Pilot ordered by VHF Channel 16 or by RT. Pilot boats fitted with VHF. Give order 5 hours before Pilot required. Pilots meet ships about 2 nautical miles outside Landsort. Light and signals in accordance with the international rules. (Also see "Stockholm".)
ANCHORAGES: Within harbour area. Depth 9 m. – 10 m.
RESTRICTIONS: None. No tides.
MAX. SIZE: Vessels reach port through two deep navigable channels – through Sodertalje Ship Channel or via Stockholm through Hammarby Ship Canal. Least depth of channels at average water level is 7.3 m. (24 ft. 1 in.).

Sizes of Locks:

	Length	*Width*	*Depth*
Sodertalje	136 m.	20 m.	7.5 m.
Hammarby	115 m.	17.4 m.	7.0 m.

Limitation of Vessels: For Sodertalje: With beam of 18 m. max. draft 6.5 m. With beam of 17 m. max. draft 6.8 m. Max. LOA 124 m.
HEALTH: No special requirements or health documents, only valid Derat Certificate. Disease or fever on board must be declared before entering port.
RADIO: Stockholm Radio.
VHF: Harbour Office, VHF Channels 16 and 14, Monday-Friday 0800 – 1600 hrs. Traffic – Channel 11.
UGS: 1 tug for unberthing. Ship's lines. Boatmen can be ordered via VHF Channel 16.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
Djuphamnskajen	660	7.6	2* container cranes 12 tons – 33 tons 2 cranes × 8 tons 1 crane × 5 tons 1 crane × 22 tons
Oljekajen	125	7.6	
Kolkajen (Ro/Ro)	120 plus dolphins	7.6	2 container cranes 12 tons – 33 tons
Ostra Kajen	527	5.0 – 7.6	1 container crane 22 tons 5 cranes × 5 tons 1 heavy lift crane 210 tons
Lillakajen	120	7.6	2 cranes × 5 tons
Silokajen	130	7.3	1 unloader, rate 750 t.p.h.
Tullhus	483	3.0 – 5.0	1 crane × 6 tons 1 crane × 2 tons
Kraftverkshamnen	210	5.8	2 cranes × 6 tons

*In 1985 an additional 33 ton crane will be available for containers.
BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 – 1830 hrs. weekdays and 1300 – 1500 hrs. Saturday or day before a holiday.
STEVEDORES: Stevedores for next working day ordered by at least 1500 hrs. day before and ETA to be given in due time. Tel: 021-12 71 20.
MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.
FRESH WATER: Ordered through Port Administration.

FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.
FIRE PRECAUTIONS: Accordance harbour regulations.
GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.
OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.
CERTIFICATES: Measurement certificate and all gear test certificates required, if ship's gear to be used.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes or 200 gr. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.
IDENTIFICATION CARDS: None required.
CONSULS: Denmark, Finland and Norway.
REPAIRS: Most deck and engine repairs, as well as electrical.
DRY DOCKS: None.
REPATRIATION: Possible. Accommodation to be ordered in good time.
AIRPORT: Arlanda, 120 km. International lines.
IME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: In oil and deep-water harbour, most quays fitted with telephones.
SERVICES: Compass adjusting. Small radio repairs by local radio men.
SHORE LEAVE: Crew can leave vessel after Customs clearance and Immigration control.
DEVELOPMENTS: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.
AUTHORITY: Vasteras Hamn, Sigurdsgatan 1, Box 256, S-721 06 Vasteras, Sweden. *T:* 021-180100. *Contact:* Stig Raberg, Port Director. Goran Noren, Port Captain. Stig Jansson, Traffic Manager.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Compulsory. Pilot boards in 57° 45.1′ N., 16° 57.3′ E., available day and night. Telephone: 0490-28041. Call sign "Lotsarna Ido".
BERTHING: *Outer Harbour:* Djuphamnskajen Lucernakajen), length 200 m., depth 8.3 m.
Oil Quay (North part of Lucernakajen): Depth 8.3 m., equipped with 3×8 in. pipe-lines.
Ferry Harbour: Quay length 100 m., depth 6.3 m.
Inner Harbour: Quay length 900 m., depth alongside from 4 to 6 m.
Oil berth: Length 15.0 m., depth alongside 6 m.
FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn, Box 3093, 593 03 Vastervik, Sweden. *Tel:* 0490-10690, 16920. *Contact:* Olof Lindroos, Harbour Master.

VISBY: 57.38 N. 18.17 E. (See Plan Book)

DOCUMENTS: See "Stockholm".
PILOTAGE: Tel. 0498-10138 between 0600 – 2200 hrs., if possible 5 hours before arrival. Pilotage day or night. Embark/disembark outside port entrance. Radar and VHF at pilot station. (Also see "Stockholm".)
ANCHORAGES: Outside harbour, water depth 30 m. to 50 m. Clay bottom. No mooring buoys.
RESTRICTIONS: No tide in harbour. Currents outside harbour up to 4 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W. – W., which with strong winds produces swell along the piers.
MAX. SIZE: After re-building the max. size will be 5,000 – 6,000 d.w.t. and 150 m. LOA, turning in harbour.
TUGS: None available.
BERTHING: The harbour comprises 2 new Ro/Ro berths, 160 m. and 200 m. in length, with a depth of 7 m. Width of Ro/Ro berth 35 m. A new oil quay with depth of 8 m. for vessels up to 5,000 d.w.t.
Old Harbour: The old Harbour contains 4 Ro/Ro ramps, an oil quay, a berth of 120 m. for general cargo and a berth of 150 m. for grain. Depth alongside 5 m. – 6 m.
BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.
TANKERS: See "Berthing".
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegnen, Harbour Master.
AGENT: AB Carl E. Ekman, Hamngatan 3, Box 2067, S-62102 Visby, Sweden. Tel: 0498-49000. Telex: 4134. Cables: Ekman.

WALLHAMN: 58.01 N. 11.42 E. (See Plan Book)

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
PILOTAGE: Pilots board West of Skallen Lighthouse outside Marstrand. Address: "Marstrand Pilot Station", Tel: 0303-60004, VHF Channel 16. 24 hours' notice to be given through Agents.
ANCHORAGE: Whilst awaiting berth, vessels can anchor South of the entrance.
MAX. SIZE: Draft not to exceed 11.0 m. At stone loading berth – 6.0 m.
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
VHF: Wallhamn Harbour Radio – VHF Channel 16.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for Roll-on/Roll-off: (2) 180 m. × 11 m. depth. (3) 130 m. × 11 m. depth. (4) 130 m. × 8.5 m. depth (5) 240 m. × 8.5 m. depth and (6) 110 m. × 6 m. depth, quay for loading of stone products.
STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FUEL: Most grades of bunker oil available with short notice.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passports should be carried.
CONSULS: In Gothenburg, 60 km. away.
REPAIRS: Smaller repairs performed by own workshop. More complicated repairs to be arranged by Agent.
REPATRIATION: All facilities available.
AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: No restrictions.
AUTHORITY: Wallhamn Hamn AB., S-44060 Skaerhamn, Sweden. *Tel:* 0304-60720. *Telex:* 2429 Wallhmn. *Cables:* Wallhamn. *Contact:* L Naevergaardh, Agency Manager. B. Evertsson, Port Captain, Per Nilsson, General Manager.

YSTAD: 55.26 N. 13.50 E. (See Plan Book)

DOCUMENTS:
Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.
TRAFFIC WARNING SYSTEM: Vessels approaching Ystad listen on Channel 16 for broadcast announcing ferry departures. All inward bound vessels have to make contact.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Trelleborg at least 5 hours before pilotage due to commence. Tel: 0410 – 10141 or VHF (Channel 16), stating tonnage, draft and destination. VHF call sign "Lotsarna" plus name of pilot's station. (Also see "Stockholm".) Pilot boards at Ystad entrance buoy.
ANCHORAGES: Road: 1.0 nautical mile S.W. harbour entrance, 9 m. – 10 m. depth; sand and clay, good anchorage ground. The road is open to winds from S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t. Depth 7.2 m., max. draft 6.7 m. (22 ft.)
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Trelleborg pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours (0700 – 2400 hrs.).
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 150 m. length and 20 m. breadth can enter harbour. Max. draft 22 ft. at MWL.
Ro/Ro Berth: Three movable ramps for lorries/goods. Breadth 8 m., 10 m. and 12 m. One railway ferry ramp with a fixed car ramp to upper deck.
CRANES: 2×6 tons (9 ton with double gear), 1×5 ton, 1×3 ton. All cranes are rail-mounted and electric.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB, Tel: 0411-18080. Working hours Monday – Friday 0700 – 1630 hrs. Meal intervals 0900 – 0930 hrs. and 1200 – 1230 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter. (Tankfarm of 40,000 cu.m.)
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: (Tobacco), about 200 cigarettes or 200 gram of tobacco for each member of crew. (Spirits), 1 bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and Roll-on/Roll-off ramps.

IDENTIFICATION CARDS: Not needed.
CONSULS: Danish Consul, Tel: 13800. Finnish Consul, Tel: 13940. Norwegian Consul, Tel: 13930.
REPAIRS: Mechanical workshop.
SURVEYORS: Surveyor appointed by the Swedish National Administration of Shipping and Navigation at the Port Office.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police, Tel: 13620; Ambulance and Fire, Tel: 90000.
GENERAL: *Refuse Disposal:*

Contaminated Water: To the reception station at Revhuskajen (max. 500 cu.m.).

Waste Oil: Via a tank-truck (max. 10 cu.m.).

Solid Garbage: Via a motorised container to a refuse dump (max. 12 cu.m.).

SHORE LEAVE: Permitted.
AUTHORITY: Ystads Hamn, Hamnkontoret, Hamngatan 18, S-27100 Ystad, Sweden. *Tel:* 0411-77263, 77000. *Cables:* Southport. *Contact:* Gunnar Berntson, General Manager.

NOTES

Please also advise Shipping Guides Ltd.

Switzerland

BASLE: 47.33 N. 7.34 E. (See Plan Book)

PORT LIMITS: A line drawn 50 m. off the shore.

DOCUMENTS:
1 Rhine-Manifest or "T"-Paper.
1 Provisions List.

The respective documents, mentioned in No. 1.10 of the Rhine Shipping Police Regulation have to be on board. Where possible, cargo manifests and stowage plans should be forwarded ahead of the vessel to the local Agent.

PILOTAGE: Holders of a High Rhine Shippers Licence have to Pilot the vessel between Basle and Birsfelden. Such licence-holders can be ordered at Signal-station (VHF Channel 18 or telephone 65 44 00).

ANCHORAGES: Vessels moored at riverside quays have to use anchors.

RESTRICTIONS: Shipping is blocked from high water mark II (gauge Rheinfelden 430 cm. up– resp. 450 cm. downstream of the Middle Bridge at Basle). Other restrictions will be announced by the Port Authority.

MAX. SIZE: Water Depth: 3.00 m. in basin II, port of Kleinhuningen; 3.50 m. in all the other port areas.

Air Draft: 5.70 m. to basin II, port of Kleinhuningen; 7.00 m. to all the other port areas of Basle Town; 4.80 m. to 7.00 m. to the ports of Basle Country.

Beam: 11.40 m. to basin II, port of Kleinhuningen and through the locks of Birsfelden.

Length: 110 m. for the section between the Middle Bridge at Basle and the locks of Birsfelden.

VHF: Port Authority on Channel 18 (call: SIGNALSTATION). Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.

TUGS: Only one private tug/pushboat is available (call: BRAGTANK, Tel: 65 44 22 or from ship to ship on VHF Channel 10: VOGEL GRYFF). Tug assistance is necessary for the section between Basle and Birsfelden from High Water Mark I (gauge Rheinfelden 350 cm.) for single engine vessels.

BERTHING: Two artificial basins at Kleinhuningen, riverside quays at Kleinhuningen (Klybeckquai), St. John, Birsfelden and Au. Load/discharge of dry cargo is done by shore equipment.

Also see "Max. Size".

CRANES: 62 shore cranes with lifting capacities up to 2×300 tons.

SPECIALISED CARGO HANDLING FACILITIES: No specific container berth, but most of the stevedore companies are able to handle containers. No LPG berth.

BRIDGES: Railway bridges across the channel to basin II, port of Kleinhuningen, permit a max. air draft of 5.70 m.

STEVEDORES: Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.

MEDICAL: Hospital facilities available.

FRESH WATER: Good quality potable water available.

FUEL: Diesel oil available.

TANKERS: Tanker piers at Kleinhuningen (Klybeck quay and basin I; the last one for oil only), St. John (vegetable oil and heavy stove oil), Birsfelden and Au.

Tankers with dangerous goods (K1 and K2 products) are not allowed to enter the basins. Load/discharge done by vessel's pumps.

CONSULS:
Austria
Belgium
Benin
Brazil
Denmark
Dominican Republic
Ecuador
Finland
France
Italy
Jamaica
Mali
Mexico
Monaco
Netherlands
Norway
Peru
Uruguay
Sweden
Spain

REPAIRS: Deck and engine repairs are possible as well as those to electric installations and electronic equipment.

DRY DOCKS: No dry dock, no slip.

SURVEYORS: Agents of Surveillance and Classification Societies are nearby.

GANGWAY/DECK WATCHMEN: At least one member of the crew has to stay aboard as watchman.

HATCHES: Opening/closing carried out by ship's crew before arrival or alongside the quay.

CUSTOMS ALLOWANCES: Swiss Regulations apply.

REPATRIATION: Scheduled aircraft connect Basle-Mulhouse airport daily with most important European airports. Also good railway connections.

AIRPORT: See "Repatriation".

HOLIDAYS: The ports are closed for work on New Year's Day, Carnival (two half days in February or March), Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Emergency services are available through the Port Authority (VHF Channel 18) or direct by telephone:
Ambulance: 144
Police: 117
Fire: 118

TELEPHONES: This service is available aboard ships at the berths for passenger boats by prior arrangement through the Agents.

SERVICES: Oily waste disposal boat available from Monday to Friday 0700 – 1800 hrs.

SHORE LEAVE: Permitted when Immigration and Customs requirements have been satisfied, as long as the crew rejoin the vessel before departure.

IDENTIFICATION CARDS: It is recommended to carry an identification card or a passport. Shore passes are not issued.

REGULATIONS: All the Rhine Shipping Regulations, recommended by the Central Commission for the Navigation on the Rhine, are valid.

DEVELOPMENTS: A Roll-on/Roll-off ramp in the port of Au. Also new tanker piers in the port of Au and at the Klybeckquai (port of Kleinhuningen).

AUTHORITY: Rheinschiffahrtsdirektion Basle, P.O.Box CH-4019 Basle, Switzerland. *Tel:* 061-654545.

NOTES

Syrian Arab Republic

GENERAL

PORT REGULATIONS:

In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63 cm. × 126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before Free Pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after Free Pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port Co. and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

	Signals	
Case	*Sound*	*Lights*
a) Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
b) Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
c) Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
d) Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.

2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.

3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

NOTICE: Vessels proceeding to Syrian ports are required to signal the following to the port radio station when 50 miles from the port of destination.

(a) ETA.
(b) Nationality.
(c) Name.

BANIAS: 35.14 N. 35.56 E. (See Plan Book)

DOCUMENTS:

5 Copies Crew List.
1 Copy Vaccination List.
1 Copy Store List.
1 Copy Private Store List.
1 Copy Slop Chest.
In case of cargo to be discharged, Original and 2 Copies Manifest and 3 Copies Bill of Lading.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged abaft the accommodation ladder, to within 4 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules is relevant.

APPROACHES: Vessels approaching the port should keep to the authorised passage, defined by the following co-ordinates:

(a) Lat. 35° 13′ 00″ N., Long. 35° 42′ 00″ E.
(b) Lat. 35° 13′ 00″ N., Long. 35° 56′ 00″ E.
(c) Lat. 35° 16′ 00″ N., Long. 35° 55′ 24″ E.
(d) Lat. 35° 16′ 00″ N., Long. 35° 40′ 34″ E.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 7″ N., Long. 35° 54′ 46″ E. It is important to maintain a listening watch on VHF, Channel 16 or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13′ 25″ N., Long. 35° 57′ 00″ E. and recognised at night by lozenge shaped lights, in order to avoid delays.

Vessels awaiting at anchorage for confirmation or other reasons, will be boarded by Mooring Master within 4 hours after berthing is decided.

MAX. SIZE:

Berth No.	*Draft Winter (ft.)*	*Draft Summer (ft.)*	*Length of Vessel (ft.)*	*Purposes*
1	Removed			
2	48	50	900	Discharging Crude Oil
	50	51	925	Loading Crude Oil
3	49	50	950	Discharging Crude Oil
	51	52	950	Loading Crude Oil
4	40	42	800	Loading/Discharging Crude Oil
5	40	42	800	Fuel Oil and White Products
6	32	34	700	Fuel Oil and White Products
7	22	24	400	Liquid Gas
	26	28	550	Jet

Danger Marker: Positioned South of Berth No. 7, Lat. 35° 13′ 03″ N., Long. 35° 56′ 03″ E.

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E.), where the Mooring Master, who is the Company's Representative, will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain Free Pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

RADIO/VHF: Syrian Company for Oil Transport, Banias Terminal must be informed 72, 48 and 24 hours prior to arrival of a vessel's ETA, quantity of cargo required if in a state to load and maximum loading rate required. All times to be given in GMT.

Banias Terminal Radio Station – Call sign: "YKM 5". Frequency: 500 kHz and 442 kHz and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications: Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 MHz. Simplex Operation. Call sign: "Banias". On arrival, ship's radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias – Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 MHz. Receiving 159.1 MHz. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station – Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 MHz. Receiving 163.6 MHz. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station *Banias Syria*
Private station for communication
with tankers bound for Banias, Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias radio station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030

(GMT) receives on ship frequencies 425, 454, 468, 480 and 512 kHz – also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 MHz Band	4351 kHz	0410
05 – 06	8 MHz Band	8667 kHz	0510
08 – 09	6 MHz Band	6493 kHz	0810
09 – 10	12 MHz Band	12987 kHz	0910
12 – 13	8 MHz Band	8667 kHz	1210
13 – 14	16 MHz Band	16967 kHz	1310
16 – 17	16 MHz Band	16967 kHz	1610
17 – 18	6 MHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on 156.8 MHz (Channel 16). This has a range of approximately 40 miles and its call sign is "Banias".

Confirmation of ETA's: It is essential that tankers, bound Banias, communicate with YKM5 at least 48 hours prior to arrival and thereafter maintain contact, stating cargo quantity and grade, maximum loading/discharging rate and pressure at ship's manifold, SWL of derrick capacity, n.r.t. and d.w.t. and actual draft.

Failure to give any notice at least 24 hours prior to arrival will increase the laytime allowed by an amount equal to the difference between 24 hours and the number of hours prior to arrival.

Note 1: YKM5 deals only with TFC. For:
S.C.O.T., Banias
QSJ Nil.

Note 2: YKM5 uses only two frequencies out of HF Schedule until further notice.
0500 – 0600 8667 kHz
0800 – 0900 6493 kHz
1700 – 1800 6493 kHz

MOORING REQUIREMENTS: For tankers loading/discharging at Banias are as follows:

Forward:

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Aft:

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

BERTHING: At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

Berthing Operations: Berthing Operations will take place:

a) Loading Crude Oil: Day and night SHinc weather permitting.
b) Discharging Crude Oil: Only between 0600 hrs. and 1600 hrs. local time SHinc weather permitting. Number of hours beyond the restricted hours will not count as lay-time for vessels on demurrage or not.
c) Loading/Discharging Products: According to "Mahroukat" and "Banias Refinery" instructions.

HOSES:

Berth No. 2: 2×20 in./16 in. hoses. } End in 12 in. reducers
Berth No. 3: 2×20 in./16 in. hoses. }
Berth No. 4: 1×16 in. hose. }

Berth Nos. 5 and 6: 2 submarine pipes of 24 in. each connected with 2 strings of 7 hoses by 16 in. each ended with 12 in. reducers.

Berth No. 7: One liquid gas line of 10 in. connected with 1 string of hoses by 8 in. ending with butterfly valve and camlock.

One balance line of 6 in. connected with 1 string of 7 hoses by 4 in. ending with butterfly valve and camlock.

One kerosene line of 20 in. conncted with 1 string of 7 hoses by 12 in. ending with 12 in. butterfly valve for 150 ASA flange.

SWL of Derricks:

Berth Nos. 2, 3, 4, 5 and 6: Minimum 7 tons.
Berth No. 7: Minimum 3.5 tons.

FRESH WATER: Available through Agents by means of barges, cost US$10.00 per ton.

FUEL: Bunkers are not available at Banias.

BALLAST: All tankers should ensure ballast is clean. Authorities are most strict and impose heavy fines for the slightest contravention. Ballast quantity should be kept to the minimum required to ensure safe manoeuvring. No facilities for disposal of ballast ashore.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the official committee in the future.

In the light of the above and to avoid any delay to vessels, owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

LOADING: Ships' Personnel are solely responsible for the loading operation, i.e. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to the shore control. It is in vessel's interest to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading. Order to start will be taken as final.

The Mooring Master must be advised when ship estimates 1,000 tons to go for completion of loading.

Ensure scuppers are effectively plugged. On no account are plugs to be removed.

A complete watch on deck must be maintained throughout the operation, especially towards the shore signal station, to ensure safe loading and avoid delays.

Discharging pressure which should be maintained during the operation at ship's manifold is to be according to the Terminal Requirements which will be handed over to the Master at each call of vessel.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

TANKERS: See "Hoses". Slops (residue) are not allowed to be discharged as no facilities for treating same are available.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

SURVEYORS: Through Agents – Shipco.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

DELAYS: Confirmation, restricted berthing hours, unsuitable weather and free berths.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in Berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, Etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Boarding: The boarding of a vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Syrian Company of Oil Transport (SCOT) on application to ship's Agents and authorised chandlers.

This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

The new flag is red, white and black, with an eagle in the centre and may be obtained through the Agent.

AUTHORITY: Syrian Company for Oil Transport (S.C.O.T.), P.O.Box 13, Banias (Tartous), Syrian Arab Republic. *Tel:* 00963-0421-22300-303. *Telex:* Scot 441012 Sy. *Cables:* Scot, Banias. *Contact:* Terminal Superintendent.

AGENT: The Shipping Agencies (Shipco) Syria, P.O.Box 28, Banias. Tel: 21583. Telex: 470020 Sy. Cables: Shipco, Banias. Radio: VHF Channel 16.

BORJ ISLAM: 35.40 N. 35.48 E. (See Plan Book)

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40′ N. Long. 35° 47′ 35″ E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promontory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGE: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the S./S.W. and W./N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks.

The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. (See Plan Book)

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
Stores List.
Passengers List.
Health Certificates and International Inoculation Certificates.
All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognised flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag.

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised the proper directions to follow and when he is to lower the pilot ladder to the lee side.

Traffic List: Broadcast twice daily on VHF Channel 16:

1. At 1200 hrs. for container and Ro/Ro vessels.
2. At 1800 hrs. for work list for the next day.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a depth of 20 m. – 25 m., and all Masters waiting there have to keep listening on VHF Channel 16, from 0600 until 0900 hrs. and from 1800 until 2100 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Derat Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free Pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kHz or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio" and "Pilotage".

TUGS: Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length* (m.)	*Depth* (ft.)	*Remarks*
Khahaleh Quay	600	31	28 ft. 6 in. at the root.
Silo Quay	185	25	27 ft. 6 in. at the root.
Passenger Quay	240*	22 – 31	
*East Division	55	—	21 ft. at the root.
*West Division	185	—	25 ft. at the root.
Eastern Quay	270	22	
Northern Quay	276	13	
Others	530	—	For Port Services.

None of these quays is a specialised one. The water is always salty. Cargo is loaded or discharged either by the ship's gear or Port Co. Cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

CRANES: 2 floating cranes, 100 ton and 32 ton.

BULK CARGO FACILITIES: *Grain Silos:* In the silo, there are 72 storage bins, the capacity of each is 45,000 tons of grain in which operations of sieving, fumigation, drying and filling can be carried out.

Grain is shipped automatically onboard vessels at a rate of 150 t.p.h. This rate can be doubled when the repairs are completed. Grain is discharged ex-vessels by sucking devices, the total capacity of which reaches 200 t.p.h. A study is being carried out to provide grain silos with automatic intake equipment and to develop the silos quay.

STEVEDORES: 24 hours' ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: Salinity is 1.033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge (capacity 170 tons).

FUEL: All types of marine fuels are available, may be delivered in any quantity from tank trucks alongside quay. 48 hours' notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open Roads.

CONSULS: Sweden, Finland, Netherlands, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyd's, German Lloyd's and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCES: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Two floating cranes are available – one of 100 tons capacity and the other of 32 tons. Both may be used at the entire discretion of the Lattakia Port Company. Also one mobile crane of 25 tons capacity.

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police Tel. No. 93; Ambulance Tel. No. 93; Fire Tel. No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore with shore passes.

IDENTIFICATION CARDS: Shore passes in addition to the seaman's book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage underway and it will cover the following new facilities:

Specialised container and Ro/Ro quays.

Draft	*Length*	
13.3 m.	260 m.	Containers
11.8 m.	190 m.	Containers
11.8 m.	200 m.	Ro/Ro
11.8 m.	350 m.	General Cargo
10.5 m.	425 m.	General Cargo
7.0 m.	450 m.	General Cargo

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

In its planning, the Company has provided for the import of equipment and machinery in a way that meets the needs of the enlarged area. Same will be supplied in accordance with fixed time schedules corresponding to the progress of execution.

There have been calls for tenders for the supply of the following equipment:

16 mobile quay cranes of 6 tons capacity (contract presently being negotiated).

2 mobile quay cranes of 16 tons capacity (contract presently being negotiated).

2 tug boats 1,500 tons (under contract).

3 passenger boats, each can accommodate 15 passengers (under contract).

Gantry cranes 40 tons capacity (under contract).
10 forklift trucks 10 tons capacity (under contract).
2 forklift trucks 30 tons – 35 tons capacity (under contract).
4 straddle carriers (under contract).

A call for tender for the supply of the following equipment is presently being prepared:

Diesel mobile crane 10 tons capacity.
A pilot boat.
VHF station and equipment.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours.

SHIPMASTER'S REPORT: December 1979.

Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Loadline and Radio Certificates.

Pilotage: Compulsory. Pilot boards in the Roads. Normal ETAs required.

Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.

Restrictions: Vessel may enter and leave at any stage of the tide; day or night.

Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft. required.

Health: Vessel anchors on arrival. Free Pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.

Radio: Lattakia Radio or Banias Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.

Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. size (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in. The least depth of water in the channel from sea to the berth is 30 ft. Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.

Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay. There are 2 floating cranes, 1 of 35 tons capacity and the other 100 tons capacity, (capacity at the present time reduced to 60 tons).

There is limited storage space for containers, however this is to be increased. There is equipment for handling 20 ft. and 40 ft. containers.

Facilities: The following are available: Fresh water (poor quality), fresh provisions (poor quality), minor repairs, airport (at Damascus 340 km.), Lloyd's Surveyor (Agency), Salvage Surveyor (Agency), ship's laundry (good but expensive), bunker fuel oil and diesel oil (by truck), doctor and hospital, groceries and meats.

Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

SHIPMASTER'S REPORT: January 1982.

Approaches to Lattakia: The entrance to Lattakia Harbour is well defined but vessels must approach the Green Buoy near breakwater with extreme caution. A wreck is located in position: Lat. 35° 32′ N., Long. 35° 43′ E., approximately on a bearing of 275° – 1.8 miles from the Green Buoy. A wide berth must be given on entry to Lattakia to this wreck (m.v. "Bravo Neck") with full load of cargo.

The harbour is generally congested and a long delay at outer anchorage must be anticipated. It is advisable for ships to register in advance if this is feasible, to avoid delay. The outer anchorage does not afford good holding ground and during near gale force winds ships are liable to drag anchor.

A traffic list is generally broadcast on VHF Channel 16 at 0600 hrs. and 1800 hrs. daily.

Logistic supplies are poor and water is a difficult commodity to obtain. Ships are advised to top up with water and fuel before arrival at Lattakia.

A prominent land mark (whitish hotel) is visible approximately 1 mile West of Rasibin Hani Light.

AUTHORITY: Lattakia General Port Company, P.O.Box 220, Lattakia, Syrian Arab Republic. *Tel:* 23900/1/2. *Telex:* 451008. Lapoco Sy. *Cables:* Latakia Port. *Contact:* Ramadan Attiehe, General Manager.

AGENT: Shipco (Sole Agent), P.O.Box 28, Lattakia. Telex: 51057. Cables: Shipco.

TARTOUS: 34.53 N. 35.45 E. (See Plan Book)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Store List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Derat Certificate – Valid certificate required and no extension can be obtained.

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N.	Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N.	Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: *Confirmation of ETA:* Before arriving at Tartous terminal, tankers must inform Tartous Control (T.T.C.) of their ETA, 72 hours and 24 hours in advance, stating: Discharging port and quantity of cargo required. Also must make contact with T.T.C. at least 2 hours before ETA at Tartous anchorage area to receive loading instructions.

Procedures for Coast Station Communication: All times in GMT.

1. After general call on 500 kHz, terminal broadcasts traffic lists on 479 kHz at 0730, 1130, 1430 and 2030 hrs., and keeps watch on 500 kHz from 0500 hrs. till 2130 hours. Answers on 479 kHz.

2. After general call, transmits its traffic lists simultaneously on 8472 and 12699 kHz at 0830, 1330 and 1930 hrs.

Keeps watch on the 8354 – 8374 kHz band from 1100 – 1130 hrs.
from 1500 – 1530 hrs.
from 1800 – 1830 hrs.

And answers simultaneously on 8472 and 12699 kHz.

3. Keeps watch on Channel 16 for 24 hours.

4. Keeps watch, calls and replies on 2182 kHz from 1100 – 1130 hrs.
from 1430 – 1500 hrs.

5.Land station charge free for motor tankers.

Tartous Terminal Station, Lat. 34° 57′ N., Long. 35° 52′ E.:
FC YKI 500 A1 600 watt. Hours 0700 – 2300 hrs.
479 A2
427 A2
8479 A1
12699 A1

BERTHING: Mooring Masters are temporarily supplied by Lattakia Port and vessels should therefore contact Agents at Lattakia giving them their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 m. – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 m. – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 m. – 4 m., 300 m. with 8 m. and 200 m. with 9 m. to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

POLLUTION: See "Banias".

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 280 m.
Maximum safe draft of tankers acceptable – 68 ft.
Maximum deadweight of tankers acceptable – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	1×28 in.	2×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. connections.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 56′ 42″ N., Long. 35° 49′ 30″ where the Mooring Master, who is Company's representative, will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side of ship and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing, this can be achieved safely and with no danger of contamination.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in all operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible Ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in case of emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is
3 or more blasts of not less than 10 seconds duration each
on whistle or siren supplemented by a continuous ringing
of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a)	Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
(b)	Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
(c)	Lat. 34° 56′ 24″ N.	Long. 35° 38′ 36″ E.
(d)	Lat. 34° 56′ 24″ N.	Long. 35° 38′ 00″ E.
(e)	Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.
(f)	Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. 1 shiploader, rate 1,000 t.p.h.

A dry dock will be soon under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Paper Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provision List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54′ 24″ N. and 34° 56′ 24″ N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The pilot station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Bèrths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the pilot station on Channel 16, possibly in the evening before berthing, or in the morning about half an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing South-westerly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administration. *Telex:* 20562.

Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 52, Tartous, Syrian Arab Republic. *Telex:* 41052. *Cables:* Petsyria. *Contact:* S. Mualla, Terminal Superintendent.

AGENT: Shipco *(Sole Agent):* P.O.Box 3, Tartous, Syrian Arab Republic. Tel: 21541 and 20940. Telex: 41063. *Cables:* Shipco.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: The People's Republic of China, Albania, Rumania, North Korea, Cuba, Vietnam, Kampuchea and the Soviet Union. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:

(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.

(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan Book)

PORT LIMITS:

(A) Lat. 23° 56′ 28″ N., Long. 121° 36′ 13″ E.
(B) Lat. 23° 56′ 29″ N., Long. 121° 36′ 48″ E.
(C) Lat. 24° 00′ 20″ N., Long. 121° 38′ 45″ E.
(D) Lat. 24° 00′ 47″ N., Long. 121° 38′ 18.1″ E.

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 Copies Crew List.
1 Copy Crew List visaed by office of China Mission (applicable to American vessels).
8 Copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
2 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:	(A) Lat. 23° 57′ 25.5″ N.,	Long. 121° 36′ 15.5″ E.
	(B) Lat. 23° 57′ 18″ N.	Long. 121° 36′ 33.5″ E.
	(C) Lat. 23° 57′ 53.3″ N.	Long. 121° 36′ 52.5″ E.
	(D) Lat. 23° 58′ 01″ N.	Long. 121° 36′ 34.1″ E.

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 10.5 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 2 tugs, 1×1,600 h.p. and 1×1,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (17 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000 and 30,000 ton vessels, at the same time.

Berths No.	*Length (m.)*	*Max. Draft (m.)*	*Remarks*
1	123	8.2	General Cargo
2	153	8.5	General Cargo
3	134	8	General Cargo
4	160	10	Sugar
5	160	10	Gravel
6	150	9.4	General Cargo
7	220	7	Gravel
8	103	10	Gravel
10	183	10	Cement Clinker
11	185	10	Minerals
12	150	8.4	Construction Ship use
13	185	10	Logs and Woodchips
14	185	10	Logs and Woodchips
15	100	10	Logs and Woodchips
16	122	8	Not in use at present
17	200	10	Open yard
18	200	10	Open yard

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

At Berth Nos. 5, 7, 8, there is a conveyor system for loading gravel, at Berth No. 10 a cement silo (8,000 tons) owned by Asia Cement Co., and at Berth No. 11 a conveyor for loading dolomite.

There are 4 hoppers at Berth Nos. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

CRANES: There is one fixed shore crane at Berth No. 3, capable loading up to 45 tons.

In the port area there are mobile cranes; 1×150 tons, 2×12 tons (Rated at 20 tons) and 1 × 20 tons (Rated at 40 tons). In addition there are 26 forklift trucks (Rated from 2 tons – 10 tons).

There is a 70 ton floating crane.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Working hours: 0800 – 2200.

General cargo: 200-250 tons per day if sufficient landside back-up is available.

Bulk: Cement loader at Berth No. 10 can load 5,000 tons in 24 hours.

Dolomite elevator: 1,500/2,000 per hour.

Gravel elevators: 5,500 t.p.h.
6,800 t.p.h.
8,600 t.p.h.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent.

FUEL: 4 grades obtainable from Chinese Petroleum Corporation:

1. Light marine diesel – SUS at 100°F, max. 38.
2. Heavy marine diesel – SUS at 100°F, 35 – 45.
3. MF – 80 (MD – 600) C.S. at 122°F, max. 80 (RD No. 1 100°F, max. 600)
4. Fuel oil – SFS at 122°F, max. 200.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CARGO GEAR: Loading/unloading normally effected by ship's gear.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's book required.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

DEVELOPMENTS: The outer harbour extension began 1978 and will be completed in 1988. The project will increase the berthing capacity to 25 ship berths.

AUTHORITY: Hualien Harbour Bureau, Hualien, Taiwan, Republic of China. *Contact:* Lee Chao-Min, Chief of Harbour Management Department.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cable: "Jarocean Taipei".

KAOHSIUNG: 22.37 N. 120.16 E. (See Late Plans)

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern Anchorage: Within 2 miles radius off Kaohsiung Lighthouse (Lat. 22° 37′ 01″ N., Long. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.

2. Southern Anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (Lat. 22° 33′ 21″ N., Long. 120° 18′ 28″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.

3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. SBM No. 2 position Lat. 22° 29′ 45″ N., Long. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the respective SBM as directed by Agents.

DOCUMENTS:

10 Crew Lists.
1 Customs Stores List (plain form acceptable).
1 Narcotic List.
1 Foreign Currency List.
1 Crew's Declaration List.
1 Arms and Ammunition List.
1 Parcel, Passenger and Mail List (all 'nil' items may be put in one statement).
1 Set of Bills of Lading and Manifests if any.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Container ships over 15,000 g.r.t. and other freighters or tankers over 200 m. LOA must take 2 Pilots at double pilotage.

APPROACHES: The Northern entrance is dredged to 11 m. MLWS. The Southern entrance, dredged to 16 m. can accommodate vessels up to 100,000 d.w.t.

ANCHORAGES: To avoid being charged double pilotage fees, arriving vessels should anchor within a 2 miles radius of Chihoushan Lighthouse (Lat. 22° 38′ N., Long. 120° 15.4′ E.) unless instructed to wait off the Southern Entrance, in which case they should anchor within a 2.5 mile radius of the Southern Entrance Signal Station (Lat. 22° 33.4′ N., Long. 120° 18.4′ E.). The holding ground at both anchorages is good, and they are sheltered from the worst of the N.E. monsoon winds in Winter. Vessels may have to vacate the anchorages and proceed to sea should a typhoon approach.

Tankers arriving at the SBM terminals should anchor 1.5 miles West of the respective buoy to await arrival clearance, quarantine, Immigration, Agent and Cargo Supervisor who will board by Agent's launch. CPC Pilot, Loading Master and Watchmen will board by CPC tug. After discharge, the vessel should proceed to the Northern Anchorage to await clearance for sailing.

Also see "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. must await high water to enter via Northern entrance.

MAX. SIZE: Length and breadth no restriction (largest container ship entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 34 ft. during high tide. Tankers with draft over 34 ft. discharge at Monobuoy outside.

HEALTH: Free Pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. Radio Pratique available (see "Keelung"). No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents when cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 1 hour before arrival to report ETA at Kaohsiung Roads.

TUGS: Harbour tugs usually join vessel after entry and while berthing. Ship's lines always used. 32 tugs, 800 h.p. – 3,200 h.p.

BERTHING: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. must berth during high tide.

Berth No.	*Length (m.)*	*Depth (m.)*	*Remarks*
4 – 9	150	10	Coastal-Japan/Korea general cargo
17, 18	150	10	CPC bunkering berths
24	150	10	Taiwan Aluminium Corp. (discharge bauxite)
29	150	10	Formosa Plastic Corporation
31, 32	200	10	Australian/New Zealand Trade
33	200	10	Grain silo (40,000 tonnes), 2 unloaders, 4 suckers
34	200	10	General cargo
35 – 37	200	10	Middle East/Arabian Gulf trade
38, 39	200	10	U.S.A. Trade
40	200	10	Ro-Ro/LASH vessels
41 – 43	200	10	Container Terminal No. 1
44	200	10	Grain silo (40,000 tonnes) 2 unloaders, 4 suckers
45	200	10	Bulk cargoes
46 – 47	200	10	Taiwan sugar loading berths
49 – 57	200	10	Bulk cargoes – coal, steel, scrap, ore, logs etc.
61 – 62	200	10	Petrochemicals
63 – 66	250	12	Container Terminal No. 2
68 – 70	320	14	Container Terminal No. 3
71 – 72	320	14	Grain silo (80,000 tonnes) 3 unloaders, 6 suckers

Wharves: There are at present 85 wharves with a total length of 18,055 m. and 25 mooring buoys capable of accommodating 127 ships.

Container Terminals: Total length 848 m. No. 1 – consists of 4 berths, Nos. 40 – 43. Berth Nos. 42 – 43 served by 1 MHI 35 ton gantry crane. 4 straddle-carriers available for 20 ft./40 ft. containers.

No. 2 – Includes 5 berths total length 1,205 m., Nos. 63 – 67. Berth Nos. 64 – 66 are leased to lines for exclusive use. Berth 63 is the only common user berth. Container handling equipment includes 6 SIS gantry cranes and 20 straddle-carriers for handling 20 ft./40 ft. containers.

No. 3 – Includes 3 berths, Nos. 68 – 70, with total length of 960 m. and a depth of 14 m. The terminal has 6 container cranes and a 60 hectares container yard.

No. 4 – Container Terminal No. 4 is located at Chung-Hsinung Commercial Harbour Area. The project is to build 8 deepwater container wharves from No. 116 to No. 123 with a total quay length of 2,210 m. The 99 hectare container yard is capable of storing 35,000 containers (TEU). Berth No. 116, 320 m. in length and 14 m. depth, commenced construction in 1983 and is expected to be completed in 1984.

BULK HANDLING FACILITIES: *Coal:* China Steel Berth: Max. Size 130,000 d.w.t. Max. LOA 320 m. Max. Draft 14 m. 2 cranes, 2 grabs and conveyors. Daily rate 10,000 tonnes.

Berth Nos. 52 – 57: Max. LOA 200m. Max. Draft 10.5 m. Discharge by grabs and ship's gear. Rate 3,500 tonnes per day.

Grain: There are 3 silos, 2×40,000 tons capacity and 1×80,000 tons capacity, unloading rate 400 – 600 t.p.h. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40 – 50 tons per gang/hour.

CRANES: 43 cranes, 14 stationary derricks, 6 tractors, 100 towing tractors, 223 forklifts, 13 container gantries, 2 P&H container gantries, 25 straddle carriers, 14 container tractors, 2 railtainers, 2 transferers, 105 grab buckets, 60 hoppers and 1,840 small trailers. The CSBC shipyard has 2×350 ton cranes.

4 floating cranes (30 ton, 60 ton, 100 ton and 200 ton), other floating equipment includes 10 dredgers, 5 mud barges, 21 barges and 70 small craft of various descriptions.

STEVEDORES: All Government stevedores ordered by Agents as required.

Cargo Working Hours:

General Cargo:
0830 – 1130
1330 – 1730
1900 – 2300 (plus 100%)
2400 – 0600 (plus 150%)
0600 – 0800 (plus 100%)

Night shifts only by special arrangement with Harbour Bureau and cargo receivers.

Containers:
0800 – 1200
1230 – 1800
1830 – 2400 (plus 100%)
0100 – 0700 (plus 150%)

N.B.: For quick despatch, relief gangs can be hired to work through meal breaks.

Port Performance:

Containers: 25 crane moves per hour.
General: 25 CBM/gang/hour or 350 tons/gang/day.
Bulk (except at special berths): 50 tons/gang/hour.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are two Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 72 ft. and can accommodate tankers up to 150,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – Lat. 22° 29′ 45″ N. Long. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCCs programmed to use the SBM Terminal are required to anchor 1.5 miles West of the respective SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this area from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

Petrochemical Storage Centre – Berth No. 61: Max. LOA 232 m. (225 m. preferred) Max. Draft 10.0 m.

LPG: At Talinpu at Southern entrance to Kaohsiung Harbour.

LOA – Minimum 130 m. Chicksan flange 23.0 m. above LWL. Liquid line 16 in. Vapour line 8 in. Max. Depth 14.0 m. Discharge rate up to 2,000 kl.p.h. Tank capacity: (C3) 30,000 kl, (C4) 30,000 kl.

Berth	*Shore Lines*	*Hoses*	*Grades Handled*	*Max. P.S.I.*	*Rate t.p.h.*
17 – 18	4 in. – 16 in.	4 in. – 8 in.	Crude, FO, DO, Avgas, JP4, JP5	100	700
60 – 62	4 in. – 8 in.	4 in. – 8 in.	Products, chemicals, LPG		680
Talin E, W	10 in. – 24 in.	10 in. – 24 in.	Crude, FO, DO	100	6,000
SBM No. 1	1×34 in.	2×12 in.	Crude	100	5,000
SBM No. 2	1×42 in.	2×12 in.	Crude	100	7,000

N.B.: At SBM derricks/cranes of 10 tons SWL required. There are no tank cleaning or ballast disposal facilities.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against cholera inoculation (6 months) required.
See "Health" – Shipmaster's Report.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge paying additional lighterage.

FUEL: All grades, mostly received from 3 barges (capacity 500 tonnes each). Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's Registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCES: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: No additional requirements, but Cargo Gear Certificate must be valid.

IDENTIFICATION CARDS: Not required.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding Corp. provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

REPATRIATION: Crew changes can be arranged.

AIRPORT: Kaohsiung Airport has frequent scheduled flights to major cities in Taiwan as well as regular international flights to Hong Kong and Japan. For other international destinations, travellers must use C.K.S. International Airport which can be reached by motorway (3.5 – 4 hours) or via Taipei by domestic flight (40 minutes) and motorway (40 minutes).

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: New Year's Day (Jan. 1st – 2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 562311 Ext. 441; Fire: 562311 ext. 441 or 226119.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHORE LEAVE: Normally can be arranged.

SHIP SUPPLY SERVICE: Off-limits deliveries can be arranged, although they are the exception rather than the norm.

REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. Vessels flying flag of nations without diplomatic relations with the Republic of China must send 1 copy each of ship's photo (8 in.×10 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit.

DELAYS: With rapid extension of the harbour and more new wharves and container terminals built, delay has been considerably reduced and very rarely occurs.

DEVELOPMENTS: A bulk transhipment terminal is to be built. Facilities will include 2 berths for 60,000 d.w.t. vessels, grain silo of 110,000 tons capacity, loading unloading equipment and packing facilities.

Offshore coal terminal is expected to be built. When completed the floating dock will be able to handle vessels of 300,000 d.w.t.

Also see "Berthing – Container Terminal No. 4".

SHIPMASTER'S REPORT: June 1983.

Pilotage: Normal pilotage fees are charged from 0800 hrs. to 1800 hrs., a 50% surcharge is levied from 1800 hrs. to 2400 hrs., and 100% surcharge from 2400 hrs. to 0800 hrs. If the Pilot/s is/are embarked 2 miles or more from the breakwater at the Northern entrance the above charges are doubled.

Pilot chits should have the embarkation position marked on them and a line drawn through the space on the left side of the chit where the Pilot may otherwise write O/L (Outside Limits).

Immigration: Immigration Officials board with the Pilot/s off the Northern entrance, and will join at any time between 0800 hrs. and 1800 hrs. Between 1800 hrs. and 2400 hrs. they only leave their office on the hour, and between 2400 hrs. and 0800 hrs. they only leave on the even hour. Time from leaving office to boarding is approximately 30 minutes.

AUTHORITY: Kaohsiung Harbour Bureau. *Contact:* Admiral C. Y. Yuan, Harbour Director. Y. S. Ma, Deputy Harbour Director. S. T. Chou, Chief Engineer.

AGENT: Jardine, Matheson & Co., Ltd., 4-5th Fl., 168 Chung Cheng 4th Road, Kaohsiung. Tel: (07) 231-7141., 281-2804. Telex: 81957 Jardines. Cable: "Jarocean Kaohsiung".

KEELUNG: 25.09 N. 121.44 E. (See Plan Book)

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Port Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack of adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.

LOCATION: Exact position of Port – Lat. 25° 09′ 26.5″ N., Long. 121° 44′ 22.5″ E.

DOCUMENTS:

Ship's Registry.
International Load Line Certificate.
International Safety Certificates.
Cargo Ships: Safety Equipment, Safety Construction, Safety Radio Telegraphy
Passenger Ships: Passenger Safety
Last Port Clearance.
Crew List.
Fumigation Certificate.
Import Manifests.
Through Cargo List.
Stores List.
Arms and Ammunition List.
Narcotics List.
Foreign Currency List.
Parcel List.
Passenger List.
Yellow-book for every person on board (Vaccination Certificate).

PILOTAGE: Compulsory from anchorage to dock and any other movements in port. Pilot may also meet ships within 1 or 2 nautical miles North of breakwaters, commencing sunrise till sunset upon ship's/Agent's request. While waiting outside breakwaters for a Pilot, vessels shall keep adequate space and take care of both ship's and Pilot's safety. Before arrival, vessels shall contact Keelung Port Radio Station (Lat. 25° 09′ 42.5″ N. Long. 121° 44′ 57.5″ E.) via VHF on Channel 16 to ascertain Pilot's exact boarding time.

ANCHORAGES: Area in outer harbour is 13.0 m. to 13.5 m. in depth and can only contain 4 ocean-going vessels at a time. Vessels may also anchor outside breakwaters for Pilots or entry instructions.

HARBOUR APPROACHES: At a location of 1.5 nautical miles N.N.W. from Keelung Isle ships should take Wan Jen Tsui Pi lighthouse and Chiu Tzu Shan lighthouse as coordinates and sail in on course of true bearing 201°. When 2 nautical miles North from harbour entrance, ship's course should be adjusted for entry. Ships should allow adjustment for their planned course and speed and should pay special attention to Hsin Lai Reef, East Breakwater, wind and current.

RESTRICTIONS: Keelung Port Radio Station consists of Naval Harbour Control Signal Station and Harbour Bureau Signal Station. The former controls the entry and exit of all the vessels with the latter's assistance. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Port Radio Station and shall not leave dock nor weigh anchor nor sail and remain close to harbour entrance before obtaining from Naval Harbour Control Signal Station the signal permit to enter or leave.

Pilots berth vessels 0700 hrs. – 2300 hrs. Unberthing at any time.

MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.

HEALTH: Radio Pratique possible. Pratique will be granted when vessel is in anchorage. Three measures will have to be conducted by ship, these are: disinfection of ship, sampling of food and water, tetracycline drug for person, if the vessel arrives from an affected area within 5 days.

1. To obtain Free Pratique by radio, the Master is required to cable the following information to Agent within 6 to 36 hours prior to the vessel's arrival at the port.
   (1) Ship's name.
   (2) First port of the voyage and date/time of sailing.
   (3) Name(s) of port(s) and respective departure time, where the vessel called within the last 10 days prior to arrival at Republic of China ports.
   (4) ETA.
   (5) Kind of Derat Certificate, place and date of issue.
   (6) Number of crew and passengers on board.
   (7) If any illness or death occurred within 10 days prior to the vessel's arrival, and if so, give a detailed report.
   (8) If any rat or abnormal death of rats is found on board within 10 days before the vessel's arrival.
   (9) If there is any shipment of foodstuff on board from an infected area.
   (10) Any other information (if any doctor on board, etc.)
   (Example:)
   mv "......................................" (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger Nil/7 to 10 None
2. Vessels under the following conditions are not allowed to apply for the Radio Pratique:
   (1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Republic of China port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for plague and yellow fever.
   (2) Infectious disease and/or suspected infectious disease and death occurred within 10 days prior to the vessel's arrival in the Republic of China.
   (3) When any inactive rat is found or abnormal death of rats is found on board within 10 days prior to the vessel's arrival in the Republic of China.
   (4) When the vessel possesses no valid Derat/Exemption Certificate.

3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the radio Free Pratique is granted.

   If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the Radio Pratique for one to three voyages.
4. Fumigation by hydrocyanic acid gas (discoids) and methyl bromide is carried out by quarantine station. Derat Certificate or Derat Exemption Certificate issued also by quarantine station.

TUGS: The Harbour Bureau operates 9 tugs viz., 2 × 2,800 h.p. 1 × 2,400 h.p., 4 × 1,600 h.p. China Petroluem Corporation (CPC) operate 2 × 2,200 h.p. at their Shen Ao Terminal.

BERTHING: Docking during daytime, and also during night-time if weather permits.

Berths (all 200 m. length)	*Depth* (m.)	*Remarks*
Eastern Berths		
E2	9.00	Passenger Terminal, Quick Dispatch Berth (QDB) for cargo vessels.
E3	9.00	Quick Dispatch Berth.
E4	9.00	General Cargo/Bulk.
E5	9.00	Private use.
E6	9.00	Quick Dispatch Berth.
E7	9.00	General Cargo/Bulk.
E8	9.00	General Cargo/Bulk.
E9	9.00	General Cargo/Bulk.
E10	12.00	Container Terminal. 2×35 ton Gantry Cranes.
E11–E22	Various	Shallow water berths.
Western Berths		
W2	9.00	
W3	9.00	
W4	9.00	Quick Dispatch Berth.
W5–W6	9.00	Private.
W7–W8	9.00	Keelung-Hong Kong Line.
W12B	9.00	Bulk Wharves.
W13	9.00	
W14	9.00	2 cranes.
W15	9.00	2 cranes.
W16	9.00	1 crane.
W17	10.00	2 cranes.
W18	10.00	2 cranes.
W19	11.50	Berths, 19-20 Container Terminal.
W20	12.00	19 also used for general cargo, no cranes.
W21	12.00	Berth 20 is leased by Yang Ming, 2×35 ton container carriers.
W22–W23	11.50	Container Terminal No. 1.
W24	12.00	2×35 ton container cranes at No. W22–W23.
W25–W26	12.00	3×35 ton container cranes at No. W25–W26.
W27	7.50	Coastal Shipping.
W29	7.25	Coastal Shipping.
W30	11.50	Grain Silo 50,500 ton Capacity (Rate: 600 t.p.h. 3 Suckers)
W31	11.50	Wharves for bulk cargo but with strengthening to allow discharge of heavy lifts.
W32	11.50 m.	
W33	10.85	Oil Tanker berth.
W33B	8.20	Oil Tanker berth.

In total there are 37 deep water berths and 21 shallow water berths.

Four mooring buoys can accommodate 6 vessels of up to 10,000 tons and length overall 215 m.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 2, 3, 14, 15, 16, 17 and 18 equipped with 3 ton cranes. Wharf No. 4 equipped with a stationary 30 ton shore crane. Other wharves can be served by 10 tons – 100 tons mobile cranes, and No. 19 to No. 26 wharves can be served by 250 tons mobile crane.

Wharves No. 19 to No. 26 and East No. 10, for container ships, Ro/Ro ships, and "LASH" vessels, equipment includes 10 gantry cranes, capacity 35 tons; 12 straddle carriers for 20 ft. – 40 ft. containers; 2 port stackers, capacity 35 tons; 2 transtainers, capacity 35 tons; 5 forklifts (2×35 ton, 2×15 tons and 1×10 tons capacity) and 9 yard trucks.

Wharves No. 30, 3 pneumatic unloaders for grain in bulk, max. capacity 600 t.p.h. average capacity 480 t.p.h. Silo capacity 50,500 tons.

Wharf No. 31-32: Max. LOA 120 m. Max. draft 10.5 m. Coal discharged into trucks by ship's gear and shore grabs. Average discharge rate 3,000 tonnes per day. Working Hours: 0800 – 1800 hrs., 1900 – 0300 hrs. and 0300 – 0500 hrs..

CRANES: 22 mobile cranes, capacity 10 tons – 250 tons, 17 wharf cranes, capacity 3 – 30 tons. 10 container cranes, capacity 35 tons, 4 floating cranes, capacity 110 tons, 60 tons, 30 tons and 30 tons.

Other equipment: 194 forklifts, capacity 1 ton – 25 tons; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 15 excavators.

STEVEDORES: According to the stowage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift.

Cargo Working Hours:

General Cargo and Bulk Wharves:	Container Terminal:
0800 – 1200 hrs.	0800 – 1220 hrs.
1300 – 1800 hrs.	1300 – 1820 hrs.
1900 – 2300 hrs.	1900 – 2320 hrs. – 100% Extra Charge.
0001 – 0300 hrs.	0001 – 0620 hrs. – 150% Extra Charge.

Port Performance:

General cargo up to 30 tons/gang/hr.

Average rate per day 480 tons/day.

Coal up to 60 tons/gang/hr. Rate per day 1,500-2,500 tons/day depending on availability of trucks.

China Steel's berth – 10,000-15,000 tons/day.

Containers – 25 per crane/hr. excluding waiting time.

RADIO:

1. Call Name: Keelung Port Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   - (1) Channel 14 (156.7 MHz.) is used for longer communications after making contact on Channel 16.
   - (2) Channel 12 (156.6 MHz.) is a spare Channel, used for emergency.
3. Communication Contents:
   - (1) Messages for vessels to enter or leave.
   - (2) Matters concerning navigation and anchorage.
   - (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   - (1) Emergency salvage at sea.
   - (2) Messages for vessels departing.
   - (3) Messages for vessels waiting outside breakwaters for entry instructions.
   - (4) Messages for vessels at anchor in outer harbour.
6. Languages to be used:
   - (1) Mandarin.
   - (2) English.
7. Remarks: Communications always in plain language. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Port Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   - (1) Nationality.
   - (2) Vessel's Name.
   - (3) Call Letters.
   - (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Port Radio Station (25° 09′ 42.5″ N., 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Port Radio Station) in the waters outside the harbour. The report includes:
    - (1) Nationality.
    - (2) Vessel's Name.
    - (3) Call Letters.
    - (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

Keelung Radio (XSW) 500 kHz and 460 kHz. Also on 8 MHz.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors. Modern hospitals available in Taipei, a city 30 km. away.

TANKERS: Bulk oil is discharged at berth No. 33 and No. 33B which are fitted with 8 in. and 4 in. pipe-lines. Length: 210 m. and 100 m., maximum draft: 10.85 m. at No. 33 and 8.2 m. at No. 33B.

Tankers may also discharge oil at Shen Ao monobuoy in a bay 7 miles East of Keelung. Water depth is 12 m. Monobuoys are also situated at Sha Lun, (W. Taiwan), connected to Taoyuan refinery, at positions:

No. 1	25° 09′ 00″ N.,	121° 11′ 27″ E.
No. 2	25° 08′ 32.4″ N.	121° 10′ 06.3″ E.

Discharge is possible at Shen Ao and Sha Lun only under good weather conditions.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. 4 water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   - (1) Water supplied alongside priced at NT$39.00 (current exchange rate NT$38.00 to US$1.00) per ton.
   - (2) Water supplied by barges at NT$74.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities. 5 bunker barges available.

FIRE PRECAUTIONS: Special wharves for tankers, wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.

IDENTIFICATION CARDS: Passport or other identification papers are needed.

CUSTOMS ALLOWANCES: (1) Each crew member allowed 200 cigarettes in bulk or half a pound of tobacco. (2) Each crew member allowed 1 opened bottle of wine and 12 cans of beer.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under Administration Regulations on Harbour Business for Taiwan Provincial Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp. Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

There are over 400 m. of repair wharves, cranes up to 60 tons, plate and machine shops and foundry and a full staff of skilled tradesmen.

Repairs to radio, navigational and electronic equipment can be effected.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dry docks, 2 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.

SURVEYORS: Surveys of all types can be arranged. Major classification societies are represented.

REPATRIATION: Crew repatriation usually carried out through International Airport in Taoyung, and Immigration prefer either individual or group visa for landing crew from ship.

AIRPORT: Taiwan's international airport C.K.S. is 65 km. from Keelung via the motorway. Travelling time approx. 1 hour. Flights are available direct to U.S.A., South Africa and most Asian destinations, and for Europe/Australia via Hong Kong. Taipei domestic airport (30-40 minutes travelling time) has frequent scheduled flights to most major cities in Taiwan.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Chinese Lunar New Year's Eve and Day (3 days in Jan. and Feb.); Youth Day (29th Mar.); Ancestor Memorial Day (1 day in April); Labour Day (not a national holiday but only for labourers) (1st May); Dragon Boat Day (1 day in June); Mid-Autumn Day (1 day in September); Confucius' Birthday or Teachers' Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25th Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthday (12th Nov.); Constitution Day (25th Dec.).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore except for crew members from Communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 210 days in a year, port is sometimes congested after continuous rain.

GENERAL: Shore pass issued by Immigration for each crew member on ship's arrival and will be collected on ship's departure. Anyone who loses a shore pass is subject to fine.

DEVELOPMENTS: 100,000 tonne grain silo to be built.

AUTHORITY: Keelung Harbour Bureau, No. 1 Chung Cheng Road, Keelung, Taiwan, Republic of China. *Tel:* (032) 231111. *Cables:* Kehbroc Keelung. *Contact:* Y. C. Chu, Harbour Master, S. C. Teng, Director.

AGENT: Jardine, Matheson & Co. Ltd, 10 Chung Yit Road, Keelung. Tel: (032) 230161, 230220. Telex: 32187 Jardines. Cable: "Jarocean Keeling".

SUAO: 24.36 N. 121.52 E. (See Late Plans)

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.

DOCUMENTS: Ship's Register, Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, Manifest of Inward Cargo, Manifest of Through Cargo, Mail and Parcels List. Also see "General".

Distribution:

Quarantine Station: One copy each of Health Declaration, Crew List, Ports of Call, Manifest of Inward Cargo, Manifest of Through Cargo.

Customs Office: One copy each of Arms and Ammunition List, Narcotics List, Foreign Currency List, Parcels List (including Landing Parcels and Through Parcels), Stores List, Crew List, Specimen Signatures of Master and Chief Officer, Taiwan Customs Tonnage Dues (can be purchased from the Customs Office), and 3 copies each of Manifest of Inward Cargo and Manifest of Through Cargo.

Immigration Office: One copy each of Crew List, Arms and Ammunition List, Manifest of Inward Cargo, Ports of Call List.

Port Authority: One copy each of Crew List, Manifest of Inward Cargo, Manifest of Through Cargo.

Local Shipping Agent: One copy each of Ship's Particulars, Crew List, Manifest of Inward Cargo, Manifest of Through Cargo, Ports of Call.

PILOTAGE: Compulsory. Pilot boards at outside anchorage position (Lat. 24° 35′ 20″ N., Long. 121° 52′ 30″ E.). Hoist "G" flag.

ANCHORAGES: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater (under construction) when waiting for Pilot or entry instructions.

APPROACHES: If approaching from the North or East, Kui Shan (Turtle Shaped) Island, 15 miles N.N.E. of the harbour entrance, provides a good landmark, with its 408 m. elevation.

San-Shien-Tai Island (30 m.), 1 mile E.N.E. of the entrance, is a good leading mark, and vessels should make their approach from the S.E., clearing the island by half a mile, before turning to enter. A 4.7 m. shoal exists about 450 m. S.W. of the island and another lies to the N.W. A red light sector marks danger areas near the entrance. The channel depth at the entrance is 22 m. The inner channels have depths of 15 m. to the North and 10 m. to the South.

RESTRICTIONS: Permission to enter must be granted by naval signal station located on North shore, ship's Agent should give ship's ETA to Port Authority of Suao 24 hours before arrival. Port closes from 2301 hrs. to 0200 hrs. daily.

MAX. SIZE: Max. draft 14 m. and LOA less than 240 m.

HEALTH: Radio Pratique possible (see "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within 5 days.

RADIO: Radio Suao, send cables to Harbour Master Suao, or Agent. Report ETA, draft, etc.

VHF: Channel 14 – 156.7 MHz for calling. Call sign "Suao Harbour Radio".

TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 4 tugs, 1×2,400 h.p., 1×1,600 h.p., 1×1,000 h.p., and 1×600 h.p.

BERTHING: Docking during daytime, departure also during daytime, but sometimes at night time if permission granted from Authorities. Pilot compulsory. Vessel usually anchors in outer harbour for Pratique and inspection.

Deep water wharf 2,705 m. (13 berths) capable of accommodating vessels up to 298,000 d.w.t.

Wharf No.	*Length* (m.)	*Depth* (m.)	*Designed Depth* (m.)	*Uses*
1W	210	7.0	7.5	Service Craft
2W	170	10.5	11.0	Breakbulk
3W	215	10.5	11.0	Breakbulk
4W	300	10.5	11.0	Breakbulk
5W	200	10.5	11.0	Breakbulk
6W	290	14.0	15.0	Containers
7W	240	12.5	13.0	Containers
8W	125	7.0	7.5	Timber
9W	125	7.0	7.5	Timber
10W	175	8.5	9.0	General Cargo
11W	175	8.5	9.0	General Cargo
12W	200	8.5	9.0	Breakbulk
13W	180	8.5	9.0	Breakbulk

CARGO HANDLING FACILITIES: The port has no special facilities, 1 gantry crane for bulk handling container cargoes, and a 35 ton floating crane with 360° radius. For the present time ship's derrick only for logs, timber, cement and general cargo.

Grabs: 12×3.5 cu.m. (3.5 tonnes each).
16×2.2 cu.m. (1.8 tonnes each).

Fork Lifts: 8×3 tonnes.
2×2 tonnes.
1×7.5 tonnes.

Mobile Cranes: 2×40 tons
1×20 tons
4×16 tons

Shovels: 1×3 ton (Bulldozer)

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700, 1800 – 2300 and 0000 – 0600.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

DENSITY: 1025.

FRESH WATER: Available by barge or alongside, subject 24 hours' advance notice.

FUEL: Supplied by tanker trucks.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: International certificates, Register, Safety Equipment, Safety Construction, Safety Radio, Load Line, Cargo Gear, etc.

CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes for own use and 1 bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.

IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei. Application to be made to Keelung Harbour Bureau.

AIRPORT: International airport in Taoyuan, 3.5 hours by car from port.

TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).

HOLIDAYS: New Year's Day (January 1st), Youth's Day (March 29th), Late President Chiang Kai-Shek's Death – Memorial Day (April 5th), Labour Day (May 1st), Dragon-Boat Day (May 5th of Lunar Calendar), Mid-Autumn Festival (August 15th of Lunar Calendar), Birthday of Confucius (September 28th), Double Tenth Day (October 10th), Recovery Day of Taiwan (October 25th), Late President Chiang Kai-Shek's Birthday (October 31st), Birthday of Dr. Sun Yet-Shen (November 12th), Constitution Day (December 25th), Eve of Chinese New Year's Day (December 29th or 30th of Lunar Calendar), Chinese New Year's Day (first day of Lunar Calendar).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.
TELEPHONE: Local telephones available to be placed on board.
SHORE LEAVE: Crew allowed ashore, except for crew members from Communist countries.
REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.
DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.
GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by Immigration Office for each crew member on ship's arrival and will be collected on ship's departure.
AUTHORITY: Suao Harbour Bureau, Suao, Ilan, Republic of China. *Tel:* 039-962853. *Contact:* M. C. Chiang, Port Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cables: "Jarocean Taipei".

TAICHUNG: 24.18 N. 120.29 E. (See Plan Book)

PORT LIMITS: In radius of 1.5 miles from centre of the entrance between North and South breakwater.
LOCATION: Exact position of Port – Lat. 24° 17′ 40.3″ N., Long. 120° 29′ 27.3″ E.
DOCUMENTS: *Required by Quarantine Station:*
1 copy Health Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
1 copy Manifest of Inward Cargo.
1 copy Manifest of Through Cargo.
1 copy Derat Certificate.
Required by Customs Office:
1 copy Arms and Ammunition List.
1 copy Narcotics List.
2 copies Foreign Currency List.
3 copies Parcels List (1 for landing parcel, 2 for through parcels).
1 copy Stores List.
2 copies Crew List.
2 copies Mail List.
2 copies Passenger List.
4 copies Manifest of Inward Cargo.
4 copies Manifest of Through Cargo.
1 copy Personal Effects List.
1 copy Specimen Signatures of Master and Chief Officer.
1 copy Log List (for log ships only).
1 copy Taiwan Tonnage Dues (can be purchased from the Customs Office).
1 copy Ship's Register.
Required by Immigration Office:
2 copies Crew List.
2 copies Passenger List.
2 copies Arms and Ammunition List.
2 copies Narcotics List.
2 copies Manifest of Inward Cargo.
4 Photographs of each Chinese Crew Member (only for first arrival).
Required by Port Authority:
1 copy Crew List.
1 copy Passenger List.
3 copies Manifest of Inward Cargo.
2 copies Manifest of Through Cargo.

Besides above documents, ship's Master should present Certificates of Ship's Registry, Safety Equipment, Safety Construction, Safety Radio and Load Line to the Port Authority for inspection.

Required by Local Shipping Agent: One each of Ship's Particulars, Crew List. Last Port's Name and Leaving (Last Port) time should be forwarded by airmail to the local Agent.
PILOTAGE: Compulsory. At anchorage hoist "G" flag, contact Taichung Port Radio on VHF Channel 16. Pilots board 0.5 – 1 mile off the end of the breakwaters. In the winter, however, the pilot launch is sometimes unable to leave the shelter of the breakwaters, and the Pilot must embark inside the breakwaters. Alternatively, if sufficient notice is given, vessels may pick up a Taichung Pilot off either Keelung or Kaohsiung. When it is known that bad weather exists off Taichung, this latter course of action is recommended to avoid possible berthing delays and danger to the ship.
APPROACHES: Daytime entry only.

The entrance channel has a minimum depth of 11 m. (MLWS), is 16 km. long and 300 m. wide in a direction of 115° (T). Sometimes strong cross currents exist outside the breakwaters. In strong winds, the pilot vessel may be unable to leave the shelter of the breakwaters and vessels must pick up the Pilot inside the harbour entrance (see "Pilotage"). There have been groundings outside the harbour but these all appear to have been the result of bad navigation or the neglect of basic precautions.
ANCHORAGE: Water area in port limits, except entrance channel can be used for anchoring, depth from 10 m. to 18 m. Ship may anchor and remain outside breakwater when waiting for Pilot.
RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival.
MAX. SIZE: Max. draft 13 m., LOA no limit.
HEALTH: Radio Pratique acceptable, also quarantine will clear vesse at anchorage. Special quarantine will be conducted if vessel arrives from a cholera affected area within 5 days.

Also see "Keelung".
RADIO: Via Radio Taichung (X5W2) or Radio Keelung and Radio Kaohsiung. Send cables to Agent or Harbour Master Taichung for reporting ETA, draft, etc.
RADAR: No radar service to assist navigation in port.
VHF: Call sign "Taichung Port Radio", Channel 16 (156.8 MHz) for calling purpose, Channel 14 (156.7 MHz) for further communication. Pilots use walkie-talkies to communicate with tugs and mooring men.
TUGS: Authority tugs assist mooring and unmooring, ship's line used. 10 tugs, 250 h.p. – 4,600 h.p.
BERTHING: Wharf 1, depth 13 m., length 250 m., for grain cargo, discharged by shore grain unloaders.
Wharves 2 and 3, depth 13 m., 500 m., for bulk cargo.
Wharf 4, depth 11 m., length 200 m., for liquid cargo.
Wharf 4A, depth 9 m., length 180 m., for logs.
Wharves 5, 5A, 6, 7 and 8, depth 11 m., length 1,000 m., for general cargo.
Wharf 8A, depth 11 m., length 260 m. for general cargo.
Wharf 9, depth 14 m., length 260 m., for bulk cargo.
Wharves 10 and 11, depth 13 m., length 640 m., for containers.
Wharves 12, 13, 14 and 15, depth 10 m. to 11 m., length 760 m., for general cargo.
Wharves 23, 24 and 25, depth 10 m. to 11 m., length 560 m., for general cargo.
Wharves 26 and 27, depth 11 m., length 408 m., for general cargo.
Wharf 28, depth 11 m. to 14 m., for general cargo.
Wharf 29, depth 14 m., length 250 m., for coal (coal unloader is planned).
Wharves 31 and 32, depth 14 m., length 640 m., for containers.
Oil and Chemicals Wharf, depth 13 m., length 250 m.
(For their locations see "Plan Book").
SPECIALISED CARGO HANDLING FACILITIES:
Container Terminal: Wharves 10 and 11. Each has 1×35 ton quay-side container crane.
Grain: Grain Elevator installed at Wharf 1, silo capacity 60,000 tons. 2 unloaders, 400 t.p.h. each.
CRANES: 7 mobile cranes up to 40 tons capacity, 1 mobile crane of 140 tons capacity. Large supply of forklifts, hoppers, grabs, electro magnets, conveyors, etc.
STEVEDORES: Stevedores and equipment can be hired from the Taichung Harbour Warehousing & Stevedoring Co. and Teh-Long Warehousing & Stevedoring Co.

Cargo Working Hours:
0800 – 1200
1300 – 1700
1800 – 2300 (plus 100%)
0000 – 0600 (plus 150%)

Port Performance: General cargo 200 tons/gang/day. Bulk (other than grain silo) 300 tons/gang/day.
MEDICAL: Clinics and hospital with English speaking doctors available at town of Wuchi near the port.
DENSITY/TIDE: 1023/High tide and low tide difference 4.5 m., when alongside pier keep watch on moorings.
FRESH WATER: Available, no limitation on quantity.
FUEL: Ordinary bunkers available but 24 hours' advance notice required. Fuel barge (550 tons) operated by C.P.C.
GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authority at gangway free of charge.
OPENING/CLOSING HATCHES: Normally carried out by stevedores, except new designs on modern vessels.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes and 1 bottle of wine for own use. Bonded store will be sealed on arrival.
IDENTIFICATION CARDS: Not required, however passports or other identification papers must be submitted for request of a shore pass.
CONSULS: None.
REPAIRS: Minor repairs can be carried out in port.
REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan near Taipei, or Kaohsiung, about 200 km. from this port.
TIME: GMT plus 8 hours. For correct local time dial tel. 117, time report in Chinese, free of charge.
HOLIDAYS: Commemoration Day of the Republic of China and New Year's Day (1st and 2nd January), Lunar New Year's Eve and Spring Festival (3 days late in January or early February), Youth Day and Chinese Martyrs' Day (29th March), National Tombs' Sweeping Day and Death of President Chiang Kai-shek (5th April), Labour Day (1st May, for labourers only), Dragon Boat Festival (one day in June), Mid-Autumn Festival (one day in September), Confucius' Birthday and Teacher Day (28th September), National Day (10th October), Taiwan Restoration Day (25th October), Chiang Kai-shek's Birthday (31st October), Dr. Sun Yat Sen's Birthday (12th November), Constitution Day (25th December).

Cargo work can be arranged on holidays except Lunar New Year's Day, Labour Day, Dragon Boat Festival (only afternoon) and Mid-Autumn Festival (only afternoon).
POLLUTION: Discharge of tank washings, etc., in port is prohibited (Also see "Regulations – Harbour Bureau Notice").
POLICE/AMBULANCE/FIRE: Call Taichung Harbour Police Tel: 562394 or Liaison Centre of Taichung Harbour Bureau Tel: 562164.
TELEPHONE: Local telephone available to be placed onboard.
GENERAL: Recommended chart: Chinese Navy Chart No. 0357, Tai-Chung Kang.
SHORE LEAVE: Crew allowed ashore except for crew members from communist countries.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carried articles to the gangway guard when going ashore and to the gate police when coming aboard.

2. Photographing of the harbour, storing of explosive articles and displaying of fire crackers in the harbour area are prohibited.

3. Before obtaining a boarding pass which can be applied for you by your ship's agency, you are not allowed to board another ship with your shore pass.

4. Before going ashore, read over carefully the notice on your crew shore pass and comply with it.

5. Be sure not to lose your shore pass, nor should it be used by others, since it is an important official document. The expense of announcing the loss of shore pass for 3 days in the local newspapers is to be on loser's account.

6. To avoid getting lost, keep in your mind the number and location of the wharf at which your ship is alongside, and in case the location of the ship is shifted contact your ship's Agent.

7. Always maintain aboard your ship a sufficient number of crew in case of emergency.

8. For the prevention of stowaways, thefts and accidents, crew quarters and passenger cabins should be kept locked before their shore leave.

9. Pumping wasted oil and throwing rubbish into the water, or exhausting thick smoke in the port area shall be subjected to a heavy fine.

10. For the protection of foreign copyrights, pirated editions of foreign books and records are not exportable.

11. Unless an application is approved by the Customs, any taxable article should not be taken off the ship, while each crew member is allowed to carry ashore 2 opened packs of duty free cigarettes, 10 cigars or 2 ounces of tobacco.

12. Each crew member may carry ashore no more than 2,000 New Taiwan Dollars (NT $2,000).

13. Each crew member is allowed purchases not exceeding US $200 in value in local products or handicrafts which can be carried aboard by the buyer with purchasing invoice; a Customs permit should be shown to the guard if exceeded.

14. Whenever you need assistance, please feel free to call 562394 or 562611 ext. 275 upon which the Foreign Affairs Division of the Harbour Police is obliged to serve you.

15. For further information, please consult directly with your Agency or Authorities concerned, as the rules contained in this notice may be revised at any time.

Thank you very much for your co-operation.

DEVELOPMENTS: With the 1st phase of construction completed there are 28 berths.

The 2nd phase project with an expansion of the commercial harbour and a new industrial harbour will be carried out according to the economical situation.

SHIPMASTER'S REPORT: November 1982 (updated May 1984).

Stevedores: Cargo work: Around the clock. 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. and 0000 – 0600 hrs.

Health: Smallpox and Cholera still declared in Radio Pratique message but no action taken if certificates are out of date.

Customs: Issues can be made after 5 days.

VHF: Pilots and Port Radio also officially work Channel 16 but we only make contact on Channel 14.

Berthing: No. 11 (Container Berth) is completed (Extension of No. 9 and 10)

Consuls: No British Consul.

Airport: Nearest airport at Tauyuan.

Report: This is a new port midway up the West coast of Taiwan. Plans for very extensive developments are at present in hand, stage one is almost completed.

The Western coast is low lying and exposed. During N.E. monsoon season, when cold front comes from mainland China, the wind can be very strong, ships are advised to go South or North so that the Pilot may be taken off at Kaohsiung and Keelung. The water shelves fairly slowly and I am given to understand that in bad weather Panamax vessels anchor 2 miles West of port entrance, holding conditions not known. We were fortunate with calm conditions and anchored 5 cables S.W. of Breakwater South Light for a short period with no difficulties.

Pilot boards from launch outside and 1 tug is normally taken outside. VHF Channel 14 is used. They also use walkie-talkies to contact Harbour Control and tugs. Panamax vessels normally berth during daylight hours but may sail at any time. Pilot seemed competent and had an Assistant/Trainee Pilot with him.

Depth of Water: Vessel berthed at half tide with 12 m. draft. Grain silo 13 m. Berth No. 10 depth 13 m. Berth No. 9 depth 14 m. Dredging being carried out. Rise and fall of tide 3.5 m. depth 4.0 m. Dock water density Berth No. 10 found to be 1023.

Tugs: There are 5 modern tugs. 3×2,400 h.p. and 2×1,600 h.p. Ship's ropes used. Normal conditions for Panamax, 1 tug each end.

Berths: Berth No. 10 (Berth No. 9 is similar) is a brand new container berth with 2 gantries for containers. Berth used for bulk coal discharge into lorries until new coal berth constructed. Large flat area. Mooring bollards set at jetty edge every 23 m. A further set of unequally spaced large bollards are set along line 34 m. in from jetty. When mooring 4 head/stern lines, 2 springs and 2 long breasts each end are recommended. We experienced winds of over 30 knots off berth for short period, nobody seemed at all surprised, so would suggest this is reasonable tie-up.

Discharge: As stated this is a container berth. Panamax vessel with side opening hatches, port side to. Hatch centre stops and minor hatch fittings burnt off. Centre piece of hatch rail track tack welded on. Both hatch lids moved to starboard side. Section of ship's side rail in line with hatch burnt off. Wood sleepers placed on deck and mobile cranes lifted on board, 1 per hatch. These use small 4 – 5 ton grabs and discharge into lorries. Small bulldozer type vehicle put in each hold to move cargo to port side. Preparation about 1 day, discharge 9 days, replacing of pieces, etc., 1 day.

Bunkers: Heavy oil and diesel available by barge.

Lub. Oils: Most available, plenty of advance notice required.

Fresh Water: Available, from jetty or barge.

Repairs: Ship repairs undertaken with a 10,000 ton dry dock.

Money: Only New Taiwan Dollars available. US Dollars can NOT be obtained. Obtain any other requirements at previous port.

Immigration: For non-Taiwanese crew this is a problem, including Hong Kong, British and Indian. If any crew changes expected give plenty of notice. Visiting Hong Kong shore staff such as Superintendents, etc., required to renew dock pass every 2 days. Crew issued with shore pass (with photo for Chinese ratings) this has to be shown at dock gate outward and inward. Passes collected in on sailing, loss of pass results in fine on holder.

Stores: Victualling, fresh fruit and vegetables, reasonable price and good quality. Milk, meat, European style tinned goods all up to Chinese National Standard (CNS). Chinese dried foods, etc. appear good.

Beer can be obtained but not spirits or foreign cigarettes.

Customs: One person at least, around all the time. Bond and beer locker sealed. Issue will be given after a week in port, but give plenty of notice.

Certificates Required: Register, Loadline, Safety Equipment, Safety Construction, Radio Safety, Derat, Liferaft.

Documents: Crew List, 10 copies. Crew Manifest, watches, etc. and including foreign money. List of Stores. Deck, Engine, Victualling, Bond, Arms & Ammunition List, Narcotics List, Arrival Report, Declaration of Health, Departure Report (these three their forms). Specimen signature Master and Mate, General paperwork, large amount for any purpose. If landing spares or items for overhaul (motors rewound, etc.) give plenty of notice.

Medical Facilities: All available.

Drugs: Do not appear to be a problem in this port.

Grain Silo: I was informed that usual discharge rate is 5,000 tonnes per day.

Radio Station: Taichung Local. 24 hour watch M/F, W/T no difficulties encountered.

Cameras: Not to be taken ashore.

Walport: Possible to change video tapes. NOT films.

Telephone: Placed on board.

AUTHORITY: Taichung Harbour Bureau, Wuchi, Taichung County, Taiwan, Republic of China. *Tel:* (04) 2220414 and (046) 562611. *Contact:* Rear-Admiral H. C. Kung, Harbour Master.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cables: "Jarocean Taipei".

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required to call for clearance by Port Officals.

PILOTAGE: Not compulsory, but restricted to daylight only.

RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.

ANCHORAGES: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.

MAX. SIZE: 170 ft. length, 15 ft. draft.

TUGS: Not available and not required.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E. (See Plan Book)

PORT LIMITS: The port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the city of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msansani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.

DOCUMENTS:

Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ship's Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).

Shipmaster's Report: March 1981.

Declaration of Health.
1 Set of Vaccination Lists.
7 Crew Lists.
6 Passenger Lists.
Clearance from Last Port.
Ship's Register (Copy).
Dangerous Cargo Manifest.
Stores List (Form C-7).
Crew Declarations (Form C-8).
Parcel List (Form C-3).
Ship's Record & Master's Report (Form EAH-6007) (To Pilot).
Entry Report (Nasaco Form).
Departure Report (Nasaco Form).
Shore Pass (Form TIF 10).

PILOTAGE: Compulsory South of Makatumbe Lighthouse for all vessels over 200 n.r.t. The pilot launch is painted white and shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks. During the hours of darkness ships entering or leaving the port are limited to 485 ft. LOA on tides not exceeding 9 ft. range.

ANCHORAGES: Anchorage outside in 7 – 8 fathoms, sheltered by Makatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.

Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light bearing 250° true.

RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50' S., Long. 39° 18' E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.

MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m. at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT, and single-screw vessels not exceeding 175 m. Tankers LOA 175.26 m., 36,000 d.w.t., and draft 9.75 m. Also refer to "Mjimwema".

HEALTH: Radio Port Health Officer giving ETA, name last port and health condition of passengers and crew. "Q" flag to be displayed until Free Pratique given. Radio Pratique not available.

TUGS: Five tugs available.

BERTHING: In the Inner Harbour there are mooring and anchorage berths for up to 9 deep-sea ships ranging from 350 ft. to 600 ft. (106.48 m. – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 m. – 9.14 m.) in draft.

Deep water quays total length 2,016 m. comprising berths numbers 1-11 with 10.06 m. in depth at LWOST.

Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tidal basin and Southern Creek, the latter having 11 deep-water berths. Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	7.3 m.	152 m.
"G"	Buoys	7.3 m.	168 m.
"H"	Buoys	7.1 m.	168 m.
"K"	Moored, buoys and anchor	9.1 m.	183 m.

In addition there are 2 coaster anchorages. The Southern Creek, at the S.E. corner of the basin has a navigable distance of 1.5 miles for ships drawing up to 30 ft. of water.

CARGO HANDLING FACILITIES: The port has no special facilities for bulk handling cargoes but, subject to advance notice being given, vacuvators and grabs can be made available.

Equipment and Other Facilities:

Deep water vessels berthed in stream are loaded and discharged by lighters. At the lighter quay there are 8 electric portal cranes for working lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port has 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stacking yards as per details below:

(a)	Belbase (AMI)	—	2 × 10 ton cranes.
(b)	Tanzania	—	3 × 5 ton cranes.
(c)	Yard 5, 6 & 7	—	1 × 7 ton and 1 × 7-20 ton Gosna Cranes
(d)	Yard 8	—	1 × 5 ton Conrad.

Main Quay Cranes: Berth Nos. 1 – 11 have between them 44 portal cranes of 7 tons capacity each.

Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton, 1 × 60 ton floating Crane – "Kifaru" and 1 × 120 ton floating crane – "Ndovu". These are moved between deep-water quays, lighterage quays and any other points of work on the stacking yards as and when required.

DENSITY: 1025.

TANKERS: Bulk Oil Jetty at which tankers up to 175.26 m. LOA and 9.75 m. draft can discharge to tanks ashore. Depth alongside 10.06 m. There is a refinery on the opposite side of the creek to the Bulk Oil Jetty; the tankers serving the refinery are not to exceed 20,000 s.d.w.t. capacity. Also refer to "Mjimwema".

STEVEDORES: Week days (except Saturday) 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break), 2200 – 0600 hrs. (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 hrs. (no break). Sundays and public holidays 0700 – 1500 hrs. (45 minutes' break), 1500 – 2200 hrs. (no break).

FRESH WATER: Available at deep-water berths, and a water barge supplies water to ships at anchorage. All water is chlorinated but should be boiled and filtered. Water for boiler requires feed treatment (formal solutions adequate).

FUEL: Not generally available.

MEDICAL: Doctors and good modern hospital facilities exist.

REPAIRS: Several light engineering workshops. There is a Tanzania Harbour Authority Dockyard for construction and maintenance of Tanzania Harbour Authorities' lighters and other small craft. This has a slipway for vessels up to 100 ft., lifting power 100 tons. The Port Administration employs a skin diver.

REPATRIATION: Can be arranged.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.

All cabins are inspected by Customs.

AIRPORT: International airport with daily connections to all parts of the world.

TIME: GMT plus 3 hours. No alterations.

HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICE: Contact: Pac Lloyd (International) Inc. P.O.Box 1301 Dar es Salaam or Eagle Tugs P.O.Box 98574, Mombasa.

DEVELOPMENTS: Future plans of the port include the construction of 2 additional deep water Berth Nos. 12 and 13, expansion of the dockyard capable of dry docking tugs, small ships up to 1,500 d.w.t. A new oil jetty will be constructed to give way for the construction of 2 additional deep water berths. Straightening, widening and deepening of the entrance channel to at least 10 m. depth will enable vessels of up to 35,000 d.w.t. to enter the port at all times of the day. It will also enable night pilotage to all types of ships which at present is restricted to vessels of up to 135 m. in length only.

Further improvements include converting two berths (Nos. 10 and 11) into a container terminal, construction of warehouse, grain terminal and container depot, paving and wharf rehabilitation. Work expected to start in 1984 for completion in 1988.

AUTHORITY: Tanzania Harbour Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 21212. *Telex:* 41346. *Cables:* Portreeve. *Contact:* Port Manager.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".

LOCATION: The position of the Monobuoy is Lat. 6° 49′ 20″ South, Long., 39° 22′ 00″ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.

PILOTAGE: Mooring Master/Pilot boards at position Lat. 6° 46.9′ N., Long. 39° 22.2′ E. Should the Pilot not be available on arrival, vessels are advised to keep underway and await the Pilot rather than anchor.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided. Accommodation also required for 2 Divers.

RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.

MAX. SIZE: Monobuoy accommodates tankers up to 100,000 d.w.t. (part discharge) and 125,000 d.w.t. (complete discharge). Minimum length allowed 650 ft. Max. draft allowed 55 ft.

HEALTH: Customs, Port Health and Immigration will board vessels on arrival.

RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

- *(a)* Name of Ship.
- *(b)* Name of last port from which the vessel cleared and the loading port if different from above.
- *(c)* Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
- *(d)* Cargo loaded.
- *(e)* API gravity.
- *(f)* Arrival draft, fore and aft.
- *(g)* Lifting capacity of derricks.
- *(h)* Size of manifolds.
- *(i)* Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:

- *(a)* Name of ship.
- *(b)* Amended time of arrival.
- *(c)* Names of crew leaving the vessel (if any).
- *(d)* Requirements of doctor and dentist.
- *(e)* Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of Dar-es-Salaam Signal Station vessel should call the Signal Station on either Channel 12 or 16. A continuous watch is kept on both Channels. Call sign is Dar-es-Salaam Signal Station.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

Portable radios can be provided for vessels not having a VHF set and the Agent should be so informed in order to allow time to dispatch a portable radio on arrival. A vessel arriving without suitable means of communication and not having informed the Agent of the fact could incur delays which would be to ship's account.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.

READINESS: Notice of readiness will only be accepted by the Pilot/Mooring Master on behalf of the Harbour Authority, when the ship is berthed and connected.

Any vessel which is not, in the opinion of the berth controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.

BERTH: The Monobuoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.

MOORING: The following equipment is required to moor with safety: Two 10 in. nylon circumference ropes, 100 ft. in length. 4 end joining shackles.

The vessel approaches the Monobuoy head to wind and tide or the resultant of these forces, and should have 2 mooring ropes lowered to the water, each having a 15 ft. lashing of 3 in. rope on it.

As the vessel nears the mooring, a launch will take the port rope from the ship and connect it to the port pick-up rope and return to the ship to take the starboard rope and repeat the operation on that side.

The vessel should heave on the ropes as soon as they are inboard and heave herself to the buoy until the chain is on the fairlead. The ship wire should then be shackled to the chain and turned up on bits. This applies to both sets of moorings.

HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the port side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.

UNMOORING: On sailing, hoses will already have been disconnected and ready to be slipped at the direction of the Mooring Master.

The weight will be taken on the 2 approach ropes by heaving slowly with the winch. The shackles will then be released and the ropes slacked away until they are finally paid out through the fairlead and dropped into the sea. The shore equipment should then be collected together under the derrick and returned to the boat.

BALLAST: Ballasting will be allowed during discharge but only with the express permission of the berthing controller, and in the case of ballasting in dirty tanks a dry certificate must be issued. Vessels will not be allowed to tank clean. There are no sludge tanks ashore.

FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.

FRESH WATER: Only very limited quantities of fresh water in the region of about 50 tons can be provided.

STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Monobuoy. Transport of stores to the buoy will be the responsibility of the Agent.

REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.

SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Monobuoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.

POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.

REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or faciility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 25839. *Telex:* 41346 Portreeve. *Cables:* Bandari Daressalaam. *Contact:* General Manager/Harbour Master.

MKOANI (Kohani): 05.21 S. 39.38 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar".

PILOTAGE: Pilot available on request from Zanzibar.

RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.

ANCHORAGES: No mooring buoys. Minimum depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.

MAX. SIZE: Length 250 ft.

TUGS: 2 tugs available.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

AUTHORITY: Ministry of Ports and Shipping, Port and Marine Department, P.O.Box 263, Zanzibar. *Tel:* 30301, 30300. *Telex:* 57267 Shipcorp. *Contact:* Harbour Master.

MTWARA: 10.16 S. 40.12 E.

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".

PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flies to Mtwara when required. Flights once daily except Wednesdays. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (Southbound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from tug or available craft.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0800 hrs. and 1800 hrs.

APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo spit there is a very good natural harbour with room for two 500 ft. vessels and 1 coaster alongside. There are 6 marked anchorages to accommodate vessels of up to 9.5 m. draft.

ANCHORAGES: No safe anchorage outside port.

RESTRICTIONS: Port closed from 1800 hrs. to 0600 hrs. No tidal restrictions.

MAX. SIZE: Length 575 ft., draft 32 ft.

RADIO: Dar-es-Salaam or Mombasa Radio.

TUGS: Join vessel off Signal Station (No tug available mid-1984).

BERTHING: Deep-water Quay: 1,248 ft. length; 9.75 m. depth alongside at low water. 2 berths available at quay.

Sheds and Stacking Yards:

The port has 4 sheds for reception and storage of cargo with a total area of about 431.56 sq.m.

Transit shed No. 1 floor area is 3,121.4 sq.m.

Transit shed No. 2 floor area is 3,121 sq.m.

Transit shed No. 3 floor area is 1,189.12 sq.m. and at the B.P. shed the floor area of stacking yard is 929 sq.m.

Cargo Handling Appliances:

2 Jones mobile cranes.
11 Fork lift trucks.
3 Tractor trailers.
3 Tractors.
5 Coles cranes.

Marine Craft:

The port owns 3 floating craft. These include 1 berthing tug "Kongoni" (not on station) and 2 labour launches.

CARGO GEAR: Vessels load/discharge using ship's gear.

STEVEDORES: Stowage plan required preferably before ship's arrival. Small coasters use the port's mobile cranes.

MEDICAL: Doctor available. All crew require valid smallpox vaccination, cholera and yellow fever inoculation certificates.

DENSITY: 1025.

FRESH WATER: Not normally available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agents.

IDENTIFICATION CARDS: Required.

REPATRIATION: Possible.

AIRPORT: 7 miles distant. Daily service to international airport.

TIME: GMT plus 3 hours.

HOLIDAYS: All holidays worked as Sunday except following days when no work done: Christmas Day and 1st May.

TELEPHONES: Direct connection on board not possible.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: December 1981 (Updated 1984).

Vessel called at Mtwara on 1st December, 1981. The following facts were obtained from Port Manager and Pilot:

Documents/Health: Refer to Dar-es-Salaam.

Pilotage: Pilot is based at Dar-es-Salaam and flies to Mtwara when required. Early information concerning ETA to "Harbour Master – Dar-es-Salaam". He will then charter a small aircraft for Pilot. Pilot stays on board vessel until departure. Pilot boards 0.5 miles N.W. of Shangani Reef buoy from tug. Pilot ladder to be 6 ft. above water. Pilotage during daylight hours only. Signal station can be contacted on Channel 12 between 0600 hrs. and 1800 hrs. Channel 16 also available if required.

Approaches: Cape Delgado lighthouse unlit. The entrance is approached by a channel marked by buoys and leading beacons, all unlit. Buoys only weighted and liable to drift. There are six unmarked anchorages to accommodate vessels of up to 9.5 m. All buoys and leads unlit.

Radio: "Mombasa Radio".

Tugs: Available from Dar es Salaam.

Cargo Gear: Ship's cranes or derricks used. Shore facilities (not used for discharging) consist of: 12 Hyster fork lift trucks (max. 3 tons); 2 tractors and 10 trailers SWL 15 tons; 2 Jones mobile cranes × 15 tons each and 5 Coles mobile cranes × 7 tons each.

Stevedores: Stowage Plan required, preferably before ship's arrival.

Medical: Doctor available. Medicine and/or injections in short supply and may not be available. All crew require valid Yellow Fever Certificates and anti-Malaria tablets should be taken on arrival.

Density: 1025.

Fresh Water: Sometimes available from quay in small quantities. No water barge.

Provisions: Fresh fruit and vegetables available in market.

Fuel: Not available.

Repairs: No facilities.

Gangway/Deck Watchmen: Arranged by Agent.

Agent: Only one Agent – National Shipping Agencies. Cable address: "Navigation Mtwara".

Identification Passes: Made out by Immigration Officials on board. Collected by Agent prior to departure.

Repatriation: Daily internal flights to Dar es Salaam.

Airport: 7 miles distant by road.

Time: GMT plus 3 hours (permanent).

Holidays: All holidays normally worked except Christmas Day and 1st May when no work possible.

Working Hours: Seven days weekly 0700–1500; 1500–2200 with requested extension from 2200–0100 if to finish vessel (except Heavy Lifts).

Telephones: Direct connection on board not possible.

Telex: One machine in Post Office for general use. Otherwise Agent telephones Dar-es-Salaam Agent who forwards telexes.

Shore Leave: Crew allowed ashore.

Mail: Very slow.

Main Exports: Cashew nuts, sisal, timber. Casava in bags (not palletised) or bulk (bags slit).

Fenders: Tyre fenders alongside cemented quay. Additional fenders by ship recommended.

Cargo Security: Though adequate guards, security of cargo on quay is a problem as frequent blackouts due to power failures.

Aero (RC): Strong signal operational 0800–1530 LMT.

Restrictions: Cameras must not be used. Taking of any photographs whatever is strictly prohibited.

Customs Allowances: Officers: 8 cans beer, 1 part bottle spirits. Ratings: 8 cans beer.

Heavy Lifts: Not worked after 1800 hrs. due to darkness.

Notes: (a) All navigation lights in Tanzania (except Zanzibar Island and Pemba Island) are unreliable.

(b) If next port is Dar-es-Salaam, Pilot will remain on board and take vessel into Dar-es-Salaam.

SHIPMASTER'S REPORT: December 1983.

Documents/Customs Regulations:

Crew Declaration Form (Form C.8)
Declaration and Advice of Consumable Stores (Form C.7)
Passenger List or Nil List (Form C.6)
Parcels List or Nil List (Form C.3)

One copy of each of the above being required and 1 copy of the Manifest. (Company Manifest not acceptable, Form supplied locally.)

Dutiable goods allowance:

Each member of the crew including the Master is allowed 1 ounce of tobacco or 25 cigarettes per day. The Master and officers are also allowed ¼ pint of potable spirits and 1 quart of wine or beer. The other members of crew are allowed either 1/24 gallon of spirits or ⅙ gallon of beer or ⅙ gallon of wines. Dutiable stores are issued to a limit of 8 days (cigarettes) and 4 days (beer and spirits).

Quarantine Regulations:

1 copy of Maritime Declaration of Health.
1 Crew List with valid dates for Smallpox, Cholera and Yellow Fever.
Pratique not granted by radio.

Pilotage: Compulsory. Pilot is available between 0600 – 1800 hrs. and boards in an approximate position 1 to 2 miles North of Shangani Shoal.

Pilot boat (VHF Channels 12 and 16) – Pilots have hand set.

Anchorages: No recommended sea anchorage. If arriving off Mikindani Bay at night, it is prudent to cruise WELL OFF until daylight, currents are strong and set onshore.

A sheltered anchorage exists in the inner bay with reported good holding ground in about 12 fathoms.

Approaches to Berth(s): From the pilot station passing S.W. of Shoal Buoy into channel marked by an unlit buoy. The sharp bend around Msemo Spit requires very careful navigation and steering.

Radio: Standard instructions/communications.

VHF: Channels 12 and 16 available between 0800 – 1200 hrs. and 1400 – 1600 hrs. local time Mtwara Signal Station.

Tugs: Possibly available (on prior notice) from Dar es Salaam.

"Kongoni", a diesel tug of 1,100 h.p., equipped with fire pumps (water only) and VHF Channels 12 and 16. Stationed at Dar es Salaam.

Description of Berth(s): Berth No. 3 situated on the main wharf which is of stone construction with rubber tyre fendering. Owned by Tanzania Harbours Authority.

Berthing: Night berthing/unberthing is not permitted.

Vessels normally berth starboard side to, 1 tug meets vessel off the signal station.

Mooring wires are permitted: shore gangway is available.

Density: 1025.

Tankers: Shore Lines: 10 in. Connections: 8 in. flexible hose. Approximately 65 m. from Eastern end of quay. Grades: M.S., G.O., and K. Maximum Pressure: 75 p.s.i.

Ships' lifting gear required for 1.5 ton lift.

Fuel: Bunkers not available.

Fresh Water: Fresh water is always in short supply and during the dry seasons is unobtainable. It is reported to be of poor quality and should not be used for domestic purposes, unless boiled and filtered (See "Laundry and Stores").

Ballast: No ballast disposal or tank cleaning facilities available.

Port Regulations: Immobilisation of engines not permitted alongside.

Laundry and Stores Facilities: Reports indicate that fresh water and/or provisions obtained at Mtwara are of very poor quality and may have been the source of a severe infection which affected several ships' crews. Masters are, therefore, warned accordingly.

Repair Facilities: None available.

Crew Identification Cards: Crew require identity cards when proceeding ashore.

Medical: Medical facilities with government hospital available.

Precautions: Be careful of stowaways.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 530, Mtwara. *Tel:* 2155, 2121. *Cables:* Navigation. *Contact:* Pilot and Port Manager.

TANGA: 05.04 S. 39.08 E.

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15′ E., thence 180° to the parallel of Lat. 5° 05′ S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".

DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.

Shipmaster's Report: March 1981.

Same as Dar-es-Salaam "Shipmaster's Report" except: 7 Passenger Lists, 2 sets Vaccination Lists, Heavy Lift List.

PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.

APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° (T). A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a buoy. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° (T) until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High Light. Signals are exhibited to indicate if inner channel to harbour is clear. Morse lamp messages may be exchanged with incoming vessels.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun, but a chimney on the fertiliser factory site on Ras Kazone with 3 vertical red lights at a height of 100 m. is conspicuous.

ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.

RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 16, working on Channel 12.

TUGS: 2 small tugs available.

BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency.

Fertiliser Jetty: A Fertiliser Jetty with a single berth of 16 m. maximum draft is available in the harbour. The jetty has 2 cranes connected to a sophisticated hopper system for handling materials for the fertiliser factory only.

Also see "Cargo Handling Facilities".

Quays: The new Lighter Wharf, 240 m. long, is situated at the Eastern end of the port. It has a depth of 2.44 m. at low tide. The old wharf now under modernisation has a length of 140 m., and has similar depth of 2.44 m. at low tide.

Facilities for harbour dhows and schooners engaged in coastal wise cargo transportation are provided at the end of the old wharf where only 1 schooner or dhow can work at a time. The water alongside has a depth of 2.44 m. at low tide.

CARGO HANDLING FACILITIES: One 20 ton fixed crane is available on lighterage wharf for heavy lifts. 12 cranes of 5 tons capacity also available. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

The port is able to handle 20 ft. containers.

The port has 33 fork lifts, 3 tractor, 1 shunter and 2 Coles cranes, 1 tug, 3×16 ton Scamel trailers, 6×8 ton Scamel trailers, 4 Hyster cranes and 4 Scamel hoses. The above equipment is maintained by the Authority's mechanical and electrical workshops at the port.

Sheds and Stacking Yard: There are 8 sheds for reception and storage of cargo.

The main stacking yard which is rail and road served covers a total area of 6,969 sq.m. There is also a new yard which covers an area of about 861 sq.m. Sheds Nos. 1, 2, 3, 4 and 8 are mainly for handling exports while Sheds Nos. 6 and 7 are for imports. Total floor space of the sheds is 22,020.79 sq.m.

Marine Craft: The transfer of cargo from vessels working at anchor to the wharves and vice-versa is done by means of lighters. There are 15 lighters in use. In addition there are 4 lighter towing tugs, 3 runboats, 4 labour launches and 2 landing pontoons.

PASSENGER FACILITIES: All passengers and visitors to ships pass through the Customs Passenger Terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: Refer to "Dar-es-Salaam" for all general information.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 443, Tanga. *Tel:* Tanga 2721. *Telex:* 45000 Harbor TZ. *Contact:* Harbour Master.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.

PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.

ANCHORAGES: No mooring buoys. Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.

MAX. SIZE: 240 ft. length; 25 ft. draft.

TUGS: 2 tugs and 1 labour boat.

LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E.

DOCUMENTS:

Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.

Also Required: Bills of Lading, Ship's Papers, Ship's Certificates, Health Certificates (Yellow Fever and Cholera).

PILOTAGE: Compulsory. Pilot requires ETA 24 hours before arrival. Contact can be made through pilot station (VHF Channel 16 – 24 hours a day). Pilot boat may be contacted on VHF when in operation – pilot boat is painted orange.

Vessels approaching from English Pass embark Pilot at Seagull Buoy, and vessels approaching from South Pass meet Pilot at Penford Buoys. Pilot takes vessel in an out, day and night. Vessels awaiting Pilot anchor at the boarding position.

Recommended time for entry and departure is between 0600 hrs. and 1800 hrs.

ANCHORAGES: 6 anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.

RESTRICTIONS: 2 entrances, English Pass and South Pass. The former is approximately 1 mile wide and has minimum depth of 6 fathoms 4 ft. and a very narrow angular turning corner of 1.7 cables width. South Pass wider and deeper than English Pass. Passes are well buoyed and lit. In English Pass, tidal stream runs North and is stronger on ebb than on rising tide. South Pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide.

MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.

HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid smallpox vaccination, yellow fever and cholera inoculation certificates.

RADIO: No official call sign for the control station, but there is a new radio installation at the Agency on VHF Channel 16 with a call sign ZANSAC (Zanzibar National Shipping and Agency Corporation).

There is also a long-range radio on frequency 8297.3 kHz.

RADAR: No installation.

TUGS: No tugs are required as all vessels work in stream. Tugs are only used for towing barges to and from vessels, transporting labour and other stevedoring activities.

BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.

CRANES: Four old cranes (1926) and 1 mobile crane of 7 tons at the Wharf. No heavy lift cranes, however if heavy lift crane required arrangements are easily made to put the load in a landing craft to be discharged at a point near the port, using lowloader to tow it to its destination. No objection to vessel using its own gear.

BULK CARGO FACILITIES: No berth for foreign vessels, all work carried out in stream.

Discharging Rate: 350 – 400 tons per gang per day in case of bagged stuff or pallets. No facilities for bulk cargo handling or containers, but one or two containers can be handled.

STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700 to 1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.

LIGHTERS:

2 lighters, open at the top for heavy equipment 280 tons each.
2 lighters for bag and general cargo, each with a capacity of 300 tons.
5 lighters for bag and general cargo, each with a capacity of 200 tons.
5 lighters for bag and general cargo, each with a capacity of 150 tons.
6 lighters for bag and general cargo, each with a capacity of 100 tons.

FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by hydrant or at the anchorage in the stream by water barge.

FUEL: Not available.

SURVEYORS: Department of Marine Transport, P.O.Box 263. Tel: 2857. Telex: 57267 Astaship. (This is the Agency telex by which Port Authorities can easily be contacted).

STORING: See "Prelims", page viii.

1. Storage done by barges.
2. There is no restriction in doing so, provided the Master can allow both operations to be done simultaneously.
3. Yes.
4. Yes.
5. Stores have to be checked by the Customs Authority.

GENERAL: Members of the crew who wish to fish around the harbour limits have to notify the Signal Station and the harbour police of direction they are going. If the crew wish to visit the offshore island, they have to contact the Agent who will obtain permission for them and advice.

AUTHORITY: Department of Marine Transport, P.O.Box 263, Zanzibar, Tanzania. *Tel:* 32857. *Telex:* 57267 Astaship (stating "for Port and Marine Dept."). *Cables:* Shipping. *Contact:* Captain Ramadham Saleh, Port Captain. Major H. Kh. U. Mlinde, Director, Department of Marine Transport.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

GENERAL:

IMMIGRATION: The Thai Immigration Department has issued a Notification, dated March 15th, 1976 to the following effect:

"Chinese or Hong Kong crew members not in possession of Seamen's Discharge Books, but holding Certificates of Identity only are not recognised as bona fide crew members, and are liable to Immigration Guarantees at 50,000 Baht per person, to be filed upon arrival."

All concerned are kindly requested to check and ensure that all Chinese crew members are in possession of either Passports or valid Seamen's Discharge Books, and not Certificates of Identity, to avoid complicated Immigration procedures involving deposits, etc.

REGULATIONS: Thai Government Regulations: Thai laws relating to the production, possession, distribution and use of narcotic drugs are extremely severe. Penalties for infringement range from prison sentences and fines to life imprisonment and even execution.

The Thai Navigation Act requires Masters of all vessels calling at Thai ports to observe the following:

On preparing to depart Thai waters, vessels shall fly the International Code flag indicating that the vessel is about to proceed to sea (code flag P).

If the vessel is to depart in the morning this flag is to be flown in the afternoon of the previous day, if departure is in the afternoon code flag P is to be flown in the morning.

Departure shall be notified to the Harbour Master at least 6 hours before expected time of departure.

Documents required by Port Authorities (other than those required for specific ports) include:

Ship's Licence and Safety Equipment Certificate.
Certificate of Registration.
Certificates of Competency (including Radio Officers).
Radio Certificate.
Ship's Articles.
Last Port of Call Clearance.
Log Book.
Load Line Certificate.
Derat or Exemption Certificate.

BANGKOK: 13.42 N. 100.34 E. (See Plan Book)
KOHSICHANG: 13.10 N. 100.50 E.

PORT LIMITS: A vessel is normally considered to be an "arrived ship" on passing the Paknam Customs Station.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Store List; List of Arms and Ammunition for ship's use; List of Arms and Ammunition in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage plan; Inward cargo manifest; Transit cargo manifest; Through Cargo manifest; List of containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

For safety reasons, all dangerous goods such as calcium hypochlorite, butanox (methyl ethyl ketone peroxide), sodium hydrosulphide, nitrocellulose and potassium chlorate, are not allowed to be kept in a godown or dangerous goods warehouse. Such dangerous goods have to be discharged overside into a barge or cargo boat or truck.

APPROACHES: The entrance of the river Chao Phraya is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 100° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 100 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. from MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. (565 ft.). The limiting draft of vessels will be determined by the bar adder plus the depth of water (predicted in the Tide Table published yearly by the Hydrographic Department RTN) from LLW at the Bangkok Bar, but the max. draft of vessels allowed to cross the bar is not over 27 ft.

PILOTAGE: Compulsory at Bangkok; Kohsichang not required; Advance notice required 48 hours prior to arrival.

Location pilot station Bangkok: Lat. 13° 22.8′ N., Long. 100° 35.9′ E. Area waiting pick-up Pilot will be close to pilot station.

Also see "Shipmaster's Report" dated March 1984.

ANCHORAGES: See "Shipmaster's Report" dated March 1984.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel.

Kohsichang: No restrictions, able to enter day and night.

MAX. SIZE: Bangkok: Not exceeding 565 ft. LOA. Max. draft 27 ft.

Kohsichang: See "Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations Article 36:

Under the responsibility of ship's Master and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through Radio Pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship or anything suspect about health or ship sanitation, the ship's Master is requested, as early as possible, to inform the Port Health Officer at International Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derat or Derat Exemption Certificate.

Vaccination: Vaccination Certificates required: Cholera (only when leaving from infected areas); Yellow fever (only when leaving from infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion that vaccination is contra-indicated on medical grounds, he shall provide the persons with reasons, written in English, underlying that opinion, which Health Authorities should take into account.

Death on Board: In the case of death on board after the ship arrived at the anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Officer if there are cadavers and/or remains on board of persons who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including persons having physical or mental defects who cannot earn their living.

RADIO:

Name of Station	*Frequencies*	*Remarks*
Bangkok Radio:		
HSA Long Wave	500 kHz (for calling) 512 kHz (for traffic)	operate 24 hours
HSA Short Wave	8686 kHz (for calling) 8573, 8686, 12800 kHz (for traffic)	operate 7 times a day every day beginning hours of 0000, 0200, 0500, 0800, 1100, 1400 and 1600 (GMT).

In addition to above, communication can be made through the Port Radio and Pilot Radio; these 2 stations can only be reached when less than 24 hours from Bangkok, their particulars as follows:

HSC 61 L.W. 500 kHz (for calling)
443 kHz (for traffic)
operate 2300 – 1700 hrs. GMT
Traffic Lists broadcast at 0450 hrs. GMT, and the beginning of every hour every day.
HSC 62 S.W. 8466 kHz.
Operate 5 times a day every day beginning hours of 0000, 0300, 0600, 0900 and 1300 hrs. GMT.
8292.5 (S.S.B./R.T.) also available.

Information to be supplied by incoming Vessel:

(1) Last port of departure.
(2) Estimated time of arrival pilot station.
(3) Draft (fresh water).
(4) General cargo tonnage for discharge.
(5) Dangerous cargo.
(6) Heavy lift required.
(7) Fresh water required.
(8) Number of passengers (landing and transit).
(9) Time of dropping anchor at pilot vessels.

VHF: VHF communication with port radio and pilot radio through Channel 16 (Calling – 24 hours service), Channel 14 (Working) and 157.5 (Interport – Special Channel). Also VHF communication with shore for International Maritime Mobile Service under following:

Channel 24
For ship transmitting frequencies 157.20 } (for calling)
For shore ,, ,, 161.80
Channel 26
For ship transmitting frequencies 157.30 } (for traffic) service 24 hours
For shore ,, ,, 161.90
Channel 28
For ship transmitting frequencies 157.40 } (for traffic)
For shore ,, ,, 162.00

TUGS: Will join when vessel approaches berth, using tug's line without extra charge. 8 tugs available, 1,000 h.p. – 1,200 h.p.

BERTHING: No difficulties in approaching berth. Agents will cable Master to inform when Pilot has been ordered to board vessel.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.

2 berths in front of Co-operative Salt wharf for 500 ft. vessels.
4 berths in front of Customs boarding station for 300 ft. vessels.
2 berths at Bangplakod for 565 ft. vessels.
1 berth at Bangplakod for 500 ft. vessels.
5 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.
3 berths North Sathupradit for 400 ft. vessels.
4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:

16 berths for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels.

1 berth for imported general cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.

2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.

14 berths for imported petroleum products operated by private and government organisations for 150 ft., 350 ft. and 565 ft. vessels.

54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.

36 dolphins in front of Klongtoi wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi wharf, to accommodate 7 ocean-going freighters for exported cargo.

Kohsichang: 7 berths available, no limit on length, max. draft 35 ft. – 47 ft.

Also see "Shipmaster's Report" dated September 1982.

CRANES: 2 floating cranes of 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

2 mobile cranes for heavy lifts and full containers. S.W.L. 165 tons. Owned by Port Authority.

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: Diameter of shore line various from 6 in. to 20 in. All terminals are able to provide reducers. No slop facilities available.

DENSITY: Bangkok: Minimum 1000, maximum 1011; Kohsichang: 1021.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barge and alongside terminals, no delay on bunkering, advance notice 48 hours.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: In general carried out by stevedores without extra charge. (Ordinary hatch covers, not new hatch cover system.)

CUSTOMS ALLOWANCES: 200 cigarettes for officers, while crew member only 100 for 3 days. Wine/Spirit; 1 bottle each, opened.

CARGO GEAR: Supplied by stevedores except cargo tent and forklift truck.

IDENTIFICATION CARDS: Required for all crew and officers.

CONSULS:

Vatican	31804
Vietnam	517201 – 3

REPAIRS: Only minor repairs.

DRY DOCKS: 1 for vessels up to 360 ft. LOA.

REPATRIATION: Possible; however, no facilities for crew changes.

AIRPORT: About 25 km. from Bangkok, regular services by airlines.

TIME: GMT plus 7 hours. No change during the year.

HOLIDAYS: Able work all around the year except December 31st and January 1st.

POLICE/AMBULANCE/FIRE: Police (Highway) 816240, 816241, 816250. (C.I.D.) 219111, 225151; Ambulance 811544; Fire 816666, 811544.

TELEPHONE: Available when alongside PAT berths.

SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's/ABS/Veritas/Nippon Kaiji Kentei Kyokai Surveyors available.

SHORE LEAVE: Permitted.

DELAYS: Occasionally congestion, delay 1 to 2 days.

DEVELOPMENTS: *East Quay wall expansion at Klongtoi Wharf:* This project provides 6 more berths for ocean-going vessels, consisting of 2 berths for conventional freighters, 4 berths for feeder container ships and a 450 m. long wharf for lighter aboard ship (LASH). The construction work is now completed.

Laem Chabang deep sea port: The location of this deep sea port is at Laem Chabang on the Eastern side of the Gulf of Thailand near the town of Sriracha and about 120 km. S.E. of Bangkok. At present, the government has approved the construction of a deep sea port at Laem Chabang, which is expected to be completed in 1987.

SHIPMASTER'S REPORT: September 1980.

During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave pilot station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (crew list) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

SHIPMASTER'S REPORT: September 1982.

Loading of tapioca products in bulk quantities of 25,000 tons and more at Kohsichang:

There are three ways of loading:

1. Vessel anchors off the N.E. coast of the main island. A number of mobile cranes, 12 to 15, are placed on deck by means of a floating crane. The cargo is brought alongside in barges, shovelled by stevedore-labour in canvas slings and dumped into the cargo holds. An average of approximately 3,500 tons per day can be reached, however, delays are experienced by rain and by too much swell for some of the barges alongside.

Stevedore Labour: An average of 300 persons (men, women, children) are onboard during the whole of the cargo operation. The cooking is done on deck. The daily fresh water consumption will increase by 20 tons to 25 tons. Fresh water is available by barge from the mainland.

This way of loading involves most ships; 7 to 9 ships can be handled simultaneously.

2. At the same anchorage as No. 1 above, the vessel will have alongside two floating elevators. A daily average of 13,000 tons can be reached, also depending on rain/swell. Many less people are involved. One ship at a time can be loaded.

3. Loading alongside a silo based on the mainland. The daily average here will be about 14,000 tons, however at a draft of about 40 ft. – 42 ft. the vessel will have to shift to the anchorage to complete loading as under 1 or 2 above, most probably No. 1. The silo belongs to 2 shippers of cargo only.

Trimming of cargo is done mainly by means of bulldozers but trimming by hand/shovel is often required additionally.

Holding ground at anchorage is good. Ships swing round on a rather strong tide. Wind/rain squalls are experienced.

SHIPMASTER'S REPORT: March 1984.

Pilotage: There is no longer a pilot vessel at the Bar. Instead, a peculiarly shaped red-painted lighthouse type beacon has been erected. This beacon has accommodation for the Pilots, who board vessels using a small grey pilot boat. Position of beacon Lat. 13° 22.8′ N., Long. 100° 35.9′ E. (BA Chart 1046).

Anchorages: Bangkok Bar Anchorage: Any ship with draft able to enter Bangkok Harbour, can anchor at this anchorage to wait its turn to enter. Limits of this anchorage are shown on BA Chart No. 1046. Ships proceed close to the beacon mentioned under "Pilotage", to pick up the Pilot.

Kohsichang Anchorage: There are no longer any N.E. or S.W. monsoon anchorages. Throughout the year Kohsichang Harbour limits are from the Island, East to Long. 101° 51.5′ E. and between Lat. 13° 08.9′ N. and Lat. 13° 11.3′ N. (Thai Chart No. 114).

AUTHORITY: Port Authority of Thailand, Klongtoi, Bangkok 11, Thailand. *Tel:* 2861021. *Telex:* Pat TH82171. *Cables:* Pat Bangkok. *Contact:* Verasakdi Dhanaphatana, Deputy Director-General (Operations).

AGENT: Jardine, Matheson (Thailand) Ltd., Shipping Agency Division, 1032/1–5 Rama IV Road, GPO Box 40, Bangkok. Tel: 286–9951. Telex: 2672 Jarthai. Cables: Jarocean.

KANTANG: 07.25 N. 99.31 E.

SHIPMASTER'S REPORT: April 1982.

PORT LIMITS: Vessels anchored in the bay between Ko Talibing and Ko Liang Hnua are considered to be "arrived ships".

DOCUMENTS:

6 Crew Lists.
4 Passenger Lists.
2 Store Lists (including dangerous drugs, explosives, bonded items, ship wireless sets, TV, radio, etc.).
2 Personal Property Declaration.
2 Cargo Manifests.

PILOTAGE: Not compulsory.

Due to shallow waters and absence of chart it is recommended to take the services of the local Pilot, though he speaks only local language. Pilotage distance is about 15 miles up the river.

Pilot boards at the anchorage and takes the vessel up to Kantang. Berthing is also done by him, but it is recommended that the Master does this himself.

ENTRANCE: No large scale chart is available. The only chart available is B.A. Chart No. 3942.

Keep well clear of Light Ko Liang and after passing Ko Liang Hnua on the starboard side keep equidistant from Ko Talibing and Ko Liang Hnua. Depth of water is about 10 m. up to Ko Liang Hnua Point (bearing 190°×4 miles approx.). This place is good for anchoring.

While going up and down river, there is a Customs check post at the mouth of the river and the vessel has to stop for Customs check and sign the register.

The maximum depth in the river at high water is about 5.5 m. at Springs and as low as 3.5 m. at Neaps.

The loading should be restricted as per the tidal conditions.

HEALTH: No Port Health Officer available. Hence Free Pratique not required.

RADIO: No way of communicating with the port from vessel. ETAs, etc. should be sent from the previous port by cable. On receipt of the ETA the local Agents will arrange berthing, etc.

VHF: Not available.

BERTHING: Berth is approximately 140 m. length. Hand leadline sounding at berth indicated depths minimum 10 ft. and maximum 16.5 ft. at low water and minimum 16 ft. and maximum 22.5 ft. at high water.

While the vessel is being loaded it sits on the bottom at low tide and again floats at high tide. The ground is soft sand. Since the vessel is not afloat at all times the cargo calculations and distribution should be accurate.

The main exports are cement in bags, fish meal and rubber in pellets which is mainly exported in LASH barges. The barges are loaded once a month. Generally half the wharf is occupied by LASH barges.

One oil berth also available. Small tankers with about 4 m. draft can go alongside.

CRANE: One mobile crane of 5 ton capacity is available. Priority given to loading LASH barges.

FRESH WATER: Available. Supplied by a small boat of 4 tons capacity.

FUEL: High speed diesel is available. Price is very high.

REPAIRS: Small repairs can be effected.

CONSULS: No consulates or embassies.

WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: MacGregor Hatches opened and closed by Crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: Supplied by the Stevedores.

REPATRIATION: No crew changes possible.

TELEPHONES: Trunk calls can be made from the main Telephone Exchange. Sometimes delays up to 1 hour is normal.

STORES: No ship chandler. Market is very close to the berth where fresh vegetables, pork, fish, beef and chicken available. No mutton available but live goats can be purchased.

PHUKET: 07.50 N. 98.25 E.

DOCUMENTS:

Entry documents and advance information.

Customs and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket will be sent in advance to the Agent at one of the previous ports together with request for the following information required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.

PILOTAGE: There is no official Pilot available.

ANCHORAGES: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from November through March, and periods of strong Easterly winds, vessels are recommended to anchor in position 7° 53′ N., 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores before proceeding to the actual anchorage for loading at position 7° 57′ N., 98° 33′ E., about one mile off Koh Yac Hyai, draft approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods cargo operation will be carried out at the first mentioned anchorage.

During the S.W. Monsoon season: Prevailing from April through October, and any periods of strong Westerly winds, vessels are recommended to anchor at position 7° 53′ N., 98° 27′ 15″ E. about 0.5 nautical mile off Laom Mai Pai, draft approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.

RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing buoy No. 3 on a rising tide (South to North) just before high tide.

Width of Channel: Minimum 230 ft. at buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Maximum 900 ft. at buoy No. 4 measured at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between buoy No. 6 and Koh Tapao Noi.

(2) The draft at buoy No. 6 is about 24 ft. 6 in. at Lowest HW.

(3) At buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pair is about 150 ft. and vessels are required to pass between these mooring buoys.

HEALTH: All crew and passengers must have valid health certificates for cholera.

RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow retransmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes retransmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables via the ship's radio reloading results, etc., subject to the Master's approval. The cost of all such cables is to be borne by the vessel.

TUGS: No tugs available.

BERTHING: At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position 7° 48′ 24″ N., 98° 25′ 12″ E. to await loading and favourable tide.

Dimensions of the pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in addition to which there is one fender at each end of the pier with solid rubber buffers.

Mooring buoys: There are two mooring buoys about 700 ft. apart each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors and the other is a General Hospital.

FRESH WATER: Limited and difficult to obtain.

FUEL: Limited and difficult to obtain.

CONSULS: None.

SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.

REPAIRS: No facilities.

SATTAHIP: (Military port, Royal Thai Navy).

Chuk Samet Port: 12° 37′ 00″ N. 100° 55′ 00″ E.

(See Plan Book)

Tungprong Port: 12° 41′ 58″ N. 100° 50′ 21″ E.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.

DOCUMENTS: See "Bangkok".

PILOTAGE: Recommended, working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.) Radio frequency used when handling the vessel is 27125 MHz.

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 MHz	Day time
Portsat	2738 MHz	Day time
	8292.5 kHz	R/T – SSB

VHF: Calling Channel 16 (156.8 MHz)
Calling Channel 14 (156.7 MHz)
Interport use 157.5 MHz (Special Channel)

ANCHORAGES: Anchorage area for waiting berth and Pilot:

Chuk Samet Port; Capacity: eight deep-draft ships minimum depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37′ 03″ N.	Lat. 12° 37′ 25″ N.
Long. 100° 55′ 00″ E.	Long. 100° 55′ 00″ E.

Tungprong Port; Capacity: four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43′ N.	Lat. 12° 45′ N.
Long. 100° 49′ E.	Long. 100° 49′ 30″ E.

Map Pier:

Lat. 12° 41′ 47″ N.	Long. 100° 50′ 31″ E.

RESTRICTIONS: Berthing day time only.
MAX. SIZE: See "Berthing".
TUGS: 2 tugs available, 3,000 h.p. Join when vessel approaches berth, charge for use of tug's lines.

BERTHING:
Limitation of Draft:
Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.
(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST
(2) For staying in port
32 ft.
2 ft. for under keel clearance
Draft=30 ft. at LWOST
(3) Draft of the vessel could be increased for the day alongside by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).
Tungprong Port: Depth 29.8 ft. below LWOST or 33 ft. below MLW. Draft of the vessel to enter and berth 27.8 ft. at LWOS.

	No. of Berths	*Max. LOA (ft.)*	*Depth (ft.)*	*Length (ft.)*	*Remarks*
Chuk Samet*	4	600	36	2,400	General Cargo
	1	600	36	216	Tanker
Tungprong	3	600	—	—	Ammunition

*See "Shipmaster's Report".
Cruise passenger ships are permitted to berth at Sattahip.
Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable is: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.
194 stevedoring contractors (both liner terms and chartered vessels under F.I.O. terms).
MEDICAL: Hospital facilities available.
TANKERS: Diameter of shore lines are 6 in., 12 in. and 20 in.
DENSITY: 1021.
FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.
FUEL: Available, supply can be made by barges, advance notice of ETA required.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.
CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.
CARGO GEAR: Supplied by stevedores.
IDENTIFICATION CARDS: Required for all crew and officers.
REPAIRS: Only for minor repairs.
TIME: GMT plus 7 hours throughout the year.
POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.
TELEPHONES: Available (U.S. military circuits).
SHORE LEAVE: Permitted.

DEVELOPMENTS: *Sattahip Deep-Sea Port:* Since Laem Chabang deep-sea port (see "Bangkok") will take years to construct, the Cabinet approved the improvement of a part of Sattahip naval base, about 184 km. S.E. of Bangkok to be used commercially.

The expansion plans for Sattahip port include construction of new piers and dredging aimed at providing facilities for bulk carriers and container ships of up to 120,000 d.w.t. It is also intended to equip the port to handle general cargo carriers for the intermediary period until the deep sea port project at Laem Chabang is completed.

SHIPMASTER'S REPORT: July 1981.
CHUK SAMET PORT:
For details concerning navigation, currents, clearance and documents, etc., see "B.A. Pilot No. 30" and "Guide to Port Entry".

Vessels approach on the beacon line at 017.5° (T), along the fairway marked by buoys. The beacons are installed on the pier and are easily visible. When entering and leaving, the cross current should be watched. The fairway buoys appear to be displaced somewhat Westwards.

Entry and Leaving: Only permitted between 0600 hrs. and 1800 hrs.

The Pilot comes from Bangkok. Also Authorities come from Bangkok for clearance.

A local Agent's office is not yet available, but will shortly be installed. Wireless traffic from the port with Bangkok is permitted.

There are two tugs of 3,600 h.p. available.

Max. Draft: At present 32 ft. is allowed.

The pier running approximately North – South is 500 m. long, and the cross pier 365 m. long. Both are well equipped with rubber type fenders. The free area on the pier in front of the sheds is about 45 m. wide.

Cargo Handling: Both cranes and the tapioca conveyor can run on the crane rails both on the main and cross piers. The large crane lifts up to 40 tonnes at 35 ft. The small crane lifts 23.5 tonnes but is currently out of use, but should be back in service shortly. The port has 20 forklift trucks, 10 at 3.4 tonnes, and 10 at 2.3 tonnes. Also there are 10 lorries type HINO KL 340 at 7 tonnes.

A Sea Container Shifter is already available, capacity 30 tons. For containers there are three 40 ft. and three 20 ft. spreaders in the equipment store.

Water: Any quantity available. Water must be boiled prior to use.
Bunkers: Only by road tanker.
Ship Repairs: None.
Ships' Chandler: Should be available.
Hospital: Available.
VHF: Port Authority on Channel 16.
Weather Conditions: During S.W. monsoon there is a slight swell. From May to July is the rainy season, with storms and typhoons occurring in June and July. Currents are unimportant. The tide rises about 2 m.
General: S.W. from Sattahip, in the Thailand Gulf, natural gas is obtained. A gas pipe-line from there to Sattahip is under construction. The line will then be taken overland from Sattahip to Bangkok.

A railway connection is being built. A road to Bangkok (approx. 180 km = approx. 3 hours by car) is available.

Further Developments: Dredging and building of new piers will begin.

A large Gottwald crane (mobile at 40 tonnes) is stated to have been ordered, and will be delivered in about 6 months.

It is planned later on to install a IHI container bridge, and sheds 1 and 2 will be demolished to make room for container handling.

AUTHORITY: Port Authority of Thailand, Klongtoi, Bangkok II, Thailand. *Tel:* 2861021. *Telex:* Pat Th 2171. *Cables:* Pat Bangkok.
AGENT: See "Sriracha."

SRIRACHA: 13.07 N. 100.52 E.

DOCUMENTS:
Boarding of Immigration, Customs and Quarantine Officials: The Immigration and Customs Officials will board all incoming vessels, whereas the Quarantine Official will board on arrival at berth. If however a vessel comes from an infected port the Quarantine Doctor will board. The Officials demand that the main gangway is lowered.
Order of Clearance and Documentary Requirements:
Customs Authority: (Ship's forms)
12 copies Cargo Manifest (including port and Agent's requirements).
5 copies Transit Cargo Manifest.
10 copies Crew List.
6 copies Ship's Stores.
6 copies List of Ship's Provisions, Steward, Deck and Engine Departments.
6 copies Foreign Currency List.
6 copies List of Arms and Ammunition for Ship's Use.
6 copies List of Opium and Narcotics.
6 copies List of Ports called.
6 copies List of Passengers.
6 copies List of Mail.
6 copies List of Crew members' Personal Effects stating brands and serial numbers of watches, cameras, TV/radio sets, electronic calculators, refrigerators, typewriters, all sound and electrical equipment, etc.
6 copies List of Ship's Movable Properties, to declare brands and serial numbers as above.

When preparing the list of Crew members' Personal Effects and ship's stores' lists, particular care should be paid to the exact quantities. Crew are allowed 200 cigarettes each, during the vessel's stay in port.

Failure to provide correct quantities on various forms will entail heavy fine and confiscation.

NOTE: Pornographic magazines and materials are prohibited and will be confiscated if found onboard.

Immigration Authority: For vessel having Thai Immigration Forms onboard, please prepare them ready for arrival. Otherwise Agency clerks will bring forms onboard and assist in completing them.
5 copies each of Immigration Form No. 3 (separately for *Landing* passengers and *Transit* passengers).
5 copies of Immigration Form No. 4 (Crew List).
2 copies of Immigration Form No. 35. Make out in duplicate, and 1 line for each name. Leave signature columns blank, where each crew member shall sign in presence of Immigration Officers in port.
1 copy Disembarkation/Embarkation card for each passenger, to be supplied in port.

Repatriation Crew holding valid passports may be declared as passengers in order to facilitate Immigration Exit papers. Otherwise we need one full working day for preparation of Immigration papers (Sat/Sun/Holiday excepted).

Quarantine Authority:
1 copy of Maritime Declaration of Health (may be supplied in port).
2 copies of lists certifying the date of vaccination against Cholera and Smallpox, for each crew member.
1 copy of Derat Certificate.
International Certificates of Vaccination 'Cholera and Smallpox' for all passengers and crew members.

Important to Master: On first arrival at Roads or berth do not allow any unauthorised people to board the vessel or allow any officers/crew members to disembark before 'Checking In' formalities by Immigration Officers and Customs Searching Party. Offence in this respect is liable to a fine not exceeding Baht. 5,000.00.

Departure: The 'Blue Peter' flag should be hoisted at the foremast of all sea-going vessels about to leave the harbour and shall be kept hoisted until the voyage has begun. In the case of vessels leaving in the afternoon, the flag shall be hoisted in the morning, in case of those leaving in the morning, the flag shall hoisted on the previous afternoon. Failure to comply with the regulations is subject to a fine not exceeding Baht. 5,000.00.

PILOTAGE: Compulsory, and during daylight hours only. Harbour Department Pilot and TORC Marine Supervisor will board about 2 miles East of Ko Thai Ta Mun light which lies South of the island of Ko Sichang in position Lat. 13° 06.5′ N., Long. 100° 48.4′ E.

Sriracha Government Pilot can be contacted directly via VHF Channel 16 within 30 miles radius.

On receipt of an accurate ETA vessel will be advised by VHF regarding berthing time, whether to anchor and any likely delays. Flags indicating a request for a Pilot or Pilot on board should be flown. Accommodation ladder required (or in conjunction with pilot ladder).

APPROACHES: The recommended courses approaching seaberth through the Southern part of Ko-Sichang are as follows:

from Junction point named "B"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	True Course =360°
to Junction point named "B"	Lat. 12° 62′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	True Course =022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 462 12″ E.	True Course =037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Long. 100° 51′ 00″ E.	
from Point "D" A/C to 000°(T) up to Anchorage Area or Point "E"		
Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.	

ANCHORAGES: Recommended anchorage for vessels awaiting berth is within 1 mile of the position: Lat. 11° 04.8′ N., Long. 100° 51.0′ E. Refer Admiralty Chart No. 3965 and 986.

RESTRICTIONS: Tankers berth in daytime only.

MAX. SIZE: Length 870 ft., max. draft 44 ft. plus height of tide above datum less 2 ft. U.K.C. Also see "Berthing".

MBK Bulk berth: 150,000 d.w.t. Draft 14.3 m.

HEALTH: See "Documents".

RADIO: *Commercial Radio Telegraphy:* (Tel: 588-0844)
"BANGKOK RADIO".

Medium wave: Call sign HSA (Hotel Sierra Alpha).
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 500 kHz and 512 kHz.

Short wave: Call sign HSA 2 and HSA 3.
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 8686 kHz, 8573 kHz and 12800 kHz.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 48 and 24 hours before arrival.

The first notice of arrival is to contain the following information:
Last Port of Call.
ETA Pilot Sation.
Best trimmable arrival S.W. draft.
Number of crew including the Master and his name.
Number of passengers, landing and transit.
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, passport number).
Cash required, if any.
Crew liberty launch service, if any.

TUGS: 2×2,500 h.p. in the area but are not always available at Sriracha. One for berthing and unberthing (sometimes standing-by only). Ordering of tug depends on Pilot and Master in light of prevailing conditions. Tugs are used for berthing/unberthing at the Esso CBM.

BERTHING: See "Shipmaster's Report".

TANKERS: *TORC:* A 6 buoy conventional mooring owned and operated by Thai Oil Refinery Co. Ltd.

Vessel berths heading in either direction depending on the tide at the time of arrival. The TORC Sea Berth is arranged to accommodate a tanker of max. LOA 870 ft., and the present draft restrictions for berthing vessels is 44 ft. plus tidal height above datum (LWL) minus 2 ft. under keel clearance. If arrival draft exceeds 44 ft. discharge should be commenced with minimum delay in order to maximise under keel clearance during initial low water period.

The Marine Supervisor will remain on board as a liaison between ship and shore until clear of berth.

TORC Crude Berthing/Discharge Requirements: Conventional buoy mooring (CBM).

2. Position of berth: Lat. 13° 07.5′ N., Long. 100° 52.5′ E.

3. Size of crude tankers: Minimum 30,000 d.w.t., maximum 120,000 d.w.t. with LOA not exceeding 870 ft.

4. Max. safe draft 44 ft. plus height of water above Lowest Low Water of the day minus 2 ft. under keel clearance.

5. Distance from bow to centre of manifold maximum 435 ft.

6. Mooring requirements: 2 ship's ropes are secured to each of 3 head and 3 stern buoys backed up by 2 ship's wires or ropes as available. 1 anchor is used depending on which side is offshore. It is to be ensured that the vessels mooring lines are suitable for securing her in all weather conditions, as agreed with TORC Marine Supervisor.

7. Discharge line 3×12 in. hoses for crude (connecting to 24 in. submarine pipe-line) can be connected to either port or starboard ship's manifold as vessels berth heading in either direction, depending on the tide at time of arrival. White oils handled through 1×12 in. line and 2×12 in. hoses. Derrick SWL 10 tons required for raising submarine hoses.

8. Discharge rate 3,600 cu.m./hr. and discharging back pressure restricted to maximum 10 kg. at ship's manifold. For MCP minimum back pressure of 9 kg. is required depending on crude type.

9. All vessels calling at Sriracha to discharge crude oil at TORC's CBM are required to comply with current ISGOTT, IMO and Marpol protocol recommendations, for instance:
(1) Be equipped with IGS where applicable.
(2) Tank cleaning machines for COW purpose.
(3) Dedicate clean ballast tanks where applicable.

10. Ships will be requested to take in ballast whilst occupying the berth in order to reduce as much as possible the light ship conditions at this weather-exposed CBM. In addition to clean ballast, vessels may be instructed to cease discharge during adverse weather conditions for ballasting into empty cargo tanks which have already been COW.

11. 3 tugs of 2,500 h.p. each are available in the area but utilisation depends on Master and Pilot in light of prevailing conditions. Mooring and unmooring of vessels are compulsorily carried out by Government Pilots.

12. Berthing and discharge operations of vessels are monitored as is normal international oil industry practice, the vessel's performance being recorded and agreed between Master and TORC Marine Supervisor against targets established before discharge commences.

Esso: 6 buoy conventional mooring owned and operated by Esso Standard Thailand Ltd. Vessels berth heading in either direction depending on the tide at the time of arrival.

2 ship's moorings required to each of 2 head and 2 stern buoys and one ship's mooring to each of 2 breast buoys. These are supplemented by 1 shore "preventer" wire from the 2 head and 2 stern buoys.

1×32 in. submarine line for crude oil with 2 strings of 12 in. hoses.

Ballasting is required during discharge to maintain 30% deadweight at all times. Additional ballast may be required during the S.W. monsoon period 1st June to 31st October. Technical test data for winches/wires required on arrival.

PTT: The PTT Sea Berth consists of a concrete platform with two breasting dolphins and mooring buoys for head and stern lines.

Vessels berth heading in either direction depending on current direction, using seaward anchor.

Mooring: 3 head/stern ropes, 3 forward and aft backsprings plus one buoy rope to seaward buoy aft.

Night berthing not recommended in view of unlit buoys and platform.

Vessels programmed to this sea island berth are advised that it is to be regarded as an offshore buoy berth as far as shore facilities are concerned. Access to/from the shore should be by accommodation ladder rigged on the offshore side of the vessel.

In common with offshore buoy berths and in the absence of any shore standby craft, the vessel's lifeboats to be used for emergency evacuation of personnel.

PTT Sea Island berth currently only handles high flash point products, i.e. fuel and gasoils.

General: Qatar Crude Discharge: Considerable delay can be encountered in the discharge of Qatar Crude.

In this connection your attention is particularly drawn to any advice given to you on arrival by the Thai Oil Refinery Representative.

Back Loading from Coasters: Occasionally vessels are required to load cargo from 2,000/4,000 ton coasters at Sriracha. Loading a full cargo could take 3 to 4 days and Masters should bear this in mind for bunker and fresh water calculations.

Lightening to coasters to make Bangkok Bar draft: On arrival there is no VHF contact with shore, as vessel does not take a Pilot, and so should proceed straight to an anchorage within about half a mile of position 13° 07.6′ N., 100° 50.9′ E. There may be other vessels in this area engaged in ship/ship transfer. Do not rig an accommodation ladder, as four Yokohama rubber fenders are brought straight out to the vessel, and 2 lashed each side midships. Shore officials will board via the pilot ladder to clear the vessel inwards. Accommodation is required for 2 Police Officers (one room) and 2 Supervisors with one Customs Officer (a second room) throughout the vessel's stay. 8 in. hoses are brought out on the first coasters, connected by a seven man hose handling gang, and left connected to the ship's manifold throughout the operations; the gang handles all hose connecting, and mooring, with a crane driver provided by the ship. This gang stays onboard most of the time and need to be allocated a smoking area. The coasters are programmed by Bangkok – copies of the programme being put onboard on arrival – and can be handled simultaneously one each side. If 2 products are involved usually one side is allocated for a particular product. The coasters moor with lightweight polypropylene lines and are well handled and efficient, capable of loading at about 1,250 tonnes/p.h. There are 4×2,000 d.w.tonnes, and 1×3,500 d.w.tonnes coasters with a round trip taking about 24 hours from departure to return alongside.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge. 24 hours' notice required.

FUEL: Can be supplied by barge. 48 hours' notice required.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

IDENTIFICATION CARDS: Required for all officers and crew.

CONSULS: See "Bangkok".

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

DEVELOPMENTS: A project for a new deep-sea port at Sriracha has been approved and is under survey.

Thai Oil Refinery Co. may build 2 new berths for 6,000 d.w.t. product carriers.

SHIPMASTER'S REPORT: March 1984.

Loading of Tapioca Pellets in bulk at MBK berth:

Vessel: LOA 243.6 m., beam 32.3 m., deck over keel 18.6 m., draft 13.51 m. = t.d.w. 74,010 tonnes, 8 holds.

Silo with a berth called MBK Berth (Mah Boon Krong), operated by Cargill Ltd., has been in existence for about 6 years.

The berth consists of 3 loading towers with sufficient mooring posts at both ends. Location of berth: Lat. 13° 08.2′ N., Long. 100° 53.1′ E. Distance from shore: 1.6 miles. Distance between towers: 50 m. Radius of loading booms: 32 m. Total loading range: 166 m. Depth of water alongside: 12.8 m. at LW. Loading capacity: Loading with 1 tower 350 t.p.h. Loading capacity with 2-3 towers 600 t.p.h.

A vessel of our size has to be shifted for loading the end holds.

The loading spouts are equipped with trimming machines. The only connection to the shore is a conveyor belt of 2.8 km. length which cannot be used for traffic. All traffic is carried out by boats. Therefore gangways on both sides to be used.

A Pilot/Berthing Master brings the vessel alongside. Berthing with 2 tugs, bow to the North and starboard alongside using the port anchor.

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan Book)

PORT LIMITS: In accordance with the terms of Charter party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

DOCUMENTS:
2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last 2 Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests (if no cargo for Kpeme, 2 lists stating same).

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty. Pilot boards out at the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme pilot station" on Channel 16. Pilot boat grey motor boat without special signals.

APPROACHES: By day the extremity of the jetty (three artificial islands and two loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

ANCHORAGE: Good holding ground (sand and mud) between 14 m. and 16 m.

RESTRICTIONS: Vessels should twice signal the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 hrs. – 1530 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. After winches to be in perfect order.

MAX. SIZE: Tankers up to 27 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Max. length 220 m. Max. breadth 32 m. Height from waterline to hatch coaming 15.0 m.

HEALTH: Send message for Free Pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16. Also see "Pilotage".

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor first and then the starboard anchor, and wires to 7 buoys which hold the ship parallel to the dolphins and about 20 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses to be ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available. Gas oil available at Lome.

MEDICAL: Doctor of the Office Togolais des Phosphates at the Factory.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 oz. tobacco; 1 bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: No facilities exist for effecting crew changes. However, in emergencies repatriation can be arranged.

AIRPORT: Nearest Lome – 4 flights a week to Europe.

TIME: GMT.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Not allowed.

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

Vessels do not berth with an Easterly current.

AUTHORITY: Office Togolais des Phosphates, B.P. 379, Lome, Togo. *Tel:* Lome 21.39.01 *Telex:* 5214 Fosfat To. *Contact:* Commandant Genest, Harbour Master.

LOME: 06.08 N. 01.17 E. (See Plan Book)

DOCUMENTS:
13 Crew Lists.
5 Kroo-boy Lists.
5 Passenger Lists.
4 Lists Previous Port of Call.
1 Maritime Declaration of Health.
1 List of vaccinations.
3 Crew effects Lists.
1 List of arms and ammunition.

APPROACHES: The approach to the port, by night, is assisted by 3 lights:

(1) *Baguida* (position: Lat. 06° 09.5′ N., Long. 01° 19.5′ E.) occulting white and red. Lt. 2.5 secs., occ. 0.5 sec. period 3 sec. Vis. 17 miles. Sector: red 042°, covers the breakwater as well as the old Lome Wharf (position: Lat. 06° 07′ N., Long. 01° 13.5′ E.).

(2) *Lome Togo-Port* situated on head of West breakwater (position: Lat. 06° 08′ N., Long. 01° 17.5′ E.). Qk. Fl. (4) white and red every 10 sec. Vis. 5 miles. Red light sector covers only old wharf and is not visible seawards.

(3) *Lome Light* situated near town of Lome (position: Lat. 06° 07′ N., Long. 01° 13′ E.). Group Fl. (2) white every 10 sec. Vis. 15 miles all around horizon.

By day, large, light-coloured transit sheds and a high, grey water tower (position: Lat. 06° 08.5′ N., Long. 01° 16.5′ E.) are the first indications of port from seawards.

PILOTAGE: Pilots available 7 days a week from 0600 hrs. to 2100 hrs. for vessels to enter. Sailing possible at anytime but if sailing after midnight Agent has to advise pilot station before 2200 hrs. Pilot station equipped radio and works 24 hours per day on Channel 16. Pilot boat green motorboat with orange superstructure and international flag "H". Pilot boards 0.5 mile to 1 mile S.E. of breakwater.

ANCHORAGE: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 8 fathoms, where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime.

MAX. SIZE: Max. length 900 ft. (270 m.). Max. draft for tankers 39 ft. and bulk carriers 38 ft.

Also see "Berthing".

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which will declare vessel Free or not. Vessels entering must fly international quarantine signal "Q". Large hospital situated in Lome with doctors in attendance.

RADIO: Port operations carried out on VHF Channel 16,14 and 12, with range of approximately 30 miles. Aero beacon (position: Lat. 06° 10.7′ N., Long. 01° 16.3′ E.) call sign "LME" on 379 kHz.

TUGS: 2 tugs, 960 and 3,200 h.p. available. For vessels of more than 500 g.r.t. tug is obligatory when berthing or unberthing.

BERTHING: Berth Nos. 1 – 4: Berthing length 366 m., depth 10 m. 9 electric cranes up to 10 tonnes capacity.

New Quay: Length 250 m., width 140 m., depth 11.0 m. Container and Ro-Ro vessels handled.

The port has a grain hopper and vacuvator in use.

See "Tankers" and "Shipmaster's Report".

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required. Agents should advise pilot station of vessel's ETA.

TANKERS: Togo-Port has sea pipe-line belonging to the Societe Togolaise d'Entreposage. Tankers should moor at 3 large mooring buoys outside breakwater. Diameter of pipe-line 8 in. Discharging about 230 t.p.h. (depending on ship's-pumps). Max. length which can be handled at buoys is 720 ft. (220 m.) max. draft 31 ft. (9.5 m.).

Societe Togolaise des Hydrocarbures:
Max. Size: LOA – 250 m. Draft 39 ft.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.
Restrictions: Berthing and unberthing at any stage of the tide. Berthing during daylight hours only, unberthing anytime.

Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ d'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Hoses Size (in.)*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosine	Yellow-Ash	4200	600		1	6
Benzene	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 45 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

FUEL: Diesel fuel available for small craft, such as fishing vessels, small motor-ships and tugs.

Gas oil available in any quantity.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform.

OPENING/CLOSING HATCHES: Either ship's crew or dockworkers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCES: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: No extraordinary regulations. No cranes available and ships' own gear used for discharging and loading.

IDENTIFICATION CARDS: Shore landing passes issued by port police and should be supplemented by personal ID-Cards.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only.

DRY DOCKS: Not available at present, but a slip for small vessels is included in future development.

AIRPORT: Lome airport with daily flights to Europe.

SEAMEN'S CLUB: A modern Seamen's Club with swimming pool, bar and library situated 0.5 mile from port.

TIME: GMT throughout year.

HOLIDAYS: New Year's Day (1st January); Independence Day (27th April); Labour Day (1st May); Christmas Day (25th December). All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: Push-button fire alarms situated in every shed and on exterior South wall of shed "B". Telephone for contacting Police, Fire-Station or Hospital available day and night in Harbour Master's Office.

TELEPHONES: 3 public telephones within the port limits. No telephones on board.

SERVICES: No tank cleaning or compass adjusting available.

DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.

GENERAL: Distance from port to Lome city-centre is 4 miles. Taxis available at entrance of port.

SHIPMASTER'S REPORT: July 1978.

Documents: A mooring boat is available to Agents for the collection of documents on the Roads given prior notice.

Max. Size: Berth No. 1 depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3 depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6 (New oil pier), depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.

Health: Free Pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.

Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.

Tugs: There is an additional tug 3,000 h.p., 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.

Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.

Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.

Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear will be in use shortly (July, 1978).

Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.

Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.

Seaman's Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a Dutch pastor and under German control and has a VHF set for communication with vessels in the Roads. It is open to non-seafarers.

Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.

Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels in the Roads. Container ships have a priority.

Working Hours: Gangs work 0600 to 1400 hrs.; 1400 to 2200 hrs. and 2200 to 0600 hrs. daily except, there is no 2200 to 0600 hrs. shift on Sunday nights. Each has a half hour break after 4 hours working.

Surveyors: The Port Captain and Senior Pilot, represents Germanischer Lloyd. There is no Lloyd's representative.

General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors passes.

AUTHORITY: Port Autonome de Lome.

AGENT: Socopao Togo, B.P. 821, Lome. Tel. 21.55.88; Telex 5330 (Maritime) and 5205. Cables, "Freight Lome".

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan Book)

DOCUMENTS:

Immigration Dept:
- 2 Crew Lists.
- 2 Passenger Lists.

Customs Dept:
- 2 Crew Lists.
- 2 Passenger Lists.
- 1 Bond List.
- 3 Cargo Manifests.

Agents:
- 1 Crew List.
- 1 Passenger List.
- 3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at pilot station. This position is indicated on B.A. Chart (Approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 500 ft.

Vessels may anchor in the vicinity of No. 1 Buoy if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Harbour Master.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio Pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: No tug is required for berthing, but a tug is available in case of breakdown.

BERTHING: Queen Salote Wharf, only wharf in use. Vuna Wharf damaged by an earthquake in 1977 and as yet has not been repaired.

Queen Salote Wharf is expected to be extended by 1984.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Harbour Master at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available ex-Queen Salote Wharf at 25 t.p.h. delivery.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. Harbour Master may require to inspect cargo gear record.

CUSTOMS ALLOWANCES: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

IDENTIFICATION CARDS: Not necessary.

CONSULS: None.

REPAIRS: Repairs can be carried out in the marine workshop.

REPATRIATION: No facilities.

AIRPORT: 14 miles from town. Flights to and from Suva on Tuesdays, Thursdays, Fridays and Saturdays. There are also flights to New Zealand, same days as Suva.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Official Holidays are: Christmas Day; Boxing Day; Good Friday; New Year's Day; Easter Monday; Anzac Day; Emancipation Day (June 4th); Constitution Day (4th November); H.M. Queen Elizabeth's Birthday; King's Birthday (July 4th).

POLICE/AMBULANCE/FIRE: Telephone numbers not necessary. Just ask for the Department required.

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

DEVELOPMENTS: Queen Salote Wharf to be extended to at least 600 ft. On completion in 1984 a cruise ship, cargo vessel and an inland trader will be able to berth alongside at the same time. Land is to be reclaimed on the Eastern and Western sides of the Wharf.

AUTHORITY: Harbour Master, Nuku'alofa.

Trinidad

BRIGHTON (Texaco Oil Terminal): 10.15 N. 61.38 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
ANCHORAGE: Good holding ground in roadstead. Loading pier situated Lat. 10° 15′ N., Long. 61° 38′ W., extending in a N.W. direction for 2,010 ft.
RESTRICTIONS/MAX. SIZE: Outer Berth East, 29 ft. 6 in. MLWST; Outer Berth West, 24 ft. 6 in. MLWST; Centre Berth East, 21 ft. 6 in. MLWST; Centre Berth West, 21 ft. 6 in. MLWST; Inner Berth West, 21 ft. 6 in. MLWST.
TUGS: Not used. Launch assists with lines.
STEVEDORES: Supplied by Agent if necessary for loading Asphalt in drums only.
MEDICAL: All facilities available.
FRESH WATER: Available only at berth. Pumping rate 15 – 20 t.p.h.
FUEL: All grades of fuel alongside or by barge.
GANGWAY/DECK WATCHMEN: Customs guard on 24 hours duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes and moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
DELAYS: Not usual.
AUTHORITY: Lake Asphalt of Trinidad & Tobago (1978) Ltd., Brighton, La Brea, Trinidad, W.I. *Tel:* 648-7556, 648-7477. *Telex:* 3374 Asphalt. *Cables:* Trinfalt. *Contact:* Ainsley Nichols, General Manager.
AGENT: See "Port of Spain".

CHAGUARAMAS: 10.40 N. 61.39 W.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory. Pilots board in Chaguaramas Bay – 10° 46′ N., 61° 43′ W.
ANCHORAGE: Safe anchorage in Chaguaramas Bay between mainland and Gaspar Grande Island about 0.5 miles off the dock.
RESTRICTIONS/MAX. SIZE: No restrictions on night operations. 2 docks – main wharf with overhead cranes for loading and discharging bauxite – 960 ft. long, max. draft 32 ft. Smaller wharf – 400 ft., draft 25 ft.
TUGS: Not used. Launch assists in mooring.
STEVEDORES: Not necessary. All loading/discharging done by Chaguaramas Terminals employees.
MEDICAL: All facilities available.
FRESH WATER: Available from dock, 40 t.p.h. Also supplied by barge.
FUEL: Can be delivered from dock or supplied by barge.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CARGO GEAR: Loading by travelling tower, rate 1,000 t.p.h. Conveyor system. Discharging – carried out with travelling rig of 2×4 ton grabs. Conveyor system.
REPAIRS/FLOATING DOCK: Operated by Swan Hunter Docks. Displacing up to 11,380 tons, 560 ft. long vessels. Also good berthing alongside, draft to 35 ft., and a safe close anchorage, draft 50 ft. General extensive repairs undertaken.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Chaguaramas Terminals Limited, Pointe Gourde, Trinidad.

Mailing Address: P.O.Box 608, Port-of-Spain, Trinidad. *Tel:* 637-4494/5. *Telex:* (294) 3288 (Answerback 288 Chag Wg). *Cables:* Chagterms-Port-of-Spain-Trinidad. *Contact:* General Manager.
AGENT: See "Port of Spain".

CRONSTADT ISLAND: 10.39 N. 61.38 W. (See Plan Book)

Terminal owned and operated by Baroid Trinidad Services Ltd., handling bulk barytes and general oilfield supplies.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas for clearance formalities.
DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
TUGS: One tug used for berthing if required.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 350 ft. length. This size vessel would overhang wharf approx. 80 ft. fore and aft. Depth alongside 13.7 m. Longer vessels can be accommodated with special clearance.
BERTHING: Vessel moored with 2 springs, 3 head and stern lines to dock. Discharging carried out with 15 ton shore crane and grab bucket with 3 yards with capacity for bulk ore.
FRESH WATER: Available by barge.
FUEL: Available by barge.
AUTHORITY: Baroid Trinidad Services Ltd., 59 Sackville Street, P.O.Box 765, Port-of-Spain, Trinidad. *Tel:* 62-51691/2/3, 62-52584. *Telex:* 3446 Baroid WG. *Contact:* C. Fuller, Assistant General Manager.
AGENT: See "Port of Spain".

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan Book)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., and Long. 60° 59′ 30″ W. The lighthouse, situated on top of the point, exhibits a light 240 ft. above sea level which flashes white every 5 seconds and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per second), red light, 10 ft. high, and visible for 4 miles through 360°
DOCUMENTS:
- Health Declaration (International Health Form to be filled out by Master on arrival.)
- Derat or Exemption Certificate.
- Crew List (4).
- Crew Customs Declaration (2).
- Register.
- Store List (2) (Signed by Master).
- Passenger Manifest (2) (If any passengers are aboard).
- Bonded Store List.
- Clearance from last Port.
- Manifest (if no cargo, a statement that vessel is in ballast).

ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.
1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel on mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile South-west of the buoy.
4. *Tankers to have ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tanker's valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety or Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.
APPROACHES:
Port Limits: Approaching vessels should never anchor to the East or North-east of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10′ 24″ N., and Long. 60° 39′ 56″ W., enters the Galeota Point area about half a mile Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.
Navigational Aids: Galeota Point lighthouse is located in 10° 08′ 00″ N., and 60° 59′ 30″ W., and exhibits a white flashing light every 5 seconds and is visible for 22 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05′ 47″ N., and Long. 61° 00′ 45″ W.

Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 mile Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 mile due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ N., and Long. 61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme low water.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1.	Teak "A"	Lat. 10° 10′ 24″ N.,	Long. 60° 39′ 56″ W.
2.	Teak "B"	Lat. 10° 11′ 41″ N.,	Long. 60° 39′ 55″ W.
3.	Teak "C"	Lat. 10° 10′ 29″ N.,	Long. 60° 40′ 36″ W.
4.	Teak "D"	Lat. 10° 02′ 12″ N.,	Long. 60° 38′ 54″ W.
5.	Teak "E"	Lat. 10° 10′ 26″ N.,	Long. 60° 39′ 55″ W.
6.	Samaan "A"	Lat. 10° 20′ 30″ N.,	Long. 60° 40′ 47″ W.
7.	Samaan "B"	Lat. 10° 19′ 46″ N.,	Long. 60° 41′ 04″ W.
8.	Samaan "C"	Lat. 10° 19′ 47″ N.,	Long. 60° 41′ 35″ W.
9.	Poui "A"	Lat. 10° 06′ 35″ N.,	Long. 60° 49′ 47″ W.
10.	Poui "B"	Lat. 10° 06′ 55″ N.,	Long. 60° 49′ 02″ W.
11.	Tesoro "A"	Lat. 10° 11′ 05″ N.,	Long. 60° 54′ 59″ W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigand Hill is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 seconds and visible for 35 miles.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles Northwest of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*		*Frequency*	*Hours*
North	9YL	(H.F.)	17,184 kHz	1200 hrs. – 1530 hrs. (GMT)
Post		(H.F.)	12,885 kHz	1330 hrs. – 2050 hrs. (GMT)
Radio		(H.F.)	8,710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(H.F.)	6,470 kHz	2300 hrs.
		(M.F.)	476 kHz	0300 hrs. and every 4 hrs. thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kHz and operates with Amoco's marine units on 2398 kHz.

Ships equipped with FM/VHF radios may call Galeota Point on 156.8 MHz = Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's Readiness to Load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (see "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipe-line from shore to the SBM which is 2.6 miles offshore. The ballast water is pumped ashore through a 16 in. submarine line. The buoy piping consists of 2×20 in. diameter pipes for crude and 1×16 in. diameter pipe for deballasting with 2 by-pass valves. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.80 m. high, and equipped with a navigation light and radar reflector. There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. Galeota Terminal has 2 ballast water pits which are equipped with oil skimming equipment to accommodate any ballast water. The tanker may discharge ballast as desired into the proper line as soon as all arrangements have been made for this action.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyd's, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 b.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Notice of Readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

Deballasting Control: As soon as the vessel is ready to deballast and the line connections have been made, the manifold valves should be opened and the shore notified. Upon advice from the Terminal, ship may begin discharging ballast into shore line. Line pressures should not exceed 120 p.s.i. This corresponds to a flow rate of 800/1,000 t.p.h.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. On advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical or hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is 2 hour's drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping
Grell and Company Ltd.,
60 St. Vincent Street,
Port of Spain

Lloyds Register of Shipping
Geo. F. Huggins and Co. Ltd.,
72 – 74 South Quay
Port of Spain

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

SHORE LEAVE: Shore leave for personnel of vessels loading or unloading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It will be well to remember that Amoco *does not have* any tug or floating vessel in the area equipped with fire-fighting apparatus.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the North-east trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than one mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the North-east and East (about 90% of the time). The mean velocity is about 8/12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 ft. – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the North-east trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 ft. – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the North-west 53%, North 24%, and N.N.W. 14%. The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75°F to 80°F in the Winter months and 80°F to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the South-west tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Autumn at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

GENERAL:

Government Officials: Trinidad and Tobago Customs officials will be stationed at Galeota and in most instances the Customs officer will also handle the duties of the Quarantine and Immigration officers. Should Customs guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes' drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by night, with a red flashing light mounted on the seaward end of the jetty.

Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.

OPERATOR: Amoco Trinidad Oil Company.

AGENT: See "Port of Spain".

POINTE-A-PIERRE (Texaco Oil Terminal and Refinery): 10.19 N. 61.29 W. (See Plan Book)

DOCUMENTS:

5 Copies Crew List.
4 Copies Stores List.
1 Copy Unmanifested Cargo.
2 Copies Crew Declaration.
1 Copy Declaration of Health.
1 Copy Arrival Report.
1 Copy Firearms & Ammunition List.
Derat Certificate.

Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot boards from tug. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

If vessel proceeding to SPM, Pilot boards 2 miles West of SPM. If vessel proceeding to berths Pilot boards 1.2 miles S.E. of SPM.

ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipe-lines supported by reinforced concrete piling, located at Lat. 10° 20′ N., Long. 61° 30′ W. and extends in a W.S.W. direction for 6,190 ft.

RESTRICTIONS: Controlling depth in main channel 42 ft. No entry restrictions day or night. However, Free Pratique must be obtained, crew lists, stores lists, etc., to be presented to local Agents on arrival. Arriving vessels must contact Texmarine, Pointe-a-Pierre on VHF Channel 16 two hours prior to arrival for berthing instructions, traffic information, cargo nominations etc.

MAX. SIZE: Max. draft at SPM 73 ft. 6 in.

Also see "Shipmaster's Reports" and "Developments".

HEALTH: See "Port-of-Spain".

TUGS: Texaco Trinidad Inc. maintains 3 tugs to assist in berthing.

RADIO: Vessels to send ETA messages 72, 48 and 24 hours prior to arrival to "Texmarine San Fernando". Messages should be sent through one of the following: Chatham (USA), North Post (Trinidad), Barbados or Curacao.

VHF: Texaco Trinidad Inc. maintains their own radio station (24 hours). Call "Texmarine Pointe-a-Pierre" on Channel 16, working Channel 13. If at SPM – Channels 6 and 10.

BERTHING:

Berth No.	*Max. Permissible Draft* (ft.)	*LOA* (ft.)	*D.W.T.*	*Remarks*
1	37.5	720	50,000	
2 (North)	37.0	775	63,000	
2 (South)	22.0	—	—	Small vessels and barges only
3 (North)	35.0	640	35,000	
3 (South)	—	—	—	For barges only
4	23.0	360	—	
5 (Sea Island)	39.0	900	100,000

7	36.0	700	35,000	
7	36.0	700	35,000	
8 (General Cargo)	28.5	700 (pier length) 70 (pier width)	25,000	
SPM	73.5	—	286,000	

DISCHARGING:

Maximising Cargo Discharge (Squeeze Dry Operations): Due to the current high costs of crude oil the following guidelines have been compiled which should be followed by all Owned, Managed and Time Chartered vessels at every cargo discharge operation in order to maximise cargo outturn. Special importance should be attached to the discharge immediately preceeding shipyarding. A Representative from the Company will attend vessels periodically in order to advise and assist as required.

General Guidelines for Maximising Cargo Discharge:

1. Inerted vessels capable of Crude Oil Washing must strictly follow the routines set out in their Tank-cleaning Manuals. Owned, Managed and Time Chartered vessels should COW all cargo and slop tanks prior to shipyarding. TC vessels should also COW all cargo and slop tanks prior to re-delivery.
2. Stripping operation to be performed twice, first during normal discharge and the second time after all cargo (except partial contents in the aftermost (slop) tank) has been discharged ashore. The Inspector must ensure that vessel is adequately trimmed by the stern during all stripping operations.
3. On completion of normal discharge (except for partial contents in aftermost (slop) tank) and second stripping of all tanks, contents of main deck and drop lines and loading arm connections must be stripped to slop tank. (NB: Air or tank atmosphere must be used to break the vacuum).
4. Line content in all main suction lines must also be dropped into aftermost tanks and all main suction valves in tanks opened to drain suction elbows. On completion of dumping line contents, stripping system to be used to drain cargo remaining in the suction system and pumps back to the slop tank, with tank suction shut.

   This is best achieved by commoning up all main cargo pipe-lines on the suction side of the main cargo pumps, opening the suction valves to these pumps and cross connecting the suction side of the stripping system to the main cargo line.
5. Where available, open by-pass valves connecting discharge side with suction side of main cargo pumps.

   Note: When vacuum starts building up in the suction system, allow tank atmosphere to enter the pipe-lines by opening a suction valve in a forward tank.

   It is recommended that one hose or loading arm remains connected to the manifold to which the small diameter deck stripping line (where available) discharges into. This line discharges outboard of the vessel's manifold valve, which of course is left shut during final discharge ashore of slop tank contents using stripping system.
6. The reasons for stripping back line and final tank contents to the aftermost (slop) tank rather than direct to shore are that:
   (a) Operator has better idea when suction is lost (by seeing no increase in slop tank ullage).
   (b) Accurate measurements can be made of total quantity of cargo recovered by operation "Squeeze Dry".
7. On completion of final line and tank draining, discharge contents of aftermost (slop) tank ashore via small diameter deck stripping line, where fitted, or via main discharge line where not.

Check List for Line Draining – Operation "Squeeze Dry":

1. Are following design features available to improve line draining:
   (a) By-pass to connect discharge side with suction side of main cargo pumps?
   (b) Connections from stripping system to both suction and discharge lines of main cargo pumps?
   (c) Vent valves in deck lines near manifold?
   (d) Suction and discharge pressure gauges and stroke counters in stripping pumps?
   (e) Small diameter deck line, for final draining?
   (f) Block valves in stripping line system?
2. Is cargo discharge *completely* finished and all cargo tanks checked by dipping to be well drained?
3. Have contents of tank washing line that was used for COW been properly dropped into slop tank?
4. Are all manifold valves with shore connection (except one if no small diameter line available) open?
5. Are all valves in deck, pumproom and drop lines open?
6. Are all valves (except tank valves during line draining) in suction lines open?
7. Are all lines dropped in aftermost (slop) tanks?
8. Has air/inert gas been allowed to enter to vessel's line system both at forward end of bottom lines and in the manifold area?
9. Are stroke counters (where fitted), suction and delivery pressure gauges of drain pumps working correctly?
10. Has dropping operation been checked by measuring oil level in aftermost holding or slop tank/tanks?
11. Have all manifold valves been shut after dropping operation?
12. Has valve in small diameter deck line been opened, or where not fitted, has "final" manifold valve been opened?
13. Have stripping pumps been set correctly to drain holding or slop tank ashore through small diameter line (or deck line)?
14. Have all lines in cargo tanks, on deck and in pumproom been set correctly for line draining to holding or slop tank?
15. Has holding or slop tank been properly drained ashore and checked to be well drained by dipping?
16. Has vacuum been allowed to build-up before air/inert gas was let in and has this been done repeatedly?
17. In addition to checking holding or slop tank ullage, are drain pumps checked to see if actual delivery from line draining/tank draining has stopped?
18. Has shore been asked to check delivery of final holding or slop tank into shore system?
19. Have all valves been shut after line draining?

Note: During draining of discharge lines to holding or slop tank, open the non-return valves in the discharge lines (if movable from the outside).

List of Crudes unsuitable for Crude Oil Washing:

Due to their very high viscosity, the following crudes should not be used for Crude Oil Washing.

(a) Boscan Crude
(b) San Ardo Crude
(c) Corcorna Crude
(d) Laguna Crude
(e) Monagas Crude
(f) Tia Juana Pesado Crude

Vessels should contact FHQ for instructions if any COW problems are envisaged with *High Pour Point* crudes in areas where low air and sea temperatures are likely to be encountered.

Minas Crude (Waxy crude loaded at Sungai Pakning, Sumatra)

Pertinent properties of Minas Crude are:

A.P.I. Gravity	35.5
Flash	Ambient
Pour Point	95°F
Viscosity SSU at 100°F	87
Heat Requirements	100°F to 120°F

Based on information now available regarding the characteristics of Minas Crude, the procedure to be observed in handling of this crude should be as follows:

1. *Cargo Tanks* – Due to high wax content of Minas Crude, considerable wax may accumulate in tank bottoms. A regular tank cleaning routine should be established by vessels in this trade to assure reasonable cleanliness of tanks. Vessels should arrive at loading ports with a minimum amount of clean ballast.

2. *Heating* – Minas Crude is to be maintained at a temperature of 110°/120°F throughout a voyage. In order to facilitate the discharge of the cargo, the temperature should be raised to 120°F just prior to arrival. *Caution:* Light ends on this cargo will be lost if temperatures are maintained in excess of 120°F over an extended period of time; therefore heating above 120°F should be done only on instruction from the Marine Superintendent or Agent as the case may be at the receiving terminal. Experience has shown that on most vessels this temperature can only be obtained by controlled heating through the entire voyage, although the steam pressure required will vary on individual ships, weather conditions and temperature of the sea water encountered in transit. In addition to these requirements, the 72 hour ETA should include the average temperature of the cargo.

3. *Discharging* – Due to Minas Crude having a very high wax content and a pour point of 90°F, many unusual difficulties can be encountered. Major difficulties may be expected during stripping of tanks due to the oil congealing in the vessel's tank bottoms when the level of the oil is below the heating coils. It is therefore of the utmost importance that, in order to prevent large amounts of product remaining on board, tanks should be immediately stripped as the discharge progresses.

Recommended discharging procedure is to discharge one or two tanks simultaneously in each section of the vessel, maintaining a considerable drag to insure maximum flow of the oil into the cargo piping suctions. Heat should be maintained on the cargo tanks throughout the discharge. In the event tanks become foggy, as the level of the oil becomes progressively lower in individual tanks, a rod or sounding tape should be introduced to ascertain the amount of cargo remaining and it is highly recommended that the steam not be turned off the tank in order to prevent fogging. One of the characteristics of Minas Crude when it cools is not to remain on vertical surfaces, but rather lay in hills and valleys on horizontal surfaces. In many instances, a sounding rod will show only a few inches of oil remaining under the ullage plug and two or three feet could remain in the forward end of the tank if temperatures are allowed to drop.

4. Removal of solidified oil from tank bottoms upon completion of discharge. If necessary a sufficient quantity of hot water taken from a fire line over-all into individual tanks through the ullage holes to cover heating coils, will assist in heating the remaining portion of the cargo for discharge. In many cases, the introduction of a pyrate machine with hot water will assist in removing solidified oil from horizontal surfaces of internal members of the tanks. The vessel may also be listed slightly in one direction or another to facilitate the free flow of oil into the suctions in the wing tanks.

Duri Crude (Intermediate Gravity Crude)

Duri Crude, which is loaded at Dumai Terminal, is a high viscosity relatively heavy crude oil. No unusual handling problems are anticipated in the bulk carriage and discharge of this crude.

Pertinent properties of Duri Crude are:

API Gravity	About 22.0
Flash Point	94°F
Viscosity (Range of Tests)	1000–455 SSU at 100°F 400–220 SSU at 130°F
Heat Requirements	100°–120°

The high viscosity of this crude requires that it be heated in order to assure a satisfactory discharge rate. The actual viscosity of shipments may vary, but is believed to be nearer the low figures of the range quoted above. The recommended discharge temperature is 100°F at this time, subject to change if higher viscosities and/or discharging difficulties are experienced.

The recommended cargo heating procedures are:

1. Test heating coils and repair as necessary.
2. Commence heating cargo 96 hours before arrival at discharge port.
3. Raise cargo temperature gradually until it reaches the required 100°F.
4. Maintain cargo temperature at 100°F throughout the discharge.

Discharge procedures which have proved effective in the handling of heavy fuel oils should also be used when handling Duri Crude. Tanks should be stripped quickly on an "as you go" basis to take advantage of the faster flow of hot cargo and thereby minimise stripping and the accumulation of cargo residue below the heating coils.

TRANSHIPPING: *Instructions to VLCC Masters from Texaco Trinidad, Inc.:*

1. Anchor your vessel in designated anchorage with starboard anchor and rig gangway starboard side. Enter and clear vessel in normal manner, co-ordinating all activities via VHF with Texaco Marine Superintendent at Shipping Office.
2. Gauge all tanks, determine amount of cargo on board and advise Shipping Office along with A.P.I., temperature and other particulars. Re-secure all tanks. Advise Lightering Vessel A.P.I. and temperatures.
3. Barge will come alongside, port midships. Receive on board six 30 ft. lengths of 12 in. cargo hose along with necessary reducers, blanks, bridles, straps, etc. Ship's crew must rig 2 strings of 90 ft. long hose connected to your manifolds, and supported by your vessel's boom. Hoses will be tended by your vessel's crew throughout transhipment.
4. A string of 4 ft.×11 ft.×21 ft. Yokohama fenders, each separated by 100 ft. length wire will be brought alongside (port). Your forward and after main deck wire springs will be lowered down and secured to the ends of the fender string to secure same alongside. Four of the fender positioning wires will then be lowered from your deck and one secured to each of the fenders. The fender string must then be positioned and secured alongside centred on your manifold.
5. Two additional fenders will then be brought alongside and secured approximately 150 ft. forward and aft of the main fender string to provide additional protection to your vessel in mooring and unmooring the lightering vessel. Two positioning wires will be passed up to your deck from each of these fenders to secure them in place.
6. When lightering vessel comes alongside your crew must be stationed fore and aft on deck to handle lines. Your bridge should be manned with engines on standby in the event of emergency. During entire transhipment all fire fighting equipment must be rigged and at ready. Additional fire fighting equipment and anti-pollution devices will be on harbour tugs and available if needed.
7. A lightering vessel assisted by tugs will come abeam of your vessel and send out synthetic lines, one forward, one aft, by launch.

   Your crew must lower heaving lines or messenger lines to launch, then heave lines on board and secure fore and aft on your vessel. Lightering vessel will then be brought alongside and positioned with her manifold approximately 10 ft. – 40 ft. aft of yours. The lightering vessel will then pass her wires (all containing nylon straps) to your vessel and safely secure alongside.
8. After the lightering vessel is safely secured alongside, to your satisfaction, the two hose strings will be passed to her and secured to her manifolds. The lightering vessel will support the hose ends, however, the main support will remain your vessel's boom. Agreeable handling rates, procedures and signals must be agreed upon between the Masters of the vessels involved and the Textrin Co-ordinator of the transhipment. Portable VHF radios operating on Channels 16 and 10 will be supplied from ashore. VHF Channel 10 will be used for all ship-to-shore communication.

   Your control room must be manned at all times by a competent individual who must be monitoring Channel 10. Additionally a competent individual (Officer) and a full watch must be maintained on deck to tend hoses, fenders, etc. One man must be stationed at the manifold and in full view of the hoses and other vessel at all times.

   The Textrin Co-ordinator and Marine Staff will be available and will assist in all ways possible, however, the responsibility for a safe operation rests with you and your vessel.
9. Upon completion of loading the lightering vessel, your tanks must again be gauged and figures passed to Shipping Office. All tanks must then be secured prior to unmooring of lightering vessel. The Marine Office will co-ordinate handling of necessary cargo documents depending on the destination of the lightering vessel.
10. Hoses will be drained to the lightering vessel, then disconnected, blanked and taken back aboard the VLCC.

    Your crew must again be stationed fore and aft, your bridge manned and the lightering vessel unmoored.
11. The entire procedure will be repeated for the next lightering vessel.
12. It is anticipated ballast will be taken after the second lightering or as soon as one isolated section is stripped of cargo. Prior to ballasting Textrin Co-ordinator should certify tanks to be ballasted as dry.

ALTHOUGH IT IS IMPORTANT TO MINIMISE DELAYS THIS CONSIDERATION MUST TAKE SECOND PLACE TO PROPER SAFETY PRACTICES AND TO ANY STEPS NECESSARY TO AVOID POLLUTION.

Also see "Discharging".

DENSITY: 1025, (August to November approximately 1023).

FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival). Limited in dry season (January-June).

FUEL: Fuel oil, diesel, gas oil and lubes supplied ex-pipeline or by barge. Also see "Shipmaster's Report" dated August 1979.

BALLAST: No facilities. Vessels to arrival with clean ballast.

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRYDOCK: Swan Hunter Shipyard located at Chaguaramas.

SURVEYORS: Lloyd's Register of Shipping, American Bureau of Shipping and Norske Veritas.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Piarco International Airport is served by International Airlines and flights are regular, airport approximately 28 miles away from Pointe-a-Pierre.

TIME: GMT minus 4 hours.

SPECIAL PRECAUTIONS: *Emergency Alarm:* This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.

Hose Pressure: The max. discharge pressure allowed on the jetty hose is 130 lbs. Pressure of jetty hose for loading shall not exceed 130 lbs.

GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.
CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 0.5 lb. tobacco and 1 bottle of spirits.
IDENTIFICATION CARDS: Not required.
MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities.
TELEPHONES: On dockside and at all sea berths.
SHORE LEAVE: Crew not allowed ashore at Pointe-a-Pierre. Regular launch service from ship to San Fernando, 3 miles away.
GENERAL:
Tidal Variation: Rise and fall is approximately 3 ft. 6 in.
Prevailing Winds: N.E. trade winds.
Flags Required: Republic of Trinidad & Tobago and International Code Flags "B", "G", "H" and "Q".
Launches: Launches to Pointe-a-Pierre for Officers only. Launch service to San Fernando for Officers and crew.
Laundry/Provisions: Available.

SHIPMASTER'S REPORT: August 1979.
Bunkering:
Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.

Good position obtained at a distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.

North coast Trinidad current approximately 1.5 knots West going.

Chupara Point Light not conspicuous during daylight and not seen at night.

Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.

Gulf of Paria can, with moderate sized vessel, be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.

Serpents Mouth not recommended at night.

Gulf of Paria not very busy, many vessels anchored off Port of Spain.

An intense white light (Fl. ev. Sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position 10° 18′ 38″ N., 61° 27′ 36″ W.). BA Chart No. 482 seen at 12 miles.

No appreciable current in Gulf of Paria.

VHF: Called "Texaco Shipping Office Pointe-a-Pierre" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.
Anchorage: General anchorage along parallel of 10° 19′ North from 3 miles West of No. 1 Buoy (10° 19′ 06″ N., 61° 29′ 18″ W.) to 0.5 mile off buoy.

We anchored with No. 1 Buoy 072°×1.0′, good position in 17 m.

For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.
Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.
Bunkering: Texaco: Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.

Diesel 6 in. line, 150 ASA, ship's derrick required.

Rate: Up to 200 tonnes p.h. for diesel.
Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979.
Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage off Pointe-a-Pierre.
Anchorage: Texaco Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.
Navigational Restriction: VLCCs are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.
Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each 7 days if requested through Agent. Port Health work is carried out by Agent and we renewed Derat Certificate. Shore leave passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Texaco Club and one for the crew which only allows them to land at San Fernando jetty.
Shore Leave: (Launch cost TT$8.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to San Fernando. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we received better service. Officers wishing to go to the club could get a separate launch arranged by Texaco Shipping (when available) direct to Pointe-a-Pierre.
Bunkers: Bunkers are supplied by barge of which there are two, one of 10,000 bbls. capacity and the other of 25,000 bbls. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 120 t.p.h. The larger barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economical and better quality than in the official water barge.
Fresh Water: Normal source of supply is by barge from Port of Spain which requires about 4 days' advance notice. Cost of supply is $3,000 TT no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. salt and also tasted oily. It is better to take water when bunkering (See "Bunkers").
Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned beer or minerals are available and all bottles are returnable which increases the price.
Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequently during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharge pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second. Discharge to the SBM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used, and a rate of 2,224 t.p.h. was achieved. All discharging was carried out using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to be connected together and attached to the ship's manifold, then a string of four "Yokohama" type fenders were made fast alongside using the spring wires from forward of No. 1 and from between Nos. 8 and 9 holds to secure. We were instructed to keep the wires slack at all times to prevent the joining wires breaking. All the moorings from the lightening ships have to be fed through "Panama type" fairleads and no open leads used to prevent the rope/wire jumping out of the lead when the lightening ship is completely deballasted. Communications between vessels is via walkie-talkies supplied by Texaco and a co-ordinator from Texaco attends the vessel for liaising operations. Bunkering cannot be carried out while lightening but is acceptable at the SBM, we managed to complete it before any cargo operations started. No gangways are used between ships.

Mooring at the SBM was carried out with the assistance of one tug made fast on the starboard side of No. 1. A ship's line is sent away to connect with the SBM port line, as usual, this starting line should be two ropes joined together to ensure adequate length. Once the connecting line is brought on board (a 16 in. nylon) in sufficient quantity it is made fast on the bitts and the starboard connecting line picked up and secured. When connecting hoses, we found that our manifold flanges were too thin to accept their patent clamps and we had to fit 12 in. reducers to our manifolds and also to their pipe-lines to get a good fit. Ship's crew carry out all operations although there are personnel placed on board for mooring to the SBM to advise and assist.

Mooring and unmooring are usually carried out during daylight but for some reason we unmoored during the night, much to the surprise of the Pilot and co-ordinators, being the first vessel to do it for 6 years.
Personnel Changes: We carried out several changes of personnel over the period and in general, the joining people arrived on time without much difficulty but the personnel leaving, unless previously booked in advance, met with delays getting flights. A vessel which arrived the day after us, had eight men delayed ten days before flights were available. Non-crew personnel, such as technicians, who arrived and stated they were coming to do work on the ship were not allowed entry into the country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980.
Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.
Anchorages: Usually given an anchorage position by Texaco, Trinidad, and normally use starboard anchor and require starboard accommodation ladder.
Tankers: Advise Agents time of transiting Bocas del Dragon and then North Post Radio will advise all ships. If using SBM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

SHIPMASTER'S REPORT: November 1983.
Documents:
Agent: P&I 48 (Arrival Report)
Immigration: P&I 10 (Arrival Report), P&I 53 (Arrival Report form in triplicate)
Quarantine: P&I 31 (Maritime Declaration of Health)
Customs: C-1 (Ship's Stores in duplicate)
C-2 (Crew Declaration)
C-3 (List of Unmanifested Cargo)
5 copies of Crew List.
Anchorages: It is necessary to anchor in position given by Texmarine otherwise they request you to shift to correct position but also necessary to check there is not another vessel anchored there already.
Radio: We found it very difficult to communicate with North Post Radio from the bay. 'Shipping' or Texmarine are very helpful passing messages to agents, etc.

Shore Leave: Apparently the liberty boat rarely goes to San Fernando these days (apparently due to the unsafe state of the jetty).
Currency: Agents require at least 10 days' notice if vessel requires any foreign currency and, apart from this delay, Sterling and U.S. Dollars seemed readily available. 4 days' notice is required for local currency. This 4 days would probably be longer if not using Company Agents.
Mail: Mail took 4 days from arrival at airport to delivery on board.

AUTHORITY: Texaco Trinidad Inc., Pointe-a-Pierre, Trinidad, W.I. *Tel:* 65-84220. *Telex:* 3366/3367 Texmarine San Fernando. *Cables:* Textrin San Fernando. *Contact:* R. F. Goddard, Manager, Marine & Harbours Division. R. F. Jones, Assistant Manager. R. A. Kassie, Port Captain.
AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Plan Book)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12′ N., Long. 61° 42′ W.).
ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.
MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.
TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.
BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.
MEDICAL: All facilities available.
FRESH WATER: Not available at CBM.
FUEL: Not available at CBM.
DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) of tank drainings acceptable on jetty and only if fluid at ambient temperature.
FIRE PRECAUTIONS: Normal oil terminal safety precautions applicable.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes, and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS AND DRY DOCKS: At Chaguaramas.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: April 1977
The port of Point Fortin is situated in S.W. Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12′ 05″ N., Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessels Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of Readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipe-line bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:

Clearance from Last Port.
Derat Certificate
International Health Certificate
Declaration and Crew Vaccination Certificate
Cargo Manifest, if any
Bill of Lading, if applicable
List of unmanifested packages, if applicable
3 Copies arrival Report
7 Copies Crew List
3 Copies Store List
3 Copies Personal Effects
Licence for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:
No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.
No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).
No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.
No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).
No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth either side. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×16 in. hoses.

AUTHORITY: Trinidad & Tobago Oil Co. Ltd.
AGENT: See "Port of Spain".

POINT LISAS (Fedchem): 10.22 N. 61.29 W.
(Plipdeco Marine): 10.24 N. 61.29 W.

(A) FEDERATION CHEMICALS LTD.
DOCUMENTS:
7 Copies Crew List.
2 Copies Ship's Stores List.
1 Copy Crew Stores List.
4 Copies Immigration arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (Lat. 10° 22′ 37″ N., Long. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.
CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs Officer acts for Harbour Master/Port Health. Tel. 636-2020. Immigration Officer boards on arrival.
ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (Lat. 10° 41′ N., Long. 61° 33′ W.) before proceeding Pt. Lisas.
RESTRICTIONS: No restrictions on night entry – departure.
MAX. SIZE: See "Berthing".
HEALTH: For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 636-2311.
VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.
TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.
BERTHING: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form). Maximum LOA: 550 ft. Maximum draft: 28 ft. LW.

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 250 ft. Maximum draft: 20 ft. LWOST.
STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.
MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Only by barge.
FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation (Monday – Friday from 0800 – 1600 hrs.).
FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.
GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: At Port of Spain.
REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.
POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 62999. Fire – First Aid, 62998.
REPATRIATION: Crew changes and repatriation can be arranged.
AIRPORT: Piarco International Airport – 30 miles from Point Lisas. Daily flights to world-wide destinations.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st – 22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, Union Anniversary Day and Christmas Day, on these holidays.
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.
SHORE LEAVE: No restrictions.
DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.
DEVELOPMENTS: Present depth of channel 28 ft. at MLW.
AUTHORITY: Federation Chemicals Ltd., P.O.Box 952, Port of Spain, Trinidad, W.I. *Tel:* 636-2020. *Telex:* 3353 Fcl Wg. *Cables:* Fedchem.

(B) POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORP. LTD.
LOCATION: Point Lisas lies on the Western side of Trinidad in the Gulf of Paria, in position Lat. 10° 24.2′ N., Long. 61° 29.6′ W.
DOCUMENTS:
7 Copies Crew List.
2 Copies Ship Stores List.
1 Copy Crew Stores List.
4 Copies Immigration Arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.
Derat Certificate.
Ship's Safety Certificate.
Passports.
PILOTAGE: Pilotage compulsory. Pilots ordered through Agents. Advice at 48/24/12 hours' necessary prior to ETA. Pilots board at entrance of Savonetta Channel Lat. 10° 22′ 57″ N., Long. 61° 31′ 11.2″ W. Pilot ladder must conform to International Safety Regulations. Launch hire arranged through Plipdeco Marine to take Pilot on or off vessels.
CLEARANCE: Point Lisas (Plipdeco) is a Port of Entry. On arrival ships may proceed directly alongside or to anchorage for clearance by resident officers.
ANCHORAGE: In-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 23.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 24′ N.	Long: 61° 32.2′ W.

Out-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 22.5′ N.	Long: 61° 31.2′ W.
Lat: 10° 22′ N.	Long: 61° 30.2′ W.

RESTRICTIONS: Daylight manoeuvring only (between the hours of sunrise and sunset).
MAX. SIZE: See "Berthing".
HEALTH: Valid smallpox and yellow fever certificates if last Port of call was in an infected area. Quarantine on authentication of certificate available at short notice.
VHF: Plipdeco Marine Channel 16, working frequency Channel 9.
RADAR: Not installed at Plipdeco Marine.
TUGS: 4 Resident tugs available. 2×2,250 h.p. and 2×500 h.p. Towage services ordered by Agent.
BERTHING: The Channel is 1.75 nautical miles long and 152 m. wide. Turning basin 700 m. long and 500 m. wide. Both are dredged to 12.8 m. True course 052.25°. The Channel serves the following terminals:

Berth 1A:	Max. LOA:	100 m.
	Draft:	5.5 m.
	Facilities:	None.
	Dock Length:	24 m.
Berth 2:	Max. LOA:	130 m.
	Draft:	2.5 m.
	Facilities:	None.
	Dock Length:	170 m.×40 m. Ro-Ro ramp.
Berth 3:	Max. LOA:	120 m.
	Draft:	5.5 m.
	Facilities:	None.
	Dock Length:	32.3 m.
Savonetta Pier No. 1 (South) Fertrin Terminal:	Max. LOA:	220 m.
	Dock Length:	310 m.
	Max. Draft:	11.6 m.
	Facilities:	Specialised installation for loading Anhydrous Ammonia. Maximum rate 1,000 m/t.p.h. Facilities for loading Methanol and Urea in bulk.
Savonetta Pier No. 1 (North)	Max. LOA:	110 m.
	Dock Length:	164 m.
	Max. Draft:	6.1 m.
	Facilities:	None, however ideal for bulk liquids.
ISCOTT Terminal:	Max. LOA:	407 m.
	Draft:	11.6 m.
	Facilities:	Specialised installation for discharge of bulk Iron Ore – Loading Direct Reduced Iron (DRI). Maximum rate 1,200 t.p.h., connected to conveyor system. Two (2) Level Luffing Cranes – Capacity 25 tons.

STEVEDORES: If necessary, ordered by Agents through Port Authority of Trinidad and Tobago (P.A.T.T.). Longshoring available ex-Point Lisas Terminals Limited. (PLTL).
CRANES: Mobile and track cranes available up to 180 tonnes swl. Ordered through Agents.
MEDICAL: Advance notice required. Agent will arrange.
FRESH WATER: Available on all berths and ex-barge.
FUEL: Bunkers available ex-barge.
FIRE PRECAUTIONS: No smoking on the Fertrin Terminal or on the open decks of gas carriers.
GANGWAY/DECK WATCHMEN: 2 Customs guards on duty for 24 hours aboard all vessels.
OPENING/CLOSING HATCHES: Normally done by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
IDENTIFICATION CARDS: It is advisable to carry identification when proceeding on shore leave.
CONSULS: At Port of Spain.
REPAIRS/DRY DOCKS: A repair facility is available at Chaguaramas. However, competent technicians are available for shipboard repairs. Arrangements made through Agents.
SURVEYORS: (1) Cargo Surveyors: Caleb Brett, Saybolt and Redwood available.
(2) Surveyors such as Lloyd's, ABS, Bureau Veritas are available. Arrangements through Agents.
HOLIDAYS: Work is possible all year except on Labour Day (June 19th) and Union Anniversary Day (Last Saturday in November).
POLICE/FIRE/AMBULANCE: Accidents, Police help 62 999. Fire and First Aid 62 998. Fire assistance and ambulances also available on the estate by calling 2211, 2215 and 2205/7.
REPATRIATION: Crew changes and repatriation possible. Agent will arrange.
AIRPORT: Piarco International Airport, 60 km. from Point Lisas. Daily international flights available.
TIME: Local time is GMT minus 4 hours.
TELEPHONES: No facilities for telephone aboard. However international dialling to most countries possible.
SHORE LEAVE: No restrictions except, for persons not holding documents which grant entry to Trinidad and Tobago. Prior approval of Ministry of National Security must be arranged through Agents.
BANKS: National Commercial Bank of Trinidad and Tobago (NCB), Southern Main Road, Couva.
STORING: Vessels can be stored by barge or truck.
No storing of vessels while loading at the Fertrin Terminal.
All storing must be done with Customs approval.
Local riggers and forklifts are available for storing. These may be ordered through local chandlers.
DEVELOPMENTS: Extension of Berth No. 3 to 100 m. max. length.
Construction of Berth No. 5, a Ro/Ro dock. Max. draft 7 m.
Construction of leading light towers to enable 24 hour operations.
AUTHORITY: Point Lisas Industrial Port Development Corporation, P.O.Box 191, Goodrich Bay Road, Point Lisas, Couva. *Tel:* 636–2202, 636–4388. *Cables:* Phildeco, Couva. *Contact:* Captain Rawle Baddaloo, Port Manager.

AGENT: Melville Shipping and Trading Ltd., Steamship Operators and Agents, 18/20 London Street, Port of Spain. Tel. 62-54977, 52384, 54474. AO Tel. 662-5717, 62-54474, 676-7795. Telex 22265 and 22448. AB "Meltra". Cables "Meltra Trinidad W.1." Code: New Boe. Bankers: Royal Bank of Trinidad & Tobago Ltd.

PORT OF SPAIN: 10.39 N. 61.32 W. (See Plan Book)

DOCUMENTS:
For Immigration: On boarding, 3 Crew Lists and 3 Passengers Lists if passengers on board. Inspection of Derat Certificate. Health Declaration and arrival report forms supplied by Immigration on boarding to be made up.
For Customs: 2 Crew Lists and 1 Passengers List if passengers on board, 2 Customs Ship's Stores Lists, 1 Crew's Stores List. Forms supplied on boarding.
Port doctor will board if calling from quarantine port.
PILOTAGE: Not compulsory into Port of Spain anchorage but if required will attend from outside Bocas or where required through Agents in ETA message. Calling Pilot International Code Flag "H" by day and white light over red at night or International Code signal "G" on whistle.
Gangway or standard type pilot ladder with spreaders about 10 ft. apart. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwalk at the top of the ladder.
Pilot station is situated on Port of Spain Wharf.
ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.
Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.
Currents 0.5 to 1.5 knots flood and ebb. Rise and fall of tides, variable minimum 1 ft. 5 in. maximum 4 ft. Rainy season June-December. Dry season December-June not always predictable. Rain squalls occur during months of July, August and September up to 30-40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly. Normally stronger during daylight.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions on length, but maximum draft in channel, in basin and alongside is 32 ft. MLWOST.
RADIO: Advise through North Post wireless or telephone, call sign 9 YL. ETA 48 hours and 24 hours with other requirements.
TUGS: There are 4 tugs in Port of Spain to assist in docking operations.
BERTHING: *Container Terminal:* The new Container Terminal at Berth 6A includes 1,085 ft. of deep water berth which links King's Wharf and King's Wharf Extension. The total paved back-up area covers 15 acres and is used exclusively for the handling of containers. The Container Terminal is serviced by the existing Sheds 9 and 10 with a total covered space of 162,000 sq. ft. In addition, there are 27 acres of paved space designated for the handling of containers.

The Container Terminal is equipped with two 40 ton Paceco gantry quay cranes. The outreach of the cranes is 115 ft. with a backreach of 50 ft. In addition, 2 rubber tyred yard gantry cranes manufactured by Diamond Manufacturing Co. are available. These cranes are capable of straddling 5 rows of containers plus a truck lane.

It is estimated that the Berth 6A Container Terminal with its full back-up facilities is capable of handling 80,000 t.e.u.'s per annum.

King's Wharf: Length 3,900 ft. Berthing for 6 vessels with max. draft of 30 ft. 5 transit sheds available (Nos. 1 – 5). Apron width 50 ft.

King's Wharf Extension: Length 1,200 ft. Berthing for 2 vessels with max. draft of 30 ft. 2 transit sheds available (Nos. 7 – 8). Apron width 75 ft.

Large cruiser vessels berth at No. 5, 6 and 7. Vessels with length in excess of 525 ft. are unable to berth at No. 1 berth as width of basin is 700 ft.
CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern Wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

There is one floating crane, 60 tons capacity, one crawler crane of 160 tons capacity and also one 125 ton fork lift handling 20 ft. containers. 3 mobile cranes with capacity 200 tons, 75 tons and 75 tons. There is also a trailer service for 20 ft. containers from dock to consignee's warehouse.

24×20 ton and 6×40 ton trailers for handling Ro/Ro cargoes.
STEVEDORES: Labour on Docks and labour on ships: Controlled by Port Contractors Ltd. Ordered by Agents. Gang size on Docks: 14 to 18 men. Gang size on vessels: 13 men, 1 gangman, 2 winch drivers, 8 hold men, 1 cooper, and 1 hatch foreman.
MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Supplied alongside all berths. Also available by 3 barges, each capacity 300 tons, 24 hours' notice required.
FUEL: All grades supplied by barge.
GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.
OPENING/CLOSING HATCHES: This is handled by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
CARGO GEAR: Vessels normally load and discharge with their own gear but shore cranes and heavy lift cranes available on the dock.
IDENTIFICATION CARDS: Not required.
EMBASSIES:

SOBO (Pitch Point): 10.15 N. 61.37 W.

Crude Oil Terminal operated by B.P. Trinidad Limited. Vessels from abroad calling at Sobo are required to proceed to Brighton for clearance formalities.
DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
TUGS: Not used. Launch assists berthing.
RESTRICTIONS: Berthing/unberthing only on flood tide.
MAX. SIZE: Controlled by depth alongside jetty — 29 ft.
BERTHING: Vessels moored with springs on jetty. Other lines to buoys.
FRESH WATER: Not available.
FUEL: Available by barge.
AGENT: See "Port of Spain".

TEMBLADORA (Alcoa Bauxite Terminal): 10.41 N. 61.35 W.

Also refer to "Port of Spain".
DOCUMENTS:
2 Crew Manifest/Stores List for Customs.
2 Ship's Stores List for Customs.
3 Immigration Arrival Report.
8 Crew Lists.
1 Declaration of Health.
1 Stowaway List (even if no stowaways on board).
PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles of installation.
ANCHORAGE: Safe anchorage 0.5 – 0.75 miles off head of jetty.
MAX. SIZE: No. 1 (Western berth) for discharging, length of berth 976 ft. Max draft 23 ft.

No. 2 (Eastern berth) for loading. Length of berth 675 ft. Max. draf 36 ft.
RADIO: ETA should be given at least 36 hours before arrival via North Post Radio " 9YL" or Barbados Radio "8PO" to Alcoa.
TUGS: Alcoa maintain their own tug to assist in docking operations.
BERTHING: There are two wharves: No. 1 with a length of 976 ft. and No. 2 with a length of 675 ft.
STEVEDORES: Not necessary.
FRESH WATER: Supplied at both piers, also by barge.
FUEL: All grades by barge and pipe-line.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
OPENING/CLOSING HATCHES: Handled by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits per man.
CARGO GEAR: Loading: Carried out with travelling tower conveyor system, rate 1,000 t.p.h. Discharging: With travelling tower grab 5 tons capacity, rate 300 t.p.h.
IDENTIFICATION CARDS: Required. Vessel must issue I.D. cards to all onboard.
REPAIRS AND DRY DOCKS: At Chaguaramas.
MEDICAL: All facilities available. Advance notice of requirements should be given.
REPATRIATIONS: Can be arranged (Advance notice must be given for citizens from Eastern Bloc countries).
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions (except for citizens of Eastern Bloc countries who need visas or special permission).

Tunisia

ASHTART: 34.17 N. 11.23 E. (See Plan Book)

DOCUMENTS:
Customs: 1 Crew Declaration, 1 Ship's Stores List.
Immigration: 1 Crew List

PILOTAGE: Compulsory. To avoid a delay, Owner must report to SEREPT SFAX 24 hours in advance of ETA.
ANCHORAGE: 3 miles South of the storage barge.
HEALTH: Masters must declare on arrival, condition of health of all on board with details of any sickness.
VHF: Call "Ashtart Terminal" on VHF Channels 9 and 16.
TUGS: One tug required to be in attendance while loading.
BERTHING:
a) *Tanker Berths:*
One SBM for tankers up to a max. size of 150,000 d.w.t. Water depth 66 m. Loading Rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose.
Vessels mooring use one line, and must be able to easily heave on board an anti-chafing chain whose links are 32 cm. wide.
b) *Storage Barge Berth:*
Starboard side alongside storage barge, tankers up to a max. size of 70,000 d.w.t. Depth 66 m., loading rate 4,500 cu.m.p.h. Max. quantity available 105,000 tons. 2×12 in. hoses.
MEDICAL: No facilities.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: France and Libya at Sfax.
REPAIRS: No facilities.
REPATRIATION: Not possible.
AIRPORT: At Sfax.
HOLIDAYS: None.
GENERAL: No dirty ballast facilities. No provisions available. Master supplied with booklet containing special port regulations on arrival.
AUTHORITY: Societe De Recherches Et D'exploitation Des Petroles en Tunisie – SEREPT, B.P. 246, SFAX, Tunisia. *Tel:* (04) 30 400. *Telex:* 40859, 40700.

BIZERTE: 37.17 N. 09.54 E. (See Plan Book)

PORT LIMITS: Commence 0.5 mile from the Port.
DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ship's Stores List.
3 Copies Bill of Lading.
3 Copies Manifest.
Health Declaration.

PILOTAGE: Vessels approaching the port applying for Pilot by day by flying the flag "G". Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board. The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.
ANCHORAGE: See "Pilotage".
RESTRICTIONS: Entry at night is forbidden for tankers.
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.
VHF: Channels 16 and 14.
TUGS: The tugs join the vessel at half a mile from the fairway. The 2 tugs available are equipped with radar.
BERTHING: There are 10 alongside berths in the 3 docks at Bizerte and 3 alongside berths at Menzel Bourguiba. The water is salt. Length of the main quays: 500 m., depth 9.00 m.
Length of the oil handling berth "A": 200 m., depth: 8.50 m. Length of the oil handling berth "B": 150 m., depth: 8.50 m. Molasses handling berth, depth: 7.5 m. Berth in front of the silo: depth 8.50 m. Iron ore handling berth "Douaria": depth 8.50 m. Berth in front of the cement factory: depth 7.6 m. Wooden wharf No. 2 at Menzel Bourguiba: depth 8 m.
Load and discharge is carried out by ship's own gear.
CRANES: 1 travelling gantry crane, capacity 6 tons. 1 travelling gantry crane, capacity 3 tons. 1 crane car, capacity 6 tons. 1 fork lift, capacity 7 tons. 2 fork lifts, capacity 3.5 tons. 1 fork lift, capacity 4 tons. 1 fork lift, capacity 8 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.
BULK HANDLING FACILITIES: Grain is handled on the main quay, if cargo in bulk it is loaded into bags. Fertiliser also handled in bags. Ore and coal is unloaded into lorries.
SPECIAL CARGO HANDLING FACILITIES: None.
BRIDGES: New bridge (mobile) in operation.
STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours' notice required for Cholera and Yellow Fever inoculations. Advise Agent of requirements.
TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.
FRESH WATER: Available from the quay at most berths. Rate 20 cu.m./hr.
FUEL: Not available.
FIRE PRECAUTIONS: The Petroleum Harbour is equipped with fire hydrants. A tug of 1,600 h.p. is required to be permanently standing by when tankers are moored alongside the quay.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew members' identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
CONSULS: Italy Tel: 02.31.747.
REPAIRS: Some types of deck and engine repairs can be effected.
DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

Dry Dock No. 1 & 4	length	190.90 m.
	higher width	30.25 m.
	lower width	26.50 m.
	draft	8.80 m.
Dry Dock No. 2	length	247.50 m.
	higher width	40.60 m.
	lower width	36.00 m.
	draft	12.00 m.
Dry Dock No. 3	length	84.10 m.
	higher width	14.78 m.
	lower width	13.00 m.
	draft	4.15 m.

SURVEYORS: Bureau Veritas.
REPATRIATION: Can be arranged.
AIRPORT: Tunis/Carthage airport is situated 70 km. from Bizerte. Served by international airlines.
TIME: GMT plus 1 hour all year round.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
POLICE/FIRE/AMBULANCE: Police Tel: (02)31.200; Fire (02)31.022; Ambulance (02)31.422.
TELEPHONES: No arrangements exist.
SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: January 1982.
Documents: It is essential that the various declarations re stores, bond etc., are accurate as heavy fines and confiscation can result when the officials discover any mistakes or inaccuracies.
Restrictions: Due to the lift bridge at the Eastern end of the Quai de Commerce there is no entry during a period in the morning and another in the evening when the main flow of traffic is expedited. These are about 0700 to 0800 hrs. and 1600 to 1700 hrs. Passage through this bridge is difficult for a deep draft vessel owing to the supporting piers being so close to the main channel.
Health: Free Pratique will be granted on application by radio.
Berthing: The Western end of the Quai de Commerce showed depths of 10.25 m. along the 600 ft. to the East, the discharging berth for grain vessels.
There is some 10 m. in the entrance channel and as far as the turning basin, but LESS in the basin hence the operation is difficult.
Bulk Handling Facilities: For grain there are portable vacuvators which discharge into hoppers from which some 8 bags can be filled at the same time.
Fresh Water: Using ship's hoses, some 23 tonnes per hour may be attained by overall watching, but pressure can drop at any time and care must be taken to make sure of a large quantity or if proceeding to La Goulette elevator where there is no water to be shipped.
Gangway/Nightwatchmen: Most helpful and able to get results when Agents not available.
Identification Cards: These are sighted by the Immigration Officer and crew passes issued which are valid for all Tunisian ports but which must be collected before the vessel sails from the last port.

AUTHORITY: Direction du Port de Bizerte, 6 Rue de Russie, Bizerte, Tunisia. *Tel:* 31.139 and 33.688. *Telex:* 13707 Bimpor. *Cables:* Direction du Port de Bizerte. *Contact:* Harbour Master or M. Ben Menna, Port Director.

GABES (Ghannouche): 33.57 N. 10.04 E. (See Plan Book)

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra, 58 miles S.W. of Sfax and 32 miles to the West of Djerba.
APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.
One can distinguish:
To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.
To the North, the Oasis of Ghennouch and the red and white chimney, 44 m. high, of the power station.
To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

Southeast: The lighthouse of Ras Turguness (white flashes, period 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (white with intervening dark sectors, period 12 secs., range 11 miles).

Northeast: And after coming round the belt of lights of the buoys of the Kerkennah Islands by the mooring buoy N.W. of the channel of the port of La Skhirra (flashing white light, period 10 secs., range 10 miles) and by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 4 pairs of fixed light buoys, except buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.

ANCHORAGE: The Roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.

MAX. SIZE: "See Berthing".

TUGS: One tug of 1,200 h.p. and 2 fast pilot launches.

BERTHING:

The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 375 m. long (Berth Nos. 3 and 4) running approximately E.N.E./W.S.W. and dredged to 10.5 m. This quay can take vessels up to 25,000 tons.

A quay 600 m. long (Berth Nos. 5, 6 and 7) running approximately N.N.W./S.S.E. and dredged to 10.5 m. This quay will take vessels up to 25,000 tons.

A quay 260 m. long (Berth No. 8) perpendicular to the first, and dredged to 12.5 m. This quay will take vessels up to 50,000 tons.

Port access is possible at all times to vessels with 33 ft. (10.06 m.) max. draft for berths Nos. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft for berth No. 8.

Open storage areas:

The open areas for the storage of goods transiting through the port include in the public zone – a shed of 4,000 sq.m., open areas which are properly surfaced 70,000 sq.m., open areas of rolled earth: 100,000 sq.m.

CARGO HANDLING EQUIPMENT:

Public:

One gantry crane of 20 tons; Lift trucks from 4 tons – 10 tons; Crane on rails of 20 tons (on order); Crane on rubber tyres of 20 tons.

Private:

Cranes on rubber tyres of 10 tons – 25 tons; Lift trucks from 4 tons – 10 tons; Tractors and trailers.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: Possible.

WINDS/TIDES: The winds in the Gulf of Gabes present a seasonal variation with the character of a monsoon.

During the cold season (October – March) winds come from the land, from the West and North.

During the hot season (April – September) the winds come from the sea, from the East to S.E. The strength is then from force 3 to force 5, very infrequently reaching force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The port of Gabes has been essentially created to serve the chemical industries in the area which process the natural Tunisian phosphates coming from the S.W. of the country. There is some importation of sulphur for use in the various processes, likewise aluminium for production of aluminium fluoride. As the South of the country develops, traffic in various general cargoes, foodstuffs and capital equipment, is increasing.

The port is currently advanced in its fifth Development Plan. The new infrastructural works comprise:

1. Transformation of the current quay No. 8 into a much lengthened version.
2. Construction of a service quay.
3. Surfacing and equipping of 50,000 sq.m. of open area for storage of goods.
4. A second tug of 1,200 h.p. will be acquired.
5. Fertiliser bulk loading unit of 500 t.p.h. capacity will be installed.
6. An electric crane, on rails, of 20 tons will be acquired.
7. Cranes on tyres of 15 – 20 tons will be purchased.
8. Fork lifts from 4 – 10 tons will be acquired.

SHIPMASTER'S REPORT: The following reports are from the same vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djerba, keeping outside the 9 fathom soundings as the bottom shoals quite steeply.

The 'Fairway' buoy "O" showed up well on the radar at 8 miles and the channel buoys themselves at 5 – 6 miles. Details of the breakwater were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on either chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not be relied upon. New positions as at 22nd/24th May, have been marked on chart 372 and a tracing made. The current sets quite strongly across the axis of the channel and care is required when rounding the bend in the channel immediately before the entrance. The Pilot reported that channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel 16 but we did not succeed in making contact until after we had anchored; time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length with white upperworks. Pilot ladder about 1 m. from the water. Pilot boards outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port side to, owing to existence of 10.5 m. shoal in the Southern corner of the harbour. No night time pilotage for vessels of this size.

Only 1 tug is available and only of moderate power; on berthing he pushes according to hand signals and whistles from Pilot (no VHF). When unberthing he takes a ship's line from the stern to swing ship to port clear of berth.

Berth: The berth is a concrete quay in the Southern corner of the harbour about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 m. and 14.2 m. taken by ship's leadline. Communication with shore personnel was not very good with conflicting advice as to whether vessel was in position or not.

The quay is used for the export of fertiliser products which are loaded by means of a large travelling chute. Despite fears, the gangway when swung out should not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to be taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwood's Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations.
3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard. (This is most important, Tunisia is largely Moslem).
2 Lists of ports previously visited.
Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 Bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon.

On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind force over 4 to 5 and no unberthing over 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunrise to Sunset only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside fairway buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertiliser/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia berth, mooring boat used. On Ammonia berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. Two×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 150 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form at 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur berths nearest to Ammonia berth have 2 discharge cranes/gantry. The Grain berth at the Northern end is worked by ship's gear. Both these are import berths. Sulphur berth direct into fertiliser plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even though it seems due to shiploaders vessel cannot.

Communications: At Ammonia berth after connection there is little English spoken by personnel ashore. Two watchmen always onboard.

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside berth.

Surveyor: SGS/Redwood in attendance. Does not always appear on arrival.

General: Fresh water available from quay, but salty. If fuel required go to Sfax. Personnel reliefs quite easy through Djerba. Direct flights to Frankfurt 3 times per week. Baggage may go missing. Road and rail communication with Tunis, Sousse and Djerba. STD International telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Health Declaration and Vaccination List. If all in order 'Q' flag is pulled down – Quarantine Pratique granted and Customs and Agent can board. Port Health/Immigration: require all Cholera Certificates up to date, if not Port Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be declared and all Tunisian currency drawn and not used handed back on departure. Bars are particularly subject to inspection. Customs also very carefully check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Master's safe is checked together with dangerous drugs which must be properly declared, every single item and amount of each. Personnel going ashore take their Discharge Books to main gate where a shore pass is issued and Discharge Book collected on return.

Papers required: 3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
3 Copies Personal Currency Lists.
2 Stores Lists.
2 Drugs Lists.
2 Bond Lists.
2 Vaccination Lists.
6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and prices reasonable. Cable ahead for chandler as normally does not work at weekends.

Agent: Societe Tunisiene De Transit D'Agencies Et De Transports. Cable: STTAT GABES.

Have office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position.

AUTHORITY: Direction du Port de Gabes, Office des Ports Nationaux, Batiment Administratif, Port de la Goulette, Tunisia. *Tel:* 275300 (6 lines). *Telex:* 12-386 Oporna-Tunis. *Cables:* Ofpornatu. *Contact:* B. Karra, Harbour Manager, P.O.Box 65, Gabes, Tunisia. Tel: (5) 22.9.22.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E.
(See Plan Book)

DOCUMENTS:

Required by Police:
2 Crew Lists.
2 Passenger Lists.

Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.

Required by Port Health:
1 Crew List.
1 Passenger List.

PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kHz or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the sea buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 miles beyond the sea buoy, i.e. the buoy No. 1 in the entrance channel to the port.

ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 m. – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 m. – 9 m. in the vicinity of buoys Nos. 4 and 5 provided that they do not obstruct navigation in the entrance channel.

RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at low water is 32 ft.

MAX. SIZE: *La Goulette:* Up to max. draft 32 ft. Max. length 185 m. *Tunis:* Up to max. draft 20 ft. 6 in.

HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic Free Pratique except in time of epidemic.

RADIO: Tunis Radio 24 hour watch on 2182 kHz, radio-telephone watch from 0600 to 2200 hrs. on 500 kHz Goulette Radio call sign 3VW 24 hour watch on 2182 kHz and VHF Channel 16.

TUGS: Available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of buoys Nos. 4 and 6, that is 400 or 500 m. from the berths. Vessel's lines always used.

BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h. Also see "Shipmaster's Report".

STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.

MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.
TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.
FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge "El Ain" of 50 tons capacity can supply vessels berthing in "Basin Sud".
FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.
GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.
OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores on payment of special premium.
CUSTOMS ALLOWANCES: Each crewman is allowed two packets of cigarettes or 4 cigars or 50 gm. of tobacco and one opened bottle of alcohol.
CONSULS: Following countries are represented in Tunisia:

Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the Shipyards of Soconema at Menzel Bourguiba 70 miles away.
DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.
REPATRIATION: Can be arranged.
AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and N. Africa.
TIME: GMT plus 1 hour. No alterations during the year.
HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.
POLICE/FIRE/AMBULANCE: Police, Tel: 197. Fire, Tel: 198. Ambulance (express), Tel: 141313. Ambulance (S.O.S.) 341269.
TELEPHONES: Telephones can be connected on board vessels and are compulsory for tankers.
SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.
DEVELOPMENTS: A new commercial port and industrial complex, incorporating Roll-on/Roll-off facilities, quays, jetties, transit sheds and back-up services, is to be built on reclaimed land, covering approximately 100 ha, immediately inside the Lake of Tunis.

SHIPMASTER'S REPORT: January 1982.
Documents: It is essential to ensure that all arms and ammunition are declared at first port of entry in Tunisia and that the proper authority has them sealed inside the bond during the entire stay in Tunisia.

When coming from another Tunisian port all cash (Dinars) remaining from sums drawn in the previous port must be declared.
Pilotage: The VHF is the only viable communication for the pilot service, the sea buoy being too far for either visual or sound signals.

When required to enter, the vessel will be told to proceed inwards down the approach channel which has been dredged to 12.25 m. from Sea Buoy to the moles. This was completed on 20th December, 1981 as the first part of the work for the new port being constructed on the Southern side of the canal to Tunis and some 3 kilometres inside the present port of La Goulette.
Berths: The elevator/silo berth in Basin Sud has a depth of water of over 10 m. throughout its whole length and extending some 80 m. to the seaward end as the actual wharf is short (about 135 m.) and vessels have to warp along the face to ensure all hatches are serviced.

There is *no water* at this berth either drinking or boiler nor can it be taken at the adjacent tanker berth or the iron ore pier.
Developments: The port appears to be concentrating on the Ro-Ro berths and the new passenger terminal to the exclusion of the more mundane cargoes. The traffic is such that there is reluctance to allow a vessel from the silo that is short of water to take up a berth on the Northern quay. The harbour area is to be dredged in stages so as to give access, eventually, to the new port under active construction.
Telephones: There are no telephones available at the silo berth unless access can be had to the one in the office, while the Oil Berth unit is only available if there is a tanker in the berth.

AUTHORITY: Office des Ports Nationaux, Batiment Adminstratif, Port de la Goulette, C.P. 2060, La Goulette, Tunisia. *Tel:* 275300. *Telex:* 12386 Oporna. *Cables:* Of. Pornatu.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E.

(See Plan Book)

DOCUMENTS:

5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.

PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.
ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.
MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high water.
HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive Free Pratique at the quay after berthing. Suspect vessels must wait at anchor until Pratique is given.
RADIO: TRAPSA operate coastal station Laskhirra Radio (3VP), vessels to make contact 48 hours before arrival. Messages for TRAPSA passed by other stations should be addressed "Rapetrol Laskhirra".
VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 MHz (calling), 156.6 MHz, 156.7 MHz, 156.55 MHz Contact with tugs can be made on all 4 channels.
TUGS: Two tugs 1,500 h.p. each, normally used for berthing. 3 tugs required if over 70,000 d.w.t. Lines provided by tugs.
BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of summer deadweight. Mooring may need to be doubled during months of December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 m. – 16 m. Loading platform is served by 3×30 in. oil pipe-lines and 1×24 in. and 1×18 in. ballast lines. Each berth equipped with 4×12 in. flexible hoses. Max. loading rate 12,000 cu.m./hr.
MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.
BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m./hr.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 2 packets cigarettes allowed each Crew member. No alcohol allowed.
CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.
REPAIRS: There are no facilities for repairs. Nearest at Sfax.
REPATRIATION: Can be arranged.
AIRPORT: Airport at Tunis 350 km. away, or Sfax 80 km. away.
TIME: GMT plus 1 hour all year round.
SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.
AUTHORITY: Compagnie des Transports par Pipe-line au Sahara (T.R.A.P.S.A.), 3050 La Skhirra, Tunisia. *Tel:* 22353 and 22395. *Telex:* 40811 TN. *Cables:* Erapsk, La Skhirra. *Contact:* O. Conrad, Port Director.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: On arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:

Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 hours 48 hours beforehand.
ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.
MAX. SIZE: Length 185 m., beam 26 m., draft 32 ft. – 33 ft.
HEALTH: To request Free Pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until Pratique is given.
RADIO: Sfax. Port Call – call sign 3VW2, operating 24 hours on 2182 kHz and Channel 16 VHF.

Calling frequency 2182 kHz, working frequency 1743 kHz CR3. Used only for communications with port services. Meteorological information provided on request.
TUGS: Join vessel at outer buoys or according to circumstances in the outer port.
BERTHING: N.E. Quay 820 m. long, phosphate berth.

West Quay 150 m. long, phosphate berth.
Petrol Pier 105 m. long. Max. size: length 185 m., draft 33 ft.
Salicole Pier, salt loading berth.
Sulphur Quay 220 m. long, draft 33 ft.
Also see "Developments".

STEVEDORES: Available, arranged by Agent basis vessel's ETA.
MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.
DENSITY: 1028.
FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.

FUEL: Available by barge.
GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.
OPENING/CLOSING HATCHES: Normally performed by crew.
DENTIFICATION CARDS: Required by all crew.
CONSULS: Local representatives for France, Great Britain, Netherlands, Norway, Sweden, Denmark, Spain, Italy, Greece, Portugal and Belgium.
REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.
REPATRIATION: Can be arranged.
AIRPORT: There is an airfield 7 km. from the city. No regular services.
TIME: GMT plus 1 hour.
HOLIDAYS: 1st January; 18th January; Aid El Kebir; Hegirian New Year; 20th March; 9th April; 1st May; Mouled; 1st and 2nd June; 25th July; 3rd August; 13th August; 3rd September; 15th October; Aid Es Seghir.
POLICE: Tel. 21-700.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Entrance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.

In July 1984 the port will be equipped with 3 new berths totalling 517 m. in length, depth 33 ft., max. LOA 185 m., max. draft 33 ft. Included is a Ro/Ro berth length 160 m., depth 33 ft.

SHIPMASTER'S REPORT: 1976.
Documents:
1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16 throughout 24 hours. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kHz.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the Outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the Outer Harbour Basin (Authority state that this is rare and only if vessel visits port regularly).

The Agent told me the channel was 34 ft. deep, although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position Lat. 34° 37.5′ N., Long. 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Office des Ports Nationaux Tunisiens, 10 Avenue de la Republic, Tunis. *Tel:* (04) 21486.

SOUSSE (Suza): 35.50 N. 10.38 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies vessel's particular declaration.

PILOTAGE: Contact pilot station on VHF Channel 16 or Tel. 03.20.401.
RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 8.70 m., height of tide 0.50 m.
MAX. SIZE: Max. LOA. 170 m.
HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Sousse Control "3VW4" on 2182 kHz.
TUGS: One tug of 1,200 h.p.
BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.

Length of quays 830 m. 8 berths.
South Basin Quay, length 140 m., dredged to 9.5 m.

CRANES: 1×18 tons and 2×10 tons.
STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
IDENTIFICATION CARDS: Crew member's identification cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
TIME: GMT plus 1 hour all year round.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
AIRPORT: Skanes Monastir – 13 km. from the port.
AUTHORITY: Direction du Port de Sousse, Rue Abdallah Ibn Zoubier, Sousse, Tunisia. *Contact:* T. Dhaou, Port Director.

TAZERKA: 36.36 N. 11.41 E.

DOCUMENTS:
4 Crew Lists.
1 Health Declaration.

PILOTAGE: A Berthing Master will board the visiting tanker at a location 2 nautical miles downwind of the Tazerka FPSU. He will remain on board the visiting tanker until after departure and will disembark when the visiting tanker is clear of Tazerka FPSU.

The Berthing Pilot/Loading Master will be familiar with pilot/berthing/unberthing vessels at Tazerka and will advise the Master of the visiting tanker accordingly. Throughout the operation, he will be the liaison between the Master of the visiting tanker and the Tazerka OIM (Offshore Installation Manager). He will advise the Master of the visiting tanker on documentation procedures and carry out any assistance.

ANCHORAGES: None.
APPROACHES: There are clear navigation approaches to and from the Tazerka FPSU. From time to time, special work barges and rigs will operate in the vicinity of the Tazerka FPSU. Information on such rigs will be broadcast through Normal Navigation Warnings and also by Tazerka Operations when visiting tankers first make communications contact.
RESTRICTIONS: Daylight mooring only.

Weather operating limits will be decided at the time of operation, but are approximately as follows:
(a) Maximum mean hourly wind speed = 25 knots.
(b) Maximum significant wave height = 2.5 m.
(c) Minimum visibility for berthing = 0.5 nautical miles.

MAX. SIZE: Minimum LOA 170 m. Maximum LOA 275 m. Under special circumstances LOA may be extended to 297 m.

No limit on beam and draft.

Minimum dead weight 20,000 tonnes (approx.). Maximum dead weight 140,000 tonnes (approx.).

Maximum displacement during berthing 150,000 tonnes.

RADIO: Vessels to send an initial ETA message to Agent via Tunis Radio on departure from the previous port and updated 72 hours, 48 hours and 24 hours prior to arrival at Tazerka. Thereafter changes greater than 3 hours should be reported. Where a ship departs from a port which is less than 72/48/24 hours' steaming distance away she shall advise her ETA as soon as possible.

ETA messages should include the following information:
(a) Location of cargo manifold in relation to the length overall of ship.
(b) Type of moorings (synthetic rope, wire, wire with synthetic tails, etc.)

VHF: Tazerka Floating Production Storage Unit is equipped with VHF Channels 16/6. Notice of Readiness may be issued when vessels are within 5 nautical miles radius of the Tazerka FPSU.
TUGS: None.
BERTHING:
Tanker's Draft: The tanker must be on a suitable draft and trim for the approach run. No hard and fast rules will be applied but Masters of visiting tankers must bear in mind the need for accurate steering with a minimum of speed coupled with good stern power ability.

As a guideline a suitable draft is provided by applying the following criteria:
(i) Moulded draft amidships (dm) in metres to be not less than:
$dm = 2.0 + 0.02L$
(ii) Trim by the stern not greater than 0.015L;
(iii) In any case draft at the after perpendicular not less than that which is necessary to obtain full immersion of the propeller(s).

This is in accordance with the requirements of the "International Conference on Marine Pollution, 1973" Regulation 13. In practice it has been found that ballast required to achieve these criteria typically approximates to 25% of Summer Deadweight.

Vessels berth port side to the starboard side of a Floating Production Storage Unit (a converted VLCC) which is moored to a SPM consisting of a yoke and rigid single anchor leg system. The FPSU is free to rotate through 360°. Vessels will berth against up to 5 inflatable Low Pressure Floating Fenders.

Wire moorings must have synthetic rope tails with a breaking strain at least 5% greater than the minimum breaking load of the wires to which they are attached.

Two long rope messengers to be ready forward and aft. Both anchors home and secured. (If reducers and/or tails are not available on board, advise Tazerka FPSU with initial ETA. Prepare to lift this equipment on board from the pilot boat).

Immobilisation of engines not permitted under any circumstances.

HOSE CONNECTION: Port side midships – 2×12 in. 150 ASA hoses. Port side derricks should be rigged for minimum 5 tonnes SWL.

Cargo manifolds must comply with OCIMF Standards for Tanker Manifolds, 1981 Edition.

LOADING/DISCHARGING: Typical VLCC pipe-line system with special manifold located 225 m. from stem.

2×12 in. hoses for Crude Oil discharge. Maximum loading rate – 7,000 tonnes/p.h.

1×8 in. hose for Fuel Oil receiving. Maximum receiving rate – 1,000 tonnes/p.h.

1×3 in. hose for Diesel Oil receiving. Maximum receiving rate – 50 tonnes/p.h.

Concurrent receipt of fuel oil and diesel oil with crude oil discharge is required.

BALLAST: No dirty ballast facilities. It is a condition of loading that vessel's ballast is clean and suitable for discharge to sea as defined in MARPOL 1973, Regulaion 13. All other ballast shall be retained on board.

MEDICAL: Emergency cases can be treated.

DENSITY: 1025.

FRESH WATER: Not available.

REPAIRS: Not available.

REPATRIATION: Not possible.

REGULATIONS: Access to FPSU not permitted.

The Authorities of all Arabic Ports subscribe to the Israeli boycott and administer checks on ships. Apart from the usual checks on Log Books, etc., store rooms, can be inspected for evidence of Israeli produce. If found, ships can be fined and/or blacklisted from all countries subscribing to the boycott.

It is recommended that stores be checked to ensure that there are no items which can be interpreted as being of Israeli origin. This includes items which bear trade marks incorporating Hebraic symbols such as the six point star, irrespective of the country of origin.

AUTHORITY: Shell Tunirex, B.P. 349, Tunis, Tunisia. *Tel:* 341.509, 341.510, 247.411. *Telex:* 13441 Shelgo Tn and Trex 13831 Tn.

NOTES

Please also advise Shipping Guides Ltd.

Turkey

GENERAL:

On arrival off Canakkale coming from the Aegean, or off Buyukdere coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain Pratique here without stopping at Canakkale, provided Agents are notified 48 hours in advance.

In the event of bad weather at Canak, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to them by the Canakkale Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is not compulsory but is advisable. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Derat Certificate.
Ship's Register.
Load-line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining Free Sanitary Pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's passport, discharge book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the passports.
(6) 1 List of Transit Passengers together with the passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a list of passengers embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Wireless transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

RESTRICTIONS:

The Bosphorus – Height of Power Transmission Line: A transmission line with a vertical clearance of 70 m. (B.A. Chart 3930, 229 ft.) has been installed alongside the power transmission line in position Lat. 41° 10.4′ N., 29° 04.7′ E. (approx.)

Masters of vessels with a similar masthead height intending to pass beneath this cable must contact the Harbour Authority for permission to pass.

NOTICE:

New Traffic Regulations in Conformity with International Regulations for Preventing Collisions at Sea (IMO Colreg of 1972) is being established in the Strait of Istanbul.

A. It is decided that a new traffic regulation conforming to the international rules of navigation be established in the Strait of Istanbul. The new regulation which will be effective in the Strait of Istanbul as of 1st May 1982, 0900 hrs. GMT (1200 hrs. LMT) is as follows:

1. The existing left side navigation regulation in the Strait of Istanbul which is applicable between Kizkulesi-Ortakoy line in the South and Tarabya burnu-Umuryeri feneri line in the North will be abolished on 1st May 1982, at 0900 hrs. GMT (1200 hrs. LMT) and then the new regulation in conformity with Rule 9 of International Regulations Preventing Collision at Sea of 1972 will come into force.

2. Ships in their transit from the Sea of Marmara to the Black Sea or from the Black Sea to the Sea of Marmara will, in accordance with Rule 9 of IMO Colreg 72, navigate throughout the Strait of Istanbul on the right side of the median line (traffic separation line) and under no circumstances will they pass to the left of the said line.

3. Ships during their transit in the Strait of Istanbul will not overtake other vessels unless they are forced to do so and will navigate inside the designated traffic lane.

B. Pilotage Services:

1. The pilotage stations are providing pilotage services on 24 hour basis for ships navigating in the Strait of Istanbul. The location of these stations are given in the international pilotage books and marked in the Strait of Istanbul chart (TR.2921).

2. In view of the unique geographical configuration and the currents of the Strait of Istanbul which present difficulties to navigation, and in order to eliminate the likelihood of an accident that may occur due to mistakes of a Master who is not fully aware of the change in the order of traffic, vessels are strongly advised to make use of pilotage services.

C. Amendments to Charts:

"Caution I" on Chart TR.2921 will be cancelled with the coming into effect of the new traffic regulation.

D. Navigational Notices:

Explanatory information and navigational warnings regarding the new traffic regulation in the Strait of Istanbul are broadcast in English and Turkish by the following by Weekly Notices to Mariners and also will be mailed.

Istanbul	(TAH)	(Yesilkoy)	:	441 – 2670 kHz
Izmir	(TAN 2)		:	458 – 516 – 1850 kHz
Mersin	(TAM 5)		:	524 – 2820 kHz
Samsun	(TAN 6)		:	416 – 2760 kHz
Bandirma	(YMH)	(Meteoroloji)	:	478 – 3636 – 6965 kHz

SHIPMASTER'S REPORT: November 1979.
Dardanelles and Bosphorus:

Vessel bound for Odessa with a full cargo of corn. According to charterer's orders (Sovfracht Moscow), vessel had to encounter 4 to 5 weeks on anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered 3 days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. 2 days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcek) Point.

When passing Canakkale, vessel slowed down and an Officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's Officer after vessel having received Free Pratique from the Sanitary Officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Tel: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:

Certificate of Registry.
Tonnage Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the Officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be 5 to 6 hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980.
Dardanelles and Bosphorus:
Dardanelles:

Pilotage: Optional, highly desirable Northbound due to the Sanitary Station at Canakkale. Southbound dependent on weather. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 14.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port.

Navigation: Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 – 2 knots.

Transit takes about 3 hours, dependent on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmara: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:

Pilotage: Optional. However overseas Masters should only attempt transit on their own in extreme cases.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the Strait).

Wait North of Rumeli Point until Pilot available. By the Montreux Agreement governing international transit of Dardanelles and Bosphorus, which will be renegotiated in 1982, pilotage will become compulsory.

Cable: 'Kavak' Pilot Station minimum of 6 hours' notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from pilot station.

Control requires: 2 Crew Lists, sights Ship's Register and Derat.

Yellow Immigration form given to Master. An Officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA 1198, International Rules change to port side of channel.

Probably the highest traffic density international waterway without compulsory pilotage and control in the world. Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of pilot station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

SHIPMASTER'S REPORT: December 1983.

Earlier this year a pilot station was established at Gelibolu at the Eastern end of the Dardanelles. It is served by a 60 ft. fishing boat, painted white. The pilotage fee for Mehmetcik-Gelibolu and Harem-Kavak is 50% of the fee for Mehmetcik-Kavak.

If taking stores/spares when passing the Bosphorus, Agents should be instructed to arrange for the delivery at the Istanbul end as it is highly undesirable to have the Agent's launch alongside at Kavak before the Pilot boards.

ALANYA: 36.32 N. 32.03 E.

BERTHING: Jetty length 277 m., depths alongside 8 m. – 12 m. Can accommodate 4 vessels.

CRANES: No shore cranes available; vessels use their own gear for loading/discharging.

STEVEDORES: Loading/discharging carried out by hired stevedores. Average rate per shift/gang of 150 tons for cotton, bagged and general cargoes.

Working Hours: 0700 hrs – 1700 hrs. Lunch break 1200 hrs. Overtime/Night work optional.

FRESH WATER: Available.

AIRPORT: At Antalya (150 km.).

CHARGES: Light and sanitary dues.

OFFICIALS: Kerim Saygi, Harbour Master.

ALIAGA: 38.50 N. 26.57 E. (See Plan Book

Aliaga Refinery Terminal.

LOCATION: *Northern Point:* Lat. 38° 50′ N., Long. 26° 57′ 36″ E.
Southern Point: Lat. 38° 50′ 10″ N., Long. 26° 46′ 33″ E

DOCUMENTS: See "Izmir".

PILOTAGE: Pilot boards 2 to 3 miles West of Tasli Burnu Light.

ANCHORAGES: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.

RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17 m. – 18 m.

MAX. SIZE: Crude oil berth designed for up to 100,000 d.w.t. Products berth designed for up to 22,000 d.w.t.

HEALTH: *Customs:* Customs post at refinery.

Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.

Health: No office locally. Officials have to be brought from Izmir.

RADIO: Cable address of Aliaga Refinery: "Petrol Izmir".

Four days prior arrival, Agents require notice of ETA (time and date) followed by any subsequent change.

TUGS: Two 2,400 h.p. tugs are on order. Meanwhile tug can be obtained, if available, from Port Monopoly Izmir at additional cost. Mooring boat also on order, meanwhile local boat available for hire.

BERTHING: Incoming tankers discharge at a "T" type oil jetty just South of Tasli Burnu Light. The jetty runs parallel to the coastline and is situated Lat. 38° 49′ 30″ N., Long. 26° 57′ 30″ E. approximately. The outer arm of the jetty, 317 m. long, is designed for crude oil tankers of 75/100,000 d.w.t. on the outer side and for tankers of 25,000 d.w.t. on the inner. The outer S.E. arm is designed for products tankers of up to 22,000 d.w.t. and the inner berth for small tankers of up to 5,000 d.w.t.

The crude oil berth is roughly in the centre of the N.W. arm and has 4 loading arms. The jetty is protected by 4 pivotal concrete buffers.

The products berth is similarly in the centre of the arm and is equipped with flexible hoses. Crude oil pumping rate up to about 3,000 t.p.h.

FRESH WATER: Available.

FUEL: Available.

AIRPORT: Izmir is not an international airport.

DELAYS: Cargo is nearly always transhipped leading to unforeseen delays.

SUPPLIES: From local towns; adequate fresh fruit and vegetables and meat.

AUTHORITY: See "Izmir".

AGENT: See "Izmir".

ANTALYA: 36.52 N. 30.46 E. (See Plan Book)

PILOTAGE: Compulsory. 1 pilot boat and 1 service boat available.

TUGS: 3 tugs and 4 mooring boats available.

BERTHING: Outer breakwater is 1,540 m. long, inner breakwater is 860 m. long. Port area is 331,600 sq.m.

Vessels can enter port and anchor at any time with a Pilot aboard. Manoeuvring area has 400 m. diameter, depths 8 m. – 11 m.

7 operating quays, 1 passenger quay and a military quay available.

Quay No.	*Length* (m.)	*Depth* (m.)
1	150	10.00
2, 3	165	5.5 – 6.5
4	60	8.00
5, 6	290	8.00
7	170	10.00
8 (Passenger Quay)	170	10.00
9 (Military Quay)	270	5.50

Storage:

Open warehouse area is 34,000 sq.m. Closed warehouse area is 3,000 sq.m. Closed warehouse (for combustible cargo) is 400 sq.m.

PORT EQUIPMENT:

4 cranes (1×25 tons, 3×5 tons).
3 mobile cranes (1×6 tons, 1×16 tons, 1×20 tons).
2 forklifts (3 tons).
5 forklifts (2 tons).

BULK CARGO FACILITIES: 4 alumina silos each of 4,000 tons capacity which can load into vessel by conveyor belt at a rate of 250 t.p.h.

STEVEDORES: Gangs of 6 – 8 men each, load/discharge cotton at rate of 100 tons per shift, general cargoes 125 tons per shift.

Working Hours: From 0800 to 1700 hrs. Lunch break from 1200 to 1300 hrs. 3 hours' overtime is optional.

AIRPORT: Antalya airport is 22 km. from the port, 12 km. from Antalya city centre.

HOLIDAYS: Work is possible on Turkish holidays (at overtime rates) except the movable religious holidays of the first days of Kurban Bairam and Shaker Bairam.

DEVELOPMENTS: TMO and SEKA quays (3) are still under construction for passenger vessels, grain and lumber, completion mid-1985.

Following machinery and equipment will be installed in the near future:

2 shore cranes 10 tons each.
1 shore crane 5 tons.
1 mobile crane 25 tons.
8 mobile cranes 10 tons.
2 forklifts 10 tons
2 forklifts 5 tons.
10 forklifts 3 tons.

AUTHORITY: Denizcilik Bankasi TAO is in charge of loading/discharging.

Local Officials: Harbour Master: Ali Ozkan. Sanitary Authority: Yilmaz Ekmekcioglu. Customs Authority: General Directorate of Customs. Maritime Bank (Antalya) Manager: Osman Kucuk.

AGENT: Gulf Agency Co. Ltd., P.O.Box 116, Antalya, Turkey. Tel: 13342, 16054, 25685. Telex: 56218. Cables: "Gacship", Antalya.

BANDIRMA (including Bagfas): 40.22 N. 27.59 E.

(See Plan Book)

LOCATION: Bandirma is situated on Southern side of Marmara Sea about 63 nautical miles from Istanbul. Admiralty Chart No. 294.

PILOTAGE: Compulsory for vessels berthing/unberthing. 2 Pilots available; 24 hours a day.

ANCHORAGES: Good anchorage in roads a few cables off the entrance. Depths up to 7 fathoms.

BREAKWATERS: North Breakwater length 995 m. and West Breakwater length 250 m.

TUGS: 1 tug 1,025 h.p., 1 tug 970 h.p. and 1 tug 250 h.p. 2 mooring boats also available.

BERTHING:

No.	*Berth*	*Length* (m.)	*Depth* (m.)
1	Ferry Terminal	130.00	8.00
2	—	284.00	10.00
4 – 5	—	324.00	10.00
6	—	130.00	10.00
7 – 8	Deep Water Berth	379.00	10.30
9	Cevher Rihtimi	203.77	10.00
10	Etibank Rihtimi	100.00	8.0 – 9.0
11	Komur Rihtimi	190.00	

Additional facilities with depths of 4.0 m. are available.

Bagfas: Bagfas Iskur Fertilisers:

Location: Bagfas Iskur Fertilisers Jetty is situated on Southern side of the Marmara Sea about 5 nautical miles from Bandirma. (Admiralty Chart No. 294).

Pilotage: The jetty is private but pilotage/tug boat/mooring boat services are operated by TCDD (Turkish State Railways).

Anchorage: Port of Bagfas is an open port, but good anchorage in roads a few cables off the entrance in depths up to 7 fathoms.

Accommodation: Port of Bandirma/Bagfas fertilisers jetty, length 77 m., depths between 11 m. and 9.30 m.

NOTE: From jetty to each mooring dolphin 61 m.

Port Facilities: One moving crane available on the jetty with 10 tons lifting capacity which loads bulk cargoes into bunker which is connected to conveyor belt with discharging capacity up to 3,000 tons daily.

Receiving capacity of products (liquid Ammonia) is 350/400 tonnes per hour.

Working hours from 0800 to 0200 hrs.

Imports: Mainly Phosphate, Acid, Phosphoric Acid, Sulphur, Ammonia and various fertilisers.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival.

The loading/discharging capacity per hold in 8 hours is 100/150 tons for bulk, 70/100 tons for baled and 40/60 tons for mixed cargo.

CARGO HANDLING:

Cranes: 10 × 5 ton capacity (on rail)
2 × 5 ton capacity
2 × 5 ton capacity (rubber wheeled – mobile)
1 × 25 ton capacity (fixed)

EQUIPMENT: 3 towing tractors, 2 trucks, 1 forklift × 5 ton capacity, 2 forklifts × 3 ton capacity.

Warehousing: 2 warehouses available at dockside where vessels can berth 20 m. to 30 m. away.

Measurements of warehouses: Length 100 m., width 35 m., height 8.6 m. minimum, 12.3 m. maximum.

Each gang for fertilisers discharging contains 9/10 men. Extra labour can be supplied from either Port Authority or outside which can be arranged by Agent in best possible way.

Exports: Colemanite, Ulexite, Tincal in bulk, Borax/Boric Acid and Byrites in bags, Tomato Paste in cartons.

Imports: Fertilisers and general.

FRESH WATER: Available. Rate 25 t.p.h.

FUEL: No bunkering facilities in Bandirma. Can only be supplied by barges from Istanbul which requires 7 days' advance notice.

SHIP'S OFFICER'S REPORT: August 1979.

Port Limits: From position Lat. 40° 21.8′ N., Long. 27° 56.9′ E., South to shore and East to shore.

Documents: 6 Crew Lists, remainder as for Istanbul.

Pilotage: Pilotage is carried out day and night. There are 2 Pilots at the port and one Pilot is always on duty. The standard of pilotage is good. The Pilot joins the vessel outside (0.5 mile) the breakwater from a boat which has a black hull with white superstructure. The approaches to Bandirma are clear and free from obstructions. The pilot station has no VHF and Pilots should be ordered through the Agent. If the Pilot does not meet the ship on arrival he can be called by sounding the ship's whistle. Vessels awaiting Pilots anchored 2.5 cables off the breakwater.

Anchorages: Good anchorage in 30 m. 0.5 miles North of North Breakwater Light.

Restrictions: The only restriction that is known is max. draft 12 m.

Max. Size: Max. depth alongside 12 m.

Health: See "Istanbul".

Radio: Contact made through Istanbul Radio, TAH.

VHF: None.

Radar: None.

Tugs: There are 2 tugs available of 1,000 h.p. and 300 h.p., no VHF. Ship's lines are used.

Berthing: Vessels usually use 1 anchor when going alongside.

Cranes: There are at present no shore cranes available but installation is being carried out and shore cranes should be available from March 1980.

Bulk Cargo Facilities: No specialised equipment available, bulk cargo is loaded using ship's gear from skips carried on trucks. The average loading rate is 250 tons per shift/gang.

Stevedores: Shippers or receivers order stevedores 1 day in advance through the local union. The number of gangs available depends on the number of ships in port. The normal working hours are from 0800 – 2200 hrs. with 1 hour for lunch. The average loading rate for all bulk cargoes is 250 tons gang/shift.

Medical: Advance notice for serious cases advisable. Hospital and doctors available.

Tankers: No facilities.

Density: 1016.

Fresh Water: At present only available by 5 ton road tanker at a cost of $5 per ton. Fresh water should be available by pipe-line to all berths by March 1980.

Fuel: Not available.

Consuls: None.

Repairs: Only small repairs carried out in local workshops.

Dry Docks: None.

Surveyors: Nearest in Istanbul.

Gangway/Deck Watchmen: Carried out by ship's crew, service of watchman not required.

Hatches: Opening and closing carried out by ship's crew.

Customs Allowances: 200 cigarettes and 1 bottle on arrival. If the ship is in port for any length of time Customs will open the bond and make a new issue, usually once a week.

Cargo Gear: All cargo work carried out by ship's gear.

Repatriation: Carried out without any problems, a daily ferry connects Bandirma with Istanbul, taking about 4 hours.

Airport: Nearest is Istanbul.

Time: GMT plus 3 hours.

Holidays: See "Istanbul".

Police/Ambulance/Fire: Police 3345. Ambulance 3536. Fire 1013.

Telephones: Not available.

Services: No special services are available.

Shore Leave: No restrictions.

Identification Cards: No shore passes issued, seaman's book is sufficient.

Regulations: No special regulations.

Delays: The only delays occur if the port is congested and ships have to wait at anchor. Ships are berthed on "first come first served" basis.

Developments: Bandirma is a new port and is not scheduled for official opening until March 1980, by this date all shore facilities should be available.

General: The prevailing wind is from the N.E. and sometimes blows very hard down Bandirma Korfezi, this should be considered when mooring.

AUTHORITY: TCDD (Turkish State Railways), Liman Mudurlugu, Bandirma.

Turkiye Cumhuriyeti Devlet Demir Yollari-Isletmesi Genel, MD, Talat Ps Bul, Ankara, Turkey. Telex: 42571.

AGENT: See "Istanbul".

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to boarding Officer.

Certificate of Registry.
Derat Certificate.
Crew List.
Name of Agent in Istanbul.

Vessels proceeding to a Turkish port will require in addition:

4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.

PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAM 7. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.

Also see "Shipmaster's Report".

ANCHORAGES: Vessels may anchor in position Lat. 40° 09′ 00″ N., Long. 26° 23′ 09″ E. in depths of 12 to 16 fathoms.

MAX. SIZE: Vessels of any size may navigate Canakkale Strait.

HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.

Also see "Shipmaster's Report".

RADIO: Radio station TAM 7 situated at local Post Office.

TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.

BERTHING: Agents require at least 24 hours' notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.

STEVEDORES: Arranged by Agent on basis of Master's ETA.

MEDICAL: 12 hours' notice required to arrange medical assistance. Hospital facilities available.

DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCES: Crew allowed to retain only quantities for personal consumption.
IDENTIFICATION CARDS: Required for crew members going ashore.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
DEVELOPMENTS: New installations and berths under construction.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot station has been established at Mehmetcik Point (Cape Helles); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and Southbound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's Register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc., also name of ship's Agent in Turkey.

AUTHORITY: Canakkale Liman Baskanligi.
AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.50 E. (See Plan Book)

PORT LIMITS: A vessel that has arrived in Izmit anchorage is considered an "arrived ship".
DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique Received from Canakkale or Buyukdere.
Customs:
Crew Declaration.
Ship's Stores List.
Cargo Manifest.
Customs Clearance from last port.
Immigration:
Crew List.
Passenger List.
Shore leave passes arranged by Agent. Passenger embarkation/disembarkation not possible.
PILOTAGE: Compulsory. 24 hours' service available. ETA must be confirmed 24 hours prior to arrival. Pilot boards 5 cables off the port entrance, Pilot on VHF Channel 16. Berth arranged by Agent through the Harbour Master. Berthing or anchoring permission must be received by Agent before arrival at Darica Pilot Station.
ANCHORAGES: Forbidden near the port. Waiting anchorage is at Izmit, 4 miles East of Derince. It is compulsory for vessels with explosives to anchor in Yarimca Anchorage.
VHF: See "Pilotage".
TUGS: Compulsory for vessels over 500 g.r.t.
500 g.r.t. – 5,000 g.r.t. One tug.
5,000 g.r.t. – 25,000 g.r.t. Two tugs.
25,000 g.r.t. – 50,000 g.r.t. Three tugs.
1×970 h.p. and 1×1,500 h.p. tug available. Mooring boat arranged by Pilot.
BERTHING:

Berth No.	*Length (m.)*	*Depth at LW (m.)*	*Remarks*
1	110	1.5 – 4.5	For small coasters
2	88	4.7 – 6.0	
3	117	8.0 – 8.5	
4	90	5.5 – 8.0	
5	55	3.5 – 12.5	For small coasters
6	220	12.5 – 10.5	
7	160	10.5 – 7.5	
8	110	7.5 – 3.0	

CRANES:

Berth No.	*No. of Cranes*	*Capacity (Tonnes)*	*Remarks*
1	2	5	
2-3	2	5	
4	2	5	
5	None	25	(Fixed crane, may be hired)
6	1	25	(Fixed)
	2	5	
	1	10	
7	2	5	
8	None	—	

22 mobile cranes with capacity 3 tonnes – 25 tonnes also available.

BULK HANDLING FACILITIES: Two silos with capacity 5,000 tons each. Loading capacity 160 t.p.h., discharging capacity 120 t.p.h. No vessels can berth alongside.
STEVEDORES: Normally working is in 2 shifts. First shift from 0800 hrs. – 1630 hrs. Second shift from 1630 hrs. – 2400 hrs. Labour provided by Port Authority on request from Agent.
FRESH WATER: Available at all berths.
FUEL: Fuel and diesel, also marine lubricants can be obtained by trucks through suppliers.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever is to the vessel's advantage.
CERTIFICATES:
Safety Construction.
Safety Equipment.
Safety Radio.
Load Line.
Tonnage.
CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per week per crew member.
REPAIRS: Most deck and engine repairs can be carried out.
SURVEYORS: Available from Istanbul through Agent.
REPATRIATION: Crew changes and repatriation can be carried out with little difficulty.
AIRPORT: 130 km. to Istanbul Yesilkoy International Airport.
TIME: GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Emergency services available in the port.
SERVICES: Arranged by Agent, from Istanbul.
SHORE LEAVE: No restrictions. Also see "Documents".
HOLIDAYS: (1985) 1st January, 23rd April, 19th May, 19th-22nd June, 24th-28th August, 29th October.
AUTHORITY: TCDD Derince, Limani Isletme Mudurlugu (General Directorate of Turkish State Railways-Derince), Derince, Turkey. *Tel:* 31015. *Cables:* TCDD Derince Limani. *Contact:* Dundar Erkmen, Port Captain.

Turkiye Cumhuriyeti Devlet Demir Yollari – Isletmesi Genel, MD, Talat Ps Bul, Ankara, Turkey. Telex: 42571.

EDINCIK: 40.21 N. 27.51 E.

LOCATION: In the South of Erdek and on the West coast of Kapidag Peninsula. See BA Chart No. 884.
PILOTAGE: Pilotage compulsory. Pilot comes from Bandirma.
MAX. SIZE: 5,000 d.w.t.
BERTHING: This is a colemanite loading berth of Etibank, where loading is effected by conveyor.

Five dolphins exist in front of the conveyor house and in enough deep water for mooring and shifting of vessels. As there is little movement of the conveyor, vessels have to shift in order to load bulk cargo in all hatches.
DENSITY: 1025.
FRESH WATER: Available.
TIME: GMT plus 3 hours.
GENERAL: Formalities with the Harbour Master are carried out in Erdek but all others in Bandirma. All services to be supplied from Bandirma.

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
3 Provisions Lists, including Bonded Stores.
3 Cargo Manifests.
3 sets Bills of Lading.
PILOTAGE: Pilotage available night and day for use in port under all weather conditions. Pilotage is carried out by qualified and experienced Pilots.

Compulsory for ships over 500 tons to have pilot service, and for ships over 1,000 gross tons to have pilot and tug service.

Ships will take Pilots on board at a reasonable distance off the breakwater's red light. It is strongly advised that ships awaiting Pilot should avoid drifting South of the transit line of the green light on the breakwater ruin (Boshane Mendiregi) and the Citadel ruin which can be seen on top of the hill. (Transit direction is approximately 041° true) The distance from the entrance of the port to the dock is approximately 4.6 cables, and the depth gradually decreases from 10 fathoms to 5 fathoms at the dock side.

In stormy weather, if the Pilots are unable to board, ships will proceed to a point in the Inner Port enabling the Pilots to board.
ANCHORAGES: Vessel waiting for Pilot may anchor about 1 mile West of breakwater red light. The bottom of the port is muddy and sandy, and therefore ships can lay at anchor in any weather without fear of drifting.
RESTRICTIONS: *Eregli:* The depth of water in Outer Harbour is 15 m. (49.2 ft.) and Inner Harbour has 10 m. (35 ft.)

Usunkum: The length of Usunkum breakwater is 1,250 m. The depth of water is 42 ft. Under normal weather conditions ships up to 34 ft. (inclusive) can enter into the Inner Harbour and berth alongside the dock safely. Average tide is about 1 ft. The width of channel is 200 m. but safe lane is 144 m. wide.
MAX. SIZE: *Eregli:* Under normal weather conditions ships up to 35 ft. draft can enter Inner Harbour and dock safely.

Usunkum: Up to 34 ft. draft can be berthed.
Also see "Developments".

HEALTH: Pratique given after port doctor's visit on vessel's arrival. Crew vaccination certificates should be presented if required. Sanitary certificate required for any live animals on board.
RADIO: Istanbul Radio, TAH.
TUGS: Available. Normally join vessel outside the breakwater. Ship's lines always used. Towing is done by one or two 600 h.p. diesel tugs. Towage is required for entering, leaving, berthing and shifting according to the size of the ship. Ships having a draft of over 20 ft. shall not use their own propellers in the Inner Harbour except in case of danger or absolute necessity.

Vessels with a draft greater than 30 ft. may be asked by the Port Authority to use a second tug at a very high cost.
BERTHING: *Eregli:* Inner quay is about 400 m. long for general cargo and 135 m. for coal loading.

The docks have loading and unloading facilities, a railway track and open and closed warehouses at a very short distance. The railroad is a local system and is not connected to the Turkish railroad network. It has a length of approximately 16 km. for coal mine operations.

Buoys: There are four mooring buoys in the port 105 m. apart and at a distance of 170 m. from the breakwater at an average depth of 8 fathoms. Buoys anchored with 50 tons concrete blocks and marked I, II, III and IV starting from the main breakwater head.

It is possible and safe to moor to the buoys with or without anchor and to moor ship's stern to breakwater (if the ship's length is adequate).

Usunkum: Usunkum has one dock of about 280 m. length and one ore unloading dock about 220 m. length. Max. size 35,000 d.w.t. Max. draft 35 ft. Max. LOA 665 ft. Discharge rate 600 t.p.h. Coal also discharged, rate 600 t.p.h. also one small general-purpose quay for small ships.

See "Developments".
CRANES: 2 × 25 tonne electric cranes; 2 × 30 tonne cranes for coal; 1 × 160 tonne heavy lift derrick.
STEVEDORES: At least 24 hours' notice required to order gangs.
MEDICAL: All details of any medical assistance required to be given to Agent with one hour's notice. Hospital facilities available. Vaccinations can be arranged.
FRESH WATER: Can be delivered at 40 t.p.h.
REPAIRS: Small repairs such as lathing, levelling, welding, blacksmith work and woodwork can be effected ashore.
OPENING/CLOSING HATCHES: By either stevedores or crew according to Charter Party.
CUSTOMS ALLOWANCES: 200 grams tobacco and two bottles wine/spirits allowed each man per week.
IDENTIFICATION CARDS: Needed for crew going ashore.
CONSULS: No local representatives.
REPATRIATION: No facilities exist.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays.
POLICE/FIRE/AMBULANCE: Police tel. 28; Fire tel. 00; Ambulance tel. 500.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew permitted to go ashore at all times.
DEVELOPMENTS: The channel at Usunkum is being dredged to 14 m. and the inner harbour to 13 m. It will be possible to berth vessels up to 60,000 d.w.t. in the near future.
AUTHORITY: Karadeniz Eregli Liman Baskanligi.

FINIKE: 36.16 N. 30.13 E.

BERTHING: Jetty 80 m. long, depths alongside 4.5 m. – 5.5 m. Vessels of more than 3,000 g.r.t. cannot berth alongside, but anchor outside the port.
CARGO HANDLING: Vessels at anchor are worked by 4 lighters towed by a motor boat. Only 200 tonnes of cargo worked per day by lighters.

At the jetty, 300 – 500 tonnes of cargo are handled per day.
AIRPORT: At Antalya (280 km.).
GENERAL: Port is dangerous in Winter.
OFFICIALS: Halil Tarhan, Port Master.

GEMLIK: 40.25 N. 29.06 E. (See Plan Book)

SHIPMASTER'S REPORT: July 1980.
VESSEL: L.P.G. Carrier – 32,000 g.r.t. Vessel discharged ammonia.
FORMALITIES: Formalities were dealt with quickly. Bonded stores are sealed and remain sealed until clearing outward from last Turkish port. Application may be made to open under Customs control and these applications were granted.

Travelling manifests of cargo and ship's stores are made up and accompany the vessel from port to port.

Papers required:
2 Stores Lists.
6 Copies Cargo Manifest.
6 Crew Lists.
2 Vaccination Lists.
1 List of Monies in ship's safe.
2 Health Declarations (including the clearance from Canakkale).
2 Lists of Ports of Call.
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ship Particulars.

APPROACHES: Chart BA 1005.

The inset on Chart BA 844 does not quite cover the area in which the berth is situated. (Position of Ammonia section of quay Lat. 40° 25′ N., Long. 29° 06.5′ E.).

The approach itself presents no difficulty since good fixes are available both by radar and visually. Similarly, although care is needed, an approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must be expected through the island passages and fishing vessels will be met within Gemlik Liman. Some of these craft are very small although sea conditions are invariably smooth and they should show up well on the radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may be used although this should be chosen to Eastwards of the berth to keep the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave here however short a stay, will be able to give advice on choosing a suitable anchorage, should this be necessary.
PILOTAGE: The Pilot may be summoned by whistle and will board from a small, open fishing craft. Gangway or pilot ladder must be lowered to the water's edge.

No night time berthing. Unberthing may be carried out at night at the Master's discretion and presents no difficulty. The starboard anchor may be used for berthing (not on this call) and is used to heave the vessel off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead as far astern as possible, the vessel hove astern about 30 m. (to ensure that the bow does not fall inside the line of the quay and foul the 'bridge' to the forward mooring dolphin), everything let go aft, hard to port and dead slow ahead on the engine until the vessel is at an angle of 45°. The vessel is then backed out, after which the Pilot leaves.
VHF: Not available.
TUGS: None available.
BERTHING: Vessel always berths port side alongside.
REPAIRS: No facilities.
SURVEYORS: With sufficient notice Lloyd's Surveyor may be ordered from Istanbul.

SHIPMASTER'S REPORT: September 1980.
FORMALITIES: Customs Officer stays on board whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up and accompany the vessel from port to port. For Cargo Manifests I use the U.S. Customs Declaration of Cargo Form with the U.S. Seal blanked out, Authorities had no objection.
PILOTAGE: If vessel requires an outward Pilot through the Dardanelles remember to order in good time, 12 hours minimum order time is required, especially when the vessel's stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and is generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it will foul the quay.
BERTHING: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern Berth for loading bulk or bagged fertiliser has 2 loading booms. This berth, if it has another vessel on it, may well cause some problems on leaving the Western Berth which is the liquid ammonia facility. When the vessel is in position with the liquid chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin, connected to the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete structure with good fendering.

Minimum depth alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the fertiliser berth which causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 1019 – September 1980.
DISCHARGING: 2 chicksans, liquid line 10 in., vapour line 10 in., both 150 ASA, both can be used for either liquid or vapour so be careful when connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 1980 – 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at over 1,000 t.p.h. depending on shore tank ullages.

Fertiliser plant usage of raw ammonia presently 400 tonnes per day increasing in January 1981 to 600 tonnes per day. The actual production of ammonia is expected to commence in about five years' time.

Shore surveyor attended and his figures taken as quantity discharged. Attends the vessel at subsequent Turkish ports by flying between ports, not allowed to stay with vessel. Very helpful. No gauging of shore tanks.
GENERAL: No fuel. Available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the Immigration post is not in Gemlik.
Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.
Doctor: Available at Bursa about 30 km. (30 minutes).
Dentist: In Gemlik, near Agent's office.
Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik.

SHIPMASTER'S REPORT: November 1980.
BERTHING: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertiliser berth without any difficulties, proceed slowly. Unberthing at night.

DISCHARGE: Very keen on correct discharge temperature. Use forward liquid line, aft vapour line. Shore tanks hold 40,000 tonnes total (20,000 tonnes each).

FRESH WATER: Available but not potable. At L400 per tonne (1.90 pounds). A fire tender is used as a pump at chicksan. I believe it is well water.

AUTHORITY: Gemlik Directorate, Port of Gemlik, Liman Baskanligi, Gemlik, Turkey. *Tel:* 1133. Gemlik Customs House: *Tel:* 1411; Gemlik Police Station: *Tel:* 1628; Gemlik Hospital: *Tel:* 2329.

GIRESUN (Kerasunda): 40.56 N. 38.24 E.

(See Plan Book)

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins Lat. 40° 56′ 40″ N., Long. 38° 19′ 40″ E. and Lat. 40° 54′ 51″ N., Long. 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with Lat. 40° 56′ 15″ N., Long. 38° 27′ 00″ E. and Lat. 40° 55′ 10″ N., Long. 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in true North direction.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGES: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.

TUGS: Compulsory for all foreign flag vessels.

BERTHING: The port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger berth has been converted to a general cargo berth and is equipped with a shore crane of 3 tons capacity. This quay is 150 m. long and the water depth is 8 m.

B – The cargo wharf: This is reserved for cargo ships. It is 250 m. long and the water depth is 7 m. The cargo wharf is equipped with shore cranes of 3 tons capacity.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater, North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1700. Four gangs available.

CRANES: 4 cranes available, 3 tonnes – 6 tonnes.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: No repair facilities.

AUTHORITY: Giresun Port Authority, Denizcilik Bankasi T.A.O., Giresun Liman Isletmesi Mudurlugu, Giresun. *Tel:* 2447, 1490 (Port Director). *Telex:* 22188 Giresun. *Contact:* Port Manager.

GOLLUK: 37.14 N. 27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:

4 copies of Crew Lists.
2 copies of Store Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.

N.B. Ship's particulars Form is to be filled by Masters upon arrival and remitted to the Port Authorities.

RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.

PILOTAGE: Pilot not available.

HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by Sanitary Officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.

RADIO: Izmir Radio Station, call letters TAN2. Istanbul Radio Station, call letters TAH.

TUGS: Not available.

BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

GOLOVASI, Botas (Ceyhan) Terminal: 36.53 N. 35.56 E.

(See Plan Book)

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Iskenderun Harbour Master's Office and the harbour area is bounded by the following points:

(a) Point (A) on the shore, Latitude 36° 52′ 12″ N. and Longitude 35° 55′ 07″ E., to point (B) on the sea, Latitude 36° 49′ 30″ N. and Longitude 35° 56′ 40″ E.;

(b) and from point (B) to point (C) Latitude 36° 50′ 30″ N. and Longitude 35° 59′ 30″ E.;

(c) and from point (C) to point (D) on the shore Latitude 36° 53′ 25″ N. and Longitude 35° 56′ 41″ E.;

(d) and the shore line between points (A) and (B).

DOCUMENTS:

7 Crew Lists
7 Passenger Lists
2 Store Lists
2 Crew Declaration Lists
1 Free Pratique
Last Port Clearance
Loadline, Ship Safety Construction, Safety Radio, Safety Equipment Certificate

Agent has to take the last four certificates to the port Authority at Iskenderun.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ship 1 mile South of the pier in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

After the ship has berthed, the Pilot and the Loading Master stay on the ship and require separate cabins.

ANCHORAGES: In the event of berth not being available on arrival, vessel must anchor in the anchorage zone (To the S.S.E. of the berth beyond the prohibited area). Terminal Shore Control will keep vessel advised of expected time of berthing, etc., by means of VHF on Channel 16.

Prohibited Anchorage: Vessels on arrival shall not anchor within a radius of 1 mile from the light at the end of the jetty.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting.

MAX SIZE: 300,000 d.w.t. at outer berths and 150,000 d.w.t. at inner berths.

RADIO: It is essential that tankers bound for the Botas Terminal communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board. Vessel should request Agent to forward the information to Botas.

VHF: Botas Terminal Shore Control on VHF Channels 16 and 24.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

Channels 16 and 24 always watched. Channel 10 is for the loading operations and manoeuvring. Not to be used for other purposes.

When the ship makes contact with Botas, the following information to be given to the Iraqi representative:

Ship's name, nationality, deadweight, cargo required, loading rate required, dirty, clean and permanent ballast quantity and deballasting time.

RADAR: There is no port Control Radar. The approach from the SW or South can be made without difficulty as the coast line provides very good fixes.

TUGS: There are 4 tugs available to assist in berthing and unberthing. Three are 2,600 h.p. each and the other 1,200 h.p. The tugs are all provided with fire fighting equipment.

For vessels of 1,000 g.r.t. up to 4,000 g.r.t., which are berthing/unberthing at the jetty, it is compulsory to take at least 1 tug. 2 tugs for vessels from 4,001 g.r.t. up to 50,000 g.r.t., 3 tugs for vessels from 50,001 g.r.t. and over.

Depending on weather and having regard for safety conditions, additional tugs may be assigned by Botas or Port Master's Office or requested by vessel.

BERTHING: Four loading berths available:

Berth No.	*Max. size*	*Depth Alongside*
1 (Outer East)	300,000 d.w.t.	72 ft. – 98 ft.
2 (Outer West)	300,000 d.w.t.	72 ft. – 98 ft.
3 (Inner East)	150,000 d.w.t.	66 ft. – 72 ft.
4 (Inner West)	150,000 d.w.t.	66 ft. – 72 ft.

LOADING:

Berth No.	*Max. Loading Rate cu.m.p.h*	*Loading Arms*	*Ballast Arms*
1	20,000	4×20 in.	20 in.
2	20,000	4×20 in.	20 in.
3	10,000	4×16 in.	16 in.
4	10,000	4×16 in.	16 in.

Maximum loading rates are dependent upon availability of loading lines on the ship.

Loading Master is the adviser for all mooring, unmooring operations and communications with shore, etc.

Derricks and Cranes: Derricks and cranes S.W.L. of 5 tons are recommended.

Loading operations and shore communication: Ship's tanks are inspected by Loading Master and passed as suitable for loading.

Responsible ship's officer must certify to the Loading Master that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Loading Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.

The Loading Master will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Loading Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of Readiness will be received by the Loading Master. Provided the vessel is ready to load, lay time will commence 6 hours after receipt of Notice of Readiness.

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Loading Master has received instructions to stop loading immediately this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipe-lines and hoses shall, while rigged for loading crude oil, be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

BALLAST: Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 km., Adana 75 km., and Iskenderun 65 km., distance from Botas (Ceyhan) Terminal.

DENSITY: Salinity about 39 p.p.m.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available.

CONSULS: At Iskenderun.

REPAIRS: Not possible.

SURVEYORS: There are no Classification Societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 km, from Botas (Ceyhan) Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (January 1st); Sports Day, (May 19th); Victory Day, (August 30th); National Holiday from October 28th (1200 hrs.) to October 29th (2400 hrs.); Shakear Bairam (3.5 days, movable); Kurban Bairam (4.5 days, movable).

The terminal works all year round.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: There are no special services.

SHORE LEAVE: Crew permitted to go ashore with shore passes.

It is forbidden to walk on jetty and in terminal area. A vehicle is obtained by Botas for the needs (transportation) of ship's personnel on jetty and in terminal area. The vehicle goes only to the Golovasi (Ceyhan direction) and Incirlik (Iskenderun direction) gates. No fee will be paid.

IDENTIFICATION CARDS: Seamen's book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the international oil tanker and terminal safety guide.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: It is forbidden for provisions or other items to be received or discharged whilst loading is in progress. Launches, other than the Botas' mooring launch, should not lie alongside the vessel.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The berth operator is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.
(b) Fire-mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 l.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.
(b) 2 deck level manual water spray monitors of 450 l.p.m. and 2 foam branch pipes of a capacity of 450 l.p.m. of foam delivery used to extinguish fires on the manifolds.
(c) A number of portable dry chemical and CO_2 extinguishers are located in various locations.
(d) Numerous numbers of foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.
(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The Emergency and Fire Signal is:

1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: 1978.

Documents: Turkish health form (supplied when vessel boarded), 2 stores lists, 2 crew declarations, 8 crew lists.

Pilotage: Compulsory. Pilot meets ship 1 mile South of the pier at the anchorage zone.

Anchorages: At least 1 mile South of Southern end of jetty.

Restrictions: Max. drafts 72 ft. to 98 ft. at berths 1 and 2 and 66 ft. to 72 ft. at berths 3 and 4.

Max. Size: 300,000 d.w.t.

Health: Free Pratique granted at anchorage or when berthed.

Radio: Via Mersin.

VHF: Communicate with Botas Terminal Channel 16 at least 4 hours before arrival. Uses Channel 22 for talking.

Radar: None.

Tugs: 3 of 2,600 h.p. and 1 of 1,200 h.p. All provided with fire fighting equipment.

Berthing: Normally facing Southwards (bow to sea) for emergency purposes.

Cranes: 1 on each berth.

Medical: A doctor is available ashore but vaccinations not possible.

Density: 1025.

Fresh Water: Available at all berths, arranged through Agent.

Fuel: Not available.

Fire Precautions: I.O.T.T.S.G. safety check list is utilised.

Consuls: See "Iskenderun".

Repairs: Repairs to engines alongside may be permitted with written permission from Terminal Management.

Dry Docks: None.

Surveyors: None.

Gangway/Deck Watchmen: Not required.

Customs Allowances: 200 cigarettes and 1 bottle per man.

Repatriation: Possible via Iskenderun and Istanbul.

Time: GMT plus 3 hours in November 1978.

Services: Limited fresh stores available.

Shore Leave: Permitted.

Identification Cards: Shore passes issued.

Mail: To U.K. takes about 5 days. None received due late orders.

General: No large scale B.A. chart available but B.A. 2632 is adequate if radar working. A Turkish Chart No. 334 is available. The position we anchored (2.1 miles South of jetty in 35 m.) was thick mud on bottom and good holding ground with wind from North about Force 7. At present berthing only during daylight but sailing any time. Each berth is equipped with shore gangway. Dirty ballast can be accepted up to 40,000 tonnes and clean up to 60,000 tonnes at a rate of 4,500 t.p.h. Loading rates up to 20,000 cu.m.p.h. on berths 1 and 2 and up to 10,000 cu.m.p.h. on berths 3 and 4. S.G. about 0.8459 (API 35.78) at 60/60F. with a loading temperature (November) of about 80°F. The oil is Kirkuk blend crude from Iraq. There are facilities for storing about 1,000,000 tonnes. Berths 1 and 2 manifold 6×20 in. with reducers to 16, 18 or 20 in. if required. Berths 3 and 4 manifold sizes 16 in. with reducers to 12, 14 or 16 in. if required. Automatic couplings may be used. At berths 3 and 4, 4 hoses can be connected if distance between ship's manifold centres is more than 150 cm. There is a Doppler approach system on jetties but it has not been calibrated. All moorings on quick release hooks and usually 3 head, 2 breast and 2 back spring moorings for 140,000 d.w.t. tankers, same aft. For berthing 2 tugs make fast with their own lines, 1 tug at each end of main deck and 3rd tug stands by. For unberthing 1 tug makes fast to bow and stern with ship's rope (not wires) and 3rd tug stands by. Pilot will not use pilot hoist but requires accommodation ladder when in ballast and disembarks with pilot ladder. 7 Notices of Readiness and dry certificate required by Pilot, 1 of each and 1 ullage report required by Agent. Agent takes ashore certificates of Safety, Construction, Safety Equipment, Safety Radio, Loadline and Class. No early departure procedure available and ship stays on berth up to 2 hours after loading awaiting papers. N.O.R. is made out to I.N.O.C. – Bagdhad – Botas – Ceyhan. Pilot requires separate cabin as he acts as Loading Master, also cabin required for 1 Customs official and possibly Agent. Abnormal ship/shore differences appear to be usual as evidenced by the fact that when you handed them a letter of protest they hand you a reply at the same time.

Authority: Botas District Management.

SHIPMASTER'S REPORT: December 1980.

Botas and Toros Gubre Piers:

Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertiliser pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertiliser pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.

VHF: The fertiliser pier has no VHF.

Botas oil pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros fertiliser pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.

Anchorage: Toros Fertiliser: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.

Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros berth in about 15 minutes.

Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.

Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort Knozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing push with bow line onboard. When unberthing use ship's line which is doubled up.

Botas: 300,000 d.w.t. – 4 tugs
150,000 d.w.t. – 3 tugs
Toros: – 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.

Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.

Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to Force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.

Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side to on West side. Liquid – Starboard side to on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60′ N., 35° 59.04′ E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chicksan.

Depths each berth minimum 12.5 m.

Mooring/Fenders: Toros: This can be a problem, and is dependent on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.

Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.

Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chicksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draught Ammonia about 18 m. maximum.

Air draught Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.

Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.

Agent: Agent comes from Iskenderun about 30 miles away.

Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.

Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kg. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.

N.O.R.: Tendered in usual manner on anchoring, accepted at that time unless weather prevents berthing.

Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.

Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.

Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agent's Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on one's own.

Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

AUTHORITY: Botas Petroleum Pipeline Corporation, P.O.Box 73, Ceyhan, Turkey. *Tel:* 1431, 1388. *Telex:* 62115 Bhat Tr. *Cables:* Botas, Ceyhan. *Contact:* S. Arikan, District Manager. B. Uzbilen, Marine Terminal Manager.

AGENT: See "Iskenderun".

HEREKE: 40.42 N. 29.37 E.

DOCUMENTS: 5 Crew Lists, 2 Store Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.

PILOTAGE: Compulsory pilotage from Darica to Hereke and vice-versa; also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Hereke port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.

ANCHORAGES: Anchoring places at Izmit Gulf are as follows:

For Dry Cargo Vessels:

Darica/Eskihisar Anchorage: approx. Lat. 40° 46′ 05″ N., Long 29° 32′ 10″ E.

Izmit Anchorage: approx. Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E.

For Tankers:

Yarimca Anchorage: approx. Lat. 40° 44′ 50″ N., Long. 29′ 44′ 30″ E.

RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.
MAX. SIZE: No restrictions if vessel suitable to load/unload at Hereke berth where jetty length 140 m. and depth varying between 7.70 m. and 11.35 m.
HEALTH: For vessels proceeding to Hereke Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere/Bosphorus. Crew List and Derat Certificate required.
RADIO: Istanbul Radio Station.
VHF: Available only at Darica and Yarimca pilot stations, Channel 16.
TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations in Izmit Gulf:

500 to 5,000 g.r.t.	– 1 tug
5,000 to 25,000 g.r.t.	– 2 tugs
25,000 to 50,000 g.r.t.	– 3 tugs
over 50,000 g.r.t.	– 4 tugs

BERTHING: Only one jetty available at Hereke which belongs to NUH Cement Factory where only one vessel can berth at a time.
CRANES: No shore cranes available on jetty.
BULK CARGO FACILITIES: As pier belongs to cement factory only cement cargo loaded. For bulk cement loading rate is 3,000/4,000 tonnes per day. 24 hours continuous work.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Private.
MEDICAL: Hospital and dental facilities are available at Izmit approx. 30 km. from Hereke.
TANKERS: No tanker facilities.
DENSITY: 1020-1022.
FRESH WATER: Available by barge and small quantities available from the jetty.
FUEL: Not available at Hereke, can be supplied by barge or coaster from Istanbul.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No repair facilities.
DRY DOCKS: None.
SURVEYORS: (1) Cargo Inspectors available at Istanbul.
(2) Surveyors available at Istanbul.
Cargo Inspectors and Surveyors can be ordered from Istanbul to attend vessels at Hereke.
GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.
HATCHES: Opening/Closing hatches carried out by the crew.
CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.
CARGO GEAR: Load/discharge effected by ship's gear as no cranes available on the jetty.
REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Immigration and Izmit/Derince Customs to assist repatriations.
AIRPORT: Nearest airport at Istanbul, approx. 100 km. from Hereke.
TIME: Local time GMT plus 3 hours.
HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.
POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 211-11030, Fire: 211-00.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-10945.
TELEPHONES: No arrangements exist.
SERVICES: None.
BANKS: Only local banks.
STORING: See "Prelims" page viii.
1. Vessel can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs formalities required for storing, Agent assists.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.
IDENTIFICATION CARDS: Seaman's book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: NUH Cement Factory of Hereke. *Tel:* 2161-1052, 2161-1053. *Telex:* 33227. *Cable:* Nuh-Hereke.

ISDEMIR: 36.43 N. 36.11 E. (See Plan Book)

LOCATION: The port is located inside the Western Breakwater within Lat. 36° 43′ 30″ N., Long. 36° 11′ 06″ E. and the South Breakwater within Lat. 36° 43′ 35″ N., Long. 36° 11′ 15″ E.
TUGS: 2 tugs available.
BERTHING:

Berth (See Plan Book)	*Length* (m.)	*Depth* (m.)	*Capacity*
Point E – F	300	10	1 × 15,000 d.w.t. 1 × 5,000 d.w.t.
Point E – D	200	10	1 × 15,000 d.w.t.
Point D – C	120	8	1 × 10,000 d.w.t. 1 × 5,000 d.w.t.
Point A – B	120	12	1 × 50,000 d.w.t.
Point A – I	500	14.0 – 18.5	1 × 80,000 d.w.t.
Fuel Wharf		14.0	Outside West Breakwater

CARGO HANDLING FACILITIES: 4 electric cranes × 10 tons. 5 Kangaroo cranes × 15 tons (300 t.p.h. each). 2 portal cranes × 25 tons (under construction). Forklifts also available.
2 conveyor belts × 1,000 t.p.h. each.
Handling Rates:

General cargo	800 – 1,000 tons per day
Iron ore	1,000 tons per day
Coal	7,000 tons per day
Fuel oil	5,000 tons per day

TANKERS: Facilities owned by the Port. 8×5,000 ton capacity fuel and oil tanks. Depth alongside fuel wharf 14.0 m.
FRESH WATER: Water tank available, but no potable water.
REPAIRS: No facilities.
DRY DOCKS: None.
AUTHORITY: Iskenderun Demir Ve Celik Fabrikalari, Directorate of Iskenderun Iron and Steel Plants, Isdemir, Turkey. *Tel:* 1164, 1881, 2794, 2796, 2777 and 3142. *Cables:* Isdemir, Iskenderun. *Contact:* Z. Kural, Trade Manager.

ISKENDERUN: 36.35 N. 36.10 E. (See Plan Book)

DOCUMENTS:
5 Crew Lists.
4 Passenger Lists.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest, of which one must be legalised by Turkish Consulate at loading port. If no consulate existing same to be certified by local Customs Officer or Authorities.
1 set Bills of Lading.
2 copies Cargo Stowage Plans.
Health Documents.
2 Stores Lists.
Ship's Certificates.

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ETA. International Code signals used to call Pilot who boards at harbour entrance. 2 pilot boats available.
ANCHORAGES: Safe anchorage in open roadstead at 0.5 to 0.75 miles from shore. Vessels over 30,000 d.w.t. work cargo at anchorage only. Loading/discharging to lighters only occurs in the case of explosive cargo.
MAX. SIZE: At anchorage, no limitations. Alongside pier, length 166 m., draft up to 30 ft. Also see "Tankers".
HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew Vaccination Certificates to be produced if required. Sanitary Certificate required if live animals on board.
RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN2.
TUGS: 6 tugs available 300 h.p. – 1,200 h.p.
BERTHING: Jetty 509 m. long can accommodate 2 large vessels and several small vessels simultaneously.
Berth No. 1 at jetty head, 48 m. length, 35 ft. depth.
Berth No. 2, South side, 166 m. length, 28 ft. – 32 ft. depth.
Berth Nos. 3 and 4, suitable only for tugs and small vessels.
Berth No. 5, North side, 166 m. length, 29 ft. – 34 ft. depth.

Due to shelving depths vessels of 20,000 to 30,000 d.w.t. berth partly alongside and lighten cargo then shift once or twice further in.

The T.M.O. have a silo of 20,000 tons capacity which can deliver up to 300 t.p.h. Loading capacity of ore, 200 t.p.h. Unloading capacity for coal, 150 t.p.h.

Inner Port, used only by pontoons, lighters and tugs.

Priority given to Army, food relief and passenger ships.

CRANES: 35 shore cranes with capacity 1.5 tonnes – 26 tonnes. 1 floating crane with capacity 90 tonnes.
STEVEDORES: 2 consecutive shifts of 8 hours each day. At anchor, approximately 100 tons can be handled each shift, for general cargo. Baled cargo, 125 tons per shift. Bagged cargo, 150 tons per shift.

Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.
TANKERS: Two buoy mooring berths operated by Mobil Oil and Petrol Ofisi, suitable for vessels up to 50,000 d.w.t. Stern line connection required. No slop reception facilities.
Also see "Golovasi".
FRESH WATER: Supplied only by barge, 2 available each of 250 tons capacity.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
CONSULS: Vice-consulates of France, Greece, Iran, Italy, Netherlands, Norway and Sweden.
REPAIRS: Welding and other minor types of repairs are possible.
REPATRIATION: Can be arranged.
AIRPORT: Adana Airport, served only by domestic lines with routes to Beirut and Istanbul. Airport situated 140 km. from Iskenderun. Twice daily service to international airport at Istanbul.

POLICE/AMBULANCE/FIRE: Police 1044; Ambulance 1443; Fire 1000.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd, half day April 22nd); Sports Day (May 19th); Victory Day (August 30th); October 28th (half day); October 29th and 30th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

SHIPMASTER'S REPORT: Customs and Health Clearance is performed at anchor outside the port. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. Vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port) the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health Officials require 4 Crew Lists on arrival. The Agent will require 2 more crew lists prior to the vessel's departure for clearance with the Harbour Master. On departure the vessel will anchor off again while outward clearance is obtained.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demir Yollari – Isletmesi Genel, MD, Talat Ps Bul, Ankara, Turkey. Telex: 42571.

AGENT: Gulf Agency Co. Ltd., POB 277, Iskenderun. Tel: 13676, 13677, 13152. Telex: 68124. Cables: "Gacship" Iskenderun.

ISTANBUL: 41.01 N. 28.58 E. (See Plan Book)

DOCUMENTS: *Vessels bound for Istanbul:*

5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Manifests of all cargo onboard.
Copies of relevant Bills of Lading for Inward Manifests.
3 Lists of money in the ship's safes (if there is no money on board, please issue 3 "nil" lists).
Harbour Master's Sailing Permit (which must be exchanged at each Turkish Port and kept on board).
Ship's Certificates (Derat, Ship Safety, Safety Radio, Class or Freeboard).

Transit Vessels: Master to present only Tonnage and Derat Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).

PILOTAGE: For both vessels bound for Istanbul and transit vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. ETAs must be confirmed or corrected not less than 2 hours prior to ETA. Pilot boarding vessel, using service boat hoisting red and white flag, off Haydarpasa and Sarayburnu (entrance from Marmara Sea) or off Kavak (entrance from Black Sea). Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGES: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels. For smaller vessels there is a good anchorage between Dolmabahce and Kurucesme.

RESTRICTIONS: Ships carrying hazardous cargoes (flammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

MAX. SIZE: No limitation of draft in open roadstead at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere oil port.

HEALTH: Sanitary control of both transiting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wireless messages to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is THA. Frequency MW 500 kHz. Ships can also communicate with Agent by radio telephone on frequency 2182 KHz. It is recommended that ships keep watch for any radio telephone call by Agent detailing any berthing and operation arrangement.

TUGS: Arranged by Agent. Vessels of 1,500 g.r.t. and over berthing at the quays or mooring to the buoys are compelled to take the services of at least one tug and vessels of 5,000 g.r.t. and over require at least two tugs. Charged per hour or fraction of each operation.

21 tugs ranging from 110 hp to 2,500 hp are available.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Turkish Maritime Corporation Facilities:

Wharves:	*Length* m.	*Depth of Water* m.
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari for cargo handling	600	10
Sarayburnu for passenger handling	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4
Kurucesme for coal handling	370	10

Equipment:

Electric Cranes along the quays:
2 of 5 tons
7 of 3 tons
3 of 4 tons (coal transporter)
Rubber wheeled mobile cranes:
1 of 25 tons
7 of 10 tons
8 of 5 tons
5 of 3.5 tons
Floating Cranes: 5 tons – 60 tons.

Turkish Railway Corporation Facilities:

Haydarpasa Port: This port, protected by 2 breakwaters of an overall length of 1,709 m., has quays of 1,988 m. total length, that may simultaneously accommodate 6 medium-sized vessels and where cargo operations may be made direct to and from wharves or railway trucks.

The depth of water at the quays varies between 6 m. and 10 m.

Silos: 4 grain silos are available:

Capacity	*Delivery per hour*	*Intake per hour*
34,500 tons	200 tons	100 tons
20,000 tons	120/150 tons	90/100 tons
10,800 tons	120/150 tons	90/100 tons
5,280 tons	120/150 tons	90/100 tons

Electric cranes along the quays: 1.5 ton – 25 ton.
Mobile cranes: 3 ton – 8 ton.

A container/Ro-Ro facility under construction. The facility will have 3 berths, 350 m. length and 10 m. depth, 295 m. length and 10 m. depth and 3rd berth 300 m. length and depth of 12 m. Completion expected late 1984. 2×40 ton gantry cranes on order.

BULK HANDLING: See "Berthing" – Haydarpasa.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position Lat. 40° 58′ N., Long. 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150 – 200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30 t.p.h. – 60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours' pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be underaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seaman's book is sufficient.

REPAIRS/DRY DOCKS: At the Golden Horn are 3 graving-docks:
(1) 388 ft. length, 72 ft. width at entrance
(2) 279 ft. „ 62 ft. „
(3) 600 ft. „ 63 ft. „

At Istinye (in the Bosphorus):

1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Haskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas, Turkish Lloyd.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux Countries, Sweden, Norway, West Germany, Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunisia, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection throughout world. Airport 15 km. from Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 521 42 22, Uskudar 333 20 30; Police 527 45 00; Ambulance Istanbul 521 15 95, Beyoglu 144 49 98, Uskudar 333 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), derat, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere, Ship's register, Derat, Crew List and certificate issued at Canakkale North-bound.

Haydarpasa operated by Turkish Railway Corporation.

AGENT: Gulf Agency Co. Ltd., P.O.B. 1230, Karakoy, Istanbul, Turkey. Tel. 438327, 438328. Telex 22213. Cables: "Gacshipping" – Istanbul.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:

6 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.

PILOTAGE: Vessels are permitted to arrive and sail from Izmir by day and night. After entering the Gulf of Izmir, Masters who are not familiar with the waters, require a Pilot at Pelican Spit. The pilotage from Pelican Spit to Izmir is not compulsory and Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.

Pilot can be contacted on VHF Channel 16.

ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.

RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.

MAX. SIZE: Vessels of any size with a max. of 38 ft. draft can operate at Izmir. There is a pipe-line for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.

In Old Port, length restricted to 165 m., max. draft 8 m.

HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.

RADIO: Izmir Radio Station: call letters TAN2. Istanbul Radio Station: call letters TAH.

TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug.

2 × 800 h.p. and 1 × 2,500 h.p. tugs available.

BERTHING: *Old Port:* Location Lat. 38° 25′ N. Long. 27° 10′ E. Harbour entrance to port 130 ft. wide, depth 40 ft., harbour length 1,200 m., harbour width 700 m. (Pilots boards 0.25 mile off entrance).

Precautions to be taken against N.E. and South winds. Mooring stern to quay. Operations effected by means of lighters. Altogether 8 vessels can berth in Inner Harbour with a draft of 24 ft. to 30 ft.

Alsancak: Located at a distance of about 2 miles from the old port. Depth alongside berths 22 ft to 38 ft. Pilot's board vessels outside breakwater old port. Presently 12 cargo vessels of various sizes (mainly medium and small sizes) otherwise 9 to 10 large vessels can operate at the new port. There is also a berth for 2 large passenger vessels or 3 small size vessels. 95,000 sq.m. of open storage and 24,000 sq.m. of sheltered storage available. Storage for 2,000 TEUs within port area.

CRANES: 48 mobile cranes (5 – 35 tons). 1 × 50 ton and 1 × 200 ton floating cranes available when required.

BULK HANDLING FACILITIES: Grain silo has capacity 40,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.

Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.

STEVEDORES: Straight time 0800 – 1200, 1300 – 1700 hrs. Overtime Saturdays, Sundays and public holidays 0800 – 1700 hrs., otherwise 1800 – 0200 hrs. Overtime charges 50% increase on S.T. charges.

For overtime discharging operations at the new port, handling charges (overtime) from ship's tackle to the Custom's warehouse, are for account of the ship.

9 men per gang aboard (6 labourers, 2 winchmen, 1 hatch tender) 3 lightermen or men on the Dock.

Extra men used to reinforce regular gangs and in hatches congested with cargo for discharge secures a quick despatch.

MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.

TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipe-line at a distance of about 1 mile from their shore installations. Depth at the end of the pipe-line is 33 ft. The pipe-line is of 12 in. and the pumping is effected through a flexible hose of 10 in. at an average of about 450/500 t.p.h.

British Petroleum receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.

FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barge. Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.

FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. Three shifts of 8 hours per day.

OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.

CERTIFICATES:

Derat Certificate.
Registry.
Vaccination Certificates (if required).
Health Certificate.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: One litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS:

Belgian Consulate (Honorary)	tel. 218847
Danish Consulate (Honorary)	" 124018
Finland Consulate (Honorary)	" 214782
French Consul General	" 214234
Greek Consulate	" 216992
Italian Consulate	" 211696
Luxemburg Consulate (Honorary)	" 214882
Netherlands Consulate (Honorary)	" 132064
Norwegian Consulate (Honorary)	" 215102
Spanish Consulate (Honorary)	" 145470
Swedish Consulate (Honorary)	" 124878
U.K. Consul General	" 211795
U.S. Consul General	" 217204
West Germany Consulate	" 216995

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned). Deck and engine repairs are possible.

DRY DOCKS: Floating dock, capacity 7,000 d.w.t.

REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.

AIRPORT: Airport from dock – distance 30 kilometres. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also 2 direct flights per week to Europe.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st, 2400 hrs.); National Sovereignty Day (from 22nd April, 1200 hrs. to April 23rd, 2400 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National Holiday (October 28th, 1200 hrs. to October 30th, 2400 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 75% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is not carried out.

POLICE/AMBULANCE/FIRE: Police, tel. 255460; Ambulance, tel. 252405; Fire, tel. 00.

TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.

SHORE LEAVE: Crew members are allowed to go ashore with landing card.

REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.

DELAYS: During the active export season, some delays occur varying 1 or 2 days.

DEVELOPMENTS: New port of Alsancak to be extended during the next 2 years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 2 to 3 vessels, especially container vessels. 2 container cranes ordered.

AUTHORITY: Denizcilik Bankasi TAO.

AGENT: Gulf Agency Co. Ltd., POB 857, Izmir. Tel. 217270, 217287. Telex 52371. Cables: "Gacship" Izmir.

IZMIT: 40.46 N. 30.00 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.

PILOTAGE: Compulsory pilotage from Darica to Izmit and vice-versa, also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Izmit Port have to take Pilot when entering Izmit Gulf at Darica pilot station, located:

Approx. Lat. 40° 45′ 18″ N. Long. 29° 23′ 18″ E.

ANCHORAGES: Approximate position: Lat. 40° 44′ 00″ N. Long. 29° 52′ 48″ E.

RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.

MAX.SIZE: No restrictions for vessels loading on roads, and no special restriction if vessel suitable to load/unload at the jetty of Seka Paper Mills where jetty length 70 m., depth varying between 24 ft. and 27 ft.

HEALTH: For vessels proceeding to Izmit Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere-Bosphorus. Crew List and Derat Certificate required.

RADIO: Istanbul Radio Station.

VHF: Available only at Darica and Yarimca pilot stations, Channel 16.

TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations at Izmit Gulf:

500 to 5,000 g.r.t.	–	1 tug
5,000 to 25,000 g.r.t.	–	2 tugs
25,000 to 50,000 g.r.t.	–	3 tugs
over 50,000 g.r.t.	–	4 tugs

BERTHING: Only one jetty available at Izmit which belongs to Seka Paper Mills where two ships can berth at a time to each side of the jetty.

CRANES: No shore cranes available at the jetty.

BULK CARGO FACILITIES: No bulk cargo facilities. Vessels load minerals on roads, by ship's gear, brought alongside by barges with rate of 800/1,000 tonnes per day, working hours generally from 0800 to 2000.

At the jetty of Seka Paper Mills working hours from 0800 to 1700 and 1700 to 2400. Generally paper and wood-pulp in bales discharged at a rate of 125/150 tonnes per shift per gang by ship's gear.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Private. See also "Bulk Cargo Facilities".

MEDICAL: Hospital and dental facilities are available.

TANKERS: No tanker facilities.

DENSITY: 1020-1022.

FRESH WATER: Available by barge, and small quantities available from the jetty.

FUEL: Not available at Izmit, can be supplied by barge or coaster from Istanbul.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No repair facilities.

DRY DOCKS: None.

SURVEYORS: Cargo Inspectors and Surveyors available from Istanbul and can be ordered to attend vessel at Izmit.

GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.

HATCHES: Opening/closing hatches to be carried out by the crew.

CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Customs and Immigration.

AIRPORT: Nearest airport at Istanbul, approx. 130 km. from Izmit.

TIME: Local time GMT plus 3 hours.

HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.

POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 211-11030, Fire: 211-00.

EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-10945.

TELEPHONES: No arrangements exist.

SERVICES: None.

BANKS: Only local banks.

STORING: See "Prelims" page viii.

1. Vessels can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs facilities required for storing. Agents assist.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.

IDENTIFICATION CARDS: Seaman's book is sufficient.

REGULATIONS: Nil. No visitors allowed aboard without permission.

DELAYS: No delays expected.

AUTHORITY: Izmit Seka Paper Mills. *Tel:* 211-31630. *Telex:* 33124.

MERSIN: 36.47 N. 34.38 E. **(See Plan Book)**

DOCUMENTS:

5 Crew Lists.
4 Passenger Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Customs Authorities.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.
Health Documents.
Ship's Certificates (Safety Equipment, Safety Radio, Class and Freeboard Documents).
2 Store Lists.

PILOTAGE: Agent orders Pilot through Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Sound signals: 2 long and 1 short blast. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according existing international frequencies.

ANCHORAGES: Safe anchorage in open roads outside main breakwater.

RESTRICTIONS: No particular restrictions. Ships can anchor in roads outside main breakwater at any time without Pilot.

Vessels with more than 50 tons of explosives are not permitted to berth alongside.

MAX. SIZE: No limitation of draft in open roadstead at anchor. Maximum draft in port alongside quay: 11.6 m. for tankers, 9 m. for other ships.

HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board radio Agents full details before arrival.

RADIO: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAM2, Mersin Radio TAM5. Wireless messages to be routed to Agent, preferably via Istanbul Radio. Port VHF service in operation.

TUGS: Tug boat compulsory for vessels over 1,000 g.r.t. charged per hour or fraction of each operation. 6 tugs available up to 2,630 h.p.

BERTHING: Priority to Army, food relief and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

	Length (m.)	*Depth* (m.)
Quay No. 1 (Passenger Quay)	175	10
Quay Nos. 2 and 3	274	10
Quay No. 4	150	10
Quay Nos. 5, 6 & 7	493	10
Quay Nos. 8 & 9	275 each side	10
Quay Nos. 10, 11, 12 & 13	577	6 to 8
Quay Nos. 18 & 19 (ore and coal)	67 and 76	10

BULK HANDLING FACILITIES: At Quay Nos. 8 and 9 there is conveyor system which can deliver 600 t.p.h. from each spout. Discharging rate 100 t.p.h. from each of the 2 suckers. Silo capacity 100,000 tonnes.

CRANES: 35 shore cranes, capacity 3 – 35 tonnes. 1 floating crane, capacity 60 tonnes.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival.

Generally 2 consecutive shifts of 8 hours per day. Discharging/loading rates average:

100 tons per shift general cargo.
200 tons per shift bagged cargo.
150 tons per shift baled cargo
175 tons per shift bulk ore

Max. rate for ore 400 tons per shift if grab loading.

MEDICAL: Master to inform Agent by cable if urgent medical aid is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps can be taken.

TANKERS: Quays No. 20 and 21, 350 m. long, berths on each side with depth of 12.5 m.

ATAS Refinery Terminal: Depth in harbour channel, 11.2 m. and, in approaches to channel, 12.3 m. Turning basin 1,148 ft. diameter, depth 42 ft. 8 in. Depth alongside berths 48 ft. 6 in. Maximum length 229 m., draft 11.6 m. Tankers up to 12.19 m. draft have berthed.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers, 10 in. hose connections to 26 in. shore line. No facilities for slop disposal ashore.

Fresh water available from barge 100 tons each load.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied to tankers by barge but otherwise by shore installation at the rate of 30/35 t.p.h.

FUEL: Almost all kinds of fuel available in transit and facilities for delivery to ships.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship using her own means when such cranes are not available. Full lights to be supplied by ship.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

CONSULS: Italy, Lebanon, Norway and Sweden.

REPAIRS: Welding and other minor types of repairs are possible.

REPATRIATION: Repatriation can be arranged by air.

AIRPORT: Adana Airport served only by domestic line THY (Turkish Airlines) with routes to Cyprus (ERCAN), Ankara and Istanbul. Distance is 75 km. from Mersin. Twice per week to Cyprus (ERCAN), twice daily to Ankara and 3 times daily to Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day, 1.5 days (31st December 0.5 day, 1st January 1 day); National Domination 1.5 days (22nd April 0.5 day, 23rd April one day); Youth and Sport Day, 1 day (19th May); Victory Day (30th August); Republic Day 1.5 days (28th October 0.5 day, 29th October); Ramazan Day 3.5 days; All Saturdays and Sundays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 13439; Ambulance 13555; Fire 0000.

TELEPHONES: No installation for connection on board.

SHORE LEAVE: Crew allowed shore leave.

GENERAL: Two consecutive shifts every day, the first one starting 0800 - 1700 hrs. and the second one at 1700 – 2400 – 0100 hrs. Agent may provide extra men if necessary to help ship's despatch. Ships have to hoist a Turkish flag.

DEVELOPMENTS: 400 m. length container pier nearing completion. Ro-Ro ramp under construction at Berth No. 7. Expected to be ready mid-1985. 2×40 ton cranes to be purchased.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demir Yollari – Isletmesi Genel, MD, Talat Ps Bul, Ankara, Turkey. *Telex:* 42571.

AGENT: Gulf Agency Col Ltd., P.O.Box 328, Mersin, Turkey. Cable Address: "Gacship" Mersin. Telex: 67141. Tel: 1080, 3730.

NEMRUT BAY (including Foca): 38.46 N. 26.55 E. (See Plan Book)

PORT LIMITS: Nemrut Bay is situated on the South side of the port of Aliaga (see Aliaga). It is the area between the mainland and a straight line drawn True North from Kizilburun which is situated in position: Lat. 38° 45′ 00″ N., Long. 26° 53′ 50″ E.

The Bay is divided into two areas, the inner port and outer port.

Inner Port: Is the area remaining between the imaginary line connecting the South end of the Petkim Petrochemical Complex's breakwater with Karacadogan Penisula situated in position: Lat. 38° 46′ 10″ N., Long. 26° 54′ 22″ E.

Outer Port: Is the area between interior port and Nemrut Bay boundaries.

DOCUMENTS: See "Izmir".

PILOTAGE: Pilotage is compulsory for all vessels arriving at Nemrut Harbour.

Notice of ETA must be reported 24 hours before arrival to the Harbour Master's office at Aliaga. Time must be in GMT.

Channel 16 VHF is continuously watched at Nemrut pilot station and ETA may be confirmed on this frequency.

The address of pilot station is as follows:

Petkim Petrokimya A.S.
Aliaga Kompleksi Grup Baskanligi,
Satinalma Mudurlugu,
Aliaga – Izmir – Turkey
Tel: Menemen (5421) 1550-54 (5 lines)
Aliaga (5431) 1240-44 (5 lines)
Telex: 52428 Epet Tr.
Cable: Petkim – Aliaga – Izmir.

In the ETA message, the following information must be indicated:

1. Name/call sign of vessel
2. Nationality
3. Agency
4. Length overall, max. draft and gross tonnage
5. Nature of Cargo (In IMO)

Rendezvous point with Pilot is: Lat. 38° 47′ N., Long. 26° 54′ E., in outer port. In the event of bad weather Pilot joins the vessel in inner port. A pilot boat of 210 h.p. is available. Call sign of the boat is "TCZJ".

ANCHORAGES: Anchorage in the inner and outer ports is possible. However, anchorage within the area of 5 cables diameter of middle of interior port boundary is prohibited for safety of sea traffic (See Charts).

RESTRICTIONS: See "Berthing".

MAX. SIZE: See "Berthing".

HEALTH: See "Izmir".

RADIO: Complete MF/SSB type radio, 1.6 – 4.2 MHz International Navigation Code with 31 Channels capacity, radio transmitter 150-350, 300-535, 700-1650, 1650-4250 kHz, and a 4 band SSB/AM receiver.

VHF: Communication within 20-25 miles with VHF – AM radio operating in 156 – 162 MHz band is possible. International navigational bands are used. Station listens on Channel 16. Call sign: "TAB".

RADAR: No radar facility.

TUGS: 2 tugs of 1,050 h.p. and 2,500 h.p. are available. Tugs normally join the vessel in the outer port.

BERTHING: Quays at port of Petkim Petrochemical Complex situated on the Northern side of Nemrut Bay (See "Plan Book").

Berth No.	*Name*	*Length (m.)*	*Depth (m.)*	*Remarks*
1	Tanker Quay	163	7	Load/discharge lines:
2	Tanker Quay	175	10	6 in., 8 in., 10 in., 12 in. Constructed for loading/discharging various chemicals such as ammonia, benzene, fuel oil, ethylene oxide, ethylene glycols, chloric hydrocarbons, wash oil.
3	Caustic Quay	60	6	Loading lines: 8 in. for caustic, 4 in. for hypochloride.
4	Naphtha Quay	90	14	Discharge lines: 28 in. for fuel oil, 24 in. for naphtha.
5	Salt Quay	190	6	Constructed for discharge of salt to be used at Chlorine Alkali Plant.
6	General Cargo Quay	338 (175+163)	10 – 7	Constructed for loading/discharging various petrochemical raw materials, products and equipment.
	Petrol Ofisi Quay			Still under construction for loading petroleum products.

Quays on the Eastern and Southern side of Nemrut Bay (See "Plan Book").

Ege Gubre Pier	122.90	12 – 14	Private jetty constructed for discharging/loading raw materials and products of fertiliser facility. Rate 1,000 tons/day.
Limas Pier	154	12	Private jetty constructed for discharging/loading iron scrap and iron products of Ironworks in Izmir.
Cukurova Pier	167	15	Private jetty constructed for discharging/loading iron scrap/iron products of Ironworks in the site.

CRANES: Fixed/mobile cranes are available at Petkim Petrochemical Complex.

Lifting capacity of 2 cranes at Salt Quay is 3 tonnes each. Salt is transferred by conveyor belt to the plant. One mobile crane of 270 tonnes lifting capacity, 2 mobile cranes of 150 tonnes, 2 mobile cranes of 110 tonnes and 55 mobile cranes of 12 – 30 tonnes lifting capacity are available.

BULK CARGO FACILITIES: See "Berthing" – Salt Quay and General Cargo Quay.

SPECIALISED CARGO HANDLING FACILITIES: Loading and discharging lines of liquid chemicals available at Port of Petrochemical Complex (See "Berthing").

MEDICAL: Hospital near Petrochemical Complex.

TANKERS: See "Berthing".

FRESH WATER: Available at Petkim Port. Order through Agent.

FUEL: May be available after completion of Petrol Ofisi Quay.

CARGO GEAR: Load/discharge can be effected by mobile cranes at General Cargo Quay (See "Cranes").

AIRPORT: Izmir-Cigli Airport is approximately 30 miles from Petkim Petrochemical Complex.

TIME: GMT plus 2 hours.

HOLIDAYS: *Official:* January 1st, April 23rd, May 19th, August 30th, October 29th.

Religious: "Bayram" days (Id-al-Fitr: 3 day, Id-al-Adha: 4 days) of Muslims (These dates are subject to visibility of new moon at Mecca).

POLICE/AMBULANCE/FIRE: Petkim has its own protection and medical units.

TELEPHONES: Facilities and connections under construction.

BANKS: T. C. Ziraat Bankasi, Turkiye Is Bankasi, Akbank, Emlak Kredi Bankasi in Petkim site.

SHORE LEAVE: Petkim's permission is needed.

IDENTIFICATION CARDS: The list of personnel leaving/joining the vessel should be announced to Petkim.

GENERAL: Piers and facilities at Nemrut Bay are owned by industrial companies located in this area. For loading/discharging the cargoes of other private and public companies permission from Ministry of Transportation of Turkish Republic is needed.

SHIPMASTER'S REPORT: July 1980.

Port of Foca: Vessel discharged ammonia.

Approach: Charts: BA 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.

Berth: Consists of an "L" shaped with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.

Density: 1028.

Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines.

General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships).

Fuel: Not available.

Officials: Officials come from Izmir, some 80 km. by road; the Agent therefore has to "keep hold" of them throughout discharge. The shore plant has facilities for sleeping in a hostel ashore.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting Customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

Doctor: Not available.
Repairs: Not possible.
Surveyor (Lloyd's): Not available.
Chandler: Not available.

SHIPMASTER'S REPORT: September 1980.

Port of Foca:

To be read in conjunction with report above.

Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

BA Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsula between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. Force 4.

Pilots: Available on 24 hour basis from Aliaga refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 N.W. of Karacadogan Burnu. He either drives across the peninsula to the new chemical berth and boards his boat there or comes by tug around the peninsula from Aliage refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.

Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.

Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).

Moorings: (See Plan Book). Back spring first forward, starboard buoy line first aft. Mooring boat available.

Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum Air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.

Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h. is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineeer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.

General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish light certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:

2 Crew Currency Lists.
2 Crew Declarations.
6 Crew Lists.
1 Vaccination List.
1 List of cash in ship's safe.
1 Health Declaration.
2 Lists of ship's particulars (Turkish Form).
2 Lists of previous ports.
6 Copies of Cargo Manifests (to be stamped at previous port i Foca second or subsequent port).

AUTHORITY: Harbour Master's Office: Aliaga – Izmir, Mr. Oktay Dedeoglu, Harbour Master.

SAMSUN: 41.19 N. 36.21 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

TUGS: 4 tugs are available.

BERTHING: Harbour protected by two breakwaters, entrance width 300 m., depth 11.9 m.

Main quay, 956 m. long, depth alongside from 6.5 m. to 11 m., providing 4 deep-water berths.

BULK HANDLING FACILITIES: Coal and ore handled at the Main Quay. Coal unloading by electric quay cranes and ore by rail mounted shiploader. Grain silo with 34,000 tonnes capacity.

Also see "Developments".

CRANES: 30 cranes, capacity 3 – 30 tonnes.

FRESH WATER: Available from the quay.

FUEL: Not available.

STEVEDORES: Working hours for general cargo: From 0800 hrs. to 2400 hrs. in 2 shifts.

For bulk cargo: 24 hours operations in 3 shifts.

DEVELOPMENTS: New bulk cargo quay under construction. Length 500 m., depth 12 m.

SINOP: 42.01 N. 35.08 E.

DOCUMENTS: See "Izmir."
PILOTAGE: Not available.
ANCHORAGES: Good anchorage in front of pier in 9 m. – 18 m.
RADIO/VHF: No facilities.
BERTHING: One pier, length 180 m. Max. draft 7.5 m.
STEVEDORES: *Working Hours:* 0730 – 1700 hrs.
MEDICAL: Facilities available.
DENSITY: 1025.
FRESH WATER: Available.
REPAIRS: Possible.
CONSULS: None.
REPATRIATION: Not possible.
AIRPORT: At Samsun, distance 190 km.
TIME: GMT plus 2 hours.
AUTHORITY: Liman Baskanligi, Sinop, Turkey. *Tel:* 13. *Contact:* Mr. Hamdi Ersavas.

TRABZON: 41.01 N. 39.46 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilot compulsory for all foreign flag vessels. Arranged by Agent subject to vessel's notice of ETA in advance.

ANCHORAGE: In the Outer Harbour off the breakwater.

MAX. SIZE: Vessels up to 29 ft. draft.

TUGS: 2 tugs available. Towage compulsory for vessels over 550 tons.

BERTHING: Main wharf 410 m. long, depth alongside 10 m. Vessels may be loaded and discharged while moored stern to the breakwater.

BULK HANDLING FACILITIES: Grain handled at the Main Quay using 2 rail mounted loaders. One grain silo with capacity of 10,000 tonnes and 1 warehouse with capacity 10,000 tonnes.

Containers handled by 25 tonne fixed crane.

CRANES: 10 cranes, capacity 3 – 25 tonnes.

FRESH WATER: Obtainable from the quay.

FUEL: Fuel oil obtainable in limited quantities.

STEVEDORES: Working hours from 0800 to 1200 hrs. and from 1300 to 1700 hrs. Overtime can be arranged.

REPAIRS: There are no repair facilities.

DEVELOPMENTS: One quay of 400 m. length near completion. Depth alongside 10 m.

TUTUNCIFILIK: 40.45 N. 29.47 E. (See Plan Book)

SHIPMASTER'S REPORT: July 1981.

LOCATION: IPRAS berths are situated just South of the 'Petkim' chemical complex at Yarimca (See "Yarimca"), as before the railway seems to be the dividing line between IPRAS and PETKIM.

PILOTAGE/APPROACHES: See "Yarimca".

TUGS: Three tugs generally used. 1 Government and 2 IPRAS. All large and powerful but rarely use their full power.

As a rule tug's lines used for berthing and ship's lines departing.

BERTHING: For LPG carriers 2 berths are used. Also refined product carriers use same berths. Crude is imported to a sea island for VLCCs and on the original old jetty for smaller tankers.

The original jetty for all tankers is at the Southern corner of the refinery at Kilier Bar. This is not now used for LPG.

A new berth constructed in 1979/80 is now open 0.5 miles North of the old jetty. At present only the North side of the new jetty is used (No. 2) but soon the Southern side will be in use for all larger vessels for all grades.

The new berth is of modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading off at 45° with 4 mooring/fender dolphins to seaward, connected by catwalks.

Draft alongside both berths is 18 m. with 3 m. clearance. Fenders and mooring arrangements are good.

Vessels generally berth head in, so can go either side alongside.

A small tug jetty is at the root of the main jetty.

See "Plans" for dimensions and general layout of all berths.

Mooring: Mooring boat used. 3, 2, 2, each end with line up very precise. Bow comes near the end of the jetty where it bends at 45° to a roadway.

CARGO HANDLING: *Discharge:* Valves shut against ship without warning, high back pressure – 7.5 to 8 bar., and line draining at completion non-existent. 8 in. rubber discharge hose 150 ASA.

No vapour return line as yet, and cannot see one on jetty, but one on old jetty suddenly appeared with IPRAS wanting to return benzene to the ship.

5×10 in. chicksans for refined products on North side.

5×12 in. chicksans plus 2×16 in. chicksans on South side.

Control hut at seaward end of roadway with telephone and a couple of operators.

Rate 250 – 300 t.p.h. when all shore valves open.

FRESH WATER: Available.

DENSITY: 1017.

SURVEYORS: Employed by Turkish Survey Bureau.

GENERAL:

Gangway: Can be a problem due to dolphins. We used accommodation ladder with half BOT gangway section between bottom platform and dolphin.

Customs/Immigration: Customs Officer on board requires room continuously.

Facilities: Agent very helpful. Personnel change through Istanbul Airport without too much difficulty.

Curfew in force from 2400 hrs. to 0500 hrs. for ship's crew, 0200 hrs. to 0500 hrs. for local population.

Overseas telephone calls delayed about 2 hours during weekdays and 30 minutes at weekends.

Lloyd's Surveyor from Istanbul – to be arranged 24 hours in advance. Medical facilities from IPRAS or local doctor through Agent. Izmit about 30 minutes by taxi/car.

General stores, apart from some fresh provisions, are difficult to obtain.

AUTHORITY: Tupras-Izmit Rafinerisi Bolge Mudurlugu, P.O.Box 43, Izmit, Turkey. *Tel:* 31660-31665, 20330-20333. *Telex:* 22285, 33152, 33153, 33154. *Cables:* Umipras, Izmit.

YAKACIK: 36.43 N. 36.11 E. (See Plan Book)

SHIPMASTER'S REPORT: June 1981.

LOCATION: 8 miles North of Iskenderun.

PILOTAGE: Pilotage is compulsory, but we arrived and sailed without Pilot. Permission must first be obtained via VHF Channel 16 through Iskenderun, usually the Agents. On no account must vessels enter and leave without permission.

ANCHORAGES: Good holding ground inside breakwaters, protected from all directions except Southwesterly swell. Permission must first be obtained before anchoring inside.

NAVIGATION: Good navigational entrance marks. No difficulties encountered on entering or leaving, plenty of water.

TUGS: Not available.

BERTHING: Longest wharf appears to be "D", which at present is being extended (see Plan). The smallest being "C", all wharves appear to have plenty of water. (See Plan). All wharves have good access, wharves B, C and D being serviced with rail. Berth "A" has a heavy lift crane of 100 tonnes, no rail.

Berth "D" has a conveyor for bulk cargoes. Most cargo being discharged into road transport.

Cargo Handling: Wharf "D" Bulk, "B" and "C" general cargo, wharf "A" heavy lifts.

CRANES:

Wharf A – 1 × 100 tonnes for heavy lifts
B – 2 × 10 tonnes
C – 2 × 10 tonnes
D – 4 × 10 tonnes

Small mobile cranes also available.

STEVEDORES: Working hours – 24 hours continuous. Shifts change at 1600 hrs. Meal breaks at 1200 hrs. – 1300 hrs., 1700 – 1800 hrs. and 2000 – 2100 hrs.

Rate of discharge good, labour force good. Majority of port handling equipment is new, cranes, rail, etc. No warehousing available.

FRESH WATER: Fresh water obtained by road tanker only, in quantities of 40 tonnes. Usually supplied at night as they supply the steel town during the day.

FUEL: No facilities observed.

MEDICAL: Facilities at Iskenderun.

CONSULS: At Iskenderun.

REPAIRS: No facilities observed.

GENERAL: *Communications:* Rail and road to Iskenderun, no local airfield. All instructions and information available through Iskenderun on VHF Channel 16, calling "Demicargo" which is local control, usually operating 0900 hrs. to 1700 hrs. and available only during working hours (Not meal hours).

Tonnage Handled: By observation only, it appears that relatively large vessels can be handled at the iron ore berth, up to 30,000 tonnes. A new berth is under construction (see Plan) which will be able to handle vessels up to 100,000 tonnes. Other berths are for smaller vessels (A, B and C), the largest being "B".

Principal activities, steel, iron ores, general cargo.

SERVICES: Tank cleaning services and ship chandlers available from Iskenderun.

AUTHORITY: Iskenderun Port Authority.

YARIMCA: 40.45 N. 29.45 E. (See Plan Book)

SHIPMASTER'S REPORT: November 1980.

PETKIM REFINERY:

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the refineries of Petkim to the North and IPRAS to the South (see "Tutuncifilik"). As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases bulk fertilisers and chemicals are handled. The Products Pier which includes ammonia is in position at Lat. 40° 45.4′ N., Long. 29° 45.1′ E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke, another important shipping complex.

PILOTAGE: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit Pilot Office which is the control centre works on Channels 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica depending on other pilotage requirements and curfew. Pilotage operates 24 hours.

APPROACHES: See BA Chart 467.

TUGS: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.

BERTHING: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipe-line roadway. There are dolphins connected by catwalk to main pier (Southern catwalk damaged in November 1980), plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring arrangements are not very good with head lines virtually breast lines. (See Plan).

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side to) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.

DISCHARGE: There are lines for naphtha, benzene, butadiene vapour and liquid, and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets chicksans, naphtha and benzene use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. Shore personnel effect the connection. Vapour return line not used. Samples taken before discharge.

We used forward ship's crossover which gives forward mooring lines a slightly better lead.

Communication with shore personnel difficult due language problems. Hut on quay with telephone.

Refinery seems to have limited tank capacity judging from our 2 visits and has to transfer product to other plant at re-liquefaction rate of around 50 tonnes per hour. Not able to ascertain actual tank capacity.

Due to above, discharge rate varies from about 300 t.p.h. to 500 t.p.h. with back pressure varying from 2.5 to 7 bar.

Surveyors as normal, travel around Turkey following ships so can be late in boarding if ship early, then refinery representative notes temperatures and ullages.

GENERAL: Fresh water available from quay at 40 t.p.h. metered at L.750 (November 1980 £3.60) per tonne. By barge is cheaper at L.30,000 (November 1980 £145) per 50 tonnes minimum but not always available.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available by barge but costly.

In November 1980 a curfew still operated 2400 hrs. to 0500 hrs. Travel outside Izmit District not allowed. Difficult to get into either Yarimca or Izmit.

Strict anti-pollution laws in operation.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyd's/Agent: Lloyd's Surveyor from Istanbul also covers all Turkey but travel is expensive.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGES: Good anchorage off the harbour in depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern Breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available".

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour".

TUGS: 5 tugs available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m. Loading rate 350 – 450 t.p.h.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.

CRANES: Shore cranes up to 15 tons capacity and floating crane 60 tons capacity.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

(b) Addresses and telephone numbers of V/O "Sovfracht", V/O "Soyuzvneshtrans", V/O "Morcontainer" and V/O "Sovbunker":

Vsesoyuznoe Obyedinenie (V/O) "Sovfracht" is the sole organisation in the U.S.S.R. rendering brokerage services to Soviet and foreign Shipowners. V/O "Sofracht" carries out chartering of foreign and Soviet tonnage and is the General Agent for foreign flag vessels in Soviet ports.

Postal address: V/O "Sovfracht" 1/4, Zhdanova Street, Moscow, 103759, U.S.S.R.
Cable: Sovfracht Moscow
Telephone: 926-11-18
Telex: 411168 a, b, 411170 a, b.

Vsesoyuznoe Obyedinenie (V/O) "Morcontainer" is a container and liner broker acting on behalf of Soviet Shipowners and Shippers.

V/O "Morcontainer" is responsible for the programming and arranging of container services and liner shipments, cargo bookings of Soviet and foreign shippers on Soviet and foreign liner tonnage including tracing, leasing of containers and various container equipment.

Postal address: V/O "Morcontainer", 1/4, Zhdanova Street, Moscow, 103759, U.S.S.R.
Cable: Morcontainer Moscow
Telex: 411341, 411168, 411171, 411369
Telephone: 926-91-29.

Vsesoyuznoe Obyedinenie (V/O) "Sovbunker" carries out ships' bunkering and port consignment stock operations.

Postal address: V/O "Sovbunker", 10/12, Kaloshin Lane, Moscow, 121002, U.S.S.R.
Cable: Sovbunker Moscow
Telex: 411170
Telephone: 248-23-52.

Vsesoyuznoe Obyedinenie (V/O) "Soyuzvneshtrans" carries out all transportation and forwarding of export and import cargoes as well as transit of goods via the U.S.S.R. and foreign territories.

Postal address: V/O "Soyuzvneshtrans", 17/16, Gogolevsky Boulevard, Moscow, 121019, U.S.S.R.
Cable: Soyuzneshtrans Moscow
Telex: 411441, 411442
Telephone: 203-11-79.

(c) Guiding principles to comply with when calling at U.S.S.R. ports: When calling at U.S.S.R. ports Masters of all foreign flag vessels are requested to comply with the Instructions and Provisions of the Government of the U.S.S.R. published annually in issue No. 1 of the U.S.S.R. Notices to Mariners. Special Instructions for vessels calling at U.S.S.R. in each particular sea basin published by the General Department of Navigation and Oceanography of the Ministry of Defence of the U.S.S.R. (GDNOMD).

All vessels calling at U.S.S.R. ports must also abide by the Customs and Obligatory Harbour Regulations of each particular port of call which are obtainable through the local Inflot agencies, viz. shipping Agents for foreign flag vessels at U.S.S.R. ports.

(d) Ship/shore radio link: Ships' communication with ports of call is usually maintained through the local port radio stations, some information of which is given in the respective entries for the ports.

Ships' radio stations and/or radio-telephones (excluding VHF), must not be operated when the vessel navigates or lies at anchor within the limits of the port boundaries as well as when calling at or leaving the port, except in emergency, e.g.

when giving distress signals;
when rendering assistance to other vessels in distress;
while making way through the ice;
after having obtained special permission of the Harbour Master.

Note: Superiority in use of radio communication means is given to an icebreaker when leading a convoy of ships through the ice; in case there are two or more icebreakers in a convoy – to a leading icebreaker.

Vessels equipped with VHF radio-telephones must keep them operated in the calling Channel stipulated by the Obligatory Harbour Regulations when navigating within a port limit.

(e) Notice of arrival: The Master of a vessel should send preliminary information to the Inflot Shipping Agency about the vessel and the cargo not later than 12 days prior to vessel's arrival at the port of destination (for tankers, gas carriers and vessels loaded with liquid chemicals, as a rule, 14 days prior to arrival).

In the preliminary Notice the Master should state the following information:

Name and nationality (flag) of the ship;

Port of departure (last port of call);

Draft fore and aft, cargo carrying capacity, volume of holds, measures of hatches, number and location of 'tweendecks, etc.;

Nature and total quantity of cargo and stowage plan; heavy lifts (over 3 tons) to be shown separately;

Amount and spacing of water ballast (for tankers only), as well as the name of cargo which was unloaded from the vessel before taking ballast;

Particulars of inoperative cargo handling gear as well as whether the vessel requires supply of electric power from the shore for lighting purposes during cargo handling operations (all possible damages which may occur either for lack of all relevant information mentioned above or due to untimely and/or incorrect data given by the Master to the Port Authorities when advising ETA, etc., are to be for the vessel's account).

Request for any kind of port services.

More precise information about a vessel's approach to the port (roadstead) of destination is to be given by the Master to the Inflot Shipping Agency. Masters of dry cargo vessels are to inform ports of destination about their ETA at first 96 hours and then 12 hours prior to arrival and as far as Masters of tankers, gas carriers and vessels loaded with liquid chemicals are concerned they are to inform Port Authorities 72 hours and 12 hours prior to their arrival at a port.

Masters of tankers bound for loading/unloading oil products are to inform ports of destination 72 hours prior to their arrival that they have in their possession International Certificate on Civil Liability for Oil Pollution Damage.

According to Charter Parties, Sale Contracts and other documents stipulating conditions of carriage of goods by sea, Masters should give necessary information to additional addresses at stipulated time.

The Port of destination Authorities should be immediately informed by the Master about all unforeseen delays during the voyage.

Vessels calling at ports for bunkers, fresh water, provisions, etc. only, should advise their ETA to the Port Administration in due time stipulated above.

The Port Administration should provide Masters of calling vessels with all necessary information regarding anchorage, berthing and handling of cargo not later than 2 hours prior to vessel's arrival.

Since for some ports time and terms of giving Notice of Arrival are different to that mentioned above, Masters are advised to look at the information for a particular port.

(f) Pilotage: Pilotage is compulsory for all vessels when calling or leaving U.S.S.R. sea ports, as well as when mooring and unmooring. In addition the Pilots perform shifting berths and other duties related to the harbour operations.

A Pilot having boarded a vessel shall be advised by the Master of the precise draft and other particulars necessary for safe pilotage of a vessel.

According to the Merchant Shipping Code of the U.S.S.R. the Master of a vessel shall be obliged to pay a fine in an amount of double the rate due as pilotage fee for incorrectly declaring the draft, length or breadth of a vessel or its net registered tonnage, irrespective of the liability established by law for the consequences which may occur as a result of the incorrect information.

A Pilot should be ordered through the local Inflot Agency 12 hours prior to vessel's arrival at the Pilot boarding place. More accurate information should be given 4 hours prior arrival unless otherwise stated in the Obligatory Harbour Regulations.

(g) Anchorages: A vessel approaching the Port of Call and not having been boarded by a Pilot immediately on arrival, or for any other reason, shall anchor in the anchorage area specially designed for this purpose and under no circumstances let its hull go across the boundaries of this area or prevent other vessels from using the leading lights, navigation marks or lights.

No anchorage is allowed in the prohibited zones shown on the charts, listed in special manuals for navigation and/or in the Obligatory Harbour Regulations as well as those announced in the appropriate Notices to Mariners.

No anchorage is allowed at a distance of less than 1.5 cables length off fairways and leading lines as well as in depths not providing a vessel with a safe anchorage while drifting on the anchor chain.

No vessel shall anchor within the water area of a shipbuilding yard after being refused permission to carry out repairs.

It is prohibited to change a vessel's anchorage by drifting.

Vessels carrying explosives or inflammable liquids must anchor in the areas recommended for them only.

All vessels when at anchor shall carry the lights or the marks in accordance with International Regulations for Prevention of Collisions at Sea. Apart from that every vessel by night, when at anchor, shall be illuminated from stem to stern with additional lights placed so that the hull be as far as possible visible from the surface of the water.

Vessels using a kedge anchor shall, in addition to the lights and the marks as to the International Regulations for Prevention Collisions at Sea, conspicuously display by night a white light and by day a red flag lowered from the stern by the anchor chain to the extent of half of the side's height.

In restricted visibility whether by day or night, every vessel when at anchor shall use sound signals conforming strictly with the International Regulations for Prevention of Collisions at Sea.

Masters of all vessels when at anchor are not allowed without the Harbour Master's consent, except in emergency, and/or in case of Port and Boarding officials, to give anybody permission to come alongside in a private launch or a small rowing boat whether under oars or sail and board a vessel.

Swimmers must not be allowed to come on board a ship.

Should, in case of emergency, swimmers have been taken on board or strangers have been discovered aboard a vessel, the Master of such ship shall forthwith without delay report the fact to the Harbour Master and shall later hand those people over to the Representatives of the Port Administration.

(h) **Regulations for entering and leaving U.S.S.R. ports:** When approaching U.S.S.R. ports all vessels must follow the recommended courses announced in issue No. 1 of the U.S.S.R. Notices to Mariners (GDNOMD).

All vessels when approaching a port or a Pilot's boarding place as well as when leaving a port during the daytime must keep their National flags hoisted. A vessel's National flag must be kept hoisted on the stern flagstaff from 0800 hrs. in the morning up to sunset, and the U.S.S.R. National flag on the fore mast. In Arctic ports during prolonged period of light National flags must be kept hoisted from 0800 till 2000 hrs.

Every vessel coming from abroad shall hoist Quarantine Signals of the International Code of Signals depending on health and sanitary conditions on board.

For entry permit a vessel must contact the Port Control service either by VHF radio-telephone or by means of visual signals, viz, by day, hoisting her call-sign, and by night, making call-sign signals in Morse Code by searchlight or by Morse-lamp.

No ship shall enter the Harbour until the proper signal has been hoisted at the signal station or by a pilot boat authorising such entry.

No vessel is allowed to enter the Harbour until the prohibition signals hoisted at the signal station shall have been lowered down.

If entry is refused a vessel must immediately slow down, alter course and if possible leave the fairway, and drift or drop her anchor in the recommended area.

Turn of entry to the Harbour is controlled by the Port Administration with regard to tonnage of vessel, nature of cargo, weather conditions in the port area, readiness of the port to start cargo operations and other circumstances.

Simultaneous entry of two or more vessels to the Harbour or vice versa is not allowed in the majority of ports.

In all cases a vessel entering the Harbour must give way to the outgoing one not preventing her manoeuvrability.

(i) **Sanitary and Quarantine requirements:** It is prohibited by law to contaminate inner and territorial waters of the U.S.S.R. with any kind of substances which are considered to be unhealthy for people or harmful to live resources of the sea. It is also prohibited to discharge into the sea oil contaminated, faecal, washing waters and oil residues; no rubbish, waste foodstuff shall be thrown into the water. The list of harmful substances is published annually in issue No. 1 of the U.S.S.R. Notices to Mariners.

Not later than 6 hours before arrival Masters of all vessels coming from foreign countries to the U.S.S.R. ports should advise Quarantine Authorities by radio through Inflot Agency giving full details of health conditions on board as well as sanitary conditions at the last port of call.

If medical assistance is required on board Master has to contact Inflot Agency.

No shore connection is allowed to a vessel until Free Pratique is obtained.

Masters are advised to ask a Sanitary Officer for inoculation, vaccination, fumigation, de-contamination, etc., if required, whilst he is on board a ship together with the other Boarding Officials.

Veterinary Certificates of Good Health are required for the livestock, all kinds of meat, animal food and raw meat stuff brought to the U.S.S.R. ports from abroad. Certificates should be issued by the proper authorities of the country from which the cargoes have been exported.

Masters should have a Phytoquarantine Certificate for the goods of vegetable nature.

It is prohibited to take ashore fruit, vegetables, grain seeds, plants, plant products, etc., without a certificate issued by a local branch of the U.S.S.R. Agricultural Quarantine Inspection; animals and birds are also not allowed to be brought ashore without getting pemission from the veterinary authorities.

Shipmaster's Report: March 1983.

Removal of garbage, food wastes, ballast, bilge and sewage waters at Soviet ports of the Baltic Sea is free of charge (excluding the port of Tallinn).

(j) **Regulations for the Clearance of Vessels on Arrivals and Departures:**

Upon arrival at a U.S.S.R. port the Master of a foreign flag vessel has to hand over to a representative of the Inflot Shipping Agency the following documents (filled in with full accordance of the IMO requirements) duly signed by the vessel's administration for further examination by:

(a) *Boarding Port of Call Officials:*

(1) Ship's Patent;

(2) Measurement Certificate;

(3) Load Line Certificate (or International Load Line Exemption Certificate);

(4) Passenger Ship Safety Certificate;

(5) International Certificate on Civil Liability for Oil Pollution Damage (for vessels carrying more than 2,000 tons of oil).

(b) *Health Authorities:*

(1) Ship's Health Certificate;

(2) Derat Certificate;

(3) International Certificate of Vaccination;

(4) Maritime Sanitary Declaration.

(c) *Customs Officials:*

(1) General Declaration;

(2) Cargo Declaration;

(3) Ship's Crew Personal Effects Declaration;

(4) Crew List;

(5) Passengers List.

The Master has to declare to the Customs:

(1) Cargo Manifest, Bills of Lading and other documents for the cargoes carried by the vessel.

(2) Other Ship's documents on request.

The Master fills in a form of Master's Declaration (Shipowner's address, cargo, cases of illnesses on board, if any, etc.) with the Agent's assistance.

In accordance with Article 38 of the Merchant Shipping Code of the U.S.S.R. in case a foreign flag ship which, on calling at the U.S.S.R. port, raises doubts as to her meeting the requirements of safe navigation may, irrespective of whether she possesses the necessary ship's papers mentioned above, be subjected to an examination by way of technical survey on the same basis as ships sailing under the State Flag of the U.S.S.R.

The Obligatory Harbour Regulations to be fully complied with during a vessel's stay at the U.S.S.R. ports are handed over to the Master either by Pilot or by representative of the Harbour Master's Office, or by Agent when arriving for the first time.

Upon sailing from a U.S.S.R. port: No other documents apart from those mentioned above are required in order to obtain the authorisation to leave the port.

No vessel is to get under way without having obtained the permission of the Harbour Master.

The authorisation to leave the port shall be given after a vessel herself and her draft shown in the Master's Statement have been checked by a Port Authorities' representative.

The Harbour Master may not allow a vessel to leave the port, if:

(1) The Cargo Loading Regulations have not been fulfilled, *i.e.* a vessel is considered overloaded or wrongly loaded in case:

a) a vessel's load lines corresponding to the maximum depth to which she should have been loaded are under water without any list;

b) the cargoes loaded in the holds and/or on deck have not been made fast in a proper manner or have not been made fast at all;

c) a vessel has a bad list* caused by faulty loading or her stability does not correspond with the ship's documents;

d) a vessel loaded with bulk or liquid cargoes has not used the necessary materials or accommodations to prevent cargoes from shifting or overflowing in case of vessel's pitching and rolling;

e) the deck cargo is considered as danger to the safety of a vessel and the safety or life on board caused by faulty loading;

f) the corresponding regulations for loading of dangerous cargoes or cattle to be carried by vessel have been broken;

g) other loading regulations have not been abided by in the course loading.

(2) Under other circumstances which may cause a danger to the safety of a vessel and the safety of life on board, as well as in case when the ship's documentation regulations have been infringed.

(3) When the port dues, tolls and fines have not been paid.

All expenses which may occur due to a vessel's possible delay in the port in connection with the reasons stated above are to be for the Owner's account.

Note: *According to the Harbour Regulations a vessel is not allowed to leave a port if her list exceeds 5° or she has trim by bow which was not specified by her construction.

ANNEX 2

The Memoranda for Masters of Foreign Vessels calling at Soviet Ports.

1. On arrival of the ship the Master is to submit to the representatives of the Port Authorities the following documents (IMO forms) duly signed by ship's administration:

General Declaration (Form I). Filling in of points 8 and 11 is not compulsory (5 copies).

Cargo Declaration (Form II). (4 copies). Filling in of point 6 is not compulsory; points 7, 8 and 9 are to be filled in only for:

a) cargoes for which Bills of Lading were not issued (names of Shippers and Consignees to be stated);

b) transit cargoes;

c) cargoes for other Soviet ports;

d) cargoes of agricultural origin;

Ship's Stores Declaration (Form III) – not required.

Crew's Effects Declaration (Form IV). Amount of Master's and Crew members' valuables (gold, silver, platinum, jewellery, bonds, travel checks, etc.), personal firearms and cartridges (ammunition), explosives and narcotics are to be stated in point 2 (2 copies).

Crew List (Form V) (4 copies).

Passenger List (Form VI) (4 copies).

2. The Master of a ship is to instruct all members of the ship's crew that in accordance with the Rules in force in Soviet ports:

Exportation and importation of Soviet currency is forbidden;

No articles are permitted to be taken ashore or brought on board the ship without permission of the Custom House Authorities;

Articles taken ashore or brought on board the ship and concealed from Customs control shall be regarded as smuggled goods liable to confiscation with a fine imposed;

Likewise, the sale of any articles of foreign origin on the territory of the U.S.S.R. will be regarded as smuggling;

No wastes shall be thrown into the water or on the quay; the discharge of oil contaminated water and/or oil residues is prohibited;

All mooring ropes must be fitted with rat-guard plates;

Only one gangway must be led ashore at night when loading or discharging is not carried out;

It is prohibited to take ashore grain, seeds, plants, plant products, soil, etc. as well as animals and birds;

Violation of the above-mentioned rules will entail penalty in accordance with the laws of the U.S.S.R.

(k) Customs Examination: Immediately after the clearance formalities have been accomplished, all the vessel's premises with cargoes and articles not destined for the port of call and not being allowed to be taken ashore are sealed by the Customs Officials. In case a part of cargo and/or articles, not for discharge at destination port, are stowed in the same area as articles for discharge at the destination port, the sealing is carried out after discharge of articles destined for the port.

Extracts from the U.S.S.R. Customs Regulations:

It is allowed to bring in on arrival to the U.S.S.R.:

1. Personal effects in quantities necessary for the trip.

2. Food-stuff, wine and/or alcohol, cigarettes/tobacco in quantities necessary for personal consumption during the trip, but duty free for 1 person not more than:

spirits-1 litre;

wine-2 litres;

250 cigarettes or 250 g. of tobacco/tobacco articles.

Fresh, salted or smoked meat, fat, dressed poultry, smoked and home-made sausages, eggs, honey, milk and fish-products, but not canned fish – unless permit of the U.S.S.R. Ministry of Agriculture is available.

3. Foreign currency without restrictions on quantity.

Bringing in Soviet currency from abroad (if not stipulated by special agreements), as well as U.S.S.R. State-loan bonds and Soviet lottery tickets is strictly prohibited.

4. Jewellery and every day necessities made of precious metals or jewels without restrictions in quantity (duty free.)

It is allowed to bring in not more than 2 jewellery articles for every day necessities made of pearl only or mixed with pearl having total weight not exceeding 100 gm.

It is prohibited to bring in natural pearl and seed-pearls.

5. Foreign currency, jewellery and every day necessities made of precious metals or jewels and pearl must be declared to the Customs.

6. It is *strictly prohibited* to bring in to the U.S.S.R.:

Fire-arms and ammunition of any military kind;

Narcotics and psychotropic substances as well as appliances for Smoking opium and hashish;

Printed matter cliche, negatives, developed films, photos, video-cassettes and video-discs with films recorded on them, manuscripts, gramophone records and any other type of sound recording, drawings, pictures and articles of fine arts containing data which may do harm to political and economic interests of the U.S.S.R., State security, public order, human health and morals of the people.

It is allowed to take out when leaving the U.S.S.R.:

7. Personal effects, foreign currency, jewellery and every day necessities made of precious metals, jewels and pearl that had been brought to the U.S.S.R. earlier.

(Taking abroad U.S.S.R. currency if not stipulated by special agreements, U.S.S.R. State-loan bonds and lottery tickets is strictly prohibited.)

8. Food-stuff, wine, spirits and cigarettes/tobacco in quantities necessary for personal consumption during the journey but not more for a single trip than:

spirits – 1 litre;

wine – 2 litres;

250 cigarettes or 250 g. of tobacco/tobacco articles;

black or red caviar – 150 g.;

ground or instant-coffee – 200 g.;

spices 200 g.

9. Articles bought for officially received Soviet currency for personal use only, not more than 5 pieces of jewellery and/or every day necessities made of precious metals, jewellery or any kind of pearl in total; articles and decorations made of silver having total weight not more than 400 g.

10. It is allowed to take out without quantity restrictions any articles (except forbidden ones) bought for foreign free currency in specialized shops on the U.S.S.R. territory on producing corresponding bills (receipts) given by shops.

11. It is *prohibited* to take out of the U.S.S.R.:

1. Fire-arms and ammunition of any military kind as well as military outfits.
2. Narcotics and psychotropic substances.
3. Nullified securities.
4. Works or art, antiquities (paintings, sculptures, china, articles made of crystal, ceramics, wood, leather, precious and non-precious stones and metals, bone, hand-work, carpets, gobelins, furniture, fancy clothes and footwear, numismatics, works of art, weapons, books, manuscripts, gramophone records, musical instruments, stamps, etc.) and other articles being a high artistic, history making, scientific or other cultural valuables.

Note.: Above mentioned articles may be taken out of the U.S.S.R. with special permission of the U.S.S.R. Ministry of Culture provided an export duty equal to 100% of the value stated in the Export Permit has been paid.

5. Antlers and hides of stags.

(l) Berthing: Berthing can only be effected with tug assistance and a State Pilot on board. Likewise, no vessel shall leave or shift berth without employing the services of a Pilot authorised by the Port Administration to make the voyage in question.

Vessels must take up the berths assigned to them and conform strictly to the Obligatory Harbour Regulations in force.

A Pilot or the Agent shall provide the Master with all necessary information as regard to depths, tugs, conditions in the Harbour, etc., before mooring and shifting berth starts.

The responsibility for the safety of a vessel during her manoeuvring and berthing as well as for possible damages to a berth or other port facilities shall always rest with the Master.

No vessel is allowed to change berth due to handling of cargo or for any other reason unless the main engines, the mooring winches, the steering gear, etc., are in good working order and there is sufficient number of the members of the crew to ensure shifting berth when required.

It is strictly prohibited to work with vessel's propellers when lying alongside berth. To avoid damage to the underwater parts of a berth while mooring or unmooring every vessel must have the main engines going "dead slow" until her stern is 10 m. from the quay.

When berthing, Masters should use strong and reliable mooring lines and make them fast over the quay pile-moorings and bollards only. It is strictly prohibited to make fast mooring lines over any part of the quay equipment which has not been intended for that purpose.

When lying alongside berth, every vessel must have a gangway or a gangway board with a lifeline secured, led ashore and made fast. There should be a net under the gangway platform and a lifebuoy nearby. Gangways must be sufficiently illuminated at night.

(m) Stay in port at berths: When lying alongside berths, all vessels to be moored by long safe ropes which are to be kept fast at all times, and constant watch should be kept by day and at night.

All mooring ropes must be fitted with rat-guard plates.

From sunset to sunrise all vessels' decks, cargo decks and gangways must be illuminated.

Every vessel, whether in the outer roads or in the harbour, must always have on board a sufficient number of crew to be able to ensure both the ship's safety and her everyday routine. Vessel's fire-fighting and life-saving equipment must always be ready for use on board or to render assistance to other vessels or shore objects in case of emergency.

When in port, no vessel is allowed, without having obtained the Harbour Master's permission, to make repairs to the main engines or to the ship's auxiliary equipment thus depriving her of the opportunity to shift berth at short notice in case of emergency.

It is not allowed, without the permission of the Port Administration, to use vessel's boats, underwater oxygen and any underwater apparatus of other types.

No vessel is allowed to clean boilers or discharge any sort of chemicals or organic products into the water, giving off smoke and sparking from vessels' funnels.

(n) Ship's movement in the harbour and shifting berths: No vessel shall leave or shift berths without the permission of the Port Authorities. In case there are no provisions in the Contract of Carriage of Goods by Sea or in the Bill of Lading, a vessel shall accomplish one shifting from berth to berth during the course of her loading and shifting upon unloading to the loading berth at the Owners' risk and expense. Any subsequent shifting shall be at the expense of the goods.

All shiftings in the port connected with a vessel's needs, viz. bunkering, loading supplies and/or provisions, making repairs, etc., shall be at the expense of the vessel.

All haulings both during the course of loading and unloading shall also be at vessel's expense.

(o) Tugs' assistance: Tugs, if necessary, are usually ordered by the Master according to a Pilot's advice.

In some ports use of tugs during mooring and shifting berths is compulsory due to the heavy conditions of navigation.

Ordering of tugs and payment for the assistance rendered is made in accordance with the tariffs in force. Masters of vessels shall order tugs through a local Inflot Shipping Agency.

A tug's detention time at a vessel's side while waiting for her readiness for the towage is considered to be as the working time and therefore is to be paid accordingly.

For cancellation of a tug, a vessel shall be charged full rate, including detention time and time of passage of a tug from the berth to the vessel and vice versa.

When ordering a tug for unmooring, Master should fill in and sign a special application form given by the Agent. The actual time of completing the towage shall be approved by the Master of a towed vessel.

In ports where the towage is compulsory when mooring and shifting berths, the Master shall be charged for the tugs' assistance whether used or not, and having refused tugs shall be held responsible for the consequences thereupon.

(p) Notice of Readiness: In case there are no special provisions in the Contract of Carriage of Goods by Sea, the Master shall, during the established office hours upon the accomplishment of Customs formalities and having obtained Free Pratique, deliver through his Agent in the port, viz. Inflot Agency, a notice of the ship's readiness for loading or unloading to the consignee or the shipper.

The notice of the vessel's readiness shall be considered accepted if she is actually ready to load the cargo into or unload it out of all the vessel's holds or tanks.

(q) Handling of cargo: All cargo handling areas in the ports are under control of the Port Administration which shall provide vessels with labour, tally staff, sheds and warehouses, employees, etc.

To ensure successful handling of cargo the vessel shall, when required by shippers or consignees, receive or discharge cargo day and night, as well as on Sundays and holidays, furnishing free of charge all necessary cargo handling gear. Though in most ports the cargo handling is done by port cranes both from the quays and lighters, a vessel shall, in some ports, use her own cargo handling equipment, which has to be in good working condition.

In the latter case, the Master shall produce to the Agent the Cargo Equipment Certificate which must be valid.

Loading or unloading time is calculated as to the rates stipulated in a Charter Party or according to the Customs of the Port in the absence of same.

Should the port labour participate in the opening or closing of hatches, a vessel's administration shall be responsible for the rules of safety engineering to be complied with.

Opening and closing of mechanised ship's hatches shall always be done by the ship's crew.

Should shore cranes be used for loading or unloading instead of a vessel's cargo-handling equipment, the Master shall beforehand remove aerials, aerial halyards, stay rods, wires, etc., crossing the air space over a ship's hatches and preventing the shore cranes' derricks from free circulation.

The vessel's derricks shall not project over the sides.

(r) **Agency:** All foreign vessels upon arrival at the U.S.S.R. ports are attended by the Maritime Agencies Inflot.

Inflot Agencies provide foreign vessels with the following services:

Inform the Port Authorities and other organisations about vessels' expected time of arrival (ETA), nature and quantity of cargo to be handled, expected time of loading or discharging, etc.;

Render assistance to the Masters in obtaining Pilots, tugs, berths, launches, etc.;

Perform all the necessary formalities connected with the vessels' arrival and departure;

Ensure that Masters are acquainted with the Port Rules, Obligatory Harbour Regulations as well as other documents and instructions issued by the Port Authorities;

Give advice to the Shipowners and other interested parties regarding vessels' movement and the prospects for the handling of cargo;

Render help in speeding up cargo handling operations;

Provide vessels with supervisors and tallymen;

Prepare time sheets and submit them to the Masters, Port Authorities and Shippers (Consignees) for their further approval;

Sign on Masters' behalf cargo and other documents;

Arrange bunkering, delivery of fresh water, provisions, technical supplies and all kinds of ship-repairs;

Render help to the members of the crews in obtaining medical assistance;

Make payment of dues, charges, fines (if any), etc., on behalf of the Shipowners and for their account;

Take all necessary measures for improvement of the handling of cargoes and ships' services;

Look after the Court (Arbitration) cases and cargo claims on behalf of the Shipowners;

Make Sea Protests as well as translation and duplicating of any documents on Masters' requests;

Repatriate members of the crews from the U.S.S.R. to their home ports;

Invite surveyors qualified by the U.S.S.R. Register of Shipping to conduct vessels' surveys;

Make extension of ships' documents;

Render help to the Shipowners in delivering and redelivering of their vessels on time charter;

Assist in arranging cargo fumigation on board;

Perform any commissions on the instructions of the Shipowners in regard to the ships' services and protection of their interests before any Authorities.

It is in the interest of the Master to advise Inflot Agency timely information as regard to a vessel's name and flag, ETA, gross register tonnage; draft fore and aft; position of cargo in hold (stowage plan); number, weights and location of heavy lifts, number and length of oversized (over 9 m.) pieces and Owners' cable address and telex number thus putting the Agent in a position to calculate the approximate sum of the disbursement expenses and ask the Shipowners to remit same (disbursement accounts are to be paid before vessel's departure).

Note: Bearing in mind the fact that most of the shore offices are closed on Sundays and holidays, the Master shall cable to Inflot Agency well in advance his order for bunkers, repairs, technical supplies and cash to enable the Agent to make necessary arrangements.

All branches of Inflot Agency work round the clock, including Sundays.

Cable address of any branch of Inflot Agency is "Inflot", e.g. "Inflot Leningrad".

(s) **Fire safety measures:** Fire safety measures at U.S.S.R ports must comply with the provisions of the International Code for the Carriage of Dangerous Goods by Sea. Every vessel upon arrival at a port must keep constant fire watch day and night and have fire-fighting and life-saving equipment always ready for action. Members of the crew must keep strictly to the Fire Safety Regulations especially during vessels' stay at oil and timber berths. Giving off smoke out of the funnels is strictly prohibited. In all the U.S.S.R. ports a fire brigade could be called over the phone by dialling 01 in case of fire.

(t) **Medical assistance:** Medical assistance, if required, is available, including vaccination and inoculation as well as dispensary and hospital treatment in all the U.S.S.R. ports. In case of emergency an ambulance or a doctor should be called for by telephone – 03 in all the ports.

(u) **Customs of the ports:** Customs of the ports should apply in case:

(1) there is no Contract of the Carriage of Goods by Sea at all;

(2) there are no provisions in a Charter Party or in the Bills of Lading in respect of items covered by these Customs;

(3) a Charter Party or a Sale contract and/or any other Contracts of the Carriage of Goods by Sea specially refer to these Customs of the Ports.

(v) **National and general holidays of the U.S.S.R.:** National and general holidays in the U.S.S.R. are fixed.

5 days working week with 2 holidays has been introduced for most of the industrial enterprises, government and commercial offices and other institutions. Saturdays and Sundays are weekly holidays in the U.S.S.R.

The other holidays are:

1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (Days of International Workers' Solidarity); 9th May (World War II Victory Day); 7th and 8th November (Anniversary of the Great October Socialist Revolution, 1917); 7th October (U.S.S.R. Constitution Day).

(w) Places of Recreation for foreign seamen: In the majority of the Soviet commercial sea ports foreign seamen can spend their spare time in the International Seamen's Clubs which can offer concerts by professional and amateur actors and singers, evenings of public hearing of recorded Russian and foreign music, Soviet and foreign films, etc. Sightseeing is usually organised by the local excursion bureaux.

(x) Summer Time: 1st April to 1st October – clocks advanced 1 hour at 0000 hrs.

ARCHANGEL: 64.34 N. 40.30 E.

LOCATION: A White Sea port. Archangel is situated at the mouth of the Severnaya Dvina river, in the S.E. corner of Dvina Bay. A part of the harbour is situated at the Northern end of the Povrakulsky Island, at the junction of the Maimax river and the Kuznechikha river, and is called the Economia Avant-port. The total length of the port area is about 30 miles.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Notices of ETA in accordance Soviet Wood Charter Party. Pilot boat located in area of the light buoy "Mudyugsky I". VHF Channel 16. Pilot boat is tug-boat with word "Pilot" on wheelhouse. Vessels awaiting Pilot may anchor at safe distance to North from pilot boat location. In event bad weather pilot boat goes to shelter, being available by VHF radio.

While waiting for a Pilot, vessels may lie at anchor at a safe distance to the North from the pilot boat location.

In the event of bad weather a Pilot shall board a vessel at a sheltered place shown by him.

When a Pilot is not able to board a vessel due to weather conditions, a pilot boat is usually situated on the Southern side of the Mudyug Island. In this event vessels should anchor at the entrance of the channel from seaward and wait for a Pilot's arrival.

ANCHORAGES: There are several places which can be used by foreign vessels for anchorage. They are:

(1) The outer roads with depths from 10.0 m. to the North and N.W. from the reception buoy "Mudyugsky I".

(2) The Chizhovsky roadstead with depths of 7.0 m. – 9.0 m. is used by all vessels while the Customs formalities are carried out both before entering and leaving the port.

(3) The Solombala roadstead with depths of 5.0 m. – 9.0 m. is used by vessels for anchorage while awaiting a berth for loading cargo.

(4) The roadstead of the Maimaksansky timber port with depths of 5.0 m. – 9.0 m. is used by vessels while awaiting a berth for loading cargo or when awaiting good weather for going to sea being fully loaded.

(5) The Lower-town roadstead with depths of up to 6.0 m. is used for anchorage by coastal traders.

(6) The Town roadstead with depths of 6.0 m. – 9.0 m. is used for anchorage by vessels while waiting for bunkering or time for passage under the railway bridge.

(7) The Krasnoflotsky roadstead with depths of 9.0 m. is used for anchorage by vessels awaiting a berth for loading or a passage time under the railway bridge. The ground at all roadsteads – mud and sand; anchoring is performed according to the Pilot's recommendations.

RESTRICTIONS: Ice breaks up in April. Port area open from end of April through to November.

During the time of high water vessels can enter the port through the approach channel Berezovy Bar if having length not more than 160 m. and draft not exceeding 7.9 m. Changes of passage drafts are published in the U.S.S.R. Notices to Mariners. Vessels going to Timber Mills No. 2 and No. 3 as well as to the cargo area Bacariza pass through the central draw span of the railway bridge once during 24 hours. During bad visibility (less than 5 cables) movement of vessels within the port is not allowed.

HEALTH: All vessels coming from foreign countries inspected by Sanitary Office. If no diseases vessel obtains Free Pratique. If vessels entering after calling at another U.S.S.R. port, Pratique automatic.

RADIO: All information from sea may be routed through Murmansk Radio (UMN) and Archangel Radio (UGE), A1 500 kHz, A3 2182 kHz.

All vessels when approaching the port of Archangel should establish radio contact through the coastal "Archangel Radio" station which operates 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*		
Call Sign	*working*	*calling*		*Time*	*Remarks*
UGE	500/476	500/480	A1A	H24	
"Archangel-Radio"	2182	2182	H3E	H24	
"Archangel-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24	
"Archangel-Radio-8" (Inflot Shipping Agency)	156.8*(16)	156.8*(16)	F3E	H24	Operates during period of navigation only
"Archangel-Radio-5"	156.8*(16)	156.8*(16)	F3E	H24	
Vessels' movement control (VMC)	156.45*(9)	156.45*(9)	F3E	H24	

*Frequencies are given in MHz.

**CPR – Central Port Radio station.

The storm signals station is situated in the Solombala area on the embankment of the Severnaya Dvina River named after George Sedov (Lat. 64° 35′ N., Long. 40° 30′ E.).

Storm signals are shown by the International Code of Signals by day and by Morse system at night.

Masters of vessels proceeding to the port of Archangel should advise ETA and all necessary information to the Inflot Agency as per conditions of the "Soviet Wood" Charter Party.

24 hours prior to arrival advise ETA to Inflot Agency. Four hours prior to approaching the "Mudyugsky I" Masters should advise more precise time of arrival.

TUGS: If necessary ordered 2 hours before arrival and normally join vessel near berth. Usually use ship's lines.

BERTHING: To certain extent depends upon tides. 37 berths available with depths alongside up to 9.6 m.

There are a large number of berths in the port along the river front, as well as at the Economia Avant-port.

Berths are equipped to handle timber, wood-pulp, paper, machinery and general cargo. There are enclosed warehouses and concrete floor sheds in the port.

CARGO HANDLING FACILITIES: Berths of the commercial port are equipped with mobile electric cranes of up to 32 tons capacity. Loading of timber from berths of timber mills is effected by shore cranes and vessels' cargo gear. There are also floating cranes from 5 to 100 tons capacity as well as other cargo handling equipment and interport transport means. Container crane of 30 tons capacity and back-up facilities.

BRIDGES: Vessels proceeding to load cargo at sawmills 2 and 3 have to pass under bridge which is opened once a day.

STEVEDORES: No particular ETA advices to stevedores/shippers required except those mentioned in Soviet Wood C/P. Loading rates, etc., also stipulated by Charter Party.

Mobile electric cranes of up to 20 tons capacity are operated on the quays. There are also floating cranes of up to 50 tons capacity, other cargo handling equipment and intra-port transport facilities. Sometimes, cargo handling is by vessels' gear.

MEDICAL: If any medical attention or prompt assistance required, Master has to contact Agent. No advance notice required. Clinic and hospital available.

DENSITY: Fresh water practically throughout port.

FRESH WATER: Usually delivered by self-propelled barges (minimum charge for 15 tons). A few berths equipped with shore water lines.

FUEL: Bunkers (gas oil and marine diesel fuel) can be taken from barges stationed in the Town roadstead or can be delivered by lighters.

FIRE PRECAUTIONS: While lying alongside timber berth vessel to take maximum fire precautions.

GANGWAY/DECK WATCHMEN: Not available from shore. Usual watch kept by ship's crew.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES:
Seaworthiness.
Measurement.
Loading Line.
Cargo Equipment.
Safety Equipment Certificates.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco/wine: No quantity limits, but not allowed to be brought ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

CONSULS: No Consuls in Archangel.

REPAIRS: All types of repairs possible, also underwater surveys.

DRY DOCKS: There are floating docks with capacity up to 7,000 tons.

SURVEYORS: Register of Shipping of the U.S.S.R.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport near town. Served by regular airlines.

TIME: GMT plus 3 hours, October 1st to April 1st. GMT plus 4 hours April 1st to October 1st.

HOLIDAYS: General holidays: all Sundays and Saturdays: January 1st (New Year's Day); March 8th (World Women's Day); May 1st, 2nd (World Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work on these days at shippers' discretion.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SERVICES: Compass adjusting, radar and radio repairs, etc.

SHORE LEAVE: Each crew member properly signed in Ship's Articles and having valid seamen's Book allowed ashore.

BANKS: None.

EMERGENCY CO-ORDINATION CENTRE: None.

STORING: See "Prelims" page viii.

1. Barge or truck.
2. Vessels can be stored during loading.
3. Trucks can proceed alongside.
4. No.
5. Customs permission required.
6. No.

NAVIGATION: Masters proceeding for loading timber should bear in mind that the swing bridge on their way to Timber Mills No. 2 and No. 3 is open once daily.

All vessels with drafts of less than 3.6 m. especially when engaged in towing timber rafts, should keep out of the way of deep-drafted vessels when passing through narrow places and approaching channels both at sea and in the river, and should not hamper their safe passage in such places. They should also safely pass vessels engaged in dredging of a channel.

When approaching a bend in a channel, every vessel should beforehand give a signal by 1 prolonged blast on her whistle or siren, reduce her speed and when it is safe and practicable, keep to that side of the channel which lies on the starboard side of such vessel.

Every Master when passing through a narrow channel, or approaching a bend in a channel should take positive early action prescribed by the International Regulations for Preventing Collisions at Sea to avoid a risk of collision with a vessel approaching from the other direction.

Deep draft vessels shall not overtake each other when navigating in the channel of the Beresovy Bar. A vessel proceeding to the port along the course of the channel must keep out of the way of another vessel leaving the port.

No vessel shall navigate in the port harbours in restricted visibility when navigational lights, marks, leading lights, buoys, etc. are not visible.

Ice: At the head of Dvina Bay drift-ice extends as far as 12 miles from the shore by the end of November. The Severnaya Dvina estuary usually gets frozen over at the beginning of November. At Dvina Bay the ice usually breaks up in April and at the Severnaya Dvina estuary – at the beginning of May. Thus, navigation in the port area lasts all year round for vessels with ice-class for White Sea.

Powerful ice-breakers, ice-strengthened vessels and tugs are maintained by the Port of Archangel Authorities to assist in navigation of the Dvina Bay waters and off the coast when ice conditions prevail.

Tide: The tidal range at the head of Dvina Bay reaches 0.8 m. – 1 m. and at Mudyug Island 0.1 m. – 0.5 m.

The in-going flood stream is usually stronger and about 1 hour longer in duration than the out-going ebb stream.

Sometimes the in-going stream at the bar of Severnaya Dvina may be hardly observed, being reduced to a few minutes of slack water. It may run steadily for some time then gradually attains its usual strength and goes on to set up to the time of high water.

The tidal streams in the Severnaya Dvina are considerably influenced by both strength and direction of the wind.

Moderate Northerly and Westerly winds increase the height of the tide and hold the fall of the water.

Only the in-going flood streams have been observed at the Severnaya Dvina estuary at springs. The extreme tidal range of the water level observed there is about 4 m.

DELAYS: On account of rain when loading timber.

DEVELOPMENTS: For the immediate future no draft increase expected. Some berths under reconstruction and cranes being installed to load timber.

AUTHORITY: Chief of the Port of Archangel, 163061 Naberezhnaya Lenina 36, Archangel, U.S.S.R. *Tel:* 37840. *Telex:* 242111. *Cables:* 163061 Morport Archangel. *Contact:* Via VHF.

AGENT: Shipping Agency "Inflot", Archangel. Tel. 35874, 38573, 34040. Telex: 242115, 242231.

BATUMI: 41.39 N. 41.38 E. (See Plan Book)

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Batumi situated in South of Black Sea Caucasian coast, at head of Batumi Bay. Navigation is year round. Navigational range marks to note when approaching port are: Batumi Beacon, Burun-Tabia Light, Batumi Light Buoy with siren and Batumi Leading Light Marks. When proceeding Batumi, Master should give 96 hours' notice prior arrival, advising Port Controller and "Inflot" Agency: time of arrival, description and quantity of cargo brought in, location, ship's draft and length, as well as declare services required. 4 hours' prior to approaching port, Master shall advise more precise time of arrival. Inflot will arrange Pilot. Pilot on VHF Channels 16 and 12.

Pilot boards vessel either at the Receiving Buoy or in the Outer Port Roads. Watch is kept by a pilot boat day and night.

ANCHORAGES: The port harbour is protected by a mole from the seaward and provides a safe anchorage except at times when S.W., West and N.W. winds blow and the "Tyagun", strong variable current with surge is formed.

At the time of "Tyagun" vessels are recommended to stop cargo handling operations and go out to sea.

During S.W. winds which are considered particularly dangerous and usually accompanied by heavy surge, Masters should observe special precautions and take all necessary measures to avoid impact with the mole.

The Outer Roads of the port with depths of about 9 m. – 20 m. and 0.5 cables in width, extend for a distance of about 1.5 miles to the E.N.E. from the Batumi Light Buoy along the edge of the shoal. The bottom is mud and sand.

The Inner Roads are situated between the Western coast of the Batumi Bay and the shoal extending from the Southern and S.E. coasts of the Bay. Depths in the Inner Roads are between 25 m. – 11.5 m.

The anchorage in the Inner Roads is exposed to North winds. However it is not safe during strong winds blowing from other directions.

Every vessel when in the inner roads must take necessary measures so as not to drag her anchors.

The recommended anchorage is in the Outer Roads at a distance of 7.8 cables to N.N.E. from the Eastern side of Batumi Point, depths 9 m. – 14.4 m.

In the Outer Roads vessels may anchor only after having obtained the Harbour Master's permission and according to Pilot's recommendation.

In the Inner Roads vessels may obtain anchorage only Eastward of the entrance leading line. It is strictly prohibited to lie at anchor both on the leading line and to the West of it.

BALLAST: In case of stormy weather, in Autumn and Winter particularly, vessels without cargo must enter the port with ballast water on board, having ensured fore draft not less then 1.5 m. – 1.8 m.

Ballast water should not be contaminated with oil residues.

RESTRICTIONS: Vessels may enter and leave the port at any time of day and night. All vessels when entering or leaving the port must have keel clearance of not less than 0.3 m. (1 ft.).

In the event of stormy weather vessels approaching the port at time of S.W. and N.W. winds particularly, should obtain Harbour Master's entry permit. Vessels coming to the port without cargo are obliged to enter the port with ballast water taken in such a way that bow draft should not be less than 1.5 m. – 1.8 m. Ballast water must be clean. If due to the "Tyagun" vessels are not allowed to enter the harbour, they should anchor either in the Outer or Inner Roads.

All necessary information as regard to changes of wind, possibility or turn of entry to the port for vessels at anchor in the Outer Roads, is given by the Harbour Master over the VHF radio-telephone or by the signal station by flags of the International Code of Signals, in Morse Code or by semaphore signals.

MAX. SIZE: For oil carriers: Berth No. 1, 175 m. LOA, 31.6 ft. draft; Berth No. 2, 165 m. LOA, 30.5 ft. draft; Berth No. 3 165 m. LOA, 30.5 ft. draft; Berth No. 4, 150 m. LOA, 29.5 ft. draft: Berth No. 5, 212 m. LOA, 29.5 ft. draft. For Cargo ships: Two berths where vessels may discharge. Maximum draft 32.5 ft.

RADIO: Send ETA to "Inflot Batumi" 96 hours and 48 hours in advance and confirm 4 hours in advance.

All vessels when approaching the port of Batumi should establish radio contact via Batumi Radio port radio station operating 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of Trans-mission*	
Call Sign	*Working*	*Calling*		*Time*
UFA	500	500	A1A	H24
"Batumi-Radio"	2182	2182	H3E	H24
"Batumi-2" (Port Controller)	156.8*(16)	156.8*(16)	F3E	H24
"Batumi-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24

Radio-telephone communication via VHF Channels is carried out in A1A type of transmission after preliminary arrangement.

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Shore signal station is situated 1.6 cables W.N.W. from Batumi Point. International Code signals, and sometimes storm signals, are hoisted at the mast of the signal station.

VHF: Port Control on Channels 16, 13 and 14. Pilot on Channels 16 and 12. Tugs on Channel 9.

BERTHING: The berths of the port with depths alongside 8.0 m. – 13.0 m. are equipped to handle crude oil and oil products, bulks (coal, grain, ores) and general (machinery and mechanical equipment) as well as passenger shipping.

A vessel should lie at a berth with her bow directed to the port entrance and with her anchor dropped from the proper side. Berthing in the harbour may only be effected with tugs' assistance.

A vessel may be berthed at the outer side of the Oil Jetty after having obtained the Harbour Master's permission.

Vessels entering or leaving the harbour are not allowed to pass vessels loading at the outer (Northern) side of the Oil Jetty at a distance of less than 80 m.

The berths of the port are equipped with electric cranes of up to 20 tons capacity. There is also a floating crane of 100 tons capacity. Other cargo handling equipment, covered warehouses and concrete floor sheds are available. Rate of grain loaders 5 t.p.h. – 120 t.p.h.

TANKERS: Mooring buoys are placed to the North of the Oil Jetty and a pipe-line for loading tankers of up to 40,000 d.w.t. is led up to them. Mooring of such tankers is effected with tug assistance under control of the Senior Port Pilot. Vessels moored to these buoys should drop 2 anchors from the bow with 7 – 8 shackles of anchor chain and strong mooring lines should be lead to mooring buoys from the stern and made fast.

When lying at mooring buoys a vessel should keep a 24 hour VHF watch on receiving Channel and observe corresponding rules of the Port.

TIDE: The range of water level in the port area is small and is due to the effects of strong winds. The maximum range observed 0.6 m.

MEDICAL: Medical attendance in local seamen's hospital. Masters to advise by radio prior arrival of medical attendance required on board.

DENSITY: 1018.5.

FRESH WATER: Supplied ex-shore to ship directly. Maximum pressure 20 t.p.h. Also supplied ex-water barge. Maximum quantity delivered by barge is 650 tons. Rate about 60 – 80 t.p.h.

FUEL: Bunkers may be taken at the oil berths and can also be delivered by bunkering vessel to a ship handling non-dangerous cargo. In the latter case fire precautions must be strictly observed by the vessel taking bunkers.

FIRE PRECAUTIONS: No special precautions. There is 1 fire-fighting boat.

OPENING/CLOSING HATCHES: According to Charter Party and contract.

CUSTOMS ALLOWANCES: Tobacco: No restrictions. Wine and/or spirits: No restrictions.

IDENTIFICATION CARDS: Not required.

CONSULS: Turkey.

REPAIRS: Only minor repairs are possible.

AIRPORT: Batumi connected by airlines with different towns in Soviet Union. Airport situated about 5 km. from port.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

HOLIDAYS: New Year's Day; 8th March (Women's Day); 1st May; 7th October; 7th – 8th November; but port works on those days.

SHORE LEAVE: Crew members allowed ashore till midnight.

SHIPMASTER'S REPORT: There is now a sea-loading berth at this port immediately outside the harbour, the vessel lying to 2 anchors and stern on close to the breakwater and close Eastward of the harbour entrance.

The stern is secured to 2 buoys, using ship's ropes, 5 to a port quarter buoy and 3 to a starboard quarter buoy.

The bow is in about 60 ft. of water and the stern in about 42 ft., and vessels of up to about 40,000 tons d.w.t. are loaded there, this vessel loading safely to a draft of 37 ft. 6 in.

Two 10 in. pipe-lines are connected on the starboard side, 1 for discharging ballast ashore and 1 for loading at a rate of about 1,600 t.p.h. The charge for discharging ballast ashore is 7 kopeks per ton and it is not permitted to discharge any ballast into the harbour.

1 copy of a money list was required.

AUTHORITY: The Port of Batumi Authority, 20 Gogebashvili Street, 384500 Batumi. *Tel:* 3-29-59. *Cables:* Morport, Batumi.

AGENT: The Port of Batumi Main Maritime Agency "Inflot", Postal address: 20 Gogebashvili Street, Port of Batumi, U.S.S.R. Cables: Inflot Batumi. Tel: 9-24-15.

BELGOROD-DNESTROVSKY: 46.12 N. 30.21 E.
(See Plan Book)

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600 h.p. – 1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

DOCUMENTS:

7 General Declaration, IMO FAL Form 1.
7 Crew Lists, IMO FAL Form 5.
2 Crew's Effects Declaration IMO F4.
2 Money Lists.
2 Cargo Declaration IMO Form 2.
Safety Certificates.

PILOTAGE: Pilotage compulsory for all vessels. A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04′ N. Long. 30° 30′ E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.

ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception buoy. The holding ground is good. There is an inner roadstead situated within the port area where usually two vessels can be anchored pending berthing.

RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 5.2 m. and the maximum height (from the water level) of 26.5 m. Vessels having draft more than 4.5 m. should follow the channel at a speed not more than 5 knots.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).

RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	*Frequencies (MHz)*		*Kind of transmission*	*Time of work*
	working	*calling*		
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Harbour Master on VHF Channel 10.

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo, services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.

TUGS: If necessary, are ordered by the Master after having consulted the Pilot.

BERTHING: The berths of the port have depths alongside of up to 6.5 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another 2 vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 20 tons lifting capacity.

FRESH WATER: Available at berths.

FUEL: Diesel oil available.

REPAIRS: Only minor repairs possible.

CONSULS: None.

TIME: GMT plus 3 hours October to March. GMT plus 4 hours April–September.

AUTHORITY: The Port of Belgorod-Dnestrovsky Authority, 81 Shabskaya Street, 272300 Belgorod – Dnestrovsky, Odessa Region, U.S.S.R. *Tel:* 7-61-45.

AGENT: The Port of Belgorod-Dnestrovsky Maritime Agency "Inflot". Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, the City of Odessa Region, U.S.S.R. Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-22-01; 2-56-73. Telex: 232717.

BERDYANSK: 46.45 N. 36.48 E. (See Plan Book)

DOCUMENTS: Also refer to beginning of U.S.S.R. section.

5 Crew Lists.
5 General Declarations.
4 Cargo Declarations.
2 Crew's Effects Declarations.
1 Master's Declaration.
1 Master's Declaration about arrival at a Commercial Port of the U.S.S.R.
2 Stores Lists.
1 Maritime Declaration of Health.

For discharging vessels also: Manifests, Bills of Lading and Cargo Plan.

For all vessels, necessary to have all Ship's Papers and Ship's Certificates.

APPROACHES: The port of Berdyansk is situated in the N.E. part of Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E. winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-breaker assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channel, with a least depth of 7.0 m.

PILOTAGE: Pilotage is compulsory in Azov Sea. Kerch Pilot meets vessel near the entrance to the Kerch Strait and takes vessel to Berdyansk. Berdyansk Pilot meets vessel at Reception Buoy No. 14 (Lat. 46° 40′ N., Long. 36° 40′ E.). Telegraphic address of pilot station is: "Harbour Master Berdyansk". Vessels bound for Berdyansk should cable "Inflot Berdyansk U.S.S.R."/Ship's Agents/advance notice of ETA: ETA Berdyansk (date shown in group of four figures and if possible GMT of arrival); draft, flag, b.r.t., n.r.t., length, if for loading or for discharging, kind of cargo should also be advised. After which Inflot arranges pilotage through Kerch Channel. First notice of ETA to be sent after leaving last port and then 72, 48 and 24 hours' notice of ETA.

For contacting pilot station use VHF Channel 16. Pilot boat has a white hull with black writing on her side: "Pilot-29". Vessels wait for the Pilot at the outer road anchorage.

ANCHORAGES: Vessels may obtain good anchorage with depths up to 7.0 m. in the port of Berdyansk outer roads situated on both sides of the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but during Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usually effected by heavy pitching and rolling, and plenty of cable should be paid out on both anchors. Holding ground in outer roads is shell and mud.

RESTRICTIONS: Vessels can enter and leave at any time of day and night.

MAX. SIZE: The max. permitted draft for entry to the port is 6.7 m. and max. length 160 m. Keel clearance of 1 ft. at LW is required for entering and leaving.

HEALTH: To obtain pratique it is necessary to complete 1 Maritime Declaration of Health and hand it in for doctor. In the event of any disease or fever contact Agents.

RADIO: *Notice of arrival:* 96 hours and then 12 hours prior to arrival at the port Masters should advise the Port Administration via the local Inflot Agency time of arrival and the maximum draft of a vessel. Not later than 2 hours prior to approaching reception Buoy No. 14, placed at the beginning of the approaching channel, Masters should advise more precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Radio" port radio station operating 24 hours daily on the following frequencies:

Call Sign	*Frequencies (kHz)*		*Type of trans-mission*	*Time*
	Working	*Calling*		
UBX	500/418	500	A1A	H24
"Berdyansk-Radio-2"	2182	2182	H3E	H24
"Berdyansk-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Berdyansk-Radio-5"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24

*Frequencies are given in MHz.
**Central Port Radio Station.

RADAR/VHF: There is no port radar service in Berdyansk.

Use VHF Channel 16 initally and further communication on another Channel on agreement.

TUGS: Join vessels in inner roads. Vessel's lines usually used. No extra charge for tug lines. Vessels under 1,500 g.r.t. require 1 tug and vessels over 1,500 g.r.t. require 2 tugs.

BERTHING: Berth Nos. 1 – 2: Length 380 m. These berths are for general cargo. Berth Nos. 3 – 4: Length 270 m. These berths are for bulk cargoes (ores, minerals). Berth No. 5: Length 194 m. This berth for scrap iron. Max. permissible draft 22 ft. Load/discharge is by shore equipment. Berth Nos. 6 – 7: Under construction. Berth Nos. 8 – 9: Length 300 m. Depths alongside up to 8.25 m.

CRANES: All quays are equipped with electric cranes. Berth Nos. 1 – 2 are equipped with SOKOL type crane, of up to 32 tons capacity. Berth Nos. 3 – 4 – 5 are equipped with Albatros type crane, of up to 20 tons capacity. Berth No. 8 crane type SOKOL.

SPECIALISED CARGO-HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Provided by the Port of Berdyansk. Tel. Manager: 392 – 565.

MEDICAL: Medical attendance possible. All members of the crew must have sanitary (yellow) book indicating vaccinations, fever, etc. One hospital available.

TANKERS: No facilities available.

DENSITY: Approximately 1008. Salinity is 11.9.

FRESH WATER: Supplied at berths. Price 0.45 Rbls. per ton.

FUEL: Available in limited quantities. Supplied by special tanker.

CONSULS: No consuls in Berdyansk.

REPAIRS: Only minor hull and machine repairs.

DRY DOCKS: No dry dock in Berdyansk.

SURVEYORS: Inspection of the Registry of the U.S.S.R. Branch Office; Tel. 393 – 452. No cargo inspectors.

GANGWAY/DECK WATCHMEN: Not compulsory or necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco, wine, spirits are free of Bond.

CARGO GEAR: There are cargo-handling equipment and intraport transport facilities. No heavy lift crane.

REPATRIATION: Possible.

AIRPORT: Distance 15 km. Internal Soviet airlines only.

TIME: GMT plus 3 hours October to April. GMT plus 4 hours April to October.

HOLIDAYS: New Year's Day (1st January); International Woman's Day (8th March); World Labour Days (1st – 2nd May); Victory Day (9th May); Constitution Day (7th October); Anniversary of the Great October Socialist Revolution (7th – 8th November). Cargo work can be arranged on above days.

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Not possible to place telephones onboard.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Not required. Only seaman's passport.

BANKS: State Bank of the U.S.S.R. only.

EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office.

STORING: See "Prelims" page viii.

1. Barge or truck.
2. Vessels can be stored by barges during cargo operations.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used.
5. Storing under Customs permission and control.
6. Local riggers can be employed.

AUTHORITY: The Port of Berdyansk Authority, 13/7 Gorky Street, Berdyansk, 332440, U.S.S.R. *Tel:* 3-22-10. *Cables:* Morport Ocean Berdyansk.

AGENT: Maritime Agency "Inflot" at the port of Berdyansk. Postal address: 9 Uritsky Street, 332440-Berdyansk. U.S.S.R. Cables: Inflot. Tel: 3-92-732, 3-92-639.

IGARKA: 67.27 N. 86.35 E. (See Plan Book)

GENERAL: A sea and river port, Igarka is situated about 344 miles Southward of the mouth of the Enisei river which flows into the Enisei Gulf of the Kara Sea.

The port is open for navigation about 130 – 135 days from July till mid-November. Ice first begins to form in the second half of October.

No tidal range is observed in the port waters.

The port of Igarka specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage is carried out round the clock. Master of a vessel approaching the port of Igarka from seaward has to order Pilots via the Chief of the Igarka Hydrobase and the Master of the pilot boat 48 hours prior to arrival to the Oshmarino Point where the River Pilots usually meet vessels. Confirm ETA 6 hours before arrival.

In case of bad weather, Pilot boards a vessel at a place as directed by the pilot boat. Since the distance of pilotage from the pilot station up to the port of Igarka is about 360 miles, 2 Pilots are usually required for the service.

The Master of a vessel should use VHF radio-telephone (calling frequency 156.8 MHz) or radio-telephone (calling frequency 500 kHz) for establishing the radio contact with a pilot boat in order to check the time and the place of boarding/unboarding of a Pilot.

ANCHORAGE: Information on best location of anchorage, if required, will be given by the pilot boat.

The anchorage in the outer roads is bounded on the East by the leading lines of Igarka and Northern Igarka leading marks, on the West by the left bank of the Enisei River, on the North by the beam line of the buoy of Igarka Oseryodok, on the South by the leading line of Port of Igarka entrance leading marks.

In the event of bad weather or main engine trouble a vessel should lie at anchor in a place as directed by a River Pilot, who shall advise a Master all necessary data about the anchorage.

RESTRICTIONS: Vessels can enter or leave the port 24 hours per day.

To ensure safe passage across the Lipatnikovsky and Turushinsky Bars of the Enisei River, vessels proceeding to the port of Igarka must have draft not exceeding 7.3 m. (see "Max. Size").

MAX. SIZE: Max. LOA 150 m. Also see "Restrictions".

HEALTH: Not later than 4 hours before arrival, Master to radio "Inflot" advising health condition on board. International code quarantine signals to be shown on arrival at port limits. No one, except Pilot and Port Authorities, may board or leave the ship until Free Pratique is given after port health inspection.

RADIO: Radio communication is effected through the "Igarka Radio" port radio station operating on the frequencies given below.

Call sign	Frequencies (kHz) working	Frequencies (kHz) calling	Type of trans-mission	Time of work	Remarks
UFR	500	500	A1	H24	Operates during navigation only
"Sever" (Port)	156.7*	156.7*	F3	H24	

*Frequencies are given in MHz.

Notice of arrival: As per conditions of the "Soviet Wood" Charter Party.

TUGS: Normally join vessel with Harbour Pilot on approaching port. Vessels at anchor order tugs through "Inflot". Ship's tow lines used.

BERTHING: Tug assistance for berthing is compulsory. A berthing Pilot boards a vessel from a tug either in the outer roads or in the port. Depths alongside berths are up to 7.5 m.

After having approached a berth at a safe distance, a vessel, in most cases, should cast 2 anchors and then with tug assistance, turn stern to the Island and moor with 3 mooring ropes led from the stern. When mooring, a vessel should have ready on board 4 mooring ropes each not less than 100 m. in length (3 ropes to be led ashore and 1 rope prepared for a tug.).

Vessels moored in the inner roads must have strong ropes which should be made fast over the pile moorings only.

If 3 or 4 vessels are moored at the quay, the outside ones should have a red light exhibited in the middle of each mooring rope led ashore.

Notice of readiness and other conditions of loading – as per the "Soviet Wood" Charter Party. Opening and closing of hatches by ship's crew.

When a vessel is moored in the inner roads, stern to the Island, loading is by floating cranes; when at berth – ship's derricks are used.

Loading is done by ship's wire strops, with a test label attached to every strop.

MEDICAL: Medical assistance is free, hospital facilities available – all arrangements made by "Inflot".

DENSITY: Fresh water.

FRESH WATER: May be taken from the river in places indicated by the Pilot, but not in the port area.

FUEL: Not always available.

GANGWAY/DECK WATCHMEN: Ship's crew to provide watchmen services.

OPENING/CLOSING HATCHES: By ship's crew.

IDENTIFICATION CARDS: Required for crewmen going ashore.

CUSTOMS ALLOWANCES: Only reasonable quantities for personal consumption may be taken ashore.

REPAIRS: Only minor repairs.

REPATRIATION: No facilities.

AIRPORT: Situated 1.5 km. away, 1 daily flight to Krasnogarsk.

TIME: GMT plus 7 hours (all the year round).

HOLIDAYS: No official holidays are observed during the navigation season.

POLICE/AMBULANCE/FIRE: Police, Tel: 0-02; Ambulance, Tel: 0-04; Fire, Tel: 0-01.

TELEPHONES: Telephones cannot be connected on board vessel.

SHORE LEAVE: Permitted during 0600 – 2400 hrs. subject to police control.

GENERAL: It is forbidden for crew to swim in the harbour.

AUTHORITY: The Port of Igarka Authority, 47 Gorky Street, 663200 – Port of Igarka, U.S.S.R. *Tel:* 4-10, 0-82. *Cables:* Morport Igarka.

AGENT: "Transflot". Cables: "Transflot" Igarka.

ILICHEVSK: 46.19 N. 30.40 E. (See Plan Book)

GENERAL: The port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Western side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18′ N., Long. 30° 44′ E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.

Vessels proceeding to ports of Kherson and Yuzhnyy take Pilot in the Outer Roads of Ilyichevsk (Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.).

APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.

ANCHORAGES: Good anchorages can be obtained in the outer roads situated at a distance of 1 to 5 miles off the coast between the parallels of 46° 12′ N. and 46° 18′ N. The outer roads are open to all winds blowing from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 352 and 351) are situated about 1.2 to 7 miles to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads are 19.2 – 25.5 m.

RESTRICTIONS: Entry to the port can be effected day and night.

In the night time movement of the vessels with length more than 200 m. is subject to special permission of the Harbour Master.

Vessel's speed should not exceed 6 knots when navigating along the channel.

MAX. SIZE: The maximum permitted draft is 11.8 m. length 260 m.

Vessels drawing over 11.8 m. must obtain the Harbour Master's permit for entry to the port.

HEALTH: Foreign vessels granted Free Pratique when berthed alongside and all arrival formalities accomplished by the boarding officials, irrespective whether day or night. If berthing delayed, under certain circumstances vessel may be granted Free Pratique at roads where anchored. Event suspected disease Master shall inform Agent by radio. When arriving from another Soviet Black Sea port, Free Pratique automatic.

RADIO: Channel 16 (156.80 MHz) for radio-telephone used for calling only, with subsequent switch to any other Channel. All information addressed to ship's Agent, Cable address "Inflot Ilichevsk", Telex No. 232448. Port Radio UEH.2.

Radio contact can be established through the port radio station "Ilichevsk Radio" operating 24 hours daily on the following frequencies:

Call sign	Frequencies (MHz) Working	Frequencies (MHz) Calling	Type of trans-mission	Time of Work
"Ilichevsk Radio-5" (Chief port controller)	156.675(73)	156.675(73)	F3E	H24
"Ilichevsk Radio-14" (Harbour Master)	156.8(12)	156.8(12)	F3E	H24
"Ilichevsk-Radio-15" (Vessels' movement control post)	156.8(16)	156.8(16)	F3E	H24

The port radar station gives all possible information to all vessels navigating in restricted visibility and in the absence of floating marks, from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at the Northern side of the entrance to the port.

RADAR: Port Radar Station gives all possible technical information to any vessel navigating within Station's broadcast zone, if requested. Navigation in channel controlled by Port Radar Station. Communication between Station and vessels established by radio-telephone on international frequencies.

TUGS: Normally join vessel when approaching mooring berth. Ship's lines used. Number of tugs required for berthing shall be ordered by the Pilot with the Master's consent. Tugs compulsory for vessels over 1,500 g.r.t.

In case Harbour Master grants permission for vessel to stay at anchorage in the Inner Roads to get bunkers, provisions, or for any other purpose a tug should be ordered by ship's Master for the whole period of stay in the Inner Roads to ensure safety of manoeuvring of the other vessels in the port. All expenses on ship's account.

BERTHING: Quays with depths alongside of up to 14.0 m. are equipped to handle oil, general, 20 ft. and 40 ft. containers, bulk and other cargoes. There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 45 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 300 tons, other cargo-handling equipment and inter-port transport means.

Opening and closing of mechanised hatches is always done by the ship's crew.

In case vessel is moored at the Inner Road buoys the following requirements should be complied with:

1. Two towing ropes to be kept ready at bow and stern lowered 2 m. over the water surface.
2. To avoid picking up of mooring anchors ropes should be slacked with free board increase whilst discharging.
3. Vessel must be equipped with good pudding fenders to protect her boards and floating facilities alongside.

TIDE: The range of the water level caused by strong winds may reach 1 m. The rise of the water level is due to Northerly winds and the fall of the water level to Southerly winds.

The changes of the water level caused by variation in atmospheric pressure ("Seish" phenomena) are observed periodically. This phenomena can last from a few minutes up to several days and the range of the water level may reach 0.6 m.

STEVEDORES: 12 days' notice is required.

MEDICAL: Medical assistance rendered immediately when requested. Hospital facilities available. Particular inoculations required prescribed by International Sanitary Regulations.

DENSITY: Average density 1010.

FRESH WATER: Available at quays and by barge.

FUEL: Bunkers available.

GANGWAY/DECK WATCHMEN: Watch carried out by crew.

OPENING/CLOSING HATCHES: Mechanical hatches by crew.

CUSTOMS ALLOWANCES: No restrictions. Free use on board.

CARGO GEAR: No additional requirements. Cargo work usually carried out by means of shore cranes.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Good facilities. All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

DRY DOCKS: Docking arrangements settled with Black Sea Steamship Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. length, 18 m. depth. There are new floating docks with a lifting capacity of 15,000 tons.

AIRPORT: The distance from Odessa Airport about 30 km.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: Official Holidays are Sundays and following Calendar dates: January 1st, March 8th, May 1st, 2nd, 9th, October 7th, November 7th, 8th.
POLICE/AMBULANCE/FIRE: All mentioned services easily obtained through Agent.
TELEPHONES: Can be placed on board.
GENERAL: Shipowners recommended deposit funds for disbursements prior to arrival. All bank operations carried out by Vneshtorgbank of Moscow.
SERVICES: Ship chandler's supplies, technical equipment supplies, laundry, car hire.
SHORE LEAVE: Permitted.
DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.
DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.
AUTHORITY: Port of Ilichevsk Authority, 2 Korabelnaya Street, 270901, Ilichevsk Odessa region, U.S.S.R. *Tel:* 628-605, 628-634, 628-758. *Cables:* Morport Ilichevsk.

AGENT: The Port of Ilichevsk, Maritime Agency "Inflot". Postal address: The Port of Ilichevsk, Odessa Region, U.S.S.R. Cables "Inflot Ilichevsk". Tel. 668087, 620214, 628661. Telex 232825, 232245.

IZMAIL: 45.20 N. 28.51 E. (See Plan Book)

GENERAL: A sea and river port, Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube River, between the 92nd and 94th km.

Navigation in the port lasts about 317 days per year. The Danube River usually becomes frozen over at the end of December or early January. In the more severe Winters navigation can be effected with ice-breaker assistance.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
PILOTAGE: Compulsory. Pilot should be ordered through "Inflot" before leaving the port of Sulina giving vessel's ETA at Izmail. Alterations in ETA whilst vessel is navigating the Sulinsky Channel should be advised to "Inflot". Also refer to Sulina, Romania.

Navigation in the Kilia Mouth up to the port of Izmail is allowed with a Port of Izmail Pilot on board, who should be ordered through Inflot Agency after leaving the port of Sulina. ETA at the Chatal of Izmail should be stated in the message. Masters should keep the Port of Izmail Harbour Master informed of all delays in the Sulina Channel and, if necessary, advise alterations in ETA at the Chatal of Izmail.
ANCHORAGE: Vessels can obtain anchorage in the roads situated in the area between 92.6 km. and 95.7 m. and between 86.7 km. and 87.7 km. Depths in the roads from 5 m. – 15 m., the holding ground is soft mud.
RESTRICTIONS: Izmail port is situated on the left bank of the Kilia Channel, channel depths are 10 m. – 20 m. Reni Port is situated on the left bank of the Danube, channel depths are 10 m. – 20 m. Ice-breaker's assistance is available during periods when the Danube is frozen. Draft and length of the vessel entering the port of Izmail should be the same as of vessels navigating through the Sulina Channel.
HEALTH: International code quarantine signals are to be shown on arrival and Free Pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.
RADIO: Vessels can establish radio contact via the port radio station Izmail Radio operating 24 hours per day on the following frequencies:

	Frequencies (kHz)		*Type of*	*Time of*
Call sign	*Working*	*Calling*	*transmission*	*work*
UJO-3	472	468	A1A	H24
"Ismail-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
	160.65*(1)	156.05*(17)	F3E	H24
"Izmail-2"	156.7*(14)	156.7*(14)	F3E	H24
"Izmail-Post" (Vessels' movement control post)	156.8*(16)	156.8*(16)	F3E	H24

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.
TUGS: Tugs shall be ordered by the Master as directed by the Pilot.
BERTHING: Vessels drawing up to 8.25 m. can enter the port and moor at berths with same depths alongside.

Quays are equipped to handle general and bulk cargoes, metals, chemicals, timber and passenger shipping.

There are enclosed warehouses, open concrete floor sheds and a grain elevator.

Simultaneous berthing and shifting berth of 2 or more vessels at neighbouring berths is not allowed. On the quays there are electric cranes of up to 40 tons capacity. There are floating grain elevators, floating cranes with lifting capacity of 16 tons and other cargo handling equipment and machinery.
FRESH WATER: Available in unlimited quantity.
FUEL: Bunkers available.
GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory, carried out by ship's crew.
OPENING/CLOSING HATCHES: According to the customs of the port opening and closing of hatches is usually by ship's crew but it can also be done by stevedores for vessel's account.
CUSTOMS ALLOWANCES: No restrictions on crew consumption tobacco and alcohol on board. It is prohibited to take these items ashore.
IDENTIFICATION CARDS: Required for crewmen going ashore.
REPAIRS: Hull and machine repairs can be effected.
REPATRIATION: Can be arranged.

AIRPORT: Regular connections with internal services.
TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.
TIDE: Changes of water level in the river are due to effects of the wind and seasonal increase and decrease of the amount of water brought down from the shore. In Winter; rise of water level is due to the ice piling up. Max. range of the water level is about 4.0 m. – 6.0 m.

Max. rise of water level is in April, May and June, usually caused by Easterly winds. The least water level is observed in August, September and October, due to Westerly winds.
HOLIDAYS: New Year's Day (1st January), National Women's Day (8th March); Worker's Day (1st and 2nd May); Victory Day (9th May); Anniversary of October Revolution (7th and 8th November); Soviet Constitution Day (5th December).
POLICE/FIRE/AMBULANCE: Izmail – Police, Tel: 316; Fire, Tel: 524; Ambulance, Tel: 600. Reni – Police, Tel: 205; Fire, Tel: 210; Ambulance, Tel: 203.
SHORE LEAVE: Allowed up to midnight.
AUTHORITY: The Port of Izmail Authority, 7 Port Street, 272630 – Izmail, U.S.S.R. *Tel:* 9-04-06. *Cables:* Morport Izmail.
AGENT: The Port of Izmail Maritime Agency "Inflot". Postal address: 14 Port Street, Izmail, U.S.S.R. Cables: "Inflot Izmail". Tel: 9-01-81, 9-05-29. Telex: 412699.

KHERSON: 46.37 N. 32.37 E. (See Plan Book)

GENERAL: The sea and river commercial port of Kherson is situated on the right bank of the Dnieper River and on the left bank of the Koshevaya River.

The port is open for navigation all the year round but in severe Winters ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half of March.
DOCUMENTS: Refer to beginning of U.S.S.R. section.
APPROACHES: The port is accessible for sea-going vessels. The approaching channel is very well marked by navigation marks; therefore, there are no difficulties in navigating a vessel along it when entering or leaving the port.
PILOTAGE: Compulsory. Navigational range marks, leading marks of Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsky leading light buoys, and spar buoys. Master advises Port Controller and Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master through Inflot Agency 48 hours, 24 hours and 6 hours prior to arrival at the point of Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.

Master shall order a Pilot via the Inflot Shipping Agency 8 hours and confirm the order 2 hours prior to leaving the port of Kherson.
ANCHORAGES: A part of the Dneiper river from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, S.W. of the upper leading marks clearing the place where a submarine cable is laid.
RESTRICTIONS: The permitted draft for passing through the channel is 7.6 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

The port receives vessels with length up to 200 m.

Navigation through the channel in restricted visibility is strictly prohibited.
HEALTH: No automatic Pratique.
RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call sign	*Working*	*Calling*		
UHZ	500/487	500/468	A1A	H24
"Kherson Radio"	2182	2182	P3E	H24
"Mesyats" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Mesyats-2" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	HX

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.
BERTHING: 9 berths, depths up to 8.25 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent, ship's lines used.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor storing spaces without roofs. There is a refrigerated warehouse at No. 4 berth. Cargo is generally loaded/unloaded by shore cranes but ship's derricks are always to be ready for use.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

FRESH WATER: Available alongside and by barge.

FUEL: Available.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIME: GMT plus 3 hours. Daylight saving time, GMT plus 4 hours from April 1st until September 30th.

AUTHORITY: Port of Kherson Authority, 11 Petrenko Street, 325000, Kherson, U.S.S.R. *Tel:* 29-14-02, 2-38-48. *Cables:* Morport Kherson.

AGENT: The Port of Kherson Maritime Agency "Inflot". Postal address: U.S.S.R. 325004, Kherson-4, Petrenko St. 11, MA "Inflot". Cables "Inflot Kherson". Telex 232721. Tel: 29-13-51, 29-14-41, 2-36-95.

KHOLMSK: 47.03 N. 142.03 E. (See Plan Book)

GENERAL: The seaport of Kholmsk is situated on the Western coast of Sakhalin Island, in the Tartarsky Strait of the Japan Sea and at the head of Nevelskoy Bay.

The port is open for navigation all the year round.

The outer roads of the port are bounded by an arc of 7 cables length radius, the centre of which is marked with a light located on the Southern mole of the Commercial Harbour.

The port is divided into 3 parts: The Kovsh (a basin), The Commercial and Fishing Harbours. The Commercial Harbour is situated in the centre of the port area. It is protected by the Southern and Northern moles. The entrance to the Harbour 150 m. wide, is situated between these 2 moles. Due to shoal water along the coast, there is not much space for vessels manoeuvrability in the Commercial Harbour. Cargo berths are situated in a basin (The Kovsh) of the Southern part of the Harbour.

The Port of Kholmsk, due to its position, size and weather conditions in the area, cannot be used as a sheltering port.

During Westerly and N.W'ly gales, particularly in the Autumn and Winter (October — March) the heavy sea swell penetrates into the Kovsh (mainly from the N.W.) causing the variable current with surge (the "Tvagun"). Due to this phenomena the stay in port is not safe therefore Masters of all vessels are recommended to leave the port for sea after having received a storm warning of a gale coming from Westerly or N.W. directions.

All vessels proceeding to the port of Kholmsk in the Autumn and/or Winter must have available on board a sufficiency of fuel, fresh water, provisions and strong manila ropes, be seaworthy in all respects, thus ensuring vessel's safety during a possible stay in the open sea roadstead.

In case there are no vacant berths in the port, vessels are not allowed to enter the harbour without prior permission.

It is also prohibited to enter the harbour after a storm warning has been received by vessel despite the fact that there are vacant berths in the port.

PILOTAGE: Pilot meets a vessel in the outer roads. In the event of bad weather, when Pilot is unable to come on board, vessel should follow in the wake of pilot boat.

ANCHORAGES: There are no anchorages protected from the wind in the Nevelskoy Bay.

During off-shore winds vessels may anchor in the outer roads situated opposite the port entrance. The outer roads are open to Westerly winds.

Masters should bear in mind that during the period of navigation fish nets are usually laid in the outer roads. The seaward side of the border of the fish nets, situated about 8 cables length off-shore, is usually marked by wooden buoys with flags.

Anchorage in the outer roads may also be obtained at 4 – 6 cables length off shore. Depths are from 18 m. to 20 m. Holding ground sand and stone.

A vessel should proceed to the anchorage along the leading line of the port of Kholmsk leading lights. At a distance of half a mile off the port entrance, a vessel should steer off the leading line at 2 – 3 cables length and then drop anchor.

The holding ground is better in the Southern part of the outer roads than in the Northern part.

When at anchor, a vessel may not approach the leading line closer than 1.5 cables length.

RESTRICTIONS: Vessels may enter the port at any time of day or night.

MAX. SIZE: The maximum permissible draft for entry to the port is 6 m. length – 100 m. Since depths in the channel may vary at times, the Port Authorities shall undertake to advise the Masters of incoming vessels accordingly.

BERTHING: Berths with depths up to 7.3 m. alongside, are equipped to handle general and bulk cargoes, metals, timber, food products, etc., as well as passenger traffic.

Number of tugs required for assistance is usually agreed between Pilot and Master.

Cranes of up to 40 tons capacity are operated on the quays. There are also other cargo-handling equipment and inter-port transport facilities. There are enclosed warehouses and open concrete floor sheds.

RADIO: Ship-shore radio link can be established through the port radio-station Kholmsk Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of Work*
UFO	500	500	A1A	H24
"Kholmsk Radio"	2182	2182	H3E	H24
"Kholmsk Radio-4" (Port controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kholmsk Radio-2"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.7*(14)	156.7*(14)	F3E	H24

*Frequencies are given in MHz.

The port signal station is situated at the Southern mole base. There is also a radar station in the port.

FUEL: Not available.

FRESH WATER: Available.

REPAIRS: Only minor repairs can be carried out. There are no dry docks in the port.

TIDE: Changes in the water level are of small account. They are mainly due to the irregular diurnal tides. The maximum range of the water level observed is 0.4 m.

TIME: GMT plus 11 hours. Summertime (April 1st-October 1st) GMT plus 12 hours.

AUTHORITY: The Port of Kholmsk Authority, 1 Katernaya Street, 694620 Kholmsk, Sakhalin Is., U.S.S.R. *Tel:* 3-04, 3-05 (Port Director). *Telex:* Via Inflot. *Cables:* Morport Kholmsk. *Contact:* Port Director.

AGENT: The Sakhalin Main Maritime Agency "Inflot". 6 Morskaya Street, Port of Kholmsk, Sakhalin Island 694620, U.S.S.R. Cables: "Inflot Kholmsk". Tel: 222-86; 220-80. Telex: 412613 SSC SU.

KILIA: 45.26 N. 29.17 E. (See Plan Book)

GENERAL: The port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is frozen over.

PILOTAGE: Carried out by the Pilot service of the port of Izmail.

ANCHORAGES: Allowed in the port area, in 5 m. depths according to the Pilot's instructions.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.

RADIO: Communication can be effected via the port radio station viz. "Kilia-Radio".

Call sign	*Frequencies (MHz)* *working*	 *calling*	*Type of trans-mission*	*Time of work*
Kilia-1	156.8(16)	156.8(16)	F3E	H24
(CPR)*	157.25(25)	157.25(25)	F3E	H24
Kilia-2	156.8(16)	156.8(16)	F3E	H24
(Harbour Master)	156.45(9)	156.45(9)	F3E	H24

*Central Port Radio Station.

Notice of Arrival: Masters of vessels going to the port from seaward via Kilia Inlet should advise port of Izmail Harbour Master their ETA 24 hours prior to arrival at the Reception Buoy area. More precise time of arrival should be advised at a later time.

TUGS: Approaching and shifting berth is performed without tug assistance.

BERTHING: Cargo vessels drawing up to 7 m. are handled with the use of buffer barges. Berths of the port are equipped to handle general cargoes, metals, timber, coal. Embarking/disembarking of passengers is also performed. There are portal cranes of up to 6 tons capacity, a warehouse and open storage areas covered with concrete. There are also floating cranes of up to 5 tons capacity which are used for handling cargo in the Outer Roads. The loading of grain is carried out at the grain elevator berth by its own equipment.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

TIME: GMT plus 3 hours. GMT plus 4 hours in summer.

CONSULS: None.

AUTHORITY: Port of Kilia Authority. 4, Zheleznyakov Street, 272610, Port of Kilia, Odessa Region, U.S.S.R. *Cables:* Port Kilia.

KLAIPEDA: 55.43 N. 21.07 E. (See Plan Book)

GENERAL: A Baltic seaport, Klaipeda is situated in a narrow strait called the Morskoi Canal, which connects the Kursky Gulf with the Baltic Sea.

The port of Klaipeda comprises the Morskoi Canal consisting of 2 harbours: the Zimnyaya and Zavodskaya, the Fishing Port and the Dane river quays situated by the roadway-bridge.

The port is open for navigation all the year round.

During strong winds blowing from directions between the S.W. and N.W., lying in the port is dangerous due to strong waves and surge (called "Tyagun"). In this event vessels must proceed to sea.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The width of the approaching channel to the port is 100 m. and depth 11.5 m. Depths of the channel at a distance of 400 m. – 600 m. from the entrance to the Sea Canal are subject to changes due to lots of sand and mud brought down from the Kursky Gulf by the Spring floods, in particular. The entrance to the Sea Canal is protected by the Northern and Southern moles.

The length of the fairway of the Morskoi Canal from the entrance up to the Secluma-Kyaules-Nugara shoal at the entrance to the Kursky Gulf is 4 miles, width varies from 180 m. to 300 m. and the depths are from 6 m. to 9 m. at the mean water level.

The permissible drafts for vessels navigating along the Morskoi Canal are as follows: Up to 8.0 m. from the canal entrance up to the Zimnyaya (Winter) harbour, but further up to the Fishing Port situated 1.5 miles to the South of the Dane River estuary – not more than 7.5 m. From the Fishing Port up to the Timber Harbour – not more than 5.0 m.

PILOTAGE: A Pilot boat usually meets a vessel at light buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.). It carries the Pilot flag by day and lights prescribed for a Pilot boat by night.

Pilot's watch is kept 24 hours a day except in periods of dense fog and strong S.W. – N.W. winds over Force 7 Beaufort Scale.

The Master of a vessel shall order a Pilot via the Inflot Shipping Agency in advance.

The port is equipped with a coastal radar vessels' movement control system.

Signals regulating vessels' entry to the port and leaving are hoisted at the signal mast of the Signal post located in the Northern mole area.

ANCHORAGE: Anchorage can be obtained in the outer roads at receiving light buoy No. 1 (Lat. 55° 44′ N., Long. 21° 00′ E.).

The outer roads anchorage for foreign vessels is situated at a distance 3.5 miles (N.W.) from receiving light buoy No. 1. Depths from 31 m. – 35 m.

The holding ground is sand and clay. Anchorage in the outer roads is not safe during heavy seas caused by Westerly winds.

RESTRICTIONS: There are no restrictions for the entry to the port.

The width of the approaching channel to the port is 100.0 m. and depth 12.0 m.

MAX. SIZE: Length not greater than 185 m. and breadth unlimited. Max. permissible draft for all vessels entering the port, 10.6 m.; and for tankers loading at installations outside main port area, 10.5 m.

RADIO: Vessels can establish radio contact through the port radio station Klaipeda Radio operating 24 hours per day on the following frequencies:

Call sign	Frequencies (kHz) or Channel Working	Frequencies (kHz) or Channel Calling	Type of transmission	Time of work
UNM-2	500	500	A1	H24
	455	454	A1	H24
	4229	4183	A1	HX
	6427	6275.25	A1	HX
	8701	8370	A1	HX
	12703	12552	A1	HX
Klaipeda Radio	2182	2182	A3	H24
Klaipeda Radio – 1 (ODIN) (CPR)**	16, 3, 26, 27		F3	H24
Klaipeda Radio – 2 (DWO) (Dispatcher of Port)	14		F3	H24
Klaipeda Radio – 15 (Piatnadcat) (Oil Harbour)	7		F3	H24
Klaipeda Radio – 5 (Piat) (Pilot Control)	16, 9		F3	H24
Klaipeda Radio – 17 (Semnadcat) (Shore Radar Service)	9, 67		F3	H24

**CPR – Central Port Radio station.

Vessels' traffic in the roads and harbours is controlled by the signals exhibited at the signal stations situated at the entrance to the port.

TUGS: Ordered by Pilot if necessary. Mooring and unmooring of large sea-going vessels can be effected with tugs' assistance only. Number of tugs to be ordered depends on the weather conditions and can be agreed upon between Master and Pilot. Master should order tugs by radio well in advance. Ship's lines to be used.

BERTHING: No specific requirements. Vessels allocated berth according kind of cargo to be loaded/discharged and their turn.

The quays of the port with depths alongside of up to 10.6 m. are equipped to handle general, bulk and liquid cargoes as well as passenger shipping. There are enclosed warehouses and concrete floor sheds.

Cranes of up to 40 tons capacity are operated along quayside and by warehouses. There are also other cargo handling facilities including floating cranes up to 50 ton capacity.

STEVEDORES: Report 12 days, 96 hours, 24 hours and then 12 hours prior arrival giving ETA, and 72 hours then 12 hours prior arrival advising perishable goods, characteristics of vessel, gross capacity, number and measurement of hatches, tween-decks, shelter-decks, description and quantity of cargo, stowage plan, heavy lifts, pieces of above 3 tons each especially indicated. Day and night loading/discharging operation, Sundays and holidays included.

MEDICAL: Master to advise by radio prior arrival if medical attendance required on board.

TANKERS: Three berths. Max. draft 10.5 m. Shore facilities for discharge of ballast.

FRESH WATER: Most berths supply by shore installations, otherwise barge.

FUEL: Deliveries only by bunker barge.

GANGWAY/DECK WATCHMEN: Compulsory for gangway checking. Guard net and life buoy required.

OPENING/CLOSING HATCHES: Normally by crew.

CONSULS: No Consuls at Klaipeda.

REPATRIATION: No facilities for crew changes. Arranging any necessary repatriation at Master's request effected by Immigration Authorities.

AIRPORT: At Palanga (25 km. from Klaipeda), served by regular lines; Palanga-Moscow, Palanga-Leningrad, Palanga-Riga. Airport at Klaipeda – some regular flights per day: Klaipeda-Vilnius, Klaipeda-Kaunas, Klaipeda-Kaliningrad.

POLICE/AMBULANCE/FIRE: Tel. Police, 02; Ambulance, 03; Fire, 4300, 901.

CERTIFICATES: All ship certificates required on every call.

CUSTOMS ALLOWANCES: Cigarettes and wine/spirits on board limited by personal requirements; take ashore max. 2 packets cigarettes, no wine/spirits.

REPAIRS: All kinds of repairs for vessels of 10,000 d.w.t. can be effected.

TIME: GMT plus 3 hours in Winter and GMT plus 4 hours in Summer (1st April – 1st October).

TIDE: There are periodical alterations in the water level, chiefly due to the effects of the wind. In general, strong Westerly, Northerly, N.W. and sometimes S.W. winds raise the water and Southerly and Easterly winds lower it.

The water level usually begins to rise suddenly. It rises very quickly but lasts for a very short period of time. The max. difference between high and low level is usually observed in Autumn and Winter.

Sometimes the changes in the water level can be caused by the considerable variation in atmospheric pressure ("Seish" effect).

TELEPHONES: May be arranged on board.

SHORE LEAVE: Crew members allowed ashore with shore-pass obtainable from Immigration Authorities.

GENERAL: In case of stormy weather or dense fog vessels are lying at Outer Roads until entering permitted by Harbour Master. In such cases vessels lying alongside berth to be shifted to Inner Road.

AUTHORITY: The Port of Klaipeda Authority, Ul. Plachioi 18, 235801 Klaipeda, U.S.S.R. *Tel:* 6-45-94. *Telex:* 278239. *Cables:* Morport, Klaipeda. *Contact:* The Harbour Master.

AGENT: "Inflot" Agency. Address: Klaipeda 235801, Ul. Geguzhes, 8. Tel. 64270, 63236, 94236. Cables: Inflot, Klaipeda. Telex: 278113 A and 278113 B.

LENINGRAD: 59.53 N. 30.13 E. (See Plan Book)

GENERAL: A Baltic Sea port, Leningrad is situated on the islands of the Neva Delta, at the head of the Nevskaya Guba (Neva Bay), in the Eastern extremity of the Gulf of Finland. Year-round navigation is possible with ice-breaker assistance from the end of November until middle of April. Ice first begins to form in the middle of November, when usual Winter frosts come, and in January (time varies with the season) all the area becomes completely covered with fast ice.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

APPROACHES: The Kronstadt Korabelny Farvater (Kronstadt Ship's Channel) which is about 12 miles in length, extends from the port of Leningrad Entrance light buoy to the Leningrad Morskoi Canal, which is about 15 miles in length, and leads to the entrance of the sea commercial port of Leningrad. The least bottom width of about 80 m. is in the part of the Canal which is protected by 2 dams (moles).

PILOTAGE: Pilots usually board and disembark vessels at the port of Leningrad approaching light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.). In case of bad weather a vessel should follow the pilot boat up to the Kronstadt Roads where a Pilot will come aboard the ship.

Leningrad pilot boat on VHF Channel 16 and 9 throughout 24 hours. Call sign "Leningrad Pilot".

There is a port coastal radar vessels' movement control system ensuring vessels' radar pilotage along the Kronstadt Korabelny Fairway and the Leningrad Morskoi Canal in case of low visibility and during absence of floating navigational marks. Radar pilotage is carried out by a Pilot on board a vessel.

ANCHORAGES: Vessels approaching the port from seaward should take anchorage off the port of Leningrad Entrance light buoy. The depths in the Roads are between 20 m. – 25 m. and the holding ground is mud and sand.

Vessels anchored at Outer Roads and berthed in the port are requested not to operate VHF on Channels 6, 8, 9, 11, 12, 13, 14 or 26 for intership communications.

RESTRICTIONS: No restrictions on night entry, no tide in Leningrad. Vessels with drafts 8.5 m. and more, and length 170 m. and more, must be towed when proceeding in the Leningrad Morskoi Channel from the Lesnoi Mole Roads (Timber Mole Roads) up to the Neva Gates.

All vessels navigating within the port must keep strictly to the following regulations:

(a) Vessel's speed should not exceed 10 knots when navigating in the Kronstadt Korabelny Farvater and in the open part of the Leningrad Morskoi Canal (from the entrance up to the moles).

(b) When navigating in the channel between the moles of the Leningrad Morskoi Canal as well as in the Bolshaya Neva River from the Neva Gates up to Lieutenant Schmidt Bridge and also in the Ekateringofka River, vessels speed should not exceed 3 knots.

(c) In the Inner Roads and in the port harbours, Masters should navigate with a speed ensuring the safety of vessel but never exceeding 3 knots.

MAX. SIZE: Draft restriction 11.0 m. in fresh water under normal weather conditions. Length not over 260 m. Breadth up to 40 m.

HEALTH: Master coming from foreign port shall report every sick passenger or crewman; Health Authorities board together with Customs and Immigration and if find all in order grant Free Pratique. Each vessel shall produce Derat Certificate and Sanitary Patent.

RADIO: Cable Agent "Inflot" ETA, draft and other data, information required via Leningrad Radio Station. All vessels when approaching the port of Leningrad should establish radio contact via the Leningrad Coastal Radio Station operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
"Leningrad-Radio"	2182	2182	J3E	H24
"Leningrad-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	161.9*(26)	157.3*(26)	F3E	H24
"Leningrad-Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Note: Emergency calls with regard to collisions, fire on board and dangers to human life may be given on VHF Channel 9. Call sign of traffic controller is "Leningrad Port Control".

Port radar station gives all possible information to any vessel navigating in the Kronstadt Korabelny Farvater and Leningradsky Morskoi Canal during restricted visibility, from the Leningrad entrance light buoy (Lat. 60° 02′ N., Long. 29° 26′ E.) up to the dams (moles) of the Leningrad Morskoi Canal. Navigation is usually controlled by a Pilot on board the vessel.

Signals for vessels approaching the entrance to the Commercial Port of Leningrad from seaward are hoisted at the pilot vessel.

Traffic prohibition signals, when the pilot vessel is absent from her usual position may be exhibited at a vessel specially designated for this purpose.

RADAR: Pilot in contact with radar service. Also see "Radio".

TUGS: Tugs up to 1,200 h.p. are available. Normally join incoming vessels at Inner Road. Ship's lines usually used.

The number of tugs a Master should order for inward and outward towage as well as for shifting berths in the harbour depends on Pilot's advice.

BERTHING: Berths of the port, with depths alongside of up to 11.5 m. are equipped to handle general and bulk cargoes (coal, ores, grain, building material), sugar, metals, timber products, etc. There is also a passenger and container terminal, warehouses, cold stores and concrete floor sheds.

Opening and closing of hatches is usually done by the ship's crew, otherwise according to the charter party conditions.

The port of Leningrad is equipped with modern cargo-handling facilities. There are floating cranes up to 300 tons, container handling, fixed and mobile shore cranes, fork lifts and other mechanical equipment.

TIDE: Considerable rises of water level may be caused by strong Westerly winds – and falls by Easterly winds. Usually the changes in water level are greater during the Autumn and Winter months. During Autumn and Winter the range of level may reach 1.2 m. from the MWL and sometimes even more.

During Spring and Summer it is never more than 0.5 m. The greatest rises in the water level are observed in the Neva Bay. The extreme difference in level between the maximum rise and the minimum fall of these seasonal changes observed is about 3.5 m. At the mouth of the Neva River the greatest changes in the water level are caused by the S.W. Autumn gales. The difference in level usually reaches 0.2 m. – 0.3 m. and only sometimes up to 1 m.

STEVEDORES: Ordered by Agent.

MEDICAL: Masters to advise Agent prior arrival if medical attendance required aboard.

DENSITY: Fresh water in port area.

FRESH WATER: Most berths supplied by shore installations, otherwise barges. Also available at Outer Roads Anchorage.

FUEL: Bunkers available, usually delivered by lighters.

FIRE PRECAUTIONS: No smoking allowed in port area, except in places specially allocated.

GANGWAY/DECK WATCHMEN: Not compulsory.

OPENING/CLOSING HATCHES: According to charter party.

CERTIFICATES:

Passenger Ship Safety.
Safety Equipment.
Safety Radiotelephony.
Safety Radiotelegraphy.
Exemption Certificate.

CUSTOMS ALLOWANCES: No restrictions on board.

IDENTIFICATION CARDS: Needed, will be given on arrival.

CONSULS: The Consulates of Czechoslovak Socialist Republic, German Democratic Republic, France, German Federal Republic, Hungarian People's Republic, Italy, Finland, Iran, Japan, Polish People's Republic, People's Republic of Bulgaria, Republic of Cuba, Sweden and United States of America are situated in Leningrad.

REPAIRS: All types of repairs for vessels of up to 10,000 d.w.t. can be carried out in the port.

DRY DOCKS: Available.

SURVEYORS: 1. Cargo inspectors not available.
2. Inspectors of the Shipping Register of the U.S.S.R. only.

TIME: GMT plus 3 hours. Summertime from 1st April – 30th September.

POLICE/FIRE/AMBULANCE: Police 9См; First-Aid from Port 503; from Town 03; Port Fire 8509, 8536, 8973; Town Fire 01.

EMERGENCY CO-ORDINATION CENTRE: Contact "Inflot" or Leningrad Radio Station on the VHF Channel 16 and 26.

STORING: See "Prelims", page viii.

1. Vessels may be stored by barge or truck.
2. No restrictions.
3. Trucks may proceed alongside.
4. Fork-lift trucks may be used.
5. No exceptions from U.S.S.R. laws.
6. As a rule riggers are available.

AUTHORITY: Port of Leningrad Authority, Mezhevoi Kanal 5, Leningrad 198035, U.S.S.R. *Tel:* 251-08-46, 216-97-61. Timber Port: 216-97-75. *Telex:* 121501-121504. *Cables:* Seaport Leningrad. *Contact:* Oleg A. Terekhov, General Manager, who may be contacted through "Inflot".

AGENT: Main Maritime Agency "Inflot".
Postal address: 10 Gapsalskaya Str., Leningrad 198035, U.S.S.R.
Tel: 251-12-38; 251-27-48; 251-27-71. Telex: 121 505, 121 505A, 121 506.

MEZEN: 65.50 N. 44.04 E.

GENERAL: A commercial seaport, Mezen is situated at a distance of 22 miles to the South of the mouth of the Mezen river flowing into the head of the Gulf of Mezen, in the White Sea.

The port area is bounded on the North by a line connecting the Ryabinov and the Nerpinsky points and on the South by the parallel of 65° 50′ N., Northward of the town of Mezen. The anchorage at the Kuloi river mouth is also included at the port of Mezen area.

Vessels drawing 3.9 m. – 4.2 m. are usually grounded when loading timber alongside a floating berth of the timber-mill at low water.

The port is open for navigation from the end of May until October.

Tidal streams are observed in the Mezen river. The tide is semi-diurnal with two high waters and two low waters a day.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot meets a vessel at an anchorage buoy, at the Mezen river bar (Lat. 66° 12′ N., Long. 44° 04′ E.), at a distance of 22 miles off the port of Mezen. In the event of bad weather a Pilot at his discretion, may board a vessel in the outer roads.

Pilotage cannot be effected at night.

A Pilot cannot board a vessel earlier than 2 hours before the high water in the Semzha river, and a vessel may be piloted into the port not later than 1 hour before the water in the river reaches its high level.

Pilots do not board vessels in rough water (if the wind is over Force 6 Beaufort scale).

In case Pilot cannot embark a vessel in the outer roads, Master should follow in the wake of pilot boat up to Tolstic Point (Lat. 66° 04′ N., Long. 44° 05′ E.) where a Pilot will board ship. After leaving the port Master should disembark Pilot on to pilot boat at Tolstic Point and then follow it up to the outer roads of the port of Mezen.

ANCHORAGES: Anchorage can be obtained in the outer roads and in certain places of the Mezen river situated between the outer roads and the Kamenka settlement.

The outer roads are situated at the Mezen river mouth. They are bounded on the South by a line connecting the Ryabinov and the Maslyany Points.

Vessels in the outer roads are subject to effects of the N.W. and N.E. winds and heavy waves caused by them. The depths in the outer roads are about 7 m. The holding ground is sand, mud and rocks. Anchorage can be obtained in the inner roads with depths at low water of up to 4.5 m. – 5 m. (length of area is 1.5 mile and width up to 150 m.).

The inner roads are situated opposite the Kamenka settlement. A good anchorage can be obtained there by two vessels simultaneously. The anchorage at Burnovsky Point with depths from 4.5 m. – 5.5 m. can be used by two loaded vessels drawing up to 4.2 m.

RESTRICTIONS: Vessels may enter port only in daytime on high water. Masters have to pay full attention to Pilot's advice as river has varying bends.

MAX. SIZE: The permitted draft for the entry to the port is announced monthly by the Port Authorities. It should not exceed 3.9 m. – 4.2 m. The maximum permitted length is 70 m.

HEALTH: As for "Archangel".

RADIO: Vessels can establish radio contact through the port radio station Mezen Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
UZT	500	500	A1	HX
"Mezen-Radio"	2182	2182	P3E	H24
			J3E	H24
"Kamenka-2"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24
"Kamenka 5"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24

*Frequencies given are in MHz.

Notice of Arrival: As per conditions of the "Soviet Wood" Charter Party.

BERTHING: The floating dams are used as mooring berths in the port. The depths alongside at low water are about 3.5 m. Vessels drawing 3.9 m. – 4.2 m. are usually grounded while loading at low water.

The port of Mezen specialises in timber exports but other cargoes are also handled at berths. Covered warehouses and open concrete floor sheds are available.

Tug assistance for mooring berths is not compulsory. Berthing is usually done in the daytime. Tugs, if necessary are ordered by Master according to the Pilot's instructions.

Rendering of Notice of Readiness and opening and closing of hatches are usually done in accordance with the "Soviet Wood" charter party.

Loading of timber is done by ship's winches and floating cranes with capacity 5 tons.

TIDE: The difference between two successive high waters and low waters is small but the range of the tide changes considerably. At the Kamenka settlement the mean range of the tide is 2.8 m. and the mean range of the spring tide is 3.1 m. At the Semzha river the mean range of the spring tide reaches 7.7 m. Everywhere in the Gulf of Mezen the differences in the duration of falling and of rising water are big and in some places of the Gulf of Mezen they may reach 5 hours.

Considerable changes in the water level are observed in the Spring. They are usually caused by the seasonal increase in the amount of water (due to melting snow) brought down by the rivers.

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

FUEL: Supplies not guaranteed.

FRESH WATER: Fresh water can be supplied at the berths and by road tankers.

TIME: GMT plus 3 hours (all year round).

AUTHORITY: The Port of Mezen Authority, Morport, Kamenka Settlement, Mezen, Archangel Region, U.S.S.R. *Tel:* 9-43-41 (Chief of the Port), 9-40-81 (Harbour Master). *Cables:* Morport Mezen.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Mezen.

Port – "Inflot", Kamenka Settlement, 164650 – Mezen, Archangel Region, U.S.S.R. Cables "Inflot Mezen-Kamenka". Tel: Exchange – 94391. Inflot – 94126.

MURMANSK: 69.00 N. 33.03 E. (See Plan Book)

GENERAL: A Barents Commercial Seaport and Fishing Port, Murmansk, is situated at the Eastern coast of the Southern elbow-shaped bend of the Gulf of Kolsky, between the Zeleny (Green) and Khaldeev Points. It is the last unfrozen port of the Northern seas route.

In very severe Winters the Southern and middle elbow-shaped bends of the Gulf get frozen over for a short period of time in February or March, during calm and frosty weather. In mild Winters drift ice is observed. The Northern part of the Gulf never gets frozen over. The port of Murmansk is open for navigation all the year round. In the event of ice conditions in the Gulf of Kolsky, ice-breaker assistance will be effected in compliance with the Harbour regulations in force.

The port area occupies nearly all Southern elbow-shaped bend of the Gulf of Kolsky. The port of Murmansk consists of 2 harbours: the Commercial and the Fishing Harbours.

DOCUMENTS: Also refer to beginning of U.S.S.R. section.

General Declaration, 5 copies (IMO form).
Crew List, 6 copies (IMO form).
Passenger List, 6 copies (IMO form).
Crew Effects Declaration, 2 copies (IMO form).
Cargo Declaration, 3 copies (IMO form).

PILOTAGE: Compulsory. Pilot station is situated at Kislaya Gooba (position Lat. 69° 11.5′ N., Long. 33° 31.6′ E.) in Kolsky Bay, 9 miles South of the entrance. ETA to be given to Agents before arrival (see "Radio"). Since Pilots are not available at the pilot station any time, it is vital that ETA is duly given to the Agent to arrange a Pilot by indicated time. Pilot launch is distinguished by word "Pilot" in black letters on boat's superstructure. Pilots can be contacted on VHF Channel 16. Every vessel should drift whilst waiting for Pilot since depths in the Pilot station are too big to permit anchorage.

During rough sea Pilot is not able to board a ship at the Pilot station area. In this event vessel should follow the Pilot boat in the wake of it up to the Salny Island and embark a Pilot Southward of the Island at a place indicated by Pilot boat.

ANCHORAGES: At the pilot station depths are too great to permit anchorage, but there is sufficient sea room for vessel to await Pilot with engines stopped. Anchorage with depths from 20 m. – 35 m. is situated in the Southern elbow-shaped bend of the Gulf of Kolsky, Westward of the Kievaraksky leading line (the port outer roads). The holding ground is good.

Every vessel waiting for mooring berth should anchor Westward of the Kievarasksky leading line but not obstructing other vessels' traffic.

It is strictly prohibited to lie at anchor Eastward of the Kievaraksky leading line. If, in case of emergency, a Master has to lie at anchor in the prohibited area, he should immediately report the fact to the Harbour Master of the Commercial port of Murmansk.

RESTRICTIONS: Vessels can enter the inner roads of the port at any time of day or night.

The speed of vessels navigating within the limits of the Gulf of Kolsky is restricted by the following limits:

(a) It shall not exceed 14 knots in the area bounded by the parallels of the Letinsky Point and the Northern side of the Salny Island.
(b) It shall not exceed 10 knots in the area bounded by the parallels of the Northern side of the Salny Island and Pinagory Point.
(c) It shall not exceed 6 knots in the area Southward of Pinagory Point.
(d) In case the wind is over Force 6 Beaufort Scale all movements of ships within the port basin and roads may be carried out with the Port Authorities' permission only.

MAX. SIZE: LOA 200 m.. draft 12.0 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

TUGS: 4 tugs 1,200 h.p. – 2,300 h.p. Normally join vessel in the inner area of the port. Ship's lines as well as tug's lines can be used, the latter being supplied free of expense to vessel.

BERTHING: Main berths, depth alongside 32 ft. at low water. Average height of tide about 3.9 m. Vessels berth port or starboard side alongside at Master's and Pilot's discretion. The berths of the Commercial Harbour with depths alongside of up to 10.0 m. are equipped to handle general and bulk cargoes, metals, machinery, chemicals, foodstuff, etc.

There are enclosed mechanised warehouses for apatite including open concrete floor sheds.

Berths of the port are equipped with mobile electric cranes of up to 40 tons capacity. There are floating cranes with lifting capacity of up to 90 tons, and other cargo handling equipment and intra-port transport. Since loading/unloading is usually done by the port cranes, there are no specific requirements to vessel's cargo gear.

RADIO/RADAR: Murmansk Radio operating 24 hours on 2182 kHz. Coastal radio station UMN operating 24 hours on 500 and 472 kHz. Coastal radio station UMV operating 24 hours on 13080 kHz.

Radio contact can be established through the port radio station Murmansk Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time*
UMN	500	500	A1A	H24
"Murmansk Radio"	2182	2182	H3E	H24
"Murmansk-Radio 10"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	160.95*(7)	156.35*(7)	F3E	H24
"Murmansk-Radio 11"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post "Raskat")	156.6*(12)	156.6*(12)	F3E	H24

*Frequencies given in MHz.
**CPR – Central Port Radio Station.

Radar/VHF link:

In the South circular bay, movement of all vessels is severely controlled by coastal radio station "RASCAT" (VHF Channels 13, 18 and 22). All vessels under way must make contact with Rascat and carry out the recommendations received.

All vessels when at anchor or navigating in the Gulf of Kolsky must keep constant radio watch.

The port radar station gives all possible information to any vessel navigating in the Gulf in the restricted visibility. Radar navigation is usually controlled by a Pilot on board a vessel.

Storm predictions are transmitted on Channel 16 VHF for vessels in the vicinity. Vessels at moorings are warned through the Agent "Inflot".

Notice of Arrival: Every foreign vessel on approaching the Gulf of Kolsky must ask for entry permission into the Gulf from the Toros Island signal station by exhibiting her International Code letters by day and at night her call sign should be made in Morse code by searchlight.

Advice to Agent: ETA first notice be given to "Inflot" by Shipowner 12 days prior to ship's arrival. Master has to inform Port via "Inflot" 48 hours and 12 hours before ship's arrival. 72 hours' and 12 hours' notice to be given by vessels with reefer cargoes.

VHF: Port VHF maintains contact between Pilots and ship within harbour limits, and between ship and shore. Calling on Channel 16 working channel will be according to instructions from shore.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

MEDICAL: Hospital and medical facilities available. Vaccination can be arranged. If doctor required on board Master should inform Agents by radio or VHF.

DENSITY: At the berth varies between 1006 and 1025.

FRESH WATER: Available from most berths, otherwise supplied by barge. To avoid delay recommended to order before arrival.

FUEL: All grades available. Delivered by barge. Advance notice required.

GANGWAY/DECK WATCHMEN: Not obligatory.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: At first Russian port of call certificates of tonnage and those required by International Convention will be required for examination.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: There is no local representation.

REPAIRS: All kinds of repairs can be carried out for vessels of up to 30,000 dwt.

DRY DOCKS: Large dock; length 225 m., width 45 m. Small dock; length 141 m. width 30 m.

TIDE: Changes of the water level in the Gulf are due to the tides. The tide is semi-diurnal with two high waters and two low waters a day. The difference in time of high and low water is about 6 hours. The range of the tide at mean neap is about 2.4 m. and at mean spring 4.5 m. The extreme range of water level is usually observed during the Autumn months and the lowest during Spring.

TIME: GMT plus 3 hours in Winter. GMT plus 4 hours in Summer. (April 1st – October 1st).

TELEPHONES: Ambulance, Tel: 003, 2395 and 2422; Fire service, Tel: 2252 and 2524.

DEVELOPMENTS: Reconstruction is being carried out in order to speed up loading of iron-ore and other cargoes.

AUTHORITY: The Port of Murmansk Authority, 19 the Port Passage, 183038 – Murmansk, U.S.S.R. *Tel:* 2-22-60, 2-23-10, 2-55-65 (Harbour Master). *Telex:* Mortorgport Murmansk.

AGENT: The Port of Murmansk Main Maritime Agency "Inflot", 19 The Portovy Pr., Murmansk 24, 183038, U.S.S.R. Cables "Inflot Murmansk". Tel: 2-56-66; 2-51-97. Telex: 126116.

NAKHODKA: 42.48 N. 132.53 E. (See Plan Book)

GENERAL: A commercial port, Nakhodka is situated in Nakhodka Bay, in the N.W. part of the Japan Sea.

Sometimes America Bay is covered with sludge which is frequently driven out by winds into the sea.

From the beginning of January to March the Nakhodka Bay is usually covered with thin ice which can easily be broken by vessels and driven out into the sea by favourable winds.

The port is open for navigation all the year round.

Changes of the water level in the Nakhodka Bay are of small account but the rise of the water level caused by strong Southerly winds blowing for considerable periods of time, may reach quite a high level.

The Northern part of the Nakhodka Bay from the entrance up to the line connecting the Lindgolm and Basnin Points is occupied by the Commercial port. The fishing port is situated Southward of this line.

The most dangerous wind for vessels lying in the Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to the water level and produces waves of up to 3 m. height in the Bay.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port of Nakhodka is compulsory for all vessels irrespective of nationality and ownership with the exception of the local coasters.

Since 1981 the following Traffic Scheme has been established in the Nakhodka Bay (Navarea XIII No. 28 04.04.81).

1. All vessels arriving at Nakhodka Bay ports from sea are requested to proceed to Nakhodka Bay lighted pivot mid channel buoy No. 1 (Lat. 42° 43′ 31″ N., Long. 132° 56′ 26″ E.) which is the pilot boarding place.
2. Main ship channel No. 1 (740 m. wide) leads from lighted buoy No. 1 along Nakhodka Bay entrance range axis 180° – 000°.
3. Channel No. 2 (740 m. wide) 050° – 230° leads from lighted buoy No. 1 to Nakhodka Bay lighted pivot mid channel buoy No. 2 (Lat. 42° 46′ 00″ N., Long. 133° 00′ 06″ E.) to Vostochny Port Channel No. 3 (250 m. wide) leads along axis of Vrangel Bay entrance range 297° – 117°.
4. Channel No. 7 (740 m. wide) leads from lighted buoy No. 2 along axis of Vrangel Bay entrance range 297° – 117° up to crossing the main ship channel No. 1 to Nakhodka Bay.
5. Channel No. 4 (740 m. wide) leads from main ship channel No. 1 along axis of Novitsky Bay range 089.3° – 269.3° up to crossing the channel No. 7 to Vrangel Bay and channel No. 5 (250 m. wide) leads to Novitsky Bay.
6. Entrance channel No. 6 (250 m. wide) leads from main ship channel No. 1 along axis of Torgovy Port range 087.9° – 267.9° to Nakhodka Bay.
7. All vessels 50 m. and more in length are requested to proceed via above mentioned channels.

Channels No. 1, 2, 4, 7 have two-way traffic. Vessels are requested to proceed along the right side of channel axis.

Channels No. 3, 5, 6 have one-way traffic. Vessels to proceed along the channel axis, according to Traffic Centre instructions.

8. Vessels that proceed from sea are requested to contact Traffic Regulation Centre on Channel 12 call sign "Kamensky-17" not less than 2 miles before approaching Nakhodka Bay lighted pivot Buoy No. 1.

Vessels at berth or anchored within Nakhodka Bay water area are requested to seek permission of the Traffic Regulation Centre before unmooring or weighing the anchor.

Vessels anchored are requested to keep continuous watch on Channel 16.

To avoid damage to a vessel and/or any port installation, vessels should be moored/unmoored by the method of parallel mooring (unmooring) with tug assistance.

Being at 10 m. distance from a berth a vessel is allowed to use her main engine in case of emergency only.

ANCHORAGES: A safe anchorage can be obtained in Area Nos. 305, 306 and 307, with depths from 13.0 m. – 28.0 m. and in the anchorage "10" area with depths from 18.0 m. – 28.0 m. The holding ground in both anchorages is mud, sand, sand with mud, stone.

The "3" area is a quarantine anchorage which serves as the Pilots' boarding place and an anchorage for deep sea-going vessels over 3,000 d.w.t.

The "10" anchorage area is an anchorage for tankers proceeding to the oil port situated in the Novitsky Bay. Boundaries of the anchorages are shown on the chart.

To lie at anchor in the Nakhodka Bay, in the fairway and in the dredged harbours, except in emergency, is strictly prohibited.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. There are no size restrictions for entry to the port, except for vessels having the maximum permitted draft.

Anchorage for tankers is allowed only in the "10" area.

MAX. SIZE: The permitted draft for vessels proceeding to the Commercial port is 9.10 m., the Fishing port 8.0 m. and the Passenger Terminal 8.6 m.

Vessels drawing over the permitted draft must obtain Harbour Master's permission prior to entry to the port.

RADIO: Radio communication can be effected via the radio station of the Primorsk Shipping Company – "Nakhodka-Radio" some data of which is given in the table below.

Call sign	*Frequencies (kHz)* *Working*	*Calling*	*Type of trans-mission*	*Time of work*
UKI	500	500	A1A	H24
"Nakhodka-4"(CPR)	160.65*(1)	156.05*(1)	F3E	HX
"Novitsky-2"	156.8*(16)	156.8*(16)	F3E	H24
(Oil Harbour controller)	157.7*(34)	157.7*(34)	F3E	H24
"Kamensky-17"	156.8*(16)	156.8*(16)	F3E	H24
" (Vessels' movement	156.7*(14)	156.7*(14)	F3E	H24
control post)	156.375*(67)	156.375*(67)	F3E	H24

*Frequencies are given in MHz.

HEALTH: Advise "Inflot" by radio in advance if there is any case of quarantine illness on board the ship. If vessel is arriving from a cholera area, then cholera inoculations are required.

TUGS: Tug and mooring launch assistance available. 2 tugs used. Tugs join the vessel in America Bay as directed by Master or Pilot. Ship's tow lines are used.

BERTHING: May be effected at any time of day or night. In daytime vessel's mooring position will be marked by a flag and at night by a red lantern. These signals mark the point where the ship's bow should be at the mooring.

The berths of cargo handling port area No. 1 have depths alongside from 8.6 m. up to 10.2 m. and are equipped to handle potassium salt, grain, equipment, cables, wire ropes, metals, phosphorus, etc.

The berths of cargo handling port area No. 2 have depths alongside from 9.1 m. up to 10.2 m. and are equipped to handle grain, coal, cement, foodstuff and general cargoes.

The berths of cargo handling port area No. 3 have depths alongside from 8.8 m. up to 11.8 m. and are equipped to handle timber, sawn timber, 20 ft. and 40 ft. ISO containers, equipment, machinery and other cargoes.

Passenger vessels are handled at two berths with depths alongside 8.8 m. and 6.1 m.

Electric cranes of up to 41 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 300 tons and other cargo handling equipment, intra-port transport included.

2 grain handles available, rate 300 tonnes/hr. each.

Loading and/or unloading is usually done in accordance with conditions and rates stipulated by Charter Parties and Sales Contracts.

STEVEDORES: Arranged through "Inflot".

MEDICAL: Medical service is free. All requirements should be ordered in advance through "Inflot".

FRESH WATER: Can be supplied at the berth or by barge.

FUEL: Available.

TANKERS: Slop reception facilities are available.

OPENING/CLOSING HATCHES: Can be carried out by stevedores.

CUSTOMS ALLOWANCES: No restrictions on tobacco and alcohol on board ship. Only tobacco required for personal consumption may be taken ashore.

CONSULS: North Korea, Tel: 55310. Japan, Tel: 56360.

WIND: The most dangerous wind for vessels lying in Nakhodka Bay is the strong Southern wind of long duration caused by typhoons. The wind usually gives rise to water level and sends heavy waves of up to 4 m. height into the Bay.

REPAIRS: All kinds of repairs for vessels of up to 25,000 dwt. can be carried out.

REPATRIATION: Can be arranged during the Summer months provided passport and documentation in order. During Winter months there are no facilities for foreigners to reach nearest international airport so repatriation is only possible via infrequent passenger ships to Japan.

AIRPORT: Nearest international airport is at Khabarovsk, 1,000 kilometres away. Vladivostok is now closed to foreigners or international traffic, though sometimes used for air freight.

TIME: GMT plus 10 hours. GMT plus 11 hours in Summer.

SHORE LEAVE: Permitted subject to police control.

SHIPMASTER'S REPORT: April, 1983.

The following is additional information received regarding this port.

Documents: 2 copies of Camera List on plain paper signed by the Master giving Make and Serial No. of cameras in possession of crew members.

Also see "Regulations".

Anchorage: All tankers must anchor, while awaiting berth, in the anchorage with the following co-ordinates:

	Lat.	Long.		Lat.	Long.
(a)	42° 45.80′ N.	132° 54.71′ E.	(b)	42° 45.80′ N.	132° 55.27′ E.
(c)	42° 55.57′ N.	132° 55.44′ E.	(d)	42° 44.37′ N.	132° 55.44′ E.
(e)	42° 44.39′ N.	132° 54.56′ E.	(f)	42° 44.73′ N.	132° 54.56′ E.
(g)	42° 45.16′ N.	132° 55.08′ E.	(h)	42° 45.39′ N.	132° 54.71′ E.

VHF: "Nakhodka Port Radio Control" maintains continuous watch on Channel 12. This station can be used for conveying messages to Agents. It is not possible to talk directly with Agents.

Medical: 10 Roubles per person for medical consultation.

Fuel: Owner must contact Morflot London (Telex No. 885371 Mrf Lnd) for supply of fuels.

Tankers: All ballast (including clean ballast) in cargo tanks must be pumped ashore. Installation can receive ballast at the rate of 300 t.p.h. to 400 t.p.h. Gas oil loading rate about 700 t.p.h. Interruptions in loading due to shortage of cargo ashore. Vessel took about seven days to load 20,700 tonnes of gas oil.

Surveyors: Soviet Register of Shipping Surveyor can carry out hull and machinery surveys on behalf of Lloyd's Register of Shipping.

Customs: All pornographic literature and films must be kept sealed during the vessel's stay in port.

Shore Leave: From 4 tanker berths, shore leave possible by boats only. Same arranged by Agents.

All seamen are welcomed in the local Seaman's Club.

Regulations: Photography strictly prohibited within port limits.

SHIPMASTER'S REPORT: May 1984.

See "Vostochny".

AUTHORITY: The Port Authority of Nakhodka, 22 Port Street, 692900 Nakhodka, Primorsky Krai, U.S.S.R. *Tel:* 5-77-02, 5-79-38, 5-78-15. *Cables:* Mortorgport Nakhodka Primorskogo.

AGENT: The Far Eastern Main Maritime Agency: "Inflot". Postal address: 692900 USSR Primorski Kray, Nakhodka, ul Leninskaia 2. Telegraphic address: Inflot Nakhodka. Telephone: 56155, 56233, 59773. Telex: 213826.

NARYAN-MAR: 67.38 N. 53.00 E.

GENERAL: A commercial port, Naryan-Mar is situated in the S.E. part of the Barents Sea, at a distance of 70 miles from the Pechora river mouth on the right bank of the Gorodetsky Shar Creek.

The port is open for navigation for a period of 120 – 130 days in the year.

In the Pechora river inlet first ice usually begins to form between 20th and 25th October, but sometimes appears at the beginning of the month.

The inlet becomes completely frozen over at the middle of December. Ice finally disappears at the end of June or sometimes beginning of July. Changes in the water level in the Pechora Inlet, due to melting of ice in Spring, have not been observed.

The formation of ice in the rivers flowing into the Pechora Inlet usually depends upon the time of the appearance of ice in the Inlet itself. Rivers, as a rule, become frozen over by the middle of October. The ice in the rivers usually breaks up earlier than it finally disappears in the Pechora Inlet.

The Pechora river at the Kuya settlement area becomes frozen over at the end of October, and the ice finally disappears by the end of May.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Besides information stipulated in Soviet Wood Charter Party, vessels approaching pilot buoy may contact Port Authorities or Pilot in first 15 minutes of any odd hour from 0700 till 2300 hrs. (Moscow time), frequency 2182 kHz. Signals for Pilot to be given in accordance with International Code. Pilot boat wooden, standard type, white painted, with word "Pilot" in black letters on wheel-house. Pilot usually boards vessel at the Pilot Anchorage light buoy (Lat. 68° 30′ N., Long. 54° 32′ E.). In case of bad weather, and in extraordinary circumstances Pilot shall embark vessel in the Srednevskie Islands area. In this event a vessel approaching the port from seaward should follow pilot boat in the wake of it, up to the Srednevskie Islands leading line where Pilot will be able to board ship.

Master of a vessel proceeding to the port of Naryan-Mar should order a Pilot through the Harbour Master 24 hours prior to arrival at the Pilot Anchorage light buoy and advise more precise ETA not later than 4 hours before approaching it.

Master should order Pilot not later than 2 hours prior to shifting berth and/or leaving the port.

ANCHORAGE: A recommended anchorage for foreign vessels is situated in the area with the central point Lat. 68° 30′ N., Long. 54° 33′ E. The depths in the anchorage are from 5.4 m. – 6.6 m. Also Inner Roads where anchorage will be indicated by Pilot.

An anchorage can be obtained at the right bank of the Pechora river off Urpinsky leading line No. 24. Depths are from 4 m. – 17 m. The bottom is sand and mud.

Good anchorages with depths from 5 m – 10 m. can also be obtained opposite Zakhrebetny Bay and N.E. of the town of Naryan-Mar.

All vessels arriving from abroad or leaving the port for abroad, must anchor opposite Zakhrebetny Bay for port formalities.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night.

The permitted draft for entry to the port is about 4.5 m. but it is usually advised by the Port Authorities at the beginning of navigation. The maximum permitted length of a vessel is 125 m.

The entrance to the port is by the fairway leading from the Pilot Anchorage light buoy across the Pechora river bar.

The bar itself is the extensive shoal water area extending Northward of the Bolvansky Nos. Point. Three channels are dredged across the bar: The Receiving Channel, the Bar Channel and the Povorotny Channel. The last one serves as turning-point from the Receiving Channel into the Bar Channel. Vessels drawing not more than 4.9 m. can pass across the bar only at high water level.

It is prohibited to enter or leave the port through the Bar Channel and/or Receiving Channel as well as to navigate in the port area during dense fog, heavy rain and snow falls, strong winds of over Force 6 and absence of floating marks.

With the appearance of ice in the Pechora Inlet and in the Pechora river, entry to the port is not allowed without Harbour Master's permission.

The speed of a vessel navigating from the Pilot Anchorage light buoy through the Receiving Bar Turning, Alekseevsky, Polovsky, Kuisky, Urpinsky and other Channels shall not exceed 6 knots, with the exception at the part of the Pechora river between the Zakhrebetny and Srednevsky Channels where it is allowed to navigate with speed not exceeding 12 knots.

When passing floating cranes nearby, lighters and vessels lying alongside the port quays, every ship should proceed at dead slow speed.

MAX. SIZE: Draft declared by Port Authorities after being checked in the beginning of the season, and is about 15 ft.

HEALTH: Vessels inspected by sanitary officer. If no diseases, vessel obtains Free Pratique. Pratique automatic when vessel arrives from another Russian port.

RADIO: Naryan-Mar Radio.

Call sign	*Frequencies (kHz) working*	*Frequencies (kHz) calling*	*Type of trans-mission*	*Time of work*	*Remarks*
UOY	500	500	A1	HX	
Naryan-Mar-Radio 1	156.8*	156.8*	F3E	H24	Operates during period of navigation only
Port Controller	156.7*	158.0*	F3E	H24	

*Frequencies are given in MHz.

Storm warnings for vessels' traffic in the Pechora Inlet area for the coming 24 hours are transmitted via both the Central Port Radio and VHF radio.

Notice of Arrival: Should be given in accordance with the "Soviet Wood" Charter Party conditions.

BERTHING: The port of Naryan-Mar specialises in timber exports. Depths at the berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds.

The necessary number of tugs for entering or leaving the port as well as for shifting berth shall be agreed upon between Pilot and Master.

A mooring berth is usually indicated by a Pilot. Shifting berths without having obtained Harbour Master's permission is not allowed. Ship's tow lines are usually used during towage.

Diesel portable cranes of up to 6 tons capacity are operated on the quays. There are also track-laying cranes of up to 12 tons and floating cranes with lifting capacity from 35 tons – 40 tons.

STEVEDORES: As per "Soviet Wood" Charter Party.

MEDICAL: No advance notice required. Clinic and hospital available.

DENSITY: Fresh water irrespective of tide.

FRESH WATER: Available from shore.

FUEL: Not guaranteed.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

OPENING/CLOSING HATCHES: According to "Soviet Wood" charter party.

CERTIFICATES:

Seaworthiness.
Measurement.
Load line.
Cargo Equipment.
Safety Equipment.
Radio Telegraphy.
Radio Telephony.
Oil Pollution Prevention.
Sewage Pollution Prevention.
Derat Certificates.

CUSTOMS ALLOWANCES: Tobacco/Wine – No quantity limits.

IDENTIFICATION CARDS: Only Seamen's Books.

CONSULS: No Consuls.

REPAIRS: Small repairs only.

DRY DOCKS: None.

SURVEYORS: State Register of Shipping.

REPATRIATION: Repatriation and crew changes require visa formalities.

AIRPORT: Airport served by regular lines and situated near town.

TIME: GMT plus 3 hours. No seasonal alterations.

TIDE: Changes in the water level in the port area depend upon tides and effects of the wind.

The tide is semi-diurnal with 2 HW and 2 LW a day. The range of the tide varies from 0.9 m. – 1.8 m. Changes in water level are caused by the effects of the wind and may reach 1 m. – 1.5 m.

HOLIDAYS: See "Archangel".

POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.

TELEPHONES: Can be arranged on board.

SHORE LEAVE: Each crew member properly signed in ship's Articles and having valid Seaman's Book is allowed ashore.

BANKS: None.

EMERGENCY CO-ORDINATION CENTRE: Not available.

STORING: See "Prelims" page viii.

1. By truck when alongside.
2. Vessels stored by truck only.
3. Yes.
4. No.
5. See "Archangel".
6. Normally carried out by ship's crew.

DELAYS: Caused by rains, when vessel loading cargo of sawn goods.

AUTHORITY: The Chief of The Port of Naryan-Mar, Ul. Naberezhnaya 11, 164700 Naryan-Mar, U.S.S.R. *Tel:* 26-95. *Telex:* 24211. *Cables:* Morport Naryan-Mar. *Contact:* Via VHF.

AGENT: A branch of the Port of Archangel Main Maritime Agency "Inflot" at the Port of Naryan-Mar. Pechora Timber Mill 164700, Khatanzeisky, the Port of Naryan-Mar, Archangel Region, U.S.S.R. Cable "Inflot Naryan-Mar". Tel. "Inflot" via the timber mill switchboard 30-70, 31-05.

NEVELSK: 46.40 N. 141.51 E. (See Plan Book)

GENERAL: The sea fishery port of Nevelsk is situated in the Tatarsky Strait, in the Southern part of the Nevelsky Bay. The port is open for navigation all the year round.

Changes of the water level are mainly caused by in and off-going tidal floods.

The port consists of two parts. The Outer part includes a part of the Nevelsky Bay water area with the imaginary boundaries drawn by an arc of 1.5 mile radius from the light mark installed on the Southern point of the Western breakwater. The Inner port consists of the harbour of the fishing port, the Small and the Northern Scoops. The boundary of the Inner is the line connecting the points of the Southern and the Western breakwaters.

The Master of a vessel when entering the port should keep on the leading line of the green leading light marks located at a distance of 5.5 cables to the North of the Southern point of the Naga reef. The true direction of the Leading line is 259° 2′ – 079° 2′.

The port of Nevelsk bearing in mind its position, size, weather and hydrological conditions is not and cannot serve as a sheltered port as it is only partially protected from the effects of the sea swell and winds blowing from South, West and N.W. directions and is not protected from S.W. winds at all. Therefore deep sea-going vessels cannot be allowed to enter the port during storm warnings. It is dangerous to stay in the port when heavy S.W. winds are expected.

PILOTAGE: Effected round the clock. The Master of a vessel should order a Pilot via the Harbour Master's office.

ANCHORAGE: Situated in the Outer port to the South of the leading line and to seaward of the 20 m. contour. The anchorage is not protected from West and North winds and waves. The bottom is sand. The anchorage in the inner area is dangerous as the ground there (stone plate) does not hold anchors well.

RESTRICTIONS: The permitted draft is determined by the Harbour Master. Vessels having draft over 5.8 m. are allowed to enter the port after having obtained the Harbour Master's permission.

TUGS: Tugs ordered by the Master for mooring and unmooring meet vessels within the boundaries of the Inner port.

RADIO: Communications can be effected through the port radio station "Nevelsk Radio-1".

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*
UFM-2	500	500	A1A	H24
"Nevelsk-31"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

BERTHING: All vessels entering the port are moored to the berths according to instructions of a port controller.

The berths of the port with depths alongside of up to 6.5 m. are equipped to handle general, bulk liquid and other cargoes.

There are closed warehouses, open concrete floor sheds and a cold store in the port.

It is recommended to use manila mooring ropes due to insufficient protection of the port from effects of winds, waves and strong variable current with surge (so called the "tyagun".).

Opening and closing of hatches is usually done by the crew. All deep draft vessels are loaded/unloaded in the roads.

The berths of the port are equipped with 5 ton portal cranes. There are other cargo handling facilities and intraport transport.

FRESH WATER: Available in limited quantities.

FUEL: Diesel oil available.

TIME: GMT plus 11 hours. Summertime (April 1st – October 1st), GMT plus 12 hours.

REPAIRS: Possible for vessels up to 4.0 m. draft.

CONSULS: None.

AUTHORITY: The Port of Nevelsk Authority, 32 Rybatskaya Street, 694740 Nevelsk, Sakhalin Island, U.S.S.R. *Tel:* 20-06 (Port Director). *Telex:* Via "Inflot", Kholmsk. *Cables:* Morport Nevelsk. *Contact:* Port Director.

AGENT: Sakhalin Main Maritime Agency, Inflot, at Kholmsk, Sakhalin Island, U.S.S.R.

NOVOROSSIYSK: (Including Sheskharis Oil Harbour)

44.43 N. 37.47 E. **(See Plan Book)**

GENERAL: The port of Novorossiysk is situated in the N.E. part of the Black Sea, in the Bay of Novorossiysk, 60 miles S.E. of the Kerch Strait.

The port is open for navigation all the year round. Ice very seldom appears in the port area. Sometimes, in very severe Winters particularly, a very narrow strip of thin ice (so called "Zabereghi") may be formed on the coast line.

In Winter, strong, gusty N.E. winds (called "Bora"), reaching hurricane force at times, blow from the coastal mountains. Due to these winds, vessels lying at anchor in Novorossiysk Bay may very quickly become covered with ice when the temperature of the air is cooled below freezing-point.

It is impossible to enter the port when "Bora" blows, therefore, all vessels are recommended to leave Novorossiysk Bay for the open sea beforehand or lay at anchor in the Yuzhnaya Ozereika Roads, at a distance of 8.5 miles Westward of the entrance to the port of Novorossiysk or in Anchorage area No. 77, to the South of the Doob Point, until the weather improves.

The range of water level in Novorossiysk Bay caused by the effect of the winds, does not exceed 0.6 m. The changes of water level, due to variation in atmospheric pressure ("Seish" effects), are observed at times. The "Seish" may last up to several days. The maximum range of water level, due to the "Seish", observed in Novorossiysk Bay is 0.6 m.

The port consists of 2 harbours – the Dry Cargo Harbour and Sheskharis Oil Harbour.

The inner roads are situated at the head of Novorossiysk Bay are divided from the outer roads by the Western and Eastern Moles. The outer roads are situated between the moles and the Southern border of the port.

The Dry Cargo Harbour situated inside the inner roads is protected by 2 (Western and Eastern) moles.

Two passages, the Western and Eastern, divided by Penaisky Shoals, lead to the inner roads through the port area. The Western passage is wider in comparison with the Eastern, and vessels may enter outer roads passing through it by one course.

HEALTH: Free Pratique automatic for vessels coming direct from U.S.S.R. port. From other countries, usual procedure of sanitary inspection applies.

DOCUMENTS: Refer to beginning of U.S.S.R. section

Shipmaster's Report: (1975) Notwithstanding the instructions for documentation for all U.S.S.R. ports referred to at the beginning of the section, the Novorossiysk Port Authorities require the following:

General Declaration (IMO FAL form 1)	3 copies
Cargo Declaration (IMO FAL form 2)	2 copies
Ship's Stores Declaration (IMO FAL form 3)	2 copies
Crew Effects Declaration (IMO FAL form 4)	2 copies
Crew List (IMO FAL form 5)	6 copies
Passenger List (IMO FAL form 6)	4 copies

PILOTAGE: Compulsory: 96 hours prior arrival cable Inflot giving ETA, name of vessel, gross tonnage, exact draft, type of engine. Flag, sound and Morse signal G. Pilot meets vessel at Lat. 44° 37′ N., Long. 37° 52′ E. Movement of vessel within inner harbour – only under Pilot guidance. If Pilot is not available vessel should anchor in area No. 52, opposite the Kabardinka settlement, recommended as an anchorage (No. 77), and wait until Pilot arrives.

ANCHORAGES: Anchorage in the outer roads of the port is allowed almost everywhere but most convenient places for the purpose are to be considered the following 3 areas. The first one is area No. 52 situated to the North of the Doob Point.

Depths there vary from 12 m. to 27 m., the holding ground is mud. In the event of winds blowing from seaward Masters of all vessels are recommended to leave this area for the open sea. Area No. 63 is the second anchorage place, situated 8 cable lengths Westward of the Penai Point. Depths there are from 13 m. to 27 m., the holding ground is mud and mud with shell. The third place is area No. 51 situated 6 cable lengths South-Eastward of the port entrance. Depths there are from 20 m. to 24 m.

Vessels approaching the port of Novorossiysk with N.E. gales ("Bora") blowing, or caught by the storm whilst lying in the outer or inner roads, or after having received storm warning, should use every opportunity to proceed to sea or lay at anchor in the Yuzhnaya Ozereika Roads (Anchorage Points No. 53 and 54), having the main engines ready and keeping constant anchor watch.

Under the circumstances, every vessel should keep regular radio contact with port radio station.

Masters of vessels lying at anchor in the outer roads and/or in the port, are usually warned beforehand about the forthcoming N.E. winds. Since these winds may reach hurricane force during a very short period of time, particularly in Winter, all Masters lying at anchor in Novorossiysk Bay are recommended to pay careful attention at every change of the weather, to watch position of vessel to be able to prevent her drifting about anchor and proceed to sea in due time.

RESTRICTIONS: No restrictions on night entry into the Inner Roads. Mooring and/or unmooring, both in the Dry Cargo Harbour and the Sheskharis Oil Harbour cannot be effected during Southerly or N.E. winds over Force 7.

MAX. SIZE: The permitted length for entry into port is 250 m., draft 11 m. for dry cargo vessel.

Tankers: 250,000 d.w.t., 19 m. max. draft.

RADIO: Vessels can establish radio contact through port radio station Novorossiysk Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time of work*
UDN	500	500	A1A	H24
"Novorossiysk Radio"	2182	2182	H3E	H24
"Novorossiysk Radio-1"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	160.95*(7)	156.35*(7)	F3E	H24
	161.7*(22)	157.1*(22)	F3E	H24
"Novorossiysk Radio-3"	156.7*(14)	156.7*(14)	F3E	H24
(Main Controllers' office of the Novorossiysk Shipping Co.)	156.8*(16)	156.8*(16)	F3E	H24
"Novorossiysk-17"	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.45*(9)	156.45*(9)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

All vessels passing through the traffic controlled zone and/or anchored there have to keep constant VHF radio watch on Channel 16.

The port signal station is equipped with radar which gives all possible information for ensuring safe pilotage, and also helps Pilots in shifting vessels within the port inner roads.

TUGS: A sufficient number of tugs of between 600 h.p. and 5,000 h.p. are available in the port.

While manoeuvring ships to the Sheskharis Berths two more tugs of 150 i.h.p. are engaged regardless of the ship's size in view of the constructive features of the berths.

BERTHING: When proceeding in inner harbour vessels must keep both anchors ready to let go; ships to be moored by safe ropes which to be kept tight at all times. Also be ready to use anchor chain over bollard according to Pilot's recommendation. Strictly prohibited to work with propellers lying alongside berth. All mooring ropes must be fitted with rat-guard plates.

The quays of the Dry Cargo Harbour with depths alongside of up to 11.5 m. are equipped to handle general, 20 ft. and 40 ft. containers and bulk cargoes (coal, ore), metals, timber, sugar, grain, cement, fruit and vegetables.

Berths of the port are equipped with modern cargo handling facilities. There are portal cranes of up to 40 tons capacity, floating cranes with lifting capacity of up to 100 tons, automatic and electric cargo lifters and other equipment.

Opening and closing of hatches is usually done by ship's crew with the help of portal cranes at dry cargo berths, if ordered by Master, grain berth excluded.

Ores are loaded in compliance with the Temporary Regulations for Carrying Ores handed over to the Shipmaster by Inflot Agents during inwards clearance.

Following are the basic requirements of above Regulations to the ores being loaded *(a)* moisture contents not higher than 12% (if other percentage is not stipulated by Charter Party); *(b)* angle of repose is not less than 35°.

Grain and other bulk cargoes are to be loaded in strict conformity with the International Convention.

STEVEDORES: All necessary services including stevedoring work available under Port Authority guidance. Port cargo-handling regions where ships berth managed by Port Authority and used for stevedoring, tallymen service, storage, etc. On the matters connected with services available, foreign vessels have to apply to Port Authority through Maritime Agency "Inflot".

MEDICAL: In case of accident (emergency), medical attendance rendered at any time. Hospital facilities available. Also inoculation, vaccination, etc.

TANKERS: Bearing in mind N.E. gales, oil carriers lying alongside oil pier must have boat-ropes lowered to water and illuminate them at night. All scupper holes on main deck must be closed tightly. Master responsible for overflow of oil in the vicinity of harbour and has to bear harbour cleaning costs. No repair work can be done on tankers lying alongside oil pier. No ballast water may be pumped out, no garbage or refuse thrown overboard. Ballast water to be pumped into shore slop tank.

The Sheskharis Oil Harbour is situated in the Eastern part of the outer roads, 2.2 miles N.W. of the Penai Point. It is protected by a mole from the South and oil jetty from the North. The base of the jetty is used as a berth for fire-fighting boats.

Since it is not safe to stay alongside berths in the Sheskharis Oil Harbour during strong winds blowing from any direction, all tankers, after having received a storm warning should take urgent measures to leave for sea.

Depths at the berths of the Sheskharis Oil Harbour are from 9.5 m. up to 20.0 m.

To ensure safe loading/unloading of oil products as well as to expedite the vessel's turn around time, every tanker should be equipped with cargo manifolds capable of fitting 8 in. – 16 in. shore-loading connections.

These manifolds should allow the upward connection with shore cargo flanges of not less than 1 m. in height and located on deck at 3 m. – 5 m. length from side of vessel.

Deepwater Berth No. 1: Accepts vessels of 80,000 to 250,000 d.w.t. Arrival and departure draft not to exceed 19.0 m.

DENSITY: About 1010 – 1014.

FRESH WATER: Available from shore; minimum quantity invoiced at 15 tons.

FUEL: Most grades available. Fuel for tankers can be supplied ex-shore. Bunkers for dry cargo vessels are usually delivered by lighters.

FIRE PRECAUTIONS: All operations involving open fire and sparks are prohibited on oil pier. Two fire extinguishers, thick felt and sand must be ready beside hose connection.

GANGWAY/DECK WATCHMEN: Gangway watch compulsory and carried out by crew.

OPENING/CLOSING HATCHES: Normally by crew, otherwise according Charter Party.

CUSTOMS ALLOWANCES: No quantity limits but nothing allowed to be taken ashore.

IDENTIFICATION CARDS: Crew members get shore passes.

CONSULS: No Consulates in port or its vicinities.

REPAIRS: All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

Cargo Superintendent's Report: 1975.

The Novorossiysk Shiprepair Yard is capable of carrying out any ship repairs, and is equipped with 3 floating docks. I was unable to obtain information on the size of these docks, but estimate they are capable of handling vessels in the 100,000 ton range.

REPATRIATION: No facilities exist for effecting crew changes. A crew member may be repatriated due to family reasons or sickness but repatriation requires visa formalities.

AIRPORT: Nearest airport (Krasnodar) served by regular internal lines is situated at 150 km. from port.

Cargo Superintendent's Report: 1975.

Novorossiysk has its own airport, connected to the regular inland line's service. There are daily services to and from Moscow via Kharkov.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: New Year's Day, 8th March (World's Women's Day); May 1st, 2nd (Labour Day); May 9th (Victory Day); October 7th (U.S.S.R. Constitution Day); November 7th, 8th (Great October Socialist Revolution Day). Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police, 02; Ambulance, 03; Fire, 01.

TELEPHONES: Can be arranged to be fitted on board.

SHORE LEAVE: Crew members are allowed ashore. Crew members of foreign vessels get shore passes which grant them permission to stay ashore till 2400 hrs. Crew members who lose their shore passes as well as those late from ashore, are not granted shore leave any longer in conformity with local regulations.

AUTHORITY: The Port of Novorossiysk Authority, 14 Port Street, 353911 – Novorossiysk, Krasnodarsky Krai, U.S.S.R. *Tel:* 6-21-31 (Chief of the Port), 6-22-41, 6-25-16, 5-46-44 (Harbour Master). *Telex:* 829. *Cables:* Morport Novorossiysk.

AGENT: Main Maritime Agency "Inflot", 13 Portovaja Str., Tel: 54014, 62260, 53086, 62678. Cables: "Inflot" Novorossiysk. Telex: 279114.

ODESSA: 46.30 N. 30.46 E. (See Plan Book

GENERAL: The port of Odessa is situated on the N.W. coast of th Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breake assistance in severe Winters about 30 days of the year. Ice first begin to form in the second half of December and finally disappears i February. After ice has formed it is often broken up by strong winds an stormy weather. In mild Winters ice has not been observed in Odess Bay.

Range of water level caused by winds depends on force and period they blow, and may reach 0.6 m. – 1.0 m.

Atmospheric pressure has also a direct influence on the water leve ("Seish" effect), but is weaker than effects of the wind. The "Seish" ma last from a few minutes up to several days causing change of water leve up to 0.58 m.

PORT LIMITS: The Odessa port waters are bound in the South b Lat. 46° 25° 00″ N. from the shoreline as far as its intersection with Long 30° 54′ 00″ E.; in the East by Long. 30° 54′ 00″ E.; in the North b Lat. 46° 32′ 00″ N. to its intersection with the shoreline and on the Wes by the shoreline itself.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Arranged through Inflot, but vessel to give 12 days', 96, 24 hours' and 6 hours' notice through Odessa Radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilo shows international flag "G". Request for Pilot to shift a vessel within the port or to Pilot her into or out of port should be made by the Maste through the Inflot Agency at least 4 hours prior to service requirement.

The Pilot is brought on board and returned on shore by pilot launch 1.7 miles E.S.E. of the Vorontsovsky Lighthouse (Lat. 46° 29′ 00″ N. Long. 30° 48′ 00″ E.).

The ship's Master is responsible for the safety of the pilot launch and the Pilot when he boards and disembarks from the vessel as well as during his stay thereon.

The boarding Pilot shall be informed by the ship's Master of the vessel's draft, length, breadth and other particulars required for her safe pilotage and mooring.

Specialised vessels (LASH vessels, barge carriers, container ships, Ro/Ro vessels and the like) shall be piloted through port waters only by a Pilot authorised by the local Port Pilotage Service. The Pilot may be taken on board in advance in the swinging area in the port of Ilichevsk (Lat. 46° 10.2′ N., Long. 30° 56.2′ E.).

Pilotage for all specialised vessels is compulsory.

Masters of vessels proceeding from the port of Odessa to Kherson shall make request for a Pilot through the Inflot Agency from the Maritime Pilot Service based in Ilichevsk. Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 MHz) and act in accordance with its instructions.

ANCHORAGES: Two anchorages are available at the Odessa Roadstead. They are Anchorage No. 355 and Anchorage No. 354.

Anchorage No. 355 is used by vessels clearing in or out of port and by those that are to take on water, supplies or fuel or are to undergo minor repairs, etc.

Anchorage No. 354 is for large-tonnage vessels as well as tankers or others carrying dangerous cargoes.

The boundaries of these anchorages are duly charted.

Vessels shall proceed to, and anchor at, Anchorage No. 354 without assistance. Upon anchoring, the vessel shall communicate to the Traffic Control Station her bearings and distance from the Vorontsovsky Lighthouse.

In case of unforeseen circumstances which may endanger navigation (sudden deterioration of visibility, failure of the main engine or steering gear, non-readiness of berth to receive vessel, etc.), vessels entering or leaving port shall, if possible, anchor at points 8 or 12 of Anchorage No. 355.

Anchoring in the Oil Harbour Channel, in the prescribed routes and harbour approaches as well as in the harbour gateway should be avoided.

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of smaller size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

MAX. SIZE: *Inner Harbour:* LOA 230 m., beam 40 m. and draft 12 m.

TUGS: A ship's tugboat requirements are made known, subsequent to the Pilot's approval, to the Traffic Manager on VHF Channel 22, call signal "Odessa Radio 7", at least 1 hour prior to the ship's approaching the port gateway.

BERTHING: 38 berths available with depths alongside from 8 m. up to 12.0 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

HEALTH: Free Pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Inflot by cable. Free Pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of transmission*	
Call sign	*Working*	*Calling*		*Time*
UDE	500/447	500/454	A1A	H24
“Odessa-Radio”	2182	2182	H3E	H24
“Odessa-1” (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
“Odessa-Radio-17”	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.45*(9)	156.45*(9)	F3E	H24
“Odessa-Radio-9” (Pilot Service)	156.45*(9)	156.45*(9)	F3E	H24
“Odessa-Radio-15” (Inflot Shipping Agency)	160.75*(3)	160.75*(3)	F3E	H24
“Odessa-Radio-8”	156.8*(16)	156.8*(16)	F3E	H24
(Vessels' movement control post)	156.375*(67)	156.375*(67)	F3E	H24

*Frequencies are given in MHz.
**CPR – Central Port Radio Station.

Traffic and storm signals are given by “Odessa Port Control” on VHF Channels 14 and 16.

VHF: Traffic in the harbour is controlled by the Traffic Control Station round the clock. The Traffic Control Station and the Signal Mast are situated on the roof of a building at Berth No. 2. The station telephone number is 37-30, its VHF call signal is “Odessa Radio 8”, and the operating Channels are 14, 9 and 67.

All vessels proceeding to the port of Odessa shall establish VHF communication on Channel 14 (156.7 MHz) with the Traffic Control Station 20 minutes prior to entering port waters, when entering port waters and after berthing or anchoring.

The vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name, owner, length, breadth, draft.
(b) Last port of call and purpose of calling at the port of Odessa.
(c) Specialised vessels (LASH vessels, barge carriers, ro/ro and such like) and others concerned, also indicate the number of propellers, their pitch (variable or constant), engine power, availability of thruster and its power.

Thereafter, the ship will proceed according to the instructions of the Traffic Control Station.

Prior to moving any ship within the Traffic Control Zone, her Master shall request permission from the duty Pilot-Operator of the Traffic Control Station by VHF Channel 14, by telephone (37-30) or by visual communication means.

Such permission is valid only for 30 minutes after which it is automatically cancelled.

A special watch should be posted on all vessels and other craft navigating within Traffic Control Zone to listen in on VHF Channel 14 until they are berthed or anchored. Ships underway may change their VHF Channel only on instructions from the Traffic Control Station or the Pilot Service.

All vessels sailing in port waters shall have their VHF stations in good order and shall keep them operative on one of the channels used for communication in the port.

Vessels in port waters, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 16, 9, 14, 20, 22.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters and all violators will be punished accordingly.

Also see “Radio.”

RADAR: When visibility is less than 2 miles in the roadstead or 0.5 miles in the port, vessels may be navigated only by shore-based radar.

The necessity for radar-assisted pilotage is determined by the Pilot-Operator on duty at the Traffic Control Station.

The decision to put a vessel into or out of port shall be taken jointly by her Master, the Port Pilot and the duty Pilot-Operator of the shore-based radar station. Ship-to-radar station communication shall be effected by the boarding Pilot.

The shore-based radar station provides:

(a) Pilotage of vessels from the limits of the Traffic Control Zone to the Karantinaya, Novaya and Kabotazhnay Harbours of the dry-cargo port through the Vorontsov Gateway.
(b) Pilotage of vessels from the limits of the Traffic Control Zone to Anchorage No. 355.
(c) Pilotage of vessels from the port through the Vorontsov Control Gateway and from Anchorage No. 355 to points beyond the Traffic Control Zone Limits.
(d) Remote pilotage of vessels with no Pilot on board by furnishing them with information on their position, with other data to help them orientate and to pass clear of other ships. Such information is supplied by the shore-based radar station at the Master's request.

Vessels may be brought to Anchorage No. 355 only with the assistance of shore-based radar pilotage whatever the visibility conditions may be.

Radar assisted pilotage and remote pilotage are effected throughout the 24 hours of the day, only 1 vessel being piloted at a time.

A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities and sound signalling in good working conidtion and her radar shall be operative. Failure of any of above equipment is to be immediately reported by the ship's Master to the shore-based radar station through the Pilot.

In the event of failure of the shore-based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety.

The use of the shore-based radar does not relieve the Shipmaster of responsibility for ship control.

Radar assisted or remote pilotage dues are recovered according to established procedure on the basis of the extract from the log of the Odessa Port Traffic Control Station.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Inflot. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a “T”-shaped mole extending E.S.E. off-shore. The bottom of the Eastern side of the mole is dangerous, therefore vessels are recommended not to approach it closer than 100 m.

DENSITY: Average density 1012 varying with season.

FRESH WATER: Fresh water may be supplied ex-shore or ex-water barge. Minimum quantity ex-barge 15 tons.

FUEL: Bunkers can be supplied by barge, and to be ordered 72 hours before arrival.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See “Stevedores”.

CUSTOMS ALLOWANCES: Tobacco. No limits on board vessel, but when going ashore not more than 1 or 2 packs. Wine and/or spirits not to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximum weight capacity.

IDENTIFICATION CARDS: Necessary.

CONSULS:

Bulgarian Consulate General Tel: 66-60-92.
Indian Consulate General Tel: 22-43-33.
Cuban Consulate General Tel: 25-14-69.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

REPATRIATION: Can be arranged through “Intourist”.

AIRPORT: Distance to airport 10 miles. Direct airlines with several socialist countries and with the rest of the world through Moscow. Aircraft fly to Moscow 4 times a day.

TIME: GMT plus 3 hours. GMT plus 4 hour in Summer.

HOLIDAYS: Work can be arranged on below mentioned holidays through Sovfracht, Moscow, at special rates. Holidays: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 from port. Ambulance: 03 from town, 903 from port. Fire: 01 from town, 901 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore till midnight. Master without limitation.

DELAYS: Vessels berthed in turn.

AUTHORITY: The Port of Odessa Authority, 1 Vakulenchuk Square, Odessa, U.S.S.R. *Tel:* 293-35-00, 293-34-91. *Cables:* Morport Odessa.

AGENT: The Port of Odessa, Main Maritime Agency “Inflot”. Postal address: 1 Vakulenchuk Square, Odessa, 270004 U.S.S.R. Cables “Inflot Odessa”. Tel: 22-39-02, 293-37-81, 293-38-01; Telex: 232824.

ONEGA: 63.54 N. 38.06 E. (See Plan Book)

GENERAL: The port of Onega is situated on the right bank of the Onega river (3 – 4 miles up from the mouth), flowing into Onezhsky Bay off the White Sea.

Port open for navigation for about 6 – 7 months per year, starting from May. The port is closed for foreign flag vessels from 1st of September to 31st of December annually. In Autumn, when the river is covered with ice, assistance of ice-breaker is required but may not be rendered regularly.

Opening and closing of the port for navigation as well as turn and order of entering the port is usually regulated by the Port Authorities.

Changes of water level in the river depend on tide, spring floods and effects of the wind.

The tide is semi-diurnal with two high and two low waters a day. At the Onega river mouth the range of the tide at mean springs may reach 2.7 m.

The rises of the water level are due to North-Westerly, Northern and North-Easterly winds. The falls of the water level are usually caused by South-Easterly, Southerly and South-Westerly winds.

The Onega river becomes frozen over at the beginning of November. Ice begins to form in October and usually breaks up at the end of April or early May.

A vast area of shoal waters is situated at the mouth of the Onega river.

Access into the Onega river is by the Karelsky Fairway. Vessels drawing up to 6.1 m. may pass through it at high water.

Since depths in the river vary, Masters are recommended to get in touch with the Harbour Master to make enquiries about the existing least depth in the fairway before entering the river.

The port specialises in timber exports.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. A Pilot should be ordered by the Master 24 hours' prior to arrival at the Letny Orlov pilot station. A Pilot meets a vessel at a distance of 0.7 mile Westward of the Letny Orlov Point.

ANCHORAGES: Vessels drawing up to 2.4 m. can obtain anchorage in the Town roadstead below the Severoles wharf. The roadstead situated opposite timber mill No. 32 – 33 can be used as anchorage by vessels drawing up to 3.55 m.

During winds blowing from the N.W. vessels are recommended to anchor in the Petchak area of the Solovetskie Islands, with depths of 10 m. at 1 mile distance offshore.

During Southerly winds of Force 5-6, a safe anchorage with depths of 10 m. can be obtained in the Konyukhov Inlet, 1 mile offshore.

In case of North-Westerly storms, vessels lying on the Karelsky roads should anchor in the Purnema area with depths from 6 m. to 10 m. where an anchorage light buoy is installed (Lat. 64° 20′ N., Long. 37° 27′ E.).

The recommended anchorages for vessels proceeding to the port of Onega along the fairway are situated in the following places:

1. On the line of the Town of Onega leading marks and on the beam line of the front mark of Pikhnemsky No. 2 leading line. Depths are from 3.7 m. – 4 m., the bottom – mud and small stone.

2. In the area of the Onega river, a short distance Northward of the town of Onega leading marks, opposite the Export quay. The least depth in the area is 4 m., its length – 700 m., the bottom is mud and small stone.

3. Southward of the Pristansky (Quays) leading line but not passing over the line of the Pristansky Sekushchy (Quays Crossing) leading marks to the Eastward of it. The depths are from 3 m. – 3.7 m., the holding ground – mud, small stone and stone.

RESTRICTIONS: Vessels having draft not more than 3 m. may enter port at any time, but with draft more than 3 m. only 1 hour before high water.

The speed of vessels having the maximum draft should not exceed 8 knots. The movement of vessels within the port area is not allowed during restricted visibility.

MAX. SIZE: The maximum permitted draft is usually announced at the beginning of the navigation season after sounding of the fairway has been accomplished. It varies from 5.1 m. – 6.4 m. Maximum permitted length is 124 m.

HEALTH: Alongside or on the Roads all vessels coming from abroad inspected by Sanitary Office representative. If no diseases, vessel obtains Free Pratique. If vessel enters directly after calling at another Russian port, Pratique automatic.

RADIO/VHF: Besides Murmansk and Archangel, Onega Radio (UZS), 500 kHz; VHF of pilot office at port of Onega (Channel 16).

Vessels can establish radio contact through the port radio station Onega Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of trans-mission*	*Time of Work*	*Remarks*
	Working	*Calling*			
UZS	500/441	500/425	A1A	H24	
"Onega-2" (Port controller)	156.8*(16)	156.8*(16)	F3E	H24	Operates during navigation
"Onega-5"	156.45*(9)	156.45*(9)	F3E	H24	Operates
(Harbour Master)	156.8*(16)	156.8*(16)	F3E	H24	during navigation

*Frequencies are given in MHz.

The Onega storm signals station is located on the roof of the Harbour Master's office. Day signals warning about forthcoming storms and strong winds in the Onega Bay area are exhibited at mast of the signal station.

TUGS: The number of tugs required for mooring/unmooring and shifting berths is determined by the Master after having consulted the Pilot. Tugs should be ordered 6 hours prior to leaving the port for sea.

BERTHING: Depths at the port berths are up to 6.5 m. There are enclosed warehouses and open concrete floor sheds. Loading of timber usually by ship's gear.

STEVEDORES: No particular ETA advices to stevedores/shippers. Loading of timber usually carried out by ship's winches at average rate of 24 stds. per hatch per working day.

MEDICAL: Doctor and hospital facilities available.

FRESH WATER: Available. Usually delivered by tug.

FUEL: Availability not guaranteed.

GANGWAY/DECK WATCHMEN: Usually by ship's crew.

OPENING/CLOSING HATCHES: In accordance with "Soviet Wood" charter-party conditions.

CUSTOMS ALLOWANCES: No restriction on quantity, but nothing to be taken ashore.

IDENTIFICATION CARDS: Only Seamen's Books required.

REPAIRS: Small repairs only.

REPATRIATION: Subject to visa formalities.

AIRPORT: Nearest at Archangel.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: See "Archangel".

SHORE LEAVE: Allowed up to midnight.

AUTHORITY: The Port of Onega Authority, 198 Oktyabrsky Prospekt, 164880 – The Port of Onega, Archangel Region, U.S.S.R. *Tel:* 21-33 (Harbour Master); 24-91 (Port Controller); 21-51 (Chief of the Port). *Cables:* Morport Onega.

AGENT: A branch of the port of Archangel, Main Maritime Agency "Inflot" at the port of Onega. Postal address: 164880 – The Port of Onega – Archangel Region, U.S.S.R. Cables: "Inflot Onega". Tel. Timber Mill Switchboard 33-33, "Inflot".

POTI: 42.09 N. 41.39 E. **(See Plan Book**

GENERAL: The port of Poti is situated 1.5 miles North of the Rioni rive mouth and on the S.E. coast of the Black Sea.

Port open for navigation all the year round.

Changes of the water level in the port area are caused by the winds and usually reach 0.6 m.

The max. range of the water level observed in the river is 0.9 m.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Radio 96, 48 hours prior arrival to Por Controller and Inflot Agency advising ETA, description and quantity o cargo, location and weight of heavy lifts, if any, number of passengers, ship's length and draft, as well as any services required. Confirmation o ETA required 4 hours prior arrival. Inflot will arrange Pilot basis above information.

Pilot will board vessel in the outer roads at 5 cables length from the Poti light buoy. (Lat. 42° 09′ N., Long. 41° 38′ E.).

The Harbour Master will give the Master of a vessel appropriate instructions if the Pilot is not able to disembark in the outer roads due to stormy weather or heavy waves.

ANCHORAGES: In outer port which is protected by Novy Severny, Yuzhny, and Zapadny Moles, and by Zapadny Breakwater. Safe anchorage for deep drafted vessels, except in periods when "Tyagun", a strong variable current with surge, occurs, with winds from N.W., W. and S.W.

The outer roads are bounded by 2 parallels – Lat. 42° 12′ N. and Lat. 42° 08′ N., and the meridian 41° 35′ E. and the coast line.

The roads are open to winds blowing from the sea. Therefore, in the event of stormy weather vessels are recommended to leave anchorage in the outer roads for sea.

Protected by the New Northern, Southern and Western moles the port ensures a good anchorage for deep-drafted vessels, except periods when N.W., West and S.W. winds form a strong, variable current with surge ("Tyagun"). Strong Westerly, S.W. and Easterly winds make the entry to the port more difficult.

A good anchorage with depths of 10 m. to 30 m. can be obtained at a distance of 1.3 miles N.W. and 1.1 mile West of the head of the Western mole.

Vessels are prohibited from anchoring in the S.W. part of the Southern Harbour and in the centre of the Inner Basin.

RESTRICTIONS: Vessels are prohibited from entering the port when the entrance and the leading lights are covered with fog.

Vessel's speed shall not exceed 4 knots in the port areas marked by navigation marks.

There are no restrictions for night entry.

Least depth in approaches 7.0 m.

MAX. SIZE: The max. permitted draft for entry to the port is 9.4 m. and the length 190 m.

HEALTH: Free Pratique automatic for vessels from another U.S.S.R. port. Other vessels are boarded on arrival.

RADIO: Vessels can establish radio contact through the port radio station Poti Radio operating 24 hours on the following frequencies:

Call sign	*Frequencies (kHz)*		*Type of trans-mission*	*Time*
	Working	*Calling*		
UFA	500/484	500/484	A1A	H24
"Poti-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
	156.05*(9)	156.05*(9)	F3E	H24
"Poti-2"	156.8*(16)	156.8*(16)	F3E	H24
Port (Controller)	156.6*(12)	156.6*(12)	F3E	H24
(Vessels' movement control post)	156.675*(73)	156.675*(73)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

Traffic signals for vessels entering and leaving the port are exhibited at the signal mast located at the head of the Northern mole.

BERTHING: Berthing in the port can be effected with tug assistance only.

The berths of the port, with depth alongside up to 12.5 m., are equipped to handle general and bulk (ore, coal) cargoes, mineral oil products, metals, fruits, vegetables, etc., as well as passenger traffic.

Portal electric cranes of up to 16 tons capacity are operated on the quays. There are also floating cranes with lifting capacity of up to 100 tons.

MEDICAL: Qualified medical service is available free of charge, including dispensary and hospital treatment.

STEVEDORES: Arranged by Inflot.

DENSITY: About 1015, variable with season.

FRESH WATER: Fresh water supplied ex-shore to ship directly or ex-water barge in boundaries of port.

FUEL: Bunkers in small quantities are available. Fuel in quantities over 500 tons will be supplied if an order is placed not less than 5 days prior to a vessel's bunkering. Bunkers are delivered by barges.

CUSTOMS ALLOWANCES: No restriction on quantities but nothing to be taken ashore.

CONSULS: See "Odessa".

REPAIRS: Only minor repairs can be effected. There are no dry docks in the port.

AIRPORT: Nearest at Odessa.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st, 2nd May (Workers' International Solidarity Day); 9th May (Victory Day); 7th, 8th November (Anniversary of October Revolution); 5th December (U.S.S.R. Constitution Day).

POLICE/FIRE/AMBULANCE: Police service, Tel: 0-2; Ambulance, Tel: 0-3; Fire Service, Tel: 0-1.

SHORE LEAVE: Crew members allowed ashore up to midnight.

AUTHORITY: The Port of Poti Authority, 52 Lenin Street, 384691 – Port of Poti, U.S.S.R. *Cables:* Morflot Poti. *Tel:* 9-32-01; 9-32-02; 9-32-08.

AGENT: Maritime Agency "Inflot". 50 Lenin Street. 384691 – Port of Poti, U.S.S.R. Cables: Inflot Poti. Tel: 54127, 57348. Telex: 412674.

PYARNU: 58.23 N. 24.29 E. (See Plan Book)

GENERAL: The port of Pyarnu, a sea fishing port, is situated in the N.E. part of the Riga Bay, at the estuary of the Pyarnu River falling into the Pyarnu Lakht.

Vessels, with a draft of 4.0 m. can reach the port by the channel about 2.5 mile long and about 60 m. wide.

At the estuary of the Pyarnu River the channel is protected by two moles extending S.W. from the shore. Depths at the berths are up to 5 m. Changes of the water level within the port aquatorium are due to tides caused by winds.

Vessels proceeding to the port by the channel are recommended to have sufficient keel clearance bearing in mind requirements of good sea practice. The pilotage is carried out with due regard to the existing water level compared usually with the mean water level at the Kronstadt tide-gauge. Data of the exact depth of the channel can be obtained from the Harbour Master's Office. The harbour of the port is usually frozen over from November till April.

PILOTAGE: Compulsory. The port of Pyarnu has no special Pilot service. In view of this, Pilots for entry or leaving should be ordered through maritime Agency "Inflot" at the port of Tallinn. Pilots embark at the port of Pyarnu roadstead.

ANCHORAGES: The port of Pyarnu roadstead occupies the whole of the middle part of the head of the Pyarnu Lakht limited by the 5 m. line.

When in the roadstead vessels may anchor on both sides of the Pyarnu-Morskoi leading line, beyond the boundaries of the fishing areas. The holding ground is good. The roadstead is sheltered from winds of all directions, except those blowing from the South and S.W.

Masters should bear in mind that there are a lot of fish nets laid in the Pyarnu Lakht. The boundaries of the fish net prohibited areas for navigation of merchant vessels are marked on the charts.

RESTRICTIONS: All traffic of vessels both in the harbour and in the approaches to the port is controlled by the Harbour Master's Office, by a Master on duty.

Navigation in the approaching channel is allowed day and night, in turn, but only in one direction at one time.

It is prohibited for vessels to pass by each other and pass by vessels keeping the leading marks of the approaching channel in line as well as to cross the channel.

The priority to navigate in the channel is given to vessels leaving the harbour. In this case vessels proceeding to the port must give way to outgoing vessel not preventing her manoeuvring. The turn of movement in the channel is stipulated by the Port Controller but the traffic of vessels itself is controlled by the Harbour Master's Office.

Vessels navigating both in the channel and in the harbour must proceed at a moderate speed to avoid the possibility of causing waves.

If winds over Force 6 Beaufort scale entry to the port, leaving the port and shifting berths is allowed by the Harbour Master or a person in charge only.

RADIO: Radio communication can be effected through the radio stations:

Call sign	Frequencies (kHz) Working	Frequencies (kHz) Calling	Type of Trans-mission	Remarks
RKD/F	487	500	AZJ	H24
"Pyarnu Radio-30"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.7*(14)	156.7*(14)	F3E	HX
"May" (Harbour Master)	156.7*(9)	156.7*(9)	F3E	HX (Operates during navigation)

*Frequencies in MHz

Notice of arrival: All vessels proceeding to the port from the seaward should advise their ETA to the Port Controller. Masters should also advise vessels' particulars and the purpose of visit.

VHF: Vessel in the Roads or within port area can contact Harbour Master's Office on Channel 12 by radio-telephone (call sign "May") all round the clock; Port Dispatcher (call sign Pyarnu-31) on Channel 16 from 0700 hrs. till 1900 hrs. (break from 1200 hrs. till 1300 hrs.).

TUGS: Tugs should be ordered through the Port Controller's service. Towage of vessels within the port is prohibited if wind over Force 6.

RADAR: Radar station not available.

BERTHING: Vessels having draft over 4.0 m. cannot berth. During S.W'ly and Westerly winds force 8 and over, when in the port, the Master or his Chief Officer must be on board and have sufficient number of the crew on board in order to secure the vessel safely.

Berths of the port are equipped to handle vessels loaded with fish and fish products, salt, timber, rod metal and some other cargoes. There is a portal crane with 5 tons capacity, closed warehouse and an open concrete floor shed for storage of salt. The Port Authority plans to build a new cold store with administrative buildings.

FRESH WATER: Available alongside.

FUEL: Available alongside and by barge.

OPENING/CLOSING HATCHES: By crew.

REPAIRS: Small repairs possible.

TIME: GMT plus 3 hours from October 1st – March 31st. GMT plus 4 hours from April 1st – September 30th.

AUTHORITY: The Port of Pyarnu Authority, 2 Kalda Street, 203600, Port of Pyarna, U.S.S.R. *Tel:* 55-893, 54-164, 54-442. *Telex:* 308629. *Cables:* Pyarnu Morrybport. *Contact:* Harbour Master, Tel: 55-893.

AGENT: Tallinn Maritime Agency "Inflot".

RENI: 45.26 N. 28.18 E. (See Plan Book)

GENERAL: The port of Reni is situated at a distance 25 miles up from the Izmail Chatal Point on the left bank of the Danube River.

The port is on average, open for navigation for about 317 days of the year. In severe winters ice-breaker assistance is required.

The Danube River and Kilia Mouth become completely frozen over only in severe winters, at the end of December or early January. Ice finally disappears in February or early March.

Changes of the water level are due to effects of the wind and spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m.

DOCUMENTS: Refer to beginning of U.S.S.R. Section.

PILOTAGE: Compulsory. All vessels proceeding from the Izmail Chatal Point up to Reni and vice versa must navigate under control of a State Commissioned Pilot.

ANCHORAGES: Vessels should anchor in the port roads with depths from 10 m. to 20 m. The holding ground is clay and mud.

RESTRICTIONS: There are no time restrictions for the entry to the port. Both draft and length of vessels are limited by depths and width of the Sulina channel.

RADIO: Vessels can establish radio contact through the port radio station Reni Radio operating 24 hours per day on the following frequencies:

Call sign	Frequencies (MHz) Working	Frequencies (MHz) Calling	Type of trans-mission	Time
"Reni-1"	156.8(16)	156.8(16)	F3E	H24
(Port Controller)	156.6(12)	156.6(12)	F3E	H24
"Reni-9" (Harbour Master)	156.45(9)	156.45(9)	F3E	H24
"Vessels' movement control post"	156.7(14)	156.7(14)	F3E	H24

BERTHING: Tug assistance is not compulsory. Tugs are available if requested by Master. Tugs shall be ordered by VHF at least 1 hour before required.

The port is accessible to large vessels. The berths with depths alongside of up to 7.5 m. are equipped to handle general and bulk cargoes, crude oil and oil products, grain and food products.

Cranes of up to 32 tons capacity are operated on the quays. Also there are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

FUEL: Available.

FRESH WATER: Can be supplied ex-shore and by barges.

OPENING/CLOSING HATCHES: According to the custom of the port, opening and closing of hatches is carried out by the crew. But it can be carried out by the port workers for vessel's account, if required by the Master.

REPAIRS: Only minor hull and engine repairs can be carried out. There are no dry docking facilities.

CONSULS: None.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

BANKS: Bank for Foreign Trade of the U.S.S.R., Moscow, Telex: 411174.

STORING: See "Prelims" page viii.

1. Vessel can be stored by barge and truck.
2. Vessel can store from barges after loading/discharging or during operations if nothing interferes with cargo handling.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used on the jetty to handle stores.
5. Vessel can be stored with various stores except prohibited items.
6. Local riggers can be employed to assist with storing.

SURVEYORS:

1. Cargo Inspector of the U.S.S.R. Chamber of Commerce and Industry available.
2. U.S.S.R. Register of Shipping. Surveyor available.

DEVELOPMENTS: 2 new berths to be constructed.

AUTHORITY: The Port of Reni Authority, 188 Dunai Street, The Port of Reni, U.S.S.R. *Tel:* 2-14-84, 2-10-57. *Cables:* Reni Port.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunai Street, The Port of Reni, U.S.S.R. Cables "Inflot Reni". Tel: 21835, 26593. Telex: 232713.

RIGA: 56.58 N. 24.06 E. (See Plan Book)

GENERAL: A Baltic seaport, Riga is situated at the mouth of the Daugava (Western Dvina) River falling into the Gulf of Riga.

The water area of the port is formed by the lower part of the Daugava River from the mouth up to a railway bridge, thence by the Milgravis Channel and Sarcandaugava Creek.

The roadstead of the port is situated at the mouth of the Daugava River.

The entrance channel with depths of 12.0 m. leads across the river bar into the port.

The port is open for navigation all the year round, but ice-breaker assistance is required about 4 months of the year.

The Gulf of Riga is frozen over for quite a long time. On the coast of the Gulf, ice first appears in December and finally disappears in April. The middle part of the Gulf gets frozen over only in severe Winters and for a short period. Usually ice in this area is mostly drift ice.

Considerable changes of the water level may be caused by strong winds and variation in atmospheric pressure ("Seish" effects).

The range of the water level caused by winds depends on the force of the wind, direction and period of time it blows.

Most sharp rises and falls of the water level are observed at the mouth of the Daugava River. They may reach at times 1.3 m. – 1.8 m. higher and 0.9 m. – 1.1 m. lower than the datum at Kronshtadt.

The level of the water in the port usually depends on the ordinary water level in the Daugava River.

The max. rise of the water level caused by winds may reach 2 m. higher and fall – 1 m. lower than the mean water level observed over a period of many years.

The entrance channel is available for ships with maximum draft 12.5 m. from Light Buoy No. 1 "Daugavgriva" to the inner road situated 3 miles from the Daugava River.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inflot will arrange Pilot on receipt of ETA at Daugavgriva Buoy, which to be given 96, 48, 24 and 4 hours prior arrival. Also advise with ETA details of cargo, last port of call, passengers if any, ship's draft and length.

Pilot meets vessel at Receiving Light Buoy No. 1 Daugavgriva (Lat. 57° 06′ N., Long. 23° 57′ E.). In case of bad weather, when Pilot is unable to come aboard, vessel should follow in the wake of a pilot boat, up to the mouth of the river, where Pilot will board vessel.

4 hours prior to arrival at this buoy the Master should advise his ETA by VHF, Channel 14, via CPR.

Vessels leaving the port should navigate under Pilot control to Receiving Buoy No. 1 Daugavgriva.

Ships going to the port of Riga may receive a Pilot for the passage of the Irben Strait at the roads of the port of Ventspils. ETA to Inflot-Riga 2 days prior to arrival at Ventspils Roads.

The order for the Pilot from Riga to Ventspils Roads must be given to Inflot-Riga 1 day prior to sailing.

Pilotage in the Irben Strait is not compulsory but it is recommended for the ships with a large draft.

The Pilot assistance will be particularly useful during Winter when navigation is effected as a rule with an icebreaker in the convoy.

ANCHORAGE: The best anchorage can be obtained in the port of Riga Roads, at a distance 4 miles off the Daugavgriva Lighthouse, bearing 310° Westward of Light Buoy "V". Depths in the anchorage are from 22 m. to 35 m. The bottom is mud and sand. It is not recommended to come closer to the shore without a Pilot on board.

The port of Riga Roads are situated N.W. of the entrance to the mouth of the Daugava River.

The roads are open to winds blowing between S.W. and N.E.; therefore, in Autumn, when these winds prevail, anchorage there is unsafe.

In periods when heavy waves in the roads are caused by fresh Northerly winds, vessels are recommended to leave the roads for shelter in the port or go to the open part of the Gulf of Riga.

The depths in the roads are from 15 m. to 30 m. Holding ground is good.

RESTRICTIONS: Permitted draft for the entry into port is about 10.0 m. at the mean water level.

Entry to the Daugava River and the port of Riga is accessible for vessels having drafts ensuring safe passage across the river bar.

As a rule, vessels passing along the channel are requested to have keel clearance not less than 0.45 m.

The speed of vessels navigating in the Daugava River should not exceed 6 knots.

There are no restrictions as to length of vessel and time of entry to the port.

Large vessels laid up with ballast water are not allowed to shift berth during winds force 6 Beaufort scale and over.

Passage of the Daugava River is prohibited for ships having anchors under water.

The speed of the Daugava water stream in a low-flow period is insignificant, but it may sharply rise at the time of discharge of water through the overflow weir of the Riga hydro-electric power station. The operational schedule of the station requires such discharges.

To avoid damages to the underwater parts of a berth while mooring or unmooring, every vessel must have the main engines going "dead slow" until her stern is not less than 15 m. from the quay.

MAX. SIZE: Max. permitted draft for vessels going to berths of the port for discharging is 10.0 m. in fresh water, if the water level is "O" datum at Kronstadt.

Vessels having draft more than 10.0 m. are discharged into barges in the inner road which has 3 mooring buoys, 3 miles from the mouth of the river. Max. permitted draft for vessels going to the inner road for lighterage is 12.50 m. in fresh water, if the water level is "O" datum at Kronstadt.

Also see "Shipmaster's Report".

HEALTH: Pratique obtainable after vessel's mooring when Health Officials visit vessel with Immigration and Customs Officers. Health Inspector to be informed of any medical assistance required.

RADIO: *Notice of Arrival:* In Winter when the Irben Strait and the Gulf of Riga are completely frozen over and ice-breaker assistance is required, vessels proceeding to the port of Riga should advise Harbour Master their ETA to the edge of the ice, vessel's ice classification and estimation in days for the expenditure of fresh water and fuel available on board to the moment of approaching the edge of the ice.

Vessels can established ship-shore radio contact via the port radio station Riga Radio, operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time of Work*
UKB	500	500	A1A	H24
"Riga-Radio"	2182	2182	H3E	H24
"Riga-Radio-1" (CPR)	156.8*(16)	156.8*(16)	F3E	H24

*Frequencies are given in MHz.

TUGS: Use of tugs is obligatory. The number of tugs depends on length of the vessel and place of berthing.

BERTHING: Berths of the port with depths up to 10.0 m. alongside a equipped to handle general, containers and bulk (ore, coal) cargoe metals, timber, grain, food products and passenger traffic.

Number of tugs to be ordered for entry assistance or for shifting ber is decided by Master in accordance with Pilot's recommendation.

Cranes of up to 40 tons capacity are operated on the quays and by th warehouses. Also, there are floating cranes with lifting capacity of up 100 tons, other cargo handling equipment and intra-port transport.

Opening and closing of hatches is usually done in accordance wi conditions of Charter Party.

SPECIALISED CARGO HANDLING FACILITIES: Berth Nos. 16 – are suitable for handling of ships type Ro-12. Berth Nos. 32 – 33 a suitable for handling of ships type Ro-12, Ro-30 and Ro-60.

BRIDGES: Minimum height of electrotransmission line crossing th Daugava River is 51 m.

MEDICAL: All medical assistance available.

STEVEDORES: Arranged by Inflot who should be given necessa information in advance.

DENSITY: About 1002.

FRESH WATER: Only available ex-berth.

FUEL: Fuel is usually taken at the oil jetties. Bunkers may also delivered to the roads or supplied by lighters at a berth durin loading/unloading of non-inflammable cargoes.

GANGWAY/DECK WATCHMEN: Recommended. These duties norma performed by crew.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: No restriction on quantities, but nothi may be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required.

CONSULS: None.

REPAIRS: Repairs possible for hull, machinery, radio and navigation equipment. Floating crane available, capacity 100 tons. All kinds repairs for vessels up to 30,000 d.w.t. can be carried out.

REPATRIATION: Only subject to visa restrictions.

AIRPORT: International airport not available. Internal communicatio between Riga and most cities of the USSR is possible.

TIME: GMT plus 3 hours. Summertime (GMT plus 4 hours.) fro 1st April till 30th September.

HOLIDAYS: 1st January, 8th March, 1st and 2nd May, 9th May, 7 October, 7th and 8th November.

POLICE/FIRE/AMBULANCE: Advise Inflot.

TELEPHONES: Installed on vessels alongside at Master's reques Installation charge Rbls. 8.0 and Rbls. 2.50 per day or part thereof.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: 1976:

On approaching the area where Irbenskiy Light Vessel should hav been placed, it was found that the light vessel and buoys had bee removed for the Winter season and replaced by spar buoys, althoug these could not be observed on the radar or visually due to the advers weather.

Two other vessels were waiting for daylight transit of the channel also decided to wait for daylight due to a 5 fathom bank being recorde on the chart.

On entering the channel it appears to be very much wider tha indicated on the chart also where the chart has the channel buoys in straight line this was not so, although the alteration of the channel cou have been due to the use of the Winter buoys.

In Baltic Pilot Vol. II vessels are allowed to enter at 26 ft. 3 in. This incorrect as the maximum draft is now 32 ft. Vessels up to 37 ft. were the anchorage, where they are lightened up to 32 ft. before proceedi into the harbour.

Two berths were being used for the discharge of grain, by sho cranes into wagons.

In the early hours of Sunday morning, 4th January, the temperatu being −14°C, a thin film of ice formed in the harbour, this ha disappeared by mid-afternoon. Except for this occasion no ice was see at all in the Baltic, although the climate was very cold.

The Bond was not put under seal, but they were very strict currency list, 3 copies being required, also the total amounts of ea different currency is required.

SHIPMASTER'S REPORT: October 1979:

The buoyed channel is safe to use night and day as each headla has Raymarks on it.

We had 33,000 tonnes of wheat for Riga and our arrival draft wa 38 ft.

We were at anchor for 5 weeks and alongside for 9 days.

Our main problem at the anchorage was shortage of fresh water, th port can only supply small amounts brought by tug, charge 1.4 rouble per ton, no charge for the tug. In 5 weeks we were supplied with 90 ton so vessels should try to arrive with plenty of water if they expect lon periods at anchor.

During our stay there was always 18-20 grain ships waiting and th situation is expected to continue.

Each week (on Mondays if weather permits) the Ship Chandler w come out with supplies which must be ordered through Riga Radio.

Mail and Telexes can be sent ashore with the Chandler.

Sick crew members will be taken ashore when transport is availab but ship's boats are not allowed to be lowered.

When in port I found the Inflot Agency very helpful.

Telexes can be sent without delay but phone calls are difficult.

AUTHORITY: The Port of Riga Authority, 6 Vilis Latsis Street, 22618 Riga, U.S.S.R. *Tel:* 32-93-54, 32-92-54, 32-92-35. *Cables:* Morpo Riga. *Contact:* Harbour Master, Y. Silaev.

AGENT: The Port of Riga Main Maritime Agency "Inflot". Post address: 6 Vilis Latsis Street, 226180-Riga, U.S.S.R. Cables: "Infl Riga". Tel. 32-00-28, 33-97-03. Telex: 161118, 161119.

SOCHI: 43.34 N. 39.43 E. (See Plan Book)

GENERAL: The port of Sochi is an ice-free port, situated at the mouth of the Sochi River, S.E. of the Uch-Dere Point, in the Eastern part of the Black Sea.

The port is protected by the Caucasian chain of mountains from cold N.E. winds but it is open to winds blowing from Southerly and Westerly directions when heavy waves may roll over the port moles causing heavy swell in the harbour.

The port mostly handles passenger traffic.

There are passenger terminals, one of which serves hydrofoil ships only. About 3 million passengers visit the port yearly.

A cargo pier is equipped to handle fruit, building materials and cars. There are enclosed warehouses on the cargo pier and on one of the passenger terminals.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot boat usually meets vessel at a distance of about 1 mile from the port. In the event of bad weather or restricted visibility, vessel should anchor or drift at a safe distance from the port until Pilot arrives.

ANCHORAGE: Deep drafted vessels may obtain anchorage in the Outer Roads Westward of the Northern mole. The depths in the roads are from 11 m. to 12 m.

Some distance Westward, in depths 20 m. – 23 m., there are mooring buoys which can be used during vessels' stay in the roads.

Anchorage can also be obtained at 1.3 – 1.5 miles distance S.S.W. of the Sochi Lighthouse. Depths there are about 29 m. The bottom is mud with sand, and small stone closer to the shore.

Anchorages are open to winds blowing from the sea.

RESTRICTIONS: There are no time restrictions for entry to the port.

In case of stormy weather entry to the port is difficult due to the swell caused by heavy waves in the approach and in the narrow entrance to the port.

In the event of heavy surf vessels must anchor in the outer roads since entry to the port is impossible.

Entry to the port is not allowed during heavy waves over force 4 and winds over force 6 as well as during bad visibility.

During the Autumn-Winter period the port of Sochi cannot be used as shelter port, because lying in the port is dangerous due to the strong variable current ("Tyagun") usually caused by gales blowing between S.E. and N.W.

Under these circumstances the Port Authorities cannot guarantee safety to a vessel which, after having received a storm warning, did not make for sea, and bear no responsibility for the consequences.

MAX. SIZE: The max. permitted draft is 8 m., length 190 m. and beam 25 m.

RADIO: Vessels can establish ship-shore radio contact through the port radio station Sochi Radio, operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call sign	*Working*	*Calling*		
UZB	500	500	A1A	H24
"Sochi-Radio"	2310	2310	H3E	H24
"Smena" (Port Controller)	156.6*(12)	156.6*(12)	F3E	H24
"Sluzhba" (Harbour Master)	156.8*(16)	156.8*(16)	F3E	H24
	156.675*(73)	156.675*(73)	F3E	H24

*Frequencies are given in MHz.

A signal station is located at the Sochi Lighthouse from which visual signals are shown.

BERTHING: A vessel intending to enter port with tug assistance should keep the Sochi mid-channel leading marks in line ahead and stop the main engines in due time to allow vessel to come to the state of "no motion" at a distance of 1 mile from the port entrance. Only under these conditions is a tug allowed to approach a vessel and receive or cast off the tow rope.

Due to a small port area and heavy water streams caused by vessels' propellers Masters of vessels of 2,000 g.r.t. and over must order 1 tug for entering and leaving the port; for vessels of 4,000 g.r.t. and over 2 tugs are required. Shifting berth is allowed during winds not exceeding force 5 Beaufort scale. Opening and closing of hatches on dry cargo vessels is carried out by the crew; on passenger vessels cargo hatches are opened and closed by the port workers.

There are 2 portal cranes of up to 20 tons lifting capacity, 10 ton caterpillar cranes, fork-lifts and other cargo handling equipment.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at nearly all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

AUTHORITY: The Port of Sochi Authority, 1 Voykov Street, 354000, Port of Sochi, U.S.S.R. *Tel:* 996-63-64, 996-63-63, 996-62-32. *Telex:* 128. *Cables:* Morport Sochi.

AGENT: A branch of the port of Novorossiysk Main Maritime Agency "Inflot" at the port of Sochi. Postal address: 1 Voykov Street, Sochi, 354000, U.S.S.R. Cables "Inflot Sochi". Tel: 99-05-86, 996-62-70.

All foreign vessels calling at Sochi are attended by Maritime Agency of Tuapse.

SUKHUMI: 42.57 N. 41.00 E. (See Plan Book)

GENERAL: A Black Sea passenger port, Sukhumi is situated at the head of the Sukhumi Bay, 2 miles E.N.E of the Sukhumi Point. The port is open for navigation all the year round. Both the port itself and the Gulf are open to winds blowing from the sea.

Several berths of the port are equipped to handle passenger traffic.

The port area is bounded by the shore line and the imaginary line connecting the Sakhumi Point and the mouth of the Kelasuri river.

The port is visited by regular and cruise passenger vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: A Pilot meets vessel in the outer roads. Compulsory for foreign flag vessels.

ANCHORAGES: Anchorages are situated in the outer roads on the Northern coast of the Sukhumi Bay, opposite the mouth of the Beslet river. Depths are from 12 m. to 50 m. The bottom is mud.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night.

MAX. SIZE: The max. permitted draft is 7.6 m., length 190 m.

RADIO: Ship-shore radio contact can be established via the port radio station Sukhumi Radio operating 24 hours a day on the following frequencies:

	Frequencies (kHz)		*Type of trans-mission*	
Call sign	*Working*	*Calling*		*Time*
UFF	500/450	500/454	A1A	H24
"Sukhumi Radio"	2182	2182	H3E	H24
"Sukhumi-1"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.45*(9)	156.45*.(9)	F3E	H24

*Frequencies are given in MHz.

Storm signals are exhibited at a signal mast located on the roof of the Port Authority's office.

BERTHING: Vessels of up to 190.0 m. in length are allowed to moor at the new passenger pier. The permitted draft is restricted by the depth of water (7.8 m.). Vessels are not allowed to moor to berths during dense fog and in restricted visibility when navigational lights and the current indicator on the passenger berth are not visible. In this event vessel should anchor and disembark passengers in the outer roads.

When mooring, Master should bear in mind the direction of the current and the effect on the mooring angle of vessel.

By day, the direction of the current indicated by a sparbuoy located at the head of the passenger pier, and at night, by lights exhibited from the elevation of the front leading light.

A green light shown lower than the front leading light indicates Easterly current, and a red light, current of Westerly direction.

The rate of the current is usually determined by the Master himself.

Due to the constant influence of the current, mooring is usually effected without tug assistance.

Masters of vessels moored at the port berths should keep the main engines ready bearing in mind the fact that the outer roads of the port are not protected from the effect of winds.

There are no portal cranes on the passenger pier. Handling of cargo is done by 5 ton port cranes and caterpillar crane with lifting capacity of 12 tons.

FUEL: Can be supplied by lighters.

FRESH WATER: Supplied ex-shore.

REPAIRS: Not possible.

TIME: GMT plus 4 hours. GMT plus 5 hours in Summer.

AUTHORITY: The Port of Sukhumi Authority, 66 Rustaveli Street, 384900, Port of Sukhumi, U.S.S.R. *Tel:* 2-82-02, 2-34-03, 2-34-00. *Cables:* Morport Sukhumi.

AGENT: A branch of the Port of Batumi Main Maritime Agency "Inflot" at the Port of Sukhumi. Cables: "Inflot Sukhumi".

TALLINN: 59.27 N. 24.46 E. (See Plan Book)

GENERAL: A Baltic seaport situated in Tallinn Bay. Year-round navigation is possible. Tallinn Bay is usually frozen over in severe Winters only. In the Winter months (1st February – 31st March) the port of Tallinn is kept open for navigation by ice-breakers. The tidal range in Tallinn Bay is of very small account. The difference of the water level in the Bay is due solely to the effects of the wind. A rise of the water about ±0.8 m. from mean water level is observed during N.W. and Westerly winds. The fall of the water is caused by S.E. and Easterly winds. It usually reaches below the mean water level.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. 24 hour Pilot service is available. Pilots board vessels at Lat. 59° 37′ 05″ N., Long. 24° 38′ E. In case of stormy weather vessels should follow pilot boat to a sheltered position where Pilot is able to embark/disembark or use the assistance of the shore radar station. Pilot should be ordered by VHF through the "Inflot" Agency not later than 2 hours prior to arrival at the Pilots' boarding place.

ANCHORAGES: The anchorage area is situated in the port of Tallinn outer roads Westward of the Tallinn lights leading line, at the Palyasaar Peninsula. Depths in the area are from 14 m. up to 22 m.

RESTRICTIONS: Vessels can enter or leave the harbour through the Northern or Southern entrances. Entry to the port through the Northern entrance can be used by vessels having draft of up to 8.5 m. The Southern entrance can be used by vessels having draft of up to 7.0 m. Depths of water in the Southern entrance area can vary due to the movement of deposits. Vessels can enter or leave the port at any time of day and night.

MAX. SIZE: LOA 155 m., width 22.0 m. and draft 8.5 m.

HEALTH: International quarantine signals to be used on arrival. No later than 6 hours before arrival at the inner area Master should radio Agents giving full details of state of health on board, and requesting Pratique which will be given on arrival.

RADIO: All vessels when approaching the Port of Tallinn should establish radio contact via Tallinn Radio port radio station which operates 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* *Working*	 *Calling*	*Type of trans-mission*	*Time*
UNS	500	500	A1A	H24
"Tallinn-Radio"	2182	2182	H3E	H24
"Tallinn-Radio-1" (CPR)	156.8*(16)	156.8*(16)	F3E	H24
"Tallinn-Radio-5" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	H24
"Tallinn-Radio-17" (Vessels' movement control post)	156.7*(14)	156.7*(14)	F3E	H24

*Frequencies are given in MHz.

The movement of vessels within the port and in the outer roads is controlled by the Traffic Control Post located at the Port of Tallinn Authority building.

TUGS: Tug's assistance available for berthing subject to Pilots advice. Tugs can be ordered through Agents. Ship's lines normally used. When tugs are ordered in advance the cost will be charged to the vessel whether tugs are used or not. For vessels with length over 120 m. tug assistance is obligatory.

BERTHING: Vessel will not be allowed to berth unless main engines and steering mechanism are in good working order. All vessels in port are required to fly their national flags between 0800 hrs. and sunset. On holidays and special occasions vessels may be expected to dress their ships if requested by Port Authorities.

The berths of the port with depths alongside up to 9.0 m. are equipped to handle general, 40 ft. containers, bulk and liquid (chemical products) cargoes, sugar, cement, metals, foodstuff, etc., as well as passenger traffic. Covered warehouses with mechanical equipment and concrete floor sheds are available.

STEVEDORES: Arranged by Agent on basis of Master's ETA. Loading and unloading is carried on throughout 24 hours a day including holidays.

CRANES: Loading and unloading is usually done by shore portal cranes of up to 40 tons capacity, by floating cranes of up to 100 tons capacity and by other cargo handling equipment.

TANKERS: Tankers moor at berth No. 17, length 130 m., depth alongside 9 m. No slop facilities available. Tankers are normally required by the charter party to reserve a slop tank on board.

FRESH WATER: Supplied by pipe-lines at all berths.

FUEL: Bunkers are available and can be taken from the quays or delivered by lighters.

FIRE PRECAUTIONS: Masters of tankers are presented with a copy of Safety Regulations by the Agent on arrival.

GANGWAY/DECK WATCHMEN: Compulsory to maintain a gangway watch by ship's crew.

OPENING/CLOSING HATCHES: Normally opened and closed by ship's crew.

CUSTOMS ALLOWANCES: No restrictions on crew's consumption of tobacco and alcohol on board. It is forbidden to take these items ashore.

CONSULS: No local representation.

REPAIRS: Only minor repairs may be effected at machine shop ashore.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: All holidays are worked by stevedores.

TELEPHONES: Connection on board vessels can be made at berths number 5, 12 and 17.

DEVELOPMENTS: New Port to be built in the Bay of Muuga 20 km. from Tallinn for handling grain cargoes in vessels of 100,000 d.w.t. The Port will also handle perishable cargo and Ro-Ro vessels. First stage to be completed in 1986.

AUTHORITY: The Port of Tallinn Authority, 25 Sadama Street, 293300-Tallinn, U.S.S.R. *Tel:* 42-58-30, 42-59-80. Telex: 173-106. *Cables:* Morport Tallinn.

AGENT: The Port of Tallinn Shipping Agency "Inflot". 54-a Tuukri Street, 200106 – Tallinn, U.S.S.R. Cables: "Inflot", Tallinn. Telephones: 2430518, 2432720, 2428339. Telex: 173273.

TUAPSE: 44.06 N. 39.04 E. (See Plan Book)

The port of Tuapse is situated between the mouths of rivers Tuapse and Pauk and the depths of 40 m. Year round navigation.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory in and out, possible at any time. Vessels await Pilot at anchorage. Pilots board and leave vessels in the Outer Roads behind the Pervomaisky Breakwater if the sea (swell) up to Force 4. When leaving harbour during bad weather Pilot leaves vessels in the Inner Roads. Communication with Pilots on VHF channel 12.

ANCHORAGES: Depths 13 m. – 22 m. Position of anchorage, bearing to the entrance red light and distance is radioed by Harbour Master through Agent to each vessel prior to arrival (unless berth available). When at anchor, vessel shall keep VHF watch on VHF Channel 16.

MAX. SIZE: See "Berthing".

HEALTH: Sanitary Officer boards on arrival or when berthed. No automatic Free Pratique. In the event of fever or any suspected epidemic disease onboard Masters shall inform the sanitary service immediately on arrival.

TUGS: Tugs are compulsory for berthing/unberthing or shifting, as well as when lying at inner anchorage. Tugs normally join vessels at the buoy marking the Pervomaisky breakwater. Ship's lines to be used.

RADIO: Radio communication can be effected through the port rad station "Tuapse-Radio".

Call sign	*Frequencies (kHz)* *working*	 *calling*	*Type of trans-mission*	*Time work*

Vessels' movement	156.8*(16)	156.8*(16)	F3E	H24
control post	156.45*(9)	160.45*(9)	F3E	H24

*Frequencies in MHz.

**Central Port Radio Station.

Arrival Advice: Masters shall send 96/72/48 and 24 hours' ETA notic to "Inflot" agency, advising also quantity of ballast onboard and tin required for deballasting ashore. Masters shall also advise quantity a grade of cargo, stowage plan, LOA and maximum draft, number passengers, health condition of crew.

BERTHING: At any time with winds up to Force 7. The port consists o harbours, with 3 berths for dry-cargo ships (max. draft 12 m. (bracki water), LOA up to 220 m.) and 6 berths in the oil harbour for tanke (max. draft 12 m. (brackish water) LOA up to 235 m.). Oil harbour, sho cargo manifolds diameter 250/400 mm. All dry-cargo berths a equipped with portal cranes of 40 tons capacity. Loading/unloadi usually by shore cranes. The port is not sheltered for vessels duri strong S.E./S.W. winds. During strong gales from these directions lyi in port is dangerous due to strong swell, especially the one call "tyagun". In this event vessels must leave harbour when recommend by the Port Authority. When lying in port the main engines shall not immobilised without special permission by Harbour Master.

MEDICAL: First medical aid at any time; hospital facilities available.

DENSITY: 1011/1015.

FRESH WATER: Available from any berth, road delivery not possib

FUEL: Fuel oil and gasoil available at oil berths or ex-lighters. Maste giving 72 hours' notice.

FIRE PRECAUTIONS: Conventional rules for oil ports.

POLLUTION: Marine pollution shall be avoided by all means, specia due to proximity of health resort area. Any pollution is subject to hea fines.

OPENING/CLOSING HATCHES: Normally by crew.

GANGWAY/DECK WATCHMEN: Not required. Gangways shall lighted up and protected by nets.

CUSTOMS ALLOWANCES: No restrictions. Export/import of Sov currency is forbidden.

IDENTIFICATION CARDS: Seaman's books are sufficient.

CONSULS: None.

REPAIRS: Emergency repairs. Floating docks subject to spec arrangement.

REPATRIATION: Possible in emergency.

AIRPORT: Sochi – 120 km. Served by regular airlines.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

HOLIDAYS: 1st January, 8th March, 1st, 2nd May, 9th May, 7th Octob 7th, 8th November. Work during holidays can be arranged.

TELEPHONES: Available for all vessels.

SURVEYORS: Leading world classification societies are represented the Register of the USSR.

GENERAL: Deballasting or discharge of tank-washings facilities (slop at a rate of up to 2,000 t.p.h., craft for discharge of bilge water. Fo waste and garbage, etc. shall be collected into special containers plac on board upon berthing. Laundry facilities. No boats, rafts, etc. shall launched from vessels without special permission. All mooring ropes be provided with rat-guards immediately upon mooring or shifti berths. Local representative of the Insurance Company of the USS (Ingosstrakh) Ltd., and experts of the USSR Chamber of Commerce a Industry.

SERVICES: Compass adjusting and radar repairs.

SHORE LEAVE: Crew allowed ashore until midnight.

FIRE/AMBULANCE/POLICE: Telephones: Fire – 301; Fire-boat – 23 Ambulance – 003; Militia (Police) – 002. *Office Hours:* 0800 1600 hrs. Saturday 0800 – 1400 hrs.

DEVELOPMENTS: Reconstruction works including dredging underwa

NOTICES:

Brief Information for Masters:

ETA: ETA messages shall also contain quantity of ballast and time deballasting ashore.

Anchorage: Anchorage position and bearing to the entrance Red Light being sent to each vessel prior to her arrival by Agent, if no berthing expected. No boats, rafts of other objects shall be launched fro vessels. No swimming is allowed.

Bad Weather: S.W. gales develop heavy swell in harbour and vesse may be recommended to leave berth. Main engine shall not immobilised when alongside berth without Harbour Master's permissio Such permission is subject to weather conditions, and a tug-boat sh be hired to stand-by.

Bunkers: Available, two grades only: Gasoil and IFO of appro 40/80 cSt.

Fresh Water: Available ex-cargo berths only.

Garbage and Wastes: Any garbage, food wastes, etc. should collected by crew into special containers placed on board each vess by a boat upon arrival.

Pollution: Oil spillage must be avoided. In case of a spill, all operatio must be stopped immediately and the accident reported to the Po Authority and your Agent at once. Any oil spot or slick noticed on the se surface near your vessel should also be immediately reported to yo Agent and entered in the log.

All outboard sea valves should be locked up upon arrival in U.S.S. territorial waters and kept securely closed until sailing. Port seals ma be placed on the said valves after docking.

Oil record book should be kept up to date and always ready inspection by Port Authority or Pollution Control.

Salinity: The sea water in harbour is brackish (salinity 1.011–1.014).

Sick Crew: Seamen with fever and symptoms of infectious disease should be reported to Port Sanitary Doctor on ship's arrival and without delay. Polyclinic is open 0900 – 1700 hrs., Monday to Friday. First aid is available at any time.

Duty Free: Shop is run by Shipchandler and is open 0800 – 1200 hrs., 1300 – 1700 hrs. (Tel: 398).

Smoke: Emission of smoke from funnel in harbour is prohibited.

Smoking: No smoking is allowed on all decks when alongside at oil berth or when bunkering from a barge.

Telephone: Shore telephone set will be placed on board for fire-safety and business only.

Useful Phone Nos.: "Inflot" – 322/832/836; "Nafta" – 357/282; Pilot – 338; Harbour Master – 323/235; Seamen's Club – 269.

Curfew: Shore leave to 2400 hrs.

Attention of Chief Officers: All mooring ropes and lines are to be equipped with *rat-guards* immediately upon completion of mooring or shifting.

Failure to comply with this regulation will incur a heavy fine by the Port Sanitary Service without further warning.

Fire Fighting and Emergency Procedures:

Instructions on fire fighting safety and emergency procedures at oil berths and on tankers lying at loading berths at the Port:

1. Smoking in the Oil Harbour is prohibited.
   Use of open fires and hot work without special permission of the Oil Harbour Fire Guard is not allowed.
2. In case of fire or emergency, inform Fire Guard (phone 301) immediately; at the same time start fire-fighting.
3. In case of oil spillage on the quay or on a tanker, cease all cargo operations immediately until the spilled oil is removed.
4. Stop loading during electrical storms.
5. Stop loading when another tanker is underway to an adjacent berth until her mooring is completed.
6. Connecting hoses and loading operations are prohibited when ship to shore bonding cable is missing.
7. The following fire-fighting equipment should be located near the ship's main cargo manifolds on deck:
   2 fire extinguishers; a felt sheet, a container with sand and shovel; foam and water hoses with jet nozzles laid out.
8. If a fault or a condition threatens to create a fire is discovered, stop loading immediately until the hazard is eliminated.
   Use of tools that may produce sparks is not allowed.

Principal Rules of Anti-fire Safety for Tankers Lying Alongside in the Oil Harbour:

In order to ensure the fire safety of the Oil Harbour and of vessels lying alongside, it is strictly forbidden:

(a) To pump out ballast and water with remains of oil products out of tanks/bilges;
(b) To carry out work with a naked flame;
(c) To throw overboard lighted cigarettes, matches, garbage, also to use signal rockets, fireworks, fire, etc.;
(d) To maintain fire in the galley, to use portable electric fire appliances, cabin ventilators and smoke on board during loading/discharging of oil cargoes. Smoking is allowed only in ship's smoking rooms;
(e) To perform steam scavenging of the smoke or exhaust pipes which may cause sparking;
(f) To use unprotected electric lights, pocket electric torches for lighting decks, tanks or ladders;
(g) To use on deck wire ropes while mooring, if the vessel is carrying 1st. category cargo;
(h) To load/discharge during thunderstorms;
(i) To use tools made of ferrous metal when connecting hoses to avoid sparking.

The vessel's administration are obliged to take all necessary measures to avoid any possible leakage of cargo from pipes and fittings onboard or pump out or spill on deck and in to the sea.

3. All scuppers on the loading/discharging deck section are to be plugged.

4. It is absolutely necessary that the vessel's hull should be connected to the shore earthing appliances if the vessel is loading/discharging a 1st. category cargo.

5. The manholes of the cargo tanks are to be closed and the sight holes to be covered with Davy's nets.

6. Before commencing loading/discharging all the anti-fire appliances are to be ready for immediate use.

7. In case of fire on board the fire brigades should be called without delay, the vessel's Administration organising the extinguishing of fire by crew also.

8. The vessel's Administration must acquaint the crew with the above rules.

9. Master is responsible for the observance of the above rules.

AUTHORITY: The Port of Tuapse Authority, 2 Maxim Gorky Street, Port of Tuapse, Krasnodarsky Krai, U.S.S.R. *Tel:* 7-15-15, 7-19-15. *Cables:* Morport Tuapse. *Contact:* The General Manager, Port Administration.

AGENT: "Inflot," Maritime Agency, 20, Gagarin Str., 352800, Tuapse. Cables: Inflot. Telex: 279116 Inf Su. Tel: 7-13-22, 7-18-36, 2-32-33.

UST DUNAYSK (Ustj Dunajsk): 45.30 N. 29.46 E.

(See Plan Book)

SHIPMASTER'S REPORT: April 1982.

GENERAL: Situated on the Northern side of the Danube Estuary, approached by a channel about 1 mile West of the Girlo Prorva (BA Chart 2213), with a depth of about 12 m. to a basin dredged to 12 m. – 14 m.

DOCUMENTS/ENTRY PROCEDURE: As per U.S.S.R. ports.

PILOTAGE: Pilot boards in position Lat. 45° 32′ N., Long. 29° 47′ E., or in outer anchorage if weather permits. A tug or orange and white pilot boat is used.

APPROACHES: From the W.N.W. to a good anchorage at the pilot boarding station, depth 17 m., soft mud. As the buoys marking isolated dangers are unlit daylight approach is recommended.

ANCHORAGES: As above or Harbour Authorities may recommend anchoring in position Lat. 45° 28′ N., Long. 29° 58′ E. Inner anchorage is used by river traffic.

HEALTH: See "General" before first U.S.S.R. port.

RADIO: Kooperatsia Ustj Dunajsk on Channel 13. Izmail on W/T or Channel 13.

Communications: Can only be carried out via the "Kooperatsia", which is an old passenger vessel and is used as the Harbour Office. All messages have to be relayed via this vessel and are either transmitted via VHF to Inflot, Izmail, or taken by river ferry to Izmail. As the Inflot Agent is the only one with a moderate command of English and is not in the office all the time, difficulties and delays occur.

TUGS: Assist in berthing and unberthing.

BERTHING: See "Plan Book".

East Berth, 2 anchors to 9 shackles, 3 ropes from each quarter to shore bollards about 180 – 200 m. from vessel.

West Berth, 2 anchors to about 8 shackles, 2 ropes from each quarter to mooring buoys about 80 m. away.

Cargo Operations: Cargo worked 24 hours per day, weather permitting. All cargo worked by one floating crane, with a grab of about 3 tons. Discharging into 1,000 ton lighters, which are taken elsewhere for off-loading. As the crane also has to remove and replace the 7 covers on each lighter, considerable delays occur between finishing one lighter and starting the next. Even in most favourable conditions (16 hours in 24) discharging time seems to be the best that can be achieved. Rain and strong winds delay cargo operations. Takes about 20 days to discharge 25,000 tons.

STEVEDORES: Provided by port.

DENSITY: 1004.

FRESH WATER: Very difficult to obtain. Requires about 15 days' notice as has to come from Izmail in 300 ton barge, cost (1982) 2 Roubles 50 copecs per ton plus 3 Roubles 58 copecs per ton for transportation charges.

FUEL: Supplied but notice required well in advance.

TIME: GMT plus 3 hours in Winter. GMT plus 4 hours in Summer.

POLICE/AMBULANCE/FIRE: None.

TELEPHONES: None.

MEDICAL: Hospital and doctors in Izmail. Non-urgent cases take several days to arrange, see "Shore Leave".

PROVISIONS: Usually only potatoes and onions available. Transport cost: 10% of bill.

SHORE LEAVE: Permitted, can only be arranged through the Agents, Inflot. Several days' notice required, all movements of crew closely monitored by Frontier Police.

Journey to Izmail takes 3 hours by hydrofoil and it is usually necessary to spend at least 1 night in hotel at a cost of 10 Roubles, this is arranged by Agent.

HATCHES: Opened and closed by ship's crew.

REPAIRS: No facilities.

NOTICE:

Extracts from the "Compulsory Regulations at the Sea Merchant Port of Ustj Dunajsk".

(For the Master of the ....to be informed)

1. All the mooring ropes to be supplied with rat guards.
2. In daytime to hoist anchor ball.
3. The National Flag of the U.S.S.R. should be hoisted from 0800 hrs. until sunset.
4. At night and when snowfall, rain, haze/mist anchor lights should be switched on.
5. The main gangway set for the men's movement should be equipped with handrails and life-saving net.
6. In order to prevent motor-launches fouling or colliding with the anchor chain or stern at night:
   a) Hang out 1 light in the forebody portion of the vessel – down from the stem.
   b) Hang another light down over the stern.
7. Categorically prohibited:
   a) Pumping out of all kinds of petroleum products.
   b) Pumping out of sewage.
   c) Throwing out rubbish, sweepings, refuse and other things, including cargo separation.
   d) No diving or bathing.
   e) Lowering of boats and dropping of other means of flotation.
   f) Work on vessel's radio station except VHF.
   g) Use of firearms for hunting birds.
   h) Giving sound signals.
8. In stormy weather stand by on Channel 16 VHF. Radiotelephone communication with the m.v. "Kooperatsia" by VHF Channel 13.

Signed:
V. Stoliarov, Harbour Master.

Accepted by the Master of the ....
(Presented to vessel 8th April, 1982).

SHIPMASTER'S REPORT: May 1983.

GENERAL: Situated on the Northern arm of the Danube Delta, the port consists of a basin in the marshes, and is approached by a buoyed channel 100 m. wide, approx. 3.5 miles long, dredged to a depth of 13 m. There are berths for two vessels lying to two anchors and with three lines to each quarter mooring buoy. There is a strong outflow from the river, and the port is open to all winds. LASH ships appear to have preference at one berth. All business, including protests, is transacted at Izmail, some 40 miles inland, and the Inflot Agent and Port Officials are based there.

DOCUMENTS: Refer to beginning of U.S.S.R. section. Nine crew lists and separate money list (attached to crew declaration) required.

PILOTAGE: Compulsory, but not for departure from Inner Roads. Pilot launch with orange hull and white superstructure with the word PILOT in black on the hull. This launch is used for all transport operations in the port.

ANCHORAGES: There are two anchorages "A" and "B" marked on B.A. Chart 2213. Vessel instructed to anchor in "A", and Pilot boarded there. Vessels lightening are anchored in the Inner Roads close by the outer fairway buoys. Good holding ground in mud and sand at all anchorages.

RESTRICTIONS: Least depth in channel 35 ft. – 38 ft.

RADIO/VHF: Pre-arrival notices to Inflot Izmail. Agent boards with Officials and Grain Inspectors either at Inner Roads Anchorage or at berths.

Pilot Channel 16; Inflot Agent Channel 13 – call "Kooperatsia". Use of main transmitter prohibited at Inner Roads and in the port.

TUGS: One conventional and 2 pusher tugs with adequate power assist with berthing. There is a mooring boat for running buoy lines.

BULK CARGO FACILITIES: There are 2 floating cranes, well fendered and with integral hopper/belt system for loading coasters. They also carry a wheeled digger/dumper, use of which is not allowed at the anchorage. Each crane capable of about 600 t.p.h.; average about 400 t.p.h. Coasters have a capacity of 3,000 tons; lighters 1,000 tons. Lightening at anchorage carried out by 1 crane towed out by tug; operation liable to interruption with wind force 4 – 5 when crane returns to port.

MEDICAL: In emergency Agent can arrange medical treatment at Izmail.

DENSITY: 1013.

SURVEYORS: *Grain Inspection:* Inspectors required *all* main hatches opened and two crew to assist with sampling, even for lightening two holds.

HATCHES: Opened/closed by crew.

CUSTOMS ALLOWANCES: No restrictions. Bond not sealed.

SERVICES: None.

SHORE LEAVE: Not permitted.

AGENT: Inflot Agent travels from Izmail and usually spends Monday to Friday on Kooperatsia, or if traffic expected. See "Izmail".

VENTSPILS: 57.24 N. 21.33 E. (See Plan Book)

GENERAL: A Baltic Sea port, Ventspils is situated at the mouth of the Venta River. Ventspils is ice free throughout the year.

There are periodical alterations in the water level of the Venta River, chiefly due to the effects of the wind. The rise of the water level is usually due to moderate Westerly winds, and the fall is caused by Easterly winds.

The maximum rise of the water level is observed in the Venta River at the time of Spring floods.

The port of Ventspils aquatorium includes the Avant-port and the Commercial port. A fairway, direction 323.7° – 143.7°, 130 m. wide leads to the port from seaward. The draft of vessels passing through the fairway should not exceed 10.6 m. It is dredged from time to time as depths at the port entrance decrease due to the sand drift caused by heavy gales.

Vessels with draft not exceeding 12.45 m. leave the port by another fairway, which leaves the approach fairway at a distance of 7.5 cables to the N.W. from the entrance to the Avant-port and extends in line bearing 290° up to principal channel receiving light-buoy No. "Ventspils A".

Vessels can enter the port by this fairway only after having obtained the Harbour Master's permission.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

RADIO: Radio contact should be established via the Ventspils Radio-1 port radio station which operates 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz)* working	calling	*Type of trans-mission*	*Time of work*
UNI	500/429	500/454	A1A	H24
"Ventspils-Radio"	2182	2182	H3E	H24
"Ventspils-Radio-1"	156.8*(16)	156.8*(16)	H3E	H24
(CPR)**	161.9*(26)	157.3*(26)	F3E	H24
"Ventspils-Radio" "Nadzor" (Harbour Master)	156.8*(16)	156.8*(16)	F3E	H24
"Ventspils-Radio-17" (Vessels' movement control)	156.8*(16)	156.8*(16)	F3E	H24

*Frequencies are given in MHz.

**Central Port Radio Station.

Working frequencies of VHF Radio-telephone:

Channel No. 7 – 160.95 MHz
Channel No. 20 – 161.60 MHz
Channel No. 22 – 161.70 MHz
Channel No. 26 – 161.90 MHz
Channel No. 27 – 161.95 MHz

RADAR: the port has a shore radar vessels' control system.

HEALTH: Pratique obtainable after mooring. Sanitary Inspector visits vessel after mooring together with Immigration and Custom House Officer. If medical care required the Sanitary Inspector has to be informed.

It is strictly forbidden to throw any type of garbage materials overboard from the ship into water areas of the port (bilge water, sanitary water and other infected pollutants). There are three barges for these services; one barge is self-propelled and two are non-self-propelled.

PILOTAGE: Pilotage is compulsory both for entering and leaving the port.

Pilots board and leave vessels in the areas of Reception Buoys "Ventspils-A" and "Ventspils-B". Pilot service is available round the clock when entering and leaving the port.

Pilot vessel on Channel 16.

ANCHORAGES: Anchorage in the outer port road for vessels loaded with chemical cargoes is allowed in area No. 50, co-ordinates:

Lat. 57° 29.75′ N.	Long. 21° 28.62′ E.
Lat. 57° 29.12′ N.	Long. 21° 29.90′ E.
Lat. 57° 30.82′ N.	Long. 21° 31.75′ E.
Lat. 57° 31.48′ N.	Long. 21° 30.40′ E.

Anchorage in outer port road for tankers, vessels loaded with explosive or inflammable cargoes and also for vessels holding up in quarantine is allowed in area No. 51, co-ordinates:

Lat. 57° 29.40′ N.	Long. 21° 28.82′ E.
Lat. 57° 28.08′ N.	Long. 21° 27.15′ E.
Lat. 57° 27.90′ N.	Long. 21° 30.80′ E.
Lat. 57° 27.02′ N.	Long. 21° 28.72′ E.

Anchorage in outer port road for all the other vessels is allowed in area No. 52, co-ordinates:

Lat. 57° 27.98′ N.	Long. 21° 26.40′ E.
Lat. 57° 26.65′ N.	Long. 21° 24.87′ E.
Lat. 57° 26.05′ N.	Long. 21° 27.10′ E.
Lat. 57° 26.21′ N.	Long. 21° 28.88′ E.

These areas are announced by the U.S.S.R. Notices to Mariners. Depths in the anchorage are from 10m. to 12 m. The bottom is sand; the holding ground is good.

The Master of a vessel has to inform the Port Administration through "Inflot" Agency of the exact position of the anchorage stating the bearing and the distance from the North breakwater lighthouse.

The anchorage in the outer road is not safe during strong Westerly winds therefore vessels are recommended to drift while awaiting entry to the port or to go to sheltered places situated in the areas of the Kolkasrags Point and the Gotland Islands.

MAX. SIZE: *Tankers:* Max. draft 12.45 m.

Cargo vessels: Max. LOA 210 m. – 220 m. Max. draft 11.70 m.

When proceeding along the fairway and passing through the Venta River channel, vessels should have speed not exceeding 5 knots.

TUGS: Use of tugs for tankers, gas-carriers exceeding 60 m. in length, vessels of 70 m. in length and over when mooring and unmooring at berths situated in the Venta River, as well as oil piers, is compulsory.

Normally tugs join vessels within the port area.

BERTHING: Berthing of vessels and shifting berths is carried out round the clock. Vessels having length over 155 m. and draft over 7.6 m. when approaching the port through the Venta River Channel are allowed to enter or leave the port, moor and shift berth during the day only and when winds do not exceed Force 5.

Cargo berths with depths alongside up to 10 m. situated on the right bank of the Venta River are equipped for handling general, bulk cargoes and metals. Berths of the Avantport are equipped for handling crude oil and oil products. They can receive vessels with the maximum permitted draft of up to 12.45 m. (at the datum at Kronshtadt). There are covered warehouses and open concrete floor sheds in the port.

There are enclosed warehouses and open concrete floor sheds. This is also a potash handling plant.

Quays are equipped with electric cranes of up to 45 tons capacity. There are floating cranes of up to 100 tons capacity, cargo handling equipment for bulk cargoes and machinery.

Opening and closing of hatches is normally done by the ship's crew. However, this will be done by stevedores at extra charge if requested by Master.

STEVEDORES: Master's and/or shipowner's information of cargo details, stowage – especially for ships with inward general cargoes – is required in proper time. Information has to be addressed to "Inflot" Agency Ventspils.

ETA notification 72, 48, 24 and 4 hours before arrival to "Inflot" Ventspils (Agents).

MEDICAL: Hospital facilities available. Advance notice desirable however, depends on kind of sickness. Master should place orders concerning inoculations, vaccination, fumigation, hospitalisation and etc., with representative of Sanitary Inspection. Veterinary Certificate is compulsory for all kinds of animals and cargoes of animal origin; phyto-certificate is compulsory for cargoes of vegetable origin.

TANKERS: All grades oil loaded by shore loading hoses in diameter of 200, 250, 280, 300 and 350 mm. Total 6 berths all fitted with deballasting installations for slops. Max. draft from 10.20 m. up to 12.45 m.

There are 2 new berths for gas/chemical carriers, max. draft Berth No. 34 – 8.2 m. and Berth No. 36 – 12.45 m.

GANGWAY/DECK WATCHMEN: Service of watchmen recommended however, Master's option.

CERTIFICATES: Required to be on board:

Crew List.
International Tonnage.
International Class.
Load-line.
Safety Equipment.
International Radio.
Derat Certificate.
Certificate of Financial Security in respect of civil liability for oil pollution damage, 1969.

DENSITY: In port about 1002.
FRESH WATER: Fresh water available, delivered from shore or by barge (capacity 450 tons).
FUEL: All grades available subject to prior inquiry. Bunkers can be taken from the oil jetty or supplied by lighters.
CUSTOMS ALLOWANCES: There is no restriction for crew use and bond locker is not sealed.
IDENTIFICATION CARDS: Seaman's Book required.
CONSULS: No Consulates.
REPAIRS: Small deck and engine repairs, diving inspections can be carried out.
DRY DOCKS: None.
REPATRIATION: Repatriation of crew left behind by a vessel in hospital is arranged by other tramp-ships with Master's consent. No facilities exist for effecting crew changes.
TIME: From 1st April till 1st October – GMT plus 2 hours. From 1st October till 1st April – GMT plus 3 hours.
HOLIDAYS: 1st January (New Year's Day); 8th March (International Women's Day); 1st and 2nd May (May Day Holidays); 9th May (Victory Day); 7th and 8th November (The Great October Socialist Revolution Day); 7th October (The U.S.S.R. Constitution Day). Cargo work never stopped on holidays.
POLICE/AMBULANCE/FIRE: If required have to be called through Maritime Agency "Inflot".
TELEPHONES: No arrangements exist for placing telephones on board.
SERVICES AVAILABLE: Tankers' deballasting installation for slops; service for radar and VHF repairs; compass adjusting; workshop for ordinary deck and engine repairs; ship chandler service; bunker, water, garbage removal, bilge cleaning, surveyors.
SHORE LEAVE: Crew members allowed ashore.

SHIPMASTER'S REPORT: 1976.
Anchorages:
Tanker: bounded by positions,

Lat. 57° 28.4′ N.	Long. 21° 27.3′ E.
Lat. 57° 29.7′ N.	Long. 21° 29.2′ E.
Lat. 57° 28.2′ N.	Long. 21° 31.2′ E.
Lat. 57° 27.2′ N.	Long. 21° 29.3′ E.

Cargo:

Lat. 57° 25.3′ N.	Long. 21° 26.8′ E.
Lat. 57° 28.0′ N.	Long. 21° 26.4′ E.
Lat. 57° 26.1′ N.	Long. 21° 29.0′ E.
Lat. 57° 26.7′ N.	Long. 21° 25.8′ E.

Buoyage:
No. 2 B.W. Conical Fl. 5 sec. (Approx. position Lat. 57° 25.7′ N. Long. 21° 29.85′ E. to be expunged.
New Buoys:
No. 2 Fl.W. 5 sec. in position Lat. 57° 25.6′ N., Long. 21° 28.3′ E.
No. 3 Fl.W. 3 sec. in position Lat. 57° 24.1′ N., Long. 21° 30.65′ E.
No. 4 Fl.R. 3 sec. in position Lat. 57° 25.16′ N., Long. 21° 30.82′ E.
In harbour, No. 4 Fl.R. Con. and Red Conical Buoy about 2 cables E×S to be expunged.
Oil Piers: 3 in number.
No. 1 pier, berths Nos. 28 and 29 – light outer end Qk. Fl.W.
No. 2 pier, berths Nos. 30 and 31 – light outer end Qk. Fl.Or.
No. 3 pier, berths Nos. 32 and 33 – light outer end Qk. Fl. Blue.

Depths alongside:		
	Berth 28:	10.10 m.
	Berth 29:	10.00 m.
	Berths 30/33:	12.00 m.

After dredging in channel is completed to 12.5 m., depth at berths 32 and 33 will be 12.5 m.
Oil Pier No. 3 (Bearings, distances and positions here not confirmed). Existing dock face continued 24.5° approx. 1,100 ft. to join Northern breakwater.
No. 3 runs 283° for 1,100 ft. from position 24.5°, 2,000 ft. from Fl. R.Lt. in Lat. 57° 01′ N., Long. 21° 33.5′ E.
Northern Breakwater: Inner extension from position Lat. 57° 24.69′ N., Long. 21° 32.2′ E. 012° for 890 ft. to join main breakwater.
Under Construction: 3 berths for Petro-chemical industry along inner face of Northern breakwater.
Small harbour beside pilot station, Southern side, completed and in use by small craft and fishing vessels. Small repairs in operation. Depth said to be 3.5 m. – 4 m.
Port operation in foggy weather said to be controlled by radio and millimetre (aircraft) type radar installation, one scanner of which is situated on tower near root of Southern breakwater.
Tugs: Alleged that 5 are available; 1 icebreaker type of 2,500 h.p., 2 medium size, and 2 small, 1 at least of which was propelled by Voith-Schnieder gear of about 750 h.p.
Pilots: To call Pilots, use Channel 16 and call Ventspils Radio who make arrangements with Harbour Office and Agents (Inflot).
During time vessel de-ballasting and loading; any problems can be resolved by call to Agents through Ventspils Radio.
Regulations: Fire Officers demand that suitable bonding wire be fitted (supplied by ship). No shore facility available.
Facilities: No. 1 pier has (building) tower crane for handling hoses. Nos. 2 and 3 berths are fitted with loading arms hoses and towers. Fresh water available. Bunker fuel available but not necessarily marine diesel.
Cargo Berths: There are believed to be 8 dry cargo berths, within the river port area, some with cranes, suitable for general cargo, together with storage buildings. Refrigerated/chilled cargoes have been handled regularly.
Max. Size: Pilot stated that tankers of up to 60,000 tonnes displacement were possible at present, and that after dredging it should be possible to take up to 100,000 tonnes displacement.
To contact Agents, call Ventspils Radio on Channel 27 and they make arrangements.

SHIPMASTER'S REPORT: May 1980.
Vessel: LPG carrier of 10,000 g.r.t.
Landfall/Approaches to Pilotage: Approaches clearly defined by radar, Decca coverage good. Vessels anchored in dry cargo anchorage provide a good guide. Two approach channels with tankers generally using the Southern channel. Pilot boarded close to Buoy A (fairway buoy for South channel).
Pilotage: ETA notification 96, 48, 24 and 4 hours before arrival to "Inflot Ventspils" (Agents), thence further communication by VHF calling Channel 16, then working Channel 9. Answered to "Ventspils Pilots" and not "Nadzor" as stated in Radio Signals Volume 6. Pilots will advise instructions, in this case, to proceed to Buoy A (fairway buoy for South approach channel). Pilot cutter/launch (speed 6 knots) proceeds from inner harbour. Pilot ladder on appropriate side for weather conditions rigged 1 m. above water. Pilotage time to berth approximately 40 minutes. On this visit, despite Pilot boarding at Buoy A, vessel entered using North channel.
Upon departure, Pilot arranged by Agent upon completion of documentation. Southerly channel used for departure with Pilot disembarking mid-channel.
NOTE: LPG vessels are not permitted to enter or leave port during the hours of darkness.
Anchorage: Tanker anchorage lies to N.E. of Northerly channel.
Tugs:
a. Inbound: Tugs join vessel close to breakwater entrance. Three tugs used for berthing (standard port cost for tugs whatever the number used – five tugs available). Made fast on port bow and quarter using ship's lines with one tug pushing. Vessel berths port side alongside – strong Northerly winds (off-shore) on this visit.
b. Outbound: Tugs join vessel at berth – one tug made fast on starboard bow using ship's line. Second tug in attendance. Tugs gone and clear before clearing breakwater.
Berth: (Ammonia only – see Plan Book). Modern fendered concrete quayside with depth alongside 13 m. to 14 m. No tidal range but atmospheric conditions affect Baltic water level – density alongside 1001 g/ml.
Vessel generally berths port side alongside. Berth equipped with 12 in. 150 ASA liquid and vapour chicksans. Ship's reducer used on vapour manifold. Ship's gangway used.
Cargo: Anhydrous ammonia received at −33° Celcius. Loading rate agreed before commencing loading (in this case requested 650 t.p.h.) and increased to over 1,000 t.p.h. after officially requesting for increased rate through Inflot agency. The rate agreed prior to loading is expected to be maintained throughout loading with usual reductions for topping off as required. Average rate for 10,230 tonnes loaded was 714 t.p.h.
Vapour return line connected but not required or used – high back pressure on line. Documentation slow – cargo documentation cannot commence until ship cleared and chicksans not connected until cargo documentation completed. Shippers "Sojuzchimexport" require quality certificate for cargo heel onboard – accepted ship's declaration of purity. Also require cargo plan showing 100% tank volume for each tank – to prevent overloading. Bill of Lading quantity = cargo as measured onboard by shore surveyor (accompanied by interpreter).
Bunkers/Water/Chandler: None required but all available.
Agents: Inflot, Ventspils. Tel. Nos. 61213, 51233, 51350. Cable address: "Inflot Ventspils". Telex No.: 122 INF VNT SU.
Efficient and friendly service. All representatives speak perfect English and very helpful in dealing with Authorities. Inflot require ship information, cable 24 hours prior to arrival with following information:
a. Ship's name, signal letters, nationality.
b. Last port.
c. Draft forward and aft, length, gross and nett tonnage.
d. Cargo requirements.
e. Owner's name and telex number.
f. Bunkers, water and provisions required.
g. Number of crew and health declaration.
h. ETA at pilot station.
If Agents are required in port, call "Ventspils Radio" on Channel 16 and ask for connection to Inflot Agency.
Authorities:
Customs: Usual Bond Declaration required but unconcerned with bonded items onboard and bond locker not sealed in port.
Currency Declaration most important. Customs are not interested in personal cash holdings but must have a "TOTAL Cash Onboard Declaration" and the currencies involved. This total to include personal cash, bar cash, safe cash, etc.
Persons going ashore MUST obtain receipts for all expenditure which are then compared with the total declaration prior to departure.
Immigration: Usual Crew Lists required plus Discharge Books or Passports of all onboard. These are taken ashore, stamped and returned onboard. Persons going ashore will then be required to exchange Discharge Book for shore pass with guard at bottom of gangway. Prior to departure, all personnel must report to Immigration onboard for an identification check.
There is a strict CURFEW after 2400 hrs. and all personnel must be onboard before that time.
Port Health: Doctor boarded on arrival but formality only. Cursory inspection of storerooms only.
General: Time in port was 26 hours 48 minutes. Time loading was 14 hours 20 minutes (documentation 10 hours). Total disbursement for visit was U.S.$9,630.

SHIPMASTER'S REPORT: November 1980.
Pilotage: Pilotage is compulsory. 12 Pilots available. Pilot boards at fairway buoy at the beginning of the old entrance channel and disembarks at Buoy No. "A" in the new deep water channel. Docking and undocking without the aid of a Pilot is not allowed.

Restrictions: Vessels can enter and leave port during hours of darkness at any stage of the tide, however, vessels are not allowed to manoeuvre in fog or at times when the wind is strong. Shore radar is used at night and in fog for berthing.
Max. Draft: Vessels max. draft on sailing was 11.6 m. (FW).
Tugs: 4 tugs available.
Radio: Ventspils Radio, call sign "UNI", on 500, 2182 and VHF Channel 16.
VHF: Pilot uses Channels 9 and 13 after initial call on Channel 16. Port Authority and Agent on Channels 16 and 27.
Documents: As per "Guide to Port Entry".
Facilities: The following are available: Fresh water, fresh provisions, small repairs, small machine shop, airport (with connection to Riga only), Lloyd's Surveyor, Salvage Surveyor (Lloyd's), laundry service, bunker fuel oil, diesel oil, small stock of lubricating oils, Doctor and hospital, groceries and meats, slop tanks – there is no slop storage – slops are segregated during discharge.
Tankers: There are 6 berths at the oil terminal at 3 piers (Berth Nos. 28 – 33).

Vessel berthed at No. 31. Ballast is required when arriving or sailing in a light condition (clean ballast may be discharged into the sea with permission from shore).

The tanker terminal exports crude oil, nafta and gas oil but no petrol. Fuel oil is exported from Klaipeda, 100 miles to the South. Ship's hoses are used. 2×12 in. lines are connected direct to the ship's manifold. No shore booster pump available. Max. pressure 5 kgs.
General Cargo Facilities: There are facilities for handling bulk cargo. Large number of cranes available.

Ro-Ro facilities are not yet ready. There is a floating crane with a 100 ton capacity. There is equipment for handling 20 ft. containers only, however, there is very little storage space available for containers.
Fuel: There are 2 barges, capacity 400 tons each for fuel and diesel oil.
Fresh Water: There is 1 water barge, capacity 100 tons.

AUTHORITY: The Port of Ventspils Authority, Dzintaru 22, 229910 Ventspils, U.S.S.R. *Tel:* 60222, 60430. *Contact:* Port Director.

AGENT: The Port of Ventspils Maritime Agency "Inflot". Postal address: 18 Dzintaru Street, Ventspils, U.S.S.R. Cables: "Inflot Ventspils". Tel. 61-213, 60-369, 60-233. Telex: 161822 Infl Su.

VOSTOCHNY: 42.44 N. 133.03 E.

New port being constructed. Log-loading berth understood to be in operation and a chip berth completed. Container berths to be constructed, depths up to 16.5 m. Vessels of 135,000 d.w.t. handled.

New quay for handling grain, cement and sand with automatic pipe loading system in operation. 2 shiploaders for coal, loading rate 3,000 tonnes per hour each.

SHIPMASTER'S REPORT: May 1983
The Port of Vostochny is a relatively new port, and lies in Nakhodka Bay, at the extreme N.E. end in a smaller Bay, known as Vrangel Bay.
Documents:

On Arrival	Prior Departure
5 General Declarations (IMO Form)	1 Cargo Time Sheet
4 Cargo Declarations (IMO Form)	1 General Declaration
2 Stores Lists	Cargo Declaration
2 Crew's Personal Effects Lists	Cargo Manifests,
6 Crew Lists	(Prepared by Agent)
4 Passenger Lists	
2 Money Lists	
2 Marine Declarations of Health	
1 Vaccination List	
1 List of Ports Visited	

Port Authorities board the ship at any time to effect clearance. They use the accommodation ladder. Frequently a moderate swell runs into Nakhodka Bay from the South, making boarding from even quite large launches very difficult. Immigration Authorities inspect all Crew Seamens' Books. Process of clearance takes about 1.5 hours.
Approaches: When about 4 hours from the port call "Nakhodka Port Control", on Channel 16, Working Channel 12. Nakhodka Port Control has the whole of Nakhodka Bay (Amerika Bay on some charts) under radar surveillance. All shipping movement within the Port Limits are controlled by them. They give direct steering and sailing orders over VHF Channel 12 to vessels under way after passing No. 1 Buoy (Lat. 42° 43.3′ N., Long. 132° 56.3′ E.) inward bound, also anchor berth given with bearing and distance from Mys Shvedova Lt. Ho. usually in the Quarantine Anchorage indicated on Chart BA. 3198 and Anchorage No. 3 on Chart BA. 3041 (Nakhodka Bay). Anchorage good in clay and mud in about 19 m. of water. After anchoring, report to Nakhodka Port Control, and revert to listening watch on Channel 16.
Berthing: Vessel proceeded to the Coal Berth at Vostochny under guidance from Nakhodka Port Control. Fairways well defined on BA Chart No. 3041. Pilot meets vessel off the entrance to Vrangel Bay, just after passing No. 2 Buoy. (Lat. 42° 46.0′ N., Long. 133° 00.6′ E.). Pilot normally boards by pilot ladder or accommodation ladder, port side. 2 tugs used for berthing, which is nearly always port side to.

Berth is new and very modern (Japanese construction). Very well fendered with large rubber fenders at regular intervals. Usable length of quay is about 275 m., bollards at regular intervals all the way along the quay. Although two berths are shown on the Coal Jetty on BA Chart No. 3041 (Nos. 49 and 50) only No. 49, is in fact, used. This is because the loaders (two in number) only serve No. 49 Berth. Depth of water alongside reported as 15 m. and 14 m. guaranteed. No restriction on air draft for loaders, ample clearance for vessel of this size (Panamax).

Departure presents few problems, as plenty of room and water immediately off the berth. Two tugs used as for berthing. These tugs are small, and not really big enough for a vessel of this size, and take a long time to get the ship moving off the berth. However, when clear of berth, vessel can be turned short round with engines and also with the aid of the tugs. Immediately vessel is turned and heading outwards Pilot disembarks. Vessel proceeds outwards to fairway buoy, listening out for Nakhodka Port Control on Channel 12 until passing No. 1 Buoy.
Bulk Cargo Facilities: There are 2 large loaders on the Berth, rated at 2,000 tonnes per hour, self trimming. We loaded Soviet bituminous steam coal, SF given as 42, but no real check possible on this figure. Vessel loaded 55,000 tonnes in 32 hours., and would have been even faster, but for plant breakdowns. Shore cargo personnel helpful as possible, but somewhat limited due to language problems. Informed by them that cargo delays are common due to availability of cargo lacking. All coal brought by rail to port from some considerable distance. Draft and deadweight survey carried out by shore foreman and ship's staff. Cargo documentation and port clearance by Authorities takes about 4 hours, from time of finishing loading.
Density: Density range of water from 1025 to 1028.
Regulations: Many regulations are in force as is common with most Russian ports, below are listed some of the most important ones.

1. Soviet currrency must not be brought in or out of the country.
2. No goods may be imported or exported without permission of Customs.
3. No goods may be taken ashore and sold or brought aboard concealed from Customs Control, as this will be construed as smuggling and heavy fines will be imposed.
4. No dumping of rubbish or pollution of any kind may take place into the harbour waters.
5. All moorings to be fitted with rat guards.
6. Only one gangway to the shore. No ladders to be put out on off side, and off side to be lit by lights at night.
7. No boats to be swung out or lowered.
8. No swimming or fishing allowed whilst alongside.
9. Ship's radio station not to be used in port and VHF not to be used for other than official messages with Shore Authorities or Marine Authorities.
10. Radar must not be used alongside. If radars are to have maintenance carried out by ship's staff, Inflot should be contacted for permission to be granted by Shore Authorities.
11. No photography is allowed.
12. No persons other than the ship's crew and fare paying passengers to be on board at any time. All shore personnel coming on board must be vetted by the Authorities.

SHIPMASTER'S REPORT: May 1984.
Port of Nakhodka and Vostochny (English translation of Vostochny is Eastern).
Chart: B.A. Chart No. 3041.
Arrival: Prior arrival Agents will instruct vessel to proceed to position Lat. 42° 27.2′ N., Long. 132° 56.3′ E. and steer a course of 000° true, which is the Southern entrance to Separation Zone. Also Agents require state of crew health.

As vessel passes Buoy No. 1 Master must report same to Nakhodka Port Control on Channel 16 transferring to Channel 12, at which point vessel will be radar controlled to anchorage, Port Control gives vessel course to steer and anchorage position, vessel remains on Channel 12 and instructions passed to vessel regularly. Even to number of cables to anchorage position, at which time vessel is instructed to drop anchor. If berth is available vessel proceeds to Buoy No. 2 as instructed and onto Fairway No. 3 along which the Pilot will board quite close to Entrance Buoys of the Bukhta Vrangelya (Vostochny Port).

Vessel berths port side alongside assisted by 2 tugs, head inwards, pier well fendered with large hard double rubber fenders (size 1 m. long by 0.5 m. deep and high). Normal securing to berth namely 4 lines and 1 spring each end. Rat guards are required and must be fitted prior to Quarantine Clearance.

On berthing 2 guards are placed at bottom of gangway and Agent boards with 2 Quarantine Officers, 2 Customs Officers and 2 Immigration Officers.

The following papers are required and best to give Agent all documents to sort out:

5 copies General Declaration (IMO Form 1).
5 copies Crew List (IMO Form).
3 copies Passenger List ("Nil" returns required if no passengers).
2 copies Vaccination List (Cholera and/or Yellow Fever).
*2 copies Crew Effects Declaration.
*2 copies Crew and Ship's Currency Declaration.
*2 copies List of Cameras with Type and Serial Nos.
2 copies Drugs in Master's Safe.
1 copy Ship's Stores List (Bond, etc.).
1 copy Parcel List ("Nil" return required).
1 copy Delivery Bill of Mail ("Nil" return required).
1 copy Declaration of Arms/Ammunition List ("Nil" return required).
1 copy Maritime Declaration of Health (Japanese form accepted).
4 copies Cargo Declaration (if cargo onboard).

*One of each taken ashore, other copies stamped and retained onboard for clearance check before sailing.

Ensure crew declare all goods, watches, radios, firearms, gold, jewelry, etc.

All Discharge Books checked by Immigration, Customs have random check on cabins. Quarantine only check Derat Certificate and Vaccination List. Note *all* types of "magazines" are forbidden and must be collected and sealed up before clearance.

When all paperwork is completed and Officials leave vessel taking Discharge Books ashore and clearance is given, cargo work can commence after draft survey. Discharge Books are returned to vessel after a few hours and are required to be handed to the gangway guards when any crew go ashore, even to read the draft.

Draft Surveyor checks everything and quite thorough, even with hold cleaning. Once surveyor has completed he arranges cargo operations to commence as per ship's instructions.

Vessel loaded two grades of coal:

1. Partizensky (J-6) 40,000 tonnes.
2. Nerjungrin (SS) 15,000 tonnes.

At consignee's request cargo was loaded with 20,000 along bottom, then 15,000 of SS and complete with 20,000 J-6 on top. Reason being the 15,000 SS was very powdery and mixed would be easier to discharge. This entailed a draft survey at the end of each layer of coal. Loading rate up to 1,200 tonnes/p.h. per loader.

Details of Berth, Loader Etc.:

Berth: A pier built out from shore with length of 400 m. and width 56 m. of which only 340 m. is used for mooring. Depth of water at forward end of vessel 16 m. and at pier end about 18 m. Max. draft allowed 15 m. Cement constructed at pier of 10 cement pontoons driven into sea bed on each side, with horn bollards on top of each pontoon (2 bollards). Then double horizontal rubber fenders on face.

Loader: Two units, travelling type with elevation boom, has outreach from fender face of 28.2 m. and airdraft of 18 m. Telescopic head Spoon or Fast Belt.

Belt Conveyor: Two belts from yard to pier at 180 m. per second.

Stocks: Two yards approx. area each 730 m. by 45 m. and plenty of stockpiles.

Max. Size Allowed: 110,000/120,000 d.w.t. (LOA 314 m., beam 43 m. and draft 15 m.).

Steam Line: On quay for ice melting.

Yearly Production: 5 million tons per year.

Future: Increase production by 5 million tons when other side of pier is developed as presently no loaders, although pier is complete in all respects.

Stowage Factor of Coal: About 42 cu.ft. per ton.

Bunkers: Available ex-coaster.

Fresh Water: Available ex-barge from Nakhodka (very expensive).

Stores: Not available.

Shore Leave: Allowed between 0800 hrs. and 2400 hrs. (Master not restricted). There is nothing to see at Vostochny but 1 hour by car/mini bus to Nakhodka where a Seaman's Mission and export shop are located.

Time: GMT plus 10 hours. Between 1st April and 1st October GMT plus 11 hours.

Radio Station: Nakhodka Radio used. 8510 kHz call sign "UKK3" and 500/435 kHz call sign "UK1" and answered first call. Other frequencies as per Radio Station Signals Vol. 1.

Tugs: Two tugs used of about 1,000 h.p. and 2,000 h.p. (Local Regulations require any vessel berthing to use 2 tugs).

Pilot: 24 hour berthing allowed.

Agents: "Inflot" are available on demand, visit the vessel at least once a day and are very helpful.

Cargo Weights: This is done by electronic weights scale ashore and on draft surveys. Weights in each hatch are not correct, as seen from our Facts Sheet vessel same quantities each run, yet time in each hatch varied from 40 minutes to 90 minutes for same quantity. Final draft survey agreed with ship's figures which were used for Bill of Lading (ship only signs "Mate's Receipt").

Other Berths: Across bay are 3 general cargo berths and 3 container berths with a maximum draft allowed of 9.7 m. Gantries are only suitable for the smaller container vessel of about 1,000 boxes.

Departure: Once cargo completed all paper work done on vessel, Agent attends to cargo papers after which Customs and Immigration board. Immigration check each crew member with Discharge Book photograph, Customs check bond seal and break it. Apart from papers given to Master they require a Cargo Declaration (IMO Form) completed. Ship has to request a Port Clearance, otherwise none is given.

Stevedores: Continuous working of cargo with meal breaks between 0700 – 0800 hrs., 1200 – 1300 hrs., 1900 – 2100 hrs. and 2300 – 2400 hrs.

Sailing: Once vessel clear of berth vessel is swung 90° to port and lined up between Entrance Buoys at which time Pilot disembarks and vessel reports to Nakhodka Port Control who advise course to steer and watch you on radar until passing Buoy No. 1. Then vessel steers 180° until clear of separation scheme.

SHIPMASTER'S REPORT: August 1984.

Vostochny Approach.

B.A. Chart Nos. 2511, 3198, 3041.

The main port of Nakhodka handles all traffic routing inside the bay. Contact Nakhodka Traffic Control on Channel 12 not less than 2 miles prior to arrival Buoy No. 1, Control will give you anchoring position and course to steer. When approaching anchoring position Control gives you run down and distance to go for dropping anchor.

Officials board at anchorage (6 people). When vessel is cleared listen on Channels 16 and 12 for berthing instructions. When berth is free, Control informs you to heave up and proceed towards berth.

Vostochny Pilot (Channel 16) boards at Fairway Buoys off berths. 2 tugs assist berthing. Buoys have no numbers but mark the entance to Vrangelya Bay, where coal berth is situated. We berthed Berth No. 49, port side to. Depth at berth is 16.5 m., max. draft 15 m., airdraft 18.4 m. Max. ships size 260,000 d.w.t. (100,000 tonnes), beam 38 m. Loading rate 3,000 t.p.h. by 2 loading booms. This rate depends on availability of coal. Most of cargo comes from Siberia and requires 10 days passage from mines.

Vostochny Facilities: Fresh water available on jetty, use you own hose and coupling. Fuel and diesel available by barge. Ship chandler if required, also hospital and dental treatment available. Shore leave is by mini-bus or launch to Nakhodka. The mini-bus can only carry 10 people and the journey by launch takes approximately 75 minutes. An International Seaman's Club, souvenir shop and 4 restaurants are available at Nakhodka.

Documents: We made out our own forms which included:

6 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
2 copies Currency List.
2 copies Dangerous Drugs List.
2 copies Passenger List.
2 copies Arms and Ammunition List
6 copies Notice of Readiness.
1 copy Port Health.

Any health forms will do, score out country of origin, they provide you with "Inflot" Agency Information Form.

4 copies General Declaration (IMO Form 1).
2 copies Cargo Declaration (IMO Form 2).

On completion of loading, Officials board for documentation of cargo loaded. When this is finished the Agent arranges for the Pilot via VHF. The Pilot takes vessel out of berth, using 2 tugs. Vessel proceeds, assisted by Port Control towards Buoy No. 1 off Mys. Krylova.

AGENT: See "Nakhodka".

VYBORG: 60.42 N. 28.44 E. (See Plan Book)

For Saimaa Canal see Index.

GENERAL: A Baltic Sea port Vyborg is situated at the head of the Gulf of Vyborg in the N.E. part of the Gulf of Finland.

The port area consists of a harbour protected from the North by the Castle bridge passing over the strait nearby the Castle of Vyborg and by the Smolyanoy point – from the West.

The port is open for navigation all year round (from December till April with icebreaker assistance). Ice in the Gulf of Vyborg begins to form normally about the middle of November. The Gulf usually becomes frozen over by the middle of December and the last ice finally disappears in April.

Whilst tidal range in the Gulf of Vyborg is of small account, considerable changes in the water level may be caused by strong winds (up to 1.6 m.), variation in atmospheric pressure (up to 1 m.), and the seasonal increase of the amount of water brought down from the land. The rise of the water level is usually caused by South, S.W. and sometimes by North winds. The maximum range of the water level in the Gulf is about 2.0 m.

The Vyborg Fairway (least depth 7.3 m.) leads from the entrance to the Gulf of Vyborg across the Transund roadstead up to the entrance of the Inner Vysotsky Roads. The Vyborg Sea Channel (least depth 6.5 m.) leads from the Inner Vysotsky Roads into the port, situated at the head of the Gulf. Both of these and the Fairway and the Channel, are open for navigation any time of day or night.

PORT LIMITS: The sea waters of the port are the fairways and anchorages to the East from 28° 23′ E. and to the North from 60° 34′ N.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilotage in the port area is carried out round the clock. It is compulsory for all types of vessels. Pilots board and disembark vessels in the following places:

1. At the port of Vyborg;
2. At the Reception buoy, 5.1 cables Westward of the Northern point of the Mayachny Island (pilot station of the Vikhrevoy Island);
3. At the Brusnichnoe Lock berth or in the Lock itself.
4. At Kozliny Island (60° 26.7 N., 27° 43.0′ E.) for the vessels proceeding to or from Finland only.

In the case of rough weather when safe boarding or disembarkation of a Pilot at the Reception buoy of the Vikhrevoy Island pilot station is impossible, a vessel, with the Master's consent, may follow a pilot boat, in the wake of it from the Reception buoy up to the Large Transund Roadstead or as the case may be, from the Large Transund Roadstead up to the Reception Buoy.

The radio communication between pilot boat and vessel is effected through VHF radio, Channel 12.

In case the Master of a vessel does not agree to follow a pilot boat, he can:

(a) When approaching the port from the seaward lie at anchor at the Reception buoy area until the weather changes for the better;

(b) When leaving the port for sea, anchor at the Large Transund Roadstead at a place indicated by the Port Administration and wait until Pilot is able to disembark at the Reception buoy area.

Vessels approaching the port from seaward should order a Pilot at the same time as they notify the Port Administration of the time of their arrival at the point of meeting a pilot boat.

ANCHORAGES: There are 5 anchorages at Vyborg Fairway and at Vyborg Sea Channel areas.

Two are situated at the Large Transund Roadstead area, one – at the Small Transund Roadstead, one – S.E. and one – N.W. of the channel. Anchorage positions are shown on the chart.

The holding ground in the anchorages is sand, mud, stone and clay. The depths are from 11 m. to 17 m.

RESTRICTIONS: Vessels are allowed to enter or leave the port when winds do not exceed Force 6. During daytime, when a vessel's length is not more than 125 m. and her draft does not exceed 6.5 m. (at the Kronstadt datum);

At night time, when a vessel's length is not more than 105 m. and her draft does not exceed 6.1 m. (at the Kronstadt datum).

Before entering or leaving the port Masters of vessels having length and draft exceeding those indicated above must obtain the Harbour Master's permission.

HEALTH: International code quarantine signals to be shown on arrival. Vessels placed in quarantine will be instructed where to anchor by the pilot station.

RADIO: Radio contact can be established through the Vyborg Radio port radio station operating 24 hours daily on the following frequencies:

Call sign	*Frequencies (kHz) working*	*calling*	*Type of trans- mission*	*Time of work*
UNN	500	500	A1A	H24
"Vyborg Radio"	156.8*(16)	156.8*(16)	F3E	H24
(Harbour Master)	156.6*(12)	156.6*(12)	F3E	H24
"Ostrov Vikhrevoy"	156.8*(16)	156.8*(16)	F3E	H24
(Pilot Station)	156.6*(12)	156.6*(12)	F3E	H24
"Zaliv Novinskogo"	156.8*(16)	156.8*(16)	F3E	H24
(Pilot Station)	156.6*(12)	156.6*(12)	F3E	H24
"Vyborg Inflot"	156.8*(16)	156.8*(16)	F3E	H24
(Inflot Shipping Agency)	161.8*(24)	157.2*(24)	F3E	H24

*Frequencies are given in MHz.

Every vessel whilst proceeding along the Fairways and the Channel must have VHF radio-telephone in good working order, being able to ensure a reliable radio contact with the port of Vyborg and between vessels. If a vessel is not equipped with VHF radio, a Master can hire a VHF portable radio-set from a pilot station (via Pilot) for a fixed charge.

TUGS: Available, ordered through "Inflot". Compulsory for vessels over 80 m. LOA.

BERTHING: Can only be effected with Pilot on board. Berths of the port with depths alongside of up to 7.8 m. are equipped to handle general and bulk cargoes, timber, etc., as well as passenger traffic. There are enclosed warehouses and open concrete floor sheds.

Berths are equipped with electric cranes of up to 20 tons capacity. There are floating cranes of up to 15 tons capacity and other cargo-handling equipment and machinery.

Opening and closing of hatches is usually done by the ship's crew, but if required it can be done by port labour for vessel's account.

MEDICAL: "Inflot" to be advised in advance if any medical attention required.

DENSITY: Salinity 5%.

FRESH WATER: Available. Can be supplied by pipe-lines at all berths or delivered by barges.

FUEL: Available by barge only.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Usually opened and closed by crew. Can be operated by stevedores on request.

CUSTOMS ALLOWANCES: No control on board the vessel. All items taken off vessel subject to Customs control.

REPAIRS: Minor repairs can be effected.

SURVEYORS: Surveyors and Cargo Inspectors may be ordered through "Inflot" Agency or through Cargo Receivers' Agents V/O "Soyuzvneshtrans" (telex 121 541).

TIME: GMT plus 3 hours from 1st October until 31st March, GMT plus 4 hours from 1st April until 30th September.

HOLIDAYS: Cargo operations can be carried out on all holidays.

TELEPHONE: Connection to vessels is not possible.

SHORE LEAVE: Permitted subject to police control.

BANKS: Vneshtorgbank in Leningrad.

EMERGENCY CO-ORDINATION CENTRE: Salvage Division of the Baltic Steamship Co., Leningrad. Tel: 259-03-55, 216-99-65. Telex: 121 501.

STORING: Under Customs control from trucks alongside at the berth. Bunkers from a tanker or from trucks.

DEVELOPMENTS: Three berths at Vysotsk of total length of 360 m. and draft 7.5 m. are under construction.

Dredging and deepening to take place to allow vessels of 12,000 d.w.t. to enter.

AUTHORITY: The Port of Vyborg Authority, Ulitsa Yuzhny Val 1, 188900 Vyborg, U.S.S.R. *Tel:* 24750, 99677. Harbour Master *Tel:* 20477, 99650. *Contact:* Manager of Vyborg Sea Port.

AGENT: The Port of Vyborg Maritime Agency "Inflot". Postal address: Inflot, PO Box 40, Vyborg, U.S.S.R. Cables "Inflot Vyborg". Tel: 21400, 21735, 24818. Telex: 121521.

YALTA: 44.30 N. 34.12 E. (See Plan Book)

GENERAL: An ice-free Black Sea passenger and commercial port, Yalta is situated at the head of Yalta Bay and on the Southern coast of the Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in the harbour are up to 10 m.

Yalta is mainly a passenger port, but it is equipped to handle dry cargo vessels.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Pilot meets vessel in the Outer Roads, at a distance of 1.6 miles S.E. of Yalta Lighthouse.

ANCHORAGES: The port Outer Roads are situated in Yalta Bay:

E.S.E. 6 cables off the head of the mole with depth of about 30 m. for large vessels and E.N.E. with depths, about 10 m. for small vessels (tugs, boats, etc.).

They are open to winds blowing between E.N.E. and S.W. At times vessels may be turned broadside to waves caused by Southerly winds.

The bottom is mud and sand.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night. Vessels entering or leaving the port must have keel clearance of not less than 0.6 m.

MAX. SIZE: Permissible draft is 9.0 m., length 215 m.

RADIO: Ship-shore radio contact can be established through the port radio station Yalta Radio operating 24 hours a day on the following frequencies:

Call sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans- mission*	*Time of Work*
UZD-9	500	500	A1A	H24
"Yalta Radio"	2182	2182	H3E	H24
"Yalta 2"	156.8*(16)	156.8*(16)	F3E	H24
(CPR)**	161.9*(26)	161.9*(26)	F3E	H24

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

TUGS: Tug assistance for mooring is compulsory. Masters of vessels entering the port must order at least 1 tug when mooring.

Masters of deep-drafted vessels must order a tug-boat when unmooring from Berth Nos. 1 – 5 if it is impossible to leave berth by drifting with the assistance of off-shore blowing wind.

BERTHING: Cranes of up to 6 tons capacity are operated along cargo quays. Depth alongside 6.5 m.

Handling of cargo at the passenger terminal is usually done by ship's cargo gear.

FUEL: Not available.

FRESH WATER: Can be supplied by pipe-lines at all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

AUTHORITY: The Port of Yalta Authority, 5 President F.D. Roosevelt Street, Port of Yalta, U.S.S.R. *Tel:* 32-42-42. *Telex:* 185. *Contact* General Manager.

AGENT: A branch of the Port of Odessa Main Maritime Agency "Inflot" at the Port of Yalta. Postal address: 5 President F. D. Roosevelt Street, 334200 Port of Yalta, U.S.S.R. Cables: "Inflot Yalta". Tel. 32-82-89. Telex: See "Odessa".

YUZHNYY (Grigorevsky): 46.39 N. 30.55 E. (See Plan Book)

PORT LIMITS: The water area of the port is the waters of Adzhalykskiy Liman and the sea area bounded by the arc of a circle with a radius of 2 miles from the coast radar station. (46° 36.04′ N., 31° 01′ 25″ E.) and anchorages No. 90, 91 and 92 on the Charts.

PILOTAGE: In order to reach the port of Yuzhnyy vessel first has to proceed to position Lat. 46° 08′ N., Long. 31° 06′ E. (near port Ilyichevsk), one hour before arrival at abovementioned position Master should communicate with "Port Control Ilyichevsk, on channel 16 or on R/T 2535 kHz and then follow the instructions of "Port Control" as further navigation is controlled by shore radar.

Gas-carriers and chemical-carriers shall follow a pilot boat when proceeding to and from the port. Master shall order a Pilot through the Port of Ilichevsk 48 hours before and confirm the order 6 hours prior to approaching the Port of Yuzhny.

The port is equipped by an automated vessels' movement control system (VMCS).

ANCHORAGES: It is prohibited for ships to anchor in the inner roadstead. Ships proceeding into Port Yuzhnyy wait in the anchorage for the port of Odessa. (Lat. 46° 29′ N., Long. 30° 51′ E.)

Anchorage Nos. 90 and 91: For gas carrying ships and are 3.4 miles S.S.W. and 1.7 miles South of the West entrance point of Adzhalykskiy Liman. The depth in anchorage No. 90 is 14 m. to 21 m., and in anchorage No. 91, 19 m. to 21 m. The seabed is sand, mud and shells.

The limits of the anchorages are shown on the charts.

RESTRICTIONS: The following vessels are allowed to enter port when conditions are as follows:

Gas and chemical carriers not over 150 m. in length are allowed to enter and leave the port in conditions of visibility of not less than 2 miles.

Vessels up to 180 m. in length – when conditions of visibility are not less than 3 miles.

Vessels having length over 180 m. – when the port's leading marks are visible from the crossing of the RK-1 and the imaginary line of the entering leading marks (bearing 13° – 193°).

MAX. SIZE: Ships up to 280 m. LOA 12 m. draft for gas- and chemical-carriers. 13 m. draft for other vessels.

HEALTH: The legislation of the USSR on protection of the surroundings and "Compulsory Rules of the port of Yuzhnyy" (now available only in Russian) to apply.

Prior to arrival Master should send cable to INFLOT Yuzhnyy advising last port of call, place drinking/ballast water taken, whether vessel is equipped with sewage tanks or sewage purifying system. Any infectious diseases among the crew during the voyage.

MEDICAL: Port surgery is open round the clock. Dentist and General Practitioner available from 0900 hrs. to 1500 hrs. except weekends holidays.

Other specialists available at Odessa.

RADIO: All cables to be sent through Odessa Radio.

VHF: Radio communication can be established through the port radio station "Yuzhnyy-Radio".

Call sign	*Frequencies (MHz) working*	*calling*	*Type of trans- mission*	*Time of work*
"Yuzhnyy Radio-5"	156.8(16)	156.8(16)	F3E	H24
(Port Controller)	156.725(74)	156.725(74)	F3E	H24
"Yuzhnyy Radio-2"	156.8(16)	156.8(16)	F3E	H24
(Harbour Master)	156.550(11)	156.550(11)	F3E	H24
"Yuzhnyy Radio-1"	156.8(16)	156.8(16)	F3E	H24
(Vessels' movement control post)	156.475(69)	156.475(69)	F3E	H24

RADAR: Vessels are piloted by Shore Radio In and Out.

TUGS: The use of tugs is compulsory when mooring/unmooring. The number of tugs and their horse-power is determined by the Pilot with Master's consent, depending on weather conditions, tonnage and type of vessel. 3 tug-boats must be used during gas-carrier's mooring/unmooring if over 35,000 d.w.t.

BERTHING: On the West coast of Adzhalykskiy Liman quay Nos. 1, 2 and 3 have been built, depth up to 14 m. The general length of the quays are about 600 m. Quay No. 3 is for loading liquid ammonia and pumping super-phosphorous acid.

A quay for auxiliary ships has been built on the North side of the East entrance point of the inlet. The length of the quay is 155 m. and the depth alongside it is 6.4 m.

FRESH WATER: Potable water available from berth and by barge.
FUEL: Delivered by barge. Longest possible notice is desirable.
REPATRIATION: In case of illness only.
AIRPORT: At Odessa.
TIME: Local time is GMT plus 3 hours. Summertime (GMT plus 4 hours) is used from the 1st April to 30th September.
HOLIDAYS: 1st January, 8th March, 1st, 2nd, 9th May, 7th October, 7th November.
SHORE LEAVE: Restricted for all crew members (except Master) till midnight. Shore passes are valid for port Yuzhnyy area only. For trips to Odessa special permission is required.
POLICE/AMBULANCE/FIRE: Through Agent.
TELEPHONES: For gas-carriers only.

GENERAL: Port Yuzhnyy is in Adzhalykskiy Liman, and is 4.2 miles E.N.E. of Mys. Dofinovskiy. At the present time the first stage of the port has been built on the West coast of the inlet. Three quays have been constructed. Further work is being carried out in the port with the construction of quays on the East coast of the inlet.

The water area of the port opposite the constructed quays has been deepened to 13.5 m.

From seaward an approach channel, 1.6 miles long has been cut through. Leading light beacons lead along it. The least depth in the channel is 12.5 m.

The entrance to the port is protected by 2 moles: The Western about 400 m. long and the Eastern about 540 m. long. The moles are 6 m. wide.

Areas with special navigation systems: Off the coast there are areas in which navigation is temporarily prohibited; an area dangerous for navigation; area No. 185, prohibited for anchoring and fishing, and area No. 14 for bombing.

The limits of the areas are shown on charts.

Mys. Dofinovskiy: (Lat. 46° 34′ N., Long. 30° 55′ E.) lies 4.3 miles E.N.E. of Mys. Severnyy Odesskiy. Mys. Dofinovskiy protrudes insignificantly into the sea. Four cables West of the headland stretches the village of Novodofinovka, in which there are conspicuous white buildings.

Spoil Grounds: 1.7 and 2.5 miles East of Mys. Dofinovskiy a former spoil ground and a spoil ground are situated respectively. In these areas depths may be less than shown on charts.

A wreck with a depth 9.8 m. over it is situated 2.7 miles E.S.E. of Mys. Dofinovskiy.

A light buoy marks the wreck with a depth of 9.6 m. over it.

Banks with depths of 7.6, 7.2, 8.4 and 9.4 m. are situated respectively 3.5, 3.8, 3.6, and 3.7 miles E.S.E. of Mys Dofinovskiy. They are marked by light buoys.

A bank with a depth of 9 m. is situated 3.3 miles E.S.E. of Mys. Dofinovskiy.

Conspicuous Points: On the West coast of the entrance to the inlet in the village of Grigor'yevka is a conspicuous smoke chimney, and on the West coast of the inlet opposite the quays can be seen large metal reservoirs and towers.

Navigational Aids: The entrance to the channel and its edges are marked by light buoys. On the moles stand lights and beacons; on the East coast of the inlet there are leading light beacons.

Station: On the East entrance point to Adzhalykskiy Liman stands a coastal radar station. Radar pilotage is carried out under the direction of a Pilot. The pilotage is of a consultative nature. Responsibility for manoeuvres, fulfilling requirements of MPPSS-72 (International Regulations for Prevention of Collisions at Sea) and the navigational regulations of the port, rests with the Master of the vessel.

There is a signal post on the building of the coastal radar station.

Caution: Bearing in mind the possibility of the destruction of the edges of the approach channel, depths in it may be less than shown on charts.

Underwater Pipe-line: Runs in a S.W. direction from the village of Grigor'yevska. The position of the pipe-line is shown on charts.

Roadsteads: There are 2 roadsteads in Port Yuzhnyy: outer and inner. The outer roadstead is situated in the approaches to Adzhalykskiy Liman. The seaward limits of the roadstead are coincidental with the outer limits of the port. The depths in the South part of the outer roadstead are up to 22 m. The inner roadstead occupies the water area of the South part of Adzhalykskiy Liman opposite the quays.

Grigor'yevska Light Beacon: Stands 3.8 miles E.N.E. of Mys. Dofinovskiy. Appearance of the beacon: white round concrete tower on the upper part of which stands a black cylinder, the lower part of the cylinder becomes a truncated cone. Height of the beacon is 14.8 m.: height of the light is 60.1 m.

Vkhodnoy Leading Light Beacons: Stands on the East coast of Adzhalykskiy Liman and lead along the approach channel to Port Yuzhnyy. Its direction is 193° – 013°.

The front beacon stands 2.7 miles N.N.E. of the entrance to the inlet. Appearance of the beacon: 4-sided metal framework tower on which has been erected a black rectangular target with a white vertical stripe in the centre. The height of the beacon is 17 m.; height of the light is 47 m.

The rear beacon stands 6 cables from the front one. Appearance of the beacon: 4-sided metal framework tower, on which has been erected a black rectangular target with a white vertical stripe in the middle. The height of the beacon is 29 m.; height of the light is 69 m.

REGULATIONS: The following are some of the port regulations. The numerals have no significant meaning.

1. Gas carrying ships proceed into port and leave it in company with a fire tug, which goes ahead of the gas carrying ship at 8 – 10 cables and will notify on VHF radio all ships of the necessary measures and precautions to be taken.

2. Requests for pilotage and tugs for mooring ships at the quays are made to the Port Director of Odessa not later than 48 hours before reaching the outer roadstead of the Port of Odessa, and requests for an accompanying fire tug, not later than 24 hours before.

3. In the port there is a control office for regulating ship movements. Ships entering the port, request permission for entry 2 hours before, and ships leaving the port, 30 minutes before.

5. Pilotage for all foreign ships is obligatory.

6. Pilotage for ships into Port Yuzhnyy begins at the anchorage (Lat. 46° 29′ N., Long. 30° 51′ E.) of Port Odessa.

7. Pilotage into Port Yuzhnyy is carried out only in daylight and when visibility is not less than 4 miles.

8. When a gas carrying ship is entering or leaving the port the entry or exit of other ships is prohibited.

(a.) 2 hours before entering or leaving the port the Master of a gas carrying ship must inform all ships on VHF radio on Channel 16 of the route he will be following. With the arrival on board of the Pilot such information will be given every 15 minutes and if the circumstances require it, more often.

(b.) The mooring of any kind of floating object to the side of a gas carrier while it is at quay No. 3 is prohibited.

9. The max. draft for ships proceeding into Port Yuzhnyy is 12.0 m.

10. The max. speed for ships in the channel is 6 knots, but in the inner roadstead it is 4 knots.

11. The movement of ships in the channel is only in one direction.

12. The mooring of gas carrying vessels and vessels carrying chemicals is carried out with the aid of not less than 3 tugs, the power of 2 of which must be 882 kV (1,200 l.s.) and one 1,692 kV (2,300 l.s.). Leaving the mooring is carried out with the aid of not less than 2 tugs of which one has a power of 1,692 kV (2,300 l.s.) and the other 882 kV (1,200 l.s.) The wind speed when mooring and leaving moorings must not exceed 7.0 m./sec.

The mooring of gas carriers with a length of more than 180 m. is carried out with the aid of 4 tugs; the power of each of them must not be less than 882 kV (1,200 l.s.). Unberthing will be carried out with not less than 3 tugs with the same power. The speed of the wind during mooring and leaving moorings must not exceed 10.0 m./sec.

13. Communication between tugs and ships will be carried out on VHF radio on Channel 6.

14. Communication with ships is carried out on VHF radio on Channel 11, call on Channel 16. The VHF call sign for Port Yuzhnyy is Port Control.

15. During the mooring and un-mooring of gas carriers from the quays, a representative of the Odessa Port Factory, military guard, office of the Harbour Master and also an inspector of the port will be present.

16. Mooring at the quay, moving on a quay or leaving the quay are to be carried out under the directions of a Pilot.

17. When the speed of the wind is above 12 m./sec., the moving of gas carriers along the quay is prohibited.

18. Navigation of ships along the channel, of not more than 20,000 tons displacement is permitted without tugs when the wind speed is less than 12 m./sec. and the cross current has a speed not more than 0.5 m./sec.

Entry to the channel when visibility is less than 2 miles is prohibited.

When there is a strong cross current or current along the channel, tugs will lead ships into the approach channel.

The mooring of ships at the quay will be carried out in the following manner, after the tugs have turned the bows towards the exit and parallel to the quay at a distance of 80 m. – 100 m. from the quay, the tugs, maintained the plane of the ship parallel to the quay, and will move the ship towards the quay. The speed of approach must not exceed 10 cm./sec.

The ship moorings will be carried ashore by launches. From the bows and stern 2 nylon mooring ropes of not less than 200 mm. (8 in. circumference) are to be used.

19. The main engines of gas carriers must be in constant readiness to move the ship during the whole period in the port.

When gas carriers are entering the port and also when leaving it, all other ships must observe precautions and not hinder its movement or its chosen route. These ships must not close a gas carrier within a distance of 10 cables.

The fire fighting tug on duty keeps a round the clock watch on VHF radio Channel 16.

The use of steel moorings on gas carriers is prohibited.

The Harbour Master of Port Yuzhnyy has the right to depart from the present position on questions connected with the safety of mariners.

Lack of knowledge of the requirements of the present temporary obligatory regulations established for the port will not absolve the Master of a vessel from responsibility for non-observance of these regulations.

SHIPMASTER'S REPORT: September 1979.
Vessel: 32,000 g.r.t. LPG Carrier.
General: This port is situated on the Western bank of what was once Lake Ajalik, about 0.5 miles from the entrance to the bay. The port has been created by dredging the barrier that separated the lake from Odessa Bay. On BA. chart 2212 this entrance is situated about Lat. 46° 35.6′ N., Long. 31° 00.4′ E. Breakwaters of prefabricated concrete sections extend about 500 m. into the bay, and the approach channel is marked by conical buoys and pillar buoys for a distance of about 2.5 miles beyond this. The approach channel lies on an axis of about 010°T – 190°T. Depth in this channel were not less than 16 m. by ship's echo sounder, both on entering and leaving.

The small town of Grigor'yevska is marked on BA. 2212, Lake Ajalik is not marked on this chart.

The port has been created to serve the massive and newly constructed chemical plant on the Western shore of the lake. At the time of this visit it consisted of dry bulk handling berths of about 700 m. in length, and a liquid handling facility for the discharge of superphosphoric acid and the export of anhydrous ammonia. The liquid handling berth lies to the North of the dry berths, about 0.8 miles from the breakwaters.

There are plans to create dry cargo berths on the Eastern shores of the lake, immediately inside the entrance. Some work is already in progress.

Vessels of up to 12 m. draft can be handled and there are 3 medium sized tugs available.

The chemical plant is not yet fully completed, a second stage has only been operating since the beginning of this year. In 1980 there are plans to export 2 million tons of ammonia.

Agents: "Inflot" may be reached on Channel 16, with a working Channel 8 available. Reception was not too good.

Berthing: Vessel berthed starboard side alongside, swinging immediately South of the berth with the aid of 2 tugs (the third was late in arriving) moored fore and aft, port side.

The berth itself consists of a concrete jetty projecting from the main jetty, some 110 m. in length and about 40 m. proud of the main jetty.

There are 5 chicksans, 2 for the discharge of acid, and a group of 3, 2 liquid 1 vapour return, for the loading of ammonia. The chicksans have hydraulic couplings and appear to be of an awkward size, about 325 to 330 mm.

On this visit there was only 1 liquid line available for use together with the vapour return line. Claimed loading rate is said to be some 2,000 tonnes p.h. With the 2 liquid lines in use, this would indeed be possible. Our overall load rate was 1,115 t.p.h., including initial and final slow rates. During loading hourly rates in excess of 1,500 t.p.h. were maintained.

Communications with the plant operators was quite good but obviously hampered by language. There were no problems with slowing down for topping off.

Samples: Were taken on arrival and at several times throughout the loading, sample cock on chicksans.

Fresh Water: Available from the jetty.

Fuel: May be supplied and arrives by barge. Bunkering cannot be undertaken whilst loading cargo and on this call the bunkering had to be completed before being allowed to load, despite this leading to a big delay.

Moorings: Three lines, 2 breast and 2 springs, fore and aft. Ratguards must be fitted. Mooring boat in attendance.

No problems with landing gangway on the quay and it may be turned out quite safely before arrival alongside.

Guards: On the quay, 1 at the gangway (discharge books required before being allowed to read drafts, etc.) and 1 each end. At night there was a 'guard' boat lying off our port side.

Officials: Polite and quite firm.

Papers required:

5 Copies General Declaration. (ship's particulars, etc.).
4 Copies Cargo Declaration.
2 Copies Crew's Effects.
4 Copies Crew's Lists.
4 Copies Passenger List.
2 Copies Crew Currency Declaration.
1 Copies 'Clean' Ballast Declaration.

No certificates were sighted.

Shore Leave: Granted until 2400 hrs. Masters allowed unlimited shore leave.

Toilets/Pollution: Vessels not fitted with sewage treatment plants must seal their toilets and use the shore facilities at the end of the quay. A statement to this effect must be signed.

A very strict control of pollution of all types is maintained and this includes ALL drainings from the maindeck. Scuppers must remain plugged right up to the moment of departure. Hoses used to de-ice the liquid line must NOT be allowed to drain overside.

Papers: Allow at least 3 hours for paperwork before and after working cargo.

Cargo Lines: Were blown through by the shore plant on completion of loading. Vapour return lines was used throughout and there is no charge for its use, vapour apparently being returned to the shore tanks.

Cargo loaded was at about −32°C.

SHIPMASTER'S REPORT: October 1980.

The following is an update of the September 1979 report above.

General: The port has been developed East of Odessa to handle overspill from Odessa and to develop bulk handling facilities.

In about 10 years in terms of tonnage handled, it is expected to be the largest in the Southern U.S.S.R. open to overseas vessels.

It has been in operation for 2 years and is 0.6 miles East of Grigoryeko light.

The port has been constructed from a fresh water lake. West breakwater head is in position Lat. 46° 35.80′ N., Long. 31° 00.70′ E. East breakwater head is in position Lat. 46° 35.80′ N., Long. 31° 01.03′ E. The port extends at present to the bulk liquid ammonia berth in position Lat. 46° 37.08′ N., Long. 31° 00.80′ E.

Port regulations are at present in Russian only, and English text should be available shortly (October 1980).

Approaching the Russian coast soundings once the 100 fathom bank has been crossed tend to be flat and give little indication of position.

The outer separation scheme buoy was observed on radar at 9 miles and visually at 7 miles.

The coast is identifiable on radar at 30 miles.

D/F beacons are generally reliable and as ALRS, out of 12 checked in September 1980 3 were not operating on the West coast of the Black Sea.

Notices:

		72 hours	*48 hours*	*24 hours*	*6 hou*
Agents:	Inflot Yuzhnyy		*	*	
Shippers:	Vneshtrans Yuzhnyy		*	*	
Charter:	Sovchart Moscow		*	*	
"	Sovchart Paris		*	*	
Pilot:	Inflot Ilyichevsk			*	*
"	Ilyichevsk Seapilot Station			*	*
Port:				*	*

Note: All through Odessa Radio.
* denotes send, but do not expect replies.
"Vneshtrans" is cable address for 'Sojuznestrans' shippers.

Pilot: Order Sea Pilot Ilyichevsk as notices.

Contact by VHF Channels 16 and 14 about 15 miles away from turning buoy.

Pilotage compulsory from port. Pilot speaks reasonable English and requires about 13 knots.

If anchoring at Yuzhnyy anchorage, he positions vessel under contro from Yuzhnyy Radar Station position Lat. 46° 36.05′ N., Long. 31° 01.3′ E.

The pilot cutter in the anchorage is a very bad sea boat and has grea difficulty in getting alongside. I believe the normal boat is undergoing repair.

On departure the Harbour Pilot leaves the vessel in the anchorage area and the sea pilot cutter 'Bravvy' guides vessel down channel to 'Ilyichevsk' turning buoy, his speed is 11 knots.

Anchorage: For large LPG ships anchorage No. 90 is used, centred on Lat. 46° 32.5′ N., Long. 30° 58.25′ E. with a radius of approximately 0.5 mile.

Depth 20 m., bottom mud and sand. Density 1024.

All anchoring is under control of Yuzhnyy radar station which gives the Pilot directions.

Berthing: There is no night berthing or unberthing, for gas carriers although the buoyage and leading lights are lighted, this seems to be for dredgers working. It would seem the hours are 0800 to 1700 hrs. (with possible extension in Summer months) with no vessels in the harbour or channel underway before or after these times. (We made it outwards in 12 minutes (Oct. 80)).

Visibility must be over 4 miles before berthing or unberthing operations take place. It may seem clear out at the anchorage but the weather in the harbour can be very different. This has been borne out from observations. We noted a temperature rise of 8° Celsius in 1 hour whilst moving out of port to anchorage.

Channel: The channel width is 118 m. and least depth of 14 m. (Checked by echo sounder). Pilots advise that there is a patch of 13.5 m. but this was not found. Bottom sand and mud. The shape is in the form of a 'V' so it is necessary to keep to centre of channel.

Buoys commencing seawards at Nos. 13 (starboard) and 14 (port) terminate in the harbour itself at Nos. 3 and 2.

The leading line is 013° to 193°.

Buoys (entering), black to starboard and red to port with Fl. W. & R lights respectively. Channel length 1.3 miles from breakwater heads.

South of the channel are two shoals one 1.6 miles S.S.W. marked by 2 white pillar buoys Fl. W. and isolated by 1 white pillar buoy about 1.5 miles S.W.

Confused cross currents from wind and the rivers emptying out nearby are apparent. Generally the surface current is Westward and sub-surface Eastward. Apart from causing navigation problems these currents cause much silting up.

Vessels enter the channel from the anchorage between the 2 shoal areas on an approximate course of 080° then turn hard to port when in line with the channel to bring leading lights in line before entering channel. On leaving much the same is done, except a more Easterly course is resulted.

In the harbour itself in calm conditions there is a noticeable Southerly current of 0.5 knots.

The dredged channel at present terminates just astern of the ammonia berth marked by 2 buoys.

Leading marks, white and orange in colour are situated on raised ground N.E. of the harbour, and at night exhibit fixed white lights under which are neon-like strip green lights.

Vessel is swung short round to port off ammonia berth, berthing starboard side to head out. On fertiliser berths there seems to be no accepted side to.

The breakwaters consist of concrete blocks piled haphazardly on top of one another. Immediately to the East are the ruins of 2 other small breakwaters. At the foot of the Eastern breakwater there is a large concrete radar and Port Radio Control Tower. This is conspicuous in good visibility but would benefit from being painted white or orange to assist identification in conditions of haze which seem to be prevalent.

Just below this tower on the harbour side is a small boat pier for use of Port Authority craft.

The harbour offices themselves are in a large concrete building at the Southern end of the fertiliser quay where Customs, Agents, police, doctor, chandler, etc., reside.

Tugs: Four tugs are available. All ship's lines. 2 of 1,200 h.p., 1 of 2,500 h.p. (Tigris) and 1 of 4,500 h.p.

The large tug of 4,500 h.p. painted orange hull is a large coastal tug normally stationed at Ilyichevsk and unsuited for harbour towage duties. All tugs have icebreaking capability.

It is essential that the larger tugs have double lines. They use the lines out of the centre lead bow and stern with the 1,200 h.p. tugs pushing.

Outwards (October 1980) we dispensed with 4,500 h.p. tug's services and used 1,200 h.p. tug to tow us.

1,200 h.p tugs accompany vessel down channel to No. 10 buoy with larger tugs to anchorage area.

Berths: Presently 4 berths in operation, 3 for bulk Urea and packaged goods, with 4 travelling loading gantries (manufactured by PHB of Germany) and liquid ammonia and phosphoric acid berth with minimum depth of 14.0 m. alongside. The fertiliser berths I believe range in depth from 13.5 m. to 16 m.

Gangway can be turned out beforehand.

The ammonia berth is 125 m. long and 43 m. (measured) proud of the main dock face, it leads in a 171° – 351° direction. The other berths are offset and leading in approximate 005° – 185° direction.

The fendering is excellent with long rubber tubes and corners well protected on all berths.

Bollards are plentiful.

Moorings: Ammonia berth 3, 2, 2, each end with bow/stern and breast lines leading to main dock face and springs to 'T' section.

Springs first out and last in.

As usual aft have to compromise. We put breast lines from main deck and springs from aft, both to 'T' section. Mooring boat in attendance, bow first docking and undocking.

Unberthing, vessel pulled laterally clear of berth, about 100 m., by tugs before moving ahead down harbour.

Loading: Ammonia: 2 loading and 1 Vapour Chicksan. Max. rate about 2,000 t.p.h. total (2×1,000 t.p.h.).

No charge for Vapour Return Line (VRL).

Shore personnel connect and disconnect.

Hydraulic couplings.

VRL ships 8 – 12 to shore 12 – 12 150ASA/300ASA.

Liquid shore spools 150ASA/300ASA.

No emergency stop except by watchmen in hut under chicksans, who speaks little to no English. Essential whistle signal agreed.

On visit (Sept./Oct.) 1980 shore tanks were low on product with max. rate at 700 t.p.h. Sometimes down to 200 t.p.h.

Samples frequently taken from cock on chicksan.

Temperature warm at −32° Celcius on all visits. Note protest.

Loading programme to be agreed before commencement.

Surveyor with interpreter, takes about 2 hours for figures. Plant has to be off whilst readings taken.

Acid: Forward (South) of ammonia chicksans – 2 arms.

Shippers: 'Sojuznestrans'.

Statement of fact is compiled by the Master during loading on official form which is an advantage.

Tank atmosphere tested prior to commencement.

No purging or cooling alongside, has to be done at anchor.

Plant: Total storage capacity 100,000 tonnes with about 18 tanks of 5,500 tonnes each. Four tanks can be seen from the ship, the remainder are behind.

The anhydrous ammonia plant was built by the Pullman Kellog company of U.S.A. and fertilizer section by PHB of Germany.

The tank pumps 'Carter' lose suction with 1,000 tonnes heel in tank. Approx. 2,000 tons per day of ammonia is produced at the plant with about 7,000 tons per day being pumped in by pipe-line from the Volga region.

The storage capacity of phosphoric acid was estimated to be 12,000 in 6 tanks just behind the berth.

All prime quality anhydrous ammonia is exported mainly to Italy and U.S.A. with the lower grades being used locally.

Pollution: VERY strict. Be VERY careful.

Scuppers to be plugged. Make sure decks washed down prior to arrival and that no lube oil is washed overside.

Make sure ballast and pumps clean.

Ships not fitted with sanitary tank system must have their toilets locked up and all crew use toilets astern of vessel. The sanitary system is checked.

No pumping of ballast in anchorage or in harbour without Port Authority permission. (A Greek ship was fined for pumping ballast at anchor).

Do not have fire hoses draining overside, we had them draining into ballast tanks.

Be very careful when disconnecting that no hose water drains overside.

Agent: State Agent 'Inflot'. Yuzhnyy office telephone 59-38-75. Yuzhnyy office has been in operation for about a year. Telex: 232 722.

Main office in Odessa.

Office is in port building at end (South) of fertiliser quay. Good English and very co-operative.

Night staff, 2000 hrs. – 0800 hrs., good.

Can be contacted by VHF at anchorage or alongside by Channel 16 and then talk direct on Channel 8.

Also telephone at bottom of gangway with guard but no success. Order money (which all unused must be handed back on departure) 24 hours beforehand. If shorter notice given Agent will give you what he has in office safe.

Accepts Notes of Protest on behalf of receiver.

Cable address 'Inflot Odessa' or 'Inflot Yuzhnyy'.

A minimum of 2 days is required for a telephone call to U.K. (Can also apply to parts of Russia, the Agent told me).

Medical: Through Agent.

Every day except Sunday a doctor attends the clinic in the port building, 0900 hrs. to 1300 hrs. We had 1 crew member with a fractured hand who was checked by doctor and taken immediately to Odessa for X-Ray, then brought back to the ship plastered up, all in 3 hours, with full English report.

Outside these hours a nurse is on duty.

Water: Fresh water available from quay. Agent will send waterman. Metered. Ship hoses international connection flange. $0.70 per tonne,.

Chandler: Two. Technical and produce.

Some local produce available, basically vegetables. No salads.

The produce chandler in port building deals in curios, champagne, vodka and caviar, only accepts dollars.

We obtained from Technical chandler a Russian chart of Odessa – 2 days' wait.

Suggest any requirements ordered well in advance.

Films: Walport films can be changed with suitable ships in port. Agent very co-operative in this respect, finding out for us if a Greek ship had Walport films which she did and like ourselves wanted a change. Agents and customs officer with one of our seamen changed the boxes – no difficulties encountered.

Fuel: In short supply and long waits. By barge to Odessa waiting anchorage. October 1980 – 3 day wait for diesel at $358 per tonne.

Repairs: Very difficult.

Radar/Wireless: Not sealed or checked. Bridge and radio room not inspected. Radar use seems to depend on Pilot and guards. From anchor to berth we had to turn off radar. On last visit guards made ship turn off before sailing.

This visit no problem, radars tested prior to sailing and left on.

Guards: At bottom of gangway and at bow and stern. One at bottom of gangway takes discharge book when person steps ashore, even for draft.

There is a tug anchored off vessel at all times but this is for fire duties.

Formalities: Very good and quick, as long as procedure followed. Everyone has to muster in front of Immigration Officer on arrival and departure, and is checked against discharge book.

Required:

1 Copy Personal Effects Declaration Form (very strict on this, require all jewellery to be declared).
1 Copy Currency List – crew. (Again very strict and check up frequently in port on amount drawn by individuals).
2 Copies Health Form.
2 Copies Vaccination List.
5 Copies Crew List.
5 Copies General Declaration (IMO Standard form).
2 Copies List of Drugs in Master's care.
1 Copy Clean Ballast Declaration and request to pump in port.
3 Copies Loading Instructions.
2 Copies Cargo Requirements.
1 Copy Statement to Port Captain, all Safety Equipment in good order.
1 Copy Statement of type of Sanitary System and in use.
No Stores List required.
Bond not sealed.

Port Captain boards vessel soon after arrival and fills in long safety questionnaire with Master. If certificates dates in doubt will want to sight.

Agent says Port Captain will allow ship to sail with Safety Certificate up to 2 days before expiry with clearance for Bosphorus.

Allow 2 hours for papers before cargo commences and after completion.

Seamen's Facilities: A seamen's club has been established just outside main gate. Roubles only taken.

AUTHORITY: The Port of Yuzhnyy Authority, 1 Grigoryevka, Port of Yuzhnyy, Odessa Region, U.S.S.R. *Tel:* 59-30-92; *Local Exchange:* 5-50, 5-52. *Telex:* 232722.

AGENT: Yuzhnyy "Inflot" Shipping Agency Grigoryevka-1, Kominternovsky Rayon, Odesskaya Obl., Port Yuzhnyy, U.S.S.R. Tel: 593780, 593777, 593875. Telex: 232722. Cables: Via "Inflot Odessa".

ZHDANOV: 47.06 N. 37.35 E. (See Plan Book)

GENERAL: A sea port of Azov port, Zhdanov is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it and at the mouth of the Kalmius River.

All-year round navigation is possible but during 30 – 90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3 – 4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Zhdanov consists of the Outer and Inner Roads, the Ugolnaya (or the Coal) Harbour, the Grain Harbour, the Ship-repairing Basin, the Schmidt Harbour at the mouth of the Kalmius River, and the port of Azovstal situated Eastward of the mouth of the river.

DOCUMENTS: Refer to beginning of U.S.S.R. section.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 hours and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 21 (Lat. 45° 13′ N., Long. 36° 27′ E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour Approach Channel, Buoy No. 16, a Master should order a Harbour Pilot.

ANCHORAGES: A good anchorage can be obtained in the Outer Roads of the port of Zhdanov situated opposite the port entrance. The depths in the roads are from 5 m. – 7 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm).

The max. allowed speed in the approach channels is 4.5 knots and in the part of the Coal Harbour Approach Channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 8 m., length/breadth no restrictions.

HEALTH: After presenting Vaccination Certificates Free Pratique obtained. After proceeding from one port of U.S.S.R. to another Free Pratique obtained automatically.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

RADIO: Vessels approaching the port of Zhdanov should establish radio contact through Zhdanov Radio port radio station operating 24 hours daily on the following frequencies:

	Frequencies (kHz)		*Type of transmission*	*Time of work*
Call sign	*Working*	*Calling*		
UDC	500/473	500/480	A1A	H24
"Zhdanov-Radio"	2182	2182	N3E	H24
"Zhdanov Radio-1"	156.8*(16)	156.8*(16)	F3E	H24
(Port Controller)	156.7*(14)	156.7*(14)		
"Zhdanov Radio-5"	156.45*(9)	156.45*(9)	F3E	H24
(Harbour Master)				

*Frequencies are given in MHz.

RADAR: The port of Zhdanov radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

Storm signals are exhibited at a signal mast located at the Dividing Pier.

TUGS: Available. Use ship's lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 10 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 32 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

It is protected from S.E. winds by the Inner Roads Breakwater. There are numerous piles and dolphins along the Eastern Pier. The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Schmidt Harbour is situated at the right bank of the mouth of the Kalmius River, at the S.E. outskirts of the town of Zhdanov. It is used by small vessels. The access to the Schmidt Harbour is by an approach channel dredged in the coastal shoal water. Navigation along the channel is ensured by leading lights.

Storm signals are shown at the station situated Southward of the entry to the Schmidt Harbour.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Zhdanov. It passes through a coastal shoal then enters the Southern part of the Coal Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

DENSITY: About 1005.

WEATHER: The changes in the water level is mainly caused by effects of the wind observed here all the year round. The fall of the water level is usually caused by Northerly and N.E'ly winds but rises of the water level are due to S.W'ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in the atmospheric pressure, so called "Seish" effect. The "Seish" usually starts during calm weather and can last, on average, for about 24 hours.

The maximum range of the water level due to the "Seish" effect observed in August is about 0.6 m.

FRESH WATER: Delivered at berth. Also delivered by lighters.

FUEL: Available at berths. Also delivered by lighters.

OPENING/CLOSING HATCHES: Crew allowed open and close, stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificates required.

CUSTOMS ALLOWANCES: No quantity restrictions. Nothing to be taken ashore.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 6.5 m.

All kinds of repairs for vessels of up to 9,000 d.w.t. can be carried out.

DRY DOCKS: 2,500 and 5,000 tons.

REPATRIATION: All facilities for repatriation subject to visa formalities.

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 3 hours, GMT plus 4 hours in Summer.

HOLIDAYS: 1st January; 1st, 2nd, 9th May; 7th October; 7th, 8th November.

AMBULANCE/FIRE: Ambulance 003; Fire 01.

TELEPHONES: Can be placed on board.

AUTHORITY: The Port of Zhdanov Authority, 99 Admiral Lunin Prospect, 344000, Port of Zhdanov, Donetsk Region, U.S.S.R. *Tel:* 5-92-34. *Cables:* Morport Zhdanov.

AGENT: Zhdanov Main Maritime Agency "Inflot", 89 Admiral Lunin Prospect, 341010, Zhdanov, Donetsk Region, U.S.S.R. Tel: 552415, 58198, 58579. Cables: Inflot Zhdanov. Telex: 115124.

NOTES

Please also advise Shipping Guides Ltd.

United Arab Emirates

ABU AL BU KHOOSH: 25.26 N. 53.08 E.

(See Plan Book)

LOCATION: The terminal is bounded by the following co-ordinates South of Sassan Oil Field.

(a) Lat. 25° 31′ N., Long. 53° 05′ E.
(b) Lat. 25° 29′ N., Long. 53° 12′ E.
(c) Lat. 25° 26′ N., Long. 53° 05′ E.
(d) Lat. 25° 26′ N., Long. 53° 12′ E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early Departure Procedure: At the Master's option, he may, in order to expedite the turn-round of vessels and avoid undue delays caused by weather or other circumstances, use the Early Departure Procedure. In this case Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring delays of undue nature, the relevant documents will be airmailed to the Master to await the vessel's arrival at discharge port.

The official cargo, quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a letter of protest will be acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Total ABK Terminal when the crude oil loading documents have been delivered to the Master, or in the case of E.D.P., clearance will be given through the Mooring Master.

Mail: Official ship's mail and the crew's personal mail will be handled by Total ABK and shipowners debited accordingly.

PILOTAGE: Compulsory within the Terminal limits. Vessels to be moored at Total ABK Terminal will be boarded by a Total ABK Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the storage tanker, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. A qualified Deck Officer must be on watch at all times while the vessel is alongside the storage tanker.

ANCHORAGES: An area immediately South of Terminal limits is designated as the Anchorage Area, centred on position: Lat. 25° 26′ N., Long. 53° 08′ E. This co-ordinate represents the centre of a circle with a radius of 0.5 miles which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited.

(c) RADIO BEACON/FOG SIGNALS

Radio Beacon	Bridge PP LP-Flare	Aeronautical	Code R.P. 248 kHz – 25 W.

MAX. SIZE: Max. 270,000 d.w.t. Max. draft 22.5 m. Depth of water 27 m.

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his notice of readiness.

Notices of Readiness will be received provided one or other of the following events shall have transpired: (a) the Master shall have received the Mooring Master on board, or (b) the Master shall have dropped anchor in the Anchorage Area.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is closed when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the ABK Terminal Superintendent or his deputy.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "Eiko Maru" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for Mooring: Vessels are requested to have, on their starboard side, a pilot ladder and/or pilot hoist or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's launch. Vessel's platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform. Tankers are requested to have ready on the forecastle, 2 head lines, polypropylene if possible.

Tankers are requested to have ready on the port side amidships a derrick rigged and ready to pick up the hoses (16 in. diameter).

Hoses: The hoses are hoisted by flow boom system, connection by storage tanker crew. The Mooring Master will advise the ship's Officer in charge concerning lifting techniques.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of Communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency Shut Down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 16.

Loading Rates: Maximum loading rate will be 9,000 m.t.p.h.

Gases: ABK crude oil contains H_2S (sulphurated hydrogen). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve Closure Against High-Speed Loading: No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

RADIO: Initial communication between vessels and Total ABK should be via Bahrain Radio (call sign GOU) which operates on a 24 hour basis. ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahrain Radio.

Communications Within 60 Miles of Terminal: Once ships are within 60 miles of ABK Terminal, communication may be established by radio telephone on International Marine VHF Channel 15. This frequency is monitored continuously.

Once contact has been made on Channel 15, further conversation should be conducted on either Channel 14 (156.7 MHz), Channel 12 (156.60 MHz) or Channel 15 or 17.

Communications After Total ABK Mooring Master has Boarded: A Total ABK Mooring Master will board incoming tankers in the Anchorage Area and will bring with him portable VHF radio telephone units. From that time onwards, all and any communications between ship and the storage vessel will be conducted by the Mooring Master.

Radio Transmissions for Advice of Tanker Arrivals: Telegram to be sent by the storage tanker to the export tanker about 80 hours before her arrival:

Please advise your ETA in GMT 72, 48 and 24 hours before arrival to Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio stop Cargo requirements stop Deballasting time if any stop Maximum loading rate acceptable stop Distance in metres from bow to manifold stop Flange dimensions of vessel's manifold connection stop 50 miles before arrival please contact terminal by VHF Channel 15 to receive berthing instructions stop Total ABK.

Mooring Instructions: If vessels are obliged or instructed to anchor, they should do so in the recommended area about 3 nautical miles from the storage vessel.

TUGS: Two tugs, each with 100 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipelines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection During Loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be hoisted to the helideck on the storage tanker and flown by helicopter to Dubai or Abu Dhabi.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are not available at the Terminal.

SHORE LEAVE: Not possible.

GENERAL:

Radio Equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the SPM except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring shall be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

Agency: Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

SHIPMASTER'S REPORT: 1977: The following information may be of value to other Masters:

(a) The holding ground in the anchorage is very bad, this vessel dragged her anchor (10 shackles out) in a Force 5 from the N.W.

(b) Only documents supplied on departure were Bills of Lading, *no* port clearance documents supplied.

(c) No Customs or Immigration Officials at terminal therefore no documents required.

SHIPMASTER'S REPORT: 1978: The storage tanker is 320 m. long. Centre of the manifold to bow is 140 m. We berthed with our bows level which meant our stern overhung the other vessel and we were not able to use our first ropes ashore leading from the after end of the poop. *Forward:* (SV=Storage Vessel). 2 headlines to SV. 1 spring to SV. 1 rope from SV with end to be turned up on own vessel's bits forecastle head. 2 more headlines to SV and 1 spring from SV.
Aft: 2 sternlines to SV. 1 backspring to SV. 1 backspring from SV, eye on bitts. 2 more stern lines to SV.

AUTHORITY: Total – Abu Al Bu Khoosh, P.O.Box 4058, Abu Dhabi, U.A.E. *Tel:* 33.55.66. *Telex:* 22347 Totabk Em. *Cables:* Totabk. *Contact:* T. Makerat, Head of Terminal and Marine.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd. P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 334300 (10 lines). After office hours Tel: 325143, 366665, 341728, 326083. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 mHz) and Marine HF, standing by on 3539 kHz. Call sign "Confidence, Abu Dhabi".

ARZANNAH ISLAND: 24.47 N. 52.33 E.
SBM: 24.46 N. 52.31 E. (See Plan Book)

PORT LIMITS: *Port Area:* Contained within the following co-ordinates:

"A"	Lat. 24° 50′ 12″ N.,	Long. 52° 29′ 24″ E.
"B"	Lat. 24° 50′ 12″ N.,	Long. 52° 37′ 12″ E.
"C"	Lat. 24° 43′ 48″ N.,	Long. 52° 37′ 12″ E.
"D"	Lat. 24° 36′ 48″ N.,	Long. 52° 34′ 36″ E.
"E"	Lat. 24° 37′ 00″ N.,	Long. 52° 29′ 24″ E.

LOCATION:

Port Area and Terminal: Arzannah Island is located at Lat. 24° 47′ N., Long. 52° 33′ E. and is the base for export of crude oil by the Company. The Port of Arzannah is the area defined above.

A tanker terminal and another berth on Arzannah Island for vessels destined to other than the tanker terminal, are located within the port area.

PILOTAGE: Conduct and movement of vessels within the port area are controlled by the Harbour Master. A Company designated Mooring Master is required for the berthing and unberthing of vessels at the Storage Tanker.

Mooring Master: Pilotage is compulsory within the "Port Area" and no vessel may enter or depart the port area, berth or unberth at the Storage Tanker or conduct any other manoeuvres of the vessel without prior notification to the Harbour Master and without the assistance of a Company designated Mooring Master unless otherwise ordered by the Harbour Master. The Company designated Mooring Master for vessels bound for the Storage Tanker will board the vessel at Khor Fakkan (Lat. 25° 22′ N., Long. 56° 22′ E.) or Jebel Dhanna Pilot Station as directed by Lamnalco Pilots Khor Fakkan. The Company designated Mooring Master for vessels bound for the Shore Berth will board the vessel at Khor Fakkan or such other location approved by the Harbour Master upon request of the vessel made in the first notification. (See "Radio").

The Mooring Master's function will be to advise the Master of the vessel for the above stated purposes. The Master of the vessel always remains responsible on behalf of the vessel's owner for the safety and proper navigation of the vessel. The vessel must remain at Khor Fakkan or such other location approved by the Harbour Master until the Mooring Master is aboard. Mooring Master stays onboard and leaves at Khor Fakkan outward bound.

ANCHORAGES: Anchoring of vessels is prohibited within the port area and terminal area. An area 3.5 miles West of the Storage Tanker in the vicinity of Lat. 24° 46′ N., Long. 52° 27′ E. is designated as the anchorage area.

RESTRICTIONS: See "Berthing".

MAX. SIZE: *S.B.M.:* Max. d.w.t. 280,000 (export tanker). Max. draft 43 ft. Depth of water at SBM 107 ft. Least depth in approaches 48 ft.

Sailing Draft: The draft of loaded vessels leaving the Storage Tanker is controlled by the water depth between Dalma Light Float and the No. 1 buoy in the outer channel. Minimum under keel clearances recommended by the Mooring Master are as follows:

D.W.T.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Master prior to starting to load.

RADIO: The Company cable address is "Amerhess – Abu Dhabi" and telex number is 949 – 22275. The Company also maintains radio watch on International Marine VHF Channels 16 and 67.

Notice of Arrival:

A. Vessels bound for the *STORAGE TANKER* must advise the Company as follows:

72 HOURS: Not less than 72 hours prior to arrival at Khor Fakkan vessels will send a cable or telex to the Company and cable to "Lamnalco Khor Fakkan" or telex to "Lamnalco" (telex number 89034 Pilotkf) providing the following information:

(a) Estimated time of arrival at Khor Fakkan.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Quantity of oil to be loaded.
(d) Distance from the bow to the cargo manifolds.
(e) Size, number and type of cargo connections.
